Personal Notes: Arthur Hull Hayes, recently named pres. of CBS Radio to replace Adrian Murphy, who resigned to retire from active business, elected a v.p. & director of parent CBS Inc. this week . . . Donald H. McGannon, v.p. & gen. exec., elected to board of Westinghouse Bestg. Co., which moves headquarters about June 1 to Chanin Bldg., 122 E. 42nd St., N. Y.; Joseph E. Baudino, WBC exec. v.p. in old Washington headquarters, elected v.p.-Washington; W. C. Swartley, gen. mgr. of WBZ-TV, elected v.p.-Boston . . . Thomas F. Flanagan, managing director of Station Representatives Assn. for last 7 years, retires shortly but continues as consultant with offices in SRA; no successor has yet been chosen, according to SRA pres. Adam J. Young Jr. . . James W. Beach, sales mgr. of WBKB, Chicago, promoted to director of ABC-TV central div., Chicago, replacing Gerald Vernon, resigned . . . Jerry Danzig, ex-CBS-TV, named gen. exec. for programming for NBC-owned TV-radio stations, reporting to v.p. Charles R. Denny . . . Lawrence L. Wynn promoted to sales mgr. of WABC-TV, N. Y., succeeding the late Trevor Adams . . . Marvin H. Hult promoted to mgr. of WMBD, Peoria, under pres. Charles C. Caley, who also has engaged Robert O. Runnerstrom, ex-WLOK-TV, Lima, O., in an executive capacity; Harold V. Phillips, WMBD sales mgr., recently resigned to take similar position with WTVH-TV, Peoria . . . John C. Mullins has taken over as pres. of KBTV, Denver, which he and partner Frank Leu bought for \$1,000,000 from local business group (Vol. 11:13) . . . John Rossiter resigns as v.p. & gen. mgr., KBMT, Beaumont, Tex., and management has been taken over by Randolph C. Reed, pres. & 50% owner . . . Thomas B. Coulter, ex-radio KYSM, Mankato, Minn., named asst. to NARTB radio v.p. John F. Meagher . . . Alex W. Monahan, ex-Bitner stations in Indianapolis & Evansville, joins WWTW, Cadillac, Mich., as program director under David F. Milligan, gen. mgr.; Daryl Sebastian shifted from operations to promotion & mdsg. mgr. . . Tom Gavin returns to Duluth area (from WIRL, Peoria) to be gen. sales mgr. of Ridders' WDSM-TV & WDSM under v.p. Rodney Quick . . . John Esau, onetime gen. mgr. of KTUL, Tulsa, recently pres. of KTVQ, Oklahoma City, on May 23 becomes business mgr. of *Television Age* (Sol Paul, publisher) . . . Wayne Oliver resigns as Associated Press TV-radio editor, will announce new post shortly . . . Bob Mendelson resigns as v.p. of *Sponsor* to head group acquiring several radio stations . . . Brent Kirk promoted to station mgr. of KUTV, Salt Lake City; John P. Brophy named sales mgr., Alan F. Frank program-production mgr. . . W. Gordon Swan, WBZ-TV, Boston & Paul A. Loyet, WHO-TV, Des Moines, to address National Fire Protection

Assn. convention May 18 in Cincinnati on "Promoting Fire Prevention on Radio & TV" . . . Ted Eiland will be gen. mgr. of WJNO-TV, Palm Beach, Fla., having resigned as pres.-gen. mgr. of WTAP, Parkersburg, W. Va., which he and Baer-Chernoff families sold to Zanesville Publishing Co., operators of WHIZ-TV (Vol. 11:14) . . . John H. Bone, ex-gen. mgr. of WNEM-TV, Bay City, Mich., named gen. mgr. of WNAO-TV, Raleigh, N. C. . . Marcy Tinkle, ex-Petry, joins promotion dept. of ANPA's Bureau of Advertising . . . John Jackson, mgr. of RCA adv. services, named program chairman of Assn. of National Advertisers accounting seminar May 20 at New York's Hotel Plaza . . . Howard W. Coleman promoted to adv., promotion & merchandising mgr. of WNBQ & WMAQ, Chicago, succeeding John M. Keys, now sales director . . . Aubrey Williams, ex-TV-radio director, Fitzgerald Adv., joins with E. V. Brinckerhoff to form Brinckerhoff & Williams Agency, New Orleans . . . Brooks Elms, ex-McCann-Erickson, named TV-radio director, Birmingham, Castleman & Pierce . . . Edward H. Feldman, ex-TV-radio director of Biow-Beirn-Toigo in Hollywood, elected v.p. of Desilu Productions (*I Love Lucy*), in charge of commercial div. . . Meredith M. Daubin, since 1938 with Dow, Lohnes & Albertson, Washington law firm specializing in TV-radio, has resigned to join the George O. Sutton law firm . . . Milton F. (Chick) Allison, with CBS Radio Spot Sales since 1949, last 2 years as eastern sales mgr., promoted to asst. to gen. sales mgr. Henry R. Flynn . . . George Lindsey promoted to sales mgr. of Weed TV, Chicago.

John H. Battison, who installed and for a while managed CHCT-TV, Calgary, and who before that was with Capitol Radio Institute and in consulting practice in Washington, has resumed his consulting business with office at 4515 Saul Rd., Kensington, Md. (phone Olympic 7-9593); first client is U of Georgia's new Continuing Education Center, Athens, Ga., where Ch. 8 is reserved for education.

White House press secy. James C. Hagerty picked by Radio & Television Executives Society of N. Y. for its award for distinguished service to the broadcasting industry in opening up the President's news conferences to TV-radio. Presentation will be at White House soon.

Agnes McGillvra, wife of station rep Joseph McGillvra, has filed application for new Kingston, N. Y. AM (1-kw daytime, 1300 kc). She has minority interests in WOKO, Albany, N. Y. and KXL, Spokane, Wash.

Theodore Streibert, director of U. S. Information Agency, was to leave May 15 for inspection of USIA outposts in Africa, returning to Washington June 8.

POPULAR SIDE of the subscription TV struggle is undoubtedly in favor of the proponents—indicated not only by fact that FCC up to May 13 had received some 8500 endorsements vs. about 1800 oppositions, but by fact that most editorial opinion in general publications, including TV columns, has a pro-pay flavor.

Opponents of pay-as-you-see are becoming aware of this, and accordingly are seeking to tailor arguments with full knowledge of public temper. But they have much more difficult row to hoe than do proponents—who evoke tremendous enthusiasm by simply promising great shows, while opposition can merely issue dark warnings that free TV might go out the window.

Most of FCC commissioners and their staff members, however, seem unimpressed by volume of mail, brushing it aside as “results of promotion.” They’re waiting for formal answers June 9 to the very searching and pertinent questions raised in notice of rule-making (for full text, see Special Report, Feb. 12). They’re extremely sophisticated about intra-industry fights and are really holding off judgment until pros-&-cons are firmly nailed down.

Most of FCC people have always been skeptical about subscription TV, and the betting among them today is strongly against possibility that pay system will be approved—yet all concede that battle has scarcely begun.

* * * *

Idea of authorizing fee-TV on limited basis as a “commercial test” is approached very cautiously at Commission, where there’s some feeling that such a move might ultimately prove to be simply a final decision in proponents’ favor—that it would take the power to make an ultimate decision out of Commission’s hands. Not much thought has been given to idea, however.

It’s probable that full, formal oral hearing will eventually be conducted, just as it was in color and allocations rule-makings. Several parties will definitely petition for such hearings in June 9 filings, on grounds that conflicting factual information must be tested in cross-examination, and Commission is likely to accept that contention. There’s also opinion around FCC that Congress will—or should—take decision off Commission’s hands; that issues of public policy transcend FCC’s jurisdiction. Furthermore, there’s the cynical view that it’s a fine political football, basic principles of which aren’t buried in technicalities.

* * * *

Two leading TV columnists tackled subject this week, both coming up with pro-pay conclusions. *N. Y. Times’* Jack Gould on May 8 wrote:

“This corner has supported the principle of toll TV and still does so, but we are distressed to see the blithe assumption that it will magically solve all the TV medium’s very real cultural problems. It certainly will not do so without more searching study and preparation . . . The competitive economics of show business being what they are, the pay-as-you-see contention that toll video will not

touch the existing TV structure but merely add a new wing seems naive, indeed. It is up to the toll TV advocates to spell out in crystal-clear affidavits to the FCC, not in publicity handouts, where they stand on over-all balance in TV programming . . .”

N. Y. Tribune Syndicate’s John Crosby concludes in May 13 column that “subscription TV is inevitable, as I thought sponsored TV was inevitable for Great Britain to meet TV’s ever-mounting costs. How and when it’s coming, I have no idea.” Crosby lists arguments on both sides, evidently feels pros have the edge. He says he can understand exhibitors’ opposition but can’t fathom lack of support from networks and stations which, he says, “could conceivably wind up even richer than they are now in spite of themselves.” He says best argument against toll TV is that “it’s an infringement of your rights” because scrambled picture makes channel temporarily useless to those who won’t or can’t pay.

* * * *

Bickering continued on many levels, meanwhile. A fact-finding committee of 25 AFL show business unions in New York resolved against pay system, saying it would impose burden on low income groups, deprive invalids of free TV, usurp free airwaves, etc. Among letters to FCC was one from Mrs. Franklin D. Roosevelt, stating that toll TV “appears to be to a very good idea, and one that I would like to see tried.” Also on file is letter from U of Pittsburgh athletic director Rear Adm. T. J. Hamilton stating: “If revenues received from subscription TV can be properly distributed to insure preservation of national athletic and physical training programs in colleges and schools, much benefit will accrue to our country.”

Sponsor Magazine reports that majority of advertising executives interviewed don’t believe that subscription TV is a “clear threat” to free TV; that public acceptance will be limited; that competition of pay systems might improve free TV. Other developments:

(1) International Telemeter’s talk of using closed-circuit for pay system (Vol. 11:19) prompted Leon P. Gorman, WABI-TV, Bangor, Me. to invite Paramount-controlled Telemeter to join “Organizations for Free TV,” wiring Telemeter v.p. Paul MacNamara that “you can count on me to back your proposal because this is the exact way that I think pay-as-you-see TV should be handled.”

(2) Zenith rejected invitation of Hollywood Ad Club for another Faught-Starr debate (Vol. 11:16), stating that opponent Alfred Starr is hiding behind “false front” instead of coming out and emphasizing his theatre ownership. Starr said of Zenith’s action: “As far as the opposition of the theatre owners is concerned, is there anything wrong or un-American about this? Is Comdr. McDonald’s ambition so lofty and lily white that nobody can stand in his way?” Telemeter’s MacNamara will appear instead.

(3) First returns on *Saturday Review’s* poll showed about 65% for toll systems, 26% against, 10% uncommitted.

Largest theatre-TV hookup to date has been announced by Nathan L. Halpern’s Theatre Network TV Inc. for May 16 Marciano-Cockell heavyweight title bout from San Francisco at 11 p.m. Fight will be carried in 83 theatres with total seating capacity of 250,000. It won’t be available on home TV (but will be carried on radio) nor will it be shown in any theatres west of Denver. California theatres are blacked out under terms of contract. In New York area, it will be carried by unprecedented total of 17 theatres.

N. Y. Herald Tribune’s new digest-size *TV-Radio Magazine* makes its first appearance May 15 as regular Sun. supplement; its editor is columnist Hy Gardner; managing editor is Al E. Davies, ex-asst. night editor.

CBS-TV Pacific Network has been awarded exclusive rights to 8 Pacific Coast Conference football games this fall on dates when NCAA game-of-the-week is not being televised nationally (on NBC-TV). Schedule: Sept. 16, Texas A&M at UCLA; Sept. 24, Illinois at California & Stanford at Oregon State (night); Oct. 8, USC at Washington; Oct. 22, Stanford at Washington & USC at California (latter in Los Angeles area only); Nov. 5, Oregon at Washington State; Nov. 12, Oregon State at California. NBC-TV will air Notre Dame-Southern Methodist game in midwest only, on Sept. 24.

Bangkok, Thailand gets first TV station in June, operated by Thai Television Co.; it’s an RCA installation, and 1000 RCA sets have been imported.

Telecasting Notes: Spectaculars a la NBC's are reasonably certain to be offered by CBS-TV next season. Times haven't yet been determined, but they will be 90-min. drama & variety shows, some in color. Shows will rotate, pre-empting regular sponsorships, according to present plans, and there's even talk that some will come Sat. nights opposite some of NBC's. Unconfirmed, but probable, is that first color spectacular will feature Noel Coward in 90-min. version of his Broadway hit *Present Laughter* on a Sat. 10-11:30 p.m., which would put it opposite NBC's George Gobel . . . Fanning flames of controversy over spectaculars, ABC-TV Research has issued report based on Nielsen data, purporting to show that advertisers get more for their money with conventional programs than with spectaculars . . . Effectiveness of repeats of live TV drama (Vol. 11:17-19) is further illustrated by Trendex rating of May 10 *Fearful Decision* on ABC-TV's *U. S. Steel Hour*; it attained 18.1, compared with 11.6 when first presented June 22, 1954—though precise comparisons can't be made because level of viewing is normally lower in late June than in May . . . Washington Star TV columnist Bernie Harrison commended *Fearful Decision* repeat, observing that "TV ought to demonstrate some gumption and repeat more of its 'live' hit shows—especially the plays. What really whips me is that TV is forever trying to wangle more first class movies out of Hollywood—yet refuses to dip into its own growing library." He called for repeats of *No Time for Sergeants*, *Appointment in Samarra*, *Bachelor Party & Marty* . . . Stratospheric values of TV-radio program properties are underlined by this week's report from Lone Ranger Inc., recently purchased from King-Trendle by Jack Wrather, stating sponsors General Mills and American Bakeries are paying his firm \$5,213,000 for program rights for 4 years while another \$2,500,000 will be derived from 85 manufacturers licensed to use the name and from newspaper, comic book and recording rights . . . Walt Disney's merchandising mgr. Vincent Jefferds tells *Film Daily* that Disney this year will realize more than \$1,000,000 in royalties from *Davy Crockett* merchan-

dise . . . Biggest single program entity in TV-radio is believed to be Arthur Godfrey, who represents well over \$20,000,000 of CBS's annual billings; Dave Garroway's *Today* on NBC-TV is running ahead of that in billings, but of course isn't pegged so closely to one personality . . . NBC scouting local theatre groups for TV shows, signs up Dallas State Fair production of *One Touch of Venus* for Aug. 27 spectacular, may tie up with famed Phoenix Theatre; Jack Rayel, exec. producer, handling long-range planning . . . More proof of TV's growing affinity with movies: Ed Sullivan (*Toast of the Town*) signed to produce and star in major independent feature film to be released by Warner Bros. . . . Gertrude Berg will test her new play *Mind Over Momma*, which she wrote with James Yaffee, on ABC-TV May 31, after which she plans to produce it on Broadway; her last stage play was *Me and Molly* in 1948 . . . Paddy Chayevsky's *Marty*, first done on *Philco Playhouse*, then made into movie, wins Golden Palm grand prize this week at International Film Festival in Cannes . . . Dan Petrie to be chief director of *U. S. Steel Hour* when it moves from ABC-TV to CBS-TV July 6, Wed. 10-11 . . . American Psychiatric Assn. signs with Hal Roach Studios to produce TV film series on mental health . . . Novel contest: WTVW, Milwaukee, preparing for "T-Day," when new 1105-ft. tower now at 500-ft. mark will be completed, offering 12 prizes ranging from Plymouth car to watches to viewers whose guesses come closest to actual completion time.

Organization committee headed by Guild Films' David Savage has been formed to develop plans for new TV film distributors' trade assn., following meeting May 10 of 30 major syndicators called by General Teleradio's Dwight Martin, sparkplug of movement. In addition to Savage & Martin, members of committee to draw up proposals for organization objectives and membership qualifications are Jay Williams, Official Films; Lou Friedland, MCA; Ralph Cohn, Screen Gems; Frank Reel, Ziv; Arche Mayers, Unity; Herb Gelbspan, Hal Roach Studios.

Color tape program microwaved by NBC from New York to St. Paul, Minn. for dedication of Minnesota Mining & Mfg. Co. research labs (Vol. 11:19) was termed a "historic occasion" by RCA-NBC chairman David Sarnoff, whose appearance had been recorded on the tape. Dr. Harry F. Olson, who headed development for RCA, using MM&M tape, said: "Some problems remain to be solved. These involve both the machine and the tape. We are certain that these problems will be solved . . . We are confident that electronic photography will be an important tool first in TV and later in industry and the home."

Fully-equipped color broadcasting studio will be demonstrated by RCA during NARTB convention in Washington week of May 22. It will also demonstrate a new type of color camera chain (Model TK-41), color effects equipment, a universal multiplexer for color broadcasting, new "Ampliphase" AM broadcast transmitter and high-power microwave system (TVM-1A).

Continued improvement of black-&-white reception of color programs is being achieved by networks, though there are still occasional complaints of "fuzziness," etc. (Vol. 11:8). According to RCA operations engineering v.p. O. B. Hanson, improvement is due to "the gradual cleaning up of a lot of little things," not to any new technique or equipment.

Upcoming network color schedules: NBC-TV—May 19, *Home* segments, 11:04-11:12 & 11:50-11:57 a.m.; May 20, *Coke Time*, 7:30-7:45 p.m.; May 22, *Max Liebman Presents*, "Promenade," with Tyrone Power, Judy Holiday, Herb Shriner, Janet Blair, Kay Starr, 7:30-9 p.m.

Canadian Broadcasting Corp. is in no hurry to move into color. At convention of Assn. of Canadian Advertisers in Toronto last week, CBC chairman A. Davidson Dunton stated: "We believe that the sensible time for the CBC to move into color will be when the manufacturers can turn out sets of assured performance at a price people can pay, say \$400 or \$500." Furthermore, he said, CBC hasn't sufficient funds to colorcast as much as 3-4 hours weekly. CBC asst. gen. mgr. Ernest L. Bushnell, after observing color kine shown at convention by NBC-TV, declared: "If that is what the Canadian public is going to get in color, the CBC is not going to spend the public's money on it. When we're sure we can deliver to the public something good, then we'll be ready."

Several hundred color sets employing Chromatic TV Labs' one-gun tube are being built by Telechrome Inc., with demonstrations scheduled for June 6 by Chromatic's parent Paramount Pictures. Sets will have 26 receiving tubes, use 22-in. rectangular picture tubes. Chromatic officials have declared that receivers using their tube can be retailed at less than \$500 (Vol. 11:15).

A 5-hour color show 7-12 p.m. May 7 in Ft. Worth's Will Rogers Memorial Coliseum drew 5000 spectators, WBAP-TV reports; demonstration was solely to show color sets in operation. Station presents 6 hours of color weekly in addition to color programs from NBC-TV.

Improved color film process, said to increase definition and color rendition, will be offered to motion picture industry by Technicolor Inc. at present price scale.

Some 60 "Multi-Scanner" film chains are in use, of which 15-20 are equipped for color, according to DuMont.

Station Accounts: Ted Cott's experiment for late-evening viewing on DuMont's WABD, N. Y., is *Featwama*, consisting of 3-to-12 min. filmed short subjects, cartoons & newsreels 11:10-midnight weekdays, 11-midnight Sat. & Sun., starting May 23. Partic. sponsors will use breaks between shorts for commercials at rates to be disclosed next week. Newsreels will be changed daily, rest of bill changing each Mon. & Thu. To be extended later to Washington's WTTG, program is frankly designed to "approximate the kind of program shown at newsreel movie houses all over America," said DuMont . . . Levitt & Sons, builders, sponsoring 13 half-hour documentaries on big Levittown, Pa. development, titled *Miracle City*—using WFIL-TV, Philadelphia, in first test of TV, thru Al Paul Lefton Co., Philadelphia . . . Professional Laundry Foundation, Newark, organization of laundries in north Atlantic states (Harold Buckalew, mgr.), to conduct one-year spot campaign directed at housewives on WCAU-TV, Philadelphia, starting June 1, thru Feigenbaum & Wermen, Philadelphia; similar campaign is planned later in N. Y. . . Carnation Milk buys alt. week sponsorship of filmed *Annie Oakley* in 70 markets, thru Erwin, Wasey & Co., Los Angeles; Continental Baking Co. will sponsor series in 58 additional markets starting next Jan. 1, thru Ted Bates & Co. . . Brock Candy Co. buys NBC film div.'s *Steve Donovan*, *Western Marshal* for 7 Southern markets, thru Liller, Neal & Battle, Atlanta; in western states, Royal Baking Co. and Langendorf United Bakeries is sponsor . . . Studebaker to spend nearly \$8,000,000 on all media this year, its biggest campaign in history, thru Roche, Williams & Cleary Inc. . . UHU Products Corp. (concentrated all-purpose glue) plans TV campaign using glue-it-yourself theme, thru David J. Mendelsohn Adv., N. Y. . . Seasonal natural: *Fishing Digest* on KHJ-TV, Los Angeles, Thu. 7:30-7:45 p.m., sponsored by Par-T-Pak Beverages, thru Raymond R. Morgan Co. . . Among other advertisers currently reported using or preparing to use TV: McKesson & Robbins, N. Y. (Tartan sun oil), thru Ellington & Co., N. Y.; J. B. Williams Co., Glastonbury, Conn. (Skol sun tan lotion), thru J. Walter Thompson, N. Y.; Kleen King Home Products Co., Los Angeles (copper & aluminum cleaners), thru Mottl & Siteman Adv., Los Angeles; Jacuzzi Bros., San Leandro, Cal. (pumps), thru Gerth-Pacific Adv., San Francisco; Kerns Foods, Los Angeles (preserves), thru Mottl & Siteman, Los Angeles; Barrett Div., Allied Chemical & Dye Corp., N. Y. (Arcadian fertilizer), thru Albert Sidney Noble Adv., N. Y.; California Prune Advisory Board, San Francisco (promotion), thru Botsford, Constantine & Gardner, San Francisco; Lakeside Mfg., Milwaukee (Servit Hot trays & carts), thru Biddle Co., Bloomington, Ill.

Rate increases: WBAP-TV, Fort Worth, raises base hour from \$800 to \$900, min. \$160 to \$200; WKY-TV, Oklahoma City, base hour from \$750 to \$800, with min. rate added at \$175; WSM-TV, Nashville, adds new Class AA hour (7-10 p.m. daily) at \$700, min. at \$140, Class A hour remains \$600; WMBR-TV, Jacksonville, adds new Class AA hour (7-10:30 p.m. Mon.-Fri. & 6-10:30 p.m. Sat. & Sun.) at \$700, 20 sec. at \$180, Class A hour remains \$600.

Gross sales of more than \$1,000,000 are reported by NBC for its upcoming *Monitor* weekend radio service which debuts June 12 (Vol. 11:15, 19). Some 58% of network time availabilities have been sold, network states, latest sponsors being Chevrolet (buying \$325,000 worth of partic.) thru Campbell-Ewald, and Philip Morris, thru Biow-Beirn-Toigo.

NBC Radio, capitalizing on ABC-TV's *Disneyland* hit, on May 30 starts 5-min. strip, *Stories of Davy Crockett*, Mon.-thru-Fri. 5:55-6 p.m.

Network Accounts: Alcoa's cancellation of Ed Murrow's Tue. 10:30-11 p.m. *See It Now* on CBS-TV, effective after July 5 program, doesn't represent any yielding to controversial program's critics, says company; it merely reflects shift in its advertising concept from institutional-type public service programming to mass-appeal programs designed to sell consumer products. Network spokesman said no replacement had been signed yet, promised the prize-winning program will return in fall as sustainer if necessary . . . Elgin Watch Co. cancels *Elgin Hour* on ABC-TV alt. Tue. 9:30-10:30 p.m., effective June 14, will become alt. sponsor of Ed Murrow's *Person to Person* on CBS-TV starting Sept. 2, Fri. 10:30-11 p.m., thru Young & Rubicam . . . Ford Foundation's TV-Radio Workshop announced it would retain commercially-successful *Ominibus* on CBS-TV for 4th season next fall, scotching rumors it would shift to NBC-TV . . . Wildroot (hair tonic) and Johnson & Johnson (baby products) to be alt. sponsors of *Robin Hood* filmed series, featuring all-British cast and filmed by Sapphire in historic Sherwood Forest, on CBS-TV starting Sept. 26, Mon. 7:30-8 p.m., thru BBDO & Young & Rubicam . . . Kleenex to sponsor *Midwestern Hayride* on NBC-TV starting July 8, Fri. 8-8:30 p.m., thru Foote, Cone & Belding . . . Borden Co. to sponsor panel show, *Make the Connection*, on NBC-TV starting June 30, Thu. 8:30-9 p.m., thru Young & Rubicam . . . Farm State Insurance Co. to sponsor *Red Barber Show* on NBC-TV following weekly boxing bouts starting Fri. May 13, thru Needham, Louis & Brorby . . . Gerber Products (baby foods) to sponsor Fri. 3:30-3:45 p.m. segments on alt. weeks of *Bob Crosby Show* on CBS-TV, thru D'Arcy Adv. . . Scott Paper to sponsor Thu. 10-10:15 a.m. & Fri. 10:15-10:30 a.m. portions of *Garry Moore Show* on CBS-TV starting June 9 and Thu. 3:45-4 p.m. portion of *Bob Crosby Show* on CBS-TV starting June 23, thru J. Walter Thompson . . . Gold Seal Wax is 5th partic. sponsor on *Perry Como Show* on NBC-TV this fall, Sat. 8-9 p.m., thru Campbell-Mithun, Minneapolis; others are Noxzema, Kleenex, Dormeyer & Warner-Lambert Co. . . Dow Chemical buys 7 of 15-min. post-NCAA football game programs on NBC-TV in fall, thru MacManus, John & Adams (games themselves have no sponsor yet) . . . A&P grocery chain buys 7 partic. on NBC-TV's *Today* starting May 30, Mon.-thru-Fri. 7-9 a.m. . . Ciba Pharmaceuticals to sponsor *For Doctors Only*, medical program with live remotes from hospitals, thru J. Walter Thompson; time & network are undetermined.

Signs of the TV times: Procter & Gamble, TV's largest single advertiser, is spending \$44,000,000 on TV this year, out of a total advertising budget of \$71,000,000, reports *Sponsor Magazine* in first of 3 articles on company. Of that sum, \$33,000,000 is going to network TV, \$11,000,000 to spot. An additional \$11,300,000 is going to network radio, \$1,750,000 to spot radio. Its emphasis is shifting from predominantly daytime programs, this year spending about \$17,000,000 each on day & evening shows. Currently it has at least one program on a TV network every evening except Thu. Last year P & G spent total of \$44,151,220 on advertising, of which \$23,701,228 went to network TV, \$12,339,668 to network radio.

All-night auto-sales telethon on KGUL-TV, Galveston-Houston (Vol. 11:19) was great success, according to station which reports that Houston Oldsmobile dealer Harlan Lane sold more than 100 cars.

ABC affiliates, both TV & radio, will hold their annual convention May 26 at Washington's Sheraton-Park Hotel during NARTB convention.

Mutual affiliates hold their meeting in Washington Hotel Sun. May 22 in advance of NARTB convention.

IS TROUBLE BREWING on Capitol Hill for TV broadcasting & manufacturing industries? As the nation's newest "big businesses," TV and electronics are getting more and more mention in Congress—with more and more pleas for investigation of various phases. With an eye to next year's elections, legislators are not unmindful of the glamour of the 2 industries—and the Democrats, who head the committees of Congress, are in many cases anxious to keep their "trust-busting" reputations.

The granddaddy of all TV investigations—by Sen. Magnuson's Commerce Committee—appears dormant, but it's not dead. Chief counsel Sidney Davis is in throes of organizing the probe, amassing information, etc. This will go slowly, and hearings aren't in prospect soon. There's no word when they'll begin; they may not start until next fall.

House Commerce Committee headed by Rep. Priest (D-Tenn.) has been tied up in natural gas legislation, which it hopes to dispose of in week or two, then will have executive session to work out program for rest of term. It has several TV bills pending, as well as a number of requests for TV investigations. Senate Judiciary Committee's monopoly subcommittee under Sen. Kilgore (D-W. Va.) has indicated it will at least touch on TV-electronics during its current anti-trust inquiry.

Its House counterpart headed by Rep. Celler (D-N. Y.) opened hearings this week on over-all review of anti-trust laws. As witnesses, it heard several lawmakers discuss monopoly problems. Their references to TV industry give good indication of the pressures on Capital Hill today:

Rep. Reuss (D-Wis.) accused FCC of accelerating the tendency to TV monopoly, as he did in House speech last month (Vol. 11:15). Appearing before committee, he

blamed FCC's multiple ownership rule for situation in Milwaukee, where he charged "a healthy uhf station was forced out of business because CBS cancelled it out, and another uhf station was purchased by CBS."

Subscription TV is certain to come up for Congressional investigation before long, and Congressmen have been subjected to strong barrage of mail on subject—preponderantly in favor. At this week's anti-trust hearings, Rep. Byron Rogers (D-Colo.) asked Reuss whether fee TV would "upset this monopoly." Reuss replied he didn't know, but "it should be thoroughly and sympathetically studied by the appropriate committees of both houses of Congress."

Former GOP national chairman Rep. Scott (D-Pa.), member of the subcommittee, commented on cost of TV time in general and political time in particular — and warned: "There's trouble brewing." Recent Senate hearings on political expenditures went into TV question in some detail (Vol. 11:16-18), but there almost certainly will be further Congressional exploration of this subject.

Sen. O'Mahoney (D-Wyo.) appearing before subcommittee, held up an institutional ad in which RCA told of its "7500 suppliers from 43 states." He urged investigation of terms of company's contracts with its suppliers, and suggested that they may be "7500 satellites of RCA — they do what RCA says or else."

Also testifying was Rep. Patman (D-Tex.) who repeated a charge that recommendations of recent Justice Dept. committee on anti-trust law changes (Vol. 11:14) would in effect wipe out Zenith's patent suit against RCA. Patman charged that 5 lawyers on the Justice Dept. committee "represent RCA and the other defendants in this pending litigation" while none represent Zenith.

Govt. dropped 3 more perjury counts against Mrs. Marie Natvig, turnabout witness in FCC's celebrated Lamb case, on grounds that they would be too difficult to prove—leaving 3 of the original charges still standing. Among those dismissed was charge that she lied when she said she had been "coerced" into giving false testimony by ex-Broadcast Bureau attorney Walter R. Powell. As trial neared close, issues in case are whether she told FCC attorneys and FBI men that she had been a Communist and had known broadcaster Edward Lamb, and whether at the FCC hearing she later said she had never told them. As Govt. closed its case, 2 FBI men testified Mrs. Natvig told them her turnabout testimony was perjured. Main defense argument was that she became "befuddled and frightened" while on stand because she was subjected to so many pressures. Attorneys for both sides will sum up case for jury Mon. May 16. In address at U of Michigan, meanwhile, Lamb lashed out at Natvig indictment and asked: "Where else, even in Hitler's Germany, has there been a situation where the Govt., prior to the conclusion of its own case, indicted its own witness for perjury?" FCC held only one day of hearings on Lamb case this week, May 9 heard Michigan CIO pres. August Scholle say he had heard Lamb express anti-communist views on "a thousand occasions." FCC hearing resumes Wed. May 18.

FCC will discuss its proposed investigation of TV's "economics and operations" (Vol. 11:6) May 19, when it appears again before Senate Appropriations subcommittee headed by Sen. Magnuson (D-Wash.). Hearing on 2 non-broadcast bills (Vol. 11:9) requested by FCC, originally scheduled for same day by Senate Commerce's communications subcommittee under Sen. Pastore (D-R. I.) has been postponed to June 1-2.

The \$50,000 sale of WEW, St. Louis (1-kw, 770 kc) by St. Louis U to Aubrey D. Reid (performer Bruce Barrington), former mgr. of KXOK, has been approved by FCC. University retains 60% interest in Ch. 11 application.

Transfer of CP for WCTV, Thomasville, Ga. (Ch. 6) from E. D. Rivers Sr. to John H. Phipps for \$88,700 was approved by FCC this week, along with transfer of radio WKTG, Thomasville from Fred Scott Jr. family to Phipps for \$100,000 (Vol. 11:5). Comrs. Webster & Bartley dissented, former showing concern about "trafficking" in permits and stating: "[The FCC] has never seemed to be able to arrive at a policy under which it could determine what constitutes trafficking in frequencies, and, as a result, it has vacillated from one extreme to another . . . I contend that the Commission can set up a general policy which would at least permit us to achieve a certain degree of consistency." He wanted a hearing to determine what's involved in expense items classified as "travel and entertainment," etc. FCC also approved move of transmitter to halfway between Thomasville and Tallahassee. Phipps operates radio WTAL, Tallahassee & WTYS, Marianna, Fla.

Cy Blumenthal sought FCC approval this week of stock exchange whereby he obtains 100% control of WARL, Arlington, Va. (1-kw, 780 kc), & WARL-FM by giving his 800 shares (1/3) of off-air uhf WCAN-TV, Milwaukee to Lou Poller in return for latter's 102 shares (56.6%) of WARL. Blumenthal also heads group buying WROV & WROV-FM, Roanoke, Va. for \$45,000 (Vol. 11:16).

Owners of CKSO-TV, Sudbury, Ont. (Ch. 5) & CKSO, have sold *Sudbury Star* to Thomson Co. Ltd., price not reported, making it 18th Canadian daily in Roy Thomson chain. Thomson has 49% interest in CKWS-TV & CKWS, Kingston and in CHEX-TV & CHEX, Peterborough, both Ont., Sen. W. Rupert Davies holding other 51%.

ABC Radio and its 4 owned stations joined NARTB this week, giving it 100% network membership and total membership of 1991 as of May 15—composed of 8 networks, 271 TV stations, 1259 AM stations, 332 FM stations, 121 associates.

AFTER GRANTING ONE CP — to KWGB, Goodland, Kan., Ch. 10 — FCC dug into backlog of allocations petitions, finalizing some, proposing others. Actions: (1) Ch. 7 was assigned to Laurel-Pachuta, Miss. (2) On petition of KHOL-TV, Kearney, Neb., Commission proposed putting Ch. 6 in Hayes Center, Neb., where KHOL-TV proposes satellite. (3) WMVT will now be identified as Burlington, Vt. station, its Ch. 3 being moved from Montpelier.

CBS's affiliation practices were probed before chief examiner James Cunningham this week in Albany case, wherein off-air WTRI (Ch. 35) charged CBS with anti-trust "conspiracy" in shifting affiliation to WROW-TV (Ch. 41), in which CBS newscaster Lowell Thomas is stockholder.

CBS pres. Frank Stanton testified that he favored WROW-TV because of plans for future outlined by part-owner Frank Smith, Thomas' business mgr.; that Smith was pushing addition of Ch. 10 to area and proposed a Ch. 52 satellite in Amsterdam—while WTRI management was "sluggish." Stanton said that he'd prefer WRGB (Ch. 6) as CBS-TV basic affiliate in area, that a Ch. 10 station would be next choice, regardless who had it—even if it were WTRI.

Stanton said he prefers not to get into affiliation decisions, but has had hand in quite a few—dozen or so last year. Station relations v.p. Herbert Akerberg testified that he began negotiations with Smith after Stanton made decision to affiliate WROW-TV; that he assumed Stanton had weighed relative coverage of the two stations, etc. Stanton said that CBS also plans to affiliate radio WROW. WTRI counsel Paul Porter sought to show that CBS ignored affiliation criteria, as presented to Potter committee last year, by refusing to recognize WTRI's superior coverage, studio facilities, audience response. Stanton insisted he was looking to future, as outlined by Smith.

Another effort to obtain vhf drop-in via low-power route was filed this week. WHBC, Canton, O. petitioned for assignment of Ch. 12, proposing station with 5.4-kw, 300-ft. WHBC said new station would cause no more interference than would a station complying with present mileage rules and operating at full power and height.

KBAK-TV, Bakersfield, Cal. (Ch. 29) petitioned for shift of Ch. 12 from Fresno, making Fresno's Ch. 18 commercial, and asked that KBAK-TV be shifted to Ch. 12.

Other FCC actions: (1) Turned down protest of KWTX-TV, Waco, against power increase granted KTBC-TV, Austin (Vol. 11:18). (2) Granted 6-month extension of CP for Ch. 10, KHTV, Hibbing, Minn. (3) Turned down protests of grantee WMFL, Miami (Ch. 33) and radio WINZ, against transfer of WMIE-TV (now WGBS-TV) to Storer Bestg. Co. (4) Received protest of WKNX-TV, Saginaw, Mich. (Ch. 57) against grant permitting construction of WJRT, Flint (Ch. 12) about 14 mi. from Saginaw.

Postponement of deadline for filing comments in booster rule-making from May 20 to July 21 was requested by RETMA this week, is expected to be granted. RETMA told Commission it has committee working on subject, needs more time.

Revision of protest section of Communications Act was recommended by American Bar Assn. committee on communications, headed by Arthur W. Scharfeld. It urged that FCC's suggested changes be adopted, with additions. Aim is to prevent abuse of section whereby protestants delay unduly the implementation of FCC grants.

Recent power increases: KQTV, Ft. Dodge, Ia. (Ch. 21) to 214-kw ERP; KOAM-TV, Pittsburg, Kan. (Ch. 7) to 245-kw; KTBC-TV, Austin, Tex. (Ch. 7) to 245-kw; KYTV, Springfield, Mo. (Ch. 3) to 100-kw.

THREE NEW STATIONS are due on air within next week or two; all are vhf and in small communities not now having their own TV stations. Two of them, in fact, open up brand new TV markets—KLIX-TV, Twin Falls, Ida. (Ch. 11), and KOTA-TV, Rapid City, S. D. (Ch. 3). The other imminent starter is KLFY-TV, Lafayette, La. (Ch. 10), which is 52 mi. from Baton Rouge with its stations WBRZ (Ch. 2) and WAFB-TV (Ch. 28).

RCA shipped 12½-kw transmitter May 3 to WNDU-TV, Notre Dame-South Bend (Ch. 46), which has July target. Same day 2-kw RCA transmitters went to KSTF, Scottsbluff, Neb. (Ch. 10), planning June start, and to KNTV, San Jose, Cal. (Ch. 11), which recently changed call from KQXI, but hasn't announced target; on May 9, 1-kw transmitter went to KCOR-TV, San Antonio, Tex. (Ch. 41), which has June target.

GE reports order for 5-kw transmitter, 6-bay antenna and studio equipment from WAGE-TV, Marquette, Mich. (Ch. 6), for July delivery, and order for equipment to change from Ch. 61 to Ch. 22, to be shipped to WWLP, Springfield, Mass. within 45 days.

* * * *

In our continuing survey of upcoming stations, these are latest reports received:

WTHS-TV, Miami, Fla. (Ch. 2, educational), which just got CP extension for 6 months, expects to get on air with test patterns "before too long," advises Vernon Bronson, asst. director, Dept. of Radio & TV Education, Dade County Board of Public Instruction. It now has most of GE material needed to convert old WTVJ Ch. 4 transmitter & antenna, with transmitter in Everglades Hotel and antenna on rooftop FM tower. Full-scale programming will be delayed until station finds "kind of educational program which will supply needs and service which cannot be supplied by the commercial broadcasters."

KOTA-TV, Rapid City, S. D. (Ch. 3), now installing 3-bay RCA antenna on 300-ft. Fisher tower formerly used for FM, plans test patterns by May 22, programming between June 15 & July 1, writes gen. mgr. Leo Borin. RCA 500-watt transmitter is wired and ready to go. It has signed with CBS Extended Market Plan, has agreements with other networks. KOTA radio production mgr. Norman Heffron will also function for TV, as will chief engineer Robert Musfeldt. Base rate will be \$150. Rep will be Headley-Reed.

WKRQ-TV, Mobile, Ala. (Ch. 5) plans Sept. start, reports pres. Kenneth R. Giddens. It's working on construction & studio plans now, has GE 35-kw transmitter, 4-bay antenna and studio gear ordered for July delivery. It will be second vhf outlet for city, where owners of New Orleans' WJMR-TV plan to revive WKAB-TV (Ch. 48) as satellite (Vol. 11:19). Rep not chosen.

New uhf antenna, designed for low-power stations and satellites, will be unveiled by Prodelin Inc. at NARTB convention. The low-priced omnidirectional antenna, called the "Cover-Loop," employs plastic tube which houses and weatherproofs the antenna elements. It's available with power gains of 2, 4 & 8, with voltage standing wave ratio better than 1.1 over several uhf channels.

Regulations were amended by FCC this week to require stations to keep records for 2 years on results of performance measurements, auxiliary transmitter tests, requests for time by political candidates, logs of auxiliary & experimental broadcast stations and program & operating logs.

New DuMont transmitters to be shown at NARTB convention include 50-watt Ch. 2-13, 10-kw Ch. 2-6, 20-kw Ch. 7-13, 100-kw Ch. 7-13—in addition to previous line of 500-watt & 5-kw Ch. 2-13, 25-kw Ch. 2-6, 50-kw Ch. 7-13.

FORECAST OF 'EXPLODING CONSUMER DEMAND': More predictions of continuing prosperity, both in national economy generally and in TV-radio-electronics specifically, came out of this week's convention of National Federation of Financial Analysts Societies in N.Y. And while the forecasts will be subject to differing applications in each region, enough was said to point the way to robust national economic growth.

Roy Rierson, chief economist of Bankers Trust Co., N.Y., epitomized spirit of optimism at convention. He forecast a 1955 gross national product of about \$375 billion, 5% over last year and 3% above previous record set in 1953. He also predicted "record or near-record" profits for business this year -- "assuming no substantial interruption of output because of strikes."

Outlook for TV-radio-electronics, an increasingly important segment of the national economy, was generally regarded as bullish. At special forum on electrical-electronics, Westinghouse sales v.p. James H. Jewell foresaw an "exploding consumer demand," fed by increasing population, as opening a very large market for electrical equipment of all kinds.

"The explosive expansion of the consumer market," he said, "has affected almost all industries whether they make consumer goods or not, for nearly everything contributes to or ends up as a consumer product." He added that industrial production is increasing about 4% a year, while the use of electrical energy by industry is increasing by more than 6% a year.

Julian K. Sprague, pres. of Sprague Electric Co., quoting study by Stanford Research Institute estimating growth of electronic industry at about 10% per year for next 10 years, said that "by next 7 or 8 years" electronic industry division will be roughly: TV-radio, \$3 billion annually; military electronics, \$3.5 billion; industrial electronics, \$2.5 billion.

Philco pres. James H. Carmine, on basis of expanded economy, revised upward his earlier estimates of refrigerator sales this year from 3,500,000 to 3,700,000 units, figured electric range sales at about 1,300,000; washing machines 3,700,000; air conditioners 1,400,000; dryers, more than 1,000,000.

Journal of Commerce surveyed 242 analysts, reported 30% of them felt stocks of TV-radio-electrical equipment companies would do better than all other groups of businesses in 1955. They placed third as most-preferred securities, exceeded only by rails (preferred by 37%) and chemicals (33%).

* * * *

Brief highlights of major trade developments this week:

LABOR: Six IUE locals, representing 6000 workers at RCA plants in Camden, Moorestown & Delaware Township, N.J., Cincinnati & Los Angeles, have authorized a strike after midnight June 1 to enforce demands for a 5% general pay increase and guaranteed annual wage. Another IUE local, representing 640 employes at Sylvania's TV-radio plant in Buffalo, has authorized a strike after May 15 unless the company agrees to arbitrate grievance on hourly wage rates. IUE headquarters also warned GE to expect a strike unless a "decent contract" is negotiated by Sept. 15.

FAIR TRADE: Rep. Celler (D-N.Y.), chairman of powerful Judiciary Committee, in surprising turnabout, indicated he would not favor repeal of fair trade laws, as recommended recently by National Committee to Study the Anti-Trust Laws, blue-ribbon panel of experts under Justice Dept. direction (Vol. 11:14). Asst. Attorney General Stanley Barnes, head of Justice anti-trust div., urged committee to consider repeal of fair trade laws, but Celler's remark that such action would be an "awful hard nut to crack" in present Congress makes repeal extremely doubtful, at least this year.

PRODUCTION: TV output declined to year's low of 127,067 week ended May 6, compared to 131,627 preceding week and 151,593 week ended April 22. It was year's

18th week and brought production for year to date to about 2,825,000, compared to approximately 2,100,000 in same period of 1954.

Radio production totaled 286,284 (141,978 auto) week ended May 6, compared to 278,054 week ended April 29 and 275,176 week before. For 18 weeks, production was 5,100,000 vs. 3,525,000 in corresponding period year ago.

RETAIL SALES: Some 1,943,992 TVs were sold at retail in first 3 months, compared to 1,773,427 in record 1954, reports RETMA. March sales were 669,794, compared to 626,613 in Feb. and 505,493 in March 1954. Radio sales at retail in first quarter, exclusive of auto sets, totaled 1,246,038, compared to 1,059,336 in first 3 months of 1954. Auto radio production in the first 3 months this year is placed by RETMA at 1,945,604, nearly all sold at retail. March radio sales, excluding auto, were 451,049 vs. 320,042 in Feb. and 486,034 in March 1954.

Topics & Trends of TV Trade: Milwaukee proves that second sets can be sold. *Milwaukee Journal* shows that 20,182 families in its metropolitan area, or 6.8% of total of 276,321 TV families, had second sets as of Jan. That's well above national average of 3.7% estimated in Jan. survey by American Research Bureau (Vol. 11:16).

Milwaukee data is from 1955 *Consumer Analysis* just released by the newspaper. It shows rise of second-set families from 12,194 in Jan. 1954 (4.4% of the 250,545 set owners). Some 43 different makes of sets were represented among the multiple-set families, up from 29 year earlier.

Of the second-set families, an Admiral was purchased by 19.7% as a second set; RCA, 15.6%; Motorola, 11.2%; GE, 10.3%; Philco, 8.2%; Crosley, 2.9%; Emerson & Zenith, each 2.4%; Muntz & Silvertone, 2.1%; Philharmonic & Westinghouse, 1.8%; Hallicrafters, Sentinel, Sylvania & Trav-Ler, 1.5%; Capehart-Farnsworth, DuMont, Magnavox & Tele-tone, 1.2%; miscellaneous, 9%; didn't know, 1.5%

Among the 27,009 Milwaukee families (9.1%) who indicated they planned to purchase a set this year, 35.5% were undecided about brands. Among those who have made up their minds, these brand preferences were listed: RCA, 26.4%; Admiral, 10.4%; Philco, 6.6%; Zenith, 4.6%; GE, 3.7%; Motorola, 3.7%; Sylvania, 2.2%; Emerson, 2%; miscellaneous, 6.8%.

Note: *Journal* is one of 20 newspapers which conducted consumer purchasing surveys in their respective markets. (For list of the 20 newspapers, plus results of survey by *Washington Star* in its market, see Vol. 11:15).

* * * *

Admiral and Federal Trade Commission officials will confer in Chicago May 16 on possibility of settling FTC's complaint charging misrepresentation in ads claiming its "giant" 21-in. picture tubes provide 20% more screen area than other 21-in. sets (Vol. 11:14, 17). Hearing had been set in Chicago May 17, but Admiral counsel Pope & Ballard set up preliminary conference with FTC attorney Edward F. Downs. Company would not confirm or deny that it was prepared to sign consent judgment in which without admitting guilt, it would agree to discontinue allegedly illegal practices in future. Admiral's answer to complaint noted that company no longer makes the "giant" ad claims -- though maintaining such claims are correct (Vol. 11:17).

Lion Mfg. Co., Chicago, expects to start production in Sept. of \$695 color console using RCA 21-in. picture tube, plus special remote control attachment, says TV mgr. Paul Eckstein. Hallicrafters recently broke with \$695 price on its color set, to be introduced in June (Vol. 11:18).

Alfred Shaw, 54, founder & ex-pres. of Shaw Television Corp., Brooklyn, onetime manufacturers of TV sets & cabinets, died of leukemia May 11.

Trade Personals: Arthur L. Milk, Sylvania liaison with Federal agencies in Washington since 1947, elected v.p. in charge of govt. relations . . . T. J. Newcomb, recently succeeded by Edward J. Kelly as Westinghouse TV-radio mgr., retires June 1 after 26 years with company . . . Richard O'Brien promoted to DuMont field sales mgr. for receivers, succeeded as eastern regional mgr. by Robert Cheshire, ex-Hoffman Electronics; A. G. Evans named N. Y. State district mgr., C. J. Molthrop midwest mgr. . . Wm. Bullock, mgr. of sales planning, promoted to sales & merchandising mgr., RCA Victor record div., succeeding Larry Kanaga, now v.p. & operations mgr. . . Thomas B. Moseley, ex-southern district mgr., DuMont transmitter dept., joins Continental Electronics Mfg. Co., Dallas (James O. Weldon, pres.) as director of sales & contract negotiations . . . Matt Soja named Sparton's chief TV engineer . . . Wm. Stroben resigns as Sylvania TV-radio adv. mgr. to join McCann-Erickson . . . Joseph F. Miller promoted to managing director of National Electrical Mfrs. Assn., succeeding Wm. J. Donald, retired . . . Dr. Werner A. Auerbacher promoted to director of Emerson's new govt. projects engineering div., v.p. R. T. Capodanno continuing to head commercial engineering div. . . Charles Golenpaul, Aerovox v.p., elected chairman of Sales Managers Club, N. Y., composed of sales officials of eastern electronic parts & equipment manufacturers, which he organized in 1935 . . . E. A. Tischler returns as adv. director to Hoffman Electronics after 6-month absence, replacing George M. Hakim, resigned . . . W. J. Merrill promoted to Hoffman Electronics south central district mgr., Dallas . . . Thomas Kennedy, veteran N. Y. *Times* science reporter, joins DuMont Labs public relations staff . . . Michael J. Ranalli resigns as DuMont mid-Atlantic sales mgr. . . Wm. Sevy, ex-Arvin & Capehart-Farnsworth, named national field sales supervisor, Crescent Industries.

DISTRIBUTOR NOTES: Raytheon has added 25 new distributors in 1955, latest being Radio Specialties Co. Inc., 456 Charlotte Ave., Detroit (Charles Pooseh, pres.); Ohio Valley Hardware Co. Inc., 300 Fourth Ave., Evansville (A. J. Becker, pres.); Electric City Radio Supply Co., 1566 State St., Schenectady (Nathan Israel, pres.); Dixie Distributors Inc., 831 N. 19th St., Birmingham (Murray C. White Jr., pres.) . . . Capehart-Farnsworth appoints Roger & Wood Co., 2500 W. 6th St., Los Angeles (Kenneth Rogers, pres.), replacing Graybar . . . Crosley-Bendix appoints Graybar, 327 N. West St., Rochester, N. Y., replacing O'Donnell Distributors Co. . . T. A. O'Loughlin & Co. Inc., Newark (CBS-Columbia) appoints Martin L. Scher as gen. sales mgr., succeeding T. J. O'Loughlin, now merchandising v.p.; Scher is ex-gen. mgr. of CBS-Columbia Distributors Inc., N. Y., onetime gen. sales mgr. of Admiral-N. Y. & Motorola-N. Y. . . McCormack & Co., San Francisco (CBS-Columbia) appoints A. J. Lindholm as exec. v.p. for sales; Karl F. Wettelund named appliance sales mgr.

UNDER STUDY at highest govt. levels is "Program for a Political Offensive Against World Communism" submitted by RCA's chairman David Sarnoff as memorandum to President Eisenhower April 5, released May 10. Besides recommending a Strategy Board for Political Defense, equivalent to the Joint Chiefs of Staff, headed by cabinet-rank executive and with a budget up to \$3 billion a year to go on attack in the "cold war," the memo specifically suggests:

"We need in every country, newspapers; magazines; radio and TV stations, consciously and effectively supporting our side. Those that exist should be aided materially to increase their range and vitality; others should be started with our help. The strongest individual anti-Communist voices must be provided with better facilities for making themselves heard in their own countries.

"Mobile film units are already penetrating backward areas. The operation should be enlarged, its message and appeal perfected. In addition, mobile big-screen television units in black-and-white and in color can carry our message. Their very novelty will guarantee large and attentive audiences. Vast regions in Asia and elsewhere, where illiteracy bars the written word and lack of radios bars the spoken word, could thus be reached. To quote the Chinese saying: 'One picture is worth ten thousand words.' . . .

"Mass production of cheap and light-weight receivers tuned to pick up American signals are now feasible. They should be made available by the million at cost or gratis, as expedient, to listeners in critical areas and behind the Iron Curtain.

"There are millions of persons in the world who do not have electric power receptacles, electron tubes, batteries or any of the electrical and mechanical marvels which the free world has and takes for granted. A simple, hand-operated phonograph device costing no more than a loaf of bread, could be produced in quantities and supplied

gratis to millions of persons living behind the Iron and Bamboo Curtains and in other critical areas.

"An unbreakable and intelligible record, made of cardboard and costing less than a bottle of Coca-Cola, could carry our messages to these people. Such records could be dropped from the sky like leaflets and the messages they carried could not be jammed."

Note: At May 11 press conference, President Eisenhower, asked about the Sarnoff memo, stated: "I believe thoroughly in Gen. Sarnoff's general proposition that when you are spending all the money we are for direct defense through security establishments, it is just unthinkable to limit ourselves too much in this whole field of information service that is necessary to a cold war."

And in Senate speech May 11, Majority Leader Johnson (D-Tex.) urged all Americans to read Sarnoff memo, which he said "may well be his greatest achievement." He said document is under study at "very highest" levels of Govt. "It is a monumental work," he added, "deserving the attention of all those who seek to preserve the security of the United States." Johnson inserted full text in *Congressional Record*.

Survival TV network, linking secret White House "dispersal" headquarters with 35 secret places already set up outside Washington, has been set up for use in case of possible enemy attack. Details of closed-circuit hookup are secret, but at least portions of it have been ready for operation for about a year. Joint project of Govt. and several unnamed TV firms, the network would permit President and Defense Dept. to keep in close touch with other branches of Govt. in war emergency. The emergency TV circuit could be tied in with regular TV networks on short notice so President or other govt. officials could report directly to nation. Entire govt. dispersal program is scheduled for 3-day test in mid-June, at which time TV network system is expected to get full-scale test.

Electronics Reports: "Think how satisfactory 'wireless' electrical circuitry could be—electricity carried through the home by high frequency electronics instead of by wiring systems! TV will watch the kitchen and the nursery. Cooking by electronics already is being developed. How about starting your car on a cold morning by electronics while having breakfast, first opening the garage door by electronics? Electronic devices will take the hazard and discomfort out of auto travel—steering the car, braking it, and taking over functions subject to human error."

Thus Sylvania chairman-pres. Don G. Mitchell, in leading article in May edition of *The Exchange*, organ of N. Y. Stock Exchange, titled "Electronics—World's Fastest Growing Industry." It's largely devoted to forecasts of industry's 10-year potential, with almost identical statistical data (\$9 billion rate now, \$20 billion by 1964) that was contained in Sylvania finance v.p. W. Benton Harrison's recent address to Philadelphia Financial Analysts, which we published in full text as Special Report with Vol. 11:11. (Note: Extra copies of the Special Report are still available to subscribers.)

* * * *

Top-level Signal Corps personnel changes as result of elevation of Maj. Gen. James D. O'Connell to Chief Signal Officer: Brig. Gen. Francis F. Uhrhane named chief of research & development, Office of Chief Signal Officer, succeeding Brig. Gen. W. Preston Corderman, now Deputy Chief Signal Officer. Col. Earle F. Cooke, deputy commanding officer, Ft. Huachuca, Ariz. proving grounds, succeeds Gen. Uhrhane as commanding general, Signal Corps Labs, Ft. Monmouth, N. J.

Settlement of 6-year-old anti-trust suit against AT&T may be in the works, Asst. Attorney General Stanley N. Barnes indicated this week. He told House monopoly subcommittee that negotiations are in progress for possible end of suit to split AT&T from its manufacturing subsidiary Western Electric. He said "there are definite defense implications."

RCA introduces 6 geiger counters, "with range, sensitivity and price to meet requirements of week-end and professional uranium prospectors and technicians in medical and industrial laboratory work" at next week's Chicago radio parts show. As yet unpriced, the counters will be merchandised by tube div.

GE dedicates automation plant in Waynesboro, Pa. May 14—190,000-sq. ft. building said to be first plant designed to produce electronic controls for use on mechanized production lines.

RCA Victor Co. Ltd. will build new 50,000-sq. ft. TV-radio-electronics plant at Renfrew, Ont., with production due to begin early next year. It will employ about 450, supplementing Prescott, Ont. plant.

Raytheon is purchasing 210,000-sq. ft. branch plant at South Lowell, Mass., which it has operated under lease since 1952, with 700 employes on classified work.

RCA is entering selenium rectifier market, introducing complete line, for replacement purposes only, at next week's electronic parts show in Chicago.

Lambda-Pacific Engineering Inc. opened new general offices and plant at 14725 Arminta St., Van Nuys, Cal.

Warranty on GE transistors was extended this week from 90 days to full year.

Financial & Trade Notes: CBS Inc. gross revenues went up to record \$104,206,067 for 3 months ended April 2 compared to \$90,974,533 for equivalent 13 weeks of 1954—auguring another record year; for all 1954, total was \$373,380,139, up 18.9% from preceding year (Vol. 11:13). Consolidated net income was \$3,892,677, highest first quarter in firm's history, up 36% from the \$2,866,365 of comparable 1954 quarter. Based on shares outstanding before 3-for-1 stock split, the 1955 first quarter earnings were at rate of \$1.60 per share, compared with \$1.22 for same 1954 period; in all 1954, net income was \$11,414,645 (\$4.85). On basis of new stock, 1955 first quarter earnings were equivalent to slightly more than 53¢ a share. Stock certificates for additional shares resulting from the splitup are to be mailed May 20 to stockholders of record April 29. Dividend of 20¢ per share on new stock was declared payable June 10 to holders of record May 27.

Philco sales of \$96,825,000 in first quarter were 15% below the \$113,777,000 in 1954 period but earnings were relatively unchanged at \$2,447,000 (62¢ a share) vs. \$2,438,000 (62¢). Taxes were \$2,785,000 vs. \$4,439,000 year ago. Pres. James H. Carmine said that while unit sales of TVs showed "gratifying" increase this year, trend to lower-priced models reduced dollar volume. Improvement is expected with new fall line, he added. "Our work in the guided missile field for the armed forces is becoming increasingly important," said Carmine. "Research and development on color TV and transistors are continuing at a very high rate in anticipation of the time that these new products will become important commercially."

Admiral's earnings of \$1,238,176 (53¢) in first quarter were 18% under the \$1,504,044 (64¢) earned in first 3 months of 1954. Sales were \$50,034,396, down 11% from \$55,977,563 in first 1954 quarter. John B. Huarisa, exec. v.p. & treas., attributed sales drop entirely to loss of military billings, said company's volume in civilian electronics & appliances was higher than first quarter year ago. He predicted second-quarter sales about equal to last year's \$49,223,936, foresaw 10-20% sales increase in second half over last half of 1954, with "somewhat higher" earnings.

Storer Bestg. Co. has increased quarterly dividend from 30¢ to 35¢, payable June 14 to stockholders of record June 1—applicable to the 788,250 common shares now outstanding as result of public sale of 262,750 shares in April (Vol. 11:14). Regular quarterly 3⅞¢ dividend was declared on 1,686,500 shares of Class B, of which pres. George B. Storer owns or controls about 88%. Company also has called for redemption on July 1, 1955 all of its outstanding preferred stock, of which 14,500 shares (96.67%) are held by Jefferson Standard Life Insurance Co.

Carl M. Loeb, Rhoades & Co., which claims to control some 20% of DuMont stock and now has partner Armand G. Erpf on its board, has bought large block of stock in McIntosh Laboratory Inc., Binghamton, N. Y., hi-fi manufacturer, founded and controlled by Washington consulting engineer Frank H. McIntosh, which recapitalized last Jan. and placed part of its stock on market (Vol. 11:2).

Muter Co. first quarter sales were \$3,162,000, net profit \$101,687 (14¢ a share) vs. \$3,187,000 & \$111,173 (15¢) same 1954 quarter.

Sales drops: Sparks-Withington first quarter sales \$6,972,162, down from \$8,273,547 same 1954 quarter; Wells-Gardner first quarter \$4,853,923 vs. \$5,655,991.

* * * *

Dividends: CBS "A" & "B" (new), 20¢ payable June 10 to stockholders of record May 27; Storer Bestg. Co., 35¢ June 14 to holders June 1; Cornell-Dubilier, 30¢ quarterly & 20¢ extra, payable June 24 to holders June 15; Oak Mfg. Co., 35¢ June 15 to holders June 1.

Webster-Chicago Corp. sales for first quarter rose to \$8,321,000 from \$6,899,000 same 1954 period; earnings after taxes were \$192,000 (37¢ a share) vs. \$205,000 (39¢). Pres. N. C. Owen reported company has gone into use of printed circuits to permit machine assembly of amplifiers, making Webcor first phonograph manufacturer using printed circuits in mass production; lamination div. is now fully automatic; production control dept. is now being mechanized; new Webcor of Great Britain Ltd. now being formed as British sales company. All officers were re-elected at recent annual meeting, with treas. Edward R. Johnson elected v.p. and these new v.p.'s named: Charles S. Castle, mgr. eastern div.; Walter F. Herman, director of operations; Henry R. Lezter, gen. sales mgr.; H. Danforth von Jenef, gen. mgr. govt. div. Named controller & asst. treas. was Henry V. Janowicz.

General Electric has displaced RCA as most popular common stock with monthly investment plan investors, reports *The Exchange*. When pay-as-you-go plan for buying stocks was inaugurated in Jan. 1954, RCA took lead, which it held until March 25, 1955 when GE nosed it out (1930 to 1717 plan purchasers), largely result of 3-for-1 split. Dow Chemical ranked third, General Motors fourth, AT&T fifth; among top 50, Westinghouse ranked 13th, Sylvania 41st, only other electronic firms included.

Paramount Pictures Corp. achieved record for any quarter since its domestic theatres were severed in Dec. 1949 when in 3-month period ended April 2 its estimated earnings were \$2,858,000 (\$1.31 per share on 2,190,021 shares) as against \$1,404,000 (63¢ on 2,217,044 shares) in comparable 1954 period.

Republic Pictures, for quarter ended Jan. 29, earned net of \$383,207 (15¢ per share) vs. \$260,937 (8¢) for 1954 period; gross figures unstated.

CBS Foundation Inc., agency for making charitable & educational grants for CBS Inc. and its divisions, this week announced 20 "Class of 1955" grants of \$2000 each, awarded on unrestricted basis to 16 privately-supported colleges & universities that are alma maters of certain CBS executives, both senior and junior. This year's grants total \$40,000 as against \$32,000 last year. Foundation's formula isn't made public but is based on minimum of 30 months of continuous service and promotion to certain levels. The 1955 list: Augustana College, Sioux Falls, S. D., Sig Mickelson; Brown U, Donald I. Ball; Columbia, Jules Dundes & Benjamin F. Feiner; Cornell College, Mt. Vernon, Ia., Earl H. Gammons; Cornell U, Julius F. Brauner & Charles J. Oppenheim; Creighton, Wm. Dozier; Dartmouth, Robt. E. Kalaidjian; Harvard, Sidney S. Alexander, John J. Carol & Edward L. Saxe; MIT, Wm. B. Lodge; Stanford, Richard W. Jencks; U of Chattanooga, Eugene B. Wilkey; U of Detroit, Arthur Hull Hayes; U of Pennsylvania, Guy G. Della Cioppa; U of So. Calif., H. R. Flynn; Wesleyan U, Edw. G. Reeve; Yale, Wm. H. Hylan.

"Among the other candidates mentioned prominently [for presidency of Montgomery Ward] Frank Folsom, president of RCA, is considered by many a choice candidate who would spark enthusiasm and loyalty throughout the Ward organization [which he once quit in disagreement with Sewell Avery]. But it is known he turned down overtures from the Wolfson interests and it is doubted that he would be interested even in an offer from the present management since he has such strong financial ties with RCA."—*Wall Street Journal*, May 13.

GE's Harry F. Mayer has been named as RETMA's representative on executive committee of Radio Technical Commission for Aeronautics, succeeding Knox McIlwain, Hazeltine Corp. Executive committee has 15 members, representing 7 non-govt. organizations and 8 govt. agencies.

THERE'S MANY A SLIP—but it's apparently definite as anything in politics can be that Richard A. Mack, member of Florida Railroad & Public Utilities Commission and v.p. of National Assn. of Railroad & Utilities Commissioners for 1954-55, will succeed Frieda Hennock next June 30 as a Democratic member of the FCC (Vol. 11:19). Florida's Congressional delegation is backing him solidly, and the White House has informed its members that he's currently undergoing usual security checkup. Endorsers of other candidates have been given to understand by the White House that the job is "committed."

Mr. Mack would be the third figure going from a state utilities commission to FCC, others having been Chairman George McConaughy and John Doerfer, both Republicans and ex-chairmen of their respective Ohio & Wisconsin commissions. Both know Mr. Mack, who has served on the Florida board since 1947 (as chairman, 1951-52).

The Florida Senators describe him as able, personable and a "sound business man." He is 46, and friends term him "warm-natured." A native of Miami, he was graduated from its public schools, attended Northwestern Military Academy in Wisconsin, was graduated in 1932 from U of Florida school of business administration. He's a Protestant, member of Sigma Nu and of Blue Key honorary society. His wife is the daughter of Col. W. F. Stovall, a Tampa pioneer who founded the *Tampa Tribune*, and they have an 8-year-old daughter, Susan.

Mr. Mack went into the insurance business in Tampa in 1932, returned to Miami in 1935 to join General Motors Acceptance Corp. In 1940, he became credit mgr. of Hector Supply Co., Miami, which he left to become a second lieutenant of infantry. He served until 1946, much of the time in Washington, leaving the army as a lieutenant colonel. He was secy. of Port Everglades Rock Co., Ft. Lauderdale, until 1947 when Gov. Caldwell appointed him to the state commission, to which he was elected in 1948 & 1952. His present term expires Dec. 31, 1956.

— ■ —
Beg-leave-to-disagree dept.: Obviously relishing the publicity, Teleprompter chairman Irving Kahn writes Sen. Neuberger (D-Ore.) to object to his bill S-1909 requiring that audience be told when a political speaker is using a cueing device (Vol. 11:19). According to Kahn, mike, control room & transmitter might just as well be considered "artificial aid" which bill says "could be said to mislead the public." Such a law (which obviously hasn't the proverbial Chinaman's chance), in Kahn's words, might "foreclose from consideration some of the nation's most competent political talent who thus far have remained in the background because public speechmaking and TV & radio appearances seem to be so arduous." He suggests Teleprompters might be useful in the halls of Congress.

TV applications on file with FCC now total 157, of which 15 are for uhf stations. This week saw one new application, for Ch. 14 in Owensboro, Ky. by owners of WVMC, Mt. Carmel, Ill., and WIZZ, Streator, Ill. [For details, see *TV Addenda 20-R* herewith; for complete listings of all grants, new stations, applications, etc., see *TV Factbook No. 20* with Addenda to date.]

Private microwaves should be authorized to stations for the present, CBS recommended to FCC this week, suggesting that 4-year amortization period be established. CBS also questioned whether AT&T's proposed 3-year contract period for new off-air service (Vol. 7, 9, 14) would be fair to stations in view of fact that network contracts are for no more than 2 years.

President Eisenhower's address to NARTB convention in Washington May 24 will be televised live by NBC-TV 11:30-11:45 a.m. as part of *Home* show; CBS will carry it on film 5-5:15 p.m.

Avco chairman-pres. Victor Emanuel, v.p.-director James D. Shouse and Crosley Bestg. Corp. pres. Robert E. Dunville all unequivocally denied this week's story (in *Variety*) intimating that the 4 Crosley TV stations are up for sale. Even WLWA, Atlanta, is not for sale, it was stated, although it admittedly isn't as profitable a property as Crosley's WLWT, Cincinnati; WLWD, Dayton; WLWC, Columbus—to say nothing of radio WLW. Formal statement came from Mr. Emanuel: "Avco has no intention whatsoever of selling any of its present properties, either radio or TV. Avco is not negotiating for their sale at present, has not done so in the past, and has no intention of selling any of these properties at any time in the foreseeable future. Indeed, Avco is in the market to build or buy another TV station, and has had an application [for Ch. 13] in Indianapolis for some time."

John Cowles, publisher of *Minneapolis Star* and *Tribune*, which owns 47% of WCCO-TV there, is still negotiating for purchase of KTVH, Hutchinson, Kan. (Ch. 12), deal understood to depend largely on CBS affiliation contract; it's CBS outlet for Wichita area, owned in part by J. P. & Sidney F. Harris, who publish *Hutchinson News-Herald*, by Bess Wyse, owner of 250-w KWBW, Hutchinson, and by gen. mgr. Howard O. Peterson. Cowles interests also own KVTU, Sioux City, Ia. (Ch. 9), hold majority of CP for upcoming KRNT-TV, Des Moines (Ch. 8), and operate radio WNAX, Yankton, S. D. and KRNT, Des Moines.

Oklahoma City's KTVQ (Ch. 25), second uhf in 2-uhf city to run into fiscal troubles and now operated by trustees (Vol. 11:14), will be taken over under National Affiliated Television Stations (NATS) auspices shortly as one of its first projects in GE-supported program to aid distressed stations (Vol. 11:12). Consultant Robert Purcell, of Los Angeles, has been called in and new management is planned, pres. John Esau having resigned to join *Television Age*. KTVQ has been on air since Oct. 1953. City's other uhf, KMPT (Ch. 19) went off air Feb. 3 after 15 months of operation.

WMFJ, Daytona Beach (250-watts, 1450 kc, ABC) is being sold for \$40,000 by W. Wright Esch, who wishes to devote all time and resources to construction of upcoming WMFJ-TV (Ch. 2), of which he is pres. & 40% owner. Buyers are Harold Kaye & Emil J. Arnold, who together own 50% of WORC, Worcester, Mass. and recently acquired like amount of WLOW, Portsmouth, Va. from former owners of WTOV-TV, Norfolk (11:15). WMFJ-TV target is next July.

FCC rules covering type acceptance and certification of equipment (Vol. 11:2, 6) were amended this week, Commission following recommendations of RETMA in regard to definitions, speed of FCC approval, technical data required, changes in equipment permitted, etc. Amendments are in Public Notice 55-547, Mimeo 19038, available from Commission or from us.

Television System of Mexico, formed by recent merger of Azcarraga-O'Farrill interests (Vol. 11:15), is reported building Ch. 11 satellite in Cuernavaca, which will repeat programs of XHTV, Mexico City (Ch. 4). It's also planning Ch. 3 outlet in Guanajuato area, scheduled to repeat XEW-TV, Mexico City (Ch. 2).

Headquarters of *Television Digest* during NARTB convention will be Suite D-615-17, Shoreham Hotel. Visitors are cordially invited. Note to subscribers: If you want your May 21 copy left in your hotel box, drop us a note.

PUBLISHED WEEKLY BY RADIO NEWS BUREAU • WYATT BLDG. • WASHINGTON 5, D.C. • TELEPHONE STERLING 3-1755 • VOL. 11: No. 21

SUMMARY-INDEX OF THE WEEK'S NEWS—May 21, 1955

TV IN 10 YEARS: \$3.5 billion gross billings, 1000 stations, 65,000,000 sets-in-use, color dominant, picture-on-wall receivers, 7-8,000,000 yearly set sales (p. 1).

VIGOROUS STAND AGAINST PAY-TV taken by CBS and ABC, as tide of public's letters to FCC turns against subscription TV 4-to-1 (pp. 3 & 4).

YEAR'S NEW STARTERS probably won't total more than 50, with only 30 or so yet to come; stations which plan to begin before year's end are listed (p. 4).

NBC-WESTINGHOUSE SWAP would exchange WPTZ & KYW, Philadelphia, for WNBK & WTAM, Cleveland, with NBC paying additional \$3,000,000 cash (p. 5).

THE FCC WEEK: KSLA goes to Shreveport TV Co. in final decision; Ch. 12 granted in Bismarck, N. D.; deintermixture comments filed for 4 cities (p. 6).

GE-BACKED NATS lines up 19 stations, discloses terms of one uhf deal; Doherty says only 12-15 uhfs are profitable, most post-freeze vhfs losing (p. 7).

REPEATS OF TOP SHOWS strongly supported by ABC's Bob Kintner, who plans to run kines of best U. S. Steel dramas; cites experience of Disneyland (p. 8).

TOP EXECUTIVES CHANGE JOBS—Bonfig to CBS, Gifford to Crosley, Cromer to Mognovox, Holpin to Westinghouse; bottle for distribution indicated (p. 11).

PARTS MAKERS see good business rest of year for TV set manufacturers; annual electronic components show dominated by high-fidelity (p. 12).

430 STATIONS ON AIR, latest starter being WFRV-TV, Green Bay, Wis. vhf, controlled by former uhf operator; more upcoming stations report on plans (p. 9).

NEW UHF TRANSMITTER for megowatt installation shown by RCA, simplified circuitry and new tubes cutting initial cost by 25%, operating costs up to 50% (p. 9).

LIVE COLOR SCANNER, developed by DuMont as low-cost camera substitute, produces excellent color by applying flying spot techniques to live programming (p. 10).

TESTIMONY ENDS IN LAMB CASE, 8 months after hearings began; final decision not due for several months. Mrs. Notvig convicted of lying to FBI & FCC (p. 15).

SET CENSUS PROJECT still for off, some research experts saying they think it will die oborning; Politz still testing for NARTB (p. 16).

NEXT TV DECADE—WHAT CRYSTAL BALL SHOWS: Exactly 10 years ago this week, on May 25, 1945, the FCC (Paul A. Porter, chairman), as part of an all-inclusive proceeding to allocate the spectrum to various services, called for industry comments on a proposed allocation of TV channels and proposed rules & standards. Six months later, Nov. 21, 1945, the first "final" allocation was promulgated.

The rest is history, and the anniversary is being celebrated at a dominantly-TV convention of NARTB and, incidentally, by ourselves (10th year of publication).

Most striking fact about the 10 years of fantastic development, most of it coming during the last 5 years because of the initial inertia of broadcasters toward the seemingly profitless new art, is that it has wrought a deeper revolution in the life of America than did radio in all its 35 years.

It has achieved much greater dollar volume, too, now ranking third among all advertising media (Vol. 11:15), exceeded only by newspapers and direct mail. Telecasting in all facets now represents at least \$1 billion of a national advertising budget that ran \$8.15 billion last year; the business of set-making, selling & servicing last year represented a retail value of \$2.2 billion (Vol. 11:2) and this year should run about the same; the rest of electronics, growing out of the same basic principles and involving vast military expenditures, runs well over \$6 billion.

What about the next 10 years? Consulting the best authorities we know, drawing upon our own records, adducing from current facts and trends and logic, frankly avoiding prognosis on such incalculables as uhf and subscription TV -- and fully aware we're going out on quite a few proverbial limbs -- this is what we foresee:

The Business of Telecasting, 1965: Advertisers will spend \$3.5 billion on TV annually, as against about \$1 billion now -- that sum covering time sales, talent, production, everything. This figure is based on 3 assumptions: (1) That the Gross National Product, or value of all goods & services, will reach \$535 billion by 1965,

as estimated by Congress' Joint Committee on the Economic Report, up from a current rate of \$370 billion officially reported by the Commerce Dept. this week. (2) That total advertising expenditures will rise another percentage point over next decade -- to 3.25% of GNP as against 2.26% in 1954 and 1.34% in 1945. (3) That TV's take of all advertising expenditures will go from last year's near 10% (Vol. 11:15) to 20%. All figures are in terms of value of the dollar in 1953, as used by Joint Committee.

The Business of Broadcasting, 1965: U.S. radio homes today total 46,600,000, virtually 100% saturation. There are about 90,000,000 home sets and 30,000,000 auto sets. By 1965, with 58,000,000 homes, there ought to be at least 100,000,000 home and perhaps 50,000,000 auto sets. Radios are cheap today, will be all-transistorized and cheaper later, and rate of home set output should be at least 8-9,000,000 annually. While most of the 2700-odd AM stations and 550 FM stations may be able to survive, on basis of their low operating costs and cheap rates for size of audience served and returns produced, it's doubtful whether 4 live radio networks can do so. It's questionable, too, whether radio can maintain the \$608,100,000 level it enjoyed in 1954, down 3.3% from 1953 (Vol. 11:15). Though the parent radio may eventually be separated from its TV offspring, whether voluntarily or by FCC fiat, radio always will be with us -- in home & workshop, in vehicles, in our pockets, on our wrists. And, powered by tiny long-lasting batteries, it won't have to plug into wall outlet.

* * * *

Sets-in-Use, 1965: 65,000,000 or more in 58,000,000 homes, as against some 35,000,000 in 47,000,000 homes now. The estimated number of homes is based on Census Bureau formula that they're increasing at rate of a little more than 1,000,000 a year. About 60% of all sets-in-use will be color, though production by that time should be virtually entirely color. All programming will be in color, whether network or local, live or tape; black-&-white sets will gradually be relegated to the back room, basement or children's room.

TV Receiver, 1965: Will be picture-on-wall set, with controls and chassis in relatively small cabinet or panel at chairside. Size of flat, wall-mounted screen will be limited only by viewer's preference -- and picture will be produced by electro-luminescence. Entire circuit will be tubeless, printed circuit, completely transistorized, miniaturized -- and automatically produced. As for repairs, once the trouble is located, set will be as easy to fix as changing a light bulb. Portable battery-powered 21-in. color set may measure only about 3-in. deep, weigh 5-10 lb., be as easy to carry as a briefcase. Average retail price may be little more than \$200. Average price of a TV set now is about \$180.

TV Trade Volume, 1965: 7-8,000,000 sets will be sold annually, as now, mainly replacements or second sets, at factory value of about \$1.5 billion which alone will represent some \$2.25 billion in retail trade; plus a servicing bill of \$750,000,000 or thereabouts. Thus, the over-all consumer expenditure will be about \$3 billion out of an estimated total "electronics economy" of \$20 billion (Vol. 11:11).

Telecasting Structure, 1965: About 1000 stations, some of them satellites & boosters, providing a signal to every home in the land, linked by 3 "live" networks as we know them today, with TV tape replacing film and "tape networks" as common as radio's transcription & record services. Directional antennas and small-coverage stations will be shoe-horned into the spectrum to serve local areas on a basis comparable with radio's 250-watters -- and "area" stations will reach out much farther into sparsely settled regions, employing many times the power in use today.

* * * *

So much for the basic structure, the economics, the receivers. Other aspects:

Transmitting & Studio Equipment: Simpler, more compact, cheaper, more powerful, with portable color camera and associated equipment as easy to handle as film camera, and associated equipment no bigger than sound recorder. Transmitters will use big brothers of the transistor and consume much less power. Remotes will be as simplified as in radio.

Station Rates: Top rate per hour about \$10,000-\$12,000, with NBC & CBS keys in N.Y. (present base rates, \$6200 & \$6000, respectively) leading the way by upping gradually, as now, based on saturation and the powerful pull of color commercials.

Station Values: Key stations in major markets will be big business in every sense of the word, valued more highly in many places than local newspapers. On the basis of gross revenues (now \$20,000,000 or more at N.Y. keys) and net earnings (now 40% and better at some stations), it won't be surprising to see stations sell for as high as \$25,000,000. Record to date: \$9,750,000 for WDTV, Pittsburgh (now KDKA-TV).

Theatres vs. TV: If fee-TV clicks, not much chance for most theatres, certainly not the neighborhoods. The legitimate theatre is already all but dead outside the very big cities. Movie theatre exhibition will be limited to big-budgeted first-run features only, and moviegoing will be an "event" like going to a Broadway play, the opera, championship fight, Kentucky Derby, etc.

International TV: Relays to and from Europe and Latin America will be commonplace, but exchanges will be on delayed tape basis more often than live because of time differentials. Technical standards will differ, but U.S. standards will dominate, as now. Foreign TV stations, now totaling only about 150 (TV Factbook No. 20), will increase many fold until few countries are without TV -- with U.S., British, Dutch, German and Japanese factories main competitors for the business.

'FALSE PROPHETS' OF PAY-TV ATTACKED: Recognizing that the chips are down on toll TV, the once-silent networks and stations (Vol. 11:9), CBS particularly, have mounted a full-scale assault on the concept of pay-as-you-look TV.

Both CBS pres. Frank Stanton and ABC chairman Leonard Goldenson broke their silence this week, though their attitude has been known for some time (Vol. 11:14), while the strong antipathy expressed 2 years ago by RCA-NBC chairman David Sarnoff (Vol. 9:18) still stands.

Stanton's scathing attack was delivered at meeting of CBS affiliates in N.Y. May 19 -- and affiliates promptly voted 107-2 to endorse CBS's position.

Stanton's denunciation was keyed to same theme running through letters currently being received from public by FCC -- that pay-as-you-look TV "would highjack the American public into paying for the privilege of looking at its own TV sets."

Striking reversal in sentiment is disclosed in this week's bale of mail delivered at Commission. Until this week, comments were running about 5-to-1 in favor. This week's batch is about 4-to-1 against -- though total is still in favor (about 9000 to 3000). Chances are that a few more weeks will bring totals neck-and-neck. Volume of letters is obviously a matter of promotion & publicity, and study of mail shows that much of opposition was stimulated by exhortations of Alfred Starr during his recent NBC-TV debate with Zenith's H.C. Bonfig who, incidentally, just became a CBS executive (see p. 11). This seesawing by public shows why FCC and staff tell us they're "unimpressed" by mail volume, calling it "results of promotion" (Vol. 11:20).

Stanton's remarks to affiliates, to be amplified upon in formal comments to be filed with FCC June 9, are likely to provoke serious attention at Commission, particularly when he says:

"We could expect to operate profitably under a system of pay-TV. With our programming know-how, facilities and experience, we regard it as more than probable that we would earn our share of the billions of pay-TV dollars. But this is not where CBS believes its best interests lie.

"We are proud of of the progress the broadcasting industry has made in establishing a nationwide free TV service. The pay-TV promoters have continuously predicted the failure of free TV at every point of its development; that it could never support itself without direct tribute from the public. They made these false prophecies 25 years ago and, as recently as 1946 the president of Zenith Radio Corp. flatly stated 'the advertisers haven't sufficient money to pay for the type of continuous programs that will be necessary to make the public buy TV receivers by the millions.' Today there are 36,000,000 TV sets in daily use. Unlike these false prophets, we set no limits to the increased and continually increasing service to the public of free TV."

(For more of Stanton's statement, for Goldenson's remarks and for other subscription-TV developments, see p. 4.)

FEW NEW STARTERS NOWADAYS, WHAT'S ON TAP: Only 21 new stations have gone on air thus far this year -- and it looks like only about 30 more will make it before year ends. Six more are due in Canada. Off the air this year to date went 16 -- 14 uhf, 2 mergers of time-sharers -- making 44 mortalities altogether since TV began.

So it looks like the rush for the precious TV channels has slowed to one-a-week rate from onetime one-a-day, the slowdown dictated by economics and competition for the more desirable channels. The 1954 figure of 101 new starters, the 231 of 1953, aren't likely to be repeated.

This year should end, assuming few more mortalities and some revivals, with something like 460 stations on the air. Total now is 430 (see TV Addenda 20-S).

CPs still outstanding number 181 (59 vhf, 122 uhf), of which 28 were granted this year (Hilo & Wailuku satellites of KGMB-TV being already on air) -- and a few more CPs may be expected. Applications pending for new stations total 155 (140 vhf, 15 uhf). But a close scrutiny of the records, especially of promised starting dates of CP holders, checked against known equipment shipments and/or orders, bring us to an actual figure of 34 would-be 1955 starters as of this writing.

These are the stations due on air before end of 1955 and their own stated starting times; we can't vouch for accuracy or completeness of the list, inasmuch as there's many a slip between promise and performance and there may be some new grantees before year is out, as well as revivals of some now off-air stations:

KLFY-TV, Lafayette, La. (Ch. 10). May.
KOTA-TV, Rapid City, S. D. (Ch. 3). May.
KLIX-TV, Twin Falls, Ida. (Ch. 11). May.
KSTF, Scottsbluff, Neb. (Ch. 10). June.
KCOR-TV, San Antonio (Ch. 41). June.

* Held up by litigation.

CRUX of CBS's OPPOSITION to pay-as-you-look TV, as expressed by pres. Frank Stanton this week (see p. 3), was that it would discriminate against those who cannot afford to pay. Here's how he phrased his objections:

"Pay-TV promoters say they would be satisfied if they got \$100 a year from the average family. On this basis, today's TV audience would pay some \$3½ billion a year—more than it pays for shoes or doctors or electricity—for viewing far fewer programs than it now watches without charge. This is 3 times the amount now being paid by the public for all spectator admissions.

"Under the present system of American TV, no set owner is deprived of a program because he is not as prosperous as his neighbor. But, once the turnstile of pay-TV is placed in the living room, the families who rely most on TV for their entertainment and information would be hit the hardest because they would be the ones who, for economic reasons, would have to restrict their viewing most severely. TV would no longer belong to all the people all the time . . .

"If this scheme is authorized and becomes generally established, pay-TV would be able to bid away from free TV every kind of program the public now enjoys. For example: For viewing the World Series at home, a tribute of some \$6,000,000 per game would be levied on the public if each family which watched the Series in 1954 were forced to put up the modest-sounding sum of 50¢ for each game. Thus the people would pay 15 to 25 times as much

as is now being paid by the sponsors who bring them the games free.

"If only 5% of the families who now watch Ed Sullivan's *Toast of the Town* would pay only 50¢ each to see the show, they would spend \$375,000—2½ times as much as the sponsor now pays to bring it to the public free. The other 95% would then have the 'free choice' that pay-TV promoters want to give them: the free choice of not watching *Toast of the Town* or paying to see it. It's the old story of letting the camel get his nose into the tent . . ."

* * * *

Stanton's vigorous stand raises question whether CBS will use its own facilities to fight toll TV. CBS has asserted networks' right to editorialize, exercising this right during McCarthy censure hearings last year and claiming that TV-radio should have freedom to cover such public matters as the hearings (Vol. 10:35).

Current letters from public to FCC reflect almost exactly the same thinking as Stanton's. There are now almost 40 volumes of letters and cards. Picking one of this week's at random, we counted 282 expressions against toll TV, 66 in favor. Typical phrases: "We paid \$200 for our set and can't afford to pay for programs, too; we're satisfied with today's programs." "We're still paying for our set. Poor folks can't pay any more." Among recent letters supporting toll TV are those of poet-writer Carl Sandburg and playwright Robert Sherwood.

AB-PT chairman Leonard Goldenson confined his opposition to brief remarks during stockholders meeting in N. Y. this week, saying: "Basically, it was concluded that, at the very least, paid and free TV could not co-exist

without resulting in a great loss to the viewer of the availability of varied types of TV programming, and that paid TV would not be in the general public interest and would not be a proper use of a public franchise."

* * * *

American Civil Liberties Union's TV-radio panel has apparently given considerable thought to subject, recommending to whole ACLU that pay-TV be given a trial under these conditions: (1) Carry no commercials. (2) Limited to city with 2 or more channels. (3) For fixed period. (4) Guarantee that programs will offer something not now available.

Despite enormous publicity, precise idea how pay systems would work isn't well understood. For example, *Washington News* TV columnist David Reque started poll this week, asking readers to answer "yes" or "no" to this question: "Should channels be allocated for programs you would have to pay to watch?" Here's how he described paid operations:

"One channel, or maybe more, of those now inactive on your set would be allocated to toll-charge telecasting. Unless you paid to watch its programs, either through a coin machine installed on your set, or by paying a subscription, the picture on these channels would be 'scrambled'. But you'd still have the no-pay channels you now watch." Many others have same misconception—that toll TV would be confined to channels not now used, rather than delivered over presently operating channels.

* * * *

Zenith will demonstrate its pay system during NARTB convention in Washington (Vol. 11:19) part-time on closed-circuit, part-time using facilities of WMAL-TV which obtained FCC approval for 8 a.m.-12:30 p.m. tests daily May 21-June 20. Commission stipulated that "these tests shall avoid any action which may create public impression that FCC has or will approve any system of subscription TV." Comr. Webster dissented, telling us: "I think this is premature and improper under these conditions. I think the proper place for demonstrations is during a hearing—so that it can be put on the record. I have no objections to experiments, however."

How much would viewers pay to watch? Interesting comment is given by Martin F. Malarkey, pres. of National Community TV Assn. and operator of systems serving some 7000 homes in Pottsville, Minersville & Schuylkill Haven, Pa. He has had some 5 years experience charging subscribers \$3.75 monthly, giving them choice of 3-5 signals. He says: "If a subscriber had the pay-TV programs added to his bill, I think he'd buy \$1-\$1.50 worth weekly. If he put coins in a box, received no bill, he might go to \$1.50-\$2 weekly."

Sports promoters' enthusiasm for subscription TV got fishy eye from veteran *Washington Post* sports columnist Shirley Povich. Deploing "pay-through-the-nose TV," he wrote: "On a pay-TV basis, baseball could wind up as a game only for the TV screens, minus the noise and hurly-burly of the ball parks. The players would get paid handsomely, the owners would reap big profits, there would be no parking problems and not much fun."

Among organizations taking stand against tollvision recently are national American Legion and Central Trades & Labor Council of Greater N. Y. Chicago City Council, which on April 21 unanimously voted in favor, has now decided to send resolution back to committee.

And veteran broadcaster Edgar Kobak, former MBS president now operating WTWA, Thomson, Ga., said there should be subscription radio if there's going to be subscription TV. Pay radio was pushed at FCC before World War II by Muzak—and Commission is said to have come close to authorizing it.

WESTINGHOUSE will get back \$3,000,000 cash of the \$8,500,000 price it paid Philco just 2 years ago for WPTZ, Philadelphia (Ch. 3) as result of swap deal concluded this week with NBC whereby it takes over network's WNBK, Cleveland (Ch. 3) with radio WTAM (50-kw, 1100 kc) in exchange for WPTZ with radio KYW (50-kw, 1060 kc)—exactly as forecast here last Feb. 12 (Vol. 11:7):

"It's an open secret that the network and Westinghouse have been dickering and that Westinghouse is pursuing a policy of owning stations in areas where it has big manufacturing operations. That was one reason given for paying record \$9,750,000 to DuMont recently for its WDTV, Pittsburgh (Ch. 2), now KDKA-TV . . . it's good guess there will be an added quid pro quo on NBC's part in consideration of fact that Philadelphia area stands 4th, Cleveland 10th in U. S. Census Bureau market rankings."

WPTZ (base rate \$2500 an hour) grossed slightly in excess of \$5,600,000 last year, KYW about \$1,000,000; gross of WNBK (base rate \$1300) is said to have been around \$4,000,000, WTAM also about \$1,000,000. Cleveland topkicks Lloyd Yoder, Wm. Davidson & Theodore Walworth Jr. will probably go to Philadelphia; WPTZ mgr. Roland Tooke and KYW mgr. Frank Tooke (no kin!) are tentatively slated for Cleveland.

NBC's parent RCA, with main plant in Camden and others scattered throughout area, is reputed to be largest employer in Philadelphia area. Westinghouse has big operation there, too, but is also a major factor in Cleveland and has its huge appliance plant in Mansfield, O. Emphasis on plant locations gives rise once again to speculation that Westinghouse will seek its fifth station in Baltimore—presumably WAAM (Ch. 13), which would give it one ABC affiliation as well as the CBS affiliation it has in San Francisco in addition to 3 NBC affiliations.

Westinghouse is still trying to win Ch. 8 in Portland, Ore., where it also has factory, but initial decision favors North Pacific TV group (Mrs. Scott Bullitt). If company misses out in Portland, it won't be surprising if it either applies for a new uhf there or undertakes to buy Storer's KPTV, for pres. Chris Witting has stated that his company plans to join the uhf swim under suitable conditions.

NBC has given up efforts to buy *San Francisco Chronicle's* KRON-TV (Ch. 4), its affiliate there, whose 2-year contract was recently renewed. Network is still awaiting FCC action on projected purchases of 2 uhf stations—WBUF-TV, Buffalo (Vol. 11:9, 11) and WKNB-TV, New Britain-Hartford (Vol. 11:2). It has no intention, said a spokesman, to drop uhf ownership plans.

Merger in Jackson, Miss. was approved by FCC this week (Vol. 11:16), city's uhf WJTV (Ch. 25) to go off air, its ownership (same as *Jackson Clarion Ledger*) to acquire 40% of WSLI-TV (Ch. 12) for \$176,000. Owners of WSLI-TV will in turn pay \$175,000 for physical facilities of WJTV, adopt WJTV call letters. Standard Life Insurance Co. owns 32.4% of WSLI-TV, T. B. Lanford 13.8%, L. H. Sepaugh 13.8%. Also approved this week was deal whereby J. Albert Dear (*Sedalia Capital and Democrat*) will eventually own 50% of Milton J. Hinlein's KDRO-TV (Ch. 6) & KRDO, Sedalia, Mo. (Vol. 11:18).

Network members of NARTB radio board elected this week: Charles T. Ayres, ABC v.p.; Arthur Hull Hayes, pres., CBS Radio; Charles R. Denny, NBC v.p. for owned-&-operated stations and spot sales.

Personal Notes: Sidney M. Markley, v.p. & asst. to pres., elected a director of American Broadcasting-Paramount Theatres Inc., succeeding the late Herbert Schwartz . . . Robert H. Salk, ex-gen. mgr. of Katz Agency's now discontinued Station Films Inc., on Aug. 1 becomes sales mgr. of Screen Gems Inc. . . . Frank P. Schreiber, gen. mgr. of WGN-TV & WGN, Chicago, elected v.p. of WGN Inc., now headed by J. Howard Wood, *Chicago Tribune* business mgr. who succeeded the late Col. Robt. McCormick as pres. . . . Robert Dale Martin promoted to director of CBS-TV talent & casting dept., N. Y., succeeding Milo Frank, now holding same job in Hollywood . . . Harold R. Wettersten, from WBKB sales, promoted to sales mgr. of ABC-TV central div., Chicago, under newly appointed director James W. Beach . . . Sylvia D. Kessler, who resigned as chief of FCC Office of Opinions & Review about 2 years ago to join Cohn & Marks, has left that firm to open her own law offices shortly . . . Brendan McInerney, asst. to FCC gen. counsel Warren E. Baker, resigns as of June 1 to practice law in Rochester, N. Y. . . . Edgar W. Holtz, asst. city solicitor of Cincinnati, June 27 becomes asst. chief of FCC's Office of Opinions & Review, reporting to chief John Fitzgerald . . . Sydney Rubin, NBC mgr. of licensing, joins Kagan Corp., now NBC-owned, to which operations of NBC Enterprises' licensing div., headed by administrative v.p. J. M. Clifford, have been transferred; Edward L. Justin is operating v.p. . . . Oliver S. Gramling, asst. gen. mgr. of AP in charge of TV-radio services, elected pres. of Journalism Alumni Assn., Columbia U, from which he was graduated in Class of 1927 . . . Wayne C. Oliver, TV-radio editor of AP, joining *Television Magazine* Aug. 1 as exec. editor . . . Jay Hoffer, ex-WJAR-TV, Providence, named adv. & promotion director of WABC-TV & WABC, N. Y. . . . Norman J. Ostby, Don Lee v.p. in charge of station relations, Hollywood, elected pres. of Southern Calif. Bestrs. Assn., succeeding Robert J. McAndrews, v.p. of John Poole Bestg. Co., Hollywood . . . Frank Crosiar promoted from U of Notre Dame's recently acquired radio WHOT to local sales development director of its upcoming WNDU-TV (Ch. 46), due in July . . . Dean Craig promoted from exec. producer to program mgr. of KRCA, Los Angeles . . . Don Bishop promoted to publicity director of NBC's owned TV-radio stations & spot sales div. . . . G. W. (Johnny) Johnstone, TV-radio director of NAM, leaves Washington after NARTB convention for month's transcontinental business trip . . . George W. Brett, Katz Agency v.p., elected a director of Television Bureau of Advertising; Lloyd Griffin, Free & Peters v.p., named chairman of membership committee for northeast . . . Robert J. Burton, BMI v.p., elected pres. of Radio & TV Executives Society of N. Y. . . . Gordon Lawhead promoted to sales service director of WHBQ-TV, Memphis, with Wilson Northercross succeeding him as program director and Mark Forrester taking over as production director from Northercross . . . Ray Gallagher, ex-KPHO-TV & KTVK, Phoenix, named exec. producer & director of KBTB, Denver . . . Douglas Meservey, pre-war NBC executive, recently in film production, joins Young & Rubicam, San Francisco . . . Robert T. Colwell, of Sullivan, Stauffer, Colwell & Bayles, named to broadcasting advisory committee of U.S.I.A. (Voice of America) . . . Stuart D. Strand, CBS-TV producer, joins E. M. Eisfeld Adv., Miami, as TV-radio director . . . Willard E. Walbridge advanced to exec. v.p., *Houston Chronicle's* KTRK-TV . . . Al Rylander, ex-Columbia Pictures, named to new post of NBC director of exploitation, reporting to Kenneth W. Bilby, public relations v.p.

Lawrence Webb, recently national sales mgr. of WLOK-TV & WLOK, Lima, O., onetime v.p. of WJW, Cleveland, succeeds Thomas F. Flanagan, resigned, as pres. of Station Representatives Assn.

THREE-WAY OWNERSHIP of Shreveport's KSLA (Ch. 12) is due to come to an end, with FCC's final decision this week reaffirming examiner's report recommending grant to Shreveport TV Co., denying KCIJ & KRMD. Station had been operated since Dec. 1953 under unique arrangement—the 3 applicants agreeing to operate station jointly until one was victor in hearing. Winner is to pay losers for expenses to date.

Choice of Shreveport TV was predicated on fact that Commission felt it offered more assurance that its program proposals would be fulfilled and because of "diversification"—its principals having no other station ownership. Pres. and prospective mgr. is Don George, movie exhibitor who owns 43%.

One additional CP was granted, Ch. 12, Bismarck, N. D., to North Dakota Bestg. Co. (John Boler, pres.), operator of KXJB-TV, Valley City-Fargo (Ch. 4) and KCJB-TV, Minot (Ch. 13). Grant was over dissent of Comrs. Hennock & Bartley, latter issuing statement expressing fear that multiple-station owner Boler might jeopardize existence of other Bismarck station KFYR-TV (Ch. 5). He said that "public may have been imposed upon," stating that Boler first proposed to make Bismarck a satellite of KXJB-TV and feed it live programs, then later filed with FCC proposed program schedule that seems to be mainly devoted to film.

* * * * *
Commission's "second look" at deintermixture in Madison, Peoria, Hartford & Evansville (Vol. 11:14) brought mountain of comments from uhf operators and vhf applicants in the cities involved—all reiterating, amplifying and supplementing original contentions. Essentially, uhf operators say there is danger that public will lose service because uhf stations are liable to fail when vhf stations start, while vhf applicants claim that public will be deprived of the wide-range coverage vhf stations could provide. Chances are FCC will ponder comments and render decisions in these cases before considering the many other deintermixture petitions on file.

FCC got a bit brusque in one decision this week. In denying request of KWKH, Shreveport, that Ch. 3 grant to competitor KTBS be reversed, Commission said KWKH's charges were excessive and "we wish to state emphatically that Commission hearing procedures are not to be used for unsupported, reckless and unwarranted attacks on the Commission, its members, or its staff, nor should accusations of serious crimes by competing applicants be advanced in pleadings without a substantial basis therefor."

In other actions, FCC: (1) Denied protest of WMBV-TV, Marinette, Wis. (Ch. 11) against merger of WFRV-TV, Green Bay (Ch. 5) and WNAM-TV, Neenah (Ch. 42); WMBV-TV had charged the others with harassing it and with trafficking in licenses. (2) Denied request of WNOW-TV, York, Pa. (Ch. 49) that Ch. 15 or 21 be allocated to York and the request of WTPA, Harrisburg (Ch. 71) that Ch. 21 be assigned to Harrisburg. Shifts would have involved channel changes for several CP-holders and Commission said that "we do not believe that uhf frequencies should be switched from the community where a CP is outstanding in order to make a lower frequency available to another community."

Commission was busy in courts, defending its actions in the McClatchy "newspaper discrimination" case (Vol. 11:10), the grant of WJRT, Flint and the grant of sale of WROW-TV, Albany (Vol. 11:20).

* * * * *
Second appearance of FCC before Sen. Magnuson's appropriations subcommittee to discuss budget items (Vol. 11:20) was postponed from May 19 to May 25.

GE-SUPPORTED National Affiliated Television Stations Inc., which proposes to assist TV stations with finances, management, programming & sales (Vol. 11:14), released list of 19 affiliates this week, stating that only 3 had asked financial aid. More will be added after NARTB convention consultations, said NATS v.p. Berman Swartz.

Three vhf are in group, 2 of them not yet built: KEYD-TV, Minneapolis (Ch. 9); WHTN-TV, Huntington, W. Va. (CP for Ch. 13); WORA-TV, Mayaguez, Puerto Rico (CP for Ch. 3). Others, all uhf and all on air: WROW-TV, Albany (Ch. 41); KBMT, Beaumont, Tex. (Ch. 31); WBLN, Bloomington, Ill. (Ch. 15); WCMB-TV, Harrisburg, Pa. (Ch. 27); WKNY-TV, Kingston, N. Y. (Ch. 21); WTOM-TV, Lansing, Mich. (Ch. 54); KTVE, Longview, Tex. (Ch. 32); WJMR-TV, New Orleans (Ch. 20); WVEC-TV, Norfolk (Ch. 15); KTVQ, Oklahoma City (Ch. 25); WPFA-TV, Pensacola (Ch. 15); WEEK-TV, Peoria (Ch. 43); KCCC-TV, Sacramento (Ch. 40); KSAN-TV, San Francisco (Ch. 32); KTVI, St. Louis (Ch. 36); KVVG, Tulare, Cal. (Ch. 27).

Those seeking financial aid weren't divulged, though it's known that in court-approved plan for reorganization of Oklahoma City's KTVQ this week NATS advances \$25,000, GE \$38,000 in plan whereby Jack Fariss, local attorney-oilman, cancels some \$100,000 owed to him and acquires all common stock. Consultant Robert Purcell takes over as director for 60-90 days, and R. Mack Lester, ex-mgr. of local radio KTOW becomes gen. mgr., succeeding John Esau (Vol. 11:20). Indebtedness is still about \$300,000. Other terms: NATS management fees run 6% of gross business, rep fees usual 15%; GE gives moratorium of year on equipment payments, except for klystron rentals, and NATS defers payments on film library rentals for 6 months; 90% of net income goes to NATS in retirement of loan, rest set aside for other debtors.

Oklahoma City station deal presumably is pattern for

others. That many stations, both vhf & uhf, are in similar plight was indicated in May 23 statement by Dick Doherty, management consultant retained by NATS, in which he says no more than 12-15 uhf stations are making a "true profit" and that "all of these are in markets without immediate vhf competition." He added:

"The uhf situation is much more deplorable than most individuals realize. Station income of \$5000 to \$6000 per month, and \$60,000 to \$75,000 per year, is not at all uncommon for a considerable number of uhf operations. Obviously no one has found a magic formula by which TV station cash operating costs may be kept at this low level.

"There is no such thing as a profitable uhf station in a market with two vhf's; there are some cases of marginal uhf's in markets with only one vhf competitor.

"According to generalized experience, when a new vhf comes into a previously all-uhf market, the revenue of the uhf station drops by at least 20%-30%; when a second vhf or when two vhf's arrive, the uhf drops 40% to 50%. This is the rather clearly proven record of experience even though there are a few exceptions.

"It is of coincidental economic interest to realize that between 40% and 45% of all the postfreeze vhf stations are currently either losing money or technically breaking even. Many of these are in comparatively small TV markets; some are the 'third' vhf station in markets outside the major metropolitan categories; some are the so-called 'independent' operation even in the top major metropolitan centers of the nation.

"Four out of five uhf stations are actually flirting with bankruptcy within the next 6 months to a year unless they find a financial angel or develop a cohesive, cooperating means to instill life into the total uhf picture."

Sign of the TV times: WMUR-TV, Manchester, N. H. (Ch. 9), whose management was taken over 4 months ago by ex-WJAR-TV mgr. Norman A. Gittleson, reports 46% increase in sales for first quarter of 1955, bringing it within reach of operating black; at same time, radio WMUR upped sales 10.5%.

Network Accounts: Eastman Kodak, which sponsored now-discontinued *Norby* as first regular color film series on NBC-TV, backs unusual show on same network starting in Oct.—weekly dramas titled *Screen Directors Playhouse*, Wed. 8-8:30 p.m., thru J. Walter Thompson. Leading members of Screen Directors Guild will participate in series, to be filmed by Hal Roach Studios, and will turn over all proceeds to union's educational & benevolent foundation. Union was associated with similar radio series several years ago . . . GE to sponsor *Front Row Center* on CBS-TV starting June 1, alt. Wed. 10-11 p.m., thru Young & Rubicam; first show is TV version of Broadway hit *Dinner at Eight* . . . Whitehall Pharmacal Co. to sponsor *Name That Tune* on CBS-TV starting Sept. 27, Tue. 7:30-8 p.m., thru Ashley-Steiner Adv. . . Liggett & Myers to sponsor *Julius La Rosa Show* on CBS-TV starting July 9, Sat. 10-10:30 p.m., thru Cunningham & Walsh . . . Ideal Toy Corp. to sponsor *Winky Dink and You* on CBS-TV starting Sept. 25, Sun. noon-12:30 p.m., thru Grey Adv. . . Amana Refrigeration Co. to be alt. sponsor (with Camels) of *You'll Never Get Rich* on CBS-TV starting in fall, tentatively scheduled for Tue. 8-8:30 p.m., thru MacFarland, Aveyard & Co., Chicago . . . Marlboro cigarettes & Revlon to be co-sponsors of *Johnny Carson Show* on CBS-TV starting June 30, Wed. 10-10:30 p.m., thru Leo Burnett Co. & BBDO . . . Maybelline Co. (mascara) buys partic. in 13 NBC-TV color "spectaculars" this fall, thru Gordon Best Co., Chicago . . . General Mills buys partic. in *Wyatt Earp* on ABC-TV next fall, Tue. 8:30-9 p.m., thru Dancer-Fitzgerald-Sample . . . Johnson's

Wax & Pet Milk buy *Playhouse* series from ABC Film Syndication as replacement for Red Skelton Show on CBS-TV, no time set . . . Grand Ole Opry, originated in 1925 and carried for 4½ hours Sat. nights on radio WSM, Nashville (sponsored for half hour on NBC Radio since 1939 by Prince Albert Tobacco), gets showcasing on NBC-TV Sat. June 11, 8-8:30 p.m.

Rate increases: KDKA-TV, Pittsburgh, adds new Class AA hour (7-11 p.m. Mon.-Fri. & 4-11 p.m. Sat. & Sun.) at \$1500, min. at \$400, Class A hour going from \$1400 to \$1300; WMAL-TV, Washington, raises base hour from \$750 to \$900; WTVN-TV, Columbus, raises base hour from \$600 to \$700, min. \$100 to \$125; WMT-TV, Cedar Rapids, new Class AA hour (7:30-9:30 p.m. daily) is \$500, min. \$100, Class A remaining \$400; WGBI-TV, Scranton, raises base hour from \$300 to \$400, min. \$60 to \$80; KPLC-TV, Lake Charles, La., from \$200 to \$250 & \$40 to \$50. Rate adjustments: WEWS, Cleveland, raises base hour from \$950 to \$1050, having cut rate last March from \$1200 to \$950 when it switched from CBS to ABC; KHQ-TV, Spokane, gives up Class AA \$600 hour set last April 1, now has \$550 base hourly rate, min. at \$137.50.

NBC-TV uses closed-circuit hookup in 28 cities May 25, 1:30-2 p.m., to explain to advertising officials results of its \$250,000 research project in Ft. Wayne, called "Strangers Into Customers." Survey measured TV's impact on local residents in the 18 months since its first station, uhf WKJG-TV, went on air. It will also be subject of NBC-TV *Background* program May 29, 4-4:30 p.m.

Telecasting Notes: Magic names of major movie companies on their own TV shows is no guarantee of success, despite apparent impressions to the contrary. Spurred by triumph of *Disneyland* as an ideal way to plug theatrical films and get paid for it, such top producers as Warner Bros., 20th Century & Paramount have signed with networks and sponsors for own shows next season, following Disney formula of 45 min. of entertainment, with rest of show consisting of plugs for current movie releases, preview of next week's show and commercials . . . If show is good, formula may be unbeatable. But recent statements of major producers indicate that they view TV as "a substitute for the old 'B' picture" and "testing ground for new actors and story material." Ratings indicate televiewers are already fed up on "B" pictures, and second-class material could easily damage the names of the movie-makers. In coveting success of *Disneyland*, big film producers would do well to remember that Disney never produced a "B" picture. Disney himself sounds warning to other producers in May 18 *Variety* interview: "If you don't entertain them on TV, they won't be looking the next time" . . . CBS uncorked its TV program plans to affiliates at May 19-20 New York conference—giving featured billing to its 90-min. Saturday night "specials," most of them in color and featuring Noel Coward, Bing Crosby, Mary Martin and others (See Color Trends & Briefs & Vol. 11:20). Other highlights are new batch of situation comedies, and "the blockbuster of all giveaway programs—*The \$64,000 Question*" . . . In sports, CBS-TV appears to be cornering the "regional" football telecasts provided for by NCAA on 5 dates set aside for them; while NBC-TV has rights to national college grid games, CBS-TV has signed up for Big Ten series, Pacific Coast Conference series, and also plans to tie up eastern series, all to be televised on regional networks. NCAA track meet and Big Ten basketball will also be on CBS-TV next season . . . Life of TV film commercial is short, reports May 21 *Billboard*. "Generally speaking, it ceases to do an effective job selling after 6 months' exposure," according to *Billboard's* new 530-member "TV Editorial Advisory Board," consisting of top-level representatives of networks, stations, film producers & distributors, ad agencies, sponsors, being polled on various TV questions fortnightly . . . Good idea: "Why isn't there some kind of an award presented every year for the least obnoxious commercial on TV and radio?" asks Faye Emerson in her syndicated column. "And while they're about it, why don't they give a booby prize to the ones that offend good taste? I believe this would improve the whole tone of TV selling" . . . Broadway-to-TV coup: Musical *3 for Tonight*, featuring Marge & Gower Champion, to be televised from Hollywood by CBS-TV June 22, 10-11 p.m., just 4 days after it closes . . . Suggestion by a WRCA-TV secretary, Marilyn Rosenberg, led NBC to extend its key station's sign-off to 1:02 a.m. daily with 2-min. animated film showing sheep hurdling a fence and with sleep-inducing background music . . . Milton Berle setting up motion picture production company in Hollywood, while continuing to do his NBC-TV shows live; first film to be biography of Berle's mother, presumably for theatre showing.

Taller even than WHAS-TV's proposed 2003-ft. tower (Vol. 11:8)—in fact, tallest man-made structure in world—is TV relay tower planned by Belgian ministry of communications. Concrete tower is due to be completed in Brussels by 1958, soaring 2160-2180 ft. above ground. Ministry didn't make clear whether actual telecast transmissions would emanate from tower, but said it would be designed as part of permanent European TV exchange program to eliminate number of smaller relay towers.

REPEATS OF TOP SHOWS, making the most of TV's best programs—a concept drawing increased attention from industry's leaders (Vol. 11:17-20) — has gained vigorous support from ABC pres. Robert E. Kintner, whose network has made very successful use of the repeat principle. Its current repeats of *Disneyland* series are out-pulling first presentation and it plans this summer to run kines of best programs of *U. S. Steel Hour* starting June 28. Here's Kintner's evaluation, responding to our analysis in Vol. 11:17:

"In my own view, there is no basic showmanship reason why repeat performances of live programs should not be given. The analogy you draw with movies and TV film programs is sound—there does not seem to be any particular reticence on the part of the distributors of theatre product, or of the agencies and advertisers in re-showing filmed shows.

"To the point of live repeats: There is, to my knowledge, no aversion among the people associated with TV to offering again a successful live program . . . There is an area of problem in connection with repeats. Many programs are presented each week, and a good number of these are live dramas. Of 7 full-hour dramatic TV programs that are currently produced each week, probably the 'just-right' program, one which combines script, cast, performance, settings, direction and the myriad other facets into a glistening, outstanding production—worthy of repeat—occurs less than once in every 2 weeks.

"Now, assuming that this does take place, and further assuming that the 'just-right' program's author and adapter agree to the repeat performance, we are still faced with a psychological obstacle, which may have more substance to it than mere emotional objection. This is the feeling that some people in our business have about the economic expediency of repeats. This is something which I personally do not agree with; in the case of dramatic live programs, for example, it generally costs as much to do the second program as the original. In the case of good filmed programs, I hold that a good program, like a good book, or piece of music, or a favorite dish, may be savored again and enjoyed as much or more at the second sitting."

Kintner then pointed to Trendex & Nielsen ratings of *Disneyland* series, showing that repeats achieved greater ratings than originals, with but one exception. "This," he said, "is a quantitative public acknowledgment of the programs' intrinsic qualitative content. Such figures will be repeated, I am sure, whenever a fine program which enjoys wide original exposure, followed by favorable reviews, publicity and word-of-mouth, is offered to the public again."

Harry C. Maizlish & Morton Sidney, of KFVB, Hollywood, have pulled out of deal to buy KVOA-TV, Tucson (Ch. 4) with radio KVOA (1-kw, 1290 kc, NBC) and new lineup of buyers keeps the KFVB sales mgr. Frank Oxarart in for 20%. Rest of group proposing to buy out holdings of KTAR Broadcasting Co., Phoenix (controlled by John J. Louis, of Needham, Louis & Brorby) for total of \$450,000 are ex-Congressman Clinton McKinnon, who once owned KCBQ, San Diego, now has weekly there and in Coronado; Bernard Weinberg, adman; Arthur A. Desser, attorney; Harold B. Garfield, druggist—each with 20%. They take over \$225,000 in notes, will pay \$42,000 to present gen. mgr. R. B. Williams, \$10,500 each to Harper M. Phillips & Ben L. Slack Jr., \$3500 to Raymond Holsclaw for their minority stockholdings. While stations have earned surplus of \$52,581, they showed loss of \$9574 on operations in first 3 months of 1955.

WFRV-TV, GREEN BAY, WIS. (Ch. 5), bringing on-air total to 430, starts with ABC & DuMont shows over the week-end, following FCC approval May 19 of stock transfer to owners of off-air WNAM-TV, Neenah (Ch. 42). WNAM's S. N. Pickard now controls over 50%, only others with more than 5% being original WFRV-TV stockholders Clayton Ewing & George Nau Burridge, each with 10.9%. Station has been ready to go for about 4 weeks (Vol. 11:17), but had to wait for FCC to take second look at already-approved transfer because of objections raised by WMBV-TV, Marinette (Ch. 11). It has 25-kw DuMont transmitter & 5-bay RCA antenna on 463-ft. tower of defunct WJPG-FM, located adjacent to that of WBAY-TV (Ch. 2). Neenah studios of WNAM-TV will supplement Green Bay facilities. Don C. Wirth is v.p.-gen. mgr.; Ed Murphy, ex-KSTM-TV, St. Louis, operations director; John Schulz, ex-Chicago NBC-TV Spot Sales, station mgr.; Harry Hill, chief engineer. Base hour is \$300. Rep is Headley-Reed.

* * * *

In our continuing survey of upcoming stations, these are latest reports received:

KHAS-TV, Hastings, Neb. (Ch. 5) has ordered RCA transmitter & 12-bay antenna, plans fall start, reports gen. mgr. Duane L. Watts, ex-KHOL-TV, Kearney, Neb. It will use 767-ft. tower. Studio-transmitter house will be built 3 mi. N of city on Hwy. 281. KHAS-TV will be operated by new Nebraska TV Corp., now being set up by grantee Seaton Publishing Co., publisher of *Hastings Tribune*. Seaton Publishing principals also control *Alliance* (Neb.) *Times-Herald* and newspapers in Kan., S. D., & Wyo., as well as radio stations KHAS, Hastings; KGGF, Coffeyville Kan.; KMAN, Manhattan, Kan. Duane B. Allison, chief engineer of KHAS, will also be TV chief engineer. Rep not reported.

WCTV, Thomasville, Ga. (Ch. 6) has Aug. 1 target for test patterns, Sept. 1 for programming, reports John H. Phipps, who recently acquired CP from E. D. Rivers Sr. for \$88,700, along with Thomasville radio WKTG from Fred Scott Jr. family for \$100,000 (Vol. 11:20). GE transmitter and 5-bay antenna are on order, with latter due for installation on 600-ft. tower in June. Studio-transmitter building is under construction at new site halfway between Thomasville and Tallahassee, where Phipps operates radio WTAL. He also owns WTYS, Marianna, Fla. Rep not yet chosen.

WHIS-TV, Bluefield, W. Va. (Ch. 6) hopes to get on air about Aug., reports pres.-gen. mgr. Hugh I. Shott Jr., for family-owned grantee *Bluefield Daily Telegraph*. RCA 10-kw transmitter is ready for testing. RCA 6-bay antenna & 100-ft. Ideco tower are on hand and tower construction begins next week. It has agreement with NBC, is negotiating for interconnection facilities. Base hour will be \$200. Rep will be Katz.

KCOR-TV, San Antonio (Ch. 41) has set June 1 test pattern target, now that it's installing 1-kw RCA transmitter, reports chief engineer Marvin L. Fiedler. RCA pylon antenna is scheduled for installation on 558-ft. Truscon tower week of May 23. It will be 90% Spanish language outlet, using Latin-American films and kines. Base rate will be \$180. Rep will be Richard O'Connell.

■

Experimental vhf booster for Hawaii was granted this week to Iresco Inc., 2221 Warwick Ave., Santa Monica, Cal., which plans to test re-transmission of Ch. 4 & 9 at 6 points in the Islands.

SIMPLIFIED & CHEAPER "megawatt" transmitter is being shown for first time by RCA at NARTB convention in Washington. It delivers 25-kw, can be used with supergain antenna to produce 1000-kw ERP, is expected to sell for approximately 25% less than RCA's previous 25-kw equipment, which basically consisted of two 12½-kw transmitters arranged in parallel. Slated for commercial availability later this year, new TTU-25B utilizes single standard tetrode in each final output stage, with savings of up to 50% in operating costs claimed.

As enumerated by RCA broadcast equipment marketing mgr. A. R. Hopkins, new transmitter has these advantages: requires no more space than 12½-kw equipment, ⅔ reduction in visual amplifier tube requirements, 50% reduction in cabinetry and "average annual savings up to \$20,000 in overall operating costs." Also due for availability this year is package for converting RCA 12½-kw transmitters to the new 25-kw circuit.

Next station scheduled to increase power to 1-megawatt is Portland's KPTV (Ch. 27), nation's first uhf station, now owned by Storer, due to boost to full permitted output June 11, date of Portland's Rose Parade. Most of RCA transmitter equipment for increase to 25-kw power has been delivered, and supergain antenna is due to arrive before end of month. KPTV is expected to be nation's 3rd station to reach 1,000,000 watts, and RCA's second such installation.

■

Experimental satellite in Manson, Wash. (Vol. 11:3, 14), which is unique in that it "translates" received Ch. 4 signals of KXLY-TV to uhf Ch. 16, was inspected this week by Ben Adler, whose Adler Communications Labs supplied equipment. He reports excellent coverage in Manson area 1-3 mi. from satellite. Some 160 sets have been equipped to receive Ch. 16, owners paying \$67.50 for year's service. New sets being sold have that fee added to price; it's then turned over to a town committee. Adler said no one fears that viewers will "bootleg" signal without paying, adding that "the community spirit appears to be at a terrifically high level." Community antenna operators are naturally concerned about such satellites, and NCTA exec. secy. E. Stratford Smith, who also visited Manson last week, is dubious about their economics. He reports that construction cost was \$16,000 excluding engineering costs; that it would take \$10,000 more for each additional channel; that operating costs are unknown; that support must rely on "honor system" because non-payers can use signal. Most of all, he says, satellite offers only one channel whereas community systems usually offer 3 or more.

Two new vhf applications were filed with FCC this week: For Las Vegas, Nev., Ch. 13, by Moritz Zenoff, owner of radio KBMI, Henderson, Nev., and publisher of newspapers in Henderson & Boulder City; for Carlsbad, N. M., Ch. 6, by KAVE, whose pres. Val Lawrence is gen. mgr. of KROD-TV, El Paso. Applications pending FCC action now total 155 (including 15 uhf). [For details, see *TV Addenda 20-S* herewith; for complete listings of all grants, new stations, applications, etc., see *TV Factbook No. 20* with Addenda to date.]

Less expensive off-air microwave service proposed by AT&T (Vol. 11:18) is fine, RETMA and NARTB told FCC in comments filed at May 20 deadline, but they recommended that stations be permitted considerable leeway in deciding whether to build own off-air microwave or buy service from AT&T.

Comments on uhf boosters, which FCC calls "co-channel amplifying transmitters" in its rule-making proceeding (Vol. 11:14), may be filed until July 21, deadline being moved from May 20 at request of RETMA.

Color Trends & Briefs: Most sponsors seem to like color spectaculars—and with only a couple of exceptions they've signed up for another season. On NBC-TV, Oldsmobile has renewed Sat. evening series with \$5,000,000 budget; RCA & Ford, \$5,000,000 Mon. evening show; Sunbeam, Sun. evening "color spreads," to be sold on partic. basis every 4 weeks beginning Sept. 11 for series of 14 shows running right through summer of next year, also with total budget of about \$5,000,000. Hallmark, which occasionally has used color for operas and other "specials," will sponsor 8 Sun. afternoon Maurice Evans color shows at total outlay of some \$2,500,000.

CBS-TV's *Shower of Stars* once-a-month color programs will continue next season—Jack Benny starring in 6 of them—with Chrysler staying on as sponsor. Network revealed a little more this week about its series of ten 90-min. Sat. evening shows, "the majority of which will be broadcast in color." Two will feature Bing Crosby in musical plays, 3 will star Noel Coward with Mary Martin co-starring in first one, 3 will be produced by Paul Gregory. Beginning next fall, CBS says it will telecast at least 2 shows a week in color—in addition to *Omnibus*, with several complete shows in color and segments of others.

Note: Milton Berle told newsmen this week that all of his shows next season may be done in color from NBC-TV Burbank studios.

* * * *

An all-industry standard color stripe, to be transmitted during monochrome programs to aid servicemen adjusting color sets (Vol. 11:11), would be preferable to variety of stripes using different standards, FCC told RETMA this week. Commission said it has no objection to stations' transmissions of RETMA-recommended signals and said: "It is gratifying to know that an industry standard has been developed, so that the alternative transmission of a number of different signals is unlikely. The fact that the RETMA standard is not mandatory raises the possibility that alternative signals may be transmitted, with resulting confusion. It may be desirable, when at a later date the usefulness of the RETMA signal has been proven, to consider its adoption into [FCC Rules]."

UNIQUE TECHNIQUE of producing live color for limited kinds of programming, using flying-spot scanner principle, will be shown by DuMont during NARTB convention. DuMont's claim is that for price much less than that of conventional 3-tube color camera, a station can present fair variety of live material in excellent color.

As demonstrated to us at DuMont research labs recently, system did produce very good color, and claims of "no registration problems" seemed substantiated. "Vitascan," as DuMont terms new system, works on same principle as its film scanner. CR tube "scans" live scene, and clusters of multiplier phototubes, located about studio, pick up light reflected from scene and feed signals through normal channels to transmitter.

Studio must be "light tight," i.e., permit no extraneous light to enter. At recent demonstration, studio was dark except for dim light emitted by CR tube. Engineers said plan was to install stroboscopic lights at NARTB demonstrations—flashing on and off 60 times a second, supplying adequate light for reading, etc., during vertical blanking period. Experiments have been conducted with both mercury lights and special CR tubes.

Six clusters of multiplier phototubes were used during demonstration. Each had 4 tubes—2 for red, one each for blue and green. Each cluster is located where floodlights would be in normal TV system. In fact, whole arrangement is precise reverse of normal TV—the "cam-

"Color-effects" equipment, which permits telecasters to originate slides and artwork in color without color camera or scanner, is being shown by RCA at NARTB convention in Washington and is now available. Described as an "intermediate step" before addition of complete color facilities, the equipment makes it unnecessary for a station to return to monochrome for station breaks in network color shows. It permits station to use any of a group of 12 pre-selected 2-color combinations as substitute for black and white portions of monochrome picture. Colors in the picture are "produced" rather than "reproduced." All of the equipment elements are standard units which will be required when the station later adds color origination equipment. The color combinations are produced by colorplexer and vary according to the combination of channels into which the blanking and monochrome signal are fed. Other elements of the equipment include color-bar generator, color frequency standard, burst flag generator—at total cost of about \$12,500.

"Color TV is coming faster than many people think," RCA consumer products exec. v.p. Robert A. Seidel told NARDA group in Milwaukee this week. "I am sure you are aware of the fact," he said, "that newly-designed and completely re-styled 21-in. compatible color sets are about to be offered by a number of manufacturers." [So far, Hoffman and Hallicrafters have announced new color models, Vol. 11:17-18.] Advent of color won't hurt black-&-white sales, Seidel said. "The greatest opportunity for increased sales and profits this year, next year, or perhaps during our lifetime, will be in TV," he stated. "It's now a billion dollar industry. With the advent of color, and it's coming fast, it will top \$2 billion annually." Air conditioners, he added, would bring "the second greatest opportunity for increased sales and profits for at least the next 10 years."

Upcoming network color schedules: NBC-TV—May 30, *Producers' Showcase*, "The Petrified Forest," with Humphrey Bogart, Henry Fonda, Lauren Bacall, 8-9:30 p.m.; June 4, *Max Liebman Presents*, "The Chocolate Soldier," with Rise Stevens, Eddie Albert, Akim Tamiroff, 9-10:30 p.m. CBS-TV—June 9, *Shower of Stars*, 8:30-9:30 p.m.

era" (CR tube) emitting light and the "floodlights" (phototubes) picking up light. Number of clusters used is determined by nature of program.

DuMont officials say they don't tout system for big "spectaculars" and the like, but they claim it's a very economical method of presenting commercials, news, debates, panel discussions, etc., where action is confined to limited area. Major claims are economies of installation & operation and absence of registration problems involved in present 3-tube live color cameras. They say one-man operation is possible and tubes are inexpensive.

Stationary light source was used, but plan was to have one on dolly, to be moved like live camera. System may also be used for monochrome.

DuMont officials admit that they hope "Vitascan" will help sell film scanners, of which DuMont has already delivered more than 60; of these, 15-20 are color-equipped.

From price aspect, DuMont stresses that station which already has flying-spot scanner, costing \$40,000-\$45,000, can add "Vitascan" equipment for much less than the \$49,500 it would pay for regular 3-tube live camera. If station already has DuMont color film "Multi-Scanner," the "Vitascan" gear can be added for \$15,692; if it doesn't, cost is \$32,570. Stations with monochrome "Multi-Scanner" can add live monochrome equipment for \$9207; without it, price is \$18,415.

Delivery 30-60 days after convention is promised, and DuMont plans to install system at its own WABD, N. Y. and WTTG, Washington.

TOP-LEVEL CHANGES—WHAT THEY PRESAGE: This was a week of drastic changes in the top executive & sales personnel of several important TV-radio manufacturing companies -- and the implications appear far more significant than the mere announcements. They presage an intensified effort by some of the second-rung manufacturers to improve their positions in the market as against front-running RCA, Philco, Admiral, Motorola, GE & Zenith who represent very nearly 60% of the present TV business. Items:

Henry C. Bonfig, third-ranking Zenith executive after pres. E.F. McDonald and exec. v.p. Hugh Robertson, quit job of sales v.p. which last year paid him \$40,000 salary plus \$56,763 bonus, to become pres. of CBS-Columbia Inc. He replaces Seymour Mintz, and has been replaced at Zenith by Leonard C. Truesdell, TV-radio sales v.p.

Chester G. Gifford, who retired recently as pres. of Schick Inc., post now held by ex-RCA consumer products v.p. Joseph B. Elliott, becomes pres. of Avco Mfg. Co.'s Crosley & Bendix appliance divisions as well as an Avco v.p., taking over from James D. Shouse, Avco v.p. & director, who resumes active duties as chairman of the Crosley Broadcasting Co., operating 4 TV stations & one radio -- his original field.

Leonard F. Cramer, ex-Avco v.p. & gen. mgr. of its Crosley-TV-radio div., onetime DuMont v.p., joins Magnavox as v.p. & gen. mgr. of TV-radio-phonograph div.

Dan D. Halpin, who left RCA post of mgr. of TV receiver sales in Aug. 1952 to join DuMont as gen. mgr. of TV sales, resigns to become asst. gen. mgr. in charge of marketing and gen. sales mgr. of Westinghouse TV-radio div., Metuchen, N.J. He succeeds Richard L. Sandefur, resigned. He serves under gen. mgr. Edward J. Kelly, who recently succeeded T.J. Newcomb, retired. At DuMont, his duties are being taken over by Wm. C. Scales, gen. mgr. of receiver sales div. under v.p. Wm. H. Kelley.

It's noteworthy that Truesdell was once Crosley sales mgr., later headed Bendix radio div., joined Zenith in 1946; that Mintz quit as Admiral v.p. in charge of advertising about year ago to go to CBS, where he was at once also elected a v.p. & director of parent CBS Inc., to which posts Bonfig will succeed; that Bonfig joined Zenith 11 years ago after 13 years with old RCA Mfg. Co., which he quit as a v.p.

Bonfig's salary hasn't been disclosed, but he acquires stock options and, as he put it, "the kind of deal I couldn't reject." Mintz plans to acquire an interest in a small electronics factory, owned by a friend; he leaves his job well-fixed by virtue of an option on 2500 shares of CBS stock at 47¼ granted in March 1954.

* * * *

Battle for strong distributorships, long under way and rendered all the more difficult by the well-heeled and well-entrenched positions of old-line firms that give RCA, Philco, Motorola & Zenith such strong competitive positions, is the prime problem facing CBS-Columbia and other "pretenders" to the 9-year-old TV trade. That is main job 57-year-old Henry Bonfig confronts at CBS-Columbia which, despite a tremendous TV-radio publicity machine and the huge finances behind it, has not yet been able to win as much as 1% of the market.

Therein lies the key to the basic competitive problem, not only for TV-radio but appliances handled by the same firms. Crosley tried to hypo TV-radio distribution by way of its prize Bendix washing machine line, which it abruptly pulled away from long-standing distributors who were handling rival TV-radio lines. Admiral is inclining more and more to factory-owned distributorships, with 21 already -- most of any except GE & Westinghouse, which have own national distribution subsidiaries.

The Big 4 -- RCA, Philco, Admiral, Motorola -- and close running Zenith have always insisted on private franchisers, though they keep a few of own. Philco, and to a lesser extent Crosley, manufacture year-round lines for their distributors, designed to equalize seasonal humps. RCA under pres. Frank Folsom has been working toward that end. It's doubtful whether CBS wants to go into "white goods" too.

Veteran of the appliance field, which he first entered in Kansas City in 1924, going in 1927 with Bill Grunow's old General Household Utilities Corp., Chicago, big refrigerator handler, then radios, the popular "Hank" Bonfig faces enormous obstacles in such TV-radio-appliance competition. CBS is a highly profitable concern, apparently bent on being another RCA, but despite its expected \$400,000,000 volume this year (mainly from telecasting) it is still losing money in the set & tube manufacturing businesses -- the tube business mainly because of investment in color.

It's hell bent to win a share of a market it has been unable to dent in the 4 years since it bought out Air King. Bonfig's job is to shore up distribution soft spots, set up new ones, ride the inevitable "tide of color" when it begins to flow, and take the receiver manufacturing phases of CBS's operations out of the red.

* * * *

Broader distribution is probable reason behind negotiations for merger of Whirlpool Corp., St. Joseph, Mich. (washing machines) and Seeger Mfg. Co., St. Paul (Coldspot refrigerators & freezers), both major entities in their fields, both part-owned by and suppliers of Sears Roebuck. The news leaked this week that principals are discussing legality of merger with govt. officials. Either or both lines would be hot items for many TV-radio distributors, eager for top-brand "white goods". Both companies are strong ones, Whirlpool sales last year running \$169,453,888, earnings \$2.98 a share, Seeger's sales \$112,564,615, earnings \$5.32 a share.

* * * *

TV production continued seasonal decline, totaling 110,651 week ended May 13, compared to 127,067 preceding week and 131,627 in week ended April 29. It was 19th week of year by RETMA calculations and brought production for year to date to about 2,935,000, compared to approximately 2,200,000 in same period of 1954.

Radio production totaled 287,352 (145,757 auto) week ended May 13, compared to 286,284 week ended May 6 and 278,054 week before. For 19 weeks, production was estimated at 5,400,000 vs. 3,750,000 in corresponding 1954 period.

COMPONENTS MAKERS, those under-publicized but usually reliable barometers of TV trade trends, generally foresee 1955 as another year of solid growth for their set manufacturer customers—equal to, perhaps exceeding, the nearly 7,500,000 TVs produced and sold in 1954—on the basis of parts orders currently on their books. They're a pretty optimistic bunch, by and large, and their optimism was reflected this week at the annual Electronic Parts Show at Chicago's Conrad Hilton Hotel, which proved to be biggest ever (290 exhibitors, 10,000 registrants).

Several important parts makers tell us they look for sizable increases in TV set production in last 6 months of year. All noted increases in orders last 3 months—a welcome indication that set makers at long last were reducing their huge inventories of components.

Parts and set manufacturers make common cause on one complaint—profits are too low, even though unit sales remain high and are even expanding on some items. And they apparently don't see much prospect of raising parts prices to get more profit.

* * * *

Veteran parts maker Leslie F. Muter, pres. of Muter Co. & RETMA treas., comments thus on current state of parts industry: "I think we're all going along quite well, and don't have too much room to complain. We're getting volume, better than a year ago in most cases, which I think is basically due to high-fidelity and such allied fields. But the continued high level of TV business has also been a big factor—bigger, I think, than many of us would have predicted a year ago.

"With those low price tags, our set-manufacturing friends are going to move a lot of receivers this year.

Second sets are going into homes with some regularity now, and that's bound to increase business for everybody, including us. The whole picture adds up in my mind to a 7,000,000-plus year for TV production and retail sales. Now if something can be done about low profits on parts . . ."

Matt Little, pres. of Quam-Nichols Co., big speaker manufacturer, goes along with Muter—with this reservation: "I just hope the TV manufacturers don't overproduce in the last 6 months to spoil what could be a very fine year for everyone. As long as they watch that inventory, and I have every reason to believe they will, all of us will have at least as good a year as 1954."

Harry A. Ehle, v.p. of International Resistance Co., sees the tremendous number of new electronic products being introduced almost daily as one of biggest reasons for his prediction of bullish future. He cautions all levels of trade to prepare for diversification of product to eliminate seasonal peaks and valleys in sales.

* * * *

Interest at parts show itself was centered on high-fidelity. Many jobbers reported sales of "hi-fi" components this year running 25-50% over 1954, which in itself was big year in this field. More manufacturers have entered field with higher-quality products, for, as Little said: "The public has been trained to demand better sound and is getting it from the manufacturers. High-fidelity is getting to mean precisely that, even though we have no fully-acceptable definition of the term; the old days in which anything could be palmed off as high-fidelity are gone."

Lots of interest, too, in color—though consensus of jobbers was that a real lift from color couldn't be expected until 1956, at the earliest. By the same token, some parts manufacturers expressed view that they could help speed lower color prices by continuing their research on automation and other production short cuts with objectives of reducing cost of components even further.

Topics & Trends of TV Trade: Long-awaited 1955 *Consolidated Consumer Analysis*, released this week and covering 20 markets where newspapers conducted own consumer buying surveys in Jan. (Vol. 11:15,20), reveals important data on TV purchase plans this year, rate of saturation and ownership by makes. Here are percentages of families, both TV & non-TV owners, planning to buy set this year (saturation as of Jan. in parentheses):

Sacramento, 15.7% (60.8%); Modesto, 12.4% (59%); Newark, 11.8% (92.9%); Fresno, 11.7% (66.4%); Washington, 10.8% (81.6%); Portland, Ore., 10.5% (64.9%); Milwaukee, 9.1% (93.1%); San Jose, 8.9% (82%); Honolulu, 8.7% (62.9%); Cincinnati, 8.6% (90.7%); Portland, Me., 8.4% (77.9%); Seattle, 8.1% (74.8%); Long Beach, 7.4% (90.8%); Duluth-Superior, 6.8% (75.3%); Phoenix, 6.5% (81.5%); Indianapolis, 6.3% (88.6%); Columbus, O., 5.3% (93.8%); St. Paul, 4.9% (89.2%); Omaha, 4.5% (88.7%); Salt Lake City, 4.5% (87.1%).

RCA ranks first among set ownership in 16 of those 20 markets; Hoffman is tops in 2 (Fresno & Modesto); Admiral, one (Phoenix); Philco, one (Sacramento).

Newspapers in some of the markets asked additional TV questions of consumers; for example, *Milwaukee Journal* last week published replies to queries on second-set ownership (Vol. 11:20). Copies of the consolidated report, which gives basic data on all 20 markets, are available from *Milwaukee Journal* promotion dept., which coordinated information.

Individual copies of respective market studies are available from these newspapers: *Portland (Me.) Press Herald* and *Evening Express*, *Columbus Dispatch* and *Ohio State Journal*, *Cincinnati Times-Star*, *Indianapolis Star* and *News*, *Duluth Herald* and *News-Tribune*, *St. Paul Dispatch* and *Pioneer Press*, *Omaha World-Herald*, *Salt Lake Tribune & Deseret News*, *Seattle Times*, *San Jose Mercury* and *News*, *Sacramento Bee*, *Fresno Bee*, *Modesto Bee*, *Long Beach Press-Telegram*, *Honolulu Star-Bulletin*, *Phoenix Republic* and *Gazette*, *Oregon Journal*, *Newark News*, *Milwaukee Journal*, *Washington Star*.

* * * *

GE sees resurgent demand for 14-in. receiver, as second sets loom increasingly important in TV market. This week, it brought out a 32-lb. table model at \$99.95, in Boston and Buffalo (and shown to press in N. Y.) as first cities in distribution expected to become nation-wide by July. It reportedly will cost distributor about \$72, dealer about \$80—somewhat lower profit margins than on 17 & 21-in. receivers. Paul H. Leslie, monochrome TV sales mgr., told us that GE's decision to resume 14-in. was motivated by marketing research indicating that comparatively few set owners are replacing their small-screen sets and demand is for a low-priced second set instead.

"We expect to sell very few to initial buyers," he said. "This set is designed to be taken from room to room or to the summer camp or any place where a portable radio goes." Sets come in brown metal at \$99.95, slightly higher for 2-tone ivory and gray. They're about 10½-in. high, 13¾-in. wide, 17-in. deep. They contain GE's first vertical chassis (more are expected in GE's new line to be introduced in July at National Assn. of Music Merchants show), are more than 50% printed-circuit, have 16 tubes (6 of them multi-purpose). They have 41-mc IF circuit, built-in antenna & all-channel tuner.

Note: Olympic Radio has been merchandising 14-in. table model at \$99.95 for last 8 months (Vol. 10:36).

* * * *

RCA will show new TV line, which reportedly includes its first vertical chassis sets, at meeting of field reps June 6-8 in Barbizon Plaza Hotel, N. Y. Regional meetings will be held June 10-12 in San Francisco, June 14-16 in Chicago, June 17-19 in New Orleans.

SHIPMENTS of TVs to dealers in first 3 months totaled 1,968,347, compared to production of 2,188,252, according to RETMA state-by-state report released this week, supplementing recent 9-year tabulation, 1946-54 (Vol. 11:19). They compared with 1,655,839 shipped in first quarter of 1954, when production was 1,447,110. New York led, with 187,003; California second, 144,335; Pennsylvania, 125,252. March shipments were 690,097, compared to 640,771 in Feb. and 582,839 in March 1954. Here's state-by-state report for quarter (county-by-county tables available to members from RETMA on request):

State	Total	State	Total
Alabama	35,180	New Hampshire	7,271
Arizona	10,941	New Jersey	60,216
Arkansas	24,124	New Mexico	6,320
California	144,335	New York	187,003
Colorado	14,339	North Carolina	51,752
Connecticut	26,981	North Dakota	7,729
Delaware	3,855	Ohio	100,647
District of Columbia	19,628	Oklahoma	29,675
Florida	61,153	Oregon	25,787
Georgia	40,268	Pennsylvania	125,252
Idaho	9,380	Rhode Island	9,416
Illinois	108,071	South Carolina	29,607
Indiana	52,994	South Dakota	6,211
Iowa	32,215	Tennessee	43,755
Kansas	29,057	Texas	114,675

Nebraska	18,670	Hawaii	3,261
Nevada	2,332		
		GRAND TOTAL	1,968,347

Convention of National Community TV Assn. in New York's Park-Sheraton Hotel June 6-8 will have as principal speaker FCC Comr. John C. Doerfer, who has shown a particular interest in community systems. Arthur Gladstone, of Commission's Common Carrier Bureau, will describe FCC's policy on microwaves for systems. Program includes panel sessions and speeches on taxes, promotion & advertising, satellites & boosters, govt. regulation, technical developments. Exhibitors include: Ampli-Vision div. of International Telemeter, Blonder-Tongue Labs, Entron, Federal Telephone & Radio, Jerrold, Phelps-Dodge, Philco, Plastoid, RCA, Rego Insulated Wire, Spencer-Kennedy, Times Wire & Cable, U. S. Wire & Cable, Vision Wire, Westbury Electronics.

Bill to remove excise taxes from repair and replacement parts for TV-radio sets, to specifically exempt non-entertainment TV & radio from tax and to lift tax from certain TV-radio components and parts "where the cost of compliance and enforcement is not warranted by the negligible revenues produced" was introduced May 19 by Sen. Martin (R-Pa.) for himself and Sen. Dirksen (R-Ill.). The bill, S-2009, is identical to section of last year's HR-6440 which died when Congress adjourned (Vol. 10:34).

Another microwave application to serve community antenna systems was filed this week—Antennavision Service Co., 612 Security Bldg., Phoenix, Ariz., seeking relay on Heliograph Peak to bring Phoenix station signals to towns of Clifton, Plantsite, Stargo & Morenci. Pres. of Antennavision is Paul Merrill, mgr. of Gila Bestg. Co., operator of AMs in Coolidge, Globe, Safford & Winslow, Ariz. Application specifies Philco TLR-3AP equipment, construction costs of \$18,382.

Admiral and Federal Trade Commission may settle complaint charging misrepresentation in ads on 21-in. sets (Vol. 11:14,17,20) without need for hearing, it was indicated this week following cancellation of hearing scheduled May 17 in Chicago. Admiral lawyers and FTC attorney Edward K. Downs will confer later on terms.

Raytheon pres. Charles Francis Adams Jr., taking cognizance of persistent "merger" rumors, states in current house organ "there is nothing of the sort in sight."

Trade Personals: Henry C. Bonfig's resignation as Zenith v.p. & director of sales (see p. 11) became effective May 18 when TV-radio sales v.p. Leonard C. Truesdell succeeded him; Bonfig will vacation until early June, when he assumes presidency of CBS-Columbia Inc., and until then retiring pres. Seymour Mintz will remain on job . . . Frank Folsom, RCA pres., leaves this week-end for 4 weeks in Europe, will also go to Cairo and Istanbul; v.p. Mannie Sacks will join him in about week . . . Sam F. Arn Jr. promoted to sales mgr. in expansion of Packard-Bell technical products div.; Hugh Vick, ex-Northrop Aircraft, named chief of contracts administration section . . . Harry L. Thorson, mgr. of GE TV camera tube project, appointed mgr. of transmitting tube project engineering at Schenectady . . . Fred C. Zusi promoted to head new DuMont systems-engineering group, supervising sales of electronic equipment for automatic production & quality control . . . Nat Marshall, ex-mgr. of broadcast sales, promoted to asst. director of General Precision Labs' engineering products div.; Joseph Belcher promoted to mgr. of industrial TV sales . . . Jack L. Hobby, Raytheon staff asst. for public relations, will become mgr. of publicity & institutional adv. and head house organ *Raytheon News*, in new setup after Richard Axten takes over v.p. of GE as director of public relations . . . Bernard B. Cohen, ex-Emerson & Tele-tone, named works mgr., General Transistor Corp., Jamaica, N. Y. . . . Ray McCadam promoted to western district sales mgr., GE tube dept., Los Angeles . . . Jerome K. Levy, gen. mgr. of Audio & Video Corp., N. Y., elected a v.p.; Robert Winston elected sales v.p. of National Musitime Corp., div., Ray Rand sales v.p. of A-V Tape Libraries Inc. . . . Edwin J. Bradley, ex-Airpax Products Co., Middle River, Md., appointed sales mgr. of Color Television Inc., San Carlos, Cal., now largely in military electronics production . . . Albert Benjaminson named chief engineer, Granco Products, Long Island City, N. Y. . . . Richard Berggren, ex-Stiller-Rouse & Assoc. Adv., Los Angeles, named Hoffman Radio adv. mgr., reporting to E. A. Tischler, new adv. director of parent Hoffman Electronics; Deane Aylesworth continues as adv. mgr. of Hoffman Labs . . . G. Warren Kimball promoted to mgr. of battery & renewal components marketing, RCA tube div.

DISTRIBUTOR NOTES: Walther Bros., Philco distributor in New Orleans last 27 years, switches to RCA, replacing Television & Appliance Distributors Inc. . . . Crosley-Bendix appoints Graybar, Buffalo . . . Stromberg-Carlson appoints Southern Electric Corp., Staunton, Va. (L. J. Kiger, pres.) . . . Sentinel appoints Ralph Lay Co., 5627 Manchester Ave., St. Louis . . . CBS-Columbia Boston factory branch promotes Arnold Mackowsky to sales mgr. . . . Gross Distributing Corp., Newark (Stromberg-Carlson) appoints C. Edward Erbe as sales mgr.

Lansdale Tube Co., Lansdale, Pa., operated as Philco subsidiary since 1947, becomes Philco division under name of Lansdale Tube & Transistor Co. Wm. J. Peltz, v.p. of operations for TV div., has been promoted to v.p. & gen. mgr. of new div.

Construction of Motorola's \$1,500,000 transistor plant in Phoenix began this week as exec. v.p. Robert W. Galvin dug first shovel of dirt. New 57,600-sq. ft. building is slated for completion by end of year, initially will employ 300-500.

Louis A. Connelly, 59, mgr. for last 13 years of govt. dept., RCA engineering products div., died of heart attack May 20 at his home in Medford Lakes, N. J. He had been with RCA and predecessor companies since 1924, always on govt. sales, won company's highest citation recently for extraordinary service during Korean War. Surviving are his wife and 2 daughters.

Electronics Reports: Complaint that aircraft manufacturers are using govt. procurement policies to put themselves in the electronics business (Vol. 11:7,17) drew strong rebuttal last week from a leading airframe maker and a top Air Force procurement official. Addressing National Conference on Aeronautical Electronics, August C. Esenwein, Ft. Worth v.p. of Convair (whose parent General Dynamics Corp. is due to take over Stromberg-Carlson; see Vol. 11:18) said aircraft industry has too many of its own research, development and production problems to try to take over the function of electronic subcontractors.

"Never has our problem been one of too little work, work to be husbanded selfishly in our own plant," he said. "Rather, the greatest problem has been one of finding capable, qualified, enthusiastic and uncommitted vendors. Our sister divisions at San Diego and Pomona have had the same trouble . . . which is why, in certain instances, they have had to do some of the electronics work themselves."

Air Force policy is opposed to aircraft manufacturer competition with established electronics suppliers, said Brig. Gen. C. H. Mitchell, director, procurement & production, Air Materiel Command headquarters. "There must be some compelling reason for an airframe manufacturer to build his own component equipment," he declared. "This should happen only by default of the electronics industry. However, it is not the policy of the Air Force to encourage or condone airframe manufacturers entering the electronics business—or the same policy in reverse."

Sperry Gyroscope Air Force contracts mgr. Norman L. Winter urged that electronics companies be given bigger role in new "weapons system" procurement contracts. He said each program should be examined carefully to see whether an aviation or an electronics company would be better equipped to manage the program. To date, the bulk of weapons system management contracts have gone to airframe manufacturers, giving them full responsibility for design and integration of all components going into the military end-product, and important responsibility for procurement of these components.

* * * *

Consolidated Electronics Industries Corp., Waterbury, Conn., controlled by North American Philips Co., will buy all assets of Alliance Mfg. Co., Alliance, O., leading manufacturer of antenna rotators, small motors for phonographs, fans & bathroom heaters. It's paying \$3,650,000 in notes convertible into 200,000 shares of Consolidated within 3 years. Transaction is to be concluded by June 30, subject to stockholders' approval. Consolidated, formerly Reynolds Spring Co., sold its automotive business last Dec. and acquired a number of Philips properties (Vol. 11:2), including military electronics. Consolidated reported net profit of \$301,000 for first quarter 1955. In last quarter 1954, company sustained operating loss of \$274,000 plus loss of \$731,000 on sale of its assets. Net sales for 6 months ended March 31 were \$2,934,000, net loss \$704,000.

Original "Tinkertoy" automatic production line in Arlington, Va.—which gave modular design of electronics its greatest impetus when shown for first time in 1953 (Vol. 9:38)—has been leased by National Bureau of Standards and Navy to Aerovox Corp., which succeeds Kaiser electronics div., Willys Motors Inc. as operator of the line. Key personnel formerly associated with Kaiser have been employed by Aerovox to operate and expand the system. Emphasis will be placed on production of modules for experimental use by interested electronic equipment manufacturers. The Navy, which is encouraging use of modular-design concepts in fleet equipment, reports that electronic devices turned out on the Arlington automatic assembly line have proved equal or superior to conventional equipment.

Financial & Trade Notes: Television-Electronics Fund Inc., reporting total net assets of \$96,182,331 (8,489,045 shares) as of April 30, up from \$79,231,366 (7,275,625 shares) as of Jan. 31, reports that it added these stocks during the quarter: 9200 shares of Babcock & Wilcox at market value of \$869,400; 10,000 Barry Controls Inc. "B," \$145,000; 3000 Bell & Howell, \$115,875; 16,200 Bullard Co., \$607,500; 9000 Continental Telephone Co., \$219,375; 12,000 Elgin National Watch, \$250,500; 4000 Lockheed Aircraft, \$187,000; 16,100 Pullman, \$970,025; 10,000 Servomechanisms Inc., \$112,500; 1200 Topp Industries Inc., \$7950.

Also acquired were 7400 shares of recently offered (Vol. 11:17) Gross Telecasting Inc., valued at \$142,450. Fund also holds 800 Consolidated TV & Radio Broadcasters Inc. (Bitner stations), at \$20,800, and increased its holdings in Storer Bestg. Co. from 5000 to 20,000 shares at \$505,000.

Fund added to holdings in these stocks during quarter: ACF Industries, Addressograph-Multigraph, Allis-Chalmers, American Broadcasting-Paramount, American Chain & Cable, Beckman Instruments, Borg-Warner, Bulova Watch, Carborundum Co., Chance Vought Aircraft, CBS "A," Columbia Pictures, Consolidated Electronics Industries, Consolidated Engineering Corp., Cornell-Dubilier, Corning Glass, Curtiss-Wright, Douglas Aircraft, Eastman Kodak, Eaton Mfg., Electric Controller & Mfg., ElectroData, Food Machinery & Chemical, Garrett, General Dynamics, General Tire, Goodyear, Hazeltine, Indiana Steel Products, IBM, International Nickel of Canada, I-T-E Circuit Breaker, Magnavox, Maxson, Minneapolis-Honeywell, Minnesota Mining, National Acme, National Cash Register, North American Aviation, Northrop Aircraft, Oak Mfg., Paramount Pictures, Penn Controls, Photon, RCA, Reliance Electric, Remington Rand, Ryan Aeronautical, Square "D," Stewart-Warner, Taylor Instrument, Texas Instruments, Tung-Sol, 20th Century-Fox, United Aircraft, Walt Disney Productions, Westinghouse Electric, Worthington.

Part of holdings were sold in Aerovox, AT&T, Bendix Aviation, Borg (Geo. W.), Clark Controller, Cle vite, Cutler-Hammer, DuMont "A," Emerson Radio, General Con-

trols, GE, Hammond Organ, International Resistance, Raytheon, Robertshaw-Fulton, Stromberg-Carlson, Technicolor, Thompson Products, United-Carr Fastener, Western Union, Westinghouse Air Brake, Zenith. Having disposed of American Bosch Arma in preceding quarter, it also sold its 1900 shares of American Bosch preferred, 1952 series, retaining in portfolio of preferred stocks Eastern Industries, 75 Giannini, 2000 Raytheon.

(For similar report on Oct. 31-Jan. 31 quarter, see Vol. 11:10, p. 13.)

* * * *

Daystrom-Weston merger (Vol. 11:14) was approved May 17 by stockholders of both companies. Weston stock will be exchanged for Daystrom on one-for-one basis, and Weston will become wholly operated subsidiary of Daystrom. For fiscal year ended March 31, unaudited Daystrom figures show estimated sales of \$73,800,000, compared to \$62,473,000 preceding year. Net income was \$1,690,000 (\$2.56 a share) compared to \$1,459,000 (\$2.33). Weston's 1954 sales totaled \$28,672,800 vs. \$32,409,800 in 1953. Net income was \$1,056,714 (\$2.47 a share) vs. \$1,025,930 (\$2.40) in 1953. Daystrom pres. Thomas Roy Jones predicted 70% of company's sales this year will be in electronics, electrical and related field.

Reeves-Ely Laboratories Inc. 1954 sales dropped to \$35,332,365 from record \$39,630,155 of 1953, reports pres. David T. Bonner, but net income went up to \$2,295,688 (\$2.16 per share) from \$1,823,174 (\$1.71). Backlog at year's end was \$51,000,000, and working capital was \$15,387,430 compared with \$12,244,152 at end of 1953.

Jerrold Electronics Corp., Philadelphia, major manufacturer of community antenna and master antenna systems, has filed with SEC proposed issue of \$2,750,000 of 6% convertible subordinate debentures due 1975 and 200,000 shares of common; underwriting is headed by Van Alstyne, Noel & Co. and Butcher & Sherrerd, Philadelphia.

Storer Broadcasting Co. reports net income of \$811,989 (\$1.44 a share) for first quarter vs. \$803,235 (\$1.43) in 1954 quarter. Gross revenues were not disclosed. (For 1954 and preceding years' balances, see Vol. 11:15, p. 16.)

LAST TESTIMONY in Lamb case was concluded May 20 after 56 days of hearings extending over 8 months as Toledo broadcaster-publisher-industrialist Edward Lamb reaffirmed from the witness stand "every non-Communist affidavit I ever made" and declared "I do not retract by one iota or comma" any affidavits made to FCC. Actual hearing record—which now contains about 1,500,000 words—won't be closed until both sides meet with examiner Herbert Sharfman to dispose of certain motions, discuss various stipulations, etc. This shouldn't take longer than one day.

Next step will be for each party to file proposed findings (for which 20 days is permitted by Commission rules), then examiner's initial decision—likely to take several months—followed by filing of exceptions by both sides, then final decision by FCC.

At this week's hearing, former Attorney General J. Howard McGrath, Lamb's business partner and attorney, testified on "issue No. 2" in Lamb case—the accusation that bribe had been offered for false testimony against Lamb. McGrath testified that Emmet Lee Wheaton Jr., Toledo, had signed statement that Wm. G. Cummings, self-styled ex-FBI undercover Communist and FCC's first witness against Lamb, told him it would be "worth \$1000" if he could remember that Lamb had attended the dedication of Communist headquarters in Toledo in 1944. McGrath emphasized that he was not accusing FCC of proposing or condoning an attempted bribe.

Proceedings this week also heard Pittsburgh Mayor

David L. Lawrence, 32nd witness in the hearings, testify he had known Lamb since 1937 as staunch enemy of Communism, that he first met him in Pittsburgh when Lamb was labor lawyer fighting to keep Reds out of United Steelworkers Union.

In a related development, a Federal jury in Washington, deliberating only 20 minutes, found Mrs. Marie Natvig guilty of 3 counts of lying to FBI and FCC officials. Trial did not deal with the truth of what she said about Lamb in either her original or her turnabout testimony. She faces up to 15 years in prison and \$6000 fine, was released on bond pending probation report. Her attorney, who argued Mrs. Natvig was "confused" while on stand at FCC hearing, said verdict would be appealed. In summing up to jury, Justice Dept. attorney said she committed "one of the most vicious things she could have done" if she lied in linking Lamb to Communists. He said evidence seemed to show that she did.

—■—

Sylvania has no present intention of seeking new financing this year, pres.-chairman Don G. Mitchell told *Wall Street Journal* this week, apparently prompted by inquiries about its atomic energy activity. He said Sylvania is one of leaders in field of atomic fuel & components, under contract with AEC. While this business is not profitable, it isn't losing either, he said, and over next 5 years he said company's atomic energy activities could become as big as Sylvania is today (1954 gross: \$281,641,987, net \$9,480,941, or \$2.92 per share).

NOT ON AGENDA of NARTB convention, apparently still as far off as ever, is matter of a continuing market-by-market or county-by-county census of TV homes acceptable to all segments of the industry. Though it's one of industry's real needs, NARTB officials deny dawdling—but fact is that it has been in the works now for 3 years and only action thus far has been to have Politz undertake pre-test methods and make pilot studies in undisclosed markets.

Next step is another progress report, to be submitted to TV board at June 23 meeting in Hot Springs, Va., and at the convention pres. Harold Fellows is expected to repeat "hope" that a workable system will be in operation before the 1956 convention.

Some of the leading research people in the industry now frankly say they think the project may die aborning, and at the moment they don't seem overly concerned. The telecasting industry is so vital, time so scarce on networks and major stations, outlets so few, jobs for sponsors so well done on TV, that agencies simply take-or-leave the network figures (covering their affiliated stations), the figures claimed by stations, or other proffered statistics.

Networks don't release their figures. Station estimates are carried in some trade journals—"certified". Some big agencies, like J. Walter Thompson, which conducted 4 surveys on "Where the Sets Are," covering only metropolitan trading areas of 340 top markets, compile their own figures.

Last county-by-county census released by NBC was dated May 1, 1953, covered radio as well as TV ownership; one by CBS was dated Nov. 1, 1953, based on a Nielsen study. Since then, *Television Magazine* has been publishing monthly projections which have been gaining considerable acceptance. Another index to gains in audience, but by no means synonymous with sets-in-use, is monthly report by RETMA on shipments to dealers; it's released by states only, though compiled on county-by-county basis, with latter figures not for publication.

NARTB research mgr. Richard M. Allerton is in charge of the long-projected all-industry census which, it had been expected, would be backed by the networks, RETMA, AAAA, ANA. Committee has Robert D. Swezey, WDSU-TV, New Orleans, as chairman, and members are Hugh Beville, NBC; Donald Coyle, ABC; Oscar Katz, CBS; Edward Eadeh, DuMont; James Anderson, Crosley; Campbell Arnoux, WTAR-TV, Norfolk; Richard Borel, WBNS-TV, Columbus; Kenneth Carter, WAAM, Baltimore; Clair R. McCollough, WGAL-TV, Lancaster; J. Leonard Reinsch, WSB-TV, Atlanta; Donald Thornburgh, WCAU-TV, Philadelphia; Lee Wailes, Storer.

First "permanent" CBS-TV affiliates advisory board was elected at convention in N. Y. May 19, each member to serve 2 years: Howard Lane, KOIN-TV, Portland, Orc., chairman; Richard A. Borel, WBNS-TV, Columbus, secy.; Paul Adanti, WHEN-TV, Syracuse; Glenn Marshall Jr., WMBR-TV, Jacksonville; T. B. Lanford, WJTV, Jackson, Miss.; Bruce McConnell, WISH-TV, Indianapolis; Wm. B. Quarton, WMT-TV, Cedar Rapids; Clyde Rembert, KRLD-TV, Dallas; James Russell, KKTU, Colorado Springs; Rex Howell, KFXJ-TV, Grand Junction, Colo.; Frank E. Busby, WTVY, Dothan, Ala.

CBS newsfilm div. named supplier of film news coverage of North & South America and Far East for Independent Television News Ltd., British service headed by Aidan Crawley to serve upcoming commercial Independent Television Authority.

Screen Tests to Order Inc., 550 Fifth Ave., N. Y., set up as companion service to Stock Shots to Order Inc.'s TV film dept., headed by Raymond Pheelan.

ABC has been in the black since first of year, and second-quarter earnings will be substantially higher than same period of 1954, thanks mainly to TV billings, AB-PT pres. Leonard H. Goldenson reported to stockholders at May 17 annual meeting. He said TV network time sales booked thus far this year exceed total for all of 1954. ABC in past year has "gained increased stature as a major network," he stated, citing such upcoming new programs as *Mickey Mouse Club*, *Warner Brothers Presents* & Bishop Sheen's *Life Is Worth Living* (shifted from DuMont) and sponsorship renewals as "evidence of greater critic, public and sponsor acceptance and the ability to deliver audiences through improved ratings." Goldenson reaffirmed the company's interest in phonograph & electronic fields; it's still surveying prospects of entering record field, and holds one-third of Microwave Associates, Boston. Upward trend of 1954 in movie business is continuing, with earnings for first 17 weeks running well ahead of similar 1954 period, though second quarter is seasonally weak because of lack of good pictures. AB-PT expects to complete required theatre divestiture program by Sept. 3, then will "give consideration" to purchase of additional theatres. (For Goldenson's remarks on subscription TV, see p. 4.)

"Children's programs are improving every year," according to survey of TV in all 48 states by General Federation of Women's Clubs, which expressed regret, however, that most of them "seek only to entertain." As reported by Federation's communications dept. chairman Mrs. Dexter O. Arnold, huge 500-woman survey and monitoring operation found: (1) Amount of objectionable language on children's programs is "insignificant in comparison with the amount of inspiring language." (2) "Children's programs seem to have neglected opportunities for presenting material of educational value. [The] problem is not what they present, but what they fail to present." (3) Early-evening shows "best meet the challenge of elementary school children," but there's lack of material for junior high age group. (4) Shows most consistently approved: *Disneyland* (100%), *Howdy Doody*, *Pinky Lee*, *Movie Marshal*.

Urging FCC to defy Pentagon's unwritten ban on towers higher than 1000 ft., Broadcast Bureau this week recommended that KSWB-TV, Roswell, N. M. be permitted to build 1610-ft. tower at new location despite opposition of military representatives on Washington Airspace Subcommittee (Vol. 11:11). Broadcast Bureau argued that military & civil aviation spokesmen appearing at FCC hearing on the tower proposal presented no evidence that new tower's height and location would make it a hazard, and pointed to evidence that present location is greater hazard than proposed one.

ABC-TV will begin colorcasting "only when color TV becomes commercially feasible and enough sets are in the hands of the public," AB-PT pres. Leonard Goldenson told stockholders meeting this week. He pointed out that *Disneyland* and *Warner Bros. Presents* series are being filmed in color for eventual re-runs on color TV.

Out-of-court settlement of \$1,000,000 suit against NBC by John J. Dickerson, ex-New Jersey GOP chairman, was reported "for a substantial amount" May 17, one day after case went to trial. Defamation suit resulted from 5 Robert Montgomery newscasts in 1952 dealing with state probe of gambling and corruption in Bergen County.

Headquarters of *Television Digest* during the NARTB convention are Suite D-615-17, Shoreham Hotel. Visitors are cordially invited.

PUBLISHED WEEKLY BY RADIO NEWS BUREAU • WYATT BLDG. • WASHINGTON 5, D.C. • TELEPHONE STERLING 3-1755 • VOL. 11: No. 22

SUMMARY - INDEX OF THE WEEK'S NEWS—May 28, 1955

AWARENESS OF INFLUENCE characterizes NARTB convention as members seek to insure unfettered growth under friendly governmental aegis (p. 1).

NETWORK PRESIDENTS proud of TV accomplishments, stress essentiality of networks on eve of govt. investigations, disclose exciting program outlook (p. 2).

"LINCOLN-DOUGLAS" DEBATES on TV proposed by Stanton for 1956 Presidential campaign, cueing evaluation of political "free time" controversy (p. 4).

TV's **SELLING POWER**, moving merchandise faster than any other medium, illustrated in presentations by NBC and TvB (p. 6).

SUBSCRIPTION TV finds few zealots among NARTB members, as efforts at "revolt" fail; proponents seek support for tryout; CBC turns thumbs down (p. 6).

LOW-POWER & LOW-PRICE transmitters and studio gear featured at NARTB show, as manufacturers anticipate FCC approval of small stations & boosters (p. 8).

BIG APPLIANCE DEAL, involving consolidation of RCA, Sears, Whirlpool, Seeger, perhaps others, awaits Justice Dept. opinion (p. 12).

INCREASE IN EARNINGS reported for most leading TV manufacturers in first quarter over year ago; outlook favorable for second quarter (p. 15).

FCC GRANTS CPs for Memphis & Hawaii, asks Supreme Court to reinstate multiple rule (p. 9). Richard A. Mack of Florida named to succeed Comr. Hennock (p. 16).

5-MEGAWATT UHF power ceiling to be proposed by FCC with drive to improve uhf sets, as Lee urges long-range reallocation; uhf operators map new strategy (p. 10).

FIRST TV OUTLETS go on air in Lafayette, La. & Rapid City, S. D.; Norfolk uhf resumes after 7-month silence. Peoria station buys first new RCA "megawatt" (p. 11).

POPULAR-PRICED COLOR SETS awaited by telecasters weighing purchases of color equipment; competition growing in color film chains (p. 11).

NARTB CONVENTION—THE SUMMING UP: A TV industry deeply conscious of its strength and concomitant responsibilities and a radio industry now optimistic about its economics after several shaky years met this week at NARTB convention in Washington, left with feeling that affairs are in safe hands among the governmental regulators.

Economic background of convention had several distinct characteristics -- pioneer telecasters are beginning to get some competition, seeing more coming as new vhf grants are issued, are working harder to maintain leadership; uhf operators with little or no vhf competition are doing well, but others see no succor except in drastic remedies; the myriad small radio operators, who comprise bulk of NARTB membership, look with envy at successful telecasters and wait for the day when they can assume in TV the same satisfying role they have attained in radio. Against that background, here are what we consider to be the major developments:

* * * *

Govt. Regulation: "Freedom" was the watchword from every govt. spokesman, from President Eisenhower down. The President was very explicit, stating: "We must grow up with this great force, assuring the freedom of people to express their proper opinions, with the whole industry governed by the same rules that govern newspapers, the normal rules of decency and good taste. As long as those are observed, any proper opinion -- any opinion -- can be expressed before the public." CBS pres. Frank Stanton spoke for the industry later when he said: "I am happy to hear those words, and CBS will not forget them."

FCC is considered more solid and safe than ever, with a chairman and majority who reiterate a "hands off" policy with every public utterance -- enhanced this week by appointment of Richard Mack who comes to FCC with record of stability (see p. 16).

Congress is a somewhat less certain quantity. Though Rep. Priest's remarks were unsettling to some, Sen. Magnuson's speech was calm and careful -- and no one expects crippling legislation to emerge from current Senate study. But networks' present freedom from licensing was questioned by keynote speaker Mark Ethridge, who

asked: "Does the economic and social impact of television make it desirable to re-view the question of network regulation -- certainly not with the end of making them common carriers, but in the light of the apparent inconsistency of regulating the faucet but not the pump, and in the light of the fact that television has given the networks more power than ever?"

* * * *

Subscription TV: Pro-toll converts among broadcasters are few indeed. Many operators dismiss pay-TV as something FCC or Congress couldn't conceivably approve. Others are alarmed at momentum it has achieved in some quarters, are trying to alert colleagues before it's too late. Some, among telecasters in economic difficulties or radio operators not yet in TV, are intrigued by pay concept, would like to "give it a try" -- if a "safe" test can be devised (p. 6).

TV's Selling Power: Two sales presentations, Television Bureau of Advertising 5-city survey of grocery shopping and NBC's "Strangers Into Customers", documented an advertising impact even greater than most telecasters realized (p. 6).

Color: Conversion to color is considered inevitable by virtually everyone -- but only a handful of telecasters are buying color equipment, while majority finds no incentive to colorcast until mass-priced receivers are on the horizon. Furthermore, there's fear of obsolescence as equipment continues to be refined (p. 11).

Hometown TV: Though there's still need for more strong outlets in most metropolitan areas, much attention was focused on another potential direction for TV's expansion. Difficult as it is to foresee today, there are those who predict that TV will burgeon as a small-city service, following in the path of radio's postwar expansion from 1056 stations in 1945 to 2835 authorized today.

New formula is needed, one comparable to small-town radio. On the technical side, FCC is preparing it now, drawing up new set of rules for low-power stations and boosters. Equipment makers seemed ready, showing widest variety of low-cost transmitting and studio gear -- some of it made even more attractive by novel "easy payment" plans. Programming and sales side of the small-city TV formula are still relatively undeveloped, crying out for pioneering and imagination (p. 8).

Equality of TV opportunity: Deficit-ridden uhf operators -- those with heavy vhf competition -- listened glumly as FCC Chairman McConnaughey proposed to let them buy 5-megawatt transmitters, to be available in about 2 years at a cost of perhaps \$300-\$400,000. Those wondering if they'd still be in business next month were not impressed by his plan for FCC-sponsored "improvement" of uhf receivers, his enumeration of what Commission is doing to "help uhf," nor Comr. Lee's long-term proposal for re-allocation. Meeting between convention sessions, group of hard-pressed uhf telecasters mapped strategy for last-ditch defense against bankruptcy (p. 10).

It's safe bet Washington won't be convention city again for a long time. Physical layout was completely unsatisfactory -- with shuttling between Shoreham and Sheraton Park Hotels, with exhibits in hard-to-get-at and stifling Shoreham garage and with many delegates forced to room at distant downtown hotels. With sigh of relief, members decided to convene next year in Chicago, where they met last year.

NETWORK PRESIDENTS SCAN TV HORIZON: Expressing unabashed pride in their contributions to TV in 10 short years, the 4 TV network presidents also showed keen and serious awareness of TV's unprecedented role in the American scene as they outlined plans for the future, in speeches at NARTB convention.

Presidents of the two most powerful networks, CBS's Frank Stanton and NBC's Sylvester L. Weaver, literally thrilled the not-easily-impressed audience when they projected network programming as far ahead as they could see.

With measured emphasis, the serious-minded Stanton stated: "The strongest sustained attention of America is now, daily and nightly, bestowed on television as it is bestowed on nothing else." In view of this, he said, "the policy of 'giving the public more and more of what it likes' is no longer good enough because it no longer goes far enough. TV could scarcely have gotten started by giving the public what it didn't like -- but the day for a closer inspection of the relationship between TV and its enormous public is now, in my opinion, at hand."

Stanton then disclosed CBS's plan to enlist "outside help" to determine how TV can best "satisfy the public taste and raise it a little, too." CBS will form a committee, "composed of distinguished members of the public representing the arts, religion, labor, industry, education, social and political scientists and television critics." Its job will be to "develop a list of the most difficult, vexing or perplexing questions on which public opinion of all degrees should be solicited as to the role of TV in our society -- and then let these questions be turned over to an experienced professional group for a field study to collect the answers the public gives back." CBS will underwrite cost -- coming to at least \$100,000.

* * * *

The gangling Pat Weaver, with his love of the word "excitement" and his capacity for generating a lot of it, opened this kind of vista: "In our future TV week, we might have 6 or 7 hours of special programming. First, a 3-hour, all-evening entertainment spectacular. Then a one-hour telementary. Telementaries give background and orientation on a subject like Pete Solomon's 'Three-Two-One-Zero' on the hydrogen bomb or his forthcoming 'Nightmare in Red' on Russia, or our 'India' and 'Tomorrow' telementaries. These are great lasting productions taking as much as a year to prepare and execute. Then we'll have one news-in-perspective show, a form that still escapes all of us, in my opinion. It would represent a relevant, important subject made into a special major report to the people and would be done in time to be hot. This would marry our 'Background' and 'Comment' shows with Ed Murrow's 'See It Now', but with less feature story feeling and more miracle-type coverage." All this, he said, can come only from networks.

If networks went out of existence, Weaver went on, there would be a shift of money from stations "who have proved that they will spend part of their money back in public service -- a shift to program companies and syndicates who will spend their money on shows aimed at the lowest cost-per-1000. Once the hit half-hours develop good ratings, then they will program the cheap half-hour after them in order to hold enough audience at the lower program cost to get a great buy -- and you have set up the chain reaction that will take this great instrument of ours and depress it to a living room toy -- panels, quizzes, B pictures, audience participations, trivia, escape, breaking through the nadir of nepenthe! We are not like the movies -- merchants of dreams, salesmen of escape. We primarily deal with reality. We are communicators, like newspapers and radio at its best."

* * * *

ABC's Robert Kintner, given the topic "The Business of Television," delivered a thumping defense of TV, of commercials, of networks -- and a ringing denunciation of subscription TV and the limitations of FCC's allocation plan.

"The loss of TV," Kintner said, "even in its present development, would represent an estimated loss of \$40 billion in terms of sales of goods and services which can be credited to TV today...I think that there can be no question on the rightness of advertiser support of TV. Its basic rightness needs no real argument. The American system works, and works well."

Though ABC-TV suffers from lack of "accessibility" to more markets -- out of 233 TV markets, only 42 have 3 or more stations -- Kintner warned that legal restrictions on networks aren't the answer. Instead, he said, accessibility should be provided via channel allocations changes; he cautioned that "any Congressional committee, or the FCC should go slowly in further restricting relationships between networks and stations." (For Kintner's views on allocations, see p. 10; on pay TV, p. 6.)

Pioneer TV inventor Dr. Allen B. DuMont reviewed development of TV since its "first seed" appeared with discovery of selenium 138 years ago, then stated: "Perhaps the future technical changes in receivers and equipment are of lesser importance than the world-wide spread of TV itself. Whether the receiver is thin and hangs on the wall like a picture -- whether the picture itself is in color or black-&-white, these things are not as important as the fact that Czechs, Russians, Chinese, Germans, Frenchmen and Indians may watch international sports events, deliberations before the United Nations, and other events of world-wide importance. A world-wide TV network is a certainty some time in the future."

TV'S MIGHTY POLITICAL POWER IN FOCUS: You'll be hearing a lot about the ground rules for TV as the 1956 political campaigns approach -- with Congress, FCC, networks et al certain to plunge headlong into "equal time" issue. TV's critical influence in making or breaking a candidate grows greater each year -- and this week it impelled CBS president Frank Stanton to suggest Congress amend Section 315 of Communications Act to permit him to offer free network time to Presidential candidates of 2 major parties for series of electronic "Lincoln-Douglas" debates, without necessity of making same offer to candidates of all minor parties (16 of them in 1952).

It's certain to evoke deepest sort of controversy among politicians & broadcasters, whose opinions are sharply divided. As against those who favor more liberal "free time" policy, there are those who say proposals such as Dr. Stanton's place too much power in hands of networks & stations, that they discriminate against legally constituted minority parties.

Divergence of FCC opinion was manifested this week at NARTB convention panel. Miss Hennock, only commissioner favoring free time for political candidates, urged creation of joint Congressional-Presidential committee to make recommendations on subject, even recommending "public treasury" share the cost of financing free time, if necessary. She was challenged by Comr. Doerfer, who commented that under her theory a candidate "shouldn't have to pay for public halls, newspaper space or a brass band." He said that in England the BBC allowed only total of 5½ hours of free time to hundreds of candidates in recent campaign.

Stanton proposes to invite 2 candidates to participate in its sustaining public service programs, and in addition would make "perhaps 2, perhaps 3 hours available free in prime evening time during the 1956 campaign for a modern-day electronic version of the 'Lincoln-Douglas' debates." Proposal drew quick approval of affiliates, to whom it was first broached last week.

Stanton thus explained reasoning behind his proposal: "TV as a full-fledged member of the free press, with perhaps more impact and more excitement than any other part of the press, does have an enormous responsibility in providing information and enlightenment during election campaigns. More and more not only do the politicians look first to TV, but also the voters themselves are turning to TV for the faces and facts upon which they can make the judgment which they finally record in the voting booth."

Both political parties generally endorsed idea as a step in right direction. Spokesman for Democratic National Committee told us: "The idea is promising as far as it goes. However, some safeguard will have to be provided so that a strong, legitimate third party is not frozen out." GOP spokesman commented in same vein.

Sen. Magnuson (D-Wash.), chairman of Interstate & Foreign Commerce Committee, termed Dr. Stanton's proposals "farsighted", said they were "well worth considering" because, although it sounds good to say you give equal time to candidates, from practical experience it doesn't work out that way." Interviewed on CBS-TV's "Morning Show," he said he favored changes in provisions of Communications Act, stating:

"I don't know just how we're going to spell it out, whether we'll spell it out in X number of hours or give it to the political parties to distribute among their candidates, but we're going to have to meet the problem -- and I'm glad to see Mr. Stanton was farsighted enough, as head of a big network, to realize it." A bill (S-636) to raise the limit on expenditures by each national political committee to \$12,300,000, partly to account for higher cost of TV, is under consideration of the Senate Rules subcommittee. NARTB pres. Harold Fellows has endorsed it in principle.

N.Y. Times' astute political writer James Reston took up whole problem of TV & politics in 1956 in May 26 column, said: "There is general agreement here that the ability-to-pay principle is not just in a democracy, and that the injustice is likely to increase in direct ratio to the rise in TV costs, but the problem cannot be solved merely by changing the rules to give the Democrats and Republicans free time and blocking out all others." Without mentioning Miss Hennock's proposal, he suggested creation of a Presidential commission, with representatives of public, broadcasters, FCC & major parties, "to explore the problem."

Personal Notes: Joseph H. McConnell, ex-NBC pres. resigning as pres. of Colgate-Palmolive Co., named gen. counsel & director of Reynolds Metals, succeeding the late Judge Robert B. Patterson . . . Harry G. Ommerle, CBS-TV program director, named N. Y. v.p. in charge of network programs, coordinating N. Y. programming and reporting to Hubbell Robinson Jr., national v.p. in charge of network programs . . . George Bristol promoted to director of CBS-TV sales presentations . . . Glenn Boundy elected Storer engineering v.p. this week in wake of last week's elevations of Stanton P. Kettler from southern district v.p. to v.p. in charge of operations, succeeded by George B. Storer Jr. in former post, and of John E. McCoy from secy. & house counsel to v.p. in charge of law, finance & engineering . . . H. Leslie Atlass, CBS central div. v.p., to be awarded honorary degree June 5 by Lincoln College, Lincoln, Ill., his home town, where he and his brother Ralph started WBBM in the '20s; presentation will be by Carl Haverlin, pres. of BMI, a Lincoln scholar, who also holds honorary degree from that institution . . . Fred Thrower, v.p.-gen. mgr. of WPIX, N. Y., elected a director of WGN Inc., Chicago . . . Earl H. Gammons, CBS Washington v.p., presented Distinguished Service Certificate by President Eisenhower May 23 for service as 1951-53 vice-chairman of President's Committee on Employment of the Physically Handicapped . . . Charles Moos promoted to NBC labor relations mgr., reporting to personnel director B. Lowell Jacobsen . . . Thomas W. Sarnoff, NBC Hollywood, married May 21 to Janyce Lois Lundon; at home after July 1 at 2000 No. Beverly Dr., Beverly Hills . . . Sol Cornberg, NBC director of studio & plant planning, leaves July 1 for England to serve as consultant to Sidney L. Bernstein, chairman of Granada Theatres Ltd., one of 4 companies granted commercial license by Independent Television Authority, will design TV studio facilities in Manchester . . . Ben Park, NBC-TV network program mgr., Chicago, named director of public affairs, reporting to v.p. Davidson Taylor . . . Patrick J. White promoted from commercial mgr. of KTBS to station mgr. of upcoming KTBS-TV, Shreveport (Ch. 3), due in Sept., reporting to pres.-gen. mgr. E. Newton Wray; Mrs. Marie Gifford will be TV commercial mgr.; Charles Saltgaver, production director . . . Larry Stevens, local sales mgr. of KGMB-TV, Honolulu, resigns to open own ad agency there in early summer . . . Milton F. Komito, ex-WAKR-TV, Akron, named gen. mgr. of WTAP-TV, Parkersburg, W. Va., succeeding Ted Eiland, now gen. mgr. of WJNO-TV, Palm Beach . . . Wm. Craw-

ford resigns as sales mgr. of WABD, N. Y. . . Wm. P. Breen promoted to new post of southeastern sales supervision in expansion of NBC film div.; John F. Tobin named northeastern sales supervisor, Edward A. Montaus central region, Robert R. Rogers N. Y. City . . . Soren H. Munkhof resigns as gen. mgr. of Hearst's WTVW, Milwaukee, to become consultant for Jerome Sill's upcoming WAGE-TV, Marquette, Mich. (Ch. 6), due in July; he's succeeded by Harry Peck, ex-gen. mgr. of AM affiliate WISN . . . George Greaves, gen. mgr. of radio KNBC, San Francisco, promoted to staff asst. to Thomas C. McCray, gen. mgr. of KRCA, Los Angeles and Pacific div., NBC radio; W. K. McDaniels promoted from sales mgr. to KNBC gen. mgr. . . Milton Brown promoted to NBC mgr. of program publicity, succeeding Don Bishop, now publicity director of NBC's owned stations, spot sales & WRCA-TV . . . John J. Schneider promoted to v.p. of Biow-Biern-Toigo; he's pres. of National TV Film Council . . . Howard E. Walpert resigns as sales mgr. of WHUM-TV, Reading, Pa., to join TV-radio dept. of Arndt, Preston, Chapin, Lamb & Keene Adv., Philadelphia . . . A. Prose Walker, mgr. of NARTB engineering dept., married last week end to Ellanie Lezos, of GE Washington office . . . B. P. Timothy resigns as gen. sales mgr. of Avery-Knodel Chicago sales office, plans to enter into station ownership in West or Southwest . . . Frank G. Silvernail, BBDO, elected chairman of American Assn. of Advertising Agencies' broadcast media committee; Jane Daly, Earle Ludgin & Co., elected vice chairman; John F. Devine, J. Walker, mgr. of NARTB engineering dept., married this tee, C. Burt Oliver, Foote, Cone & Belding, vice-chairman . . . John H. Allen, ex-Lever Bros., named TV-radio program director, Tatham-Laird Inc. . . Buckingham Gunn named v.p. & TV-radio director, Clinton E. Frank Adv., Chicago; he's replaced in Foote, Cone & Belding TV-radio dept. by Wm. Hyer, film package producer . . . E. L. (Spike) Colburn, ex-Television Programs of America, named exec. sales director of KBTB, Denver . . . Wm. Patterson appointed TV-radio v.p. for east, John Gaunt for west, Grant Adv. . . Edwin M. Fisher, ex-*Television Magazine* v.p., joins TV div. of rep Bolling Co.

TV Inc., co-op film purchasing firm with 62 stations as members, this week elected new officers: pres. & chairman, Joe Floyd, KELO-TV, Sioux Falls, S. D.; exec. v.p., W. D. (Dub) Rogers, KDUB-TV, Lubbock, Tex.; secy., Jim Manning, KXLF-TV, Butte; treas., Ed Craney, KXLF-TV.

National Affiliated Television Stations Inc. (NATS), GE-supported organization which proposes to assist TV stations with finances, management, programming & sales (Vol. 11:12, 14, 21), this week released list of 16 new affiliates (14 of them vhf, including 2 CP-holders), in addition to the 19 disclosed last week. According to NATS v.p. Berman Swartz, new affiliates are: WFIL-TV, Philadelphia (Ch. 6); KMBC-TV, Kansas City (Ch. 9); WNEM-TV, Bay City, Mich. (Ch. 5); KBMB-TV, Bismarck (CP for Ch. 12); WRBL-TV, Columbus, Ga. (Ch. 4); KIEM-TV, Eureka, Cal. (Ch. 3); WINT, Waterloo, Ia. (Ch. 15); KHOL-TV, Kearney, Neb. (Ch. 13); KBES-TV, Medford, Ore. (Ch. 5); KCJB-TV, Minot, N. D. (Ch. 13); WSIX-TV, Nashville (Ch. 8); WOAY-TV, Oak Hill, W. Va. (Ch. 4); WDBO-TV, Orlando, Fla. (Ch. 6); WWLP, Springfield, Mass. (Ch. 61); WTWV, Tupelo, Miss. (CP for Ch. 9); WSBA-TV, York, Pa. (Ch. 43).

Operating in black for first full year in its 6-year history, *Los Angeles Times'* independent KTTV showed profit of \$225,833 last year, compared to loss of \$607,699 in 1953 and \$896,940 in 1952. Last year's gross revenue totaled \$5,640,555, compared to \$4,011,981 for 1953.

Citations at NARTB convention: To Mark Ethridge, publisher of *Louisville Courier-Journal* (WHAS-TV & WHAS) and 1936 pres. of old NAB, annual convention keynote award, previously bestowed on RCA-NBC's David Sarnoff and CBS's Wm. S. Paley; to James C. Hagerty, White House press secy., "TV Pioneers" award of *Sponsor Magazine* for making possible televising of presidential press conferences, with citations to TV newsmen Bryson Rash of ABC, Lewis Shollenberger of CBS, Julian Goodman of NBC, who worked with him on technical aspects; to Mr. Hagerty again for same reason by Radio & TV Executives Society of N.Y., presented at White House May 22 by WQXR's Elliott Sanger & NAM's G. W. (Johnny) Johnstone; to ex-President Herbert Hoover, Radio Hall of Fame citation by Radio Pioneers, with citations to NBC pres. Pat Weaver, CBS network radio sales v.p. John J. Karol, Jack Benny, Fred Allen. Placed in Radio Hall of Fame was Joseph Henry, pioneer physicist (1797-1878).

Most valuable sales research book of the year, just off the press: *Sale's Management's* "Survey of Buying Power" (Bill Bros. Publishing Corp., \$4.).

POWERFUL SALES stimulus of TV advertising, how it moves merchandise faster than any other medium, was graphically illustrated in 2 separate but closely-related film presentations at NARTB convention. First was NBC's "Strangers Into Customers," a comprehensive survey of TV's impact on Ft. Wayne since its first station, uhf WKJG-TV, went on air in Nov. 1953. Second was Television Bureau of Advertising's 5-city survey of grocery shopping revealing TV as dominant influence in sales in 12 out of 15 food categories.

NBC's \$250,000 Ft. Wayne project, which research director Hugh Beville termed "the major achievement of my 25 years as a broadcast researcher," was truly an eye-opener. Largest research project ever undertaken by NBC, survey was conducted by W. R. Simmons Co. research firm in 2 parts—the first in Oct. 1953, month before station went on air, the second among same interviewees 6 months later. Major findings:

(1) After getting TV, consumers increased total exposure to all media by 41%, with TV getting lion's share; set owners watched TV average of 173 min. per day, compared to 94 min. for newspapers, magazines & radio combined. (2) TV accounted for 7 out of every 10 advertising impressions absorbed. (3) TV increased average brand-awareness by 45%, brand-product association by 59%, trademark recognition by 68%. (4) TV-advertised brands increased share of purchasers by 19% in typical package-goods field, while non-TV brands fell off 11%. (5) Most-advertised brands on TV increased business 48%, while brands with small TV schedules increased only 28%. (6) Four dealers out of 10 stocked new brands as result of TV advertising, with retailers favoring TV over newspapers almost 3 to 1 and over magazines almost 10 to 1 as "doing the best job of moving goods." Project was under supervision of NBC research mgr. Thomas E. Coffin.

NO TOLL TV FRACAS developed at NARTB convention—because rank-&-file endorses board's stand and because sizeable portion of membership is indifferent about the whole issue. A few minor efforts to precipitate debate aborted.

NARTB pres. Harold Fellows obviously spoke for majority when he stated: "There are times when it is not prudent, or for that matter fair, to try the issues in public before they have been considered by the established Federal authority in the matter."

As for networks' stand, CBS and ABC have already made positions clear (Vol. 11:21), ABC's pres. Robert Kintner again stating opposition in address during convention. NBC's attitude, as stated by RCA-NBC chairman David Sarnoff 2 years ago and quoted in current *Newsweek* article, remains unchanged. It's understood that NBC will take position in formal comments to FCC June 9 (a) that subscription TV is designed to make a "Hollywood cash box" out of TV; (b) that there can be no "peaceful coexistence" between free and fee TV because top-rated network shows would inevitably move over to pay-as-you-look.

"No fee-no see" will be NBC's war-cry, counterpart of CBS's slogan "TV can't exist half fee and half free." It won't be surprising if NBC, as well as CBS, opens up facilities for more debates on subject (Vol. 11:21)—impressed by reversal of sentiment expressed in letters to FCC as result of recent Bonfig-Starr debate (Vol. 11:21).

Kintner stated he had no doubt that paid TV could outbid free for best programs and that "the result would be not only a serious effect on advertising—a basic part of

Another aspect of Ft. Wayne survey, sociological impact of TV, was to be shown on NBC-TV's *Background* May 29. Filmed separately by NBC as a parallel project to sales promotion, it showed among other things that quality reading went up, light fiction & love stories down; attendance at club meetings & bridge parties decreased; clergymen found it harder to get contributions while sets were being paid for; husbands spent more evenings at home; scholarship in schools improved.

* * * *

TvB presentation by pres. Oliver Treyz, titled "Television—the Selling Machine," revealed that in just-completed survey conducted for it by Nielsen in Syracuse, Tarrytown & Peekskill, N. Y., and Fresno & suburban San Francisco, grocery shoppers were asked to reveal which advertising medium influenced them most to buy specific brands. TV was found to be first in brand purchases of soaps & cleansers, baked products, dairy products, cereals, coffee & tea, frozen foods, soups, pet foods, drugs, soft drinks, cigarettes & paper products—all but 3 of the categories covered. TV's influence was represented in 54% of dollar volume of all items purchased, magazines 27%, newspapers 11%, radio 8%.

Treyz further illustrated TV's potential selling power by another recent Nielsen survey of sudsless detergent field. It showed 15,100,000 families, 13,100,000 of them TV owners, use automatic washing machines. By buying 10 spot announcements a week on 126 member TV stations alone, said Treyz, a detergent manufacturer could achieve 42,000,000 "sales impacts" at cost of only \$1.37 per 1000, far lower price than any other medium.

Of the 13,000,000 U. S. homes which do not now have TV set, said Treyz, 10,200,000 are in TV areas, 2,800,000 out of TV signal range. He said average TV viewing is now 5 hours, 15 min. per day, "meaning that the average TV set, like its owner, also works 40 hours a week."

our economy—but a more limited use of TV facilities that would not be in the public interest."

"I am afraid," he added, "that we have not been too successful in bringing home to the public the economic and social implications of subscription TV . . . If you merely assume that the public will be against paid TV per se, you may be in for an awakening." He described telephone survey conducted by ABC in March "before the hullabaloo really began" in Baltimore, Los Angeles & New York. Most of the 800 polled hadn't heard of pay TV. Opinion was 2-to-1 against it, he said, "but the significant part of the survey, in my judgment, was that the 'against' answers were much higher among people who actually understood subscription TV than from those who had heard nothing about it."

"We do not consider this survey definitive," he went on, "but I think it does point out the need to expose free broadcasting as a part of our economic system, and as a principal method of all-day-long entertainment and information. There is need to do it quickly."

* * * *

There were several attempts to inject toll-TV controversy into NARTB deliberations. During FM session, Ben Strouse, operator of WWDC & WWDC-FM, Washington, and major stockholder of off-air WFMZ-TV, Allentown, Pa. (Ch. 67), submitted following resolution which was rejected: "It is correct as a matter of law, principle and public interest for a broadcast licensee to make a direct charge to a listener for a service rendered by the broadcaster over his licensed frequency."

Gene O'Fallon, owner of KFEL-TV, a former NARTB member, circulated petition asking repudiation of NARTB stand, working under aegis of International Telemeter. He

reported following signers: Ernest M. Thwaites, KFUN, Las Vegas; Jack Wallace, of CP-holder KBST-TV, Big Spring, Tex. (Ch. 4); Franz Robischon, KWRN, Reno; Richard Davis, CP-holder WELI-TV, New Haven, Conn. (Ch. 59); Frank J. Collins, WTVU, Scranton, Pa. (Ch. 73); John Doley, WACH-TV, Newport News, Va. (Ch. 33); Lewis O. Seibert, KGKL, San Angelo.

At NARTB business meeting, Edgar Kobak, WTWA, Thomson, Ga., tendered his proposal that toll radio be added to toll TV consideration (Vol. 11:21), but resolution was tabled. Dave Baylor, KCSJ-TV, Pueblo, Colo. (Ch. 5) sought to introduce resolution in favor of pay TV but submitted it after deadline, was informed it was out of order.

UHF Industry Committee, meeting in session separate from NARTB convention, first considered pro-pay stand, finally settled on this statement: "The Committee reaffirmed its position that subscription TV should be fully considered by the FCC in order to determine its capacity to provide additional program service for the public and revenues for all stations in a practical manner and consistent with the best interest of the public and broadcasters. The Committee does not endorse or oppose subscription TV."

Zenith continued its skillful promotional campaign, inviting broadcasters and press to demonstrations in hotel suite—and a veritable "Who's Who" of Washington correspondents showed up. Some, like N. Y. *Herald Tribune's* Roscoe Drummond, were quite impressed. He said pay TV should be permitted a test in the marketplace—"Why not let the consumer decide?" His paper took slightly different tack in editorial, stating: "Certainly the fact that TV has managed in a very brief time to become the prime American entertainment medium is a powerful argument against altering the current arrangement. Furthermore, the possibility that many programs which are now free might suddenly become subject to extra charges cannot be overlooked. Nevertheless, if a substantial number of viewers are interested in subscription TV, there seems no good reason why it cannot exist side by side with commercial TV."

Washington News, though its TV columnist's poll showed public 7-to-1 against and its movie columnist put pay TV in class with "such enlightened projects as the poll tax, infanticide, lynching bees and hillbilly music," plumped for a tryout, editorializing: "Soap operas and ancient cowboy movies needn't be put out of the TV business. Lots of people seem to like them. But others want to look at something else and are willing to pay for it. They ought to be granted the opportunity."

Zenith publicist Millard Faught says that a tryout is all Zenith wants, but "it shouldn't be so hedged with restrictions that it isn't fair." He said Zenith would like to introduce it to at least one large and one small city. He estimated Zenith has spent \$7-8,000,000 on project to date.

Stung by CBS's attack (Vol. 11:21), Zenith pres. E. F. McDonald shot back with assertion that people wouldn't pay a nickel for any CBS show on pay system; that networks shouldn't be permitted to go into subscription business. And he opened up on a front recently quiet—an attack on commercials—with declaration that pay-as-you-look TV would carry no advertising.

CBC has rejected toll TV for Canada, chairman A. D. Dunton telling House of Commons committee that study indicates that it's complicated, expensive and impractical—and that public reaction would be unfavorable.

Paramount Pictures' International Telemeter, while pushing for FCC approval of tollcasting, is still considering closed-circuit system which needs no Commission approval. Spokesman said Telemeter estimates it would cost about \$100 per home to wire up a town.

Network Accounts: Walt Disney's next big ABC-TV project is 90-min. preview of his Disneyland Park near Anaheim, Cal. July 17, Sun. 7:30-9 p.m., tour through fabulous combination "amusement park, world's Fair & museum." Sponsors are American Motors, thru Geyer Adv.; Swift & Co., thru J. Walter Thompson & McCann-Erickson; Gibson Greeting Cards, thru A. A. Christiansen Adv., Chicago . . . Procter & Gamble to sponsor Janis Paige's *The Four of Us* on CBS-TV starting Sept. 10, Sat. 9:30-10 p.m., thru Young & Rubicam . . . Kellogg Co. to sponsor *Wild Bill Hickok Show* on CBS-TV starting June 5, Sun. 11:30-noon, thru Leo Burnett Co. . . . Toni to sponsor *Dollar a Second* on NBC-TV starting July 5, Tue. 9:30-10 p.m., thru Weiss & Geller . . . Carter Products & Geritol to be alt. sponsors of Marie Wilson's *Miss Pepperdine* on CBS-TV starting in fall, Tue. 8:30-9 p.m., thru Sullivan, Stauffer, Colwell & Bayles and Edward Kletter & Assoc. . . . Sheaffer Pen & Maytag to be alt. sponsors of *Joe and Mabel* on CBS-TV starting in fall, Tue. 9-9:30 p.m., thru Russel M. Seeds & McCann-Erickson . . . Procter & Gamble and Borden Co. to sponsor *America's Greatest Bands* as summer replacement for *Jackie Gleason Show* on CBS-TV starting June 25, Sat. 8-9 p.m., thru Compton Adv. & Bryan Houston Inc. . . . Lenthéric & Emerson Drug to switch *Chance of a Lifetime* from DuMont to ABC-TV starting July 3, Sun. 9-9:30 p.m., thru Cunningham & Walsh and Lennen & Newell . . . Campbell Soup to cancel *Dear Phoebe* on CBS-TV, retaining Fri. 9:30-10 p.m. segment for undetermined new show . . . Colgate-Palmolive (Lustre net hair spray) buys 2 partic. a week for 13 weeks on CBS-TV's west coast *Panorama Pacific* starting June 15, Mon.-thru-Fri. 7-9 a.m., thru Lennen & Newell . . . NBC-TV switches Art Linkletter's *People Are Funny* to Sat. 9-9:30 p.m. in fall, replacing *Imogene Coca Show*, which will be moved to another period . . . CBS-TV may change format of *Morning Show*, Mon.-thru-Fri. 7-9 a.m., to emphasize news rather than entertainment; host Jack Paar this week asked to be relieved on show, saying his forte was entertainment.

CBS Radio & affiliates board this week proposed an equal rate for day and night every day in week. It would involve increasing weekend rates 5% to equalize them with weekdays and bringing down night rates to daytime level. Statement said "new proposal would merely serve to eliminate the complicated and cumbersome discount structure that prevails under the present system. It would in no regard lower the time cost to the advertiser . . . It would eliminate such factors as day-night conversions in station payments." Network also advanced proposal for reduction of payments to stations, to be offset by increased number of 70-sec. station breaks and increase in co-op programming which stations can sell locally.

Mutual's plan to hypo time sales, as proposed to affiliates meeting in Washington May 22, involves: (1) Additional 5-min. programs, on which stations need only carry commercials, which will be fed to affiliates each day via closed circuit, recorded and carried as run-of-schedule announcements. (2) Greater use of 6-sec. IDs, on which stations will be paid on double-up arrangement on basis of one-min. commercial program. (3) Chopping up 5-min. of commercial time on daytime partic. 30-min. programs into varied lengths to permit more flexible sales patterns. Affiliates will vote on proposals at future meeting.

NBC Radio to spend \$1,675,000 during June to promote its upcoming Monitor round-the-clock weekend service which debuts June 12 (Vol. 11:15). Promotion includes 248 announcements on NBC-TV, 336 on radio network, plus newspaper & magazine space.

Telecasting Notes: "Our program standards should not rely on mass ratings alone to judge their effectiveness. That concept must be extended by thinking more in terms of fundamental perception. We should, with equal force, represent the best standards of entertainment, the press, the educational institution, the church, the public forum and a multiplicity of other entities." So said John Fetzer in his farewell remarks on retiring as chairman of NARTB code review board this week. He said code now has 250 station members, plus the 4 networks, and its internal operations are "running smooth as silk" . . . TV code was likened to legal, medical or journalistic codes of ethics by Fetzer, in what was to us one of most significant speeches at convention. These older professions, he said, have learned that it's better to write their own ground rules than to wait until someone else writes them . . . "I raise a voice," said Fetzer—"querulous though it may sound, and perhaps itself tinged with guilt and misgivings—against the disturbing evidence that, to some in our industry, a dollar is a more important commodity than self-respect. It is not. A dollar in TV does not buy self-respect; on the contrary, self-respect attracts dollars." Telecasters who have adhered most faithfully to the code, he added, are those who generally have been commercially successful. "This must represent some sort of equation that should be of more than passing interest to all broadcasters: If you have a code, and you live up to it, you are more apt to be liked by more people" . . . CBS-TV's 90-min. Sat. night special programs (Vol. 11:20-21) have tentatively been titled *Jubilee*; network also plans special 90-min. color shows on Tue. & Thu., but probably not on regular basis . . . NBC takes jibe at CBS in trade ads featuring reproduction of *Variety* May 11 headline: "CBS-TV to 'Spec It Up,' Too" . . . Hailing CBS program plans, *New York Times* TV-radio critic Jack Gould wrote May 22: "The significance of the impending [NBC-CBS] battle from the viewer's standpoint is that the historic pattern of broadcasting is now all but junked. Well-ordered little hours and half-hours that come around each week with monotonous regularity may still be with us, but their days are numbered. TV has dipped its toes in the show business; now it is taking the big plunge" . . . Black-&-white spec-taculars are on NBC program for summer—called "summer specials," series of 4 shows will be in Sat. & Sun. night spots usually occupied by Max Liebman color shows. First will be *Remember—1938*, with Groucho Marx, Ethel Barrymore, Oscar Levant June 19. Others will be musi-

cal version of *Trilby*, with Carol Channing & Basil Rathbone, and musical *One Touch of Venus*, brought to New York after run at Dallas State Fair, and starring Russell Nype . . . Another TV hit becomes movie: Rod Serling's *Patterns*, first presented on NBC-TV's *Kraft Theatre* Jan. 12 and repeated Feb. 9 (Vol. 11:7) will be produced in New York as theatrical film starring Van Heflin and directed by Fielder Cooke, who directed original TV play . . . Sid Caesar and TV-movie writer Charles Peck form new company to film series of hour-long TV documentaries on O.S.S. activities during World War II . . . TV sells furs—\$2,000,000 worth of rabbit, raccoon and opossum—and has practically cleaned the market out of wolf tails and used furs, according to pres. Louis A. Cohen of American Fur Merchants Assn. The cause of it all—fur hats inspired by *Disneyland's* Davy Crockett.

Rate increases: July 1, WDSU-TV, New Orleans, raises base hour from \$700 to \$850, min. \$150 to \$180; WABT, Birmingham, has added new Class AA hour (7-9:30 p.m. daily) at \$750, min. at \$185, Class A hour remaining \$650; KTVT, Salt Lake City, has raised base hour from \$550 to \$600, min. \$100 to \$125, and added new Class AA min. only rate (7:29-9:30 p.m. daily) at \$150; KEDD, Wichita, Kan. has added new Class AA hour (7-9:30 p.m. daily) at \$425, min. at \$85, Class A hour remaining \$375; WKJG-TV, Fort Wayne, has new Class AA hour (7-10 p.m. daily) at \$400, min. at \$80, Class A hour remaining \$350; WSBT-TV, South Bend, base hour from \$300 to \$400, min. \$60 to \$80; KGNC-TV, Amarillo, hour from \$250 to \$300, min. \$50 to \$70; KGLO-TV, Mason City, Ia. hour \$200 to \$250, min. \$40 to \$50; KOAM-TV, Pittsburg, Kan. hour \$200 to \$250, min. \$40 to \$50; KGBT-TV, Harlingen, Tex. hour \$200 to \$250, min. \$40 to \$50; KOAT-TV, Albuquerque, hour \$160 to \$200, min. \$26 to \$35; June 15, WLEX-TV, Lexington, raises base hour from \$150 to \$165; also June 15, combination hour for Phoenix's KOOL-TV & Tucson's KOPO-TV goes from \$573.75 to \$637.50, min. \$55.25 to \$124.10.

NBC-TV previews its *Wide, Wide World* series on "Producers Showcase" June 27, Mon. 7:30-9 p.m., featuring 17 live pickups from U. S., Canada & Mexico. Canadian origination will be from Shakespearean Festival at Stratford, Ont., Mexican from Tijuana. A favorite project of NBC pres. Pat Weaver, series is expected to get regular network position on Sun. this fall; AT&T is still reported interested in sponsoring.

LOW-POWERED and low-priced TV transmitting equipment for boosters & satellites and small local stations got plenty of attention at NARTB convention this week, as manufacturers showed new transmitters and other gear—even a complete TV station with 2 studio cameras and film equipment for as little as \$50,000.

Equipment makers are betting on outcome of 2 pending FCC rule-making proceedings—involving on-channel boosters and low-power stations. Eventual approval of these proposals in some form is virtual certainty, and manufacturers were getting ready this week, hawking their wares and arousing plenty of interest.

How big will the low-power TV market be? Leonard Rooney, mgr. of new product sales for Sylvania (which operates 2 experimental satellites and one booster in Emporium, Pa., and plans to manufacture low-power equipment) gives these estimates: Nearly 1400 low-power stations may be built in next 5 years, representing \$32,500,000 in total equipment sales, with

transmitters accounting for about one-third of that figure. He breaks down potential into: (1) 375 satellites operating under present power-height rules, with no local originations. (2) 600 low-power stations, under proposed rules, "repeating" most programs as satellites but capable of inserting local commercials. These stations would cost \$35-\$40,000 each. (3) 400 boosters (amplifying transmitters) costing about \$15-\$20,000 each.

Out to get some of this business is a group of newer and smaller companies, and companies which previously haven't been identified with transmitter sales. One big name company planning to offer complete low-power TV station packages is Philco, which will include transmitters built by Adler Communications Labs, cameras by Kay-Lab.

* * * *

Banking heavily on low-cost low-power stations, Dage Television div. of Thompson Products Inc. showed its 200-watt transmitter, available in package as complete local station with 2 live vidicon cameras and film chain—including everything needed for year's operation, even down to make-up kit—for \$51,383. Package with film camera only is \$34,904, with one live camera \$45,865. Also featured by

Dage was remote-control vidicon camera chain, said to be only one of its kind.

Plunging heavily into telecasting equipment is telecaster-manufacturer Sarkes Tarzian, who announced availability by next fall of 200-watt vhf transmitters at \$7500-\$7900, 500-watt vhf at \$14,500, 100 & 250-watt uhf at \$8000-\$13,900. Novel plan of Sarkes Tarzian Inc. is a proposed combination TV & AM station which can be set up for \$50,000, including programming aid, etc. Idea is to simulcast local TV-radio programs, with one man controlling all equipment, making it possible to sell combination TV-AM time at about twice AM rate. For existing AM stations, it would cost about \$40,000 to add TV.

Other new Sarkes Tarzian equipment shown at NARTB convention included automatic 100-slide projector at \$1295—especially suited for local commercials in satellite operation—in which entire day's slides may be set up in advance, any slide selected by remote control. Also shown was vidicon film chain at \$3600, studio vidicon chain with 5-in. viewfinder at \$4500. Complete live-film-slide station, less transmitter, was priced at \$25,000.

Adler Communications Laboratories, which is operating experimental booster in Waterbury, Conn., and built satellite in Manson, Wash., showed 150-watt transmitters for \$13,865 in uhf, \$7500 in vhf. For complete 20-watt "translator" satellite, which picks up signals on one channel, converts them to another without demodulating, price is \$13,500, with all necessary equipment, including 100-ft. tower. Complete 150-watt uhf station would cost \$21,000 installed (not including originating equipment), with annual power bill of \$800-\$1000. ACL points out that big advantage of "translator" type satellite is original low cost combined with unattended operation.

Among other low-power transmitters featured at convention show were DuMont's vhf 50-watt transmitters priced at \$9500 and capable of being increased to 150 watts, and Gates' vhf 100-watt unit at \$5250.

* * * *

Studio equipment designed for low-cost community operation was featured by several manufacturers, including Kay Lab, which showed entirely new broadcast line, available on lease. Dual camera chain, with associated equipment, would cost \$20.70 a day, film chain with projectors and sync generator \$16.50. Under lease plan, \$5000 worth of equipment may be leased for \$229 a month on 24-month lease, and at end of period can be purchased for \$750 or lease renewed at \$20.83 a month. Kay Lab showed vidicon camera chain with 5-in. viewfinder, rear turret and zoom controls at \$6500, designed for studio or remote use. It also showed vidicon film chain at \$4766.

Unattended and one-man control was keynote of "station automation" displays. Vandivere Laboratories Inc. showed its Program Sequencer (Vol. 11:13). GE had tape-controlled system which automatically handles all station breaks, commercials and film & slide programming, making attended operation unnecessary. GE broadcast equipment gen. mgr. Paul Chamberlain predicted most stations would be using automation systems for film and slide programming within 3 years. For one-man operation, Teleprompter Corp. demonstrated system whereby announcer controls entire telecast. By manipulating small hand control while on camera, he runs Teleprompter at desired speed—and Teleprompter in turn cues recorded commercials, films and slides, which may be inserted at any prearranged points in the program.

Prodelin Inc. showed unusual plastic-enclosed uhf antenna designed for small stations. Designated "Cover-Loop," it's available in gains of from 2 to 8, beginning at about \$1200 for 2-gain. It requires no painting or deicing. Prodelin pres. L. A. Bondon estimated \$47,000,000 would be spent on low-power telecasting equipment.

TWO GRANTS were awarded this week by FCC, which felt that NARTB convention in Washington was fine thing because Commission stayed at home and got a lot of work done. Grants were a final decision favoring WREC over WMPS for Memphis' Ch. 3 and a CP on Ch. 12 to KMVI, Maui, Hawaii, which proposes to repeat programs of KONA-TV, Honolulu.

Commission gave nod to Hoyt Wooten's WREC because of better record of radio performance and ownership-management integration, saying WREC "is the more reliable applicant in its sense of responsibility in the fulfillment of the public trust."

In one unique action, Commission voted to reserve Ch. 13 in Monroe, La. for educational use—with Comrs. Hyde, Doerfer & Lee dissenting.

TV set maker H. L. Hoffman, operator of KOVR, Stockton, Cal. (Ch. 13), petitioned FCC to shift channel's assignment to San Francisco-Oakland and designate his station a San Francisco operation.

Appeal to Supreme Court, asking reversal of Court of Appeals decision voiding multiple ownership rules (Vol. 11:9), was sought by FCC this week as it asked high court for writ of certiorari. Acting on appeal of Storer Bcstg. Co., appeals court had ruled that Commission has no right to set numerical limit on number of stations anyone can own and that every application is entitled to a hearing. At same time, Commission turned down Storer's petition asking that his old Ch. 10 application for Miami be reinstated, citing rights of other Ch. 10 applicants and Storer's failure to complain when application was dismissed. Also turned down was petition of WWTW, Cadillac, Mich. (Ch. 13) that WJRT, Flint (Ch. 12) be stayed from building near Saginaw.

WITV, Ft. Lauderdale, asked Commission to amend its rules to provide that "no license shall be granted to a TV station that broadcasts the programs of more than one network if there is another TV station in the same area ready and willing to affiliate with and broadcast the programs of the second network."

KWTV-TV, Waco, Tex. (Ch. 10) dismissed its anti-trust protest against power increase granted KTBC-TV, Austin (Vol. 11:18) after obtaining ABC affiliation.

NBC's purchase of WKNB-TV, New Britain, Conn. (Ch. 30) and radio WKNB (Vol. 11:2,5) was set for oral argument June 20 before full Commission, with objectors WNHC-TV, New Haven (Ch. 8) and WTAR-TV, Waterbury, Conn. (Ch. 53) participating. Issues in hearing will be whether overlap between NBC's New York stations and the New Britain outlets violates duopoly rules and whether NBC's purchase would substantially restrain TV competition in New Britain area. NBC's proposed move of the channel from New Britain to Mt. Higby was not made issue of hearing. Comrs. Webster & Bartley dissented and voted for full evidentiary hearing; Comr. Hennock, in written dissent, urged fullscale hearing to show "horrendous impact on our society" of NBC's proposed purchase of WKNB-TV and Philadelphia's WPTZ, both in area contiguous to New York.

Proposed Armed Forces TV station on Guam (Vol. 11:16) drew objection this week from pres. Harry Engel of radio KUAM, Agana, Guam, who claimed in letter to FCC that low-power Ch. 8 outlet there would constitute "unfair competition." He asked Commission to "deny the request of the Armed Forces Radio Service" for use of Ch. 8 on Guam. Actually, FCC has no jurisdiction over military use of frequencies but acts in advisory capacity.

FIVE-MEGAWATT power ceiling for uhf will soon be proposed by FCC, and Commission will request "information concerning the possibility of improving the sensitivity of uhf receivers," Chairman McConnaughey revealed in May 24 address to NARTB. Leading transmitter makers tell us they can make 3-5 megawatt installations available at \$300-\$400,000 in 2 years or less, if there's any market for them.

Though uhf problems weren't on NARTB agenda, the Washington convention served as a backdrop not only for McConnaughey's proposals but for these other developments aimed at "equality of opportunity" among all TV channels:

(1) FCC Comr. Lee urged complete reallocation of radio spectrum as "long-range permanent solution" to uhf and other allocations problems. He presented a sample allocation plan, which would include 47 contiguous TV channels, beginning at 60 mc (Ch. 3) and running to 342 mc. His sample was submitted "solely to stimulate interest," he said, adding that final solution may require 3-15 years.

(2) Group of 45 uhf operators, meeting under aegis of UHF Industry Coordinating Committee, headed by Harold Thoms (WISE-TV, Asheville, N. C.) and Fred Weber (WFPG-TV, Atlantic City, now off air), worked up new proposal, undisclosed but presumed to relate to allocations, to present to FCC, and started concerted drive for moratorium on equipment and film payments and for greater availability of network programs.

(3) Chairman Magnuson (D-Wash.) of Senate Commerce Committee announced that his committee's TV hearings—centered around plight of uhf—won't begin until after Congress recesses this summer, but there was speculation that it might be fall or even winter before sessions get under way.

(4) ABC pres. Robert E. Kintner called for "quick action" on deintermixture, on market-by-market basis.

* * * *

McConnaughey's announcement of an FCC drive to improve uhf sets came as a surprise. Apparently this was a very recent proposal at the Commission, and ideas on how it is to be carried out aren't yet very well formed. Its purpose, apparently, is to use "moral suasion" to induce manufacturers to develop better receivers.

The 5-megawatt ERP proposal is due to come out in form of rule-making soon. We checked 2 top transmitter makers, neither of whom saw any insurmountable technical obstacles—high-power tubes already being under development, presumably for military requirements. RCA has triode in the works which could deliver 60-100 kw transmitter power, 3-megawatt or greater ERP with high-gain antenna. It would require expenditure of another

\$300,000 to complete the development, and this would have to be justified by demand. RCA spokesman said company hasn't decided whether to go ahead with it, though interest has been expressed by NBC, Storer and Wilkes-Barre's WBRE-TV. It probably could be ready in 1½-2 years.

GE says it can supply 5-megawatt unit "about one year after FCC approval" if there's any demand for it—"but there's no stampede even to 1-megawatt now." GE would get this power by using four 30-kw klystrons in transmitter, with 50-gain antenna, would require orders from about 5 stations to justify development. A company spokesman pointed out that GE's 1-megawatt installation in Wilkes-Barre could be boosted to about 2-megawatts by using 50-gain antenna.

* * * *

Magnuson told May 26 convention luncheon that his committee's forthcoming hearings won't be "looking for the villain in the piece," but will look into state of competition in TV industry, availability of programs, affiliation practices of networks. "We will hold hearings," he said, "when we are ready to hold constructive hearings and only then." He said he had written to Chairman Byrd (D-Va.) of Senate Finance Committee urging exemption of all-channel sets from Federal excise tax.

Commission appeared at brief public hearing this week before Sen. Magnuson in his capacity as chairman of independent offices appropriations subcommittee, to justify House-approved appropriation of \$6,870,000 for fiscal 1956, including an extra \$90,000 for processing backlog and \$80,000 for an FCC network investigation (Vol. 11:14). At a preliminary closed meeting with Sens. Magnuson and Dirksen (R-Ill.), McConnaughey apparently dropped his proposal for a much larger-scale investigation of entire TV-radio industry (Vol. 11:16) in return for Magnuson's support of the \$80,000 appropriation for more limited study of networks.

* * * *

Kintner, whose ABC network has most to gain from any deintermixture plan, told NARTB members that only 42 of the nation's 233 TV markets have 3 or more stations. "Under present allocations," he said, 165 markets will continue to be monopoly and duopoly in the vhf channels for the foreseeable future." He recommended area-by-area deintermixture as "a practical and immediate solution to permit a greater variety of national programming and a greater choice to which the public is entitled," referring to Boston, New Orleans, Miami, Pittsburgh and St. Louis as major markets where deintermixture can be accomplished. He also asked speedy FCC action on drop-ins—allocation of new vhf channels which will fit in the suburbs of major markets. As a third "partial solution" he urged careful consideration of switching educational vhf allocations to commercial operation in certain markets, substituting uhf channels for the educators.

Noting success with remote control of non-directional AM stations—630,970 hours of operation with lost-air figure of only .04%—NARTB engineering mgr. A. Prose Walker told conference this week that petition for remote control of directional and high-power stations would be filed with FCC in Aug. or Sept. He said that 19 lower-powered directional stations have operated experimentally with no problems and that experiments would be undertaken with at least one 50-kw station. "Modern transmitters and directional arrays," he said, "have reached such a high degree of stability as to warrant a change in the rules now requiring that first-class operators remain on duty." Walker declared that "there is a critical shortage of skilled engineers in this country today, and it ill behooves us not to devote our attention to more efficient methods of operation." Almost 700 radio stations have obtained FCC permission to operate by remote control.

Renewed interest in FM has been sparked by FCC's new multiplex rules, with quite a few stations visualizing new methods of getting on more profitable basis. This was evident at NARTB FM sessions and multiplex equipment exhibits and demonstrations. Multiplex Development Corp. pres. Wm. S. Halstead told engineering session cost will be so reasonable the broadcaster can realize his investment in less than year, that equipment will be available on 60-90 day basis, that "multiplexing will open up a whole new industry." Some panel speakers disagreed, urging operators to "keep FM in the broadcasting business."

Automatic programming of radio stations 15 hours daily, via tape, will be possible in near future, according to Ampex research engineer Philip Smaller, who told NARTB engineering conference that tapes handling 9 hours are now commercially available.

FIRST TV stations went on air this week in 2 small communities, and a uhf station resumed operation after being off air 7 months. KOTA-TV, Rapid City, S. D. (Ch. 3) opened up an entirely new TV area, KLFY-TV (Ch. 10) brought first local service to Lafayette, La., and WTOV-TV (Ch. 27) started up again in Norfolk area—bringing total on air to 433, of which 108 are uhf.

Rapid City, 220 mi. from nearest station, will get its first programs late in June, following month of test patterns. It has 500-watt RCA transmitter, 3-bay antenna on 300-ft. Fisher tower formerly used for FM. Owner is local clothier Helen S. Duhamel, who recently bought local radio KOTA. Gen. mgr. is Leo Borin; Wm. F. Turner, business mgr.; N. Heffron, program director; Bob Musfeldt, chief engineer. Base rate is \$150. Rep is Headley-Reed.

KLFY-TV started test patterns this week in Lafayette, 52 mi. from nearest outlets in Baton Rouge. CBS-affiliated, it has 5-kw DuMont transmitter, 12-bay RCA antenna on 483-ft. Trilsch tower. Earlier this year, DeClouet family which owns KLFY bought out *Lafayette Advertiser's* KVOL-TV, with which it shared CP (Vol. 11:4). Wm. Patton is gen. mgr.; John H. Selleck, program director; Maurice Wynne, chief engineer. Base rate is \$200. Reps are Venard, Rintoul & McConnell, and Clarke Brown for south.

WTOV-TV resumed operation May 25 under new owner Temus Bright, having been dark since last Oct. (Vol. 10:40). It's second uhf in area to return to air, New-

port News' WACH-TV (Ch. 33) having resumed with simulcasts in Aug. 1953 (Vol. 10:31). WTOV-TV is operating with syndicated film and live news, weather and sportscasts. Temporary studios are at Portsmouth transmitter site. Bright recently acquired WTOV-TV for \$95,000, including \$63,000 in RCA equipment notes (Vol. 11:6, 11). A. V. Bamford, ex-Oakland radio operator, is gen. mgr.; Ray Spearenberg, program director; Lee Marshall, production mgr.; Henry G. Root, chief engineer. Base hour rate is \$350.

* * * *

Another 1-megawatt station—probably this summer—will be Peoria's WTVH-TV (Ch. 19), which bought first of RCA's new 25-kw uhf transmitters, displayed at NARTB convention (Vol. 11:21). Used with supergain antenna, transmitter will deliver full 1,000,000 watts ERP. New transmitter is priced at \$186,000, compared to \$122,500 for RCA's 12½-kw uhf plant. RCA has also priced new 25-kw amplifier addition to 1-kw transmitter at \$163,500, and equipment to convert 12½-kw transmitter to 25-kw at \$70,000, less credit for returned parts. Supergain antenna to achieve megawatt power is priced at \$49,000.

Increase to 1-megawatt by KPTV, Portland (Ch. 27), scheduled for June 11 (Vol. 11:21) was postponed this week when huge supergain antenna was accidentally dropped by crane during final stages of construction at RCA's Camden plant. KPTV now says earliest shipment date will be June 10, with boost to 1,000,000 slated tentatively for July 1. Only equipment shipment reported this week was 2-kw RCA standby transmitter, sent May 25 to KWK-TV, St. Louis (Ch. 4).

Color Trends & Briefs: Color still awaits the mass-priced receiver. Though excellent choice of good live & film originating equipment dominated exhibits at NARTB convention this week, and though telecasters with well-saturated black-&-white markets look to color to strengthen their rate cards, no great rush to buy equipment developed. Instead, the heretofore modest flow of purchases is likely to continue.

There's no question that bigger telecasters would commit themselves heavily in color equipment if they felt confident that by so doing they would stimulate rapid growth in color set distribution. Price of today's sets, they say, offers little prospect of that.

Greatest activity continues in film chains—film being cheapest and easiest way for stations to originate color. RCA and DuMont have had market mostly to themselves up to now, with Philco playing a smaller role. GE has finished its developmental work, is making determined effort to catch up. In addition, many smaller companies have found RCA's 3-vidicon approach within their capabilities and are chipping away at major manufacturers' dominant position. Dage, GPL & Telechrome showed vidicon color cameras, some proposing them also for limited live use. Tel-Instrument offered associated equipment, such as color bar and sync generators, while Raytheon and Motorola presented color-handling microwave equipment.

RCA had most extensive exhibit, demonstrating live, film & slide equipment, feeding signals to numerous home-type receivers. GE showed its live "Chromacoder" camera but put most emphasis on continuous-film CR scanner.

DuMont's new "Vitascan" equipment for presenting live shows with CR scanner (Vol. 11:21) drew much comment—of all kinds. Some operators are ready to sign contracts, visualizing equipment as relatively inexpensive way of producing certain kinds of live shows. Others dismissed it as "a scientific curiosity" due to fade away.

Though telecasters haven't rushed to buy extensively,

they're deeply interested nonetheless. For example, several of the larger ones, like Storer, brought along reels of color film, had competing manufacturers run it through chains. Each equipment maker claimed distinct points of preference in the results.

Basic appeal of color, whether to telecasters or to public, can't be denied. For example, during awkward lull while stopwatches were ticking toward on-camera time before his convention speech, President Eisenhower leaned over to RCA's Gen. Sarnoff and said that it was too bad telecast wasn't in color. Note: White House has a color set.

* * * *

Color is key to success of TV in secondary markets, Harold Hough, WBAP-TV, Fort Worth, told NARTB session May 26. Secondary market TV, he said, must depend on local advertising for sizable share of its revenue—and color is the answer. "Forget about the outlay of color TV," he said, "it can be installed cheaper than you think. It can be operated as simply as the black-&-white—but the impact, once it is under way, and that will not be as long as you expect, will be the salvation for TV in those markets . . . We know that color TV will revolutionize all advertising—and I do mean all."

Upcoming network color schedules: NBC-TV—May 30, *Producers' Showcase*, "The Petrified Forest," Humphrey Bogart, Henry Fonda, Lauren Bacall, 8-9:30 p.m.; June 4, *Max Liebman Presents*, "The Chocolate Soldier," Rise Stevens, Akim Tamiroff, Eddie Albert; June 7, President Eisenhower addresses West Point commencement exercises, 10-10:30 a.m.; June 8, *Home* segments, 11:02-11:04 & 11:50-11:57 a.m. CBS-TV—June 9, *Shower of Stars*, Edgar Bergen, Dan Dailey, Betty Grable, Harry James, Tony Martin, Ethel Merman, Red Skelton, Marilyn Maxwell, Jack Oakie, 8:30-9:30 p.m.

RCA shipped 3-V color film cameras May 20 to KMJ-TV, Fresno and to upcoming WXEX-TV, Petersburg-Richmond (Ch. 8), due this summer.

BIG APPLIANCE DEAL COOKING; LABOR PEACEFUL: A Justice Dept. opinion as to whether it violates the anti-trust laws is awaited as the major element in one of biggest appliance consolidations in years, involving RCA, Sears, Whirlpool, Seeger Refrigerator Co. and possibly others. All sorts of rumors have been rampant, making it difficult to separate fact from fancy, and principals are understandably reluctant to discuss it, but this is expected to materialize if Justice says it's legal:

Whirlpool Corp., St. Joseph, Mich., largest manufacturer of automatic washing machines, would merge with Seeger and perhaps others, into a single corporation, of which RCA would own about 20% and would contribute production of its RCA Estate Appliance Corp. (gas & electric ranges) into a common appliance pool. Sears owns about 28% of Whirlpool, which supplies it with Kenmore washer, and about 30% of Seeger, which furnishes it with Coldspot refrigerator, and Sears would continue as a stockholder in new entity. RCA's washer line probably would be RCA-Whirlpool.

Battle for distributors, already pitched in TV-radio industry as evidenced in executive changes last week (Vol. 11:21), would be intensified under such consolidation. RCA distributors presumably would handle the RCA-Whirlpool line, though it was considered possible that in some cases, existing Whirlpool distributors would get the RCA franchises. RCA officials declined comment.

Ephraim Jacobs, chief of Justice's anti-trust legislation & clearance branch, who must give unofficial opinion on legality of proposed deal, refused to discuss case, in accordance with Govt. policy. "We and the companies which make use of our clearance service regard the procedure as completely confidential," he said. "They come to us in the knowledge that this relationship will be so respected."

Elisha Gray II, pres. of Whirlpool, commented: "We have been conducting discussions with many companies, exploring possible avenues of expansion. I would not bet a nickel on the outcome of any of those discussions; that's how indefinite and inconclusive they are at this time."

* * * *

Brief highlights of other major trade developments this week:

LABOR: RCA and 7 IUE locals signed contract for 4-7¢ hourly wage increase, plus improved pension & fringe benefits, covering 14,000 workers in Camden & Moorestown, N.J., Cincinnati & Los Angeles. Union gave up earlier demand for guaranteed annual wage, apparently indicating that issue won't be pressed in electronics industry this year. Several hundred workers in GE's TV-radio dept. walked off jobs for 2 days this week in protest against suspension of 6 union stewards, but company officials said production wasn't seriously affected.

NEW MODELS: Midyear TV lines start appearing next week when Admiral holds annual distributors' convention, to be followed by other manufacturers in June and July (for list & dates of meetings announced thus far, see p. 13). Full new lines, rather than fill-ins, will be the rule, with several manufacturers promising radical changes in engineering & styling. Major trends are expected to be greater use of vertical chassis sets, more printed circuits, prices at approximately current level. There was also some unconfirmed speculation in trade that RCA and Philco would make sharp price cuts on 24-in. models in effort to capitalize on replacement market.

FAIR TRADE: New plea to Congress to strengthen fair trade laws was made by American Fair Trade Council, which urged crackdown on manufacturers & distributors who knowingly sell fair-traded merchandise to discount houses. Its statement was in support of bill (S-2055) by Sen. Capehart (R-Ind.) to permit any person or firm to sue for injunction and treble damages against manufacturer or distributor who ships fair-traded items to retail price-cutters. Meanwhile, Rep. Celler (D-N.Y.), chairman of House Judiciary Committee, told Maurice Mermey, director of Bureau of Education on Fair Trade, that national fair trade laws wouldn't be repealed in 1955.

PRODUCTION: TV output totaled 120,144 units week ended May 20, compared to 110,651 preceding week and 127,067 week ended May 6. It was 20th week of year by RETMA calculations and brought production for year to date to about 3,050,000, compared to approximately 2,350,000 in corresponding period of 1954.

Radio production totaled 280,445 (137,073 auto) week ended May 20, compared to 287,352 week ended May 13 and 286,284 week before. For 20 weeks, production was estimated at 5,720,000 vs. 4,000,000 in corresponding 1954 period.

Topics & Trends of TV Trade: Annual distributor conventions for introduction of fall TV lines (see p. 12) get under way next week, starting with Admiral's meeting June 2-3 at Chicago's Conrad Hilton & Blackstone Hotels, confabs continue through July. Other manufacturers who have announced dates thus far:

RCA, meeting with field reps, June 6-8 at Barbizon Plaza Hotel, N. Y.; Zenith, June 9 at Conrad Hilton, Chicago; Philco, June 26 at Fontainebleau Hotel, Miami Beach; GE, July 19 at National Assn. of Music Merchants convention in Chicago's Conrad Hilton Hotel; Motorola, July 21 at Conrad Hilton. DuMont will introduce new line at 5 regional meetings: June 14 at Hotel Statler, N. Y.; June 17 at Chicago's Edgewater Beach Hotel; June 20 at Statler, Los Angeles; June 23 at Broadmoor Hotel, Colorado Springs; June 27 at Dinkler Plaza, Atlanta.

Most lines which have been introduced by then will be shown to dealers week of June 20 at American Furniture Mart and Merchandise Mart in Chicago's summer markets. Total of 15 manufacturers will exhibit, with following lineup:

Furniture Mart—Admiral, Bendix Radio, Hallcrafters, Philco, RCA, Sparton, Zenith. Merchandise Mart—Capehart-Farnsworth, CBS-Columbia, Crosley, GE, Magnavox, Motorola, Raytheon, Westinghouse.

* * * *

Annual plant shutdowns for vacations, traditional in industry to fulfill union contracts and give manufacturers chance to check inventory in preparation for fall lines, include these companies, as reported to RETMA by members:

Set manufacturers: Avco, June 27-July 10; Bendix Radio, June 27-July 10; Capehart-Farnsworth, July 18-31; CBS-Columbia, July 4-17; DeWald Radio, July 25-Aug. 7; Emerson, Aug. 1-14; GE, July 4-17; Hallcrafters, July 4-17; Hoffman, July 18-31; Magnavox, July 4-17; Motorola, June 27-July 10; Olympic Radio, July 1-17; Packard-Bell, June 30-July 17; Philco, July 18-31; Pilot Radio, July 4-17; RCA, July 18-31; Raytheon, July 1-17; Sentinel, July 4-17; Stromberg-Carlson, July 4-17; Sylvania, July 18-31; Trav-Ler, July 4-17; Wells-Gardner, July 4-18; Westinghouse, dates undetermined; Zenith, July 4-17. Admiral, not an RETMA member, usually closes down first 2 weeks of July.

Tubes: CBS-Hytron, July 4-17; DuMont, July 4-17; Eitel-McCullough, Aug. 1-14; Federal, July 4-17; Machlett Labs, Aug. 1-14; Sylvania, July 4-17; Thomas Electronics, July 4-17; Tung-Sol, July 18-31; Westinghouse, July 4-17.

Components and others: Alliance Mfg. Co., July 4-17; American Condenser, July 4-17; American Phenolic, July 4-17; David Bogen Co., July 4-10; Clarostat, July 11-17; Erie Resistor, July 4-17; Hazeltine, July 25-Aug. 7; International Resistance, July 25-Aug. 7; Quam-Nichols, July 4-17; Radio Condenser Co., July 18-31; Weston Electrical, July 18-31. Among those not shutting down are P. R. Mallory, Muter Co., Oak Mfg. Co., Sprague Electric.

* * * *

Another aircraft company acquires electronics business: Bellanca Aircraft Corp., New Castle, Del., purchases National Electronics Laboratories Inc., Washington, D. C. manufacturer of aviation electronics and radar equipment in exchange for 16,000 shares of Bellanca common stock.

DISTRIBUTOR NOTES: Admiral appoints Pittsburgh Products Tri-State Co. Inc., 500 Fontella St., Pittsburgh (Richard W. Evans, v.p.-gen. mgr.), replacing own factory branch established several months ago. Admiral gen. sales mgr. H. D. Conklin said move "is in accordance with Admiral's policy of appointing independent distributors wherever possible" . . . Sentinel Radio appoints Main-Line Distributors Inc., Chicago, replacing own factory branch . . . Sampson Co., Chicago, relinquishes Capehart-Farnsworth line . . . Admiral appoints Carl Lantz as gen. mgr. of Chicago factory branch, succeeding Wm. F. Hand, promoted to regional sales mgr.; Charles M. Svoboda, from Los Angeles branch, succeeds Lantz as gen. mgr. of San Diego div. . . Zerega Distributing Co., Seattle (Motorola) appoints Charles W. Schuchart Jr., ex-Westinghouse Electric Supply Co., as sales mgr. . . Fridley Bros. Inc., Kansas City (CBS-Columbia) appoints Ted Gilmore gen. mgr., replacing Wm. Burns, resigned . . . Hoffman Sales Corp. of St. Louis appoints Joseph McFarland, ex-Graybar, as sales mgr. . . Federal Distributing Co., Des Moines (Sylvania) appoints John O'Neil sales mgr. for Des Moines territory, Guy Leatherby for Davenport, both succeeding the late Peter Prescott.

* * * *

Zenith attorney Thomas C. McConnell admitted error this week in charging that RCA counsel John T. Cahill, in contesting Zenith's anti-trust suit against RCA, quoted portions of recently-released report of Attorney General's Committee to Study the Anti-Trust Laws (of which Cahill is member) nearly a year before its publication. Mr. McConnell wrote Rep. Celler (D-N. Y.) that he erred last week in his widely publicized testimony before Celler's Judiciary subcommittee, and conceded that Cahill had actually quoted from report of special committee of American Bar Assn., as Cahill claimed. Celler inserted McConnell's letter in his subcommittee's hearing record, along with comment that McConnell "misled this committee" and "deserves condemnation and criticism." Cahill said "this kind of irresponsible conduct is typical of Mr. McConnell's tactics."

Color converter employing motor and disc, developed by Airtronic Research Inc., Bethesda, Md. (Vol. 10:6), will be made by Color Converter Inc., Columbia City, Ind., licensed by Airtronics. The \$149.95 device includes 2 units—electronic section attached to back of set and motor-disc assembly placed in front of picture tube. Latter weighs 15 lbs., has diameter about 30-in., produces 14-in. color picture, can be removed when not in use. Company, owned by James D. Adams & M. V. Lowe, says it has production capacity of 800 units daily. When demonstrated last year, device suffered from serious flicker and low brightness, but developers claim improvement has been made. They say 1000 converters have been made.

Canadian RTMA's annual meeting June 2-3 at Sheraton Brock Hotel, Niagara Falls, Ont. will be highlighted by panel on color developments. Participants are RETMA chairman Max Balcom; J. Alphonse Ouimet, CBC gen. mgr.; F. W. Radcliffe, commercial v.p. of RCA Victor Co. Ltd.; Ralph A. Hackbusch, pres. of Hackbusch Electronics Ltd. Panel chairman is Ivor M. Leslie, v.p.-gen. mgr. of Crosley div., Avco of Canada Ltd.

Trade Personals: Fritz P. Rice, DuMont director of manufacturing & purchasing, promoted to new post of operations director, consumer products, supervising production & sales of receivers & picture tubes . . . Reese B. Lloyd, Philco director of industrial & personnel relations, promoted to operations v.p. of TV div., succeeding Wm. J. Peltz, now v.p.-gen. mgr. of new Lansdale Tube & Transistor Co. div.; Wm. H. Mattison, TV production mgr., promoted to production v.p. . . . Lester Krugman, ex-Bulova, onetime exec. on Emerson Radio account at Grey Adv., joins Emerson in new post of marketing v.p., supervising adv., sales promotion, public relations & marketing research; Michael Kory, Emerson sales director, elected a v.p. . . . John J. Hemberger named administrator, black-&-white picture tube sales, RCA tube div. . . . Warren H. Rymer appointed Hoffman Electronics east central district mgr., Kansas City, succeeding Byron Brown, who joins Hoffman Labs, Los Angeles . . . Gramer Yarbrough promoted to sales mgr., American Microphone Co., Pasadena, Cal. . . . Melvin L. Hayden, ex-Westinghouse Electric Supply Co., Boston, named adv.-sales promotion mgr., National Co., Malden, Mass. (communications equipment) . . . Thomas B. Moseley, ex-DuMont, named director of sales & contract negotiations, Continental Electronics, Dallas.

National Assn. of Electrical Distributors, at 47th annual convention this week at Chicago's Conrad Hilton Hotel, elected following officers: pres., Lester E. Barrett, Barrett Electrical Supply Co., St. Louis; v.p.'s, Ralph J. Brown, GE Supply Co., Bridgeport, Conn.; J. P. Hamblen, Southern Electric Supply Co., Houston; George Albiez, Englewood Electric Supply Co., Chicago; Irving P. Bean, Bean Electric Co., Seattle.

Albert C. Embrechts promoted from v.p.-gen. mgr. to pres. of IT&T's International Standard Trading Corp., which develops and coordinates automation practices and equipment within IT&T system; technical director Eric M. S. McWhirter & sales mgr. John T. Benjamin, were elected v.p.'s.

Sir Robert A. Watson-Watt, the Briton credited as discover and developer of radar, has been named chairman & pres. of Logistics Research Inc., Redondo Beach, Cal., designers and manufacturers of electronic computers.

Bell Telephone Labs names military communications systems director Estill I. Green to post of v.p. in charge of systems engineering, promotes research v.p. Dr. James B. Fisk to exec. v.p.

Dr. Bernard Kopelman from Sylvania's metallurgy research laboratory, named chief engineer of company's atomic energy div.

Extensive study of corporate mergers between 1948 & 1954 has been released by Federal Trade Commission in 233-p. report which notes that mergers & acquisitions are currently nearing postwar peak rate of 1946-47 but are well below pre-depression rate of late 1920s. Report makes no recommendations for solutions. Only allusion to TV-radio-appliance trade is brief reference to Aveco's addition of household appliances & farm equipment lines.

Color in Britain within 3 years is expected by B. V. Soames-Charlton, of Pye Ltd. research labs. He said system will be simpler than that of U. S. but will give adequate color, and sets will sell for about \$420. He doubted that BBC will tackle color in less than 5 years but expected new ITA to inaugurate it in 3.

International Resistance Co. has purchased EMEC Inc., Seattle, manufacturer of magnetic clutches for electronic applications.

New ad agency appointed by General Precision Labs: Geer, DuBois & Co., 40 E. 49th St., N. Y.

Huge new electronics manufacturer—Sperry Rand Corp.—will be formed July 1 as result of overwhelming approval of Remington Rand-Sperry Corp. merger by both companies' stockholders at meetings this week (Vol. 11:12). Remington Rand chairman Gen. Douglas MacArthur and pres. James H. Rand will be chairman and vice chairman of new firm, which will have assets of about \$484,000,000 and estimated annual sales totaling nearly \$900,000,000—just about 10% smaller than RCA in size & sales. Sperry pres. Harry Vickers becomes pres. & chief executive officer, Sperry senior v.p. John Sanderson v.p.-secy., Remington exec. v.p. Bernard O. Reuther v.p.-treas. Under terms of consolidation, each share of Sperry stock will be converted into 3¼ shares of Sperry Rand, each share of Remington Rand to be exchanged for 2 new shares. Both Sperry and Remington Rand will retain their old corporate names for advertising and trade purposes. In first quarter statement just released, Sperry reported net profit of \$6,683,359 (\$1.46 a share) on sales of \$103,683,000, compared with \$5,579,314 (\$1.33) and \$120,414,000 for first quarter 1954.

FCC's patent-filing proposal, which would have required licensees to file vast amount of patent information with Commission (Vol. 10:50, 11:2-4), has been sharply revised as result of strenuous industry opposition, and in new form removes most of the objections. New proposal would require no reports by those who control less than 10 communications patents, and reduce information required by eliminating reports of patents not directly connected with transmission or reception as well as reports on licensees' use of patents. Comments on new proposal are due June 30.

Lack of national TV distributors organization has impelled NARDA to set up a "distributor-booster" category in its group, to be composed of TV-radio distributors "who feel NARDA's work in building better dealers deserves their support." It's regarded as first step in bringing distributors into full membership in dealers' organization. Participation by distributors at outset will involve annual contribution of \$50, entitling them to most NARDA services and invitations to annual convention.

Picture tube sales in first 3 months totaled 2,608,753, valued at \$52,027,429, compared to 1,962,864 worth \$41,995,088 in first quarter of 1954, reports RETMA. March sales were 882,268 worth \$17,246,843, compared to 859,529 in Feb. and 759,468 at \$15,904,687 in March 1954. Receiving tube sales in first 3 months were 117,557,439, valued at \$84,906,835, compared to 76,385,978 worth \$56,862,951 in first 1954 quarter. March sales were 41,080,881 worth \$29,922,192 vs. 38,526,796 at \$28,107,186 in Feb. and 29,063,484 at \$22,130,627 in March 1954.

NARDA has taken policy stand against centralized servicing "as a device which diminishes the worth of the retailer to the total merchandising picture; which causes separation between his customer and the retailer, and which fails to allow ample recognition to the established type of merchant."

Rep. Williams D-Miss.) last week introduced legislation (HR-5947) to ban sales by manufacturers to discount houses; it was referred to House Interstate & Foreign Commerce Committee, where it stands little chance of favorable action.

RETMA publishes 3rd edition of its popular 16-p. booklet, *Things You Should Know About the Purchase and Servicing of Television Sets*, available free from RETMA or local Better Business Bureaus.

Motorola & Admiral will move from American Furniture Mart to 11th floor of Merchandise Mart, Chicago, though latter's space won't be occupied until June 1956.

Financial & Trade Notes: "Earnings reports of most leading TV manufacturers for the first quarter of 1955 showed good year-to-year gains, and similar favorable comparisons are indicated for the June quarter," reports Standard & Poor's May 25 survey of electrical products industry. "However, results in the final half of 1955, particularly in the last 3 months, are not expected to exceed those of a year earlier. Thus, normal seasonal improvement (starting in the fall of the year) will be considerably less pronounced this year than in 1954 . . .

"Earnings of TV producers this year will generally show a modest improvement over the 1954 level, due to a more even production flow and good early-year improvement . . . Dividends may be increased by some TV and appliance manufacturers. Payments by most others should be in line with the 1954 experience."

* * * *

United Business Service devotes its May 23 investment report in large part to "Television Brought Up to Date," adds CBS "A" to its "supervised list," recommends it along with Motorola & RCA for new purchases, suggests to its subscribers they maintain holdings of Philco. It lists this handy table of leading TV stocks:

	Earnings Est. 1955	Share Ac-tual 1954	Recent Price	Dividends Past 12 Mos.	Yield %	Price Earnings Ratio
Admiral Corp.	\$2.75	\$2.78	26	\$1.00	3.8	9.5
Am. Broadcasting-Para.	2.00	1.06	31	1.00	3.2	15.5
Avco Mfg.	10.35	10.37	7	10.40	5.7	20.0
CBS "A"	2.30	1.56	28	10.80	2.9	12.2
DuMont Laboratories "A"	Nil	0.32	\$16	Nil	Nil	
Emerson Radio	c1.10	c0.97	14	0.60	4.3	12.7
Hoffman Electronics	2.50	2.08	28	1.00	3.6	11.2
Magnavox Co.	b3.00	b2.77	36	1.50+	4.2	12.0
Motorola, Inc.	4.50	3.91	52	1.50	2.9	11.5

National Telefilm Assoc., film syndication firm headed by Ely Landau and 65% owners of GE-supported National Affiliated Television Stations Inc., which has been set up to help stations achieve profitable operations (Vol. 11:14), offers 312,500 common shares at \$5, thru underwriter Charles Plohn & Co., in prospectus dated May 19. After offering, firm will have 650,000 common shares outstanding. Net proceeds of issue, estimated at \$1,260,000, will be used to pay off loan of \$334,153, with balance to be used for working capital. Prospectus says money will be available for "acquisition of distribution rights, retirement of film acquisition loans and repurchase of the lenders' participations in the gross proceeds of related films, or other corporate purposes, including the possible financing of film production." For 8 months ended March 31, company had net loss of \$156,658, prospectus reveals. For fiscal year ended last July 31, net loss was \$139,830.

Dividends: Philco, 40¢ payable June 13 to stockholders of record June 6; Sylvania, 50¢ July 1 to holders June 10; Stromberg-Carlson, 40¢ June 30 to holders June 15; Wells-Gardner, 15¢ June 15 to holders June 3; Radio Condenser Co., 5¢ June 20 to holders June 1; Hazeltine, 35¢ June 15 to holders June 1; GE, 40¢ July 25 to holders June 17; Sprague Electric, 30¢ June 14 to holders May 31; General Precision Equipment, 60¢ June 15 to holders June 6; National Co., 10¢ June 30 to holders June 25, 10¢ Dec. 30 to holders Dec. 25, plus 2% stock Sept. 30 to holders Sept. 25; Famous Players (Canada), 37½¢ June 29 to holders June 3; Electronic Assoc., 100¢ stock July 1 to holders June 20.

Decca Records Inc. reports first quarter net income of \$816,339 (50¢ a share) compared to \$635,238 (42¢) for first quarter 1954.

Among officers' & directors' stock transactions reported by SEC for March: Gordon T. Ritter sold 100 Avco, holds 624; Irving B. Babcock sold 1500 Avco, holds 4897; Edward K. Foster bought 200 Bendix Aviation, holds 400; J. L. Van Volkenburg bought 1000 CBS "A" by joint tenancy, holds 102 personally and 1000 by joint tenancy; Seymour Mintz bought 300 CBS "A," holds 300; Adrian Murphy bought 1989 CBS "A," holds 1989; Arthur G. B. Metcalf sold 2334 Electronics Corp. of America, holds 22,333 personally and 142,000 thru trust; John H. Briggs bought 1115 Gabriel Co., holds 37,000; Harry S. Samuels bought 1900 Gabriel Co., holds 5000 personally and 700 with wife; Lawrence B. Richardson sold 300 General Dynamics, holds 4930; Charles D. Dickey bought 500 GE, holds 7500; Clarence H. Linder bought 1070 GE, holds 2640; John D. Lockton bought 1500 GE, holds 2019; Philip D. Reed bought 3300 GE, holds 6300; Walter O. Menge bought 100 Magnavox, holds 100; E. W. Engstrom bought 100 RCA, holds 600; Robert A. Seidel bought 180 RCA, holds 680; Paul F. Hannah bought 2000 Raytheon, holds 2236; Charles M. Hofman sold 760 Raytheon, holds 640 personally and 1569 jointly with wife; Harold C. Mattes sold 1000 Raytheon, holds 9234; Frank J. Healy bought 181 Sylvania, holds 2722; Don G. Mitchell sold 100 Sylvania, holds 2461; R. D. Blasier bought 150 Westinghouse, holds 833; Leslie E. Lynde bought 725 Westinghouse, holds 1510.

Capehart-Farnsworth Co. had net loss of about \$26,000 in first 4 months of 1954, with most of loss occurring in April, annual meeting of IT&T stockholders was told this week by pres. Gen. Wm. H. Harrison. He "hopes and expects" that company will "about break even" for all of 1955. Capehart-Farnsworth last year lost \$800,000-\$900,000 before taxes, he said. Farnsworth Electronics Co., research & industrial subsidiary formed out of original Capehart-Farnsworth subsidiary, had profit of \$320,000 before taxes in first 4 months this year, he noted.

American Electronics Inc., Los Angeles, in May 10 prospectus offers \$1,250,000 in 5% convertible debentures due May 1, 1967 through Van Alstyne, Noel & Co. and Crowell, Weedon & Co. Firm is vendor to Hughes Aircraft and other aeronautical firms and to govt., had net sales of \$5,461,074 and profit of \$273,057 in 1954. It owns Pierson Electrical & Engineering Corp. and Electroflow Inc.; latter last Feb. entered into merger agreement with Berlant Associates and Tri-D Sound Corp., whereby it proposes to enter magnetic tape recorder field.

Westinghouse reports first quarter sales of \$367,705,000, earnings of \$12,782,000 (75¢ a share), both sharply below the \$403,537,000 & \$26,286,000 reported for first quarter 1954. Pres. Gwilym A. Price blamed decline of backlogs for apparatus and industrial equipment, but said this trend has been sharply reversed recently. Consumer products sales, he added, are up considerably over first quarter 1954.

American Phenolic Corp. earned \$204,451 (51¢ a share (after taxes of \$190,000 on sales of \$6,006,243 in first quarter, compared to \$121,016 (30¢) after \$134,000 on \$6,261,035 in corresponding 1954 period. Backlog of orders totaled \$6,300,000 as of March 31. Working capital increased by \$127,413 during quarter.

Warner Bros. Pictures profit of \$2,081,000 (84¢ a share) in 6 months ended Feb. 26 was highest for any half-year since its separation from theatre-exhibitor operations in Feb. 1953. Film rentals & sales totaled \$35,079,000. Profit in corresponding period year ago was \$1,618,000 (65¢), rentals & sales \$34,059,000. Taxes were \$2,100,000 vs. \$1,700,000 year ago.

Oak Mfg. Co. first-quarter earnings were \$441,998 (84¢ a share) vs. \$240,971 (46¢) first 1954 quarter.

Richard A. Mack of Coral Gables, Fla., was nominated May 27 by President Eisenhower to 7-year term as a Democratic FCC member (Vol. 11:19-20), succeeding Comr. Frieda B. Hennock, whose term expires June 30. Member and former chairman of Florida Railroad & Public Utilities Commission and 2nd v.p. of National Assn. of Railroad and Utility Commissioners, he'll be 3rd member of FCC picked from ranks of state utility commissioners by an Administration whose policy toward business is laissez-faire—others being Republicans Chairman McConnaughey and Comr. Doerfer, who formerly headed Ohio and Wisconsin utilities commissions. Appointment of the 46-year-old Mack was hailed in statements by his sponsors, Florida Democratic Sens. Holland & Smathers, latter being member of Interstate & Foreign Commerce Committee, which will hold hearings on appointment. Smathers said he has "known Richie personally for almost 25 years," termed him "eminently qualified" and "a loyal and faithful Democrat." Committee Chairman Magnuson (D-Wash.) said that hearing probably will be held in "a couple of weeks," that he doesn't know Mack. There was speculation that Administration's announcement was timed by GOP to make political capital by disclosing Comr. Hennock's successor during week of NARTB convention, when many of nation's broadcasters were in Washington. Comr. Hennock, a New York lawyer, hasn't revealed her plans.

First tower over 1000 ft. to receive aeronautical clearance in more than 6 months is 1110-ft. structure proposed by KWWL-TV, Waterloo, Ia. (Ch. 7), which got OK from Washington Airspace Subcommittee May 24. Military members of subcommittee have been blocking approval of all tall towers on grounds that they are hazardous to air navigation (Vol. 11:11). Two of the rejected tower proposals have already been given hearings by FCC, at which military and aviation industry spokesmen have appeared to state their opposition, and FCC's Broadcast Bureau last week backed applicant in one of these cases (Vol. 11:21). Third case—that of WSLA, Selma, Ala. (Ch. 8)—is scheduled for June 16 hearing. KWWL-TV plans to move to new tower Aug. 1, increase power to 316-kw at same time. Station hopes to serve Dubuque and Mason City, as well as Waterloo, from new tower.

Two microwave applications for links to serve community antenna systems in Rapid City, S. D. with signals of Denver stations (Vol. 10:39, 51) were set down for FCC hearing July 5. Commission informed Bartlett & Reed Management and Blackhills Video Co. that neither had proved its proposed service would be in public interest. In any event, Commission added, 2 such systems might be a wasteful duplication. All aspects of proposals are to be explored at hearing: need, technicalities, personnel, rates, regulations, operational practices, qualifications of applicants. Big microwave system to serve community systems in Wyoming is being planned by Pioneer Transmission Corp., Worland, Wyo. (H. B. Van Buskirk & J. R. McKibbin), proposing to serve existing and proposed systems in Worland, Lander, Riverton, Thermopolis, Rock Springs, Rawlins & Green River.

Evil effects of TV are being discovered in Russia, as they were here when the medium was in its infancy. Answering questions raised "in connection with the spread of TV in the USSR," Radio Moscow this week told worried listeners: (1) "TV must be used intelligently without disturbing the daily routine of children." (2) "TV rays have no effect whatever on the human organism."

Brand Names Foundation Inc., in first service to TV, provides 275 stations with kits pointing up benefits of brand buying. Kit includes 2 animated cartoon spots and fact sheets for use in integrated commercials.

Radio is making spirited comeback, despite inroads of TV, NARTB convention was told. Increasing demand for sets, new programming concepts and revisions of rate structures have been major factors, speakers stressed. NARTB pres. Harold Fellows said that in face of 25% decline in network time sales in 1952-54, some 1012 out of NARTB's 1220 AM members increased sales or held their own, during 1954. He attributed radio's comeback to improvement of management and selling techniques. In keynote award speech, Mark Ethridge (WHAS-TV & WHAS, Louisville) said: "I don't think radio has ever had better days program-wise and public service-wise than it has now. It is more of the people than it has ever been; it is closer to them than it has ever been. And they bought more sets in the first quarter of this year than they bought in the first 17 weeks of last year." Radio Advertising Bureau pres. Kevin Sweeney said plans call for enlarging sales staff to 12, expanding sales committees to 115 cities and devoting \$120,000 annually to "wider and deeper research to strengthen radio's competitive position." (For proposed rate structure changes by CBS and MBS, see p. 7.)

Are broadcasters in danger of losing their "Magna Carta"—Title III of Communications Act, which establishes principle of free broadcasting? Chairman Priest (D-Tenn.) of House Interstate & Foreign Commerce Committee senses "a growing feeling among many members of Congress that more regulation of the broadcasting industry is called for in view of changed circumstances." In address to NARTB convention May 24, he said the frequency of complaints about TV & radio from the public—and from congressmen—is increasing "day by day." He cited complaints about caliber and amount of advertising, prize fight "blackouts," programming, and stated: "If Congress were confronted today anew with the problem of writing a broadcast law designed to safeguard the public interest, it is questionable whether you, the broadcasters, would be successful in persuading the Congress to give you the same degree of freedom that Congress gave you in [the Radio Act of] 1927 and again in [Communications Act of] 1934." He warned broadcasters to "prove by your deeds that the principles of the charter granted to you should be left intact."

Lamb hearing record was closed May 24 following brief procedural session with examiner Herbert Sharfman by attorneys representing broadcaster-publisher-industrialist Edward O. Lamb and FCC Broadcast Bureau. Both sides agreed to submit proposed findings within 60 days. On May 26, appeals court upheld lower court decision which dismissed Lamb's long-ago attempt to block hearings on the Communist-association charges. Meanwhile, Commission dismissed Lamb's application to sell radio WHOO & WHOO-FM, Orlando, Fla., at request of prospective purchaser Mowry Lowe, who backed out after 9-month purchase agreement expired. FCC had held up approval of sale pending decision on charges against Lamb.

Relected to TV board of NARTB at convention this week, for 2-year terms: Kenneth L. Carter, WAAM, Baltimore; Campbell Arnoux, WTAR-TV, Norfolk; Wm. Fay, WHAM-TV, Rochester; Ward L. Quaal, WLWT, Cincinnati. Joseph E. Baudino, Westinghouse, was elected to fill unexpired term of John Esau, resigned to join *Television Age*.

New Yorker Magazine's profile of NBC-TV's Pat Weaver, titled "The Communicator" and carried Oct. 16 & 23, later made available as reprint, has won for its author Thomas Whiteside the Benjamin Franklin Award of U of Illinois for best biographical writing of the year.

Licensed TV sets in Britain totaled 4,503,766 at end of March, up 96,373 in month.

SUMMARY-INDEX OF THE WEEK'S NEWS—June 4, 1955

EVE OF FEE-TV SHOWDOWN brings scathing attack by RCA-NBC Chairman Sarnoff who says toll TV would "degrade and ultimately destroy free TV" (pp. 1 & 5).

FIRST-RUN MOVIE on network TV in color next fall is symptomatic of Hollywood-TV interdependence, may lead to more "TV premieres" of major films (p. 1).

IDEAS FOR ADDING VHF channels analyzed by FCC staff expert; problems of conversion and costs of moving govt. services inherent in all (p. 2).

RELEASE OF VHF EDUCATIONAL channel proposed by FCC in Des Moines, first such move to date; proposed decisions for Ch. 3, Hartford & Ch. 6, Milwaukee (p. 4).

TWO NEW STATIONS—one in non-TV area, other a Spanish-language uhf—go on air as uhf outlets sign off in Atlanta & Macon, Ga. and Jackson, Miss. (p. 6).

NEW PRODUCTION TECHNOLOGY built into "1956" TVs; first "Tinkertoy" set due soon, following Admiral's 80% printed-circuit chassis (p. 9).

23 ELECTRONICS FIRMS on post-Korea list of top 100 military contractors; procurement cancellations & cut-backs, emphasis on aircraft shown on new list (p. 12).

COMMUNITY ANTENNA business continues remarkably vital, serving 1,000,000 people; association holding N. Y. convention June 6-8 (p. 8).

REPEAT PERFORMANCES of hit live programs draw more support—from CBS-TV pres. Jack Van Volkenburg and veteran producer Worthington Miner (p. 14).

NETWORK TV BILLINGS slip slightly in April but are well ahead of April 1954; PIB figures show first 4 months' TV billings more than 30% ahead of 1954 (p. 14).

BIG GUNS POISED IN PAY-AS-YOU-LOOK BATTLE: The big showdown on subscription TV begins next week with filing of official comments at FCC by June 9 deadline. All the big industry entities are expected to file -- the 4 networks, 3 pay-TV proponents (Paramount, Skiatron, Zenith), Joint Committee on Toll TV, NARTB, etc.

Next official step will be filing of "reply comments" July 11 -- or later if postponement is requested and granted. After that, it's pure guesswork as to how FCC procedures will run. If Commission is anxious for quick decision, windup could come before year's end. More likely, however, FCC will be quite deliberate, running proceedings well into next year -- if not longer.

Some parties will wait until June 9 deadline to file, but one of those filing early is NBC. Chairman Sarnoff devotes blistering 28-page attack to point-by-point refutation of proponents' arguments, keyed to theme that "pay-TV would degrade and ultimately destroy the present system of free TV." He concludes:

"Our American principle of Freedom to Listen and Freedom to Look is chiefly responsible for the growth of the most dynamic industry in the world today. It has made the American people the best informed in the world and it has done so without discriminating between the poor and the rich.

"It would be tragic for this Commission to authorize pay-TV to cripple this great democratic medium for the free dissemination of ideas, education and entertainment to all the people of America. My earnest plea to the FCC is: Keep American Radio and Television Broadcasting Free to the Public." (For details of Gen. Sarnoff's comments and other subscription TV developments, see p. 5.)

FIRST-RUN RELEASE TO TV—IN COLOR: There's more significance than at first apparent in NBC-TV's announcement that it has bought (for reported \$250,000) first-run rights to a full-length British feature film which it will telecast -- in color -- as first filmed spectacular in its "Color Spread" series starting Sept. 11, 7:30-9 p.m.

Recently released in English theatres, where it got very good reviews, the Alexander Korda comedy "The Constant Husband", starring Rex Harrison, will debut in U.S. as a one-shot before a U.S. audience that has come to like many of the British oldies and not-so-oldies that have crowded its TV screens in recent years.

Built up as an American premiere, offered in prime Sun. night time, assured

a home audience running into millions, will the TV showing kill off the picture's U.S. theatre boxoffice? If it clicks with the TV public, and profits the producer, can more of the same be far behind -- domestic as well as foreign, black-&-white as well as color? Also...

What need for subscription TV if good new or recent films find their way to TV naturally? And what price films still held in the major U.S. producers' vaults if TV should prove, as it is doing in the case of Davy Crockett, that it can introduce and share the showing of new shows without killing off boxoffice?

* * * *

It happened slowly -- and with some elements of the movie industry protesting all the way, just as did the newspapers against early radio -- but it's obvious now that the movie producing and TV arts and industries have become mutually interdependent. It would be difficult now for either to do without the other.

Only sour note in the relationship is the continued opposition of most movie exhibitors who, while they probably would be better off if TV had never been invented, are still refusing to recognize that it has been invented and accepted and are closing their eyes to best promotional medium available to them.

Their eyes are being opened -- but slowly. Walt Disney's delightful "hour-long commercials" for his theatrical products have packed movie houses for his new and old pictures. Enlightened exhibitors are said to be fighting for rights to show "Davy Crockett", produced originally for TV and shown twice on "Disneyland" before it ever appeared in a movie theatre -- and it's not even in Cinemascope!

The Korda film to be shown as an NBC color spectacular will net its producer from TV an estimated 25% of its production cost, leading Korda's U.S. representative Morris Helprin, pres. of London Films, to remark: "We believe that eventually the whole pattern of motion picture distribution may be reversed. 'The Constant Husband' will be the most talked-about movie in the country, just because of the exploitation it will get from TV. We feel there are other picture producers who want to do something like this -- but they're a little timid about it."

Just as it took Walt Disney to wake up the majors to the promotional and financial values of putting on their own network TV shows, it may well be that a British producer will show that a pre-theatre TV showing of a good picture can even enhance its boxoffice.

* * * *

Hollywood's new TV-made prosperity is another facet of movie-TV interdependence. Not even in the heyday of the silver screen have so many film actors, directors, producers & writers been working and eating. But instead of a handful of production and distribution firms, there are now about 1000 that make films of one sort or other, nearly every one producing for TV. Judy Dupuy's "Who's Who" directory lists 961 firms, 122 of them regarded important.

Consider also these statistics from the first major movie producer to enter TV film making: Columbia Pictures' Screen Gems will turn out 286 half-hour films for next season, or about half the number of feature-length theatrical pictures due to be made by all the Hollywood studios combined. Screen Gems recently had 42 writers working, while the 9 major Hollywood studios together had 166. In Hollywood alone, TV film slated to be produced for next season will total some 900 hours.

ENIGMAS OF THE TV ALLOCATIONS PLAN: Allocations picture is one of most perplexing ever to face FCC. On one hand, there's the demand that uhf areas be kept pure uhf by eliminating vhf assignments. That's the deintermixture principle. On the other hand, there's demand that more vhf channels be assigned -- "enough for everyone" -- to be accomplished through many suggested plans.

Among the FCC members, there are as many opinions as there are commissioners, and it's impossible to predict ultimate vote on any new plan -- though odds always favor a decision to leave things essentially as they are.

FCC staff has racked its brains over problem for a long time, and its recommendations usually carry much weight with commissioners. Here's how a veteran staff member, expert in such matters, summarizes situation as of now; because of his position and because the subject is so controversial, his identity is withheld:

"It's not the public that's complaining. The Commission knew what it was doing when it adopted as first priority the concept of giving everyone at least one TV signal. Scarcely anyone cannot now get a picture. The Commission has really done a good job for the public and doesn't get enough credit for it.

"There are vhf stations as well as uhfs in financial trouble, and you wonder whether the economics of TV will support many more stations as of today. However, there are various plans for getting more vhf channels where demand for them is the greatest. How feasible are these plans?

"There are predictions that present vhf channels will be 'broken down' -- new stations squeezed in by directional antennas and small-coverage assignments -- all at the expense of today's vhfs. I think you'll have a 'clear channel' situation. If the few dozen AM clear channel stations have been able to resist encroachments for 30 years, don't you think 300-400 vhfs would be able to do at least as well?

"Then there is Comr. Lee's idea. He suggests that the spectrum be reallocated to give TV 47 vhf channels in the 60-342 mc band, dropping uhf. This may sound good to a group of broadcasters looking for vhf channels. But would it solve their problems any more than uhf would? Let's see.

* * * *

"Uhf's problem is not propagation; it's circulation, conversions. Lee's plan would still require conversions. Then, the plan would move many govt. services up higher in the spectrum. A 3-kc voice channel is very inefficiently used at, say, 1000 mc -- perhaps 1½% efficient. On the other hand, TV is 75% efficient wherever it's used. On top of that, the Govt. has millions invested in its present facilities -- aircraft navigation equipment. Would the John Tabers of Congress appropriate the money to move these services, essential to safety of life and property, just to take care of an 'entertainment' service?

"If the Commission really wants to authorize a lot of vhf stations, it could conceivably do it by appropriating the 88-108 mc FM band and cut it into 2 or 3 TV channels. This is the 6A-6B-6C idea. What it could do is to cut the channel separations of the new channels way down, protecting the present Ch. 6 (82-88 mc), but giving the new channels really postage-stamp coverage.

"You could get an awful lot of them that way -- probably hundreds. They'd have a coverage radius of 5-10 mi., compared with 60 mi. or more for present vhf channels. They'd be comparable with 250-watt AMs, many of which do very well, even in big cities. There would still be a conversion problem, but the operators would be able to tell Madison Avenue that they have vhf stations. Perhaps these new channels could be used to deintermix, to give each uhf a vhf channel, but it couldn't take care of all uhf stations; they're too concentrated in some places.

"What would happen to FM? The proponents of the plan think they could squeeze most existing FMs into the 8 mc left if 2 TV channels are carved out, but they agree that little could be done with the 2 mc left if 3 TV channels are created. I'm dubious whether even 8 mc could take care of all the FM stations."

* * * *

Note: "Re-evaluation of the allocation plan" by committee of engineers may be next big project in Senate Commerce Committee's TV investigation. Chief counsel Sidney Davis has been discussing such a proposal with industry representatives, with idea of forming ad hoc committee of "the best engineering talent" to study engineering aspects of channel allocations, perhaps come up with alternative plans. Queried about project, Chairman Magnuson (D-Wash.) said no members have been picked for the committee, and, in fact "nothing has been started yet."

More than 50% of business films are made with eye toward eventual TV distribution—in contrast to situation just year ago when only 10% of business film sponsors were thinking in terms of TV showings. This is one of hitherto unrevealed facts brought to light in survey of 157 business films by Association of National Advertisers, published as *The Dollars & Sense of Business Films* (ANA, 285 Madison Ave., N. Y., 128-pp., \$5). Though study is devoted mainly to economics of commercial films, these TV

facts are brought out: Excluding TV showings, business films draw from 40,000 to 21,850,000 each, with median of 1,269,000 spectators. Nine films in survey shown on TV reached 1,095,000 to 10,975,000 persons each, with median of 3,465,000—though the film with largest total audience has never been used on TV. Figures show average business film costs 4.6¢ per spectator—but when 9 films were given additional distribution on TV, cost per spectator was reduced to 1.6¢.

Personal Notes: Harry Ackerman relinquishes post as CBS-TV program v.p., Hollywood, to become exec. director of new CBS-TV special projects div., operating out of N. Y. & Hollywood, in charge of developing & administering new programs, sharing ownership of some; Alfred J. Scalpone resigns as McCann-Erickson TV-radio v.p. to succeed Ackerman as CBS-TV Hollywood program v.p., effective July 1 . . . Edward H. Benedict, ex-Ziv, named national sales mgr. of Triangle Publications' WFIL-TV & WFIL, Philadelphia, and WNBC-TV & WNBC, Binghamton; A. G. Hubbell succeeds S. N. Heslop as WNBC-TV sales mgr. . . . John T. Murphy, Crosley v.p., named midwest membership committee chairman, Television Bureau of Advertising . . . Stanley Neustadt, ex-FCC litigation div., joins Cohn & Marks law firm . . . Joe Bernard, gen. mgr., elected v.p. of WGR Inc., Buffalo (WGR-TV), Karl Hoffman engineering v.p.; George F. Goodyear is chairman-pres. . . . James C. Hirsch, ex-sales mgr., WRC, Washington, joins Petry in N. Y. as radio sales promotion mgr. under new exec. v.p. Tom Knode . . . George Swearingen Jr., ex-Weed, named mgr. of CBS Radio Spot Sales, Atlanta, succeeding David Kittrell, resigned . . . Richard Dorso, founder & exec. v.p. of United Television Programs, joins Ziv TV Programs Inc., heading up development of new programs & packages . . . John T. Parsons resigns as mgr. of WMGT, Adams-Pittsfield, Mass., to become mgr. of WHYN-TV, Holyoke, Mass.; he's succeeded by Wm. P. Geary, WMGT commercial mgr. . . . Dwight Hinshaw, ex-KCKT, Great Bend, Kan., named regional sales mgr., KEDD, Wichita . . . Charles Mercer, AP feature writer, succeeds Wayne Oliver as TV-radio editor, latter joining *Television Magazine* Aug. 1 . . . Richard W. Bowman, ex-Foote, Cone & Belding, joins Wm. H. Weintraub & Co. as TV-radio copy supervisor . . . John C. Spearman, of Spearman & Roberson law firm, suffered heart attack, is confined in Doctors Hospital, Washington.

FCC Comr. Rosel H. Hyde, who left for Hawaii on Commission business May 28, speaks at BMI clinics in Twin Falls, Ida. & Salt Lake City June 13 & 15 before returning to Washington June 18. Comr. John C. Doerfer speaks at National Community TV Assn. convention in New York's Park Sheraton Hotel June 8, at D. C.-Md.-Va. Bstrs. Assn. meeting at Ocean City, Md. June 17.

John F. Patt, pres. of WJR, Detroit and upcoming WJRT, Flint (Ch. 12), who was stricken with coronary occlusion while attending NARTB convention in Washington last week, is reported recovering slowly, will continue to be confined in Georgetown Hospital for at least a few more weeks. He was taken out of oxygen tent this week, can receive no visitors other than Mrs. Patt.

Morris Novik, TV-radio consultant for various labor & educational organizations, has purchased Richard E. O'Dea's interest in WOV, N. Y. Mr. O'Dea is retiring.

Frank H. McIntosh & Assoc. Consulting Radio Engineers is new name of Washington firm, following being named associates: Robert E. Baluta, James R. Croy, Elizabeth L. Dahlberg.

George Heller, 49, national exec. secy. of AFTRA, who negotiated first union contracts for TV-radio actors, died May 29 in N. Y. after 7-week illness. He had been ballet dancer, actor, composer & producer, was instrumental in founding AFTRA and later the TV Authority, of which he became exec. secy. in 1949, retaining same position in AFTRA when the 2 unions merged in 1952.

Benjamin J. Atlas, 48, Washington correspondent of *Billboard* and *Tide*, onetime reporter on *Syracuse Herald-Journal* and other upstate N. Y. newspapers, died June 1. Surviving are his widow, son and daughter.

SANCTITY of the educational channels was breached this week—but ever so slightly—when FCC for first time started proposed rule-making to explore possibility of opening one to commercial use. On petition of red-inked KGTV, Des Moines (Ch. 17), it proposed to open Ch. 11 to commercial applicants.

Everyone at FCC cautions that move shouldn't be interpreted as "beginning of the end" of unused educational vhf channels; that each case is being considered individually; that Commission had in mind Congressional criticism that it has too often dismissed petitions "summarily"; that only last week it shifted Ch. 13 in Monroe, La. from commercial to educational use, etc. Nonetheless, move is regarded as a "first"—with potentials.

There were no CPs, but 2 initial decisions were issued—one of them in the tough Hartford Ch. 3 case, wherein examiner Fanny N. Litvin recommended grant to Travelers Insurance's WTIC (Fritz Morency) over group sparked by Harry Butcher, Hartford Telecasting Co. She said pioneer WTIC's excellent broadcasting record and superior proposed programming overbalanced fact that grant to Butcher's group would promote greater diversification of mass media ownership. She rejected Hartford Telecasting's contention that Travelers Insurance is the "dominating" economic power in area.

Other initial decision was pro forma action looking toward Ch. 6 grant in Milwaukee suburb Whitefish Bay to Independent TV Inc. after dropout of WMIL (Vol. 11:17). Pres. of Independent is Jack Kahn, yarn & hosiery mfr.

Way was finally cleared for Ch. 11 CP in Pittsburgh this week when competitors WWSW and WJAS got together on 50-50 merger. Each is putting up half the capital, and WJAS will be sold. Each will have 3 members on board, with 7th member to be mutually acceptable. Officers will also be balanced 50-50.

* * * *

Long squabble in Houston-Galveston reached initial decision stage when examiner John B. Poindexter rejected all arguments of KTRK-TV, Houston, that KGUL-TV, Galveston, was really becoming a Houston station and ignoring Galveston—in violation of allocation plan and FCC rules—by getting transmitter site 27 mi. from Galveston and 24 mi. from Houston.

First TV hearing outside Washington since freeze will be held in Biloxi, Miss. Though examiner issued initial decision favoring WVMI over WLOX for Ch. 13, FCC ordered further hearing into cross-charges by both parties that principals of each violated liquor laws in their hotel operations and other character qualifications need looking into.

In allocations, Commission received petition from WDMJ, Marquette, Mich. that Ch. 5 be substituted for Ch. 13 in Calumet, shifting Ch. 13 to Marquette. Also filed was petition of KSVP, Artesia, N. M. to shift Ch. 10 from Roswell to Artesia.

To build up data on TV propagation, Commission has set up a "central reference file" and is soliciting field strength coverage surveys. File will be split—one section for public inspection, other confidential for FCC staff, latter to prevent stations from using data to competitive advantage.

■

FCC's proposed investigation of networks won approval of Senate Appropriations Committee June 3. It okayed House-passed appropriation of \$6,870,000 for fiscal 1956, including \$80,000 for getting the network study started and \$90,000 for processing application backlog (Vol. 11:14,22).

OBVIOUSLY relishing quoting pessimistic statements regarding sponsored TV, uttered during 1946-48 by Zenith president Eugene F. McDonald, prime subscription TV proponent, RCA-NBC chairman David Sarnoff, in comments filed with FCC, aims to show that Comdr. McDonald is still wrong. Rugged individualists both, they've fought in the past over FM, uhf and TV, are still litigating over patents and are intense rivals in set & tube field; indeed it was only on compatible color that they seem ever to have agreed.

Quoting multi-billion-dollar statistics on TV's stature, Sarnoff cites such statements in 1947 by McDonald as: "I have said that TV required a boxoffice to pay for the type of programming that would give it mass appeal, and events have borne me out."

Gen. Sarnoff said pay-TV proponents favor "paid narrowcasting" as against "free broadcasting"; that their attitude is "No Fee—No See." He asserted that pay-TV would undoubtedly attract best free programs and talent, and as result: "Shrinking revenues of TV broadcasters and the economic facts of life not only would result in inferior sponsored programs but, as well, would force curtailment and perhaps abandonment of public affairs, cultural and educational programs which are now presented by free TV. This would be a tragic loss to the public and to the nation."

He foresaw Hollywood taking over, saying that movie producers, "having been legally divorced by the courts from several thousand theatre boxoffices to which they were for so long wedded, are now panting for marriage to cash boxes that can be attached to 35,000,000 TV receivers now in American homes."

Sarnoff noted that 45 markets have only one station each; that 6,500,000 people in those areas would get nothing when toll TV programs were telecast unless they paid; that 64 more areas have only 2 stations each, serving some 12,500,000 people who would lose half their free programming whenever only one station scrambled its pictures, all of it when both did. The idea of limiting pay-TV to major urban areas isn't practical, he said, because it's the large audiences in these areas that make possible costly programs now provided free.

As for argument that people now pay for free programs by paying more for products, Sarnoff said this "is as absurd as contending that purchases of automobiles and clothing subsidize the press and that, were there no press, automobiles and clothing would cost the consumer less. Of course, it is elementary economics that advertising produces increased sales which in turn make possible increased production, lower costs, and lower prices to the consumer."

Note: Copies of the Sarnoff printed brief are available from NBC or RCA.

* * * *

Letters and cards keep flowing into FCC files, and sentiment is almost entirely against toll TV now. Ratio is running somewhere between 10-to-1 and 20-to-1. Due to early start, pro-pay comments still hold lead in total count—running about 10,000 for, 5500 against. Rate of influx has slackened somewhat.

Subject gets big play in press, will get great deal more next week when industry comments are filed with FCC. This week, *N. Y. Herald Tribune* devoted 1½ pages to it. *Wall St. Journal* carried long feature on it. *Tide Magazine* is satisfied that pay-TV is inevitable, stating: "Like it or not, toll TV is on the way . . . It offers the public a convenience never before available. It is coming." *Billboard* poll of stations, agencies, advertisers, film producers & distributors shows 127 executives calling toll TV a threat to free TV, 138 terming it no threat; 55 station & network men said it's a threat, 37 said "no threat." Of total, 161 predict that FCC will approve pay-TV, 78 say it won't; 43 telecasters say it will, 40 say it won't.

Interestingly, while British film magnate was announcing contract permitting a new feature to be premiered on NBC-TV this fall (p. 1), Zenith's McDonald was reporting that Korda has signed up for British rights to Phonevision, saying Korda will seek govt. permission to set up pay system in British Isles.

Dramatists Guild of Authors League of America, through pres. Moss Hart, wrote FCC that: "The inexorable law of the boxoffice is, we think, sound and we would prefer to have this govern our returns rather than the sales volume of a commercial product, as at present." A National League of Televiewers has been organized by Joseph J. Mahoney, of Newark, who asked FCC to delay comments deadline from June 9 to Sept. 9 so that public can "become fully informed" and express its opposition.

Telecasting Notes: Big 20th Century-Fox's TV film subsidiary, TCF Television Productions Inc., began operation this week at Fox's Western Ave. lot in Hollywood, which was completely redesigned for TV at cost of about \$2,000,000. "Best equipped in world" and "first film studios specially designed for TV" are phrases used to describe TCF lot which eventually will have 14 studios plus complete theatre for audience participation programs . . . At full capacity, TCF studios will be able to handle 680 half-hour shows a year. TCF also is building permanent "western" set at 20th Century's Malibu, Cal. lot. Its first project is *My Friend Flicka* series, to be shot in color, already sold to CBS for fall. Cameras roll next month on 20 full-hour black-&-white films, following *Disneyland* formula, for GE sponsorship, to be shown alt. weeks on CBS beginning Sept. 21. TCF is headed by Sid Rogell, with Michael Kraike in charge of production; it already has more than 100 on payroll, including 15 writers for first 2 series . . . Neat turn: Margaret Truman (NBC contract artist) substituted for Ed Murrow on his CBS *Person to Person* May 27 to interview her parents by remote control to their home in Independence, Mo. in a homey, happy, much-quoted telecast . . . In Britain, where he went to cover the elections, Murrow saw campaign handled on

BBC-TV on "rationed" basis—6 periods only, 3 each for Conservative and Labor spokesmen—and it didn't go too well with electorate, who regarded the straight speechmaking by party leaders as monotonous and dull . . . *London Daily Express* suggested: "The more the party leaders stay off the television programme, the more likely they are to win the nation's confidence" . . . Ace director Alex Segal, of *U. S. Steel Hour* (which shifts to CBS next season) has called off new contract with ABC, which reportedly would have paid him \$100,000 for 26 new shows next season; he may freelance in TV next season or produce Broadway play . . . CBS Newfilm at NARTB convention filmed station owners and operators with local Congressmen and TV stars at CBS film display; about 50 such interviews were filmed and mailed "home" for showing on local stations . . . CBS Foundation contributes \$10,000 to projected American Shakespeare Festival Theatre, Stratford, Conn. . . . Another radio show goes TV: Ziv signs Jean Hersholt to star in new film series as "Dr. Christian," same part he played in radio for 17 years . . . Film Festival—preview screenings of portions of all types of film available for spot sponsorship—will be held for 4th year June 22 by WGN-TV, Chicago; last year's showing of 33 films drew 300 admen.

TWO NEW STATIONS went on air this week —while 3 uhf outlets signed off. New vhf outlet opened up Twin Falls, Ida. area, and Spanish-language uhf went into pre-freeze San Antonio. Stations suspending were in Atlanta & Macon, Ga. and Jackson, Miss. On-air total now is 432, including 106 uhf.

KLIX-TV, Twin Falls, Ida. (Ch. 11), more than 100 mi. from nearest other station, began test patterns Memorial Day. Principals are J. Robb Brady Trust Co., holding 50%, and Frank C. Carman & Grant R. Wrathall each holding 12.5%. Carman & Wrathall own 25% each of KUTV, Salt Lake City, and have interests in group of western radio stations. KLIX-TV has 5-kw DuMont transmitter & 6-bay RCA antenna formerly used by WFAA-TV, Dallas, and old GE microwave equipment of WBKB, Chicago. It has 250-ft. tower on Flat Top Butte, 14 mi. north of city. Frank C. McIntyre is v.p.-gen. mgr. & sales mgr.; Paul Droubay, program director; C. W. Evans, technical director. Affiliated with CBS & ABC, it has \$120 base rate. Rep is Moore & Lund.

KCOR-TV, San Antonio (Ch. 41), which begins programming June 10, aired first test patterns June 2. First uhf in city already served by pre-freeze WOAI-TV & KENS-TV, 90% of its programming will consist of Latin-American films & kines. It has 1-kw RCA transmitter, pylon antenna on 558-ft. Truscon tower. Principal owner is R. A. Cortez, with R. A. Cortez Jr. as v.p.-commercial mgr.; W. P. Smythe, v.p.-gen. mgr.; Martin L. Fieldler, chief engineer. Base hour is \$200. Rep is Richard O'Connell.

WQXI-TV, Atlanta (Ch. 36) signed off May 31 after 5½ months of commercial operation in city with competition from three pre-freeze vhf outlets. Owner Robert W. Rounsaville told FCC revenue has been below \$1000 a month, while monthly operating losses have exceeded \$10,000. It had no network. Rounsaville continues to operate radio WQXI and 6 other AM properties. He still holds CPs for WQXL-TV, Louisville (Ch. 41) & WQXN-TV, Cincinnati (Ch. 54).

Also suspending operation May 31 was WOKA, Macon, Ga. (Ch. 47), formerly WNEX-TV, which was transferred to new owners E. K. Cargill & J. C. Barnes in April (Vol. 11:14,17). It began commercial operation as WETV in Aug. 1953. Jackson's uhf outlet signed off May 31 after its owners (*Jackson Clarion Ledger*) merged with vhf competitor WSLI-TV (Vol. 11:12,21), whose Ch. 12 facilities were retained, using WJTV call letters. Ch. 35 grant has been surrendered. Jackson operation was one of first uhf stations, went on air in Jan. 1953.

* * * *

In our continuing survey of upcoming stations, these are latest reports received:

KRNT-TV, Des Moines (Ch. 8) has June 20 target for test pattern, Aug. 1 for programming as CBS basic, writes v.p. Bob Dillon. The Cowles station is now completing wiring of GE transmitter, has installed RCA 12-bay antenna on existing 709-ft. Ideco tower. Base hour rate will be \$650. Rep will be Katz.

KRBB, El Dorado, Ark. (Ch. 10) has 5-kw RCA transmitter purchased from Terre Haute's WTHI-TV (Ch. 10), but hasn't set targets, reports one-third owner Wm. M. Bigley. RCA 6-bay antenna is ready on 600-ft. Skyline tower. It's near southern border of state, over 100 mi. from Little Rock, the nearest TV stations being KNOE-TV, Monroe, La. (Ch. 8), 59 mi., and KSLA, Shreveport (Ch. 12), 81 mi. away. KRBB owners control radio KVMA, Magnolia, Ark. Rep will be Pearson.

KNTV, San Jose, Cal. (Ch. 11), has 2-kw RCA transmitter, plans July 15 test patterns, reports mgr. Harry Y. Maynard. It will use 12-bay RCA antenna on 218-ft. Ideco tower. Owner is A. T. Gilliland's Sunlite Bakery, which bought out 36 other stockholders last winter (Vol. 10:52). Base rate will be approximately \$300. Rep not yet chosen.

KMVI-TV, Wailuku, Hawaii (Ch. 12), granted May 25, plans start in 120 days, reports pres. J. Walter Cameron for grantee Maui Publishing Co. Ltd., publisher of semi-weekly *Maui News* (KMVI). With GE transmitter on order, transmitter house atop Haleakala Crater is to be ready in 6 weeks. Supertent 6-bay antenna will rise 137-ft. above ground. Microwave connecting Wailuku studios will be built later. KMVI-TV will re-transmit Honolulu's KONA programs, in much same way that KGMB-TV programs are picked up and rebroadcast by satellite KMAU, also on Haleakala. Ezra J. Crane, gen. mgr. of newspaper, will be TV gen. mgr.; Richard E. Mawson, KMVI mgr., asst. gen. mgr.; Frank Kovacic, KMVI sales mgr., TV sales mgr.; Alan J. Delpech, TV ad director; George Tam, TV-radio chief engineer. Rep will be NBC Spot Sales.

WHTN-TV, Huntington, W. Va. (Ch. 13), now plans start next Sept. 25, reports v.p. Fred Weber, also pres. of off-air WFPG-TV, Atlantic City (Ch. 46). First competitor for pre-freeze WSAZ-TV (Ch. 3), it has signed with ABC. Base hour will be \$460. Rep will be Petry.

WOOK-TV, Washington, D. C., recently granted Ch. 14 in lieu of originally-assigned Ch. 50 (Vol. 11:5), still has plans to start in 4-vhf capital, seeing need for "specialized" types of service, reports exec. v.p. Arthur Snowberger. Owner is Richard Eaton, who has purchased 12-kw GE transmitter and helical antenna of defunct KACY, Festus-St. Louis (Ch. 14) and will use 300-ft. tower of WFAN, FM affiliate of Eaton's radio WOOK, at First Place & Riggs Rd. N.E., also location of new TV-radio studios. Fall start also is planned for Eaton's WTLF, Baltimore (Ch. 18), which has asked for new call WSID-TV. It already has 1-kw RCA transmitter, has purchased antenna from off-air WECT, Elmira, N. Y. (Ch. 18). It will use 488-ft. Truscon tower with TV transmitter & studios housed with WSID at 912 N. Charles St. Eaton also operates radios WARK, Hagerstown, Md.; WINX, Rockville, Md.; WANT, Richmond, Va.; WJMO, Cleveland. Rep for both TVs will be Eaton's United Bestg. Co.

* * * *

Five Canadian TV applicants: On agenda for June 24 meeting of CBC are applications of G. A. Alger & J. F. Grainger, latter gen. mgr. of *North Bay Nugget*, competing for Ch. 10, North Bay, Ont.; CKRD, Red Deer, Alta., for Ch. 6 there; J. Conrad Lavinger, operator of radio CFCL, Timmins, Ont., for Ch. 6 there; Quebec North Shore & Labrador Railway Co., for Ch. 9 in Schefferville, Que., new iron mining town near Labrador border.

This week's equipment shipments: DuMont—25-kw transmitter, film & live studio equipment to KTBS-TV, Shreveport, La. (Ch. 3), due on air next Sept.; 50-kw amplifier to KCRG-TV, Cedar Rapids, Ia. (Ch. 9). GE—50-kw transmitter & network color equipment to KRNT, Des Moines (Ch. 8), due in Aug.; 12-bay antenna to KFJZ-TV, Ft. Worth (Ch. 11), Aug. target. RCA—12½-kw amplifier to WMTV, Madison, Wis. (Ch. 33); 2-kw standby transmitter to WCCO-TV, Minneapolis (Ch. 4). GE also reports new order from WCTV, Thomasville, Ga. (Ch. 6), due on air in Aug., for 35-kw transmitter, 5-bay antenna, complete studio equipment, for June delivery.

New call letters: WPFH, Wilmington, Del. (Ch. 12), formerly WDEL-TV. New owner is Paul F. Harron.

Station Accounts: Entire Sat. afternoon, 1-6 p.m. for 8 weeks from May 21, purchased on NBC's WNBQ, Chicago, by Cole-Finder Co., Lincoln Mercury dealer, in biggest local time block station ever sold; it will sponsor 5 one-hour feature films seriatim under title *Pieturama*, thru Rocklin-Irving & Assoc. It's package deal, details undisclosed, but WNBQ Class C rate, covering 7 a.m.-6:30 p.m. Sat., is \$1650 per hour before frequency discounts . . . Even bigger local time purchase, by Polk Bros. dept. store chain, already big TV advertiser, extended TV sponsorships to 18½ hrs. per week for 52 weeks on ABC's WBKB, Chicago, embracing 7 morning, afternoon & evening programs (3 new, 4 renewals) . . . Loss of shoppers to N. Y. City and outlying shopping centers led group of Paterson, N. J. merchants to buy spots on various daytime shows on WRCA-TV & WRCA, N. Y. June 1-7 to plug slogan "Downtown Paterson Has Everything"; stations produce shows about the city, for which Commercial Development Fund, as group calls itself, solicits local commercial participants . . . Click program *The Big Idea*, aimed at amateur inventors, sponsored last 5 years by Philadelphia Saving Fund Society on WCAU-TV Tue. 7-7:30 p.m., and seen for 10 months on DuMont, will be filmed by Donn Bennett Productions at RKO-Pathe in 52 segments for national syndication in Sept. . . . Glass Container Mfrs. Institute, N. Y., comprising 74 manufacturers, to spend \$1,200,000 this year in all-media campaign to promote greater use of glass by food & beverage packers, thru Kenyon & Eckhardt . . . Wool Bureau Inc., 16 W. 46th St., N. Y. has released *Today's Male*, 6-min. TV film, offered one station per city . . . Among other advertisers currently reported using or preparing to use TV: National Paint & Varnish Co., thru Caples Co., Los Angeles; Regina Trading Corp. (Liebig Soups of France), thru Ralph D. Gardner Adv., N. Y.; Cheramy Perfumer (April Showers deodorant), thru Emil Mogul; Allechem Mfg. Co. Inc., N. Y. (Kill-Flame fire extinguisher), thru C. J. Herrick Assoc., N. Y.; Baylis Bros., Cincinnati (Kathy Don & Polly Flinders children's dresses), thru J. Gerald Brown Adv., Hempstead, N. Y.; Lufthansa Airline, N. Y., thru Albert Woodley Co., N. Y.; Solby Bayes, Boston (shoes), thru Mina Lee Simon, Boston; Tanner Products, Los Angeles (Leather-Kleen leather protective), thru Philip J. Meany Co., Los Angeles; Shircraft Co., N. Y. (Airman shirts & sportswear), thru Willsted & Schacter, N. Y.; Weaver Products Co., Minneapolis (Spoolies curlers), thru Gregory & House, Terre Haute; Sperry Candy Co., Milwaukee (Chicken Dinner candy bar), thru Keck Adv., Oconomowoc, Wis.; Lydia O'Leary Inc., N. Y. (Covermark cosmetic), thru Gibbons-O'Neill, N. Y.; Norwegian Frozen Foods Ltd., Jersey City, N. J., thru Creative Adv., Jersey City; General Petroleum Corp., Los Angeles (Mobilgas "R" gasoline), thru Stromberger, LaVene & McKenzie, Los Angeles; Welch Grape Juice Co., Westfield, N. Y. (Fruit-of-the-Vine preserves), thru Kenyon & Eckhardt; Western Tool & Stamping Co., Des Moines (power mowers, lawn sweepers), thru A. Martin Rothbardt, Chicago; Ferber Corp., Englewood, N. J. (Vu-Riter ball point pen), thru Emil Mogul; Block Drug Co. (Stera-Kleen), thru Dowd, Redfield & Johnstone, N. Y.

More honorary degrees: To Ben Duffy, BBDO pres., from St. Joseph's College, Philadelphia. To Will C. Grant, pres. of Grant Adv., from Southern Methodist U, his alma mater. To Edward J. Noble, chairman of finance committee, ABC-Paramount, and Samuel I. Newhouse, chain newspaper publisher and owner of WSYR-TV, Syracuse, among other stations—both from Syracuse U.

Wallace-Ferry-Hanley Co. (Campana Sales Co. & other accounts) closes up shop June 30, pres. L. T. Wallace and v.p. L. H. Ploetz joining Fletcher D. Richards Inc.,

Network Accounts: Auto manufacturers dominated this week's network TV purchases, epitomizing keen competitive struggle among car makers this fall. Ford bought all 10 Sat. night 90-min. "specials" on CBS-TV (9:30-11 p.m.), some of them in color, thru J. Walter Thompson, retaining part sponsorship of Mon. night color spectaculars on NBC-TV. Chevrolet bought 17 of Tue. 8-9 p.m. periods on NBC-TV for variety show featuring Bob Hope on at least 6. Dodge will sponsor *Lawrence Welk Show* on ABC-TV starting July 2, Sat. 9-10 p.m., thru Grant Adv., retaining *Break the Bank* on ABC-TV Sun. 10-10:30 p.m. . . . Reynolds Metals to sponsor do-it-yourself program on NBC-TV starting June 26, Sun. 7:30-8 p.m., as replacement for *Mr. Peepers*, thru Clinton Frank, Chicago . . . Hazel Bishop to sponsor *The Dunninger Show* on NBC-TV starting June 25, Sat. 8:30-9 p.m., thru Raymond Spector . . . Sheaffer Pen & Maytag to be alt. sponsors of *Navy Log*, adventure series taken from Navy files, on CBS-TV in fall, Tue. 8-8:30 p.m., thru Russel M. Seeds Co. & McCann-Erickson . . . Whitehall Pharmacal & Procter & Gamble to be alt. sponsors of *Down You Go*, another ex-DuMont show, on CBS-TV starting June 11, Sat. 9:30-10 p.m. as summer replacement for *My Favorite Husband*, thru Biow-Beirn-Toigo and Young & Rubicam . . . Pharmaceuticals Inc. to be alt. sponsor (with Esquire Shoe Polish) of *Masquerade Party* on ABC-TV starting July 13, Wed. 9-9:30 p.m., thru Edward Kletter Assoc. . . General Foods & Procter & Gamble to be alt. sponsors of *Those Whiting Girls* on CBS-TV starting July 4, Mon. 9-9:30 p.m., thru Young & Rubicam and Biow-Beirn-Toigo . . . Parker Pens to be alt. sponsor (with General Mills) of *Wyatt Earp* series on ABC-TV next fall, Tue. 8:30-9 p.m., thru Tatham-Laird . . . General Mills to sponsor *Screen Gems' Tales of the Texas Rangers* on CBS-TV starting in fall, Sat. 11:30-noon, thru Tatham-Laird . . . Lee Ltd. (Dri-Mist deodorant) to sponsor *Caesar Presents*, variety show produced by Sid Caesar, as summer replacement for his *Caesar's Hour* on NBC-TV starting July 4, Mon. 8-9 p.m., thru Erwin Wasey & Milton Weinberg Adv., Los Angeles.

NBC to offer advertisers combination rate for participations in either *Today*, *Home* or *Tonight* show along with spots on *Monitor*, its upcoming around-the-clock weekend radio service (Vol. 11:15). Sales presentation will stress advantages of retaining audience via radio on weekends at beaches and in cars during summer. *Monitor's* introductory simulcast on NBC June 12 (4-5 p.m.) will pick up excerpts of jazz concert in Hermosa Beach, Cal., trans-Atlantic plane flight, interview with San Quentin inmates, debate on "spiritual climate of America," scene from "The Fairly Fortune" drama at Bucks County Playhouse.

Rate increases: KULA-TV, Honolulu, July 1 adds new Class AA hour (6-9 p.m. daily) at \$300, min. at \$60, Class A hour remaining \$250; KFDX-TV, Wichita Falls, has raised base hour from \$250 to \$300, min. \$50 to \$60; WDXI-TV, Jackson, Tenn., hour from \$150 to \$200, min. \$20 to \$40; CBFT, Montreal, Que., has raised base hour from \$650 to \$700 and added Class AA min. only rate (7:30-10:30 p.m. Mon.-Sat.) at \$175, Class A min. going from \$130 to \$140.

"Story of Advertising" will be told on NBC-TV's *Mr. Executive*, Sat. June 11 at 12:30 p.m., with Conrad Nagel interviewing *Tide's* Morgan Browne, camera then turning to Grey Adv. Agency to show how typical agency works on a campaign.

New program with Perle Mesta as hostess interviewing celebrities is proposed for this fall by Ted Cott for WABD, N. Y. & WTTG, Washington. He has optioned her services, will arrange format later.

COMMUNITY ANTENNA business continues to flourish with stubborn vitality, to surprise of some in the TV industry, as National Community TV Assn. holds annual convention in New York's Park Sheraton Hotel June 6-8—bigger and stronger than ever. Systems blossomed during 1948-1952 freeze, but there were warnings that business would collapse with rush of new stations on air offering free signals, yet they've confounded the pessimists.

Indicative of systems' health are many factors. Among them:

(1) Number serving 100 or more homes each is 325-350, and additional 100-200 serve 50-100 each.

(2) Average circulation of the over-100 group is 860, up from 728 year ago.

(3) Total homes reached is some 250,000, representing nearly 1,000,000 people.

(4) Big RCA, a small factor in community equipment business up to now, is intensifying efforts on basis of survey by James E. Jump & Assoc., recently became NCTA member. Jerrold Electronics, major equipment producer and large system operator, is expanding, encouraged by Ebasco surveys.

(5) Failures of systems are almost unheard of, only 2-3 going under in 6 years since systems started.

(6) Value of systems continues to increase, the biggest one, in Williamsport, Pa., selling for close to \$1,000,000 a few months ago.

(7) Membership of NCTA has doubled in last year—going from 93 to nearly 200.

(8) To get better signals, operators are investing very heavily in microwave systems costing up to \$200,000.

Now the talk of a "threat" centers on boosters and satellites. This, too, is largely discounted by system operators. They point to costs of building and operating satellites, to difficulties of "policing" viewers to make sure they help support satellites rather than "pirate" signals for free. Most of all, they say, a satellite offers only one signal, where as systems supply 3 or more.

"Type acceptance" procedure of FCC for passing on TV-AM-FM transmitters was incorporated into Part 3 of Commission's rules last week, effective June 30. Procedure provides that manufacturers submit technical data to FCC, which then rules on acceptability of equipment. Up to now, TV transmitters have not been subject to formal FCC approval, but they have been approved informally—and Commission had power to stop use of unsatisfactory transmitters. AM & FM transmitters had previously been subject to "type approval," another method of Commission examination. List of transmitters, broadcast and non-broadcast, which have passed FCC muster, may be inspected at Commission.

Canadians prefer U. S. TV: Results of survey by Canadian Assn. of Radio & Television Broadcasters, presented to House of Commons, shows that 60% of Toronto area audience prefer watching Buffalo & Rochester stations to local CBC outlet, 77% of Essex County viewers prefer Detroit & Cleveland programs. Figures were used as argument for immediate grants of private TV stations as competition to CBC.

Low-priced 16mm film projector for telecasting magnetic as well as optical sound films was introduced by Bell & Howell at NARTB convention. Priced at \$2500, model 614 CBVM is said to be "the first TV projector which need not be electrically locked to the telecast signal," eliminating need for special motor drive and lowering installation and maintenance costs.

A short-range impact of satellites and boosters is visualized, however. NCTA exec. secy. E. Stratford Smith says that rash of illegal boosters in Pacific Northwest did slow down community systems in area for a while but that they've resumed growth. Even if satellites manage to supply several signals, as proposed by application for experimental station in Clarkston, Wash. filed recently, there aren't enough uhf channels to take care of many of these. However, if FCC eventually commercializes such stations, it might reallocate, say, top 10 uhf channels, changing spacings so they'd cover tiny 2-3 mi. areas—enough for most towns.

Commission won't authorize experimentals generously right now, however. There is one "translator" type operating now in Manson, Wash., and Commission says it won't grant more if there's going to be unnecessary duplication of experimental work. In brief, it's leery of granting experimentals to those whose primary purpose is to serve public with TV now—rather than to conduct bona fide experimentation.

Experimental satellite sought for Clarkston, Wash. in application filed with FCC, by Orchards Community TV Assn., 3109 Fifth St., Lewiston, Ida., proposes to deliver signals of 3 Spokane stations by translating them to uhf channels 34, 40 & 46, using Adler equipment. It's non-profit organization (John H. Maynard, secy.), with 700 members who have contributed \$20 each, and it's seeking 2000 more members. Group has raised \$23,000, plans to build satellite for \$19,500, operate it for \$3000 first year. Mail campaign from area, urging quick action, has been felt at FCC—but Commission is going slow, fearful that go-ahead would precipitate demand for similar stations in many communities, encouraging people to buy sets for a new service not yet commercially authorized.

An experimental booster was granted this week to Lambda-Pacific Engineering Inc., Coalinga, Cal., which plans to rebroadcast signals of KJEO, Fresno (Ch. 47). Commission warned grantee, which plans to sell booster equipment, that authorization "is solely for the purpose of obtaining engineering data and will be terminated upon completion of project."

J. Patrick Beacom applied this week for permission to set aside 75% transfer of off-air WJPB-TV, Fairmont, W. Va. (Ch. 35) for \$147,000 to Cincinnati accountant Donn Baer, as approved by FCC last year (Vol. 10:47, 51). Under new terms, Beacom takes back 189 shares (70%) from Baer, bringing his holdings to 95%, Baer retaining 5%. Beacom would assume all liabilities of WJPB-TV, most of which are \$103,612 owed GPL for equipment. WJPB-TV also plans to file for Ch. 5 in Weston, W. Va. if FCC approves petition to change channel there from educational to commercial status. Last week, Baer & Beacom filed application to sell 95% of radios WVVW & WJPB (FM) for \$16,500 to Connie B. Gay, Beacom retaining 5%.

Seeking additional capital, KOAT-TV, Albuquerque (Ch. 7) last week asked FCC's permission to increase stock from 5000 to 24,340 shares, change par value from \$10 to \$1. Under new setup, Alvarado Bestg. Co. (radio KOAT) will reduce holdings from 56% to 33%, Albuquerque Exhibitors 35% to 30%, with other 37% held by minority stockholders. Feb. 28 balance sheet shows deficit of \$183,864, current liabilities of \$238,556, deferred liabilities \$267,570. Of \$397,263 total assets, \$43,448 are current, \$301,118 property.

Recent power increases: KFDA-TV, Amarillo (Ch. 10) to 250-kw ERP; KTVI, St. Louis (Ch. 35) to 500-kw.

Image orthicon tubes now being produced by Westinghouse; previously, RCA was sole U. S. manufacturer. GE also plans production.

NEW TECHNOLOGY IN NEW SETS; TINKERTOY SOON: The important new features of 1956 TV models will be inside the cabinets -- with industry heading into the most important changes in production methods in its history. One major TV manufacturer is expected later this month to introduce a set so radically new in design that it does away not only with conventional wiring but also with conventional components.

As if to set pace for the new TV technology, Admiral this week was first to show new lines at its Chicago convention. Its models have 75-80% of wiring printed on, and most components mounted automatically by Admiral's new automatic assembly machines. Admiral sets use 3 printed-circuit boards for chassis, eliminating more than 400 hand-soldered connections.

Admiral prices won't be announced until next week, but are understood to be generally at about present levels -- starting with 17-in. table model at \$130. (Other details of Admiral's line on p. 10.)

Only hint from bellwether RCA about its new line, which it shows to field reps at Barbizon Plaza, N.Y., on June 6-7 and to N.Y. area dealers June 14-16 is contained in memo from a distributor which reads: "Everything you will see is entirely new in design, utility & performance, completely new chassis -- new tuning devices...and prices are down as much as 29%." Memo adds that RCA's new color line will also be shown at same time.

* * * *

An even more radical change in TV set construction is due to be announced in next few weeks by an unidentified leading TV manufacturer -- not RCA or Philco, so far as we can learn. It's "Tinkertoy" principle of modular construction. At least 3 others, smaller TV producers but important names in electronics, are expected to follow with Tinkertoy sets. Thus Tinkertoy concept will find its way to consumer market this fall & winter, as we predicted last March (Vol. 11:12). Making Tinkertoy modules for the unnamed TV customers is ACF Electronics, Alexandria, Va., division of ACF Industries (formerly American Car & Foundry), which now employs most of the Bureau of Standards men who worked on original development.

Despite the widely-touted cost savings inherent in printed circuits and automatic production, the modular and other printed-circuit sets probably will not be priced lower than conventional sets -- at least not at first. Rather, prices may come down some time in future, depending on status of consumer market and studies by plants on just how much actually is saved. Most automation methods require big tooling-up job, which effectively eats into any cost advantage at outset.

Cost may well be least of the advantages of real automatic production. At least theoretically, more important features will be complete uniformity of sets of any particular model, extreme reliability, and in the case of modular sets, ease of servicing. Add to these advantages the lighter weight of plastic chassis, and the greater accessibility and compactness of vertical chassis.

Developed by Navy-Bureau of Standards team and first shown publicly nearly 2 years ago (Vol. 9:38), Tinkertoy, or modular design, is based on building blocks of small wafers slightly larger than postage stamp, which are stacked into modules or sub-assemblies and then mounted on printed-circuit chassis. Each ceramic wafer contains a circuit component -- a "printed" resistor, capacitor or inductance. When stacked and topped by a tube socket, these wafers constitute a module which contains an entire circuit stage. (Note: Excellent color photos of modular TV chassis and diagrams of Tinkertoy process appear in June Fortune Magazine.)

Note: ACF will demonstrate first modular 21-in. color sets Aug. 24-26 at Western Electronic (Wescon) show in San Francisco. They use conventional RCA circuit but employ Tinkertoy modules and printed circuitry, displayed to show adapt-

ability of modules to complicated color circuitry. At present we know of no manufacturer who has concrete plans to bring out modular-design color set.

Brief highlights of other trade developments this week:

DEALER PROBLEMS: Lots of anxiety among NARDA officials about increasing number of dealers shunting TV-radio-appliance lines to back of stores in favor of merchandising kitchen lines. This despite fact that TV was mentioned most frequently by NARDA members as the product which would sell best in 1955, in annual cost-of-doing business survey released this week (details below). Trend to merchandising kitchens is dangerous, in NARDA's view, because it diverts manpower and money away from basic TV-radio-appliances. Behind trend is simple fact that some dealers are getting sick-&-tired of bucking discount houses, price cutters, low margins, credit problems, etc., prefer to handle comparatively big-profit commodity like complete kitchens, where FHA financing is often available.

ECONOMIC CONTROLS: You can forget about any possibility of Federal standby price, wage & credit controls this year. President told newsmen this week it would be "psychologically unwise" for Congress to vote him such authority now in case of future national emergency. Rep. Spence (D-Ky.), chairman of powerful House Banking Committee, immediately remarked that "Congress will not thrust standby economic controls on the President unless he wants them."

ECONOMIC OUTLOOK: Another bullish business forecast for second half of 1955 came from convention of National Assn. of Purchasing Agents. On basis of survey, NAPA reported 33% of its members believe business in last half of year will be better than year ago, 42% feel it will be about same. The 25% who predicted decline agreed generally it would be more of a "breathing spell" than a major downswing, largely caused by industry vacations & possible slackening of automotive sales.

PRODUCTION: TV output went down to 110,944 week ended May 27 from 120,144 preceding week, running about equal to 110,651 week ended May 13. It was year's 21st week, brought output for year to date to about 3,160,000 vs. about 2,470,000 in same 1954 period. RETMA this week revised 4-month production figure to 2,771,426 vs. 1,904,718 in first 4 months of 1954.

Radio production totaled 266,946 (132,122 auto) week ended May 27, compared to 280,445 week ended May 20 and 287,352 week before. For 21 weeks, production was estimated at 5,900,000 vs. 4,200,000 in corresponding 1954 period. Official 4-month radio production was 4,739,919 vs. 3,326,800 in first 4 months year ago.

Topics & Trends of TV Trade: TV receivers led all appliances in retail dollar sales volume last year and are expected to be best individual product sellers for all of this year. That's major finding of NARDA's annual cost-of-doing-business survey among its members, released this week and available for \$1 (NARDA, Merchandise Mart, Chicago).

Of the 77% of reporting dealers who made sales predictions for 1955, 60% foresaw increases averaging 15% over 1954; 26% expect no change in total dollar sales; 14% believe sales will decline average 20%. Of the 62% making profit predictions, 55% predicted rise in profit averaging 18%; 30% expect no change from 1954; 15% foresee average 25% drop in net return. Increasing importance of servicing is shown by fact it represented 20.3% of dealer's total dollar volume last year, up from 11.7% in 1953.

Biggest problems seen by dealers for 1955, in order of frequency of mention: discount houses & price cutting; excessive trade-in allowances; low margins; by-pass selling by manufacturers & distributors; over-franchising by manufacturers & distributors; difficulties in disposing of trade-ins; uncertainty about color; rising TV market saturation; declining antenna sales; consumer credit problems.

* * * *

Admiral's new line, in addition to printed-circuit & automation features (see p. 9), has new type of speedier

uhf "spin" tuner, top-front tuning on vertical chassis receivers, illuminated periscope dial that can be read through cabinet top, "tilt-out" front auxiliary controls & automatic "range finder" tube for distant reception. Line consists of 14 basic models—5 tables, 8 consoles & 21-in. combination. In address to distributors, pres. Ross D. Siragusa predicted that TV shipments in first 6 months will be 30% ahead of first half of 1954 and second-half sales & dollar volume will exceed last 6 months of 1954. He said Admiral will produce its 5,000,000th TV set early in 4th quarter, less than 7 years since its start, and predicted it will take only a little more than 4 years to produce second 5,000,000.

More distributor conventions for introduction of new lines, in addition to those reported last week (Vol. 11:22): Emerson, June 28-30 at Hotel Plaza, N. Y.; Sylvania, July 28-30 at undisclosed site in Chicago; Olympic Radio, June 19 at Congress Hotel, Chicago; Westinghouse, June 7 in San Francisco, June 10 in St. Louis, June 15 in Chicago, June 17 in Atlanta, June 22 in Columbus, O., June 24 at Metuchen, N. J. factory.

NARDA to sponsor one-week course on business fundamentals for its members at American U, Washington, Aug. 14-20. Fee of \$125, covering tuition & room, should be sent to NARDA pres. Harry B. Price Jr., 133 W. Charlotte St., Norfolk; it's limited to first 50 registrants.

Raytheon cut prices by \$10 on 20 TV models in current line, as part of summer promotion. Line now starts at \$130 for 17-in. ebony metal table model.

Trade Personals: James D. McLean promoted to v.p. in charge of coordinating activities of Philco govt. & industrial div.; Marshall A. Williams named gen. sales mgr., succeeded as Los Angeles mgr. by Dixie B. McKey, ex-RCA microwave sales mgr. . . . Andrew H. Bergeson, consulting engineer in Stromberg-Carlson's Washington office since retirement last year as Navy captain, elected engineering v.p. . . . John Gilberte, Admiral v.p., govt. labs div., installed this week as pres., Washington chapter, Armed Forces Communications & Electronics Assn., succeeding attorney Frank W. Wozencraft . . . Robert M. Marberry promoted to Spartan sales director, replacing Donald F. Miersch, resigned; Melvin L. Myers boosted to gen. sales mgr. under Marberry . . . Rodney D. Chipp, engineering director of DuMont Network, gets same title for DuMont Labs manufacturing divs., serving as liaison between all engineering depts. & research labs . . . Albert J. Harcher, ex-mgr. of CBS-Hytron's Newburyport, Mass. plant, named mgr. of its Lowell, Mass. plant, replacing Rudolph Sachs . . . Edgar G. Dunn promoted to mgr. of Sylvania's new data processing center in Camillus, N. Y., due to be in operation by early 1956 . . . Ralph E. Foster, ex-director of industrial relations, Radio Condenser Co., named asst. mgr. of its Hoopeston, Ill. plant . . . Michael J. Ranalli, ex-DuMont, joins Westinghouse TV-radio div. in special sales capacity under his former chief, new gen. sales mgr. Dan D. Halpin . . . Frank Van Gilder, ex-Weathers Industries, Barrington, N. J., named asst. sales mgr., International Resistance Co. merchandise div. . . . M. S. Kliendinst, ex-RCA, named marketing director, Farnsworth Electronics . . . John V. Deacon promoted to adv. & sales promotion director, Westinghouse International . . . J. H. Ohlrich named Sylvania district sales mgr. for Texas & Oklahoma . . . Richard S. Testut, ex-TV-radio v.p. of Muzak Corp., serving recently as Philadelphia branch mgr. of management consultants Booz, Allen & Hamilton, named v.p.-gen. mgr. of Servel's new home appliance sales div. . . . Richard Kleine named TV sales mgr., Baker Mfg. Co., Evansville, Wis. (towers), succeeding A. M. Repsumer, now factory sales mgr. . . . Irving Townsend promoted to exec. asst. to Goddard Lieberson, Columbia Records exec. v.p.; Gilbert McKean, ex-director of Columbia Transcription Service, named Columbia Records director of consumer relations . . . A. J. W. Novak, gen. sales mgr. of Clevite Corp.'s Brush Electronics, elected v.p. of Technical Instrument Co., Houston (oscillographs), a Brush div.

* * * * *

DISTRIBUTOR NOTES: Philco & RCA complete exchange of distributors in New Orleans, with Philco's appointment this week of Television & Appliance Distributors Inc. (John C. Marden, pres.), ex-RCA outlet; RCA 2 weeks ago appointed Philco distributor Walther Bros. . . . DuMont appoints Igoe Bros., 579 Scotland Rd., E. Orange, N. J., replacing own N. J. factory branch, with TV dept. headed by Irving Sarlin, pres. of N. J. branch; company now has factory branches only in N. Y. & Miami . . . DuMont appoints Kelvinator div. of American Motors, Bendix Radio's Los Angeles outlet, replacing Stewart & Stevens Inc. . . . Bendix Radio appoints Huron Electric Supply Co., Buffalo . . . F. B. Connelly Co., Portland, Ore. (Sylvania) appoints Clay Hixon gen. mgr. . . . GE Supply Co., Pittsburgh, appoints Calvin D. Smith, ex-Chicago, as mgr. of consumer goods, succeeding W. P. Shreve, who retains duties as mgr. of supplies & apparatus . . . Meyers-Taube Co. Fargo, N. D. (Crosley-Bendix) extends territory to cover Billings, Mont.

Abner G. Budelman, spare parts sales mgr. of DuMont mobile communications dept. since 1951 and with Link Radio 1935-51, died May 30 at Mountainside Hospital, Montclair, N. J.

Kaye-Halbert, which filed petition under Bankruptcy Act last July (Vol. 10:32), proposes to offer 162,414 shares of its \$1 par common stock at par and use proceeds to settle outstanding claims. According to plan approved by stockholders and creditors, 8000 shares would be offered to creditors in cancellation of \$8000 of debts, remainder to be sold direct to public. Purchasers would be granted rights to buy 121,810 additional shares at \$1 each within year at rate of 3 shares for each 4 initially purchased. Offering circular says \$437,736 in general unsecured claims will be discharged in full by payment of one-tenth that amount. The \$181,338 balance of amount payable in cash would be paid in instalments over 2-year period. Kaye-Halbert had net loss of \$618,011 on \$2,215,855 sales in year ended Sept. 30, 1954, and loss of \$10,348 on \$577,296 sales in 5 months ended Feb. 28, 1955.

TV set sales by Canadian factories in first 4 months totaled 197,183, production 262,900, reports Canadian RTMA. This compares with 137,267 & 152,256 in same 1954 period. Projected production estimate for May-July period is 116,507 more sets. April sales totaled 30,721 at average price of \$304, production 46,982. Inventory at end of April was 113,601 compared to 97,340 at start of month. Montreal led in April sales with 5303; Toronto, 4915; British Columbia, 3419; other Ontario, 2940; Nova Scotia, 2693; Manitoba, 2317; Ottawa & eastern Ontario, 1839; Alberta, 1820; New Brunswick & Prince Edward Island, 1246; Hamilton-Niagara, 1210; Quebec City, 1203; Windsor, 929; Saskatchewan, 654; other Quebec, 185; Newfoundland, 48.

Closer affinities within RETMA of TV-radio & military electronics manufacturers would result from reorganization proposals which seem to have excellent chance of approval by RETMA board during annual convention June 14-16 at Chicago's Palmer House. Proposals call for creation of military products div.; abolition of separate electronics industry & TV-radio industry committees and return of their functions to single board; reallocation of directors among 5 divs. to provide "better balance" between TV-radio & military interests.

Another 1954 remuneration report: Standard Coil Products Co. proxy statement for June 14 annual meeting reveals pres. Glen E. Swanson drew \$113,609, owns 292,660 shares (19.91%) of outstanding 1,470,000 shares of common stock; James O. Burke, exec. v.p., \$81,624 (211,910 shares or 14.42%); Arthur Richenthal, secy., \$55,684 (1875); Victor E. Carbonara, director & pres. of Kollman Instrument Corp., \$52,590 (no shares).

RCA introduces line of 5 pre-assembled high-fidelity phonographs & radio-phono combinations ranging from table model at \$130 to twin console at \$1600, with first transistor circuits in higher-priced phonos; Robert A. Seidel, exec. v.p. for consumer products, predicts sales of high-fidelity phonographs, tape recorders & components will total \$300-\$400,000,000 this year, up 20% from 1954.

Fada Radio, in Chapter XI schedules filed this week in N. Y. Federal Court, lists assets of \$2,962,567, liabilities of \$2,445,486; among largest creditors are RCA, \$28,153 & Sylvania, \$23,666.

Motorola will consolidate all its 4-building Quincy, Ill. manufacturing in new 185,000-sq. ft. plant due to be completed there in early 1956.

Upcoming network color schedules: NBC-TV—June 6, *Home*, 11:04-11:14, 11:21-11:27 & 11:31-11:44 a.m.; June 7, President Eisenhower commencement address at West Point, 10-10:30 a.m.; June 8, *Home* segments, 11:02-11:04 & 11:50-11:57 a.m. CBS-TV—June 9, *Shower of Stars*, with Edgar Bergen & Charlie McCarthy, Betty Grable, Harry James, Ethel Merman, 8:30-9:30 p.m.

Electronics Reports: Increasing importance of electronics in military procurement is reflected in Defense Dept.'s new list of 100 largest prime contractors from July 1, 1953 to Dec. 31, 1954, which includes 23 companies in large-scale production of electronics equipment.

New 18-month post-Korea list shows sharp realignment of procurement policies, as compared with last previous list, which covered entire Korean war period (July 1950-July 1953). With only 5 exceptions, electronics companies have advanced their ranking—are higher-up on new list than on old one. Post-Korean list also shows effects of curtailment of procurement and cancellation of contracts since cease-fire. Cutbacks resulted in elimination of 45 companies from "top 100" category, including General Motors, which has been No. 1 on all previous lists.

These electronics companies have dropped from the "top 100" list since Korean truce: Westinghouse, 14th largest contractor of Korea war period, had cancellations which exceeded new awards by \$255,900,000 during July 1953-Dec. 1954 period; Collins Radio (41st on Korea war period list) had post-Korea contracts totaling \$9,400,000, not enough to place it in top 100; Remington Rand (formerly 63rd), totaling \$6,000,000 post-Korea; Stewart-Warner (formerly 88th), \$600,000. These figures are net values of prime contracts after cancellations; most companies have substantial subcontracts in addition.

Importance of aircraft-guided missile program is indicated by fact that 9 of the top 10 companies on new list are airframe makers, who make widescale use of electronics companies for subcontracts; No. 10 is Hughes Tool Co., parent of electronics-manufacturing Hughes Aircraft. United Aircraft, with \$1,061,400,000 in prime contracts, is No. 1 on list. General Dynamics (Convair, Electronic Boat), which recently made deal to acquire Stromberg-Carlson (Vol. 11:18) is No. 6 with \$597,000,000.

Many electronic items, of course, are made by the big "non-electronic" companies on the list, and much electronics procurement is represented by big aircraft companies with gigantic electronic subcontracting programs. Many companies identified with electronics also make non-electronic items for the military.

Here's how electronics and related firms stacked up in the top 100 for post-Korea period July 1953-Dec. 1954. Table below shows their position, on latest list, dollar volume of their prime contracts during that period, their percentage of total military contracts for the period, and, for comparison, their ranking during the Korean war period July 1950-July 1953:

Company (Including Subsidiaries)	Ranking (Post- Korea)	Prime Contracts (Post- Korea)	Share of Total	Ranking (Korea Period)
Hughes Tool Co.....	10	\$313,300,000	1.9%	25
AT&T	12	263,500,000	1.6	13
Bendix Aviation Corp.....	13	214,700,000	1.3	17
General Electric	14	213,300,000	1.3	3
Sperry Corp.	17	165,200,000	1.0	18
IT&T	23	95,600,000	0.6	33
IBM	24	94,200,000	0.6	44
RCA	26	75,800,000	0.5	22
Avco Mfg. Corp.....	29	66,600,000	0.4	29
Philco	30	65,500,000	0.4	40
Raytheon	37	50,700,000	0.3	42
Thompson Products	41	42,800,000	0.3	—
Sylvania	47	35,800,000	0.2	74
Reeves-Ely Labs.	52	32,500,000	0.2	—
Hazeltine Corp.	55	31,500,000	0.2	69
Motorola	57	30,400,000	0.2	91
General Precision Equip.....	62	27,600,000	0.2	—
Bill Jack Scientific Instr.....	69	24,100,000	0.1	—
Gilfillan Bros.	74	22,200,000	0.1	84
Elgin National Watch	75	22,000,000	0.1	—
American Bosch Arma	88	16,900,000	0.1	66
Belock Instrument Corp.....	95	15,300,000	0.1	—
Admiral Corp.	98	14,700,000	0.1	83

Automation: Study titled *Production Control Through Electronic Data Processing: A Case Study*, prepared for non-technical management personnel, now available as Report PB-111580 from Office of Technical Services, Dept. of Commerce, Washington (\$1.50).

Statistics and predictions about transistors, as gathered by *Wall Street Journal* for survey covered in lead story May 24: Manufacturers—about 18. Production—4,000,000 during 1948-54 development period; 2,250,000 in 1955 at \$6,000,000; more transistors than vacuum tubes by early 1960's. Price—RCA's average about \$2.50, compared with \$13.40-\$23 in May 1953; average manufacturers price probably in \$2.50-\$4 range, compared with 50-75¢ for tubes; more big price reductions seen this year, with GE predicting \$1-\$1.50 by 1957, same price as tubes or less by 1960-63. Development expenses—at least \$100,000,000 so far, most manufacturers now hoping to begin getting some of that development & research money back in transistor sales; Raytheon says its transistor operation is now in the black. Biggest use today: hearing aids.

High-frequency transistors suitable for TV, radar and shortwave radio have been developed in GE Research Lab, v.p.-research director Dr. C. G. Suits revealed at May 27 dedication of new GE Stanford Microwave Laboratory, Palo Alto, Cal. He said new "meltback" process which improves control of impurities in germanium or silicon crystals makes possible high-frequency transistors with current amplification of from several hundred to over 1000. Meltback principle was developed by GE scientist Dr. Robert N. Hall, who also developed GE's "rate-growing" process for making junction transistors.

Transistorized gadgets demonstrated by Motorola v.p. Daniel E. Noble to dramatize potentialities of semi-conductors in address to Assn. of American Railroads in San Francisco: "Radio pocket clock," containing 6-transistor receiver circuit tuned to Naval Observatory, giving correct time every hour; "electronic golf ball," equipped with built-in miniature transmitter and batteries, which transmits signal strong enough to be picked up by portable radio receiver carried in pocket and used as direction finder to locate lost ball.

Electronic self-sufficiency: Nearly 90% of last year's Canadian Govt. orders for electronics & communications equipment were placed with Canadian firms, as opposed to about 75% in previous years, Deputy Defense Production Minister D. A. Golden told Canadian RTMA annual meeting June 2 at Niagara Falls.

Magnavox reports \$5,900,000 in new contracts by its industrial & defense div., backlog for radio compasses, airborne receivers, other electronic items totaling \$22,500,000.

Another electronic acquisition: Hall-Scott Motors Co., Berkeley, Cal., announced in ad in June 2 *Wall Street Journal* its purchase of Bardwell & McAlister, military electronics engineering & research firm.

"An accurate clock on the brain of man" is how Dr. Norbert Wiener, MIT mathematics professor, describes electronic computer for analyzing brain waves which he's currently testing.

Photo-transistors are replacing photocells atop 8400 street lamps in Manhattan and Bronx. They automatically switch lamps on & off.

Elsin Electronics Corp., Brooklyn (Edgar Scillitoe, pres.), maker of automatic direction finders, electronically-controlled garage doors, automatic typesetting machine and other devices, recently marketed 140,000 shares of common at \$2 per share through Standard Investing Corp. & Baruch Brothers & Co., N. Y. These are in addition to 251,569 shares presently outstanding and 50,000 reserved for issuance of warrants. Firm's total assets are stated in prospectus as \$199,393, current liabilities \$77,636. For year ended July 31, 1954 its sales totaled \$403,476 and loss was \$19,808 vs. sales of \$455,734 and profit of \$40,175 in preceding year. For 5 months ended Dec. 31, sales were \$65,855, profit \$2055.

AIR FORCE POLICY towards electronics industry's place in weapon-system procurement (Vol. 11:7, 17, 21), as enunciated in June 1 address to Washington chapter of Armed Forces Communications & Electronics Assn. by Brig. Gen. T. P. Gerrity, materiel headquarters director of procurement & production:

"There has been much concern voiced since our announcement of the weapon-system concept that such a policy will allow the weapon-system contractor to establish control over the development and procurement of equipment, thus providing himself with the opportunity to get into this business. It is not the intent of our weapon-system concept to engender such actions; in fact, the Air Force does not encourage or condone entry into development and production of parts or sub-systems by other than the established industry which normally provides such equipment."

Govt. wants to make widest use of electronics industry in subcontract function, he said, in order to: (1) take advantage of industry's know-how and special skills; (2) promote healthy industry, ready to meet any emergency; (3) foster competition, making available best quality items at lowest cost.

He said Air Force is taking these measures to back up this policy: (1) Prime contractors will be required to establish their own small business program to insure maximum subcontracting to smaller firms. (2) Weapons system contracts specifically preclude any increase in "normal manufacturing function" of prime contractor. (3) To maintain "broad mobilization base," prime contractors are encouraged to subcontract as much as possible, with Air Force approving price differential, in extreme cases, to maintain widest possible base. (4) Govt. has developed "standards program," which discourages use of specialized components, encourages maximum standardization on already available items.

Gen. Gerrity warned electronics manufacturers that Air Force procurement will continue to be well below capacity of industry. "You may expect to live in a very competitive environment," he said. "The Air Force as a customer will take full advantage of this competitive environment to obtain top quality products at the lowest prices. The contractors who cannot meet these conditions will have tough sledding."

Walter W. Slocum, pres. of W. W. Slocum & Co. industrial engineers, named asst. to pres. Thomas Roy Jones of Daystrom Inc., Elizabeth, N. J., succeeding Robert Erickson who becomes pres. of Daystrom subsidiary Heath Co., Benton Harbor, Mich.

T. I. Phillips, ex-Westinghouse v.p. in charge of manufacturing, and v.p. J. M. Thompson elected to board of Canadian Westinghouse, whose pres.-chairman is now H. H. Rogge, who succeeded H. A. Cooch, retired.

George E. Probst, ex-director of U of Chicago Round Table radio program, succeeds Adm. Harold G. Bowen, USN Ret., as exec. director of Thomas Alva Edison Foundation Inc., 8 W. 40th St., N. Y.

Dr. E. R. Piore, recently chief scientist and deputy chief of Office of Naval Research, joins Avco as v.p. & chairman of committee on advanced scientific research.

Dr. James W. Ballard, ex-chief of U. S. Bureau of Mines X-ray & spectroscopic lab., named asst. director of research, Electronics Corp. of America, Cambridge, Mass.

Raytheon elects Robert Cutler, pres. of Old Colony Trust Co., Boston, recently special asst. to President Eisenhower, as a director.

International Resistance Co. interim report for 15 weeks to April 17 shows total income of \$4,199,989 vs. \$3,609,387 for comparable 1954 period; net profit \$199,457 (\$.148) vs. \$69,378 (5¢). Figures do not include Hycor companies acquired in March whose sales exceeded \$800,000 in last fiscal year. Shares outstanding increased from 1,331,163 to 1,342,598 because Hycor was partially paid for with IRC stock.

Cornell-Dubilier earned \$1,036,649 (\$1.96 a share) on sales of \$19,026,350 in 6 months ended March 31, compared to \$847,953 (\$1.59) on \$21,564,445 in corresponding period of preceding fiscal year. Pres. Octave Blake attributed higher earnings to increased efficiency & improved production methods, lower volume to competitive conditions.

Walt Disney Productions earned \$430,048 (66¢ per share) on gross income of \$9,876,175 in 6 months ended April 2, compared to \$283,662 (43¢) on \$4,331,827 in corresponding period of preceding fiscal year. Pres. Roy O. Disney commented that TV had proved powerful factor in exploitation & marketing of company's motion pictures.

Daystrom Inc., which recently merged with Weston, has arranged for \$7,000,000 long-term loan from Chase Manhattan, Fidelity Union Trust Co. and National Newark & Essex Banking Co., Newark.

GE maintains pace: Sales for first 4 months of 1955, reports pres. Ralph J. Cordiner, indicate 1955 volume equalling record \$3,100,000,000 of 1953.

Skiatron Electronics & Television Corp. admitted to trading in American Stock Exchange June 1; opening sale was 500 shares at 8. It closed June 3 at 7¼.

Expansion: Textron American Inc.'s electronics subsidiary, Dalmo Victor Co., to build \$1,200,000 plant at Belmont, Cal., slated for completion in summer 1956.

Dividends: Admiral Corp., 25¢ payable June 30 to stockholders of record June 15; Hoffman Electronics, 25¢ June 30 to holders June 15; Canadian Westinghouse, 50¢ July 4 to holders June 15; Decca Records, 17½¢ June 30 to holders June 16; WJR The Goodwill Station, 10¢ June 20 to holders June 10.

Color, satellites and microwaves: Agenda of TV-radio committee of AIEE meeting at New Ocean House, Swampscott, Mass. June 27-July 1, as reported by chairman Joseph B. Epperson, Scripps-Howard chief engineer: Color—networking, by John Thorpe, AT&T; film, by E. M. Gore, RCA, and R. E. Putnam, GE; projection receiver, by W. F. Bailey, R. P. Burr & R. J. Keogh, Hazeltine. Satellites—uhf booster, by Jesse Epstein, Wendell O. Morrison & O. M. Woodward Jr., RCA Labs; low-powered uhf, by John B. Grund, Sylvania. Microwaves—by R. G. McLaughlin, Raytheon.

First station to use RCA's new "color-effects" equipment (Vol. 11:21) was NBC's WNBK, Cleveland, which colorcast ID with new gear May 22 preceding color spectacular. As demonstrated at NARTB convention, results were quite effective, producing 12 two-color combinations by push-button control. RCA engineers stressed that equipment is part of that needed when stations eventually go to regular color originations—thus requiring no extra expenditures. It includes colorplexer, color-bar generator, color frequency standard and burst flag generator.

Raytheon introduced its 11-kw ERP 6000-mc microwave equipment, successor to 1-kw series, at NARTB convention, noting that it handles both color and monochrome. Also shown was new 13,000-mc microwave, plus newly offered studio color monitor. Conversion to color of old Raytheon microwave gear, of which some 100 units are in use, will be undertaken by company at less than cost—\$350 plus transportation.

Network TV-Radio Billings

April 1955 and January-April 1955

(For March report see *Television Digest*, Vol. 11:19)

NETWORK TV billings slipped slightly in April, all networks showing small declines from March but all save DuMont well ahead of April 1954, according to Publishers Information Bureau report. For first 4 months of year, network TV runs \$132,018,673 vs. \$99,555,185 for same 1954 period. Network radio in April also fell from March total and continues to run far behind April 1954; for Jan.-April period, 1955 total is \$42,153,922 vs. \$51,652,729 in same 1954 period. The PIB figures:

NETWORK TELEVISION

	April 1955	April 1954	Jan.-April 1955	Jan.-April 1954
CBS	\$15,463,359	\$10,921,640	\$62,026,122	\$42,980,081

* In order to maintain continuity and comparability with previously published data, an adjustment factor of 1.817 has been used by PIB in calculating gross network radio time charges for those nighttime network radio programs where ABC Rate Card No. 6 was in effect.

† Revised as of June 2, 1955.

Note: These figures do not represent actual revenues to the networks, which do not divulge their actual net dollar incomes. They're compiled by Publishers' Information Bureau on basis of one-time network rates, or before frequency or cash discounts, so in terms of dollars actually paid may be inflated by as much as 40%. However, they're generally accepted in the trade as an index.

Kingsley Murphy family will pay \$380,000 to exercise option for 40% of Cowles' upcoming KRNT-TV, Des Moines (Ch. 8), due on air June 20, according to terms for setting up new KRNT-TV Co., which got FCC approval this week. Murphy family is to pay \$80,000 for stock, plus assumption of \$300,000 note for station construction, while Kingsley Murphy Jr. & attorney Benito Gaguine are to be named v.p.'s, each getting \$500 a month. Murphy family is also selling radio KSO (5-kw, 1460 kc, ABC) & KSO-FM for \$125,000 to Lyman S. Ayers group, operators of WXLW, Indianapolis, Ind.

Richmond's pre-freeze WTVR (Ch. 6) became ABC & CBS outlet June 1 when affiliation with NBC ended—and owner Wilbur Havens took page ads in local newspapers to tell public that in 1954, at NBC compensation of \$166.36 per hour, WTVR lost \$118.16 on every hour of NBC commercial programs it carried. Network has stated it has had trouble clearing time on Havens' stations, hence terminated contract in favor of new affiliation with Tom Tinsley's upcoming WXEX-TV (Ch. 8), due on air next month.

NARTB 1956 convention site will be Chicago's Conrad Hilton Hotel, April 15-19. It has taken option on same hotel for 1957.

CONSENSUS ON REPEATS of hit live programs (Vol. 11:17-21), among top network and agency executives, seems to point clearly in favor of more of them—if carefully selected. This week, we have comments from 2 more highly-placed people—CBS-TV pres. Jack Van Volkenburg and veteran TV producer Worthington (Tony) Miner. Here's Van Volkenburg's view:

"I agree with you that with many of the really outstanding dramatic shows, repeat performances where possible should be scheduled. There is no money to be saved, of course. However, that should not be a factor. Occasionally, we would run into a situation where we would only be able to purchase one-time broadcast rights. However, this would be the occasional situation rather than regular.

"I think you will see in our schedule this coming season an occasional live repeat of an outstanding dramatic performance."

Miner analyzes idea this way: "A sponsor quite naturally hesitates to pick up the total expense of a new production for a repeat that may capture a considerably reduced audience. Despite this hesitancy, hour-long dramatic shows have been repeated considerably more often than people seem to realize—and from the earliest days . . . The question appears to be more a matter of determining how frequently and how soon a show should be repeated, rather than whether a show should be repeated at all.

"Personally, I am in favor of repeats. I believe that a fine show is a genuine asset to a series, and can be repeated again and again, provided the time intervals between the first showing and the repeat are adequately separated. The immediate repeat of a show like 'Patterns' is a unique example, and in no way affects a general policy. It would seem to me that the producer of each series should determine his own policy extending over a number of years. In this way, and without loss of audience, the really fine productions on TV could become a heritage of the industry as a whole."

Meanwhile, Nielsen reports "Patterns" repeat reached 8,755,000 homes vs. 8,725,000 for first showing. And Kraft, which sponsored the re-run, is so interested in technique that it will do similar job on "Hard to Get," starring Gizele MacKenzie. It was carried first May 12, will be repeated June 9. A spokesman for Young & Rubicam, Kraft's agency, gave as reason: "There was a lot of reaction to the play and its rating was quite good."

Two uhf applications were filed this week with FCC: For Roanoke, Ind., Ch. 21 (allocated to Huntington), Sarkes Tarzian Inc., electronics manufacturer and operator of Bloomington's WTTV & WTTS; for Orlando, Fla., Ch. 18, by WABR, Winter Park. Applications now on file total 152 (17 uhf). [For details, see *TV Addenda 20-U* herewith; for complete listings of all grants, new stations, applications, etc., see *TV Factbook No. 20* with Addenda to date.]

First rates for off-air microwave service were filed with FCC this week by AT&T. It proposes to charge \$4640 monthly for bringing signals of WDAY-TV, Fargo, N. D. to KFYZ-TV, Bismarck over 180-mi. route. In addition, it will charge \$81,865 to be paid off in 3 years. In rule-making pending before Commission, telecasters are arguing that they can supply such service themselves more cheaply than AT&T can.

Senate has restored the \$8,000,000 sliced by House off USIA's proposed \$88,350,000 budget, which includes not only Voice of America but plans for expanded TV operations (Vol. 11:10)—and prospects for full go-ahead for Theo. Streibert's organization look good.

SUMMARY-INDEX OF THE WEEK'S NEWS—June 11, 1955

SUBSCRIPTION TV COMMENTS contain brilliant analyses, and put focus on Congress, "tests", demand for oral hearing, danger to free TV (p. 1 & Special Digest).

SENATE INVESTIGATORS' top-priority projects: excise tax relief and engineering study of allocation plan. Uhf group asks freeze, selective deintermixture (p. 3).

COMMUNITY ANTENNA operators' convention encouraged by Comr. Doerfer; business good but satellites, boosters & low-power stations cause concern (p. 5).

ELECTRONICAM CLICKS, says DuMont, pointing to 50% cost reduction in film production & naming Caddigan mgr. of marketing setup for new filming system (p. 7).

TINKERTOY TV SET due from Emerson early next year; CBS-Columbia & Capehart also work on modular designs; RCA, Zenith show lines (p. 10).

APPLIANCE TRANS-SHIPING is sanctioned by Justice Dept. anti-trust chief, though trade generally regards it as competitive evil (p. 13).

DIVERSIFICATION again featured in decisions, Wichita TV getting final award of Ch. 3, Mid-West TV favored by examiner for Indianapolis' Ch. 13 (p. 4).

COURT SLAPS FCC in old Clarksburg case; Flint's WJRT delayed again; CBS abandons plan to buy Steubenville outlet (p. 4). Notes on upcoming stations (p. 9).

With This Issue: Summaries of Comments on Subscription TV Filed This Week With the FCC (4-p. "Special Digest")

'THE TOLLVISION WAR'—AT DEADLINE: Verbal warfare over subscription TV entered an important phase this week as major and minor combatants filed formal comments with FCC -- but it's by no means the final or most important phase. Chances are future battles will make this week's legalistic give-&-take look like a mere skirmish.

All the 30-odd filings, some extremely voluminous, some revealing penetrating research effort, are digested in a Special Supplement herewith. We've studied them all, to the extent that time permitted, and the conflict -- stripped of all hokum and publicity motives -- appears to resolve itself into several major issues:

- (1) Should Congress, not FCC, make the decision?
- (2) Should "tests" be authorized?
- (3) Should a hearing -- full, oral evidentiary -- be conducted?

These questions are in addition, of course, to the overriding question: "Will subscription TV add to or subtract from today's free system?"

* * * *

Proponents and opponents are lined up officially now, and they're a motley group -- "biggs" and "littles" on both sides, motives obvious. If Congress grabs the ball from FCC's hands, or gets it on a forward pass from FCC, it means long delays and probably the ultimate rejection of subscription TV.

For with all the buildup and fanfare, any Congressional candidate worth his political salt can get a lot of campaign mileage out of vowing to the public that he will keep TV free. There are very few votes in any promise to charge the public for its TV programs -- and the simple fact is that there isn't the popular clamor for "reform" of TV that arose during the early days of commercial radio.

The idea of a commercial "test" could prove to be the most crucial issue of all -- and opponents devoted some of their most strenuous arguments to point out the "fallacies" and "dangers" of any such experiments.

Demand by the opponents for an oral hearing is bound to precipitate a nasty fight, for the proponents know full well how that sort of thing can drag into years -- having fresh in mind the protracted allocation and color hearings.

We've appended street addresses of principals and counsel to the digests of their comments in the Special Supplement herewith, and we urge you to ask them for

copies which most of them told us they're prepared to supply -- for we've never before seen such truly brilliant analyses of what TV is under a free system and what it might be under fee TV. In the scant 10 years of TV's life, no one has ever devoted such skill & knowledge to evaluation of its economic, artistic & social aspects.

A study of the comments shows that much of the argument to date had been superficial indeed -- proponents promising pie-in-the-sky, opponents relying on flat assertion that toll TV will kill free TV.

The care and intensity manifested in the briefs make certain that FCC consideration of the issue can scarcely be less exhaustive -- reemphasizing our repeated predictions that final disposition is a very long way off. Moreover, the extensive attention to legal aspects points plainly to ultimate court appeals by whoever loses.

* * * *

The anti-fee forces have been striking telling blows, it's apparent, in their cry that the prime result of fee TV would be to make the public pay for what it now gets free -- for Zenith's comments ask Commission to prohibit networks from charging for programs now paid for by advertisers and to prohibit stations from carrying fee TV programs more than 15% of the time.

Concept of a "free enterprise" experiment, on the other hand, has opponents issuing dire warnings that a test dare not be tried while at the same time urging that other tryout techniques are available which won't jeopardize free TV. Wired system is most frequently suggested as the proper arena for tests. Opponents like NARTB, CBS and theatre-sparked Joint Committee on Toll TV say they have no objections to subscription TV via cable.

Accepting this premise, the largest manufacturer of wired systems for community antenna services, Jerrold, told Commission it's ready, willing and able to supply already-operating systems with "home hookups" for the tests.

Jerrold also stated, however, that the whole foundation of subscription TV -- the scrambling and unscrambling technique -- is fallacious because any broadcast code can readily be broken and the shows "bootlegged", whereas a wired system is secure. Jerrold's claim is that major cities can be wired up for same cost that decoders can be installed for a broadcast system; its pres. Milton Shapp challenged Zenith to supply him with 2 decoders and he would break any scrambled telecast Zenith devises.

The wire-system appeared to appeal even to one of pay-TV's proponents, Paramount Pictures' International Telemeter, whose pres. Barney Balaban and v.p. Paul Raibourn told us they've been urged to try the cable by several interested groups and will do so if satisfied that the economics are right.

* * * *

Movie tycoon Balaban tangled with RCA-NBC Chairman Sarnoff this week, blasting latter's assertions that pay-TV would turn TV into a Hollywood "cash box" (Vol. 11:23). Insisting toll TV is "inevitable", Balaban said:

"One gets a little weary of these pious declarations about the motion picture companies in their relation to TV. No one has a patent on how to make motion pictures. Anyone can make a motion picture who has the talent and money to do so. There is nothing to prevent NBC, or any of the other networks, from investing in quality production motion pictures as we do in our business."

Telemeter came up with novel idea of multiplexing what it calls "marquee" -- technique of displaying to viewers a description of what they're missing at same time scrambled picture is being telecast, all on one channel. At first blush, it was thought Telemeter had devised multiplexing system which could be used to present subscription TV as a true supplement to the existing free system. However, Telemeter engineers stated that multiplexed picture would be "degraded", though it was thought that 2 acceptable pictures might some day be transmitted on the same channel. Raibourn, himself an engineer, suggested this might take 5 years to achieve.

* * * *

Zenith pres. E.F. McDonald also took crack at Sarnoff this week, alleging RCA had sought to buy Phonevision patents 3 times in recent years. Gen. Sarnoff termed charge "utterly false", whereupon McDonald offered to testify about it "under oath".

"The battle of press releases" having gone to higher levels, the chips down, it can be expected that the TV medium will itself be used more freely henceforth to argue the fee-TV subject -- that is, if popular interest doesn't flag.

Another TV debate on the subject is scheduled by CBS-TV -- on Ed Murrow's "See It Now" Tue., June 14, 10:30-11 p.m. EDT. Participants pro will be Skiatron counsel James M. Landis, Brooklyn Dodgers pres. Walter O'Malley, playwright Robert Sherwood. Arguing anti will be CBS pres. Frank Stanton, theatre committee co-chairman Alfred Starr, station mgr. P.A. Sugg, WKY-TV, Oklahoma City.

If the previous TV debates are criterion, public's reaction to pay TV will be generally adverse -- evidenced by fact that tide of letters to FCC turned from pro to con immediately after one such recent debate on NBC-TV. Antagonists were Zenith's H.C. Bonfig (now with CBS) with Cornelia Otis Skinner and Mr. Starr with actress Faye Emerson.

Heavy numerical lead of pro-fee TV letters in FCC files, initiated by Zenith publicity campaign, has probably been overcome by now (Vol. 11:23). Total is now somewhere around 20,000 letters, including results of poll conducted by Newsday, Long Island daily, which reported 5036 anti-pay-as-you-see, only 192 pro.

Next official deadline is July 11, when parties are to reply to one another's comments as filed this week. It's certain some participants will ask for extension because of the great volume of material for study -- and, it being summertime, the chances of extension are considered strong.

SOUND & FURY ON THE ALLOCATION FRONT: The first anniversary of the Potter hearings on uhf finds the air full of "proposals", "plans" and talk of "investigations" aimed at helping uhf in one way or another -- and they all have a familiar ring. Potter subcommittee never made a final report, and none of the "strong measures" suggested have been adopted. One year and millions of words later, outlook is the same.

The continuing TV investigation by Sen. Magnuson's Commerce Committee, under the guidance of chief counsel Sidney Davis, has assigned top priority to 2 projects, both outgrowths of measures once proposed by Potter subcommittee:

(1) All-out drive to eliminate price differential on all-channel sets by exempting them from 10% Federal excise tax. Magnuson already has written letter to economy-minded Chairman Byrd (D-Va.) of Finance Committee, and there's talk of joint meeting of Commerce & Finance committees to discuss plan. Davis feels the measure still has "fighting chance" -- despite Administration's opposition to all tax bills this session. In the House, Ikard tax-exemption bill (HR-4070) is stalled, but proponents will make effort in next 2 weeks to get Ways & Means Committee commitment.

(2) Ad hoc committee of leading engineers, to take another look at allocation plan (Vol. 11:23). RETMA, NARTB, FCC, UHF Industry Coordinating Committee, networks have been asked to suggest members. They're due to be announced in about 2 weeks. Reports that committee's principal function will be to squeeze in as many more vhf channels as possible were strongly denied this week by Davis. He said the committee will be told to approach entire question with open mind.

Davis believes in go-slow policy, and says he won't be pushed into "premature hearings." Best guess still is that the all-encompassing TV hearings won't begin until next fall at earliest, perhaps even next winter.

* * * *

Another ad hoc committee -- plus a freeze and selective deintermixture -- was proposed to FCC this week by group of uhf telecasters. UHF Industry Coordinating Committee, headed by Harold Thoms and Fred Weber, forwarded to the FCC the proposal adopted by representatives of some 45 stations 2 weeks ago (Vol. 11:22). Group has an appointment June 21 to discuss plan with FCC. The 3-part proposal:

(1) Freeze for at least 90 days all TV authorizations and modifications "which will result in aggravation of intermixture of uhf & vhf stations." (2) Establish an ad hoc committee, which will act during freeze to set up new standards "for determining objectionable interference," to serve as basis for new rules permitting drop-ins of new vhf assignments, on case-to-case basis, presumably through use of direc-

tional antennas, low power, etc. (3) Commission would resolve all pending proposals for area deintermixture during same freeze.

FCC's "test cases" on selective deintermixture (Vol. 11:14) have been slated for hearing June 27-28. They involve substitution of uhf for single commercial vhf channels in Peoria, Ill.; Madison, Wis.; Evansville, Ind.; Hartford, Conn.

FCC this week served notice it will discontinue its policy of extending CPs of uhf grantees on purely economic grounds. It gave 12 uhf CP-holders until Jan 16 to get started, and announced that no CPs would be extended beyond that date unless grantees give evidence of definite plans for actual construction and operation.

* * * *

Senate this week passed FCC budget appropriation, which includes \$80,000 for study of networks (Vol. 11:22-23). Already approved by House, measure now goes to conference committee to iron out minor differences between Senate & House versions.

Sen. Magnuson explained the study in response to question in Senate by Sen. Langer (R-N.D.) of Judiciary Committee: "The [\$80,000] is for the purpose of permitting the FCC to make a factual study and investigation of the networks and their contractual relations with their affiliates...A year will be required to obtain the factual data. The Commission does not intend to duplicate any work which the [Senate Commerce Committee] inquiry may have done, or to overlap the inquiry as to monopolies which the Committee on the Judiciary is making."

Nobody expects strong medicine to come out of FCC's investigation. As Chairman McConnaughey put it, in recent address to CBS-TV affiliate conference: "I think that the Commission should know more about the networks from the standpoint of what makes them tick. I think that possibly the networks would welcome such a study. But to me, there is a vast difference between making a study and coming out and starting to criticize everything... A study, yes; an intelligent appraisal, yes; but to come out and make wild suggestions and wild accusations [is] a very dangerous thing when you are dealing with possibly the most sensitive industry in the American economy."

FINAL DECISION in old Wichita Ch. 3 case—which started Oct. 20, 1952—gives CP to non-radio Wichita TV Corp. (George M. Brown, pres.). Satellite CP for Ch. 4 in Roseburg, Ore. (to owners of KVAL-TV, Eugene) was only other grant issued by FCC in week that also produced initial decision proposing Ch. 13 grant in Indianapolis to Mid-West TV Corp.

Wichita case was close—a 3-2 decision, with Comrs. Lee & McConnaughey dissenting, Hyde & Doerfer not participating. Commission picked Wichita TV for its program proposals, plans of owners to participate in operations, local residence and diversification. It owns no communications media, whereas competitor KFH is part owned by *Wichita Eagle* and KANS principal O. L. Taylor also controls KRGV-TV & KRGV, Weslaco, Tex. Lee wrote dissent, in which McConnaughey concurred, stating he'd pick KFH because of its long and satisfactory radio record and because he felt newspaper ownership should give station a plus rather than a minus.

Examiner Basil P. Cooper chose Mid-West in Indianapolis (banker George Sadlier, pres.)—over WIBC, WIRE & Crosley—because of local ownership, program proposals and fact it owns no TV-radio stations, newspapers or theatres. Cooper was unimpressed with programming record of WIBC, WIRE & Crosley and was particularly critical of fact that WIRE was interlocked with *Indianapolis Star* and *News* (E. F. Pulliam), saying city needs another "voice."

* * * *

Commission got spanked by Court of Appeals this week, in the Clarksburg, W. Va. protest case. FCC had granted Ch. 12 CP for WBLK-TV to Stubblefield publish-

ing family, whereupon *Clarksburg Exponent & Telegram* protested (Vol. 10:13). Commission gave protestant oral argument, but court's Judges Edgerton, Bazelon & Bastian unanimously ruled this week that full hearing should have been granted instead, sent case back.

Meanwhile, Commission granted protests against establishment of WJRT, Flint (Ch. 12) at site near Saginaw, thus further holding up construction of station. Full hearing will begin June 27 on protests of WKNX-TV, Saginaw (Ch. 57), WTOM-TV, Lansing (Ch. 54) & WWTW, Cadillac (Ch. 13).

Sale of WSTV-TV, Steubenville, O. (Ch. 9), to CBS was called off this week—principals recognizing they had little chance of getting FCC to approve move of station to Pittsburgh. It remains CBS-TV affiliate.

Another uhf seeking vhf channel was WKLO-TV, Louisville (Ch. 21), which asked that Ch. 7, 9 & 13 be added to Louisville, taking them from Bowling Green, Ky., Evansville & Hatfield, Ind. Station asked that it be shifted to Ch. 7, WQXL-TV to Ch. 13, leaving Ch. 9 for educators.

Commission finalized addition of Ch. 16 to Pittsburgh, Cal., substitution of Ch. 15 for Ch. 16 in Red Bluff, Cal., Ch. 56 for Ch. 16 in Santa Cruz, Cal.

Chairman McConnaughey, planning to leave for Europe July 22, and with Commission scheduling no action on major matters during Aug., is pressuring staff and colleagues to get out as much work as possible now—particularly on such issues as deintermixture (see p. 3). Evacuation of key govt. officials in civil defense test June 13 may put crimp in Commission output next week.

Richard A. Mack's nomination to FCC to succeed Comr. Hennock June 30 (Vol. 11:19,22) is scheduled for hearing by Senate Commerce Committee June 16 at 10 a.m.; quick approval is expected.

COMMUNITY SYSTEMS—PROSPECTS & PROBLEMS: A professional atmosphere pervaded this week's convention of National Community TV Assn. in New York's Park Sheraton -- in marked contrast with previous meetings of the not-much-publicized community antenna operators. For in last few years these enterprisers, usually small and local, have burgeoned from a group with no true industry spirit or national awareness into a cohesive and self-assured organization comparable with old-line trade associations.

Some 450 attended convention and 18 exhibitors displayed equipment. Beset with uncertainties, but flourishing nonetheless, operators were pleased with address by FCC Comr. John C. Doerfer, who congratulated them on their enterprise, expressed optimism for the future, and showed strong aversion to applying the iron hand of Federal regulation to the conduct of their business.

During 1948-1952 TV freeze, shadow of prospective new stations hung over the operators, but worries were unjustified. Now, it's boosters, satellites and low-powered stations that pose the threat.

Some of the "gold rush" aspects of the business have disappeared, and sudden discoveries of backyard bonanzas are now quite rare. Rather, well-informed capital is roaming the country, beefing up old systems, exploring markets previously thought to be too well served with free signals to be profitable, and investing in expensive microwaves in order to penetrate previously inaccessible communities.

(For details of convention activities, see below.)

COMMUNITY ANTENNA operators' greatest concern is over prospects of competition from satellites, boosters and low-power stations of all kinds (Vol. 11:23). These provided subject for liveliest session of NCTA convention in New York this week.

With FCC certain to authorize them in one form or another and with manufacturers prepared to deliver telecasting equipment at lower and lower costs, the concern appears justified. Furthermore, Sen. Magnuson (D-Wash.), whose state is loaded with illegal boosters which have given community operators serious competition, is putting tremendous pressure on FCC to legalize the boosters—fast. On June 3, he wrote FCC Chairman McConnaughey telling him to get going, offering to sponsor new laws if necessary.

Participating in panel discussion on low-power TV stations at convention were NCTA pres. Martin F. Malarkey, NCTA exec. secy. E. Stratford Smith, Entron pres. H. M. Diambra, Jerrold pres. Milton J. Shapp, Spencer-Kennedy pres. Fitzroy Kennedy.

Theme of discussion: Low-power TV outlets in most small towns probably aren't economically feasible, but if they are, they still won't kill off community operators who can add more and more choices of signals—3, 5, 7 or even more—to retain customers.

They weren't so concerned with "normal" satellites as they were with those proposing to transmit several signals simultaneously—as outlined by applicant for experimental station in Clarkston, Wash., planning to retransmit 3 Spokane signals on 3 uhf channels (Vol. 11:23). Said Shapp: "We must take issue forcibly with this type. It's a change from the traditional FCC pattern." Smith noted that FCC has strict rules against permitting one station to occupy more than one channel in a town, and he recommended FCC be asked to make policy clear and stable so that system operators could plan accordingly. He suggested that rule-making should be undertaken by Commission before any such grants are made.

Panelists thought low-power operations could scarcely be profitable in towns up to 25,000 or so but might go over in larger cities. Malarkey, who hails from Pottsville, Pa., said that metropolitan station operators told him they

couldn't envision profitable satellite operation because they could scarcely increase rates for the relatively small increase in circulation. It was noted, however, that if one big-city station seeks satellite, his competitors are forced to do likewise—even though economics may not be favorable—as happened in Walla Walla, Wash.

Leon Papernow, once part owner of KFSD-TV, San Diego, told group that they should be checking sentiment of small-town AM operators to determine low-power station possibilities, and he pointed out that manufacturers at recent NARTB convention would even lease complete equipment for some \$50 a day (Vol. 11:22). He warned that potential among small AM operators might be very great, as indicated by Sylvania surveys (Vol. 11:22).

Certain to be watched closely as possible clue to small-town TV economics is novel "Commprovision" system (Vol. 11:8) which started May 27 in Douglas, Ariz. Town is too far from stations to get signals for community system, so group known as Trans-Community TV Network, 141 El Camino Dr., Beverly Hills, Cal. (Jerome L. Doff, pres.), is feeding kines & films to wired system, interspersing local live, film & slide commercials.

Organization advertises it's operating 3-10 p.m. daily, offering *You Bet Your Life, Hit Parade, Comedy Hour; Kraft Theatre, Robert Montgomery Presents, Mr. Peepers, Tennessee Ernie*, etc. Most programs are NBC, but other networks' shows are also said to be on tap. Company has invested heavily in RCA equipment, including mobile unit for live man-on-the-street pickups, etc. It's claimed that merchants are clamoring to place spots and that operators expect to achieve profit when only 1000 homes are wired.

Entrepreneurs haven't yet fixed cost to subscriber, but it's expected to be somewhere in range now charged by regular community operators—\$125-\$150 for initial connection, \$3-\$7 monthly fee.

If Trans-Community does prove profitable, it will undoubtedly invite competition from low-power station offering free signals, once low-power rules are adopted—because vhf channels are plentiful in area, Ch. 3 already allocated but unapplied-for in Douglas, and station probably could be built and operated for no more than a wired system.

* * * *

Interest in microwaves to serve community systems was intense. FCC common carrier expert Arthur Gladstone outlined Commission policy: qualified groups can

obtain permission to operate microwaves for systems but can't own the systems they serve. Two such microwaves have been granted—one to serve Poplar Bluff, Mo. area (but never built), other to serve systems in Richland and Kennewick-Pasco, Wash. (granted May 25). Like hinterland TV station operators, owners of systems feel that AT&T service is unnecessarily costly.

Another industry problem is "property rights," i.e., systems' right to relay signals of stations. Most stations are delighted with added circulation produced by systems, but a few have sought to keep their signals off systems. Wm. Grove's KFBC-TV, Cheyenne, Wyo. has ordered operator in Laramie not to carry its signal, but Laramie operator continues to carry it, asserting that his system, in principle, is merely an extension of customers' antennas. Ed Craney's KXLTV, Butte, Mont. has given similar orders to operator in Bozeman—and conflict is likely to wind up in court. It was Craney who took famed ASCAP case to U. S. Supreme Court.

Subscription TV is another intriguing subject—for community operators feel they have natural setup for first-run movies, etc., and Jerrold's Shapp asserts that systems can take whole hot potato out of FCC's hands (see p. 1).

State utility regulation isn't quite the bugaboo it used to be. Though operators find little need for such regulation, one operator put it this way: "You don't see the phone or electric companies going broke, do you?" Wyoming is only state actually regulating, though a few others are considering assuming control.

Illustrative of operators' esprit de corps, membership voted unanimously to triple budget to \$50,000 for next year, with dues to be 2½¢ per subscriber per month—some members' dues being increased 9-fold. They reorganized to set up 8 regions, with director for each. Malarkey was reelected pres., this to be his last term; Wm. Daniels, Casper, Wyo., v.p.; Joseph Saricks, Bradford, Pa., secy.; Wm. Calsam, Oneonta, N. Y., treas.

Operators were heartened by speech of FCC Comr. Doerfer, who said: "Community TV today is a \$20,000,000 industry. Approximately 400 companies are bringing a TV service to more than 300,000 subscribers or roughly 1,000,000 viewers. But for your enterprising spirit most of these people would today be without such service. This fact alone is a splendid tribute to your ingenuity and in particular to your initiative. You are to be congratulated."

Outlining legal uncertainties of regulation—lack of final court determination whether systems are broadcasting or common carrier, or whether they come under Federal or state jurisdiction—Doerfer said he preferred states assume regulation, if any governmental entity should. He also said he couldn't see that Govt. should protect broadcasters from systems or vice versa.

As for low-power stations, he stated: "Consideration of the relative cost of construction and operation, number and variety of available programs, fidelity of broadcast signals, their limitation because of encroaching interference and a host of unknown factors inherent in the new proposals to permit so-called boosters, satellites and low-power stations, should give CATV operators some encouragement and comfort . . . Your demonstrated powers of resilience without any governmental help or aid should give your prophets of doom cause for thought."

Sets-in-use totaled 35,809,000 as of May 1, according to NBC research & planning director Hugh M. Beville Jr., up 305,000 from April 1. U. S. Census Bureau this week revealed its June population survey is asking number of homes having TVs, and how many; sampling of about 25,000 families in 230 areas will permit national estimate to be released in Sept. or Oct. Advertising Research Foundation requested survey and is paying for it.

Personal Notes: Harry C. Milholland, DuMont mgr. of technical operations, promoted to director of all engineering activities for broadcast div., succeeding Rodney D. Chipp, now engineering director of DuMont Labs' manufacturing divs.; Eric Herud promoted to asst. mgr. . . . John W. Patt, pres. of WJR, Detroit & upcoming WJRT, Flint, who was stricken with heart attack during NARTB convention (Vol. 11:23) is improving at Georgetown Hospital, Washington, but not yet seeing visitors . . . Bernard J. Prockter, who recently sold out his Prockter TV Enterprises (*Big Story, Treasury Men in Action, Man Behind the Badge*), has joined CBS-TV as a producer; he started out in radio with CBS in 1929, quit in 1941 to join Biow, started own packaging business in 1944 . . . David G. Taft, exec. v.p. of WKRC-TV, Cincinnati, adds title of gen. mgr., taking on duties of U. A. Latham, retired . . . Raymond F. Guy, NBC director of radio frequency engineering and 1950 IRE pres., elected pres. of Radio Pioneers Club . . . W. Robert Rich resigns as program director of WPIX, N. Y., to become gen. sales mgr. of Associated Artists Productions' TV div. . . . Frank G. King, ex-KABC-TV & KTTV, Los Angeles, named gen. sales mgr., KOVR-TV, Stockton, headquartering in San Francisco . . . Joseph E. Lake, ex-WDAF-TV, Kansas City, named commercial mgr. of WFMY-TV, Greensboro, N. C., succeeding Wm. S. Baskerville . . . Edward J. Roth Jr., ex-NBC-TV, named program director of Notre Dame U's upcoming commercial WNDU-TV, Notre Dame-South Bend (Ch. 46), due in July . . . Ray Wilson, KFMB-TV, San Diego, elected chairman of California AP Radio Assn. . . . Chester E. Hagan, asst. mgr. of NBC central news desk, N. Y., shifted to mgr. of news & special events, Chicago; Rex Goad, Washington news editor, to N. Y. as night news room supervisor . . . J. Davis Danforth, BBDO, named TV-radio administration chairman, American Assn. of Adv. Agencies operations committee . . . Willson M. Tuttle, ex-Ruthrauff & Ryan v.p., to Fuller & Smith & Ross, N. Y., in TV management capacity . . . Halsey V. Barrett, ex-DuMont, recently in film syndication, joins TV Bureau of Advertising . . . James F. Brown resigns as national sales mgr., KBTW, Denver . . . Ridley Bell, asst. gen. mgr., promoted to gen. mgr. of WRBL-TV, Columbus, Ga., as Walter Graham is made mgr. of radio WRBL . . . George L. Griesbauer, ex-Raymer, recently sales mgr. of WTTG, Washington, named mgr. of Weed Atlanta office.

* * *

Gordon Gray, chief owner of WSJS-TV & WSJS, Winston-Salem, publisher of both dailies there and currently pres. of U of No. Carolina, was nominated by President Eisenhower June 10 to be Asst. Defense Secretary, succeeding H. Struve Hensel, resigned. He's 46, a Democrat, Yale law graduate, served as Army Secretary under President Truman, was on 3-man board that heard J. Robert Oppenheimer security case.

More honorary degrees: To Dr. Allen B. DuMont, from Fairleigh Dickenson College. To Edward R. Murrow, from Holyoke College. To Gardner Cowles, publisher of *Look* and part owner of TV stations in Des Moines, Minneapolis & Sioux City, from Long Island U. To Mrs. Gardner (Fleur) Cowles, from Elmira College. To James E. Smith, pres. of National Radio Institute, Washington, from George Washington U.

Dr. Allen B. DuMont and family will be "visited" in their Cedar Grove, N. J. mountaintop home by Ed Murrow on his CBS-TV *Person to Person* show Fri., June 17, 10:30-11 p.m.

H. K. Carpenter, 61, broadcasting pioneer, who retired last summer as v.p. of *Cleveland Plain Dealer's* WHK, died suddenly June 2 in Cleveland. Surviving are his widow and 3 daughters.

Telecasting Notes: NBC pres. Pat Weaver, who is generally given the accolade as TV-radio's Great Innovator (*Today, Home, Tonight, spectaculars, Monitor, Wide Wide World*), doesn't do so badly before the camera himself—first evidenced by his easy manner and ready responses on Ted Granik's *Youth Wants to Know* show June 4. The kids ask tough ones, and many a statesman often flounders on that program, but Weaver was always at ease, his replies brief and to the point; he wasn't at all prolix or involved, despite his reputation for memos requiring concentrated re-reading to be understood . . . Weaver likes personal appearances, apparently, for he has agreed to narrate American Petroleum Institute show titled "1976," Sun. Oct. 9, 4:30-5:30 p.m., it being a glimpse into life in this country 21 years hence. He promises it won't be "space ship stuff"; it's his own idea, based on book he has been writing titled *Tomorrow* . . . First-run of new *Horatio Hornblower* feature film with Michael Redgrave may also be carried on NBC next fall as one-shot spectacular, in addition to Korda's *The Constant Husband* (Vol. 11:23), says *Billboard*; it would be sort of pilot for new half-hour TV film series with same title, and NBC rental deal would graduate downward depending on subsequent box-office . . . Another color spectacular in works is an original musical titled "The King & Mrs. Candle," by Sumner Locke Elliott, slated for NBC-TV's *Producers' Showcase* Aug. 20; Mark Charlap, who wrote music for *Peter Pan*, is doing it for the TV play, with *Hit Parade's* Toni Charmoli as choreographer . . . Those 2 Bing Crosby spectaculars announced by CBS (Vol. 9:21) will be on film, each 90 min. and resembling regular movie musicals. Crosby is curtailing his theatrical film activity to one-a-year, will concentrate on the 2 CBS features, first to be based on Rip Van Winkle story, going before cameras in July and telecast in Oct. They'll be produced & directed by Ralph Levy, budgeted at \$175,000 each . . . "Preview" format adopted by NBC's *Lux Video Theatre* for summer series;

live hour series will dramatize 12 stories made available by major movie producers before they're filmed for theatre . . . Apropos growing interdependence of TV and movies, Screen Directors Guild, Hollywood, reports 65% of members working in TV regularly or occasionally . . . Universal-International is getting into TV act, too—operating with NBC in putting on *Allen in Movieland* as summer extravaganza Sat. July 2, 9-10:30 p.m., providing such stars as Jeff Chandler, Piper Laurie, Tony Curtis, Audie Murphy; Steve Allen will be in Hollywood to star in U-I's film *The Benny Goodman Story* . . . Top movie directors Wm. Wyler, Wm. Wellman, Frank Borzage, John Farrow to direct one film each for next season's *Screen Directors Playhouse* on NBC-TV; Screen Directors Guild's benevolent work will be beneficiary . . . Screen Gems of Canada Ltd., 102 Peter St., Toronto, has been formed to handle properties of Screen Gems along with those of Telepix Movies Ltd., with latter's Joseph Dunkelmann & Lloyd Burns in charge . . . Olympus Film Productions Inc., subsidiary of WLW Promotions Inc., sold June 3 to James B. Hill, its gen. mgr. . . Station Film Library Inc., recently established by Harry Trenner, has been purchased by General Teleradio.

General Teleradio's Tom O'Neil reportedly is bidding on RKO holdings of Howard Hughes, which would give him big backlog of feature films now in vaults as well as control of RKO studio on Gower St., Hollywood, and Pathe lot in Burbank. Offers by O'Neil (of General Tire family) and others are understood to be in hands of Irving Trust Co. General Teleradio operates 5 TV stations and as many AMs, as well as Mutual Broadcasting System, Don Lee Network, Yankee Network. Presumably, though it's verifying nothing, it wants the RKO pictures to continue its successful "Million Dollar Movie" syndication and would enter the TV film production field in a big way if it gets the studio facilities.

DuMONT'S ELECTRONICAM live-film production method (Vol. 11:6, 8, 13, 16, 19) is in business now, and the company is proceeding on 2 fronts—marketing & film production—to capitalize on an anticipated industry acceptance of the system.

DuMont this week appointed "the father of Electronicam"—James L. Caddigan, ex-network programming & production mgr.—to new post of director of Electronicam marketing, with headquarters at Clifton, N. J. Said DuMont v.p.-gen. mgr. Wm. H. Kelley:

"The [new] marketing organization for Electronicam will undertake the establishment of this new system as standard equipment for the production of every type of motion picture—theatrical, business, educational, TV, commercials, govt." Marketing, he said, will be "international in scope."

Meanwhile, 2 Electronicam film production units have been busy at DuMont's New York Tele-Center, according to network director Ted Bergmann, who says 90% of those using the new facility aren't DuMont network advertisers. First Electronicam-produced commercial—1-min. Ronson shaver spot, thru Wm. Weintraub agency—was seen by New York viewers this week on WCBS-TV's *Early Show*. Biggest project to date was scheduled this week—pilot film in new 90-min. drama series for unnamed principal.

Among users and experimenters with new system at the Tele-Center are other networks, independent producers, agencies, sponsors. Commercials have been made for at least 4 agencies, pilot films for 2 producers, and an educational TV film series is now shooting.

Bergmann estimates that system cuts filming costs in half, compared to conventional methods, for complete film series and other big orders. Here are cost estimates, based on month's Electronicam experience, as compared with conventional filming: Five 15-min. soap opera episodes (total 50 min.), all shot in one 10-hour day, \$6000-\$7500, compared to \$15,000-\$18,500 by conventional methods. For one-minute commercials, cost is about \$1200 each when 3 are made consecutively, \$700 each for 6 and \$400 each for 12. Conventional film commercial is said to cost \$3600 for one minute.

As for DuMont network shows, pilot Electronicam prints are now being made of all of them. DuMont is recommending to its clients that they drop the live shows, change over to film. One DuMont account, Serutan, reportedly is planning to switch to Electronicam method entirely as soon as it has built up backlog of film shows in its *Life Begins at 80* series.

DuMont now has two 16mm Electronicam units (3 cameras each) in operation at its N. Y. Tele-Center, will install 35mm system this summer. New director of photography for Electronicam is Douglas Downs, ex-*March of Time*.

NBC Spot Sales has revised its *Guide for Video and Audio Standards*, covering 10-sec. IDs, as result of optional method announced last Oct. whereby advertiser may use full screen for 7¼ sec. (Vol. 10:42); revised manual will be available in early July.

National advertising rose 11% in first 4 months of this year over year ago, reports *Printers' Ink*, with network TV up 34%, newspapers up 14%, network radio down 17%.

Network Accounts: Cigarette companies, whether despite or because of lung cancer publicity, are increasing network TV sponsorships, reversing earlier policy of cancelling or sharing top programs in wake of first cigarette sales declines. Six major manufacturers will sponsor 18 network shows this fall, latest being Camels' purchase of 30-min. *Phil Silvers Show* on CBS-TV (time undetermined) & Lucky Strikes' buy of Wed. 8:30-9 p.m. period on ABC-TV following *Disneyland* . . . CBS-TV is revamping *Morning Show* (Mon.-thru-Fri. 7-9 a.m.), which has had rough commercial going in competition with highly successful *Today* on NBC-TV; spokesman denied reports show was going off air, though m.c. Jack Paar will quit it to head *Jack Paar Show* on CBS-TV starting July 4, Mon.-thru-Fri. 1-1:30 p.m. . . . General Foods (Instant Sanka & Minute Rice) & Revlon to be alt. sponsors of *Johnny Carson Show* on CBS-TV starting June 30, Thu. 10-10:30 p.m., thru Young & Rubicam & Wm. H. Weintraub & Co. . . . General Foods to sponsor *Commando Cody* on NBC-TV starting July 9, Sat. 11-1:30 a.m., thru Benton & Bowles . . . Sunbeam Corp. (appliances) buys 14 partic. on NBC-TV's *Tonight* (Mon.-thru-Fri. 11:30 p.m.-1 a.m.), 3 partic. on *Home* (Mon.-thru-Fri. 11 a.m.-noon) starting in fall, thru Perrin-Paus Co., Chicago . . . Western Union to switch *Down You Go*, an ex-DuMont show, to ABC-TV this fall, Fri. 10-10:30 p.m., thru Albert Frank-Guenther Law; Procter & Gamble and Whitehall Pharmacal Co. will sponsor it this summer on CBS-TV Sat. 9:30-10 p.m. . . . Pall Mall & Simoniz Wax to sponsor *The Best in Mystery* as summer replacement for *Big Story* on NBC-TV starting July 15, Fri. 9-9:30 p.m., thru Sullivan Stauffer, Colwell & Bayles . . . NBC-TV extends Steve Allen's *Tonight* (Mon.-thru-Fri. 11:30-1 a.m.) to Los Angeles & San Diego starting June 27 . . . Raleigh cigarettes & Procter & Gamble to be alt. sponsors of *Undercurrent* on CBS-TV starting July 1, Fri. 10-10:30 p.m., thru Ted Bates & Young & Rubicam.

Rate increases: WBKB, Chicago, has added Class AA hour (6:30-10 p.m. daily) at \$2200, min. (6:30-10:30 p.m. daily) at \$400, Class A hour going from \$1650 to \$2000; WRC-TV, Washington, raises base hour from \$1000 to \$1250, 20 sec. from \$275 to \$350; KOMO-TV, Seattle, July 1 adds Class AA hour (7:30-10:30 p.m. daily) at \$950, min. at \$190, Class A hour remaining \$800; KMTV, Omaha, has added Class AA hour (7-9 p.m. daily) at \$800, min. at \$200; WDSM-TV, Duluth, has raised base hour from \$250 to \$325, min. \$50 to \$65; KLTV, Tyler-Longview, Tex., hour from \$200 to \$250, min. \$40 to \$50; CKCO-TV, Kitchener, Ont., hour from 300 to \$350, min. \$60 to \$70; CFRN-TV, Edmonton, Alta., \$200 to \$260 & \$40 to \$50.

Three new sponsors have signed for partic. on *Monitor*, NBC Radio's weekend round-the-clock service which was to debut with simulcast Sun. June 12, 4-5 p.m. Latest sponsors (giving *Monitor* total of \$1,400,000 gross billings to date) are Chesebrough, thru McCann-Erickson; Morton Salt, thru Needham, Louis & Brorby; B. F. Goodrich, thru BBDO.

First regular daily program in color will be *Howdy Doody* on NBC-TV starting in fall, Mon.-thru-Fri. 5:30-6 p.m., when it faces competition from Disney's new *Mickey Mouse Club* on ABC-TV Mon.-thru-Fri. 5-6 p.m. NBC will retain *Pinky Lee Show* 5-5:30 p.m., ending speculation that it would be combined with *Howdy Doody* in a single hour show.

New reps: KAKE-TV, Wichita, to Katz (from Hollingbery); WITV, Ft. Lauderdale-Miami, to H-R Television (from Bolling); WIRK-TV, West Palm Beach, to Donald Cooke (from Weed); KRDO-TV, Colorado Springs, to Avery-Knodel (from McGillvra); KSAN-TV, San Francisco, to Stars National (from McGillvra).

Associated Broadcasting Co., the Norman Collins company which will program Independent TV Authority's commercial station in London weekends and in Birmingham weekdays (Vol. 11:12) has published London base rates at £1000 (\$2800) per min., £700 (\$1960) per 30 sec., £450 (\$1260) for 15 sec., 8-9:30 p.m. Sat. & Sun. From 2-6 p.m., charges will be £600 (\$1600) per min. on Sun., £350 (\$980) Sat. All other evening time will be £600 per min. Birmingham rates will run about half. Postmaster-General, who runs stations of both BBC & ITA, has entered agreement with them whereby they won't start before 9 a.m. (2 p.m. Sun.) or run after 11 p.m., with 6-7 p.m. daily kept dark in accordance with BBC tradition (6-7:25 p.m.) which is done, as an official put it, "so that the mothers may prepare dinner and put the children to bed without any distraction from TV" (Vol. 10:45). Associated-Rediffusion, contractor for weekdays on London stations, announces it has already sold £1,000,000 worth of time (\$2,800,000) and gen. mgr. Capt. T. N. Brownrigg emphasized that "no advertiser or agent will have any say whatsoever in the programs we transmit or in the choice of program with which his commercial will be associated, although we will attempt to place his advertisement alongside a suitable program." ITA has announced Sept. 22 as definite starting date for London commercial programs.

Canadian Broadcasting Corp. gross revenues for fiscal year ended March 31 were \$34,707,000, expenditures \$29,106,000, with TV income accounting for \$21,273,000 of revenues and \$15,876,000 of expenses, reports chairman A. Davidson Dunton. Despite 1954-55 surplus of \$4,256,000 after depreciation, it's expected 1955-56 will see \$10,805,000 operating deficit, he stated—\$8,690,000 on TV, \$2,115,000 on radio. Revenues derive partly from 15% Federal tax on receivers, which was \$16,960,000 last fiscal year and which Dunton estimated would go down about \$1,500,000 this year due to lower TV set prices. Remainder of revenues come from sponsorships. Net, the CBC's TV & radio services cost the Canadian taxpayers about \$23,464,000 last year, will go up to about \$36,605,000 this year, according to the Dunton report.

Sheraton Closed-Circuit Television Inc. is new wholly owned Sheraton Hotels subsidiary, which will produce and arrange closed-circuit meetings, events and demonstrations. Hollywood producer Walter Wanger is pres., Wm. P. Rosensohn exec. v.p., Robert Rosencrans v.p. Rosensohn and Rosencrans formerly headed up Box Office TV Inc., and Wanger recently was named to BOTV board. BOTV, whose financial backers included Sid Caesar and Max Liebman, is being reorganized. Rosensohn said Sheraton invested \$200,000 in closed-circuit equipment, will soon be able to supply hookup of 100 Sheraton and other hotels for special events.

TV Guide is meeting local competition of TV & Radio Magazine Section of *N. Y. Herald Tribune*, which bowed May 15 as 88-p. digest-size program and fan magazine given away with Sun. newspaper, by adding 16 pages to N. Y. edition as of June 11, making total of 104 pages. The weekly N. Y. sales of *TV Guide* in May were 890,000. Format of newspaper's magazine is similar to *TV Guide*—slick-paper color wrap-around containing news and features of national interest while program insert lists upcoming week's offerings on N. Y. area stations along with local ads and items.

Life Magazine raises ad rates about 7% next Jan. 16, guaranteeing 5,600,000 circulation; cost of black-&-white page goes to \$21,775, of 4-color page to \$32,740.

Sterling Drug will have 110 commercials shot in England this summer by TV Commercials Ltd. for use on both American and British TV.

OUR CONTINUING SURVEY of upcoming new stations reveals no new starters this week—but several are imminent and these are latest reports received from principals:

WXEX-TV, Petersburg, Va. (Ch. 8), which succeeds pre-freeze WTVR (Ch. 6) as NBC outlet for the Richmond-Petersburg area (Vol. 11:23), is pushing construction to meet Aug. 1 interconnection date, reports pres. Thomas G. Tinsley Jr., who also owns radio WLEE, Richmond, and WITH, Baltimore. WLEE gen. mgr. Irving G. Abeloff has been transferred to TV as gen. mgr.; George Oliviere, ex-WTAR-TV, Norfolk, sales mgr.; Charles E. Seward, ex-WBTV, Charlotte, operations mgr.; James L. Dodd Jr., ex-WLWA, Atlanta, program director; John Costello, ex-DuMont, NBC & WPIX, chief engineer. Equipment is 50-kw RCA transmitter, with 978-ft. Ideco tower and RCA antenna. Base rate will be \$750, rep Forjoe. Headquarters office is 124 W. Tabb St., Petersburg, with branch at 6200 Broad St., Richmond.

KTRE-TV, Lufkin, Tex. (Ch. 9), has changed target from July 1 to Aug. 31, reports v.p.-gen. mgr. Richman Lewin. Planned as satellite of KPRC-TV, Houston, it was held up until it got microwave permit from FCC last week. It will use 5-kw GE transmitter, 500-ft. Andrews tower, scheduled to go up July 4 weekend. Base hour will be \$150. Reps will be Venard, Rintoul & McConnell and Clyde Melville Co. (Southwest).

KFJZ-TV, Fort Worth (Ch. 11) expects to meet Aug. 1 test pattern target, but has changed programming start to Sept. 4, reports v.p. Charles B. Jordan of Texas State Network, also operator of KFDA-TV, Amarillo and 4 Texas AMs. Its 12-bay GE antenna was installed June 3 on 1000-ft. Parkersburg tower, and transmitter house is to be ready July 15 for 50-kw GE installation. It hasn't signed with network yet, has set \$600 base hour. Rep will be H-R Television.

WTTW, Chicago (Ch. 11, educational) plans to start test patterns Sept. 1 and 4-10 p.m. programming late in fall, writes chief engineer D. M. Weise. It will ask for change of transmitter site to Field Bldg., has ordered GE transmitter, antenna & studio equipment. Lease has been signed for studios in Chicago Museum of Science & Industry by Chicago Educational TV Assn., which reportedly has raised \$850,000 in fund drives. It now plans drive for another \$365,000, estimated as station's operating cost for 1956.

WFLB-TV, Fayetteville, N. C. (Ch. 18), is installing 1-kw GPL transmitter, plans July test patterns, Aug. programming start with CBS & NBC, reports exec. v.p.-gen. mgr. L. W. Allen. It has 400-ft. Truscon tower ready for GE antenna, due in July. Nearest other outlet is WNAO-TV, Raleigh (Ch. 28), 53 mi. away. Base rate will be \$150. Rep will be Adam Young.

Fred Drewry will be resident mgr., Oscar Oren chief engineer. Rep will be Weed.

KOKE, El Paso, Tex. (Ch. 13), formerly KELP-TV, plans Sept. 15 test patterns, Nov. 1 programming, featuring Latin-American films & kines as well as English-language shows, reports gen. mgr. Joe Roddy. On hand is former transmitter of WBNS-TV, Columbus, O. (Ch. 10), and 324-ft. Aerial tower with 6-bay GE antenna is reported ready. Owners are Barton & Gordon McLendon, who also hold CP for KLIF-TV, Dallas (Ch. 29), operate radios KLIF, Dallas & KERP, El Paso, and have interest in radio WRIT, Milwaukee. Base rate not set. Rep will be H-R Television.

KBMB, Bismarck, N. D. (Ch. 12), using some programs of Valley City's KXJB-TV, expects to be on air Dec. 1, writes owner John Boler, also operator of KCJB-TV & KCJB, Minot, and KSJB, Jamestown, N. D. With antenna on State Capitol Bldg., KBMB will be city's 2nd outlet, KFYR-TV (Ch. 5) having begun in Dec. 1953. Equipment hasn't been ordered or construction begun.

WOBS-TV, Jacksonville, Fla. (Ch. 30), has completed building construction, with 443-ft. Aerial tower ready, reports gen. mgr. Jim Macri. Station now has fall target, but delivery time hasn't been set for RCA antenna or GPL transmitter. Georgia's ex-Gov. E. D. Rivers is pres. & 60% owner. Recently Rivers got FCC permission to sell CP for WCTV, Thomasville, Ga. (Ch. 6), to John H. Phipps (Vol. 11:5, 20); last year he sold CP for WMIE-TV, Miami (Ch. 27), to Storer, now being operated on Ch. 23 as WGBS-TV (Vol. 10:51). WOBS-TV rep will be Stars National.

WTLE, Evanston, Ill. (Ch. 32), has GE transmitter on hand, but hasn't set target, reports pres. & 50% owner Angus D. Pfaff, also owner of Evanston radio WEMP. RCA antenna will be used on 250-ft. tower. Base rate not set. Rep not chosen.

WCBC-TV, Anderson, Ind. (Ch. 61), is now without target, while owners study other similar markets, reports TV director Fred M. Mullen. Grantee is Great Commission Schools Inc. (Church of God denomination) operates local school system & Anderson College & Theological Seminary. On hand are RCA 1-kw transmitter, studio equipment & antenna purchased from John L. Booth's defunct WBKZ-TV, Battle Creek (Ch. 64). It's going to trade Ch. 64 antenna for used Ch. 61, will be ready to air test patterns the day antenna is installed, says Mullen. Last week it began conversion of campus auditorium for TV studios. Base hour rate may be \$150. Rep not chosen.

CHLT-TV, Sherbrooke, Que. (Ch. 7), hasn't completed arrangements to lease site in Mont-Orford Provincial Park, so may not get on air until "beginning of 1956," writes mgr. A. Gauthier. It's about 60 mi. NE of Newport, Vt. Base rate and rep not reported.

FCC's power to overrule examiners was bolstered this week by U. S. Supreme Court decision knocking out last year's appeals court ruling which would have increased authority of examiners (Vol. 10:34-35). Ruling was in AM case—equally applicable to TV—in which appeals court upheld examiner's initial decision and took FCC to task for reversing it. Supreme Court said this week that appeals court erred in its reasons for overruling FCC grant to Easton Publishing Co. (WEEX) for 1230 kc in Easton, Pa. over Allentown Bestg. Co. (WHOL) for same frequency in Allentown. In another precedent-setting aspect of case, Supreme Court said in effect that where same frequency is sought in 2 different communities, Commission may choose between the 2 communities on basis of need for the channel before comparing qualifications of competing applicants for the frequency. Appeals

court, in overruling FCC, had stated that community's need for the channel could be considered only where applicants' qualifications were approximately equal. Easton-Allentown dispute, raging for nearly a decade, has been see-saw battle: Allentown won original hearing, put WHOL on air. Easton Publishing Co. appealed, and court sent case back to FCC which reversed itself and gave grant to Easton, now holding CP for 1230 kc. Allentown Bestg. then appealed, got favorable ruling from appeals court. Supreme Court's 7-1 ruling this week found "errors of law" in appeals court ruling, ordered court to reconsider case.

First TV in Israel will be 2-way closed-circuit educational system presented to Israel Institute of Technology, Haifa, by pres. Milton J. Shapp of Jerrold Electronics, Philadelphia.

EMERSON GOES TINKERTOY; MORE NEW LINES: That radical change in TV set construction methods we discussed last week (Vol. 11:23) -- modular design of components together with printed wiring -- has been adopted by Emerson for expected marketing early next year. Several others, notably CBS-Columbia and Capehart-Farnsworth, are experimenting with it and looking to early adoption.

RCA confirmed trend toward automatic production, meanwhile, announcing that its redesigned line -- shown this week to field reps & distributors -- makes "more extensive use of printed circuits than anyone else in the TV industry." Admiral last week showed sets in which 80-90% of wiring was printed, most components inserted automatically (Vol. 11:23). Exception to rule was Zenith, whose new models shown this week have no printed circuits. After experimentation, company ruled out printed wiring for present as providing no cost saving. (For details of new lines, p. 13).

* * * *

Emerson's modular design system is based on govt.-developed "Tinkertoy" principle, now being exploited commercially by ACF Electronics, Aerovox, Sanders Associates (Nashua, N.H.) and others. Tinkertoy process (Vol. 11:12) uses "printed" components on tiny ceramic wafers which are stacked and mounted on a printed circuit board. Other printed circuit techniques now in wide use employ conventional parts, sometimes mounted and assembled on printed wiring boards by automatic means.

ACF Electronics, Alexandria, Va., subsidiary of ACF Industries (ex-American Car & Foundry Co.), is supplying the component modules (trade-named "Compacs", for component packages) for Emerson's new-type sets. Emerson pres. Benjamin Abrams confirmed that his company will make one chassis using Tinkertoy method, spotting it in various models throughout next year's line.

"We're in the process of developing it now," he told us. "While we're not making any modular sets at this time, we're pushing it along." He said the consumer will benefit principally by the ease of servicing such sets -- serviceman merely replaces module in which trouble has been located. Mr. Abrams said there won't be any price cuts "immediately" on sets using modular design. It is known, however, that many producers are looking to automatic production and easier-installed parts as a way to eventually make low-end models profitable.

Virtually every other manufacturer is studying the possibilities of modular and other types of non-conventional components. Said a CBS-Columbia spokesman:

"Yes, we're playing with Tinkertoy, but frankly we don't know where it will lead and we feel we must spend some time evaluating it -- with pilot runs and field tests. As you may have heard, printed wiring alone is facing serious trouble; it hasn't been easy to break in. This new system is not only printed wiring but true printed circuitry. Remember that resistors, capacitors and other components have been developed to a high state of efficiency and we have a lot of know-how in their use. Now we're asked to translate them into modules, and anyone who dives into this sort of thing in a hurry is running the risk of a lot of trouble. Yet we could be very lucky with it, too."

Capehart is experimenting with modular sets, too, said v.p.-gen. sales mgr. E.W. Gaughan, but only "in the preliminary stage." It's too early to determine when it will reach the market, he said, adding: "It's not a Tinkertoy set, but rather our own type of module development, although we're working with ACF and others." He said modular sets will probably be in same price range as conventional type, that Capehart won't sacrifice quality for sake of automatic production or new design.

Motorola exec. v.p. Robert W. Galvin said: "We're looking into modular construction, of course, but we're not using it in our upcoming line. It's simply one phase of study in our mechanization program." Among others reportedly considering

modular approach is one big private label manufacturer, who may make modular radio sets before using principle on TV.

RCA's new line utilizes 5 printed circuit boards in horizontal and vertical chassis, according to Robert A. Seidel, exec. v.p. for consumer products. "Tests, both in the field and in our laboratories, have conclusively proven the advantages of printed circuits for greater reliability and thus better service and performance for viewers," he said. Line is completely restyled, has no controls visible in the front of sets, has new chassis in each model.

Color was completely overshadowed at RCA gathering. And next week, when it shows its 2 new color sets, console at \$795 and console at \$895, to N.Y. dealers there are no color programs scheduled on the networks.

Zenith's line, priced from \$150 for 17-in. table model to \$1400 for combination, includes a novel remote-control unit known as "Flash-Matic", which incorporates 4 separate photo-electric cells mounted at corners of the set. Special flashlight, which comes with set, turns set on and off, controls volume & tuning. It's feature on 4 sets, cheapest being \$400. One of Zenith's selling points is that it permits viewer to turn off commercial by remote control.

* * * *

Other brief highlights of major trade developments this week:

LABOR: IUE announced it would seek guaranteed annual wage from GE, Sylvania & Westinghouse in contract negotiations this summer, following Ford's approval of modified guaranteed wage with sister UAW. Union also disclosed that International Resistance Co. has become first parts manufacturer to agree to form of guaranteed wage, is now contributing 9¢ per hour for each of its 900 employes into a fund to provide year-round compensation. Company and union have joint committee currently ironing out details, according to David Lasser, IUE research director.

ECONOMIC OUTLOOK: Several more indices of nation's economic prosperity were made public. Census Bureau reported total of 62,703,000 employed in May, highest ever for that month, up 1,018,000 from April and 1,584,000 over May 1954. It also reported unemployment declined 473,000 to total of 2,489,000 -- a greater decrease than usual for spring. Commerce Secy. Weeks told news conference current prosperity has no parallel in nation's history, said Gross National Product in second quarter would exceed record annual rate of \$370 billion in first quarter. Herman Steinkraus, pres. of Bridgeport Brass Co. & ex-pres. of U.S. Chamber of Commerce, told the 20th annual convention of International Distribution Congress that he foresaw "increasing evidence of at least 4 to 5 years of excellent business ahead, based on a great wave of increased spending based on increased income and savings."

GOOD PROFIT YEAR: It may or may not apply to most TV-radio-electronics firms but Standard & Poor's report this week states aggregate profits of U.S. industrial corporations will run 15-20% better this year than last, making for most prosperous year on record. S&P analysis shows aggregate net income of 675 industrials for the first quarter of 1955 was 28.3% above like 1954 period.

'NECKTIE ECONOMY': Motorola v.p. Edw. R. Taylor prognosticates, in course of panel at Advertising Federation of America convention, that task ahead is to "create what I call a 'necktie economy', in which the consumer can always use another one of just about everything -- another car, bathtub, TV set, fur coat or vacation." He said nation is entering era of technological advancement in which advertising and marketing men will be expected to move "undreamed of mountains of merchandise" to the consumer. "Advertising's problem," he said, "is to sustain that frame of mind in which the consumer is more or less discontent all the time with yesterday's goods and services, and eager all the time to possess the newest things."

DEPT. STORES: Annual survey by National Retail Dry Goods Assn. Controllers' Congress bears out declining trend of TV sales in dept. stores. It shows that in 1954, TV sales were off 4% from 1953, which was 8% below 1952. Average price of TV set sold in dept. store was \$138.34, down from \$178.46 in 1953. Average price of set sold in all retail outlets last year was about \$200. TV-radio-records depts. accounted for average 1.5% of total store volume in 1954, about same as in 1953.

PRODUCTION: TV output declined to 91,648 week ended June 3, lowest for year,

from 110,944 preceding week and 120,144 week ended May 20. It was year's 22nd week and brought production for year to date to 3,260,000 vs. about 2,610,000 same 1954 period. Radio production totaled 206,428 (96,030 auto) week ended June 3, also low for year, compared to 266,946 preceding week and 280,445 week before. It brought 22-week production to 6,100,000 vs. 4,340,000 in corresponding 1954 period.

RETAIL SALES: Some 2,355,740 TVs were sold at retail in first 4 months of 1954, compared to 2,145,147 in corresponding 1954 period, reports RETMA. Sales in April were 411,748, compared to 669,794 in 5-week March and 371,720 in April 1954. Radio sales in first 4 months, excluding auto sets, totaled 1,609,182, compared to 1,487,247 in first 4 months of 1954. April sales were 367,841 vs. 448,488 in March and 427,911 in April 1954.

Trade Personals: Henry C. Bonfig, ex-Zenith sales v.p., newly named pres. of CBS-Columbia and this week elected v.p. and a director of CBS Inc. (Vol. 11:21), reported for duty at Long Island City plant June 9 . . . George Y. Wheeler, RCA Washington v.p., received law degree from George Washington U this week . . . Commodore A. J. Spriggs, USN Ret., ex-director of electronics, Office of Chief of Naval Operations, who joined Packard-Bell in 1950 as mgr. of technical products div., elected a Packard-Bell v.p., headquartering in Washington in liaison duties with govt. . . . John F. McAllister Jr., mgr. of product planning, GE TV-radio dept., promoted to mgr. of engineering, responsible for design & development of all TV-radio receivers and reporting to dept. gen. mgr. Herbert Riegelman . . . J. L. Albers promoted to Capehart-Farnsworth merchandise mgr.; Donald F. Miersch, ex-Sparton gen. sales mgr., named marketing mgr.; Mark E. Davis promoted to sales finance mgr. . . . Robert I. Gaines promoted to asst. director of DuMont international div. . . . Colby H. Knapp appointed asst. sales mgr., Stromberg-Carlson telephone div. . . . John L. Esterhai promoted to Philco asst. secy., Isaac Naeye to asst. treas. . . . Herbert A. Gumz resigns as pres. of Crescent Industries (phonographs) to become staff asst. to R. E. Brooker, v.p. in charge of Sears Roebuck manufacturing subsidiaries; he's succeeded by John S. Holmes, pres. of Warwick Mfg. Corp., Chicago, which now owns Crescent and which itself is partly owned by Sears; Gordon G. Brittan, Warwick v.p., gets same title at Crescent . . . George G. Barker promoted to technical editor, Raytheon public relations dept. . . . Stephen E. McCallum, editor of *GE Ham News*, named editor in charge of new electronic tube news bureau, Schenectady . . . Ray Marchbanks appointed Hallicrafters southeastern district mgr., Atlanta; Dwight F. Clepton named central Fla. mgr., Orlando.

* * * *

RETMA of Canada, which followed example of RETMA of U. S. and has been renamed to embrace "electronics," elects these officers at last week's convention: pres.-chairman, Carl A. Pollock, Dominion Electrohome (re-elected); v.p.'s—J. D. Campbell, Canadian Westinghouse, receivers; Lloyd Harris, T. H. Farley Ltd., Hamilton, parts & accessories; J. C. R. Purnard, Northern Electric Co. Ltd., Belleville, electronics; engineering director, Ralph A. Hackbusch, Hackbusch Electronics Ltd., Toronto (re-elected); gen. mgr., Stuart D. Brownlee.

"Air Force Weapon System Concept and Its Effect on the Electronics Industry" is topic of main address June 15 by Lt. Gen. C. S. Irvine, deputy chief of staff, materiel, headquarters, Air Force, at RETMA convention in Chicago. Also featured at June 14-16 convention will be reports to parts div. members by atomic test committee chairman Ray H. Williamson on recent Nevada tests and entertainment receiver panel chairman D. W. Pugsley on component requirements for color sets.

Maurice J. Hayes, 53, Magnavox director of purchases, died of heart ailment June 5 in Ft. Wayne.

Topics & Trends of TV Trade: Trans-shipping of TV-radio-appliances, generally regarded in trade as a competitive evil which has fostered spread of discount houses, is a proper trade practice in eyes of Justice Dept. Judge Stanley N. Barnes, head of Justice anti-trust div., this week told Senate Judiciary subcommittee that trans-shipping "may represent a healthy form of price competition." His testimony supported policy first expressed in anti-trust suit against Philco last Dec., in which Justice charged that Philco's franchise agreements penalizing distributors for trans-shipping merchandise outside their territories were illegal (Vol. 10:51), a charge Philco subsequently denied (Vol. 11:10).

Barnes' testimony acknowledged that while some trade associations might not like trans-shipping, and that it might penalize some dealers, he "could not see how it would harm the consumer." He contended that any practice which helped reduce the price of product to consumer would receive Justice's sanction, as long as it does not violate any law.

NARDA managing director A. W. Bernsohn, commenting on Barnes' testimony, said: "Trans-shipping results in some distributors being overstocked, others short of merchandise. In turn, the soundness of retail operations is injured." Arthur W. Hooper, exec. director of National Assn. of Electrical Distributors, commented that trans-shipping "destroys channels that are designed to move the most goods to the most people at the least cost." RETMA declined comment.

* * * *

DISTRIBUTOR NOTES: Motorola appoints Electronic Sales Co. Inc., 540 Main St., Ansonia, Conn. (Al Pincus, pres.) covering New Haven, Middlesex & Fairfield counties . . . DuMont appoints E. E. Pritchett & Co., Salt Lake City, replacing Smith-Morley Corp. . . . RCA Victor Distributing Corp. of So. Calif., Los Angeles, appoints Richard H. Tresselle TV-radio field sales mgr., succeeding Russell P. Larsen, now mgr. of Youngstown Kitchen div. . . . Zerega Distributing Co., Seattle (Motorola) appoints Charles W. Schuchart Jr. as sales mgr. . . . Simon Distributing Co., Washington (Zenith) names E. Blake Cardwell TV-radio mgr.; Sues, Young & Brown, Los Angeles (Zenith) promotes John C. Houseman to field sales mgr. . . . Emerson Radio of Pennsylvania, Philadelphia, appoints Sam Raker field sales mgr., reporting to sales v.p. Samuel Jacobs . . . Dallman Co., San Francisco (Philco) appoints Robert J. Parr adv. & sales promotion mgr. . . . Admiral Washington branch names Robert P. Newlyn adv. & sales program mgr. . . . Hallicrafters appoints Edelmuth & Co., 1192 E. 40th St., Cleveland (David L. Edelmuth, pres.).

RETMA office moves: Statistical dept. (Wm. F. E. Long, mgr.) to Sheraton Bldg., 711 14th St. NW, Washington (phone National 8-3902); west coast office (Joseph J. Peterson, mgr.) to Hollywood Professional Bldg., 7046 Hollywood Blvd., Hollywood 29, Cal. (Hollywood 2-1228).

RCA's new line, introduced this week to field reps & distributors at Barbizon Plaza Hotel, N. Y. (see p. 10), consists of 23 basic black-&-white models and 2 color receivers. Monochrome line is divided into 3 series: Special, comprising 17, 21 & 24-in. tables, 21 & 24-in. consolettes & 21-in. console, with prices ranging from \$150 to \$260; Super, comprising 21 & 24-in. tables & 21-in. console, priced from \$200 to \$300; Deluxe, 21 & 24-in. consoles, from \$300 to \$500. Vertical chassis is incorporated in all Special sets and in some of Super & Deluxe groups. Special series has dials on top of set hidden under trap door. Deluxe sets have illuminated window with magnified channel numbers. Other features are improved anti-noise circuit, increased voltage & improved automatic gain control.

Admiral's new 14-model line, introduced last week at distributors' convention in Chicago (Vol. 11:23), is priced in general range of old line—starting with 17-in. ebony metal table model at \$130 and going up to 27-in. open-face blonde console at \$425. The 21-in. table series starts at \$180 for metal cabinet, consoles at \$230 for open-face walnut. Only 24-in. sets are mahogany tables at \$290, "laydown" mahogany console at \$400, blonde \$420. A 21-in. combination is priced at \$400 in mahogany, \$420 in blonde. Optional uhf tuners are \$25 extra.

Zenith's new line, introduced this week to distributors at Chicago's Conrad Hilton Hotel, had virtually no change in prices from old line. The 17-in. table models start at \$150, 21-in. table at \$170, 21-in. consoles at \$250, 24-in. tables at \$290, 24-in. consoles at \$380. At top of line is 27-in. 3-way combination with "Flash-Matic" remote control feature (see p. 10), priced at \$1400.

New Westinghouse line, unpriced yet and currently being shown distributors at regional meetings, won't be made public until July 24—but gen. sales mgr. Dan D. Halpin says it contains fewer models and will offer better discounts to dealers. First quarter TV sales, he said, were "substantially ahead" of same 1954 period, radio sales up 17%.

Picture tube sales in first 4 months totaled 3,427,805, valued at \$67,076,542, compared to 2,690,519 worth \$56,989,867 in first 4 months of 1954, reports RETMA. April sales were 788,317 worth \$14,620,075, compared to 772,257 at \$17,246,843 in 5-week March and 727,655 at \$14,994,779 in April 1954. Receiving tube sales in first 4 months were 152,762,273, valued at \$111,506,758, compared to 106,026,920 worth \$78,560,440 in first 4 months of 1954. April sales were 35,426,153 at \$26,779,586 vs. 41,080,881 at \$29,922,192 in March and 29,640,942 at \$21,697,489 in April 1954.

What's the cost of operating a TV set? There's no official data on subject, but anti-subscription TV group known as Joint Committee on Toll TV (see p. 1) comes up with estimate of \$87.01 as average annual cost. It breaks it down thus: receiver depreciation, \$48, assuming average \$240 set totally depreciates in 5 years; service calls, \$20, based on Nov. 1954 *Videotown* survey and other industry sources; power consumption, \$13.01, based on data from U of Illinois electrical engineering dept.; installation, antennas & miscellaneous equipment, \$6.

Proposed big appliance consolidation involving RCA, Sears, Whirlpool, Seeger Refrigerating Co. and perhaps others (Vol. 11:22) still awaits opinion from Justice Dept. on its legality. Elisha Gray II, pres. of Whirlpool, denied reports his company's merger with Seeger is imminent, as first step in multi-faceted consolidation. He said he still stands on his earlier statement to us that he would not "bet a nickel" on the outcome of any "exploratory talks" his company has been conducting with several firms.

Stromberg-Carlson offering 21-in. color set at \$895, first deliveries due late this month.

Financial & Trade Notes: General Instrument Corp. sales for fiscal year ended Feb. 28, 1955 were \$22,795,029 vs. record \$32,502,305 in preceding year, drop being attributed to reduced civilian and defense volume and lower prices due to intensified competition. Net loss for year after Federal tax credits was \$412,220 vs. net profit of \$926,903 (\$1.13 per share) in preceding year. Consolidated balance sheet shows cash almost equalling total liabilities after prepayment of \$1,250,000 in long-term obligations; total current assets of \$6,410,931, total current liabilities \$1,781,969, net working capital \$4,628,962. New plants are now operating in Waterloo, Ont. and Statesboro, Ga., and on May 17 company entered agreement to acquire Automatic Mfg. Co., Newark.

Stockholders have been asked to approve, at June 27 annual meeting, proposed acquisition of Automatic, whose shielded I.F. transformer is sold under K-Tran trademark, in exchange for 555,000 shares of authorized but unissued General Instrument stock, to be added to the 818,273 now outstanding. It's proposed to add to General Instrument board Martin H. Benedek, Automatic pres.; Moses Shapiro, Automatic exec. v.p.; and Alexander P. & Henry Hirsch, Automatic directors, who are also chairman & pres., respectively, of Welbilt Corp., N. Y., manufacturer of ranges and air-conditioning equipment.

Proxy report shows Automatic's 5-year average annual sales (1950-54) were \$8,661,697, average net profit after taxes \$462,008 (83¢ per share); that General Instrument's average annual net sales for virtually same period were \$26,016,613, profit \$381,396 (47¢); that GI chairman Abraham Blumenkrantz, holder of 12,000 shares, drew remuneration of \$54,000 last year while pres. Monte Cohen (3718 shares) drew \$55,000; that Automatic pres. Martin Benedek's remuneration last year was \$58,096 and exec. v.p. Moses Shapiro's \$45,192. Automatic's plants in Newark and Beckley, W. Va. employ about 1150.

* * * *

Emerson Radio net earnings were \$1,111,981 (57¢ a share) for first 6 months ended April 30, first half of fiscal year, vs. \$947,515 (49¢) in like 1954 period. Before-tax profit was \$2,197,709 vs. \$1,648,034. Revenue figures were unannounced. Pres. Benjamin Abrams attributed profit increase to "wide acceptance of the new transistor pocket radio [and] improved business in air conditioners." New small radios are being made at rate of 1100 daily, he said.

IT&T, with no breakdowns for Capehart-Farnsworth or Farnsworth Electronics Co. divs., reports consolidated net income of \$5,253,846 (73¢ a share) on sales of \$94,545,153 in first quarter vs. \$4,855,103 (68¢) on \$78,705,955 in first 1954 quarter. Quarterly report includes accounts of German subsidiaries for first time since 1939.

Dividends: Collins Radio "A" & "B" (new), 35¢ payable July 29 to stockholders of record July 15; American Broadcasting-Paramount Theatres, 25¢ July 20 to holders June 24; IT&T, 30¢ July 15 to holders June 17; Aircraft Radio, 20¢ Aug. 12 to holders July 22.

Muter Co. sales in first 4 months of 1955 were \$4,236,000 vs. \$4,288,000 same 1954 period; profit was \$114,780 vs. \$134,728. Dividend was omitted by board at this week's meeting, last having been 15¢ in Dec.

More trade predictions: RETMA chairman Max Balcom, in panel at RETMA of Canada convention, forecast retail sales of 6,700,000 monochrome TVs this year at factory value of \$900,000,000 vs. 7,300,000 at factory value of \$1.06 billion last year; in 1959, he foresees retail sales of 6,900,000 at factory value of \$1.2 billion, color accounting for about 1/3. By 1965, retail sales should run 7,400,000 sets annually, he figured, with factory billings \$1.5 billion. He said under 35,000 color sets would be made this year.

PEERING INTO FUTURE of TV and other media, U of Illinois' Prof. Dallas W. Smythe, who heads its Institute of Communications Research and once was an FCC official, agrees with our predictions for 1965—about 1000 TV stations, serving 58,000,000 homes, with more than 90% saturation (Vol. 11:21). Some of his other predictions in June 6 address to Advertising Federation of America at Chicago:

Programming: All in color, from 3 live networks and tape transcriptions. "The programs of 1965 may bear only a distant resemblance to the programs of today. Long before 1965, Hollywood will have been integrated into the making of TV programs, as well as continuing to supply theatrical exhibitors."

Newspapers: Probably relatively unchanged 10 or even 20 years from now—based on the assumption "that none of the major companies in the electronic media undertakes a massive invasion of the newspaper field through aggressive promotion of broadcast facsimile. Were they to push facsimile receivers as they did TV receivers, the market for broadcast newspapers could be created within a relatively few years." Facsimile newspaper transmitting stations could be set up for as little as \$50,000, compared to the multi-million dollar investment required for a big-city newspaper.

Tomorrow's media users: Based on census forecasts, in the next 10 years there will be substantially more consumers among 5-14 age group, retired people and 15-20 group, in that order—with advertisers paying much more attention to needs of children. With coming of automatic factories, "tomorrow's media should look forward to serving the needs and interests of a larger population for more hours per week than they now serve a smaller population."

Among Dr. Smythe's more intriguing technical predictions: Within next 10 years, the TV telephone, probably in color (now being developed by AT&T). "If man-made satellites are feasible for military purposes, why should we not look forward to the possibility of getting complete coverage of the globe through TV transmitters installed on such satellites?"

■

NARTB code review board starts 13-week campaign to "tell every American family of their role in the TV code," mailing promotion kit to its 263 subscribers. It contains a slightly revised Seal of Good Practice, slides, sound film, brochure, etc. In accompanying letter, pres. Harold Fellows said: "Through our own medium . . . I am hopeful that we will convince viewers that they themselves determine the nature of TV programming."

Society of Television Lighting Directors is newly chartered group formed to "exchange ideas, discuss new equipment and set up standards." Members are 82 network lighting directors from east and west coast. Salvatore Bonsignore is chairman; Leland Watson, secy; Syd Samuels, treas. Mailing address is 119 Puritan Ave., Forest Hills, N. Y.

Upcoming Senate hearing: Communications subcommittee under Sen. Pastore (D-R. I.) June 21-22, on 2 bills requested by FCC—S-1549, to permit Commission to levy small fines, and S-1456, to modify "protest" procedure.

Boomerang: Sir Robert A. Watson-Watt, British inventor of radar who now is chairman & pres. of Logistics Research Inc., Redondo Beach, Cal., recently paid \$12.50 speeding ticket in Canada. He was trapped by police radar.

Barnard College, collaborating with NBC, is conducting 5th annual Summer Institute of Radio & Television June 27-Aug. 5 in NBC's N. Y. studios.

Sample color sets using Lawrence 1-gun tube were demonstrated to Paramount Pictures pres. Barney Balaban this week, and he said he was "delighted" with results, convinced they can be mass-produced to sell for less than \$500—perhaps as little as \$400. He said they produced excellent color when compared simultaneously with receivers using 3-gun tubes. Before long, he said, set will be demonstrated to industry and full details will be disclosed. Paramount has no plans to make tubes or sets, he stated, "unless we have to." Set uses vertical chassis, has 26 tubes including 21-in. rectangular glass kine, 2 rectifiers. Balaban said tube complement can be reduced to 19 or 21. "It's a black-&-white set with color added," he declared, "rather than a color set with black-&-white added—which is what the other sets are."

James C. Petrillo's AFM, once the bete noir of the broadcasting industry, had none other than RCA-NBC chairman David Sarnoff as its main convention speaker in Cleveland this week—first representative of business management ever to address it. Said Sarnoff: "Together, we have made America a nation of music lovers," noting that more people attend classical concerts in a year (35,000,000) than baseball games (15,000,000) and that the music boxoffice is \$50,000,000 vs. baseball's \$40,000,000. As for labor-management relations, Gen. Sarnoff said the day of "warrior leaders" is past. This is an age for "economic statesmanship," he said — for understanding and adjustment required by great technological development and rapid change. Note: TV-radio are still biggest income source for AFM members, convention was told; radio networks & stations accounted for \$16,887,000, TV for \$7,721,000 last year. This doesn't include sums spent for musicians on TV films, while record making accounted for another \$3,651,000, transcription companies for \$1,330,000.

Bill implementing CBS pres. Frank Stanton's request for amendment of Communications Act, to permit series of electronic "Lincoln-Douglas" debates by Presidential candidates of 2 major parties on TV in 1956 (Vol. 11:22), will be offered by Rep. Harris (D-Ark.), who heads House communications subcommittee which may hold hearings on subject this summer. Dr. Stanton's amendment, which has been forwarded to Senate & House Commerce Committees, would remove necessity of granting equal time to candidates of all minority parties.

TV applications on file with FCC now total 147, including 16 for uhf. Only one filed this week was for Ch. 11, Caguas, P.R., by owners of New Orleans' uhf WJMR-TV. Same group this week dropped application for Ch. 3 in Mayaguez, is negotiating to buy 30% of Mayaguez CP-holder WORA-TV (Ch. 5). [For details, see *TV Addenda 20-V* herewith; for complete listings of all grants, new stations, applications, etc., see *TV Factbook No. 20* with Addenda to date.]

WEHT, Henderson, Ky. (Ch. 50) has applied for permission to buy H. M. Bitner's WEOA (250-watts, 1400 kc, CBS) in neighboring Evansville, Ind., for \$116,000. WEOA, one of 3 Evansville competitors for Ch. 7, lost initial decision (Vol. 10:41) and Bitner now plans to drop TV application. March 31 WEHT balance sheet lists \$234,535 total assets, \$294,121 liabilities, with \$100,000 capital stock.

Report on new AT&T charges for off-air pickup last week (Vol. 11:23) was erroneous in one respect. The charge of \$81,865 is reduced by 1/36th for each month of use. Hence, customer who uses service for 3 years pays none of it, pays only monthly \$4640 charge.

Television Bureau of Advertising reports 143 members as of June 1, with addition of 6 stations & reps Harrington, Righter & Parsons.

Gist of the Arguments

Subscription TV: Summaries of Comments Filed with FCC

(Docket No. 11279)

Industry Responses as Requested in FCC Public Notice 55-165 of Feb. 11, 1955 Submitted up to June 9, 1955
Notice of Proposed Rule-Making Published in Full Text by *Television Digest* as Special Report, Feb. 12, 1955

AMERICAN BROADCASTING CO.—Not only does FCC lack authority to authorize subscription TV, argues 32-p. printed document, but, if authorized, “pay TV would destroy free TV.” The network “sees no reason, in view of the tremendous strides made by free TV in a few short years, of conferring on private persons the right to exact a toll on what the public sees over frequencies which the public itself owns.” Problem of obtaining time clearances is already “the major obstacle to the expansion of free TV.” With existing stations free to “transmit garbled programs,” clearance problem for sponsored programs would be aggravated.

Loss of outstanding free-TV programs to toll TV would be reflected in poorer free programs, and advertisers would gravitate to subscription TV—which “would not long forego the opportunity to tap a fertile source for additional revenue.” If fee TV were successful, it would demand more and more time, leaving less and less for free TV, with Commission helpless to stem the tide.

Specific arguments of subscription proponents are answered thus: (1) Pay TV won't result in “additional” programs or “supplementary” fare—“the public will merely be required to pay for what they now see free.” (2) Cultural programs won't be presented until “pay TV has most of the broadcast day and existing facilities to itself.” Only shows which bring in the maximum amount of money will be offered. (3) Argument that fee TV will encourage new station construction and help uhf is “sucker bait.” Subscription TV will naturally gravitate to stations with biggest audience and may “sound the death knell” of uhf. (4) “There is no concept in our theory of free enterprise which bestows a ‘right to try’ any and all schemes for the exploitation of public property.”

Address: 7 W. 66th St., N. Y. Counsel: McKenna & Wilkinson, 1735 DeSales St. NW, Washington, and Geraldine Zorbaugh, ABC gen. counsel.

AMERICANS FOR DEMOCRATIC ACTION (ADA)—Favors pay TV if there is assurance that it will not interfere with free programs, will provide new and additional programs, will produce “no evils of monopolistic control.” It states: “With proper governmental safeguards, subscription TV does offer promise of halting the present monopolistic trend in commercial broadcasting under which 2 networks and a limited number of large-market vhf outlets control and profit from the most lucrative programming.” It sees “nothing inconsistent with the American system of broadcasting” provided toll TV offers additional programs from additional stations “such as uhf commercial stations and educational stations which could not otherwise exist.” It recommends that pay TV be limited temporarily to uhf stations, on a trial basis.

Address: 1341 Connecticut Ave. NW, Washington (Edward D. Hollander, national director).

WALTER BARNEY—Claims to have an “improved card-actuated decoding system for use in conjunction with a

‘scrambled’ picture,” employing magnetic characteristics. Estimates subscriber's unit will cost \$25; station equipment, \$5000; auditing system for 200,000 cards, \$25,000. Short brief does not identify principal.

Counsel: Elliott & Pastoriza, 225 Santa Monica Blvd., Santa Monica, Cal.

JOSEPH BRENNER (Attorney)—Proposes in 7-p. brief: (1) Subscription TV be permanently limited to uhf stations. (2) FCC require all decoder devices to include uhf tuners. (3) No particular decoding method or device should be specified. (4) Commission require all stations to meet obligations to public on free basis, using fee TV only as additional service. (5) No restriction be placed on advertising on pay TV. (6) Multiplexed sound be authorized for subscription transmissions, permitting non-paying viewers to hear music or other aural programming, or promotional material about the pay program, at the same time subscription program is being carried. Eventually, subscription TV might use both channels to provide binaural sound. Ex-FCC attorney Brenner also filed 3-p. petition on behalf of CP-holder KBAY-TV, San Francisco (Ch. 20) urging fee TV as method of supporting small uhf stations specializing in matters of interest to local communities.

Address: 321 S. Beverly Dr., Beverly Hills, Cal.

CENTRAL BROADCASTING CO. (WEAU-TV, Eau Claire, Wis.)—Small-market stations, which have been unable to participate substantially in expenditures of network and national spot advertisers, will benefit especially from subscription TV, says 12-p. brief signed by pres. Walter C. Bridges. FCC can safeguard free TV by proscribing pay TV during certain time segments. Pointing to plight of uhf stations, brief says “it is apparent that there is insufficient economic support from advertising for the kind of national TV service envisioned by the Commission” in allocating over 2000 channel assignments to TV, taken up thus far by only 415 commercial and 13 educational stations. Subscription TV offers “reasonable source” of adequate economic support for a truly national TV system. “There is nothing legally improper or ‘un-American’ about a system requiring the entertainment consumer to pay . . .”

Counsel: Scharfeld, Jones & Baron, National Press Bldg., Washington.

COLUMBIA BROADCASTING SYSTEM—Though CBS asserts “we believe that there is real likelihood that pay TV would not succeed at all,” 69-p. printed brief states that if pay-as-you-see TV should succeed, such “success would be disastrous to the public interest.” Arguments are devoted to: “blackout” of channels now “dedicated to the use of the entire public,” “siphoning” of free audience so that “pay TV would be able to bid away from free broadcasting any attraction that it wanted” and a “divisiveness” which would make family pocketbook determine extent of viewing and listening, destroying “the broad democratic basis of present-day TV.” Among arguments:

While public has invested \$13½ billion in sets and servicing, it pays less than 1¢ per program per home. Attacking Zenith's claim that public ultimately pays for sponsored TV, CBS says: "It is a truism that the public bears the cost of the entire national economy, and, in this sense, it pays for admission to our national parks, for walking on paved streets and for going to museums." Stating that economics would drive pay TV to seek the most popular free programs, CBS says it's inevitable that blackout of even a few markets to advertisers will start cycle of destruction of networks and favorite programs as well as little that it doesn't now receive—simultaneously charging public for fare it now enjoys.

Brief analyzes in detail the "bait" offered by proponents: first-run movies, Broadway plays, sports, cultural and educational programs, more stations, elimination of advertising. Conclusion is that pay-TV would offer public very little that it doesn't now receive—simultaneously depriving it of much of what it now enjoys.

It's suggested that FCC is obligated to authorize pay-TV on wired systems first. An "experiment" on stations, CBS says, would cause "incalculable" damage from which it would take years to recover. FCC's authority to grant commercial pay-TV operation is questioned and it's urged that express Congressional approval be sought.

Address: 485 Madison Ave., N. Y. Counsel: Rosenman, Goldmark, Colin & Kaye, 575 Madison Ave., N. Y. (Sydney M. Kaye, Ambrose Doskow); CBS (Julius F. Brauner, Thomas K. Fisher, Leon R. Brooks).

CONNECTICUT RADIO FOUNDATION (uhf grantee WELI-TV, New Haven, Conn.)—Readopts position taken in pleading filed Aug. 7, 1953, favoring authorization of pay TV on uhf.

Counsel: Dow, Lohnes & Albertson, Munsey Bldg., Washington (Thomas J. Dougherty).

GULF TELEVISION CO. (KGUL-TV, Galveston, Tex.)—"Proposal is so revolutionary and so important to the American people that the entire matter of policy should be referred to Congress," states 13-p. brief signed by Paul E. Taft, pres. Public bought its TVs in reliance on free broadcasting, and pay-TV is "such a departure from past and present practices as to raise the question of whether the Federal Govt. is keeping faith with the people." If adopted, govt. regulation will be necessary to protect public from "rate-gouging." Subscription TV "means a metamorphosis of TV broadcasting from a competitive industry to a governmentally-controlled industry."

Counsel: Scharfeld, Jones & Baron, National Press Bldg., Washington.

HICKORY HILL BROADCASTING CO. (radio WTWA, Thomson, Ga.)—Owner Edgar Kobak, onetime Mutual pres. and NBC v.p., urges: (1) Toll radio be considered. (2) Hearings covered by TV-radio. (3) Investigation into how charges would be made and who would be paid. (4) Study of whether Govt. should charge for licenses. (5) A look into the rights of set owners who now pay "very large sums annually" for maintenance, electricity, etc. (6) Consideration of pay-TV effect on a national emergency—whether it would "handcuff the greatest means of mass communications."

HOUSTON POST CO. (KPRC-TV)—U. S. telecasters in last 7 years have built up, with advertising support, "the greatest system of TV anywhere in the world," states v.p.-gen. mgr. Jack Harris in 3-p. brief which objects to "such a contracting and delimiting factor as pay-as-you-see TV." Under toll system proposed, "the more successful the plan, the larger portion of time will be blacked out on the sets of those who do not subscribe . . . millions of people have spent several hundred dollars each for TV sets [and] bought these sets under the supposition that the programs would be free. These people might feel short-changed if they had now to start paying for their home

entertainment, or find that their sets were of use only part of the time unless they paid additional fees."

Counsel: Miller & Schroeder, National Press Bldg., Washington.

INTERMOUNTAIN BROADCASTING & TV CORP. (KTVT & radio KDYL, Salt Lake City)—Submitted one-paragraph statement disagreeing with NARTB's position on pay TV, saying it "wishes to make clear that the views expressed [by NARTB] are not the views of this station." Stations are 80% owned by Time Inc., 20% by G. Bennett Larson, pres., who signed statement.

INTERNATIONAL TELEMETER CORP.—Owned 80% by Paramount Pictures Corp., operator of KTLA, Los Angeles, company's 82-p. printed brief gives views of sole movie producer among those offering comments. Basic thesis is that "the tremendous cost of motion picture production completely precludes the possibility that any new or current motion pictures could ever be presented on so-called 'free TV'" and that "many millions of TV viewers throughout the country would be completely satisfied to pay a small amount to see these new or current motion pictures in the comfort of their own homes." It's stated that toll TV would stimulate theatre movie exhibition and improve TV advertising techniques—making for a "competitive co-existence in which the public would be the beneficiary"—and that broadened economic base "will rescue for the public the many entertainment events now lost or soon to be lost to sponsored TV."

Prosperity of theatre boxoffice will continue, it's said, because only theatres can provide latest technical advantages while TV standards are "frozen". Brief says pay-as-you-see TV will make more stations economically feasible and aid uhf. As for legality of toll TV, document states that advertiser-supported TV-radio was result of "natural development of the industry rather than the product of Congressional or regulatory measures" and that pay-see would not be a common carrier.

Half of brief is devoted to diagrams and tables covering economics of sponsorships and technical description of system—including first description of "marquee" technique, which provides 2 pictures on same channel by a sort of picture multiplexing arrangement. Using this plan, viewers who haven't paid for the subscription program would see a "marquee" or billboard, advertising the subscription attraction. When coin is inserted, "marquee" would be replaced by the pay-TV program. Telemeter says this 2-picture, 2-sound channel system can be put on single 6-mc channel by principle of "frequency interleaving."

Addresses: International Telemeter Corp., 2000 Stoner Ave., W. Los Angeles, Cal.; Paramount Pictures Corp., 1501 Broadway, N. Y. Counsel: Arnold, Fortas & Porter, 1229 Nineteenth St. NW, Washington (Paul A. Porter, Harry M. Plotkin).

JERROLD ELECTRONICS CORP.—Manufacturer of community antenna equipment and operator of community systems, in 22-p. statement, alleges: "(1) The scrambled broadcast technique is technically and economically unsound. In addition, it represents a most serious threat to basic concepts of American radio and TV broadcasting. (2) The only practical way to bring subscription TV programming to the American public is by means of wire, utilizing technical facilities similar to those now widely used by cable community TV systems. Without disturbing any established principles of broadcasting, tests to determine public acceptance of subscription TV can be launched immediately in areas already wired. Widespread extension of the service can thus be made rapidly and economically, if public demand so indicates."

Company claims that any scrambling system can be "broken with ridiculous ease," inviting "bootlegging" of pay-TV programs, but that wired system would preserve security of pay system. Says metropolitan areas can be wired at average cost of \$45-\$75 per home, that Jerrold is

prepared to cooperate in tests immediately. Included is analysis of coding and decoding principles, by research v.p. Donald Kirk.

Address: 23rd & Chestnut Sts., Philadelphia (Milton J. Shapp, pres.). Counsel: Welch, Mott & Morgan, 710 Fourteenth St. NW, Washington (E. Stratford Smith).

JOINT COMMITTEE ON TOLL TV (also known as **Committee Against Pay-as-You-Sce TV**)—167-p. printed brief contends:

(1) FCC has no legal authority to approve subscription TV, but whether or not it does, it should first obtain approval of Congress because "the Communications Act was enacted and amended in the light of the existing pattern of an advertiser-supported broadcast industry, and it does not afford adequate basis for authorizing subscription TV."

(2) Pay-TV isn't in public interest, should be denied.

(3) Full evidentiary hearing should be held to obtain testimony under oath and subject to cross-examination.

(4) Some form of toll TV might be desirable: "For example, it is conceivable that a subscription TV proposal to use existing common carrier facilities, in a closed-circuit type of operation, would supplement rather than supplant existing TV service and might, therefore, reasonably be found to be in the public interest."

(5) There's no evidence subscription TV will work, but if it does it will destroy free TV by diverting from it program resources, talent, audiences and income.

(6) Pay TV is no "panacea for the ills of the industry," because it could not succeed if restricted to uhf and because, "with conversion problems of its own, it would be of no immediate aid to conversion-hungry uhf stations."

Brief includes analysis of annual cost to viewer of fee and free TV, breakdown of set ownership by income groups and occupations, analysis of consumer expenditures, growth of newspaper circulation and radio set sales, etc.

Address: 608 Fifth Ave., N. Y. Counsel: Cohn & Marks, Cafritz Bldg., Washington (Marcus Cohn).

NATIONAL ASSN. OF RADIO & TV BROADCASTERS (NARTB)—Calls establishment of fee-TV system in broadcast bands "breach of faith" with set owners and "completely repugnant to the historical concept of public ownership of the air waves" in 37-p. printed brief. Subscription TV would flatly contradict mandate of Communications Act and would in effect require viewer to have a "license" to use his set on certain channels—"private entertainment confined to a privileged few at the overall expense of the American public." Fee-TV could transform whole telecasting system into a "closed-circuit," since "an industry half free and half slave would either not long survive or would eventuate into a system where all broadcasts were directly chargeable to the consumer." Citing FCC's recent decision classifying FM simplex and multiplex systems as non-broadcast services, NARTB says that "if simplex is not broadcasting, then, by no stretch of the imagination can subscription TV be so construed."

Address: 1771 N St. NW, Washington. Staff & Counsel: Thad H. Brown Jr., V. T. Wasilewski & W. R. Powell Jr.

NATIONAL ASSN. FOR BETTER RADIO & TV—Urges "fair trial" for fee TV in 7-p. mimeographed comments, saying it would mean "the viewing audience at home will be the dictator of programming, not advertising agencies or networks anxious to please the sponsors." Of NAFBRAT board members, 26 favor trial, 3 oppose, 15 are undecided.

Address: NAFBRAT, 882 Victoria Ave., Los Angeles (Mrs. Clara S. Logan, pres.).

NATIONAL BROADCASTING CO.—Printed 28-p. brief, first to be released and detailed in Vol. 11:23, pp. 1 & 5, calls pay-TV "narrowcasting," argues that it "violates the American concept of freedom to listen and freedom to look." Institution of pay-TV would have these effects:

(1) Free TV program quality would suffer because diminished set circulation would make sponsorship less

attractive to advertiser. (2) Outstanding programs and stars would move from free to pay TV. (3) Sports events would disappear from free TV. (4) Public service programming would be curtailed or abandoned because they wouldn't be profitable on fee TV, and free broadcasters would no longer be able to afford them. (5) Movie industry may gain control of TV programming "as an opportunity to collect billions." (6) Pay TV would black out free TV in millions of homes.

Submitted by: David Sarnoff, chairman, NBC, 30 Rockefeller Plaza, N. Y.

NATIONAL THEATRE ARTS COUNCIL—Representing legitimate stage interests, Council's short mimeographed statement urges adoption of subscription TV because "we feel that home subscription TV will add a new dimension to the entertainment scene which will double or triple production activity in both Hollywood and New York." It claims that pay TV "will give Broadway producers, for the first time, an opportunity to benefit from the mechanical syndication of their own creative efforts."

Address: 130 W. 56th St., N. Y. (Byron Bentley, pres.).

GEORGE W. OVERTON & LAURIN H. HEALY—The principals, attorney and public relations counsel, respectively, suggest that "permission be given to the holders of non-commercial licenses to introduce subscription TV," and that "the rules under which such permission be granted be such as will emphasize the use of the medium for education and group communication, in contrast to maximum audience programs in which they would be competing with commercial networks." Principals state they represent only themselves.

Address: 134 S. LaSalle St., Chicago. Counsel: Taylor, Miller, Busch & Magner, same address.

ROBERT ROBINS—Filing as an individual, Robins says he has "copyright claim of originality and novelty covering the plan of TV transmission of TV programs where the recipients thereof pay for same and which are free from advertisers' sponsorship." Notes that he participated in FCC's TV proceedings in 1936.

Addresses: 8969 Sunset Blvd., Los Angeles, and 982 National Press Bldg., Washington.

SKIATRON—With photos & diagrams, 81-p. printed brief stresses superiority of its decoder or unscrambler, which it proposes to sell outright to set owners at \$40 to \$50 (\$25 if mass produced); claims it's simple, easy to attach to existing set, includes uhf converter. It employs card developed with IBM, on which are listed programs for month; card has printed circuits on one side, is slipped into slot to operate set for particular program. Viewer would forward card monthly to local Skiatron franchise holder with check to cover total costs of programs selected (at 25¢ to \$2 per show).

Brief asserts subscription TV is not a common carrier, says FCC has authority to permit it, proposes to limit it to uhf for first 3 years "with minor exceptions" because most uhf stations are presently profitless or losing money. System "adds programs", it's claimed, and should not affect commercially sponsored network shows, will not itself carry commercials, offers what public wants but it not now getting because "inherent in sponsored TV is the fact that quality is basically subsidiary to mass appeal."

It's alleged there's "wide public resentment against the quality of commercials now being employed" and Edward T. Bernays surveys are cited to show that "this resentment stems not only from the so-called intellectuals but extends to every type of society and every age group."

Addresses: Skiatron Electric & Television Corp., 30 E. 10th St., N. Y. (Arthur Levey, pres.), owner of patents. Skiatron TV Inc., 665 Madison Ave., N. Y. (Matty Fox, pres.), holder of rights to exploit patents. Counsel: James M. Landis, 230 Park Ave., N. Y.; Lyon, Wilner & Bergson, Wyatt Bldg., Washington, D. C.

STEINMAN STATIONS (WGAL-TV, Lancaster, Pa. & WLEV-TV, Bethlehem, Pa.)—Short brief (4 p.) “views with alarm the adoption of a system which, if successful, will inevitably lead to the substantial reduction if not destruction of ‘free’ TV.” First-run movies would merely be “opening wedge” in forcing ever-increasing number of free programs to become unavailable and today’s “almost inexhaustible source of [TV] program material . . . will easily be moved into the category of unavailable TV material by the simple process of commercial bidding.” As for legality: “It is our firm conviction that the imposition of a rule which results in depriving a viewer of his present unhampered right to receive a signal . . . unless he has entered into a private contractual relationship with a third party, is unlawful and entirely inconsistent with the statute of the mandate which gave birth to the ‘free’ system of TV in this country.”

Address: WGAL Inc., 21 S. Queen St., Lancaster, Pa. (Clair R. McCollough, pres.). Counsel: George O. Sutton, National Press Bldg., Washington; Duke M. Patrick, Colorado Bldg., Washington.

STORER BROADCASTING CO.—Nation’s largest multiple-station owner, Storer submitted brief mimeographed comments against subscription TV, alleging that: (1) FCC “would be over-extending the authority delegated to it by Congress” if it approved pay-TV. (2) Toll TV would “limit the ability of TV broadcasters to serve the public,” and destroy “the greatest attribute of free broadcasting—its universality, its ability to reach everybody everywhere, bringing them free entertainment, culture, news, editorial comment, and exchange of ideas.” (3) Pay-TV “will add nothing to present programming except a bill” and “may be expected to foster monopoly.”

Address: 1177 Kane Concourse, Miami Beach, Fla. Counsel: Dow, Lohnes & Albertson, Munsey Bldg., Washington (Thomas A. Wall); Abiah A. Church, of Storer.

LARRY WOLTERS—TV-radio editor of *Chicago Tribune*, speaking for himself, favors adoption of toll TV, stating that it offers an “attractive and most worthwhile” supplemental service; that it’s no threat to free TV; that it’s not un-American. Citing early Zenith test in Chicago, he says public is willing to pay for movies on TV; major boxing events would return to TV; pay TV would “save” baseball for TV. He doubts whether public would pay for Broadway plays or opera.

WACH-TV, Newport News, Va.—Reiterates support of Skiatron petition filed Sept. 13, 1954 asking FCC to amend rules to permit stations to broadcast subscription TV; it would be great help to uhf as well as small-market vhf stations, said original document.

Counsel: Eugene L. Burke & Doris R. Williamson, 821 Fifteenth St. NW, Washington.

KBST-TV, Big Spring, Tex.—Same as WACH-TV, Newport News, Va.; same counsel.

WDSU-TV, New Orleans—Boxoffice TV would be “a highly specialized service directed not to the general public but rather to a relatively limited list of subscribers who choose to pay for that service [and] should accordingly be assigned to frequencies not presently allocated to the free system of TV,” states 7-p. legal brief signed by exec. v.p. Robert D. Swezey. “There is an element of custodianship in the present free system which the American people will be most reluctant to supplant or weaken in favor of a cash-&-carry substitute.” Fear is expressed that free system will be so weakened as to public service obligations—such as handling of news and controversial subjects, which fee-TV doesn’t propose to assume—and that it would have deleterious effect on advertiser-sponsored broadcasting and tend “to siphon off the cream of the programming into the pay-&-see system, leaving to free TV . . . only the routine, drab and pedestrian fare considered unworthy of acquisi-

tion by subscription TV.” In New Orleans, 52.2% of population in 1950 had annual income less than \$2500, and could not be expected to pay for TV shows.

Counsel: Miller & Schroeder, National Press Bldg., Washington.

WSAZ INC. (WSAZ-TV, Huntington, W. Va.)—Short mimeographed comment terms pay-TV proposals “a calculated attempt to supplant the existing nationwide free TV service with a Pay-as-You-See substitute to charge the public for what it is now receiving free,” by diverting talent and audiences from free TV. It charges that toll TV won’t bring new educational programs nor will it foster construction of new stations, noting that “patent holders” aren’t offering to build stations in small markets. Claims pay system will obsolete all sets.

Counsel: Cohn & Marks, Cafritz Bldg., Washington (Leonard H. Marks).

ZENITH RADIO CORP.—72-p. brief, plus engineering supplement, recommends no commercials on subscription programs, ban on charging public for programs now paid for by advertisers, limit of 15% of station broadcast time to subscription shows. Stressed is supplementary nature of subscription system, brief stating “it is utterly naive to assume that subscription TV could obtain public acceptance if it attempted to charge the public for programs now regularly available on a sponsored or sustaining basis.”

Included is detailed technical description of Phonevision system and analysis of programs to be sought for subscription shows. Zenith would limit Phonevision operations to “several” markets, to be selected by FCC, for about 18 months following authorization. TV owners would rent decoders for nominal monthly charge, would pay only for shows they watch. Stations could buy or rent subscription programs from national or local organizations. Independent local companies would be licensed to operate Phonevision in various communities.

It’s suggested that FCC prohibit purchase of subscription programs from networks: “In this way, the Commission could create a truly competitive situation in which the networks would bend their efforts to producing the best possible advertising programs. At the same time, prohibition of advertising network participation in subscription service would tend to dilute the present 2-network monopoly over programs and revenue . . .”

Addition of subscription programs would enable hundreds of additional stations to operate profitably, it’s contended, whereas $\frac{2}{3}$ of post-freeze stations now on air are losing money, and only 417 commercial stations (out of 1875 authorized allocations) and only 13 educational (out of 242 allocations) are now on air. Finally, brief says Communications Act contains specific direction that FCC encourage new uses of TV & radio, therefore FCC has “statutory obligation” to approve fee TV.

Addresses: Zenith Radio Corp., 6001 W. Dickens Ave., Chicago (E. F. McDonald Jr., pres.). Teco Inc., 231 S. LaSalle St., Chicago (S. I. Marks, pres.), promoter of Phonevision equipment, granting of franchises, distribution of programs. Counsel: Pierson, Ball & Dowd, Ring Bldg., Washington (for Zenith); Loucks, Zias, Young & Jansky, 1317 F St. NW, Washington (for Teco); Joseph S. Wright, Zenith gen. counsel.

APPEARANCES—Submitting no statements but filing notices of appearance were following: WGAR, Cleveland; WRFD, Worthington, O.; WTOH-TV, Toledo; WBID-TV, Detroit; WKOW-TV, Madison; WCCO-TV, Minneapolis; WSJS-TV, Winston-Salem; WABT, Birmingham; WJIM-TV, Lansing; WMTW, Poland Spring, Me.; WDSM-TV, Superior. (All foregoing filed by counsel Fly, Shuebruk, Blume & Gaguine, 30 Rockefeller Plaza, N. Y. and 1001 Connecticut Ave. NW, Washington.) Appearance also filed by TV Consumers Inc., 519 Main St., E. Orange, N. J. (Walter C. Routson, pres.).

Television Digest

with **ELECTRONICS REPORTS**

PUBLISHED WEEKLY BY RADIO NEWS BUREAU • WYATT BLDG. • WASHINGTON 5, D.C. • TELEPHONE STERLING 3-1755 • VOL. 11: No. 25

SUMMARY-INDEX OF THE WEEK'S NEWS—June 18, 1955

TV-RADIO SERVICING currently \$1.5 billion-a-year industry, equalling or exceeding annual retail dollar value of receivers themselves for first time (p. 1).

ZENITH PRESTIGE HURT in industry & Govt., dealers & distributors disturbed by excessive attack on RCA chairman David Sarnoff (pp. 2 & 5).

AD HOC ALLOCATION committee, meeting next week, gets puzzling assignment from Sen. Magnuson: "Increase utilization of uhf" by adding more vhf channels (p. 2).

COMMISSION HIT by 2 Appeals Court decisions which attack its methods and criteria for determining applicants' qualifications (pp. 3 & 5).

COLOR HIBERNATING for summer, with 2 programs scheduled by NBC, none by CBS—as manufacturers show little inclination to push color set sales now (p. 3).

TELECASTING REVENUES hit \$593,000,000 in 1954, up 37%; income before taxes mounts to \$90,300,000, up 33%; networks are heaviest gainers (p. 4).

RETMA CONVENTION accents electronics expansion, optimism on TV-radio sales—7-7,300,000 TVs seen this year. Labor seeks guaranteed annual wage (p. 9).

QUESTIONABLE ADVERTISING practices replace servicing as chief complaint of TV-radio consumers, annual report of Better Business Bureaus reveals (p. 11).

BUSINESS FAILURES among TV-radio-electronics manufacturers declined to 26 in year ended April 30; industry spurious radiation control plan imminent (p. 11).

SENATE CONFIRMS MACK appointment to FCC. KONO gets examiner's nod for San Antonio; allocations petitions filed, involving deintermixture & satellites (p. 6).

NEW STATURE attained by TV editors & columnists, with TV now regarded as "darling of the dailies"; Crosby's blacklisting expose exemplifies new maturity (p. 8).

PITTSBURGH MERGER of WWSW and WJAS apparently paves way for early Ch. 11 grant to new combine, assured of CBS affiliation, as city's 2nd vhf (p. 8).

TV-RADIO SERVICING—\$1.5 BILLION INDUSTRY: The dazzling rise of servicing business as natural concomitant of high level of set penetration among nation's 48,000,000 families (75% for TV, nearly 100% for radio) has now reached the point where its annual gross dollar volume equals or exceeds retail sales value of new receivers themselves. That astonishing comparison was contained in annual report of RETMA service chairman H.J. Schulman to organization's 31st annual convention this week in Chicago's Palmer House. (For other news of RETMA convention, see pp. 9-11 & 13.)

Service director & asst. to CBS-Columbia pres. H.C. Bonfig, Schulman later told us he expects servicing volume to exceed \$2 billion by 1957. His report to the convention stated that in 12 months ending June 30, annual cost of servicing to set owners was over \$1.5 billion, dominantly TV. He said this equalled or exceeded the retail dollar value of the 7,900,000 TVs and 12,500,000 radios sold in that period.

Contributing to over-\$1.5 billion service bill were antennas, parts, installation (\$800,000,000) & labor (\$770,000,000), Schulman told us. Against that total, here's how trade statisticians break down TV-radio set cost in July 1-June 30 period:

Retail TV volume -- \$1.277 billion, derived from sale of 7,900,000 sets, at average factory price of \$130, plus markup of 25% from factory-to-dealer; retail radio volume -- \$300,000,000, from sale of 12,500,000 sets, at average factory price of \$20, also marked up 25%. Total TV-radio volume is thus about \$1.577 billion.

Schulman's estimate jibes with figures of Charles M. Odorizzi, RCA corporate exec. v.p., who placed 1953 TV-radio servicing bill at \$1.4 billion in speech last Dec., in which he predicted that an annual servicing gross of \$2.7 billion would be attained by 1957 (Vol. 10:48).

Quality of servicing is evidently improving, along with expansion of dollar volume. Kenneth B. Willson, pres. of National Better Business Bureaus, told his organization's convention in Minneapolis that in survey of 78 member bureaus, 46 reported decreases in consumer complaints about servicing, 20 reported number of complaints same, 6 increased over 1954. (Other BBB convention news on p. 11.)

IT'S AN OLD RUSSIAN CUSTOM': Main unofficial conversation piece at RETMA convention in Chicago this week -- as well as at other levels of industry and at FCC -- was exchange of bitter statements between Zenith pres. Comdr. E.F. McDonald and RCA chairman Gen. David Sarnoff, over subscription TV. Here's the consensus of comment, as we gleaned it:

McDonald went too far. He injured his personal prestige, hurt his company's position with thousands of dealers and its own distributors, certainly did his cause of subscription TV no good -- with his press statement denouncing Sarnoff and literally dragging in this remark: "It's an old Russian custom to claim credit for the work of others and to deny that anyone else can produce a worthwhile discovery." He was replying to the Sarnoff attack on toll TV and denial that RCA had ever offered to buy Zenith phonevision patents (Vol. 11:24).

Feud between these two masters of the publicity arts is a matter of long standing in the courts, in the marketplace and in print. But the implication in McDonald's allusion to "Russian custom" was just a bit too raw for even some of Zenith's strongest partisans.

Gen. Sarnoff didn't lash back again, but his spokesmen say he takes great pride in his rise from humble origins as an immigrant boy from Russia; they also observe that it was RCA's Russian-born Vladimir Zworykin whose inventions did much to make modern TV possible.

Zenith's publicity over controversies has in the past sold a lot of its top-grade products -- TVs, radios, hearing aids -- but there are many who feel that McDonald has overreached himself this time. Evaluating Zenith's publicity campaigns, one intense competitor says: "My advertising budget runs 4 or 5 times that of Gene McDonald's -- but I can't get the publicity he does, especially in the Chicago newspapers and on the press association wires. He seems to be able to turn it on or off at will. I wish you would tell me how to do it, too." Then he added, somewhat ruefully: "But I guess I'm just not built to stir up controversies."

(For summary of the Sarnoff-McDonald exchange, see p. 5.)

SENATE BEGINS ITS ALLOCATION STUDY: Ad hoc committee of industry engineers, formed under aegis of Sen. Magnuson's Commerce Committee (Vol. 11:23-24), meets next Tue. June 21 to organize what is billed as a "reappraisal of the FCC allocations."

Engineering committee has a puzzling assignment. In statement announcing the formation of the group, Sen. Magnuson said the allocation study would be carried out with "an eye toward bringing about increased utilization of the uhf band."

Then Magnuson listed these "aims" for the study: (1) Determine whether 3 more vhf channels can be carved out of FM band. (2) Study whether allocation plan can be rejiggered so that unused vhf assignments can be moved to areas where there's demand for them. (3) Check into advisability of drop-ins of more vhf channels, using directionals, etc. (4) "The possibilities involved in selective deintermixture."

Industry people were dubious about how the committee could increase "utilization of the uhf band" by adding more vhf channels. And nobody we contacted seemed satisfied with composition of group. Those organizations not asked to name representatives charged discrimination; others said committee was "loaded" in one direction or another. At first meeting, Magnuson's chief TV investigating counsel, Sidney Davis, will urge members to act in interest of public, regardless of own connections.

Committee will probably have 10 or 11 members. Possible candidate for chairman is Haraden Pratt, former top IT&T official, 1951-53 telecommunications adviser to President Truman and regarded as an elder statesman of communications industry.

Eight companies and organizations have been asked to loan top engineering talent to the study. Though Senate Committee hasn't announced individual names yet, these engineers are expected to attend first meeting: ABC engineering v.p. Frank Marx, CBS engineering v.p. Wm. B. Lodge, Dr. Allen B. DuMont (who probably will pick another DuMont engineer for subsequent meetings), NBC allocations expert Wm. Duttera, Philco radio-appliance research director Don Fink (selected by RETMA), NARTB engineering dept. mgr. A. Prose Walker, a member designated by UHF Industry Coordinating Committee and a representative of FCC (probably chief engineer Edward Allen).

APPEALS COURT DECISIONS ROCK COMMISSION: FCC was still recovering this week from 2 decisions by Court of Appeals. In Clarksburg, W.Va. protest case, court told Commission it's neglecting the public interest, in almost those words -- in matters of protests, overlap, multiple ownership, diversification, newspaper ownership, quick grants, community antennas, etc. In Ft. Wayne case, without even looking into merits of appeal, it ordered Commission to reopen hearing to determine what effect recent death of Anthony Wayne principal Paul V. McNutt would have. Observers generally considered court's decision most unusual.

Essence of court's decision in Clarksburg case was that FCC cavalierly tossed aside allegations made by Exponent & Telegram against grant of WBLK-TV (Ch. 12); that Commission's desire to expand TV service after long freeze was no excuse for hasty action; that FCC has duty to explore far more deeply into every application -- regardless whether any competing party calls Commission's attention to possible shortcomings of the applicant.

Court went so far in its dictum that it virtually told Commission it should have denied WBLK-TV for simple reason that its owners have too many newspaper and broadcast interests in the area -- regardless of anything else.

* * * *

As a practical matter, FCC did expand TV rapidly after the freeze by giving protests brief treatment and by "next-day" grants after dropouts and mergers. Most of resultant grantees are on air -- and their signals won't be removed. However, pending applicants with a diversification or overlap problem are given plenty to think about. Most interesting will be court's forthcoming decision on McClatchy case -- wherein appellant charges that FCC is being too strict on the newspaper-diversification issue, instead of too lenient.

Court of Appeals obviously feels the Commission is getting lax, simply isn't regulating to extent law demands. On other hand, U.S. Supreme Court has power to tell appeals court that it's going too far the other way -- as it did last week in Allentown radio case (Vol. 11:24). In meantime, too, FCC is laboring mightily to persuade Congress to take burden of protest rule off its back, and it looks as if it has strong chance of success (see p. 14).

Tide of govt. checks-&-balances thus flows back and forth -- with just plain luck frequently determining whether a broadcaster is at right place at right time. (For details of the 2 decisions, see p. 5.)

COLOR TV DORMANT FOR THE SUMMER: There'll be virtually no color TV programming on the networks this summer, and no attempt to push color sets. If individual color-equipped stations want to promote color, they'll go it alone for several months.

Both CBS & NBC have announced big plans for star-studded special programs next season, together with perhaps a few regular shows in color. But for this summer, here's the whole schedule: NBC -- 2 spectaculars in the "Producers' Showcase" series, July 25 & Aug. 2, and perhaps an occasional color segment in Today and Home shows. CBS -- nothing till September. ABC continues its monochrome-only policy.

With the nation's 20,000 color sets lying fallow this summer, manufacturers obviously have no serious intention of trying to sell more. Color talk was almost totally absent at this week's RETMA convention (see p. 9) -- except for this almost-passing reference in annual report of outgoing pres. Glen McDaniel:

"Color TV has failed to reach the conservative forecast of set production and sales, although a number of manufacturers believe the fall will see a definite forward movement. Everyone agrees that color TV will bring another industry boom that will overshadow the early days of black-&-white, but there are a variety of opinions as to the timetable and conditions of this boom."

Even RCA was uncharacteristically modest last week when it displayed 2 color sets in its new line with no hoopla at all (Vol. 11:23). DuMont came out this week with a color set incorporating RCA-type tube, listing at \$945, but Dr. DuMont said production would be confined to "just a few samples" as an "interim proposition" for the fall market, in case there is any demand.

FCC CONFIRMS TV REVENUE-PROFIT ESTIMATE: We hit it virtually on the nose a year ago, when we predicted network-&-station TV revenues would reach \$600,000,000 for 1954 (Vol. 10:23). FCC's final figure for 1954, released this week, was a whopping 37% increase over 1953's -- \$593,000,000 vs. \$432,700,000. Profits swelled with equal impressiveness, rising to \$90,300,000, up 33% from 1953's \$68,000,000.

With every index pointing to increase of 30% or so this year, it looks as if network-&-station revenues for 1955 should hit \$775,000,000 or better. And, since total TV advertising bill ran \$809,100,000 in 1954 (including payments for talent, ad agency commissions, production of commercials, etc.), it appears that \$1 billion total predicted for this year is a safe bet (Vol. 11:15).

Biggest increase in revenues and profits before taxes was among networks and the 16 stations they own -- accounting for 52% of industry's total revenues, 40% of its profits. Their revenues went from \$231,700,000 in 1953 to \$306,700,000 in 1954, profits from \$18,000,000 to \$36,500,000.

Revenues of the other 92 pre-freeze stations rose 15%, from \$174,500,000 to \$200,900,000, while their profits rose 12%, from \$60,500,000 to \$67,600,000.

Though many post-freeze stations are doing handsomely, both vhf and uhf stations lost money -- as a group. The 177 post-freeze vhfs took in \$60,000,000, lost \$3,800,000; the 125 uhfs' revenues were \$25,400,000, losses \$10,000,000.

Losses of the vhfs, as a group, may be attributed to several factors -- the newness of many, incidence of small-market stations, inability to obtain major network affiliations; one-third are less than a year old. Same factors apply to uhf -- plus problems of set conversion -- though "small-marketitis" is actually more prevalent among vhf stations than among uhf.

FCC's report was a summary; its customary detailed tables -- breaking down figures by markets, etc. -- will be issued in month or 2. Its AM figures are due last part of year. It's dubious whether radio revenues will exceed the \$475,300,000 of 1953; same goes for the \$55,000,000 income before taxes of 1953.

Personal Notes: Ralph W. Hardy, for last 6 years NARTB executive, most recently as govt. relations v.p., originally hailing from KSL-TV & KSL, Salt Lake City, becomes CBS Washington v.p. in Sept., succeeding Earl H. Gammons, who retires but will continue handling some work for CBS . . . Wm. Fay becomes pres., Robert C. Tait chairman of Stromberg-Carlson Bestg. Co. (WHAM-TV & WHAM, Rochester), reorganized to become subsidiary of General Dynamics Corp. when it merges present parent company (Vol. 11:18); changed corporate setup is required because Dynamics has several Canadians on its board . . . Harry Trenner, who sold his Station Film Library Inc. to General Teleradio, named GT v.p. and sales v.p. of its Mutual Network . . . John W. Patt, pres. of WJR, Detroit and upcoming WJRT, Flint, who suffered heart attack while at NARTB convention, may be sufficiently recovered by week of June 20, say his doctors, for release from Georgetown Hospital, Washington, and return to Cleveland home . . . John A. Schneider named CBS-TV Spot Sales eastern sales mgr., succeeded as midwestern sales mgr. by Tom W. Judge; Edward A. Larkin named mgr. of Los Angeles office, succeeding Richard Loughrin, who joins N. Y. office; Richard R. Loftus named Detroit mgr., succeeding Tony Moe, also transferred to N. Y. . . . Lee B. Wailes, Storer exec. v.p., departs June 18 for month in Europe . . . Tom Chauncey, 20% stockholder, now managing director & gen. mgr. of KOOL-TV, Phoenix, having succeeded Charles H. Garland, who suffered stroke recently . . . Ernest Felix, ex-treas. & gen. mgr. of ABC western div., now management consultant, named exec. adviser for Taft stations WKRC-TV & WKRC, Cincinnati & WTVN-TV & WTVN, Columbus . . . I. E. (Chick) Showerman, gen. mgr. of Hearst Corp.'s WISN-TV and radio WISN, Milwaukee, has been elected Hearst Corp. resident v.p. . . . Don Moore promoted to mgr. of CBS-TV story &

script dept., succeeding Edgar Peterson, now producer of network's *Climax* series . . . Gene Ragle, ex-KPTV, Portland, Ore., named operations director, KBET-TV, Sacramento . . . Elliott Rothchild named regional sales mgr. of WHUM-TV, Reading, Pa., succeeding Ed Walpert, resigned to join Arndt, Preston, Chapin, Lamb & Keen Adv., Philadelphia . . . Alex McKee named acting national exec. secy. of AFTRA, temporarily succeeding late George Heller . . . J. Elroy McCaw, owner of KTVW, Tacoma, and half owner of KONA, Honolulu, leaves June 18 on quick flying trip to Ethiopia to look over gold mining concession of Goldfields Consolidated, of which he is a director . . . John E. Mosman, ex-Maxon Inc., named TV-radio mgr., Marc Statler film production mgr., Biow-Beirn-Toigo, N. Y.; Arthur Napoleon appointed TV-radio mgr., Hollywood--all reporting to TV-radio v.p. Roy Winsor . . . Wm. J. Lyons, ex-BBDO, named asst. to Philip Rouda, v.p. in charge of TV-radio, Bozell & Jacobs . . . Sylvan Taplinger, ex-Hirshon-Garfield, named TV-radio director, Peck Adv.

More honorary degrees: George C. McConnaughey, FCC chairman, and Scripps-Howard Radio v.p. James C. Hanrahan, from Western Reserve U; Walter Ransom Gail Baker, GE v.p. & gen. mgr. of its electronics div., from Brooklyn Polytechnic Institute; Allen Balcom DuMont, from New York U (also from Fairleigh-Dickson College last week); Clair R. McCollough, from Franklin & Marshall College; Keith McHugh, pres., N. Y. Telephone Co., from Manhattan College.

George Cherry, 55, FCC docket clerk known to many in industry who use Commission reference room, died of heart attack June 11.

Sentencing of Mrs. Marie Natvig, turnabout witness convicted of perjury in Lamb case, is scheduled for June 20 in Washington Federal court.

IN CLARKSBURG PROTEST case (p. 3), Court of Appeals' basic ruling was that FCC erred in giving protestant mere oral argument instead of full evidentiary hearing, the court stating that FCC glossed over far too many important factors. What had Commission agog was extent to which court went in telling it just what it did wrong. Judges Edgerton, Bazelon and Bastian, in decision written by Judge Bazelon, stressed these points:

(1) "However unwittingly, the Commission seems to have assumed the defense of its grant, rather than the public interest, as its primary role in the proceedings."

(2) The "mechanical application of the Grade A-Grade B rule" in determining excessive overlap. Owners of WBLK-TV hold 34% of WTRF-TV, Wheeling. "Nothing in this record," court said, "tells us why the Commission decided that the instant Grade B overlap would not constitute 'serving substantially the same area' within the meaning of the rule."

(3) Commission's failure to determine role of Clarksburg community antenna system in overlap. "The Commission will presumably assert jurisdiction to regulate community antenna systems," court said, "if and when it concludes that such systems provide or are adjuncts of a broadcast service." Rest of decision gives FCC strong nudge to assume jurisdiction, may also imply that stations should seek to control use of their signals by community systems.

(4) Diversification. "Nothing in the present protest record dispels the impression that, on the concentration of control issue alone, the grant would not be in the public interest. There may, however, be matters not apparent to us which entered into the Commission's determination." In other words, court would have FCC deny application under such circumstances—large media holdings—even if applicant has no competitor for channel. This would revolutionize FCC policy.

Negotiations for sale of Denver's pioneer KFEL-TV (Ch. 2) are going on between owner Gene O'Fallon and J. Elroy McCaw, with price said to be around \$600,000. Station was offered several months ago at \$750,000. McCaw owns KTVW, Tacoma (Ch. 13), holds 25% of KONA, Honolulu (Ch. 11)—both of which he purchased as distress properties and both of which are now reputed profitable (see Vol. 9:26 & 10:28, 34, 38). McCaw is also owner or co-owner of radio WINS, N. Y. and 4 other radio stations.

Two TV-radio figures on White House staff shifted jobs this week. Fred Seaton, whose Seaton Publishing Co. holds CP for KTVR, Hastings, Neb. (Ch. 5), gives up duties as administrative asst. to President for congressional liaison, will handle liaison with Federal depts. & agencies. Howard Pyle, ex-Arizona governor who holds minority interest in KVAR, Phoenix (Ch. 12) & KTAR, becomes deputy asst. for intergovernmental relations, handling Federal-state relationships.

Gordon Gray, Winston-Salem publisher and broadcaster (WSJS-TV & WSJS) and ex-Army Secy., became an Asst. Defense Secy. June 17 when Senate confirmed his appointment (Vol. 11:24).

Frank W. Miller Jr., director of Headley-Reed TV, has purchased WHIM, Providence (1-kw-D on 1110 kc) for \$469,000 from group headed by Robt. T. Engles.

FCC is hiring more lawyers, will add some to Rules & Standards Div. to help in subscription TV proceedings, in addition to strengthening staff processing applications. Corps of examiners has been cut to 12, John B. Poindexter going to Office of Opinions & Review, Isadore A. Honig to Office of Gen. Counsel's Litigation Div.

(5) Dropout of competing applicant WPDx upon payment of \$14,000 for expenses, permitting grant of WBLK-TV next day. Court doubted FCC could complete "processing and review" and make grant properly so quickly.

For a windup, decision stated: "The Commission does not stand in the position of a 'traffic policeman with power to consider merely the financial and technical qualifications of the applicant.'" Full study must be made, it added, "even where an application is unopposed."

Beyond that, court said: "The Commission finds support for its action in its announced policy to accelerate the inauguration of TV service after the 'freeze' on new TV authorizations was lifted. Without minimizing the force of this objective, we think Congress did not intend that the Commission should abandon consideration of long range public interests in order to further short and, perhaps, doubtful ones."

Grasping decision immediately, WNHC-TV, New Haven and WATR-TV, Waterbury, asked FCC to give them full hearing on NBC's proposed purchase of WKNB-TV, New Britain (Ch. 30). And examiner James Cunningham, along with FCC itself, decided to reopen record in Spartanburg site-move case—involving protests against WSPA-TV modification of CP filed by WAIM-TV, Anderson and WGVL, Greenville, S. C.

In Ft. Wayne case, FCC had awarded Ch. 69 to Radio Ft. Wayne (WANE-TV) because its competitors' principals Paul V. McNutt and James R. Fleming held interests in *Journal-Gazette* and that newspaper had joint ad rates with *News Sentinel*. After losers appealed, McNutt died. FCC argued that court couldn't send case back to Commission until it considered appeal on its merits and unless it also reversed Commission. Court disagreed, sent case back for further hearing, stating: "The failure of this record to deal with Mr. McNutt's death may have [the effect of precluding a just decision], even if we assume, without deciding, that the record is adequate in all other respects."

The Sarnoff-McDonald exchange (p. 2): (1) Filing formal comments with FCC June 6, RCA-NBC chairman David Sarnoff urged denial of subscription TV, quoted numerous bearish statements about future of sponsored TV issued in past by Zenith pres. Comdr. E. F. McDonald. (2) McDonald responded by saying that: "On 3 separate occasions in recent years RCA has proposed that it buy rights to control our Phonevision development. On one occasion Sarnoff told me that if we sold RCA our patent rights, our path to establishment of subscription TV would be made much easier." (3) Sarnoff came back with charge that McDonald's report of an RCA offer to buy was "utterly false and untrue." He noted that Zenith attorney Thomas C. McConnell had been reprimanded by Rep. Emanuel Celler (D-N. Y.) for misleading statement to Judiciary subcommittee (Vol. 11:22), adding that "Mr. McDonald's irresponsible statement is so lacking in truth that he, like his lawyer, deserves severe criticism for his attempts to mislead the public, the industry, and the Govt." (4) McDonald countered with: "There is no more truth in that denial than in Mr. Sarnoff's recent loud claims that RCA invented magnetic tape video recording and atomic batteries—both of which were actually discovered by independents long before the RCA claims. It is an old Russian custom . . ."

Box Office Television Inc. (closed-circuit), now at 6 W. 57th St., N. Y., reorganized this week after several officials left to organize Sheraton Closed-Circuit Television Inc. (Vol. 11:24). Sid Caesar, now pres., has acquired controlling interest. Milton Mound continues as chairman, Wallace A. Ross & Edgar A. Rosenberg elevated to v.p. Arthur Knorr, exec. producer, Roxy Theatre, joins firm as v.p.

Telecasting Notes: 20th Century-Fox will release its backlog of feature films to TV—but doesn't believe the time is yet. So said pres. Spyros Skouras in answer to stockholder's question at recent meeting, partial transcript of which was released this week. He said company is now serving its best interests by selling its features only to theatres, but added: "When the 2-D system is completely eclipsed, and CinemaScope has replaced it, that will be a different situation. I am not of the opinion that because many films will be available that the price will be reduced. In the history of the amusement world, good merchandise is in great demand. As time progresses, the TV companies will need a better type of material than they get now" . . . "We are not concerned that we will lose the value of our backlog as time progresses," said Skouras. "I am not inclined to rush if somebody wants to buy, but to wait [because] the value increases as time progresses. Three years ago, I checked the market. I was offered a fourth of the price that I can get today for certain pictures from TV, and I think 2 years from now we will receive more. Also, the demands of TV are so great, they need so much material, that if we have good pictures we can sell them [when] we will get the maximum money" . . . Another "Peter Pan"? NBC has concluded negotiations for special color presentation of Thornton Wilder's *Skin of Our Teeth*, starring Mary Martin & Helen Hayes 7-9 p.m. Sept. 11, following same production's return from France, where it will be produced by American National Theatre & Academy in cooperation with State Dept. as part of special "salute to France" program . . . From current stage, members of cast of musical hits *Pajama Game* and *Damn Yankees* will be featured in as-yet-unwritten Oct. NBC spectacular starring Rosalind Russell and produced by her husband Frederick Brisson and Harold S. Prince, producers of the 2 musicals . . . Arthur Godfrey, he of the many dismissals and headlines, lost his 4th and last writer (Andrew Rooney) this week in amicable parting, says he's going "ad lib" henceforth; his other 3 script men, who were paid up to \$35,000 a year each, are now working for Garry Moore . . . Top foreign-language station WATV, Newark adds *Ukrainian Melody Hour* as Sat. 10-10:30 p.m. feature . . . Denver's KLZ-TV using 35mm film-trailer spots on local theatres to plug its shows and personalities.

Don't look for conclusive findings on projected sets-in-use progress report to be submitted to NARTB board's semi-annual meeting June 23-25 at Hot Springs, Va. County-by-county or market-by-market census of TV homes acceptable to all segments of industry remains one of real needs—but progress report to be submitted on results of Politz pre-testing (Vol. 11:21) isn't likely to give much hope to those who felt the census might get under way this year. It's expected to be another laborious report on methodology, will probably set no target date for start of census. TV board, meeting June 23, will discuss subscription TV and will get report from new code review board chairman G. Richard Shafto, WIS-TV, Columbia, S. C. Joint meeting with radio board final day will get report from membership committee chairman Richard M. Brown, KPOJ, Portland, Ore.

The screen "borrows" some more: MGM acquires screen rights to Paddy Chayevsky's latest *Philco Playhouse* hit "The Catered Affair"; 4 Hollywood majors bidding for screen rights to *Medic*; Wm. Altman, associate producer of *Studio One*, engaged to write screen play for Bob Hope's next Paramount feature, *King of Hearts* (Altman's TV play, "Operation Home," is being produced by MGM under title *Old Army Game*); Richard Carlson will produce, direct and star in movie version of his TV film series *I Led 3 Lives*; Warner Bros. plans to make feature of Eve Arden's *Our Miss Brooks*.

RICHARD A. MACK was confirmed by Senate June 17 to succeed Frieda B. Hennock on FCC July 1. Confirmation of the 46-year-old Florida Democrat came in record time—just one day after he appeared before Senate Interstate & Foreign Commerce Committee for good-natured routine half-hour hearing.

The personable, self-confident Mack obviously made good impression on Senators during hearing, was unanimously endorsed by the committee. Florida Sens. Smathers & Holland made brief statements in his behalf. In answer to short questioning, he indicated he's conservatively inclined, opposes "big Government." Chairman Magnuson (D-Wash.) urged him to try to whittle down Commission's processing backlog and minimize "delays." Mack replied that "regulatory lag" was always a problem and that he had fought it as a state utility commissioner. "I hope you'll become a good pike in a carp pond," said Magnuson.

* * * *

Commission made no decisions this week, being involved in civil defense test. Chief examiner James D. Cunningham issued an initial decision, however, recommending grant of Ch. 12 to KONO, San Antonio, denial of KMAC, on grounds that latter isn't financially qualified.

There were several allocations petitions, including one requesting deintermixture. WTVP, Decatur, Ill. (Ch. 17) asked that Ch. 2 be moved out of Springfield to some other area where it would create no intermixture problem. WGR-TV, Buffalo (Ch. 2), seeking satellites, proposed that Ch. 37 be added to Clymer, N. Y., Ch. 26 to Shinglehouse, Pa., substituting Ch. 62 for Ch. 37 in Meadville, Pa.—said it would apply for Clymer and Shinglehouse. Aaron B. Robinson, Jackson, Tenn., asked that Ch. 6 be assigned to Indianola, Miss., Ch. 44 to Clarksdale, Miss.; he plans to file for Indianola.

Private vs. AT&T microwaves: In comments filed this week, AT&T told FCC that stations' estimates of costs of building and operating their own off-air microwaves are unrealistic, ignoring many costs that phone company is required to include under FCC rules. Nevertheless, AT&T said, if stations want really cheap service, it will continue to seek methods of cutting costs. For example, station can cut AT&T charges by renting land, buildings and towers to AT&T—or by eliminating emergency power, etc. AT&T said that station figures ignore engineering surveys, legal expenses, engineering & installation costs, tower & equipment installation, test equipment & spares, access roads. WCSH-TV, Portland, Me. said it's satisfied with regular network service from AT&T but prefers to keep own private microwave for occasional pickups of Boston stations. KHOL-TV, Kearney, Neb., proposing to build satellite at Hayes Center, Neb., said that Raytheon would build it a 3-station system for \$37,056, whereas AT&T would charge \$2345 monthly plus \$37,680—latter figure to be reduced 1/36th monthly. KVEC-TV, San Luis Obispo, Cal. reported that it can build microwave to get Los Angeles signals for \$19,300 but that phone company would charge about \$30,000 yearly.

Unity Television Corp., one of largest distributors of feature film to TV, has been sold by Arche Mayers to group headed by Joseph Seidelman, former pres. of Universal-International, for more than \$5,000,000. Unity has some 650 features, 140 cartoons, 25 serials, 400 other shorts.

Quigg Newton Jr., Denver mayor who holds minority interest in KOA-TV, Denver, will become director of Ford Foundation's public affairs program Aug. 15, shortly after his second term as mayor expires.

Network Accounts: First NCAA football sponsors came into NBC-TV fold this week when General Cigar, thru Young & Rubicam, and Schick Inc., thru Kenyon & Eckhardt, each bought one-fourth sponsorship for 13-game schedule this fall . . . General Motors (Delco div.) to be alt. sponsor (with Lucky Strikes) of untitled post-Disneyland show on ABC-TV starting Sept. 14, Wed. 8:30-9 p.m., thru Campbell-Ewald . . . Borden Co. to sponsor *The People's Choice*, situation drama starring Jackie Coper, on NBC-TV starting in fall, Thu. 8:30-9 p.m., thru Young & Rubicam . . . Procter & Gamble buys *It Pays to Be Married* on NBC-TV starting July 4, Mon.-thru-Fri. 3:30-4 p.m. . . . Aleo (Crosley appliances) to be alt. sponsor (with Kleenex) of *Midwestern Hayride* on NBC-TV starting Aug. 19, Fri. 8-8:30 p.m., thru Earle Ludgin & Co. . . . Roto-Broil buys series of spots on NBC-TV's *Today, Home & Tonight*, under network's "summer incentive" discount plan . . . Maytag & Sheaffer Pen to sponsor re-runs of *That's My Boy*, which went off air Jan. 1, on CBS-TV starting July 12, Tue. 8-8:30 p.m., thru McCann-Erickson & Russel M. Seeds Co. . . . Amoco & Hamm Brewing Co. to sponsor *Windows* drama series as summer replacement for *Person to Person* on CBS-TV starting July 8, Fri. 10:30-11 p.m., thru Joseph Katz Co. & Campbell-Mithun . . . Lucky Strikes & Warner-Hudnut (Quick home permanents) to sponsor *Your Play Time* as summer replacement for *Your Hit Parade* on NBC-TV starting June 18, Sat. 10:30-11 p.m., thru BBDO & Kenyon & Eckhardt . . . Johnson's Wax & Pet Milk to sponsor *Spotlight Playhouse* as summer replacement for *New Red Skelton Show* on CBS-TV starting June 21, Tue. 9:30-10 p.m., thru Needham, Louis & Brorby and Gardner Adv. . . . General Foods (Maxwell House coffee & Swans Down cake mix) to sponsor one-shot *3 for Tonight* on CBS-TV June 22, Wed. 10-11 p.m., thru Benton & Bowles; stage version ends N. Y. run June 18, reopens at Greek Theatre in Hollywood shortly after telecast . . . Prudential Insurance Co. buys 7½ min. of Mon. 10:15-10:30 a.m. portions of *Garry Moore Show* on CBS-TV starting July 25, Mon.-thru-Thu. 10-10:30 a.m.,

Fri. 10-11:30 a.m., thru Calkins & Holden; S.O.S. Cleanser & Toni to be alt. sponsors of Fri. 10:30-10:45 a.m. portion starting July 15, thru McCann-Erickson & Leo Burnett Co. . . . Buick buys 7½-min. partic. on one-shot NBC-TV color "spectacular" Sun. Nov. 6, 7:30-9 p.m., thru Kudner . . . Philco buys one-shot variety show on ABC-TV from Miami Beach's Fontainebleau Hotel June 28, Tue. 8-9 p.m., during its big TV-radio-appliance distributors convention there, thru Hutchins Adv. . . . Gillette to sponsor All-Star baseball game for 6th straight year on NBC-TV July 12, Tue. 3:15 p.m., thru Maxon Inc.

Among advertisers currently reported using or preparing to use TV: Otto Bernz Co., Rochester, N. Y. (Bernz-O-Matic appliances), thru Charles Rumrill Adv., Rochester; Metal Foil Products Mfg. Co., Newark, N. J. (Broil-A-Foil broiler trays & foil specialties), thru Storm & Klein Adv., N. Y.; Spectro-Matic Associates, Rockford, Ill. (paint color tinting system), thru Cummings, Brand & McPherson, Rockford; Dubuque Packing Co., Dubuque, Ia. (canned & frozen foods), thru Perrin-Paus, N. Y.; Modern Faucet Mfg. Co., Los Angeles (spray dishwashing brush), thru Hal Stebbins, Los Angeles; E. F. Drew & Co., N. Y. (Trinut margarine), thru MacManus, John & Adams, N. Y.; Doughboy Wading Pools, Los Angeles, thru Kilian Adv., L. A.; Clerfast Corp., Providence, R. I. (CFS skin cream, soap & lotion), thru Bo Bernstein & Co., Providence; California Central Airlines, Burbank, Cal., thru Morton, Martin, Weaver & Assoc., San Diego; Texize Chemicals, Greenville, S. C. (Texize household cleaner), thru Henderson Adv. Agency, Greenville; Waterman-Waterbury Co., Minneapolis (heating equipment), thru Mitchell & Mitchell, Minneapolis; George A. Hormel & Co., Austin, Minn. (ham sticks), thru BBDO, Minneapolis; Colgate-Palmolive Co., Jersey City, N. J. (Kan Kil aerosol insecticide), thru Street & Finney, N. Y.; Bu-Tay Products Ltd., Los Angeles (Rain Drops water conditioner), thru Dan B. Miner Co., Los Angeles.

Rate increases: WNBQ, Chicago, has raised base hour from \$3300 to \$3700, 20 sec. \$600 to \$750; July 1, WFAA-TV, Dallas, raises base hour from \$900 to \$1000, min. \$180 to \$225; KWTW, Oklahoma City, raises base hour from \$700 to \$750, min. \$140 to \$150; KMJ-TV, Fresno, hour from \$450 to \$500, min. \$90 to \$100; WMTW, Poland Spring, Me., from \$300 to \$400, min. \$60 to \$80; WCAX-TV, Burlington, Vt. (formerly WMVT), from \$250 to \$300, min. \$50 to \$60; KLAS-TV, Las Vegas, from \$200 to \$250 & \$40 to \$50; CFPL-TV, London, Ont. from \$300 to \$370 & \$60 to \$85; CFQC-TV, Saskatoon, Sask., from \$160 to \$230 & \$32 to \$46. Rate cut: WICC-TV, Bridgeport, Conn., cuts base hour from \$200 to \$100, min. \$40 to \$20.

Valuable tool for market research: Social Security Administration's newly-issued *County Business Patterns*, county-by-county uniform tables of payrolls, number of employes in various business classifications, etc. Statistics for first-quarter 1953 are in 10-volume set (\$11.75, Govt. Printing Office, Washington). Among significant figures on U. S. as whole are these: Some 2349 TV-radio broadcasting firms employed 66,366 people in March 1953, with total taxable payroll of \$76,516,000 for Jan.-March (or average annual pay of \$4640 per employe). Communication equipment industry (including TV-radio) employed 541,000 (2103 companies).

Color facilities charges are feature of temporary rate card No. 9, effective June 15, released this week by NBC's WNBQ, Chicago. It provides for \$190 net color charge, minus commissions, for 20-sec. station break, and \$95, minus commissions, for 10-sec. ID.

Milwaukee's WTMJ-TV, one of few no-frequency-discount stations, has instituted new \$300 Class A rate for entire 30-sec. station break, retaining only 2 sec. for station identification. Idea is that one advertiser would prefer to buy the whole spot in lieu of sharing it with another (20-sec. at \$200, 10-sec. at \$80); latter system will be retained, however, until all Class A station breaks come under single-advertiser sponsorships. WTMJ-TV base hour rate is \$1150, network \$1500, and it has issued new schedule of 1-min. partic. in various programs at rates varying with type & time of program—up to \$200 per spot. Station mgr. Walter J. Damm says new service eliminates "double spotting" practice between programs.

New reps: KSBW-TV, Salinas-Monterey, to H-R Television (from Hollingbery); KRGV-TV, Weslaco, Tex. to John E. Pearson (from Raymer); KELO-TV, Sioux Falls, S. D. to H-R Television (from Raymer); WNOW-TV, York, Pa. to Robert S. Keller (from Forjoe).

New call letters: WCAX-TV, Burlington, Vt. (Ch. 3), formerly WMVT, following allocation of channel from Montpelier to Burlington; AM affiliate is WCAX. On July 1, WTVW, Milwaukee (Ch. 12), becomes WISN-TV; new owner Hearst Corp. owns radio WISN.

ABC-TV reports record gross time sales of \$58,500,000 signed in first 6 months for new & renewed business, embracing 49 sponsorships.

Ramon Vasconcelos is now Cuban Minister of Communications, having succeeded Recardo Eguilior; Jose Mario Baquero remains his director of radio.

EVEN THE NEWS WIRES picked up *Variety's* significant lead story of June 15 to the effect that the nation's daily papers have "gone TV-happy." TV-radio editor George Rosen notes that TV has suddenly become "the No. 1 circulation builder for America's newspapers, with the TV editor and the TV columnist enjoying a new-found distinction as a major asset on any daily or Sunday edition." On many metropolitan newspapers, he writes, TV editor has become more important than drama or film editor.

Obvious case in point is *New York Herald Tribune*, whose syndicated TV-radio columnist John Crosby is credited with elevating TV columns from gossip to mature and provocative journalism. *Herald Tribune* recently fortified its TV coverage by adding digest-size *TV & Radio Magazine* as Sunday supplement and hiring Marie Torre from *New York World-Telegram* to do 5-a-week TV-radio column as well as help edit the new Sunday magazine.

Power and stature of the printed word, as it affects the TV industry, was demonstrated few weeks ago when Crosby took a sharp whack at CBS for "mediocrity" in TV programming (Vol. 11:16), was promptly asked in by CBS topkicks for advice.

This week Crosby jumped into a field where few dare to tread, lashed out at blacklists and their power over agencies, sponsors and networks. He pinned his column on recent secret vote at AFTRA meeting which condemned AWARE Inc., so-called anti-communist group which has set itself up as clearing-house to keep tab on those in show business it considers "un-American." Pro-AWARE faction in AFTRA demanded and got mail referendum—now in progress—to reconsider the resolution.

"The blacklist racket," says Crosby, "still flourishes openly in TV." He notes that NBC is only network which hasn't "knuckled under." He singles out Kraft, Philco and Goodyear as sponsors courageous enough to resist blacklist, Borden as one which has "cravenly given in and hired only actors 'approved' by this little wolf-pack of vigilantes."

One of the few other recent exposes of TV blacklisting was series in *Sponsor Magazine* a few years ago on blacklisting. Following appearance of articles, the magazine suffered heavy reprisals in ad cancellations.

"Top 10" regularly scheduled shows of 1954-55 season, as compiled by American Research Bureau on basis of average ratings, indicate influence of spectaculars and other "opposition programming" in determining "popularity" of shows. No. 1 regular show for season was Groucho Marx' *You Bet Your Life*, though NBC's one-shot *Peter Pan* spectacular drew largest audience for any TV show in history (57,000,000 viewers, 60.1 rating). Perennial first-place winner *I Love Lucy* dropped to 4th, presumably because of opposition from NBC's *Medie* and spectaculars. For first time, no Godfrey show was on list, nor was any drama show represented—both phenomena due to strong opposition programming. The ARB 1954-55 big 10: (1) *You Bet Your Life* (NBC), 50.9; (2) *Jackie Gleason* (CBS), 50.4; (3) *Toast of the Town* (CBS), 49.3; (4) *I Love Lucy* (CBS), 49; (5) *Dragnet* (NBC), 43.6; (6) *Two for the Money* (CBS), 42.3; (7) *Jack Benny* (CBS), 42.1; (8) *Disneyland* (ABC), 41.1; (9) *George Gobel* (NBC), 41; (10) *This Is Your Life* (NBC), 39.8.

NBC Radio's omnipresent weekend service, *Monitor*, which made auspicious debut in simulcast June 12, has racked up gross time sales of \$1,600,000, latest sponsors being Miller Brewing Co. & Charles Antell Co. (Lanolin hair preparation).

PITTSBURGH'S second vhf apparently will be Ch. 11 merger effected by counsel Paul M. Segal, whereby ex-competitive applicants WWSW (*Post-Gazette*) and WJAS (H. K. Brennen) will become equal partners in \$1,000,000 new-station project (Vol. 11:23). They have signed CBS basic affiliation, network having dropped \$3,000,000 deal whereby it proposed to buy WSTV-TV Steubenville, O. and move it to Pittsburgh (Vol. 10:47, 52 & 11:23). Steubenville outlet will stay on CBS as basic supplementary.

Plan is to get going by early fall if possible. While WWSW Inc. will apply formally for channel, with WJAS to be sold and Mr. Brennen then acquiring 50% interest in new corporation, new call letters haven't yet been decided upon. New company's board will comprise 3 members chosen by Wm. Block, publisher of the newspaper (presumably including himself and his radio mgr. Pete Schloss), 3 by Brennen, one other mutually acceptable.

* * * *

In our continuing survey of upcoming stations, these are latest reports from principals:

WTHS-TV, Miami (Ch. 2, educational), now hopes to begin test patterns early in July when old WTVJ Ch. 4 transmitter is scheduled to be ready, reports Vernon Bronson, asst. director, Dept. of Radio & TV Education, Dade County Board of Public Instruction. Transmitter is in Everglades Hotel, with antenna on rooftop FM tower. Programming is due to start in Aug.

KSTF, Scottsbluff, Neb. (Ch. 10), now doesn't expect to begin until about July 1 as satellite of KFBC-TV, Cheyenne (Ch. 5), reports gen. mgr. Wm. C. Grove. It will have 2-kw RCA transmitter, 6-bay antenna at interim site on Abrupt Peak, 10 mi. north of Scottsbluff, some 79 mi. of southwest of Cheyenne. Time will be sold only in combination with KFBC-TV. Rep for both is Hollingbery.

— ■ —

CJON-TV, St. John's Nfld. (Ch. 6), planning July 15 test patterns, has begun installation of 2-kw RCA transmitter at site 4 mi. from city, writes pres. Geoff Stirling. Work also has begun on foundations for 12-slot wavestack tower-antenna, due to arrive in late June. Commercial start won't be until Sept., plans call for non-commercial programming in Aug. for set promotion during "shake-down" period. Base hour for first 90 days will be \$160, goes automatically to \$200 thereafter. A. Harnett from radio CJON will be program director, Oscar Hierlihy chief engineer. Reps will be Weed and All-Canada Television.

Five-megawatt uhf: With FCC expected to issue proposed rule-making to raise maximum uhf power from 1 megawatt to 5 next week, first station proposing to seek maximum is WJMR-TV, New Orleans, which is due to shift from Ch. 61 to Ch. 20 July 1, going to 1 megawatt. It will serve as proving ground for GE development project to achieve ceiling power with four 30-kw klystrons for picture, 2 for sound (Vol. 11:22). Station now uses 2 GE helical antennas, will modify them for 5 megawatts. Exec. v.p. George Mayoral, ex-GE sales engineer, says he hopes to complete job within a year—though progress depends on GE development program. He and chief engineer Jack Petrik, also ex-GE, will supervise construction.

Equipment shipments: RCA shipped 50-kw transmitter June 7 to upcoming WXEX-TV, Petersburg-Richmond, Va. (Ch. 8), which has Aug. 1 programming target. Durham reports order for 50-kw amplifier from WTVD, Durham, N. C. (Ch. 11).

KSTP-TV, St. Paul has taken delivery of new 4-place Helioplane (cost: \$30,000, speed: 158 mph) which is being used for news coverage and business trips. Pres. Stanley Hubbard, who was World War I flier and a pioneer commercial transport pilot, flies the ship occasionally.

TOTING UP TRADE LEDGER; LABOR RESTIVE: Continued strong accent on military and industrial electronics, high optimism on TV-radio sales prospects for rest of year, almost total absence of color enthusiasm (or even interest) -- those were the distinguishing, dominant moods of RETMA's 31st annual convention this week at Chicago's Palmer House. Though official agenda was given over largely to internal matters of reorganization (for details, see p. 11), convention was spiced by glowing report that servicing of TV-radio receivers currently equals or exceeds annual retail dollar volume of receivers themselves, for first time in industry's history (see p. 1).

On debit side of trade ledger were these problems, present and prospective: TV inventories are on the rise at factory & distributor level, standing currently at estimated 2,300,000 at all levels; prices & profits keep going down, average factory price of TV set being estimated at mere \$130 for 12 months ending June 30 (compared to \$145 for calendar 1954 & \$170 for calendar 1953) and factory-to-retail markup down to only 25% from 40% in 1954, 60% in 1953. The one encouraging aspect of inventory picture is that retail stockpiles have been reduced in last 3 months, reversing normal industry pattern for this time of year.

Though serious, these problems were far outweighed by such considerations as the expanding electronics industry at large, in which more-&-more TV-radio firms are participants, both as manufacturers of non-TV electronic equipment and as customers for broadening applications of automation techniques. And they got more statistical evidence, if any more were needed, that the TV-radio receiver boom shows no sign of slackening. Robert S. Alexander, Wells-Gardner pres. & outgoing chairman of RETMA set div., reported that TV production in 12 months ending June 30 will establish all-time record of 8,300,000, with retail sales at 7,900,000.

That set & tube manufacturers think boom will continue rest of year is shown in their informal average "guesstimates" of 7,000,000-7,300,000 black-&-white, 35,000 color sales at retail for calendar 1955, or just about equal to last year's 7,300,000 total. Radio sales this year, they guessed, would be 12,500,000-13,000,000, including 4,500,000-5,000,000 auto sets, compared to total of 10,300,000 in 1954. For 1956, they estimated 6,500,000-7,000,000 black-&-white, 250,000-300,000 color sales.

Color talk was conspicuous by its absence. As figures indicate, manufacturers set little store by color in immediate future -- and they showed no disposition to possibly upset a strong black-&-white market by even going into any public discussion of color. In latter respect, at least, they are being abetted by networks, which are scheduling scarcely any color shows this summer (see p. 3).

Other brief highlights of major trade developments this week:

* * * *

Labor: It wasn't publicized much, but included in the guaranteed annual wage package granted United Auto Workers by General Motors were its Delco radio division workers represented by IUE. All of which, in opinion of union, has strengthened its hand in upcoming bargaining negotiations with GE, Westinghouse & Sylvania. So intent is IUE on winning annual wage provision that its national leaders are reportedly preparing to negotiate these contracts personally, leaving only ratification to the locals. Up to now, locals have been given broad latitude in negotiating contracts -- and in cases of RCA & Philco, they decided to yield on annual wage provision in exchange for more liberal wage and fringe benefits.

\$100 Set: GE's 14-in. table model at \$99.95, which it introduced month ago as its answer to second-set demand (Vol. 11:21), is doing "extremely well" in sales, though full national distribution won't be achieved until July 15, company tells us. Arthur Brandt, gen. sales mgr. of TV-radio dept., said "initial and repeat orders from dealers are magnificent." He reports it's doing well not only in its own right but as a sales magnet for other sets in store. Hallicrafters reportedly will intro-

duce a \$99.95 table model at next week's big furniture marts in Chicago, joining Emerson and Olympic as companies which have same-priced set.

How's Business? Pleasant reading, for most part, is "Where Business Is Best in U.S. Now" -- in June 17 U.S. News & World Report. It concludes West & Midwest are booming, sees pickup in New England, tabulates 22 cities in which average worker's income is up vs. year ago in all but one city (Portland, Me.); moderate or slight unemployment in all but 2 (Pittsburgh and Portland, Me. show substantial drops); employment up in 11 cities, down in 11 from year ago; dept. store sales up in all but New York (same), and Milwaukee (down); banking activity up in all but Philadelphia (same), New York (down). "Recession of 1954," magazine concludes, "seems only a distant memory. People are loaded with cash, and in a mood to spend it. Nothing quite like it has been seen before..."

Job Outlook: Labor Dept. Bureau of Employment Security reports, on basis of spring survey of 149 market areas, that rise in demand for workers is likely to continue through fall, assuming absence of strikes. As result of job gains already made, 8 major areas were removed from list of labor surplus markets, which had entitled them to special treatment under defense procurement program.

Production: TV output reversed 2-week decline in week ended June 10, going up to 110,766, compared to 91,648 preceding week and 110,944 in week ended May 27. It was year's 23rd week and brought production for year to date to 3,370,000, compared to 2,710,000 in corresponding 1954 period. Radio production went up to some 264,054 (137,609 auto), from 206,428 preceding week and compared to 266,946 week before. Radio output for 23 weeks was 6,370,000 vs. 4,540,000 same 1954 period.

Trade Personals: Ralph B. Austrian, ex-RCA & Westinghouse, recently with Pereira & Luckman architects, named DuMont west coast mgr., headquartering at 11845 Olympic Blvd., Los Angeles . . . John N. Phillips, mgr. of GE color TV product engineering, named mgr. of product planning, TV-radio dept. . . . Edward R. Taylor, Motorola v.p., represents TV-radio in appliance industry panel discussion June 21 at Merchandise Mart in conjunction with market week . . . A. Brewer Hunt, Canadian RTMA pres. in 1953-54, serving last 18 months as director of electronics branch in Canadian Dept. of Defense Production, returns to his old company, Northern Electric Co. Ltd., Montreal, on special assignment, reporting to M. P. Murphy, v.p. & managing director . . . L. L. Malin, ex-Admiral Pittsburgh factory branch mgr., named regional sales mgr. covering N. Y., Newark, Philadelphia & Altoona, in series of regional sales appointments; C. F. Weeks to cover Los Angeles, San Diego, San Francisco, Sacramento, Fresno & Phoenix; W. F. Hand, ex-Denver branch mgr., covers Denver, Albuquerque, El Paso & Salt Lake City; Joe K. Boone, ex-International Harvester, named north central mgr., covering Indianapolis, Evansville, Ft. Wayne, Louisville & Nashville . . . David P. McIlmoil appointed southwestern sales rep, Westinghouse electronic tube div., Los Angeles . . . Aaron Bowser resigns as Sylvania radio sales mgr. . . . Roger Minthorne Jr. appointed Scott Radio Pacific northwest sales mgr. . . . Wilfred L. Larson, pres. of Switchcraft Inc., Chicago, named representative of Assn. of Electronic Parts & Equipment Mfrs. on Radio Parts & Electronic Equipment Show board, governing body of annual electronic parts show in Chicago . . . George Geich, asst. to exec. v.p. Dorman Israel, has been designated chairman of Emerson Radio's new rotating associates management committee comprising 10 executives below div. chiefs . . . Oliver H. Straus, ex-National Co., elected v.p. of newly-formed Hycon Eastern Inc., Cambridge, Mass. (guided missiles, computers), affiliate of Hycon Mfg. Co., Pasadena . . . Joseph Delaney resigns as mgr. of RCA Victor's "Label X" record dept. to become v.p.-gen. mgr. of Cadence Records, replacing Sam Clark, new head of American Broadcasting-Paramount Theatres' record subsidiary.

H. Leslie Hoffman, pres. of Hoffman Electronics, is new pres. of RETMA's reorganized, unified board, taking over duties performed last year by Max Balcom as board chairman and Glen McDaniel, who gives up presidency but remains as gen. counsel. All other officers were re-elected at 31st annual convention this week at Chicago's Palmér House: exec. v.p. & secy., James D. Secrest; treas., Leslie F. Muter, Muter Co.; engineering director, Dr. W. R. G. Baker, GE; govt. relations mgr., Joseph H. Gillies, Philco.

These div. chairmen were also elected: set, H. C. Bonfig, CBS-Columbia, replacing Robert S. Alexander, Wells-Gardner; tube, Richard T. Orth, Westinghouse, replacing John Q. Adams, CBS-Hytron; parts, Herbert W. Clough, Belden Mfg. Co., Chicago (re-elected); technical products, James D. McLean, Philco (re-elected); military products, T. A. Smith, RCA, replacing A. K. Ward, RCA, chairman of old amplifier & sound equipment div.

Rear Adm. Walter A. Buck, 60, RCA operating services v.p., died June 12 at his home in Wynnewood, Pa., just 10 weeks after the death of his wife. Adm. Buck, ex-head of old RCA Victor div., became pres. of Radiomarine Corp. of America on retirement from the Navy in 1948, having just completed 2 years as Paymaster General and as chief of Bureau of Supplies & Accounts. Graduate of Kansas State U and Harvard Business School, he had joined the Navy as Ensign in 1917. He is survived by 2 sons, both in Navy, Lieut. Walter J. Buck, on duty in Korean waters, and Lieut. (j.g.) John A. Buck. Burial was at Arlington June 17.

Dorman D. Israel, Emerson exec. v.p., July 1 becomes chairman of IRE-RETMA's Joint Technical Advisory Committee (JTAC) for one-year term. An autonomous group, JTAC's function is to examine technical factors in radio communications, advise Govt., industry and engineering profession. Other members: vice chairman Ernst Weber, Brooklyn Polytechnic Institute; Ralph Bown, Bell Labs; Ralph N. Harmon, Westinghouse Broadcasting Co.; John V. L. Hogan, consulting engineer; I. J. Kaar, GE; A. V. Loughren, Hazeltine; Philip F. Siling, RCA.

Emo D. Porro named engineering asst. to Stanford Research Institute director Dr. J. E. Hobson.

Topics & Trends of TV Trade: Questionable advertising practices have replaced servicing as the chief complaint of consumers in TV-radio field, says Assn. of Better Business Bureaus on basis of survey of 78 member bureaus released at BBB convention this week in Minneapolis.

Kenneth Willson, national BBB president, reported that complaints about advertising broke down in this order of frequency: comparative pricing, bait ads, layouts involving misleading price in relation to a featured illustration, failure to disclose that models advertised are obsolete, misleading trade-in allowances. Other complaints included use of superlatives, misleading screen size descriptions, false credit terms and deceptive free trial offers.

Willson reported that 26 bureaus have organized programs to control abuses, and 30 more have sponsored fair trade practice codes. At week's end, convention adopted resolution calling for closer cooperation between bureaus, advertisers & media to halt questionable practices.

Note: Federal Trade Commission's trade practice rules for TV-radio merchandising, subject of hearings extending for 3 years, are scheduled for release June 28.

* * * *

TV-radio and related firms were prominent among the national advertisers in newspapers in 1954, according to ANPA Bureau of Advertising reports. On its list of 1404 national newspaper advertisers spending \$25,000 or more last year (not counting their local co-op schedules):

Admiral	\$ 439,465	Philco	1,349,976
Alliance Mfg.	79,790	(TV-radio, \$605,164)	
AT&T	85,825	RCA	1,569,702
Avco Mfg. Co.	1,379,852	(TV-radio, \$930,788)	
(TV-Radio, \$396,892)		(NBC, \$10,499)	
Channel Master	40,142	Raytheon	43,726
CBS	406,984	Sentinel	167,464
DuMont	190,786	Sparks-Withington	34,101
Emerson Radio	204,951	Stromberg-Carlson	83,341
GE	3,792,542	Sylvania	789,859
(TV-radio, \$438,602)		(TV-radio, \$557,481)	
Hallcrafters	86,683	Westinghouse	2,184,427
IT&T	700,460	(TV-radio, \$618,479)	
(Capehart, \$85,998)		Zenith Radio	794,015
Packard-Bell	46,129	(TV-radio, \$220,649)	

Note: Among top 100, headed by General Motors (\$37,391,415), Westinghouse ranked 35th, RCA 56th, Avco 66th, Philco, 67th.

* * * *

DuMont entered radio & high-fidelity phonograph fields with introduction this week of 2 unpriced table radios, one 3-speed phono console at \$150, one AM-FM radio-phono console at \$275. At same meeting of eastern regional distributors, new line of 16 TV models was introduced, ranging from \$170 to \$500. William C. Scales, gen. mgr. of receiver sales div., said company plans to expand radio line to include clock sets in fall. Company previously had made radios only for incorporation in its TVs. TV line comprises eleven 21-in. sets—\$170, \$180, \$200, \$220, \$230, \$240, \$250, \$260, \$270, \$290, \$320; five 24-in.—\$330, \$340, \$400, \$410, \$500.

Westinghouse's new line, introduced this week for showing at Chicago's furniture marts, features printed-circuit components in 70% of the chassis of more expensive "Riviera" series, mounted on 2 printed circuit boards. Full line ranges from \$140 for brown metal table model to \$490 for 24-in. limed oak combination, latter set being a carryover from old line. The 21-in. series ranges from \$160 to \$370, 24-in. from \$240 to \$490. Less-expensive "Catalina" series has vertical chassis, while "Riviera" sets have front tuning, simplified controls, 90-degree aluminized tube, plug-in all-channel tuner.

RETMA of Canada publishes 5th edition of its trade directory (31 pp.), listing membership by divisions, sources of supply of parts & accessories manufactured in Canada, alphabetical list of foreign manufacturers & their Canadian reps. It's free from RETMA of Canada, 200 St. Clair Ave. West, Toronto.

RETMA-IRE 1955 radio fall meeting is scheduled Oct. 17-19 at Syracuse Hotel, Syracuse, N. Y.

BUSINESS FAILURES among TV-radio-electronic manufacturers declined to 26 in year ended April 30, compared with 33 in preceding year. This was stated in report of credit committee to 31st annual RETMA convention this week at Chicago's Palmer House. Of the 26 manufacturers which failed, 12 were components producers, 5 TV-radio set manufacturers, 3 made electronic instruments, 3 phonograph or high-fidelity equipment, 2 recorders, one hearing aids. Average age of these companies was 6½ years.

Committee chairman Edward C. Tudor, pres. of Industrial Development Engineering Associates (I.D.E.A.), stated liabilities of these companies totaled \$14,460,000, compared to \$24,800,000 for the 33 companies in preceding year. Tudor attributed failures chiefly to "poor management," inability of companies to meet competition successfully, and sales below cost or at a price which "could not provide a fair or reasonable profit." Highlights of other RETMA actions:

Spurious Radiation: In annual report, outgoing pres. Glen McDaniel said RETMA soon will be able to establish procedure for stamping RETMA seal on each set complying with its radiation standards. Responses of manufacturers to questionnaires on subject have been encouraging, "with a few exceptions," he said.

Reorganization: As predicted (Vol. 11:23), RETMA was reorganized, with abolition of separate electronics industry & TV-radio industry committees and return of their functions to single board, creation of military products div., reallocation of directors among 5 divs., consolidation of amplifier & sound equipment div. as section within technical products div.

Promotion: Advertising & public relations committee approved plans for National Radio & TV Week Sept. 18, endorsing promotional kit with theme "For Better Home Entertainment." NARTB and NARDA are also participating in public display of sets (Vol. 11:3).

RETMA treas. Leslie F. Muter was presented 1955 "Medal of Honor" at banquet June 16. In presenting award, outgoing board chairman Max Balcom pointed out that Muter attended old RMA's first organization meeting April 18, 1924 and the first meeting June 23 when first by-laws were adopted.

Control of Webster-Chicago Corp. is being acquired by Chicago industrialist Titus Haffa, who has added to his holdings more than 40,000 shares purchased from founder-chairman R. F. Blash, now in virtual retirement. Haffa becomes acting chairman, is said to be considering making offer to purchase all other outstanding stock. He and family own Dormeyer Corp., big Chicago appliance manufacturer, and Haber Corp. (screw machine products), among other companies. Webster-Chicago in 1954 earned net of \$564,198 (\$1.09 on 519,794 shares) on sales of \$31,746,046; this compared to \$927,162 (\$1.87) profit on \$27,757,891 in 1953 (Vol. 11:15).

American Television & Radio Co., 300 E. 4th St., St. Paul, Minn. (Albert A. Goffstein, pres.), manufacturers of auto radio vibrators since 1931, is now producing line of custom full-door console TVs under own ATR brand, will show sets on 17th floor of Chicago's American Furniture Mart next week.

Magnavox to introduce its first color set, a 21-in. console called Magnacolor, at Chicago marts June 20-July 2, along with 2 full-door 24-in. black-&-white consoles at \$425.

Battery-operated radio-phono combination, priced at \$60, was introduced this week by RCA, along with 3 conventional phonographs at \$15, \$30 & \$40.

Financial & Trade Notes: Storer Broadcasting Co. was approved for listing on N. Y. Stock Exchange this week, will be traded there from July 5. In June 14 letter to shareholders accompanying 35¢ dividend (upped from 30¢), pres. George B. Storer explained changes in capital structure that make \$1.40 annual rate possible:

"Through the sale of 262,750 shares of common stock to the public, \$4,000,000 in bank indebtedness was retired and all of the 7% preferred stock, amounting to \$1,500,000 [held mostly by Jefferson Standard Life] was called for retirement. In addition, interest on the balance of the company's bank loans was reduced voluntarily by the 4 participating banks: the Society for Savings, Cleveland, Chase Manhattan Bank of N. Y., Bankers Trust Co. of N. Y. and National City Bank of Cleveland. Your management believes that these savings, amounting to \$352,500 per year, should be passed on promptly to the holders of the company's common stock."

First quarter earnings after all charges, states letter, were \$811,989 (\$1.44 a share) including \$143,912 increased depreciation authorized under 1954 code, as against \$803,235 (\$1.43) in same 1954 quarter. [For table of previous years' quotes and earnings, see Vol. 11:18.] Letter continues:

"A slight recession occurred in some areas served by our stations during the latter months of 1954 and during the first two months of 1955, but there has been substantial improvement in March and April of this year. While there has been some concern over the future of radio broadcasting within the industry, our company's radio stations are now completing a period of adjustment which, we believe, has put them on a sound basis to operate successfully under today's conditions.

"Your company is rapidly equipping its television stations for color telecasting. However, there is much to be learned in this field and expenses involved for both equipment and experimenting are substantial. Nevertheless, our management believes that color receivers will soon be purchased by the public in sufficient quantity to warrant your company's preparing itself to provide color telecasting service to these purchasers."

* * * *

DISTRIBUTOR NOTES: RCA appoints M. E. Silver Corp., Motorola's Rochester, N. Y. outlet, replacing own subsidiary branch; RCA also appoints Ryan Supply Co., Emerson outlet in Jackson, Miss. (Thad Ryan, owner) . . . Motorola appoints Bristol Distributing Co., Fargo, N. D. (Howard Bristol, pres.), replacing Fargo Glass & Paint Co. . . . Stromberg-Carlson appoints Mechanical Engineering Corp., Norfolk, and Southern Electric Corp., Staunton, Va. . . . Hallicrafters appoints Frank Millman Distributors, 121 Clinton Ave., Newark . . . DuMont reports resignation of H. Joseph Sarlin, ex-gen. sales mgr. of its N. J. factory branch, replaced recently by Igoe Bros., Newark . . . Times Appliance Co., N. Y., Westinghouse distributing subsidiary, names C. J. Ward v.p.-gen. mgr., succeeding Col. Arthur F. Callahan, retired . . . B. T. Crump Co., Richmond (Philco) appoints L. McCarthy Downs exec. v.p. & gen. mgr. . . . Emerson Radio of Pennsylvania appoints Samuel Gershman v.p. . . . G. W. Onthank Co., Des Moines (Admiral) promotes Harold L. Haff to gen. sales mgr. . . . Olympic of Pittsburgh appoints I. A. Frankel gen. sales mgr. . . . Westinghouse Electric Supply Co. reports resignation of Wm. Constance as mgr. of Vernon, Cal. branch.

Indiana Steel Products Co. net profit was \$195,741 (69¢ a share) for quarter ended March 31, reports pres. Robert F. Smith, taking into account 2-for-1 split approved last Feb. 15. Working capital went up to \$1,504,320. In same 1954 quarter, profit was \$203,018 (\$1.43).

Philco Corp. profit-sharing plan, which holds more than 10% of company's outstanding common stock, purchased 3100 more shares in May, bringing total holdings to 522,857 shares. Other advance reports on May transactions involving officers & directors: Percy M. Stewart sold 1000 DuMont "A," now holds 1000; Herbert J. Allemang bought 5000 National Union Electric Corp., holds 8000.

Among officers' and directors' stock transactions reported by SEC for April: H. Webster Crum bought 400 Avco, holds 400; Benjamin H. Namm sold 4400 Avco, holds 1912; James B. Conkling bought 100 CBS "B," holds 100; Wm. C. Decker sold 3000 Corning Glass, holds 10,118; Amory Houghton sold 30,000 Corning Glass personally and 147,500 thru trusts, holds 57,687 personally and 1,577,500 thru trusts; Arthur A. Houghton Jr. sold 52,500 Corning Glass personally and 154,950 thru trusts, holds 315,680 personally and 1,614,490 thru trusts; Alfred H. Avery sold 2333 Electronics Corp. of America, holds 164,334; John A. Long sold 22,333 Electronics Corp. of America personally and bought 20,000 thru family trust, holds 144,334 personally and 20,000 thru family trust; Wm. Rogers Herod sold 600 GE, holds 4938; Robert Parton bought 1506 GE, holds 7621; R. W. Turnbull bought 1044 GE, holds 3891; Walter E. Green sold 500 General Precision Equipment, holds 2855; Wilfred M. McFarland bought 100 Hazeltine, holds 210; C. E. Underwood sold 100 Hoffman Electronics, holds 4900; Frank M. Freimann bought 500 Magnavox, holds 49,285 personally and 29,484 thru trust; John Rovellstad bought 500 Oak Mfg. Co., holds 3055; Elof Sandstrom bought 1000 Oak Mfg. Co., holds 6511; James M. Skinner Jr. sold 8000 Philco, holds 8670; Leslie J. Woods sold 200 Philco, holds 7693; Robert L. Werner bought 200 RCA, holds 345; Norman B. Krim bought 1500 Raytheon, holds 1830; Harold C. Mattes sold 600 Raytheon, holds 8634; E. F. McDonald Jr. bought 500 Zenith, holds 10,462 personally and 31,931 thru holding company.

Underwriting of National Telefilm Assoc. public offering of 312,500 shares of common stock at \$5 per share (Vol. 11:22) has been completed, with check for \$1,328,125 turned over to NTA pres. Ely Landau by underwriter Charles Plohn. Company will apply shortly for listing on American Stock Exchange. It's 65% owner of GE-supported National Affiliated Television Stations Inc. (NATS), which has been set up to help stations achieve profitable operations (Vol. 11:14).

Armed Forces Communications & Electronics Assn.'s new officers: George W. Bailey, pres.; Maj. Gen. James D. O'Connell, 1st v.p.; Rear Adm. Henry C. Bruton, 2nd v.p.; Maj. Gen. Gordon A. Blake, USAF, 3rd v.p.; W. W. Watts, RCA, 4th v.p.; Brig Gen. George W. Goddard, USAF (Ret.), 5th v.p.; Frank W. Wozencraft, counsel; George P. Dixon, exec. v.p.

James H. Goss elected pres. of Canadian GE, succeeding Harold M. Turner, who moves up to chairman. Harold H. Miller, gen. mgr. of room air conditioning dept., succeeds him as mgr. of home laundry dept., Louisville; Paul M. Augenstein promoted to succeed Miller.

Erie Resistor Corp., which paid 10¢ common stock dividend in March, took no action last week on second quarter dividend, though declared regular quarterly 30¢ on preferred payable June 15 to holders June 10.

Norden-Ketay Corp. has made agreement to acquire all stock of Scientific Specialties Corp., Boston (precision instruments), which will continue to be headed by its present pres. Dr. Roland B. Holt.

Dividends: Motorola, 37½¢ payable July 15 to stockholders of record June 30; Packard-Bell, 10¢ July 25 to holders July 1 (raised from 5¢).

Electronics Reports: Air Force again denied this week that its weapon system concept will be used to detriment of established electronics industry (Vol. 11:7, 17, 21, 23). Addressing RETMA membership luncheon June 15 in Chicago, Lt. Gen. C. S. Irvine, Air Force deputy chief of staff, materiel, outlined these techniques used by Air Force to prevent weapon system management contractors (usually aircraft manufacturers) from taking over development and production of parts or sub-systems from other industries:

"(1) We review the system contractor's proposal [to] determine those items to be furnished by the prime contractor, by the associate contractor and by the Air Force. (2) During negotiations with the weapon system contractor we closely examine the proposed subcontract structure to assure that a substantial spread of subcontracting is planned. (3) We insert a clause in the contract to the effect that the contractor is not to deviate from the subcontract structure agreed upon in negotiations without prior written approval of the Air Force. (4) We then require that Air Force prime contractors implement their own programs to discharge these contractual responsibilities. This insures that a company follows both the letter and the spirit of our subcontract philosophy. Our goal is to encourage subcontracting."

* * * *

Machine that actually reads numbers was unveiled in New York this week by Burroughs Corp., which built it, and First National City Bank, which is field testing prototype model. It's claimed to be "first workable equipment to read directly from a source document without the need for human intervention or an intermediate coding operation." Bank is using device to read serial numbers on travelers' checks, in place of human punch-card operators. Machine consists of scanning device and punching machine connected by cables. Its 7200-check-an-hour rate is about the capacity of 10 skilled card operators, and the bank says traditional error factor of 1% has been reduced to "considerably less than 1/10 of 1%."

Automation and its effects on design in communications is topic of speech by Sol Cornberg, NBC director of studio & plant planning at June 13 meeting of International Design Conference in Aspen, Colo. He designed the sets for *Today*, *Tonight*, *Home* shows, helped design NBC's "Color City" in Burbank, Cal., has book titled *Television Techniques* soon due from Harper & Bros.

Color radar for civilian use will be tested at CAA's Technical Development & Evaluation Center at Indianapolis this year on "simulator" which reproduces traffic conditions around an airport. Due to be installed there is radar set built by Gilfillan Bros. and incorporating Lawrence tube. Color radar was first demonstrated to public early this year (Vol. 11:5).

Built in 1913 by old Marconi company, once nation's most powerful Trans-Atlantic wireless station, the RCA radio plant on Canal Road, New Brunswick, N. J., has been dismantled and equipment moved to Rocky Point, L. I., and 850-acre area has been sold to a realtor.

Sylvania plans new factory in Amherst, N. Y., suburb of Buffalo, for electronics systems div., turning out military & industrial electronics products.

D. R. Tashjian appointed mgr. of engineering, Westinghouse electronics div., Baltimore, replacing F. S. Mabry, now consultant to div. mgr.

J. H. Compton, stationed in London since 1951, elected v.p. of Westinghouse Electric Co. of Europe, headquartering in Paris.

Dr. Harris M. Sullivan, ex-v.p. of Central Scientific Co., Chicago, named mgr., GE electronics lab, Syracuse.

Station in trouble: San Francisco's KQED (Ch. 9, educational) undertook what it plainly labelled a "do or die" campaign for public contributions this week—otherwise it must sign off by June 30, just 15 months after debut. It seeks \$65,000 to continue 13-man staff, having operated first year on less than \$114,000, and gen. mgr. James Day states that this will give it "breathing spell" of at least 6 months during which it can develop new finance program. If appeal fails, it would be second of 14 educational TVs thus far undertaken which had to give up ghost—other having been USC-affiliated uhf KTHE, Los Angeles (Ch. 28) which had to quit last year after Allen Hancock Foundation withdrew financial support (Vol. 10:32, 43). San Francisco area's commercial KRON-TV, KPIX, KGO-TV & KOVR (Stockton) are donating spots & short shows for fund appeals for station.

"Instruction by TV is much more effective than actual live instruction" for some young soldiers with below-average intelligence. This finding was reported by Maj. Gen. K. F. Hertford, chief of Army research & development in testimony released recently by House Appropriations subcommittee. Said Gen. Hertford: "This could be a reflection of our modern life where these youngsters are taken into the Army and have been used to being glued to a TV screen. They concentrate more when they see something on TV than if they are behind the barracks and a man is actually showing them how to do things. [This discovery] has given us leads in mass training where we do not have sufficient instructors." He added that men who will not look at a training film "will look at a TV screen."

Ford Foundation's Fund for Adult Education contributed more than \$4,600,000 to educational TV in year ended June 30, 1954, it discloses in annual report just released. Of that sum, \$3,000,000 was granted to Educational TV & Radio Center at Ann Arbor; about \$100,000 each to 8 educational stations on air at that time; \$507,000 to American Council on Education (Joint Committee on Educational TV); \$81,000 to National Assn. of Educational Broadcasters. Funds spent for *Omnibus* (CBS-TV) are covered in annual report of Ford's TV-Radio Workshop, not yet released.

Stanford U's Radio-TV Institute conducts 13th annual summer session June 27-Aug. 23, in cooperation with KPIX, educational KQED & radio KNBC. Institute offers four \$100 scholarships presented by KPIX gen. mgr. Philip G. Lasky, based on scholarship, need of assistance & possible future contribution of student to TV-radio. Tuition fee is \$250 for credit students, \$170 for non-credit students. Admission application should be addressed to Prof. Norman Philbrick, acting executive head, Stanford U dept. of speech & drama. Enrollment is limited to 75.

Educational WQED, Pittsburgh (Ch. 13) will offer summer high school courses for 6 weeks starting June 27, giving students chance to earn credit for courses failed during regular school year. Pittsburgh high schools have discontinued summer courses because of lack of funds.

Sources of TV interference, listed by British Post Office on basis of complaints investigated last year, shows electric sewing machines leading list. Of 83,514 individual complaints, Post Office found sewing machines at fault in 8956 cases; hair driers were second with 6954, then power lines 3789, vacuum cleaners 3269, incandescent lamps 2569, drills 2492. Biggest source of interference to AM sets was radiation from TV receivers.

New 1955 "BBC Handbook," 224-page book explaining structure and functions of British Broadcasting Corp., plus review of its 1954 activities, is available from BBC, International Bldg., 630 Fifth Ave., N. Y.

Reasons for swap of TV-radio stations in Philadelphia and Cleveland, between NBC and Westinghouse (Vol. 11:22), were outlined in application for transfer filed with FCC this week. In the exchange, NBC would get Philadelphia's WPTZ & KYW, while Westinghouse would acquire Cleveland's WNBK & WTAM, NBC paying \$3,000,000 into the bargain. NBC told Commission: "The economic health of a company in the network business has been dependent on profits from some other source. This is the ownership of stations," indicating that Philadelphia outlets offered prospects of greater profits. Westinghouse stated that NBC initiated swap; that NBC had been offered another Philadelphia station but preferred to acquire Westinghouse's. Westinghouse added: "The acquisition by NBC of its own radio and TV stations in Philadelphia would have meant the end of NBC affiliation with the Westinghouse stations . . . Westinghouse could have (a) retained its stations in Philadelphia, operating them with substantially reduced income without NBC affiliation and possibly on an independent basis, or (b) transferred the Philadelphia stations to NBC and acquired and operated stations in another locality . . . Westinghouse made this business decision in the belief that the ownership and operation of stations in Cleveland, with NBC affiliation, was of greater benefit to Westinghouse and the public than the ownership and operation of stations in Philadelphia without network affiliation."

Trans-Canadian TV microwave, reaching 3800 mi. from Sydney, N. S. to Vancouver, B. C. is due for completion early in 1958 at cost of \$40-\$50,000,000. It's being built by Trans-Canada Telephone System, a combination of Govt. and private telephone companies. Built and now in use is section from Windsor, Ont. to Quebec, Que. Next is 1200-mi. Toronto-Winnipeg link due for fall 1956, 800-mi. Winnipeg-Regina-Calgary section early 1957, 710-mi. Quebec-St. John-Sydney link mid-1957, 580-mi. Calgary-Vancouver section early 1958. Approximately 140 relay stations will be required. Initially, 2 TV channels in each direction will be available—but only one of each will be used, other employed as emergency standby. In addition, some 120 phone circuits will be provided.

Heavy support for CBS pres. Frank Stanton's proposal for "Lincoln-Douglas" debates on TV by presidential candidates (Vol. 11:21, 23) came this week from newspapers in key metropolitan cities, as Chairman Harris (D-Ark.) of House transportation & communications subcommittee introduced bill for necessary amendments to Communications Act (HR-6810). Harris didn't specifically endorse bill, but said he felt it deserved "careful consideration." Amendment to Communications Act would permit networks and stations to have political candidates as guests on news shows, documentaries, panels, etc., without being subject to equal time provisions. Meanwhile Senate Rules Committee, by 5-3 vote (Democrats in favor, Republicans against), approved increase in political spending ceilings—largely resulting from cost of TV time (Vol. 11:16-18). Measure would raise ceiling for national committee spending in presidential elections from \$3,000,000 to about \$12,000,000, with Senatorial and Congressional limits raised correspondingly.

Latest community antenna system: Entron pres. H. M. Diambra reports that system in Midland, Ontario, on Georgian Bay, got big sendoff recently, including film coverage by WGR-TV, Buffalo and 8-p. special section in local *Free Press Herald*. Pres. of operator Tower TV Ltd. is W. H. Pinchin; v.p. is W. H. Cranston, publisher of *Free Press Herald*. Bell Telephone of Canada is handling wiring.

Next Armed Forces TV stations: Dharan Airport, Saudi Arabia, due to start July 1; Kindly Air Force Base, Bermuda, July 3; Okinawa, Aug. 15.

Subscription TV front: (1) Though most major principals in case want delay in filing reply comments, now due July 11, efforts to seek postponement fell through this week. Almost all parties had agreed to ask for delay until Sept. 15, but attempts to file unanimous request failed, and none wanted to go to Commission alone. (2) CBS released Elmo Roper survey showing that 62% of Columbus, O. families oppose pay-as-you-look under "most favorable circumstances," and that 93% oppose it if they'd be charged for all programs. Some 65% of interviewees said they'd vote against authorizing toll TV. (3) Jerrold Electronics Corp., which claims it can break any scrambled code, showing feasibility of widespread TV "bootlegging," is preparing to tell FCC it's ready to demonstrate that fact—and to show wired system is the only practical method of distributing pay-TV programs. (4) Rep. Emanuel Celler (D-N. Y.), chairman of important Judiciary Committee, is first congressman to come out publicly with strong opposition to tollvision. June 18 N. Y. *Herald Tribune* carried letter in which he expressed concern over pay-TV's possible effects on free TV, low-income families, etc., concluding: "I shall continue to oppose all efforts to foist fee TV on the American public."

Trade name "Ampar" will shortly herald entry of American Broadcasting-Paramount Theatres Inc. into phonograph record field, as forecast (Vol. 11:16). Subsidiary will be headed by Sam Clark, ex-gen. mgr., v.p. & co-founder of Cadence Records. Earlier plans to buy out an existing company have been abandoned; new firm will be backed by "ample resources" of parent TV-radio-theatre company, which presumably will extend its Walt Disney ties into recording field, will issue disks in all 3 speeds and all classifications, contracting the pressing to custom manufacturers at first. Said AB-PT pres. Leonard Goldenson: "The new record company will seek, at once, to enlist under its label the very finest of artists . . . we will not enter the market in strength until about the first of the year but we expect to 'be in business' in several months in the children's and package-goods fields." Note: AB-PT also is negotiating to purchase Baird Electronics, Cambridge, Mass., manufacturers of physical optics, spectrographs, etc. Company also is noted for its transistor-circuitry research.

Hearing on amendment to "protest" section of Communications Act (HR-5614) is scheduled June 22 by House transportation & communications subcommittee under Rep. Harris (D-Ark.). Subcommittee hasn't released list of witnesses yet, but only groups known to be preparing to appear are FCC (favoring measure) and Federal Communications Bar Assn. (which won't take decisive stand). Senate communications subcommittee under Sen. Pastore (D-R. I.) will probably hold hearings on similar bill (S-1648) week of June 27. Because of strong Congressional pressures for quick final decisions, amendment has good chance of passage.

Injunction to block sale of radio WMFJ, Daytona Beach, has been sought in Deland, Fla. by TV-radio producer Ted Granik and attorney Wm. Cook, both of whom are part owners of WJNO-TV, Palm Beach. They contend that seller W. Wright Esch has broken contract to sell station, with CP for WMFJ-TV (Ch. 2), to them. Price was to be \$7000 yearly for life of Esch and his wife, who are around 60. Esch is going ahead with construction of TV, having changed call recently to WESH-TV.

TV history will be made when Soviet Foreign Minister V. M. Molotov is questioned by newsmen on CBS-TV's *Face the Nation* Sun. June 26, 4:30-5 p.m. Originating from San Francisco, show marks first time a Russian official has submitted to newsmen's questions on TV panel program. It'll be recorded for CBS Radio same night, 10:05-10:30 p.m.

SUMMARY - INDEX OF THE WEEK'S NEWS—June 25, 1955

FEWER THAN 250 NEW STATIONS, beyond today's 433, seen likely by CBS—as it attacks pay-TV proponents' promises of stimulated expansion (p. 1).

PAY-TV PIQUES POLITICIANS, Reps. Celler and Chelf introducing opposing bills, most Congressmen dubious; latest moves in "Tollvision War" (pp. 2 & 5).

ALLOCATION REVIEW in light of vhf-uhf problems is started by group of top engineers, headed by MIT Prof. Edward Bowles, for Senate investigators (p. 3).

MOVIE COMPANIES' network shows cause concern: Having failed to lick TV, is Hollywood now trying to take it over? Free plugs, program control are issues (p. 4).

HOLLYWOOD LINEUP: MGM is latest to sign network pact; all other major producers are listed, with their present and future TV activities spelled out (p. 5).

\$8400 RATE ON WRCA-TV, highest on record, was \$6200 year ago; new Class AAA 20-sec. spot is \$2050 net, 10-sec. \$975 net; color rates, too (pp. 7 & 15).

MORE STEP-UP MODELS, more at \$100, top-tuning, side-tuning, color plans noted at Chicago marts; Philco convention to reveal its models, plans (p. 11).

BILLS TO PROTECT NEWSPAPERS and TV-radio stations from discrimination by FCC in grants introduced in Congress; "protest" amendments debated (p. 8).

ANOTHER TV CODE: Britain's new rules for TV commercials protects parents against nagging by kiddies, OK's liquor ads, may let bookies on TV later (p. 9).

DES MOINES' KRNT-TV gets under way as Ottawa's French outlet gets started; next will be Notre Dame's uhf WNDU-TV; other upcoming reports (p. 10).

CEILING & FLOOR of station power extended by FCC, which finalizes rule permitting powers as low as 100 watts, proposes to raise uhf to 5000 kw (p. 10).

SENATE PROBERS to "farm out" most of TV study to expert groups, Magnuson says, to be climaxed by autumn "legislative, not investigative" hearings (p. 16).

FEWER THAN 250 NEW TV STATIONS IN SIGHT: Overlooked in the hurly-burly of deadline filings in the subscription TV case June 9 (Vol. 11:24) was an intriguing analysis in CBS's printed comments (pp. 40-42) -- relating to prospects of increase in number of TV stations in the U.S. CBS researchers, who have an enviable record of coming up with right answers, dating from the time present pres. Frank Stanton headed the dept., conclude that only 673 stations are in sight, due to economic limitations.

The 673 include the 433 now in operation as well as prospective new starters emerging from CPs still outstanding and applications still on file at FCC.

Our own records indicate CBS may be over-generous, for the immediate future at least, assuming TV installations and operation continue so costly as to preclude the small-town and sparsely-settled-area outlets commonplace in radio. For example, only 26 stations began this year to date, while 16 quit the air. Of the 157 CPs outstanding, only about 30 are due to start before end of 1955 -- and quite a few never will be built. Furthermore, there will certainly be more casualties. And the application backlog has been reduced drastically, while new applications are now rare.

* * * *

Though designed to refute arguments of subscription-TV proponents, the CBS analysis is provocative from standpoint of TV economics -- wholly apart from pay-TV angle. Its thesis is that no great increase is likely -- toll TV or no toll TV. Here's how CBS-TV Research arrives at that conclusion:

(1) More than 97% of U.S. population is now within range of TV signals.

(2) Of 1838 channel assignments allocated in FCC plan, 589 are now in use, or will be used by existing CP-holders or applicants -- leaving 1249 unused.

(3) Of the 1249 unused channels, 1074 are in areas now served or about to be served. The 175 left "are all in thinly settled areas not likely to support a TV station." Even the FCC has said, in report to Senate, that it isn't Govt.'s function "to create TV services where there is no demand or economic basis [for them]."

(4) Of the 1074 unused channels in areas now served, 809, almost all uhf, "are in communities served by stations in adjacent larger communities. Pay TV would reach these areas in the same way that free TV now reaches them. The same factors which make it profitable for an advertiser to utilize a New York station -- for instance, to serve Stamford, Conn. -- would operate in the area of pay TV."

(5) Of remaining unused channels, 181 are uhf in cities which are vhf-only. "It is a gratuitous assumption," CBS asserts, "that the uhf problem can be solved by persuading the set owner to bear the cost of not one but 2 additional devices on his vhf set. Again the same economic factors which induce the use of vhf stations for advertising programs would be operative for pay-TV programs."

(6) This leaves mere 84 channels, CBS says -- 19 vhf in vhf-only cities, 22 uhf in uhf-only cities, 43 uhf in vhf-uhf cities. CBS's conclusion: "It has not been demonstrated that pay TV would bring about a more rapid utilization of these 84 channels; even if it were wholly successful in doing so, it would bring an additional service to only a limited number of areas, all of them already served, at the price of the sacrifice of the nation's system of free TV."

* * * *

Note: We again urge you to read, unhurriedly, full texts of the comments filed by at least the major parties in the fee-TV proceeding. The skill and experience that went into their preparation has produced some of the finest analyses of TV to date -- economic, program, historical, political, legal. Regardless of your stand on toll TV, there's something in them for everyone. Our Special Digest of all the comments, published June 11, tells you where to write for original texts.

POLITICOS FIND PAY-TV JUICY ISSUE: Arena for subscription-TV fight began to shift from the FCC to Congress this week -- a move long expected. The net result will be to diminish chances of pay-TV approval -- for the simple reason that the popular vote-getting stance is to oppose it (Vol. 11:24).

Delay in final decision on pay-TV is also implicit in the Congressional agitation. But substantial delay is in prospect anyway, since all major parties except NBC asked FCC to postpone from July 11 to Sept. 9 the deadline for additional formal comments. Theatres' Joint Committee based petition on the tremendous volume of work involved, was joined by ABC, CBS, NARTB, Skiatron, Telemeter, Zenith. Of the majors, only-NBC abstained. FCC is certain to grant postponement.

First to introduce a bill was Rep. Celler (D-N.Y.), chairman of the important Judiciary Committee, whose HR-6899 would prohibit stations or their agents from charging for programs. He doesn't think toll TV has a chance, telling us:

"I'm in no hurry for hearings on the bill. I don't think there will be need for any, because I don't think the FCC could possibly approve subscription TV. I don't know where anyone got the idea the public was in favor of it. The reaction to my bill has been tremendous -- about 30-to-1 endorsing it -- and I know most of my colleagues go along with me."

Counterattacking Celler bill, Rep. Chelf (D-Ky.), also a member of Judiciary Committee, promptly introduced HR-6913 to forbid FCC from deciding the fee-TV issue against "the expressed will and desire of the people," and directing Commission to solicit public opinion via letters, cards, telegrams, etc. In June 21 speech to House, Chelf complained about summer TV fare, said he favors letting public have a chance to pay for something better, declared "I do not advocate pay TV," concluded "some form of 'pay-as-you-see' TV is inevitable." He told us he'd like to see tests conducted all over country, including such cities as Louisville and Nashville.

When reminded that FCC mail is now running overwhelmingly against pay TV, Chelf said: "I'm sure the commissioners can judge pressure mail and form letters. We can. We get them all the time." Theatre exhibitors Trueman Rembusch and Alfred Starr, speaking for Organizations for Free-TV, were delighted with Chelf, stating: "The quickest way to kill pay-to-see TV for once and for all is to subject the question directly to the people." They said they're already thinking of ways of getting the issue on ballot in regular elections.

If final decision is to hinge on expressions of public opinion, the networks' current announcements of lavish fall program schedules (see p. 4 & Telecasting Notes, p. 9) are certain to have a powerful effect.

Chairman Percy Priest (D-Tenn.), of House Interstate Commerce Committee, has no desire to get his group into the act yet, saying: "I don't think it's a legislative problem at this time. I have no intention of holding any hearings on it in the near future. The Commission should finish its consideration first, and I'm keeping a completely open mind on the subject until it does."

Similar position is taken by Sen. Magnuson (D-Wash.), chairman of the Senate Commerce Committee, who says that he may look into pay-as-you-see TV next fall "if the Commission hasn't resolved the question by then."

Additional Congressional objectors: Sen. Welker (R-Ida.) had reprinted in June 20 Congressional Record a long editorial blasting toll TV, written by James P. Gossett, of Gooding (Ida.) Leader. Rep. Bass (R-Tenn.) said that pay-TV would discriminate against low-income groups; that all his mail on subject is in that vein.

This week's activity is undoubtedly just the beginning. More bills and speeches can be expected -- predominantly in opposition to tollvision.

[For other subscription-TV activity this week, see p. 5.]

AN ALLOCATIONS STUDY 'AT THE SUMMIT': Senate investigators have given carte blanche to a group of nation's top allocations & communications engineers in their attempt to re-evaluate FCC's TV allocation plan in light of vhf-uhf problems.

This is first of series of "expert" groups due to tackle knotty TV issues for Senate Commerce Committee, according to Chairman Magnuson, who expects hearings next fall to receive summation of findings (see separate story on p. 16).

The high-powered ad hoc engineering committee met for first time June 21 with Magnuson and other Senators and staff members. Following the meeting, Magnuson made it clear he had torn up his original "assignment sheet" (Vol. 11:25) and decided to let the engineers work out their own agenda, goals, timetable, methods of study.

Committee is headed by Prof. Edward Bowles of MIT, who from 1942-52 occupied high posts in War & Defense Depts. including 2 years as scientific warfare advisor to Defense Secy. He's generally regarded as an outstanding choice, an impartial chairman highly respected in industry, Govt. and education.

Philco research director Donald G. Fink was elected secy. He's former editor of Electronics Magazine and veteran of such far-reaching industry technical projects as NTSC, the Condon ad hoc committee on color TV and Joint Technical Advisory Committee's study on spectrum conservation. Other engineers attending first meeting:

Haraden Pratt, IRE executive secretary and former telecommunications advisor to President Truman; Dr. Allen B. DuMont & Robert Wakeman, DuMont allocations engineer; Washington consulting engineers C.M. Jansky & Stuart Bailey; NBC allocations expert Wm. Duttera; ABC engineering v.p. Frank Marx; CBS engineering v.p. Wm. Lodge; Westinghouse Bcstg. engineering v.p. Ralph Harmon; Washington consulting engineer T.A.M. Craven; FCC Broadcast Bureau chief Curtis Plummer.

Group made no decisions at first meeting, hasn't yet mapped out program. It will delve deeply into allocation principles, criteria, etc. A fact-finding group, it's not expected to come up with any "recommendations" as such, will leave that to Senate Committee. Engineers will meet infrequently, do much of work by correspondence, each member to be assigned specific fact-finding tasks.

* * * *

No "freeze" on FCC actions with regard to uhf problems is contemplated while ad hoc committee conducts its study. In press conference following engineers' first meeting, Sen. Magnuson made it clear he wants Commission to continue its case-by-case consideration of deintermixture petitions.

The Commission will hold first oral arguments on deintermixture Mon. & Tue., June 27-28, involving Peoria, Evansville, Madison, Hartford, Albany. Total of 33 parties will participate, each being allowed 20 minutes for argument.

THE TV-MOVIE 'MARRIAGE'—WHO'S BOSS? Three short years ago, 20th Century-Fox pres. Spyros Skouras called TV the "enemy" of the movies (Vol. 8:14) and his confreres in the then depression-ridden cinema world echoed his sentiments. To which the TV industry replied: "We need you -- and you can't lick us; so why not join us?"

Today, Mr. Skouras is making TV films and is being paid to turn out an hour-long network show beginning next fall. Every major movie producer is now in TV -- made unanimous by the announcement this week of MGM's new half-hour series on ABC, beginning next season. Hollywood's philosophy has changed. Attitude now appears to be: "No, we can't lick 'em; but maybe we can take 'em over."

[For list of major movie producers and their new TV activities, see p. 5.]

* * * *

Hollywood has found TV and movies are truly interdependent. And the TV industry, which for years has been crying out for Hollywood's properties and know-how, is beginning to discover that if it's not careful it may be taken for a ride.

It's evident that Hollywood didn't marry for love. Considering that the movie industry was depending on candy and popcorn sales 3 years ago, it's extracting a terrific price for its part in the partnership. As regards spate of new studio-owned shows which debut next fall, 2 potential pitfalls are evident:

(1) Though they're traditionally big advertising spenders in other national media (except radio), the movie producers are buying absolutely no network TV time. Yet they get about 8 minutes of advertising during each hour of the forthcoming new programs -- before large audiences in prime time, paid for by another sponsor -- to tell viewers, in effect, "turn off your set and go to the movies." They're making great capital of it, too. For example, Loew's Inc. pres. Nicholas Schenck stated:

"Here at MGM we have made a study of TV and have in mind the point-of-view of motion picture exhibitors. We are now evolving a program which will be good popular entertainment and will serve the mutual interests of our customers and ourselves. A portion of our MGM Parade will be devoted to information about the studio's forthcoming pictures to be played exclusively in motion picture theatres."

(2) Assuming the programs are successful (the "movie touch" isn't necessarily magic -- there are plenty of turkeys in theatres, too), will this new TV-movie affinity take control of top programs out of hands of the networks? Except for Disney-ABC joint ownership of Disneyland, no details of network-movie producer contracts have been released. If trend to movie package shows results in Hollywood control of many top programs, it's fair to ask: Have the networks paid too high a price? They should recall only too well their bitter experiences in radio's heyday when the ad agencies controlled most programs. We remember their vows not to let it happen in TV.

* * * *

An entirely different kind of offshoot of the TV-movie mating is the promise of the biggest spectacular of them all -- a 3-hour color premiere of one of the most important British films in years, produced at cost of \$2,000,000.

Paying \$500,000 for one-shot rights to Alexander Korda's forthcoming picture "Richard III" (Laurence Olivier, Ralph Richardson, Cedric Hardwicke, John Gielgud, Claire Bloom), NBC will show film immediately before its U.S. theatrical release, which will be on 2-a-day, advance price roadshow basis. This is second premiere of a new Korda film planned by NBC -- first being Rex Harrison's "The Constant Husband" (for \$200,000), due to be shown on color TV Oct. 9 (Vol. 11:23).

Actions speak louder than words, and NBC's expensive burst of programming innovations obviously is aimed not only at recouping billings leadership from CBS, but -- perhaps more important -- at answering fee-TV partisans in language everyone can understand: "Free TV is giving the public first-run movies (Richard III, The Constant Husband), hit Broadway-cast plays (Peter Pan, Saint of Bleecker Street, One Touch of Venus, Skin of Our Teeth) and lavish original productions (spectaculars). So what else can you give them, besides a coin box?"

Note: Latest telecast of a stage success from Broadway -- CBS-TV's June 22 one-hour adaptation of "Three for Tonight" -- was another smash hit, drawing acclaim from critics. It ought to be repeated, preferably in color.

EMBOLDENED BY TREND of public and Congressional opinion in their favor in subscription-TV struggle (p. 2), theatre exhibitors' spokesmen Alfred Starr and Trueman Rembusch this week even dared prod the enigmatic movie producers.

They noted with "shocked surprise" the failure of producers to file comments with FCC or to take a stand. Since Paramount was only one to file, through subsidiary International Telemeter which has a coinbox pay device, exhibitors said they must assume Paramount dominates the rest. They sought to wean others to their side by warning that Paramount holds patents, might be in position to call the tune for all producers; that release of first-run pictures to pay-TV would bring "endless litigation," etc. Other toll-TV developments:

(1) NARTB board voted this week to take more active role opposing pay-as-you-see, will have 3-member committee promote "full disclosure by appropriate means of pertinent facts and information to Congress and the American public concerning pay TV."

(2) Canadians have rejected tollvision. A. Davidson Dunton, chairman of CBC board of governors, said it just isn't practical, in testimony during governmental inquiry in Toronto.

(3) Milton Shapp, pres. of Jerrold Electronics Corp., major wired system manufacturer and operator, reports that 2 important unidentified entities in the entertainment industry have come to him for discussions since he first argued case for confining pay-TV to wire (Vol. 11:24).

MOVIE PRODUCERS are all in TV now — in one way or another—with the exception of trouble-beset RKO, which may be on brink of selling its 700-film backlog (see p. 4). Big film companies selling package shows to networks on the *Disneyland* formula (20th Century, Warners, MGM) have sponsors already signed. Here's an up-to-the-minute lineup of Hollywood majors and their TV activities:

Metro-Goldwyn-Mayer's *MGM Parade*, latest to be announced, probably will be slotted by ABC-TV Wed. 8:30-9 p.m., immediately after *Disneyland*, with American Tobacco & General Motors as sponsors. It will draw heavily on old theatrical short subjects, with little new material outside the inevitable movie stars and "behind-the-scenes" sequences plugging current theatrical attractions.

Walt Disney Studios paved the way with *Disneyland*, jointly owned with ABC, Wed. 7:30-8:30 p.m., sponsored by American Motors, Derby Foods (alt.), American Dairy Assn. (alt.). Disney's *Mickey Mouse Club* begins next fall Mon.-Fri. 5-6 p.m. with newly made films and old theatrical cartoons, with 14 of the 20 quarter hours already sold. Special one-shot *Dateline Disneyland* Sun., July 17, 7:30-9 p.m., is sold to American Motors, Swift & Co., Gibson Greeting Card.

The *Warner Bros. Presents* debut date, also ABC-TV, is Sept. 13, Tues. 7:30-8:30 p.m. as weekly hour series sponsored by Liggett & Myers, GE (alt.), Monsanto Chemical (alt.). Warners also has organized new TV film producing subsidiary.

Twentieth Century-Fox will have own hour show on CBS-TV, alt. Wed. 10-11 p.m., sponsored by GE, has also organized big TCF Productions, already shooting 2 other half-hour filmed TV series.

Paramount is part owner of York Productions (with Martin & Lewis), which June 12 took over NBC-TV's ail-

(4) Editorial stand against telecast pay-TV was taken by *Broadcasting-Telecasting Magazine*. In June 20 issue, it endorsed trying it via wired systems. In addition, it deplored Zenith's recent publicity tactics (Vol. 11:25), stating: "Several industry leaders have stooped to personal vilification in the war of the mimeograph . . . but none has stooped lower than spokesmen for Zenith. Nor was it accidental that coincidentally with the deadline for FCC comments on subscription TV, Zenith demonstrated a new electronic gun which can shoot the commercials out of TV. The dictionary says the antonym of zenith is nadir. In this case the dictionary is wrong. Zenith has meant the nadir of taste in recent publicity."

(5) RCA pointed out that current fight is nothing new, noting that NARTB's June 9 brief to FCC quoted from chairman David Sarnoff's testimony before House committee in 1924, in which he expressed faith in radio's ability to succeed without public payment. At that time he stated: "The greatest advantage of radio lies in its universality, in its ability to reach everybody, everywhere, anywhere, in giving free entertainment, culture, instruction, and all the items which constitute a program; in doing what no other agency has yet been able to do, and it is up to us in the radio art and industry, with intelligence and technique and broadness of spirit and vision as to the future, to preserve that most delightful element in the whole situation—freedom of radio."

Note: Digests of arguments on subscription TV, pro & con, as filed with FCC up to June 11, are available in 4-p. Supplement published with our Vol. 11:24, containing story on "The Tollvision War"—At Deadline." Extra copies of Newsletter with Supplement available to subscribers at \$1 each; extra Supplements 50¢ each.

Colgate Comedy Hour (renamed *Variety Hour*) Sun. 8-9 p.m., producing it live, at least for time being. Though long in TV business through its ownership of Los Angeles' KTLA, former ownership of WBKB, Chicago, and interest in DuMont Network, Paramount Pictures has never been particularly active in TV film production. It recently released small block of Class B features to TV.

Columbia Pictures is old-timer in TV film production and distribution, and through its high-ranking Screen Gems subsidiary is understood to be readying a *Columbia Presents* program.

Universal-International was one of first majors to plunge into TV film-making through its United World Films, got its fingers burned after making one 13-chapter series, retrenched 4 years ago, is now dipping its toes into the TV stream again via 90-min. spectacular for NBC-TV July 2. It's also currently filming TV commercials, plans gradual TV film comeback.

Republic Pictures has made more money out of TV than movies for last few years, is active in TV film distribution and processing, leases its studios to outside TV film producers, has released several big batches of oldies to TV.

RKO, in-&-out of movie production field for last few years, is certain to sell its huge feature backlog to TV when it gets big enough offer—General Teleradio now considered most likely purchaser (Vol. 11:24), reportedly having offered more than \$25,000,000.

Comedy writing talent search, announced by NBC last April (Vol. 11:18), has already produced more than 1000 applicants, according to program development director Leonard Hole, who said 900 specimens of writing are being read by NBC's creative comedy committee and 30 writers "have shown sufficient promise for us to ask for additional submissions."

Personal Notes: Edgar B. Stern Sr., chairman, WDSU-TV & WDSU, New Orleans, named by Ford Foundation to committee to advise on distributing \$50,000,000 to colleges & universities to help increase faculty salaries . . . George W. Brett, Katz Agency sales v.p., retires from that post July 1, will continue with rep firm and as director of TvB until end of year . . . Robert C. Wood, Storer midwest sales mgr., promoted to national sales mgr., reporting to v.p. Tom Harker . . . Jones Scovern named business mgr., Free & Peters . . . John B. Lanigan named sales mgr. of NBC-TV daytime programs, succeeded as eastern sales mgr. by John Dodge . . . E. K. Jett, gen. mgr. of WMAR-TV, Baltimore, leaves July 20 for 3 weeks in Europe . . . Robert Sarnoff, NBC exec. v.p., and Mrs. Sarnoff now in Europe, returning mid-July . . . Pegeen Fitzgerald named mgr. of retail merchandising, WRCA-TV & WRCA, N. Y. . . Richard A. Moore elevated to pres., John R. Vrba sales v.p., Robert W. Breckner program v.p., *Los Angeles Times*' KTTV . . . Hardie Frieberg named eastern div. v.p., Television Programs of America Inc. . . . Frederick (Fritz) Jacobi promoted to mgr. of publicity for NBC film div., succeeding Charles Henderson, now mgr. of network field exploitation . . . L. Boyd Mullins promoted to new post of merchandising & research mgr., KRON-TV, San Francisco; Thomas Mulhalley appointed director of public affairs . . . Burt Lambert, ex-Ziv, becomes sales supervisor, and Bennet Korn, ex-WHEN & WQXR, will be sales exec., WABD, N. Y. . . . Joseph J. Battaglia Jr. named traffic mgr., N. W. Ayer TV-radio dept. . . . James F. Brown resigns as national sales mgr., KBTv, Denver, to become commercial mgr. of Denver's radio KOSI . . . George Ruppel, controller, promoted to Mutual v.p.-treas., Roy Danish to v.p. in charge of station programs.

* * * *

NBC news dept. shifts, under public affairs v.p. Davidson Taylor's policy of rotating foreign correspondents: Newsman Leif Eid shifted from Washington to Paris, Frank Bourgholtz from Paris to Bonn, Robert McCormick from Bonn to Washington, film correspondents Robert Hecox from Hong Kong to Rome and Henry Toluzzi from Rome to Hong Kong. Domestic changes announced by Wm. R. McAndrew, news chief: John H. Thompson, ex-program director, KNBC, San Francisco, named Pacific div. mgr. of news & special events; Chester E. Hogan promoted from N. Y. desk to Chicago mgr. of news & special events; Rex Goad moved up from Washington news editor to night newsroom supervisor, N. Y.; Henry Cassidy takes over *World News Roundup*; Bill Henry, *Los Angeles Times* columnist, joins staff; Chet Huntley, commentator, joins west coast staff; John Rich, ex-Tokyo & Korean correspondent recently on fellowship leave, rejoins N. Y. staff. Note: NBC's McAndrew will direct coverage of Big 4 "Meeting at the Summit" starting in Geneva July 18; CBS's Eric Severeid, chief Washington correspondent, goes to London June 29 to switch summer jobs with Howard K. Smith, and will cover Big 4 conference also.

— ■ —

Amon Carter, 75, publisher of *Ft. Worth Star-Telegram*, pioneer TV-radio operator (WBAP-TV & WBAP), oil magnate and one of Texas' most prominent leaders, died in Ft. Worth June 23. His TV-radio interests are handled by the veteran Harold Hough, and his son Amon Jr. is now expected to head newspaper-radio properties.

Wyllis Cooper, 56, TV-radio & film writer, recently with CBS-TV, died June 22 in hospital near his home in Glen Gardner, N. J. His best known radio shows were *Lights Out*, *Tales of the Foreign Legion*, *Quiet Please*; for TV he handled *Escape* and *Stage 13* on CBS.

Fred Rickey, 34, TV producer of NBC's forthcoming *Wide World* and for 6 years executive producer in charge of color for CBS, died June 24 of heart attack.

NARTB's TV BOARD, convening June 23 at Hot Springs, Va., appointed special committee to consider broad-gauged national study of viewer attitudes toward TV programming. It acted after Code Review Board chairman G. Richard Shafto reported that a pilot study conducted last fall under its auspices indicated need for such a national survey. Unlike CBS's proposed field study of what public wants of TV (Vol. 11:22), NARTB's survey would determine viewer attitudes toward what they're getting now in programming. Appointed to committee are Ward Quaal, WLWT, Cincinnati, chairman; Joseph E. Baudino, Westinghouse; Clair R. McCollough, WGAL-TV; Merle S. Jones, CBS; Frank M. Russell, NBC.

In his report, Shafto said Code Review Board's monitoring recently has been devoted to review of children's programming and late-afternoon & early-evening program schedules. Effectiveness of TV code stimulated radio board to ask for appointment of committee to study ways of putting teeth into its Standards of Practice for Radio, including possible use of "a symbol in sound" for radio stations comparable to TV Seal of Good Practices.

Research committee submitted "interim report" to TV board on progress of Politz pre-testing for county-by-county or market-by-market census of TV set ownership. NARTB declined to disclose contents, but spokesman said "it gave no grounds for optimism or pessimism." Committee was instructed to continue field tests and to issue another report in Sept. Full board also approved operating budget of \$850,000—\$400,000 in TV—for fiscal year which began April 1.

* * * *

Community TV activity: Question of property rights in TV signals relayed by community TV systems was considered this week by NARTB board, which decided to set up committee to look into it. By and large, stations are pleased with extra circulation; however, several small-town operators feel that systems make serious dent in their audiences by bringing in out-of-town signals. Another community-TV microwave was sought this week, Black Hills Video Co., filing application for link to bring San Antonio signals to system in Victoria, Tex. It proposes to carry 2 channels, using Philco TLR-2C equipment, installed for \$33,566. System operator would pay \$1000 monthly. Black Hills is same organization seeking extensive Denver-Rapid City microwave in competition with Bartlett Management; they're now going through hearing.

Clair R. McCollough, WGAL-TV, Lancaster, Pa., was re-elected chairman of NARTB's TV board at semi-annual meeting this week at Hot Springs, Va. Campbell Arnoux, WTAR-TV, Norfolk, was re-elected vice-chairman. Henry Clay, KWKH, Shreveport, and E. K. Hartenbower, KCMO, Kansas City, were also re-elected chairman & vice-chairman, respectively, of radio board. Kenneth L. Carter, WAAM, Baltimore & J. Frank Jarman, WDNC, Durham, were elected co-chairmen of membership committee; Ward L. Quaal, WLWT, Cincinnati, re-elected chairman of by-laws committee; Wm. D. Pabst, KFRC, San Francisco, chairman of finance committee; Campbell Arnoux, chairman of TV finance committee.

More honorary degrees: Mitchell Wolfson, pres. of WTVJ and co-owner of Wometco Theatres, from U of Miami; Wm. C. Decker, pres. of Corning Glass Works, from Penn state (distinguished alumni award).

Carlos A. Franco, veteran of agency field, recently resigned gen. sales mgr., Crosley Bestg. Corp., forms Carlos Franco Assoc. Inc., adv. & marketing consultants, 420 Madison Ave., N. Y.

Mrs. Marie Natvig, witness in Lamb case who changed testimony in midstream, was sentenced to 8 months to 2 years for perjury, Federal Judge Holtzoff calling her a "danger to the community."

NEW RATE CARD No. 15 released for NBC key WRCA-TV, New York, effective June 1, reveals once again how the high cost of TV time is going still higher. It posts the highest rate yet quoted in TV—\$8400 an hour for so-called Class AA time, \$5040 a half hour, \$3360 for 15-min., \$2940 for 10-min., \$2100 for 5-min. Class AA embraces prime periods: 10:30-11 p.m. daily and 6-7:30 p.m. Sun. When last quoted, June 1, 1954, Class AA hour rate was \$6200, half hour \$3720, 15-min. \$2480, 10-min. \$2170, 5-min. \$1550.

Newly established Class AAA rate for one 20-sec. spot between 7:59-10:30 p.m. Mon.-thru-Sat. & 7:29-10:30 p.m. Sun. costs \$2050 net and 10-sec. \$975. Class AA spot rates (7:30-7:59 p.m. Mon.-thru-Sat., 6:59-7:29 p.m. Sun., 10:30-11 p.m. daily) cost \$1400 for 20-sec., \$690 for 10-sec. There are various other rate changes, too, including schedule of color spot charges (see p. 15).

These give you an idea of the soaring costs of TV sponsorship—even with the usual frequency discounts the bill comes high in the nation's biggest market with its reputed 4,700,000-plus sets-in-use. NBC key's prime rival, CBS-TV's WCBS-TV, now charges \$6500 an hour, \$3900 half hour, \$2600 for 15-min. in its Class AA time, which is 7:30-11 p.m. Mon.-thru-Sat. and 6-11 p.m. Sun. That's up from \$6000, \$3600 & \$2400 last year, when this was called Class A time. Spots range from \$1700 for 20-sec. and \$850 for 10-sec. in Class AA time down to \$300 & \$125 for early-morning (before 9 a.m.) and after-midnight time.

You have to be an actuary as well as timebuyer to dope out many of the complex rate cards not only of the big stations but some of the little ones. All rate cards of all U. S. & Canadian stations will be updated and digested in our *TV Factbook No. 21*, which will be off the presses in about a month. Meanwhile, here are those of WRCA-TV and WCBS-TV:

DIGEST OF WRCA-TV RATE CARD CARD NO. 15
(June 1, 1955)

Hour	30 Min.	15 Min.	10 Min.	5 Min.	20 Sec.*	10 Sec.*
Class AA—10:30-11 p.m., daily; 6-7:30 p.m., Sun.	\$8400.00	\$5040.00	\$3360.00	\$2940.00	\$2100.00	\$1400.00
Class A—7-7:30 p.m., Mon.-Sat.	4500.00	2700.00	1800.00	1575.00	1125.00	1095.00
Class B—6-7 p.m., Mon.-Sat.	3500.00	2100.00	1400.00	1225.00	875.00	850.00
Class C—9 a.m.-6 p.m., Mon.-Fri.; 11 p.m.-midnight, daily.	3150.00	1875.00	1260.00	1102.50	787.50	650.00
Class D—Sign-on-9 a.m., Mon.-Fri.; sign-on-6 p.m., Sat. & Sun.; midnight-sign-off, daily.	1850.00	1110.00	740.00	647.50	462.50	350.00

* Class AAA (7:59-10:30 p.m., Mon.-Sat.; 7:29-10:30 p.m., Sun.); 20 Sec. \$2050, 10 Sec. \$975. Class AA (7:30-7:59 p.m., Mon.-Sat.; 6:59-7:29 p.m., Sun.; 10:30-11 p.m., daily). Class A (7-7:30 p.m., Mon.-Sat.; 6:29-6:59 p.m., Sun.). Class B (11-11:15 p.m., daily). Class C (5:59-7 p.m., Mon.-Sat.; 5:59-6:29 p.m., Sun.). Class D (3-5:59 p.m., Mon.-Sat.; sign-on-5:59 p.m., Sun.; 11:15 p.m.-sign-off, daily). Class E (sign-on-3 p.m., Mon.-Sat.).

Subject to frequency discounts, with exception of Class AAA announcements.

Color—20 Sec. station breaks \$500, 10-Sec. \$250 added to regular station-break rate; commissionable.

Time reserved for network: Class A (7:30-10:30 p.m., daily; 5-6 p.m., Sat. & Sun.). Class B (5-6 p.m., Mon.-Fri.; 3-5 p.m., Sat. & Sun.). Class C (10 a.m.-1 p.m., daily; 3-5 p.m., Mon.-Fri.).

DIGEST OF WCBS-TV RATE CARD CARD NO. 15
(May 1, 1955)

Hour	30 Min.	15 Min.	10 Min.	5 Min.	Min. or 20 Sec.*	10 Sec.*
Class AA—7:30-11 p.m., Mon.-Sat.; 6-11 p.m., Sun.	\$6500.00	\$3900.00	\$2600.00		\$1700.00	\$850.00
Class A—7-7:30 p.m., Mon.-Sat.; 5-6 p.m., Sun.	6250.00	3750.00	2500.00	\$2084.33	\$1875.00	1250.00
Class B—6-7 p.m., Mon.-Sat.	4500.00	2700.00	1800.00	1500.00	1350.00	900.00
Class C—9 a.m.-6 p.m., Mon.-Sat.; 9 a.m.-5 p.m., Sun.; 11 p.m.-midnight, daily.	3125.00	1875.00	1250.00	1041.67	937.50	600.00
Class D—Sign-on-9 a.m., midnight-sign-off, daily.	1500.00	900.00	600.00	500.00	450.00	300.00

* Class AA (7:59-10:30 p.m., Mon.-Sat.; 6:29-11 p.m., Sun.). Class A (7:15-7:59 p.m., Mon.-Fri.; 10:30-11 p.m., Mon.-Sat.; 6:59-7:59 p.m., Sat.; 5:59-6:29 p.m., Sun.). Class B (5:59-7:15 p.m., Mon.-Fri.; 5:59-6:59 p.m., Sat.; 11-11:15 p.m., daily). Class C (8:59 a.m.-5:59 p.m., 11:15 p.m.-midnight, daily). Class D (sign-on-8:59 a.m., midnight-sign-off, daily).

Subject to frequency discounts.

Network Accounts: Eyes of whole TV & ad world will be on NBC-TV's *Wide Wide World* show Mon. June 27, 8-9:30 p.m., pet project of NBC pres. Pat Weaver, who foresees it as "a way of taking people everywhere by TV." Show involves more than 1000 performers & technicians, including 250 engineers, 15 directors & 4 producers. Twelve remote units & 40 cameras will be used to bring in 15 pickups, some from Canada & Mexico, and including network color mobile unit. AT&T has expressed interest in sponsorship if and when it goes on regular program schedule . . . Crosley (appliances) is 3rd sponsor for NCAA football games on NBC-TV this fall, thru Earle Ludgin & Co., leaving only one quarter to be sold; other sponsors are General Cigar & Schick, with Dow Chemical signed for post-game show . . . Emerson Drug & Lenthieric (perfumes) to be alt. sponsors of *Chance of a Lifetime* on ABC-TV starting July 3, Sun. 9-9:30 p.m., thru Lennen & Newell and Cunningham & Walsh . . . U. S. Rubber buys 2 partic. in NBC-TV's color "spectaculars" this fall, Sun. 7:30-9 p.m., thru Fletcher D. Richards Inc. . . Warner-Lambert (cosmetics) buys alt. sponsorships in 5 *Robert Montgomery Presents* this summer on NBC-TV, Mon. 9:30-10:30 p.m., thru Ruthrauff & Ryan . . . Chunky Chocolate Corp. to be alt. sponsor of 30-min. of *Super Circus* on ABC-TV starting Sept. 25, Sun. 5-6 p.m., thru Hilton & Riggio . . . Del Monte extends 1955 purchases on NBC-TV's *Today, Home & Tonight* to total of 93 partic., thru McCann-Erickson.

Among advertisers currently reported using or preparing to use TV station time: Pacific Chemical Co., Seattle (Balance detergent), thru Miller, Mackay, Hoeck, Hartung, Seattle; Wilson Chemical Co., Tyrone, Pa. (White Cloverine salve), thru Walter J. Cattick, Philadelphia; Slenderella Intl., Darien, Conn. (reducing plan), thru Management Assoc. of Conn., Darien; Fisher Nut Co., St. Paul, thru Bozell & Jacobs, Minneapolis; Armstrong Rubber Co., West Haven, Conn. (Armstrong tires), thru Biow-Beirn-Toigo, N. Y.; AlumnaRoll Products Co., N. Y. (AlumaRoll awnings), thru Sherman Lawrence Adv., N. Y.; Spirling Products Co., Hicksville, N. Y. (TV antennas), thru Gerald H. Keller Adv., N. Y.; Tuxedo Candy Co., San Jose, Cal. (Roxbury candies), thru Foote, Cone & Belding; Cliquot Club, thru Harold Cabot, Boston.

Rate increases: KWK-TV, St. Louis, adds new Class AA hour (7-10 p.m. daily) at \$1200, min. at \$250, Class A remaining \$1000. KHJ-TV, Los Angeles, raises base hour from \$1000 to \$1200, min. \$180 to \$220. KRLD-TV, Dallas, adds new Class AA hour (7-10 p.m. Mon.-Sat. & 6-10 p.m. Sun.) at \$1100, min. at \$225, Class A remaining \$950. KLZ-TV, Denver, raises hour from \$550 to \$650, min. \$120 to \$150. WSLS-TV, Roanoke, adds new Class AA hour (8-10:30 p.m. daily) at \$600, min. at \$120, Class A hour remaining \$500. WBRE-TV, Wilkes-Barre, raises hour from \$400 to \$450, min. \$70 to \$90. KELO-TV, Sioux Falls, S. D., hour from \$300 to \$350, min. \$60 to \$70; WJTV, Jackson, Miss., from \$200 to \$300 & \$40 to \$60; WLBT, Jackson, Miss. from \$250 to \$300 & \$50 to \$60; CKWS-TV, Kingston, Ont., from \$200 to \$250; CKCK-TV, Regina, Sask. from \$200 to \$235.

Record-breaking \$2,000,000 in gross billings was racked up by NBC-TV for *Today, Home & Tonight* in week ended June 17. Biggest sponsors signed during week were Del Monte, Roto Broil, Glidden Paints, Gruen, G. Washington Coffee, Westclox, General Time, Calgon (water conditioner).

Mutual Broadcasting System, in rate card No. 18 effective July 1, lowers 6-10:30 p.m. gross rates about 50%, making same single rate for all hours; maximum discount is cut from 63% to 47½%, annual rebate from 12½% to 7½%.

'DIVERSIFICATION' ISSUE, as well as sub-
scription TV (p. 2), got attention of Con-
gress this week. In Senate and House, bills were
introduced which would direct FCC to ignore or
minimize newspaper and TV-radio interests of
applicants when making grants.

FCC granted one CP meanwhile — Ch. 6 to
KAVE, Carlsbad, N. M. Pres. and 50.9% stock-
holder is Val Lawrence, mgr. of KROD-TV, El
Paso (Ch. 4). Also authorized were shifts of
KONA, Honolulu from Ch. 11 to Ch. 2 and WTVR,
Scranton, Pa. from Ch. 73 to Ch. 44.

Sens. Hayden (D-Ariz.) and Capehart (R-Ind.)
co-sponsored S-2321, which would prevent Com-
mission from denying a license to a newspaper
unless grant would "create a monopoly" of news
media to an extent "contrary to the public interest." In
comparative hearings, bill provides that newspaper own-
ership be ignored unless applicants are equal in all other
respects—whereupon newspaper affiliation may be con-
sidered either an advantage or a disadvantage. Bill also
would direct Commission to give no weight to newspapers'
editorial policies.

In House, Rep. Harris (D-Ark.), chairman of Inter-
state Commerce Committee's subcommittee on communica-
tions and transportation, introduced HR-6977, which sim-
ply states that FCC shall not discriminate against princi-
pals with interests in "any medium primarily engaged in
the gathering and dissemination of information." Rep.
Beamer (R-Ind.) introduced identical bill, HR-6968, said
it's also meant to prevent discrimination against appli-
cants with other TV-radio interests. He noted that simi-
lar language was included in draft of McFarland amend-
ments to Communications Act in 1952, was deleted be-
cause FCC promised not to discriminate against news-
papers. "But history hasn't borne that out," he said.

With Congressmen charging that FCC is discriminat-
ing against newspaper and multiple TV-radio owners, and
with Court of Appeals blasting Commission for just the
reverse (Vol. 11:25), commissioners are understandably

perplexed. As one says: "You know, some of these cases
could be decided by no more than the toss of a coin."

* * * * *

Hearing on "protest" section of Communications Act
was conducted by House Interstate Commerce Committee
this week; it was exploring HR-5614, introduced at re-
quest of FCC. Commission chairman George McCon-
naughey testified that amendment is "urgent"; that exist-
ing law is being used by competitors to keep stations off
air because Commission is not permitted to give short
shrift to insignificant allegations by protestants. Comr.
John Doerfer testified that section should be repealed to-
gether; that it "gives economic protection to broadcasters
and others who are not in the broadcasting field, contrary
to the original purposes of the Communications Act"; that
commissioners, not protestants, should be trusted to pro-
tect the public interest.

Attorney Henry Fischer, speaking for Federal Com-
munications Bar Assn., reported that FCBA's executive
committee, by close vote, endorsed the FCC-sponsored
amendment, with relatively minor changes.

Attorney Benedict Cottone, representing UHF Indus-
try Committee, asserted that law should be left alone; that
it protects uhfs from "super-power" vhfs; that if protest
is filed against a grant, grantee must not be permitted to
get on air because an operating station is almost impossi-
ble to dislodge, regardless of seriousness of charges against
it; that station should be permitted to continue or start
operating, after protest is lodged, only when public inter-
est "imperatively" demands it.

Ervin F. Lyke, pres. of WVET-TV, Rochester, N. Y.,
which shares Ch. 10 with WHEC-TV, supported amend-
ment. He stated that stations are in danger of being
forced to go silent because of protest filed by radio WSAY.
Protest had been dismissed by FCC, is now pending in
Court of Appeals. Lyke declared that if court rules
WSAY is entitled to FCC hearing, "the Commission ap-
parently has no option but to take WVET-TV & WHEC-
TV off the air" until it conducts full hearing and makes
final decision.

Senate subcommittee, under Sen. Pastore (D-R. I.)
will hold hearing on same subject July 7.

Amendment of FCC rules to permit vhf drop-ins
through use of directional antennas and low power was
requested by UHF Industry Coordinating Committee (Vol.
11:24) in petition filed July 21 following 2-hour meeting
of uhf telecasters with commissioners. Petition asks that
mileage separations be waived on case-to-case basis
where it would serve public interest. Committee also
asked freeze of at least 90 days on all grants and modi-
fications which would aggravate intermixture problems,
and that all pending deintermixture proposals be resolved
during that period. Station operators meeting with FCC
members described conditions in their particular areas.
Commissioners asked questions, showed awareness of uhf
plight, but didn't commit themselves. Meeting with FCC
members were uhf committee chairman Harold Thoms,
WISE-TV, Asheville, N. C.; vice chairman Fred Weber,
WFPG-TV, Atlantic City, N. J. (now off air); John John-
son, WTOB-TV, Winston-Salem; Edward Thoms, WKJG-
TV, Fort Wayne, Ind.; Herbert Nelson, WFAM-TV, Lafay-
ette, Ind.; counsel Ben Cottone. Commissioners present
were Chairman McConnaughey, Hyde, Doerfer, Bartley,
Webster.

WTVU, Scranton, Pa. (Ch. 73) applied this week for
permission to leave air July 1 for 60 days in order to in-
stall new RCA transmitter and antenna to permit opera-
tion on recently-allocated Ch. 44, with 13.2-kw visual ERP.
Other Scranton outlets are WARM-TV (Ch. 16) & WGBI-
TV (Ch. 22)

"Territorial exclusivity" ruling of FCC, proposed more
than year ago (Vol. 10:14), was finalized without change
this week. Commission said it realizes rule is "no cure-all
for the economic and other problems which confront many
TV stations today." It explained: "All that the amend-
ment does is to give stations greater freedom on an over-
all basis in negotiating and contracting with networks
and advertisers for their programs. We are hopeful that
the amendment may enable some stations which have
heretofore been precluded from obtaining network pro-
gramming because of the 'first call' rights of stations in
other communities to obtain such programs." Decision is
Notice 55-706, Doc. 10989.

Up-to-date FCC rules on experimental & auxiliary
broadcast stations (Part 4 of Rules), including all changes
since 1950, will be published in *Federal Register* June 25,
and as separate document shortly thereafter. Copies of
both (latter is usually more accurate, handier) will be
available from Supt. of Documents, Govt. Printing Office,
Washington.

Cheaper transcripts of FCC hearings will be available
starting July 1, Commission having awarded stenographic
reporting contract to new company—American Reporting
Assoc., 306 Ninth St. NW, Washington. Price for ordi-
nary copy will be 11.4¢ per page (vs. 20¢). Charge for
daily copy will be 28.5¢ (vs. 55¢); immediate copy 45.6¢
(vs. 70¢).

Telecasting Notes: Networks' "special program" plans for next season—obvious answer to fee-TV—are being doled out to the public in dribs & drabs. This instalment-plan system of announcing the greatest season TV has ever seen is possibly due to fact that special shows are being signed up one at a time. More than likely, however, it's a tactical weapon in the counter-publicity against toll TV's masterful promotional barrage. A sensational announcement a week—like this week's NBC story on the color-TV premiere of Korda's *Richard III* (p. 4)—creates maximum impact, keeps the networks and the wonders of free TV on public's tongue . . . Pat Weaver's pet project *Wide Wide World* (first: Mon. June 27, 8-9:30 p.m.) was subject of at least 6 weekly press releases and "leaks" to trade press, each containing some new information, making it a story all over again . . . CBS's spectaculars next fall—Bing Crosby, Noel Coward, Mary Martin, Paul Gregory, etc.—have been announced one-at-a-time, latest report being that Bing's 2 shows will be *Rip Van Winkle* and Maxwell Anderson's un-Bingish *High Tor* . . . Among other spectacular announcements, leaks and rumors from NBC doled out this week: Maurice Chevalier signed for Dec. 4 spectacular; Sadler's Wells Ballet in *Sleeping Beauty*; Frank Sinatra in musical version of *Our Town*; repeats of *Peter Pan* and *Babes in Toyland*; Sol Hurok concert featuring Marian Anderson & Artur Rubenstein; first performances of 2 new American operas on *Opera Theatre* plus 5 operatic classics with newly-penned English lyrics and the 6th performance of Yuletide standby *Amahl & the Night Visitors*, with some of the operas in color—all this in addition to previous "sensational" announcements . . . Network strategy is summed up beautifully in CBS's fee-TV comments filed with FCC (see p. 1): "It is fallacious to assume [that] additional money would produce a higher calibre of dramatic material and talent than is now available on free TV. Free TV certainly now offers enough money and acclaim to attract the best talent in acting, writing, directing and musicianship. The TV producer, writer and performer are well paid" . . . "Good TV programs," CBS continues, "are the result of brains,

taste and talent. There is no great pool of talent which TV does not reach. It will not improve the caliber of the talent or intelligence employed, or raise the level of taste, if the general level of payment is enormously increased" . . . "Children's spectacular" is latest hypo for DuMont's WABD, administered by gen. mgr. Ted Cott. Called *Wonderama*, it will be programmed every Sun., 12-6 p.m.—"will have a cast of hundreds and will include live presentations, remote pickups and newly made film material." No cowboy-&-Indian shooting matches, no "death struggles on Mars" are promised—but clowns, zoos, how-to-do-it handicrafts, puppets, folk lore, illustrated classics, cooking lessons, etc. . . . "On the basis of current biz—\$2,000,000 gross for the 2nd quarter, representing a 200% increase over the same period last year—CBS TV Film Sales figures to wind the year with an all-time peak of \$8,000,000, more than double that of 1954," says June 22 *Variety*. This gross "would put CBS Film on a par with or higher than the top 4 firms in TV film—Ziv, TPA, MCA & Screen Gems" . . . Theatrical success for Disney's *Davy Crockett* seems to be following same film's 2-time TV success on ABC's *Disneyland*. It's now in 5th week at N. Y.'s Globe Theatre, and grossing high on all-time-runs in Detroit, Cincinnati, Denver, Philadelphia, but disappointing in Pittsburgh & Seattle . . . Entering theatrical distribution field, National Telefilm Associates will book *Tales of Hoffman*, *Cry the Beloved Country*, *Breaking the Sound Barrier* into theatres before release to TV (Vol. 11:18). According to pres. Oliver Unger, this will also "enable NTA to explore all ramifications of toll TV" . . . Return of "name band" popularity as result of TV is predicted in N. Y. *Herald Tribune* article by Guy Lombardo, who has been name bandleader for quarter century and now has own TV film show. He cites success on TV of such bands as Dorsey Bros., Sauter-Finnegan, Ray Anthony, Lawrence Welk . . . NBC buys *Meet the Press* from Lawrence Spivak, who continues under long-term contract as producer & panelist; it's presently sponsored by Pan American Airways & Johns-Manville . . . Cue from spectaculars: CBC planning some 2-hour shows next season, citing success of *Hamlet*.

ATTENTION NARTB: Advertising code for Independent TV Authority, upcoming British commercial TV system, doesn't ban liquor commercials, but does forbid advertising of "products for treatment of alcoholism." Other taboo products & services specifically mentioned: money lenders, matrimonial agencies & correspondence clubs, "fortune tellers and the like," undertakers, betting tipsters, bust developers, contraceptives, smoking cures.

No betting ads will be permitted for the first 6 months, by mutual agreement between bookies' trade association (legal in England) and ITA. Bookies weren't sure they were interested in advertising on TV, anyway. Among other highlights of British code:

"The irrelevant use of data and jargon must never be resorted to to make claims appear more scientific than they are . . . documentary evidence of testimonials may be required . . . visual presentation of doctors, dentists, nurses, midwives . . . should not be used in connection with medicines and treatments."

Children's advertising code contains specific anti-nagging clause: "Care should be taken that [children] are not encouraged to make themselves a nuisance to other people in the interests of any particular product or service." Other children's prohibitions: ads which encourage kiddies "to enter strange places or to converse with strangers in an effort to collect coupons, wrappers, labels, etc."; appeals to youngsters' sense of loyalty or duty on behalf of commercial product; ads which induce children to believe they will be inferior or subject to ridicule for not owning a product.

John A. Kennedy, onetime operator of W. Va. radio stations, who bought KFMB-TV, San Diego in 1950 for \$925,000 (Vol. 6:46 & 7:17) and sold it in 1953 for \$3,150,000 (Vol. 9:5, 9, 13), has purchased *Sioux Falls* (S. D.) *Argus-Leader*, largest daily in state (circ. 53,000). He's native of St. Paul, worked on Iowa newspapers before becoming Hearst correspondent in Washington, then going into radio. Newspaper has no TV-radio affiliation.

Purchase of radio outlet by WEHT, Henderson, Ky. (Ch. 50) was approved by FCC this week. It pays H. M. Bitner \$116,000 for WEOA in neighboring Evansville, Ind. (Vol. 11:24). Also approved was sale of KVOR, Colorado Springs, Colo. by James D. Russell, who retains 50% of Colorado Springs' KKTU (Ch. 11). Paying \$120,000 for KVOR are equal partners John S. Riggs (27% of WELM, Elmira, N. Y. & 50% of WAIR, Winston-Salem) and Robt. Greene of Lakeview, N. Y. (Vol. 11:15).

The \$3,864,540 transaction, whereby Roy N. Whittenburg family increased holdings in Globe-News Publishing Co., Amarillo from 35.6% to 91.8% (Vol. 11:19), was approved by FCC this week. Globe-News properties include KGNC-TV, Amarillo (Ch. 4) & KGNC; *Amarillo News* and *Globe Times*; *Lubbock Avalanche* and *Journal*; radio KFYO, Lubbock.

WBLN, Bloomington, Ill. (Ch. 15) is being sold by Cecil W. Roberts for token \$1 and assumption of some \$200,000 in liabilities, to Worth S. Rough, ex-gen. mgr. of WCBC, Anderson, Ind., holder of CP for WCBC-TV (Ch. 61). New owner is getting \$10,000 NATS operating loan.

DES MOINES AREA's third vhf, KRNT-TV (Ch. 8), started regular test patterns June 20, is slated to become basic CBS Aug. 1—433rd station on the air (106 of them uhf). Headquartered in KRNT Theatre Bldg., called "largest legitimate theatre in the country," it's controlled by Cowles family, who own *Des Moines Register* and *Tribune*, *Minneapolis Star* and *Tribune*, *Look Magazine*, KVTV, Sioux City, Ia. (Ch. 9) and 47% of WCCO-TV, Minneapolis (Ch. 4). Kingsley Murphy family has option to buy 40% after sale of radio KSO (Vol. 11:23).

KRNT-TV has 50-kw GE transmitter, 12-bay RCA antenna atop 709-ft. Ideco tower. Gen. mgr. is Robt. Dillon, with Paul Elliott as commercial mgr.; Dick Covey, program director; Wm. Hippee, local sales mgr.; Charles Quentin, chief engineer. Base rate is \$650. Rep is Katz.

Canada's 27th outlet to go on the air, CBC's 8th, is CBOFT, Ottawa, Ont. (Ch. 9), which ended tests June 24, now is operating as French-language counterpart to CBC's COBT (Ch. 4) which now is exclusively English-language and has hiked its power to 50.1 kw ERP. It's 4th station in CBC's French network, only one in North America with unhyphenated 5-letter call. It connects via microwave with CBC's CBFT, Montreal; other French-language outlets are privately-owned CFCM-TV, Quebec City and CJBR-TV, Rimouski, Que.

Conforming to British precedent of signing off for dinner hour (when the family is supposed to be otherwise engaged and mother putting the small children to bed), CBOFT from 6-7:15 p.m. Mon.-Sat. is putting on only test patterns and music. Its equipment is 6-kw RCA transmitter, 4-slot wavestack antenna on 488-ft. guyed tower shared with CBOT. Combined operations are now in new building in suburban Westboro. C. P. Wright is mgr.; W. E. Powell, commercial mgr. (Toronto); Georges Huard, TV operations mgr.; Maxted Gilbert, chief operator. Base hour rate is \$230. Rep is CBC.

Note: Next starter apparently will be U of Notre Dame's WNDU-TV, South Bend (Ch. 46), which has test patterns scheduled to begin July 2, joins NBC July 15; it ran off short "equipment test" evening of June 20, and gen. mgr. Bernard C. Barth reported some 80 phone calls from viewers in all-uhf South Bend-Elkhart area, most of them stating signal was "sharp and clear."

* * * *

In our continuing survey of upcoming stations, these are latest reports received from principals:

KLEW-TV, Lewiston, Ida. (Ch. 3), began construction June 20, having set tentative Nov. 1 target, reports v.p.-gen. mgr. Tom Bostic. Grantee is subsidiary of KIMA-TV, Yakima, Wash. (Ch. 29), which also operates satellite KEPR-TV, Pasco, Wash. (Ch. 19), holds CP for satellite KBAS-TV, Ephrata, Wash. (Ch. 43), and is applicant for Ch. 8 satellite in Walla Walla. KLEW-TV will not be satellite operation, will use 5-kw GE transmitter and 3-bay antenna. Network affiliation not determined. Rep not chosen. Station is in middle of hot fight between group seeking to build 3-channel uhf experimental satellite and group operating extensive community antenna system (Vol. 11:23).

WOSU-TV, Columbus, O. (Ch. 34, educational), has 12-kw RCA transmitter and 3 studio camera chains & vidicon film chain ordered for delivery as soon as studio-transmitter building is ready—in about another month. Station will probably be on air late this fall, reports Prof. Robert C. Higgy for grantee Ohio State U. Ideco 550-ft. tower & RCA antenna have been ready since last summer.

CEILING AND FLOOR of TV station power were extended by FCC this week when it finalized rules permitting both vhf and uhf stations to operate with as little as 100 watts ERP, at same time issuing proposed rule-making to lift uhf maximum from 1000 kw to 5000 kw.

Low-power rules were finalized as proposed — with one important exception. Originally, Commission intended to permit 100-watt stations only in cities under 50,000. Final rules permit them anywhere—as long as they provide same minimum signal level over principal city now required by rules. There's no height minimum.

No big rush of applications for low-power satellite stations is expected initially, though several are known to be on tap. However, many in industry expect gradual reduction of installation and operating costs will eventually bring mushrooming of stations in towns too small to support higher-power outlets. Several manufacturers have been prepared, well in advance, to offer equipment far cheaper than that required by previous rules—and they made strong impression at recent NARTB convention (Vol. 11:22).

FCC doesn't like to call low-power stations "satellites," and this week's decision expressed hope that they'll "eventually increase power and become full-fledged TV stations in all respects."

Final decision was 6-p. document, Notice 55-704, Doc. 11237, available from Commission or from us. It's effective Aug. 1.

* * * *

Proposal to lift uhf power ceiling to 5 megawatts is simple document stating Commission's belief hike is "an additional step in bringing to the viewers the best possible TV service." It threw in cautionary note that receiver makers shouldn't assume that proposed power increase relieves need for better uhf sets and tuners. It added that data on uhf tuner sensitivity would be valuable in weighing merits of station power increase, asked set and tuner makers to supply technical data on uhf sets, broken down into those made before 1955, those being made this year, those planned for next year. It asked for information on receiver noise, transmission line loss, antenna gain, possibilities of reducing problems such as tuning difficulties, cost of improving performance, propagation measurements.

Deadline for comments is Sept. 1. Notice is 55-705, Doc. 11433. Commission will supply copies—or we'll be glad to get one for you.

Though rule was just proposed, WJMR-TV, New Orleans, now Ch. 61 but shifting to Ch. 20, filed immediately for increase—will go on with 5 megawatts experimentally if rules aren't finalized by time equipment is ready; preparation is expected to take about a year (Vol. 11:25).

WHTN-TV, Huntington, W. Va. (Ch. 13), which got STA last week to start from temporary 300-ft. tower formerly used by pre-freeze WSAZ-TV, plans Sept. 15 test patterns, Sept. 25 start on ABC, reports v.p. Fred Weber, also pres. of off-air WFPG-TV, Atlantic City (Ch. 46). It has 5-kw RCA driver and 20-kw GE transmitter due July 15. Custom-designed RCA 6-section 154-ft. slotted antenna is due Sept. 15. Base hour will be \$450, rep Petry.

WQMC, Charlotte, N. C. (Ch. 36), plans return to air about Oct. 1, reports owner Hugh Deadwyler, who acquired station last Dec., then went off air in mid-March (Vol. 11:1, 2). Move of transmitter & studios to undisclosed new site is planned.

CJON-TV, St. John's, Nfld. (Ch. 6), which got 2-kw RCA transmitter June 13, now plans test patterns by July 5, advises pres. Geoff Stirling, revising July 15 target.

HOW THINGS SHAPE UP FOR FALL MARKET: More step-up models, some step-downs, top and side tuning, color merchandising plans -- these kept the semi-annual Chicago markets buzzing this week. More light on industry trends will be shed when Philco shows its reportedly "hot" new TV-radio line to distributors at Miami Beach convention June 27-29 (see below) and when Emerson first displays its new wares at New York's Hotel Plaza June 28-29. (For details of others' new models shown this week, see p. 13.)

Prices appear to be in a "2-way stretch," judging from the lines shown thus far to dealers. On the one hand, there's determined effort by several manufacturers -- notably RCA, Admiral, Zenith & Westinghouse, among those which have introduced lines thus far -- to keep prices firm at low end while dropping in more step-up sets in 21-in. consoles & 24-in. tables in effort to induce sell-up trend.

Counterbalancing sell-up is re-emergence of \$99.95 set in deference to growing second-set market which, according to RETMA statistical chairman Frank Mansfield, currently accounts for one out of every 5 retail sales. GE's 14-in. "portable" at \$99.95 to \$129.95 (Vol. 11:21,25), displayed on a scale to emphasize its light weight (32 lbs.), attracted lots of interest at Merchandise Mart. Its cabinet is drawn skin-tight around tube face, giving appearance of larger viewing area.

Trav-Ler Radio came out this week with 17-in. table at \$99.95, Hallicrafters reportedly has one on production line, and Olympic Radio retained its 14-in. table at \$99.95 in line shown this week in Chicago.

Jack Beldon, marketing mgr. of GE TV-radio dept., told us that retail sales of the under-\$100 set "have exceeded our fondest expectations," though it won't be in full national distribution until July 15. He said few customers had even asked about screen size, being more engrossed in low price. However, several big competitors, pinning their confidence on step-ups, openly disparage \$99.95 set. They argue that it's a move in the wrong direction, a reversion to small screens and low discounts. Such sets, with admittedly limited production, give public psychological impression that no TV set is worth more than \$100, they say.

Controls were placed every which-way on new sets -- some on top, some on side, some hidden. One dealer quipped as he went down on his knees to peer under a set: "I'm looking for the controls." But dealers generally felt the new tuning locations improved the appearance of sets, though some complained they would make it tougher on the consumer because in some cases brightness & contrast controls, which usually go together, are at different locations on the receiver.

* * * *

There was lots of talk and all sorts of rumors were rampant about color merchandising, partially prompted by willing dealer orders for at least floor models of RCA's new sets (at \$795 & \$895) at its showings. Colorcasting is virtually dormant for the summer (Vol. 11:25) but there's no mistaking plans of some to give it the "big push" this fall, with NBC & CBS providing plenty of attractive shows. At RCA, it's apparent they think fall color trade will give impetus to the Sarnoff conviction that 1956 will be the "year of decision." If it isn't, Gen. Sarnoff certainly went out on a limb when he told stockholders last month:

"I expect that in 1956 and the years ahead, RCA earnings from sales of color TV sets will substantially exceed its earnings from sales of black-&-white during those years" (Vol. 11:19).

Guesswork abounded about Philco color plans, due to be revealed at Miami. We could get no verification that it will have a 21-in. color set in Sept., coinciding with its sponsorship of the Miss America finals from Atlantic City. There was flat denial that it has abandoned its "Apple" project -- the one-gun tube -- but silence when we queried whether it was ready. Logical questions growing out of rumors:

Has Philco signed patent-licensing agreement with RCA, as have all the other leading manufacturers save Zenith -- and will it go to RCA's 21-in. color tube? Is it tying up with the CBS 22-in. rectangular, about which little has been said lately other than that it has cost CBS-Hytron a lot of money? Could it be that Philco will adopt Lawrence one-gun tube promised by Paramount's Chromatic TV Labs? Everybody expects something definitive from Philco; nobody expects it will again talk down the imminence of color, as it did at last year's convention.

* * * *

Dealers are also color-conscious, many getting their houses in order for the fall-winter push. NARDA chairman Mort Farr, in a NARDA-sponsored "bull session" with fellow dealers and newsmen set for June 25 at Merchandise Mart, proposes what he calls "a new chance to re-establish the value of dealer franchises" by limiting distribution of color sets to those dealers who can provide service and are able to perform the "special selling job required." In exchange for this, he said, dealers are willing to forego their original demand for 40% markup, feeling they can make up the difference in service contracts with their customers.

"Sales of 30,000 color sets this year are equivalent in dollar volume to sales of 180,000 black-&-white 17-in. sets," he said. "We've got to go after that 1% market which is available to us for color. And we can't do it merely by putting a color set on our floors and waiting for customers to come in. We've got to go out after the customers we know can afford color and demonstrate it to them with color programs. If necessary, we've got to invite them with color parties. As for the servicing, it takes the better part of a day to service a set properly -- and you just can't send out a hammer-and-chisel guy to work on a color set. It takes skill and it costs money -- about \$10 a call, I'd guess -- and folks want quality."

Brief highlights of other major trade developments this week:

* * * *

For Trade & Public to See: Having done it via closed-circuit last year, Philco this year lets public in on its new TV-radio line even as it's first shown to its 1200 distributors in convention at Fontainebleau Hotel, Miami Beach. Occasion will be variety show titled "Convention in Miami Beach" on ABC-TV Tue. June 28, 8-9 p.m. Besides new TV-radio line, "preview of future electronic developments now in the research and engineering stage" will be interspersed with big-name variety stars, with John Daly as m.c. More than 100 stations will carry show. Philco's next big TV extravaganza will be its second sponsorship of Miss America finals on ABC-TV from Atlantic City Sept. 10 -- possibly in color. Last year's show was big hit, drew 34.2 Nielsen audience rating.

Discount Houses: No help from Justice Dept. should be expected by those in trade trying to do battle with discount houses. That was made abundantly clear by Judge Stanley Barnes, chief of Justice's anti-trust div., on NBC-TV's Youth Wants to Know program June 19. Replying to question, he said he felt discount houses were fair to consumer, added: "You don't have to buy from a discount house unless you want to. If you want to get a cheap price and nothing more, you can go to a discount house. If you want to get some other type of service, such as delivery of your goods or a fancy gift wrapping or something of that kind, you can go to some other place and pay more, but it should be up to the consumer to decide where he wants to go, and not a law that says he can't go there."

Fair Trade: Important decision bearing on fair trade laws everywhere was handed down this week by Indiana Superior Court, which ruled that price-fixing pact between Arvin and an Indianapolis dealer was unconstitutional. If sustained by State Supreme Court, ruling would void Indiana's 18-year-old Fair Trade Act. State Judge Pike ruled: "By this act, a manufacturer can make a contract with one man and make that binding on all others in the state. I believe this is restraint of trade." Powerful National Retail Furniture Assn., meanwhile, voted 2-to-1 to oppose all fair trade laws, adopting resolution declaring: "The conclusion is inescapable that fair trade pricing as a system of resale price maintenance is impracticable in the home goods industry." On other hand, American Fair Trade Council Inc., in statement to

House Judiciary subcommittee considering fair trade repeal, warned that some form of price maintenance would continue, regardless of fate of fair trade laws.

Financing of TV Sets: International Consumer Credit Conference in Louisville heard suggestion that national policy on financing TV receivers be established at 10% down, 24 months to pay. Suggestion came from L.A. Brumbaugh, Valley National Bank, Phoenix, because "in our area, dealers sell the idea that TV sets become obsolete within 2 years." That doesn't coincide with any official appraisal of TV set obsolescence. Once it was estimated that 8 years was the life expectancy, but now H.J. Schulman, chairman of RETMA service committee & CBS-Columbia service director, tells us nobody can calculate life expectancy because some of the earliest sets are still working well. Conference also heard prediction from Francis W. Smith, pres. of Associated Credit Bureaus of America, that the \$28-to-\$30 billion of installment credit now outstanding on retail books should reach \$50 billion by 1956.

Production: TV output jumped to 131,801 week ended June 17, uptrending considerably from the 110,766 in the preceding week and 91,648 week ended June 3. It was year's 24th week and brought production for year to date to about 3,500,000, against 2,850,000 in corresponding 1954 period. Radio production totaled 268,822 (125,629 auto), compared to 264,054 week ended June 10 and 206,428 week before. Radio output for 24 weeks was 6,635,000 vs. 4,750,000 in corresponding 1954 period.

Topics & Trends of TV Trade: Dun & Bradstreet lists 182 TV-radio-appliance retail failures in first 5 months, with liabilities of \$5,444,000, compared to 220 failures, \$20,675,000 liabilities first 5 months of 1954; May failures were 36, liabilities \$947,000 vs. 44 & \$1,543,000 in May 1954 . . . TV enters "middle age," which Channel Master Corp. sees as good cue for antenna replacements, noting too many set owners put up with inferior reception, ghosts, snow; current ad pitch: there's big potential but dealers must learn to go after the business . . . **Motorola Canada Ltd.** offering dealers \$1000 worth of life insurance for every 3 sets purchased; they can get up to \$10,000 from N. Y. Life Ins. Co., without examination, between June 30-Aug. 31 . . . **Admiral's** Ross Siragusa recently offered share of company stock, from own personal holdings, for every 3 sets bought . . . **Sears, Roebuck's** new fall catalog, out this week, lists new line of 36 models, with 21-in. Silvertone console leader cut to \$160, 24-in. console to \$255 . . . **Hoffman Electronics** first shows new line to distributors July 6-9 at Huntington Sheraton Hotel, Los Angeles . . . **Magnavox** switching ad account to Foote, Cone & Belding after 13 years with Maxon Inc. . . TV-radio, national magazine and dealer advertising is planned to back up RETMA's "National Radio & TV Week" starting Sept. 18.

* * * *

Muntz TV's amended Chapter X reorganization plan was approved June 18 by Chicago Federal Judge Knoch, who set Oct. 18 as deadline for creditors & stockholders to file approval or rejection of plan. Failure to file will be regarded as acceptance, court ruled. Amended plan calls for issuance of preferred stock (\$1 per share par value) for 25% of each non-preferred claim, with remainder of claim secured by promissory note payable 8 years after all preferred claims are paid in full. Plan must be approved by % of creditors and simple majority of stockholders.

TV shipments to dealers totaled 2,329,449 in first 4 months, when production was 2,771,426, compared to shipments of 2,065,871, production of 1,904,718 in first 4 months of 1954, reports RETMA in state-by-state tabulation (county-by-county tables available to RETMA members on request). New York led, with 221,182; California second, 191,435; Pennsylvania third, 146,844. April shipments were 361,102, compared with 690,097 in 5-week March and 410,032 in April 1954.

NEW TV MODELS introduced at Chicago markets this week (see p. 11)—in addition to those previously reported:

Bendix Radio—Full line of 10 sets, all 21-in., ranges from \$140 table model to open-face mahogany console at \$290. Table models are \$140, \$150, \$170 (2 sets); consoles are \$180, \$200, \$220, \$230, \$260, \$290. Gen. sales mgr. Hodge C. Morgan said short line "will do much to eliminate slow turnover and regular dumps as well as to keep overhead costs in line and credit losses to a minimum." He said line reflects results of \$500,000 merchandising survey to determine consumer preferences on TV sizes & prices.

Olympic Radio—Emphasizing combinations, new line includes 7 basic 3-way models in 17, 21 & 24-in. Its 14-in. table model at \$99.95 is carried over. Table models are \$130 for 17-in., \$160 & \$200 for 21-in. The 21-in. consoles are \$180, \$230, \$250, \$270, \$300; 24-in. console \$290. Combinations are 17-in., \$200; 21-in., \$300, \$330, \$380, \$400; 24-in., \$380 & \$420.

Raytheon—Added a 21-in. "lowboy" console at \$200 in mahogany, \$210 in blonde. Company has discontinued policy of introducing full lines, intends only to add "drop-ins" as market conditions warrant, said v.p.-gen. mgr. Henry F. Argento. He said "low-boy" styling is ideal for modern homes & apartments.

Trav-Ler Radio — Also a believer in a market for \$99.95 set, pres. Joe Friedman starts line with 17-in. "fabricoid" table model at that price, points out that it won't cost a great deal more than cost of major repairs for "obsolete sets" in a year. Like GE's 14-in. set at \$99.95 (Vol. 11:25), Trav-Ler set is frankly aimed as second set or replacement, said Friedman. Other 17-in. tables are priced at \$120, \$140, \$150; 21-in. \$125, \$160, \$180; 24-in., \$200. The 21-in. consoles are \$180, \$200, \$230, \$250, \$270; 24-in., \$240, \$300, \$330. Combinations (21-in.) are \$350 & \$370.

* * * *

Federal Trade Commission's long-awaited *Trade Practice Rules for the Radio & Television Industry* (20-p.) will be released June 28. Copies are available from FTC, or we'll get one for you.

Bendix TV-radio receiver div. has purchased General Mills automation equipment for TV production line at plant in Towson, Md.

Trade Personals: Alton K. Marsters, ex-Colt Mfg. Co., onetime sales v.p. of American Optical Co., named CBS-Hytron gen. sales mgr. . . R. A. Schieber, Westinghouse TV-radio manufacturing mgr., promoted to works mgr., replacing J. M. Allen, now on div. operating staff under gen. mgr. E. J. Kelly . . . Wm. Brown named director of engineering for consumer products, Webster-Chicago . . . George A. Peck, Stromberg-Carlson TV-radio production mgr., named alumni trustee of Clarkson College of Technology . . . Herbert Kushner, ex-Link Radio, named asst. mgr. of technical services, DuMont mobile communications dept., headed by his ex-chief, Fred M. Link . . . A. Holland Phillips named to GE tube dept.'s district office at Clifton, N. J. . . . George M. Zyvoloski appointed Sparton district mgr. for Illinois (except Chicago); Voyd L. Smith named northwest Texas mgr., Lubbock; Russell H. Francis covers Utah, headquarters Salt Lake City; Verlyn D. Gilkey will cover northern Indiana area . . . Donald E. Heinsch, ex-Crescent Industries, named exec. v.p. of Wilcox-Gay Corp., operating under Chapter X reorganization plan; Edward Jahns promoted to mgr. of engineering & development div., Glen Clifford production mgr., Larry Robbins adv. & sales promotion mgr. . . . W. P. Ready, ex-gen. sales mgr., National Co., now in similar post with Wallace's Telades Inc., Jamaica Plain, Mass. . . . Jay H. Quinn resigns as sales & adv. mgr., Fairchild Recording Equipment Co., which he helped found in 1948 . . . Leonard P. Blakely and Martin Silver, former sales mgr. and broadcast div. mgr. of Tel-Instrument Co., Carlstadt, N. J., form L&M Associates, sales & engineering reps (352 Boulevard, Hasbrouck Heights, N. J.) . . . Norman Freeman, ex-Clarostat, named mid-Pa. district mgr. of Morris F. Taylor Co., Silver Spring, Md., electronic manufacturers' reps.

DISTRIBUTOR NOTES: Admiral appoints Electric Appliance Distributors Inc., 908 Green Ave., Altoona, Pa. (H. Paul Good, pres.) . . . DuMont appoints O'Day Equipment Co., Fargo, N. D., replacing Cook Appliances Inc. . . . Westinghouse Electric Supply Co. appoints Charles J. Vondran mgr. of Indianapolis branch . . . Graybar, Cincinnati (Emerson) names W. D. Giebel appliance sales mgr., succeeding Blaine Lind, now Madison, Wis. branch mgr. . . . Krich-New Jersey Inc., Newark (RCA) reports resignation of parts mgr. Samuel Robbins to form Leader Electronic Supply Corp., 88 Lock St., Newark, specializing in parts sales to service dealers.

Crosley-Bendix reorganization under new pres. Chester H. Gifford merges electronics div. with appliance & laundry divs. Parker H. Ericksen continues as exec. v.p.; F. E. (Bud) Howell, v.p. of appliance & laundry divs., becomes v.p. of sales & distribution, including TV-radio; D. B. (Randy) Blatz gets new post of gen. controller; W. A. MacDonough, gen. mgr. of distribution & merchandising, becomes director of adv. & sales promotion for all consumer goods; A. E. Cascino continues as director of marketing, John Mihalic as director of manufacturing & engineering, Harold C. Tipping as director of industrial & community relations. Govt. products div. is unaffected by merger, Clarence G. Felix continuing as v.p. in charge.

"Better late than never" is how pres. Albert A. Goffstein of American Television & Radio Co., St. Paul, describes his company's recent entry into TV—24 years after its founding with TV in its title. "We had always intended to go into TV, and we're just now catching up with our name," Goffstein told us. Company has manufactured auto radio vibrators since 1931, is RETMA member and RCA licensee. It's marketing eleven 21-in. full-door consoles under "ATR" brand, all \$495, with dealer discounts of 40%, thru furniture & music stores, will skip TV-radio-appliance dealers for time being. It has no distributors.

Named on Queen's birthday honours lists: Baronet: Sir George H. Nelson, chairman & managing director, English Electric Ltd. M.B.E.: H. G. Cheel, gen. mgr., General Electric Co. Ltd.; H. W. Cox, E.M.I. Engineering Development Ltd.; R. J. Porcher, senior TV supt., Cable & Wireless Ltd. C.B.E.: P. H. Spagnoletti, director & gen. mgr., Kolster Brandes Co.; F. N. Sutherland, gen. mgr., Marconi's Wireless Telegraph Ltd.; J. N. Toothill, gen. mgr., Ferranti Ltd. From the BBC, Queen Elizabeth bestowed knighthood on Harold Bishop, director of technical services; bachelor, A. J. M. Ozmond, asst. head of TV design; S. H. Matthew, asst. program accountant; C.B.E., W. L. Streecon, head of programme contracts dept.

Honorary degrees: Dr. Wm. B. Shockley, Bell Labs director of transistor physics research, now on leave as research director of Defense Dept.'s weapons system evaluation div., from U of Pennsylvania; Dr. Walter H. Brattain, Bell Labs physical research dept., and Dr. John Bardeen, ex-Bell Labs and now U of Illinois professor of physics & electrical engineering, from Union College; Harold S. Black, Bell Labs systems research div., from Worcester Polytechnic Institute.

G. C. W. Browne, controller of telecommunications in Canadian Dept. of Transport, presented with short-wave portable radio by RETMA of Canada in honor of his 41 years of govt. communications service; he retires Aug. 18.

S. Merrill Skeist, ex-W. L. Maxson Corp., elected contracts v.p. & director, Polarad Electronics, Long Island City, N. Y.

Michael Palmieri, ex-gen. mgr. of Burnell & Co., elected exec. v.p., gen. mgr. & director of Elsin Electronics Corp., Brooklyn.

Harry R. Clark, ex-pres. of Telechrome, named sales v.p., Linear Equipment Labs, Copiague, N. Y.

Maj. Gen. Wm. Henry Harrison, pres. of IT&T, elected a director of Intertype Corp.

Stewart-Warner quit making TVs and radios in U. S. after last Xmas (Vol. 10:51, 52)—but its electronics div., with \$50,000,000 backlog, did 7.8% more business in first 5 months of this year than same 1954 period. Earnings for 5 months ended May 31 were \$1.60 a share, should be \$2.05 for first 6 months vs. \$1.13 in first half of last year.

Mergers: Westinghouse Air Brake subsidiary Melpar Inc. takes over Corvey Engineering Co., Alexandria, Va., electronics-logistics research firm employing 150. F. L. Jacobs Co., Detroit auto parts manufacturers, acquires Eicor Inc., Oglesby, Ill., makers of dynamotors, inverters and alternators for electronics and aviation industries.

"Automatic" factory: Westinghouse announced it will break ground soon in Youngwood, Pa., near Pittsburgh, for multi-million dollar plant to be devoted to automatic production of semi-conductor devices, including transistors, rectifiers, high frequency detectors and photocells.

Three new transistors, alloy-junction germanium pnp type, have been announced by RCA—2 of them for hearing aid applications, one for portable radio output stages.

* * * *

Electronics Trust has been formed in London with registered capital of £2,000,000 to specialize in investments in electronics and related fields, a la Television-Electronics Fund, Group Securities Inc.'s electronics & electrical equipment group, and recently formed Electronics Investment Corp., San Diego (Vol. 11:17).

Capitol Records Inc., now controlled by EMI of England, has designated v.p. Wm. H. Fowler to inquire into diversifying into other electronics fields, particularly U. S. market for EMI products. He headquarters in N. Y.

Color Trends & Briefs: NBC-TV's efforts to push color in big way next fall are evident in new supplements to rate cards for its own WRCA-TV, N. Y. and WNBQ, Chicago. Advertisers holding station-break positions adjacent to or within regular color shows will either convert to color or risk losing position to those who want color.

WRCA-TV's Supp. 1 to rate card No. 15 specifies that all 20-sec. station breaks and 10-sec. IDs, adjacent to or within regularly scheduled color shows, will be available in color only, starting June 1. Present advertisers in those spots aren't required to convert until Sept. 1. Extra charge is \$500 for 20-sec., \$250 for 10-sec. Here's setup:

"If a station break adjacent to or within a regularly scheduled color program has not been converted to color by Sept. 1, 1955, NBC will make it available to a client wishing to use color. When such client wishes to buy in color, NBC agrees to give 2 weeks notice to the incumbent monochrome buyer to either convert the spot to color within the 2 weeks, or vacate the position. The incumbent monochrome advertiser must notify NBC, within one week of such notification, of his intention to either convert his station break to color or vacate the position.

"Such relinquishment will not affect the advertiser's continuance in station breaks adjacent to or within monochrome programs scheduled on non-color program dates.

"The color facilities charge does not apply to advertisers who continue to occupy with monochrome a color station break position after Sept. 1, 1955." Color facilities charges have 3 months rate protection.

WNBQ's Supp. 1 to rate card No. 9 has same provisions, except that 20-sec. is \$190, 10-sec. \$95, and "required" date is Sept. 15.

* * * *

"Color is coming along steadily, but it has a long way to go before moderately priced sets will be available in large volume. A new technological change such as color simply cannot go ahead any faster. It represents far more than simply doubling the number of receiver tubes in a TV set, and making the picture tube 3 times as complicated. A great deal of development work lies ahead, witness the fact that the original estimates of color set production by the entire industry for 1955 have already been revised downward. At one time the estimates ranged from 100,000 to 300,000, with about 100,000 destined to be sold. Today, the industry is talking about 75,000 to 100,000 being made, and some 50,000 being sold. Be that as it may, color is coming, but it is not just outside the door."—From statement by Don G. Mitchell, Sylvania chairman-pres.

Sole network color feature scheduled next week is pair of pickups June 27, 8:09-8:20 & 8:44-8:54 p.m., during NBC-TV's *Wide Wide World*, of Louis Armstrong and Woody Herman bands from Washington. All Ford and RCA commercials will also be in color. Aside from that, and probable short *Home* and *Today* segments from time to time, only color shows definitely scheduled so far this summer are NBC-TV spectaculars July 25 & Aug. 2.

Color TV film standard: Test 35mm & 16mm color film & slides, long under preparation by SMPTE as final standards for TV industry (Vol. 10:43), are now available from headquarters, 55 W. 42nd St., N. Y. The 35mm film, 700 ft., is \$95; 16mm, 280 ft., \$50; 10 slides, \$25.

"Colorless" conventions: As of now, no network plans to colorcast political conventions in Chicago and San Francisco. At recent meeting of network representatives in San Francisco, AT&T asked networks for color plans, found they'd been dropped.

Equipping itself with "Vitascan" live color facilities, DuMont's WABD, N. Y. will offer advertisers free tests of commercials. Station's color-filmed *Sunday Supplement* has been suspended pending facilities changes.

Financial & Trade Notes: Hallicrafters earned \$363,438 (44¢ a share) on sales of \$18,635,074 in 9 months ended May 31, compared to net loss of \$1,029,935 on \$23,226,340 in same period year ago. For quarter ended May 31, earnings were \$88,197 (11¢) on \$5,799,089 vs. loss of \$80,598 on sales of \$7,514,119 in 1954 quarter. In message to stockholders, chairman Wm. J. Halligan & pres. Raymond W. Durst noted that unit TV sales in 9-month period were 20% ahead of same 9 months year ago; in communications equipment, 46% ahead in unit sales, 26% in dollar volume. They also stated that Hallicrafters got additional \$4,000,000 in govt. contracts in June.

H. R. Blash continues as chairman of Webster-Chicago, N. C. Owen as pres., says official company statement which admits Titus Haffa, Chicago industrialist, has acquired "substantial block of stock" (Vol. 11:24)—stated by Mr. Haffa to amount to "more than 125,000 shares" of 519,750 outstanding. Haffa bought holdings of Blash, whom he said he would later succeed as chairman, and of secy. Herman Bichele, v.p. Walter Altenburg, et al. He and family control Dormeyer Corp. and Haber Corp.

General Electric has revised its 1954 earnings report downward, showing net profit of \$198,913,221 (\$2.30 a share) instead of announced \$212,613,221 (\$2.46); retroactive change in tax law relating to estimated expenses required adding \$13,700,000 in provision for taxes & renegotiation. Earnings remain highest on record, up 20% from 1953 level.

Avco Mfg. Corp. reports sharp drop in sales and profits for 6 months ended May 31, 1955. Profit was \$447,983 (3¢ a share) or sales of \$136,708,269, down from \$3,106,481 (33¢) & \$199,060,391. Pres. Victor Emanuel blamed increased costs, continued price weakness in TV-appliances, strike in Avco's farm implement section.

Ampex Corp., San Francisco (magnetic-tape recorders) reports net income of \$365,736 or 69¢ a share on 528,740 capital shares, for fiscal year ended April 30 vs. \$25,691 (6¢ on 411,340 shares) in 1954 period. Profit is after taxes and \$503,000 on research & development.

Television-Electronics Fund assets increased 72% in 6 months to April 30, up from \$55,868,018 (\$9.47 a share) to \$96,182,332 (\$11.33). Assets passed \$100,000,000 since April 30, according to pres. Chester D. Tripp.

General Instrument Corp. reported June 24 enough proxies (51%) to ratify acquisition of Automatic Mfg. Corp., Newark, whose 1500 shares will be exchanged for 555,000 of GIC (Vol. 11:24).

Sentinel Radio earned \$83,422 (22¢ a share) on sales of \$12,415,185 in fiscal year ended March 31, compared to \$151,301 (40¢) on \$13,532,457 in preceding fiscal year.

Graybar Electric Co. sales in 1954 totaled \$366,027,713 vs. \$384,388,765 in 1953; profit was \$2,688,359 (\$4.43 per share) vs. \$3,228,159 (\$5.24).

Lavoie Laboratories Inc., Morganville, N. J., offered 58,000 shares of \$1 par common stock to public this week at \$5 per share, using no underwriters.

Dividends: Emerson Radio, 10¢ regular & 5¢ extra payable July 15 to stockholders of record July 5; American Phenolic, 12½¢ July 29 to holders July 15.

Gifts of 4 to 20 shares of stock in Washington Post Co., each share worth \$60, were bestowed this week on 65 employes of its WTOP-TV & WTOP and 25 of its WMBR-TV & WMBR, Jacksonville, by chairman Eugene Meyer—apportioned on basis of length of service and responsibility of position. Altogether, 711 employes of the publishing-broadcasting companies now own about \$500,000 worth of the stock, with top executives including WTOP Inc. pres. John S. Hayes having acquired other shares previously.

SENATE PROBERS will call on more "experts" to study various TV problems—along general lines of engineering study of allocations, begun this week (see p. 3). "The TV industry is too big, too complex, has too many problems for a study at the staff or Committee level alone. We must call on experts."

Thus Chairman Magnuson outlined the methods his Commerce Committee will use in its TV investigation (which he prefers to call a "study"). "We'll farm out as much work as possible," he told informal June 21 press conference. Then, when all studies have been completed, probably next fall, "we'll hold our hearings, which will be legislative—not investigative—in nature." He said he has in mind:

(1) Study of TV economics, free speech, political time, etc.—possibly by a large private foundation, "such as Brookings Institution, Carnegie or Ford Foundation."

(2) Network study—by FCC, for which \$80,000 is being appropriated by Congress (Vol. 11:22-24). This study would take 6 months, the Senator said, and his Committee is most interested in terms and details of network-station contracts.

(3) Looking into FCC procedures—he said he hopes to ask American Bar Assn. "or a similar impartial group" to take over-all look at this question, come up with "uniform code" for Commission procedures.

(4) Communications Act amendments—ex-Sen. Clarence Dill (D-Wash.), one of authors of Communications Act of 1934, is looking into this now, will advise Committee what changes are necessary on basis of developments at the hearings.

The Senator sketched a wide area of inquiry for the TV study—with fall hearings covering such subjects as military use of channels which are suited to TV ("we'll ask the military how much they're using and how much they need"). Also, political time, satellites & boosters, AT&T networking charges, subscription TV ("if FCC hasn't finished with it by then").

He was not optimistic about one prime project of the Committee—exemption of uhf-equipped sets from 10% Federal excise tax. He noted that Finance Committee Chairman Byrd (D-Va.) is opposed to any new tax legislation this session, but added there was outside chance the exemption provision could be tacked onto a House-passed tax measure from the Senate floor. Congress is hoping to wind up 1955 session end of next month.

NBC has run into more opposition against its proposed station sales and purchases. WGR-TV, Buffalo, this week asked hearing on NBC's pending acquisition of WBUF-TV, Buffalo (Ch. 17), WKNB-TV, New Britain (Ch. 30) and Philadelphia-Cleveland swap with Westinghouse (Vol. 11:22, 25). WGR-TV asked all these be consolidated in hearing to explore NBC "monopoly", look into RCA's anti-trust history.

Committee studying AT&T rates for TV and aiming to forestall increases reported to NARTB board this week, was directed to continue work and increase size, if necessary. AT&T has been active, meanwhile, in efforts to convince telecasters that rates are too low. Its representatives have been calling on stations, showing figures indicating low rate of return from TV.

Application for satellite in Cheboygan, Mich. on Ch. 4 by WPBN-TV, Traverse City, Mich. (Ch. 7) was only one filed this week. Total now stands at 147 (including 16 uhf). [For details, see *TV Addenda 20-X* herewith; for complete listings of all grants, new stations, applications, etc., see *TV Factbook No. 20* with Addenda to date.]

New TV Factbook—Pre-Print Orders

TELEVISION FACTBOOK No. 21, the Fall-Winter edition of the TV-electronics industries' first and most widely used and quoted "almanac," will be off the presses about Aug. 1—containing basic data on all U.S., Canadian and World TV stations and networks (including digests of station rate cards and complete rate cards of the networks); digests of all CPs outstanding and applications pending for new stations, with details on principals involved, facilities, etc.; all allocation tables brought up-to-date. All other departments are updated, too, such as the directories of the FCC, TV sales reps, program producers & distributors, set-&-tube manufacturers, radio attorneys, engineers & consultants, laboratories, etc. Also updated are TV-radio production figures, time sales and other statistical tables. Included with each *Factbook* is revised copy of our 43x29-in. Map of TV Cities and network interconnections, in color, suitable for framing. One copy of the *Factbook* goes to each of our full-service subscribers. Extra copies, if pre-print orders are placed for 20 or more, are \$1.50 each; single copies, \$4.00.

Rumors that Ch. 2-6 are in jeopardy because of military demands keep recurring, keep getting unequivocal denials at responsible levels of Govt. (Vol. 11:5). For one, Harold M. Botkin, ODM asst. director for telecommunications, whose job it is to coordinate all govt. spectrum use, says he hasn't even heard subject mentioned since he last dismissed it—"and I assumed the rumor was dead." Some in industry (and at FCC) feel it's good tactics for TV to demand more vhf space to counteract possible military efforts to do likewise at expense of TV.

Guatemala's first TV station, TGBO-TV, Guatemala City (Ch. 3), with transmitter on 12,300-ft. Agua Volcano (Vol. 10:50), plans to start this summer. DuMont this week shipped it 5-kw transmitter and dual camera chain. Among owners, along with Guatemala business men, are ex-FCC chairman Paul Porter, now Washington attorney; Col. Frank Katzentine, owner of Miami Beach radio WKAT; J. H. Wilson Jr., Pan-American Airways.

Bill to permit "Lincoln-Douglas" debates on TV-radio between presidential candidates, without subjecting stations and networks to equal time demands from minority candidates, as proposed by CBS pres. Frank Stanton (Vol. 11:21, 23, 25), was introduced June 24 by Sen. Payne (R-Me.) of Senate Commerce Committee. His S-2306 is identical to HR-6810, introduced by Rep. Harris (D-Ark.).

AM-PAR Record Corp. is name of new AB-PT phonograph record subsidiary established last week (Vol. 11:25) under pres. Samuel H. Clark, with headquarters at 1501 Broadway, N. Y. It's expected to enter market with AM-PAR brand early next year.

Some 33,000,000 people saw Archie Moore knock out Bobo Olson in Pabst-sponsored light heavy-weight championship bout June 22, according to Trendex ratings prepared for ABC-TV, which says it was biggest audience ever to watch a televised fight.

He couldn't take it: CBS cancelled its widely-publicized TV-radio "scoop"—the appearance of Soviet Foreign Molotov on June 26 *Face the Nation*—because the guest wouldn't consent to the program's customary free questioning by panel of interviewers.

New FCC Comr. Richard A. Mack will be sworn in July 7, 10 a.m., Room 6121. He replaces Frieda B. Hennock, who is understood to be joining Washington law firm of Davies, Richberg, Tydings, Beebe & Landa.

PAY-AS-YOU-SEE TV

THE ABC'S OF THE CONTROVERSY

Editor's Note: There are so many requests from laymen for an explanation of what subscription TV is, with its pros and cons, that a handy primer is a time-saving blessing. New York Times TV-radio critic Jack Gould provided just such a document in the form of a full-page appraisal June 19. His summary is impartial and non-technical, and provides a good digest of the major arguments. As a service to our subscribers, we will provide reprints of this article at nominal rates: 25 for \$1.50; 50 for \$2.50; 100 for \$4.00.

By JACK GOULD

SUBSCRIPTION television appears certain to be the subject of the most hectic and widespread controversy in broadcasting's three decades. In interest, complexity and duration it should easily be the spectacular of disputes over use of the airwaves.

The challenge posed by subscription TV is the introduction of an additional concept of broadcasting. Since 1922 the public has been entertained, enlightened or enraged through the courtesy of the advertiser with something to sell. Now it is proposed that the public also pay fees for what it sees.

Those in favor of subscription video say it would open vast new horizons in television entertainment and culture. Represented on the "pro" side are the three companies that have developed systems of toll video and many Hollywood, theatrical and sports interests that envision a vast new market for their wares.

Those opposed to toll TV say it would mean an end to the continuous free show in the nation's front parlor and threaten the existence of movie houses. The opponents include the Columbia Broadcasting System, the National Broadcasting Company, the American Broadcasting Company and the Joint Committee on Toll TV, also known as the Committee Against Pay-As-You-See TV, comprised of motion-picture theatre owners.

Most directly affected by the toll video dispute are the 125,000,000 persons who regularly watch television. There is the somewhat novel prospect of recognizing that a home may be more than a castle; it may also be a box-office.

For the entertainment world there is the possibility of admission receipts dwarfing even an impresario's wildest dream—conceivably \$3,500,000,000 a year.

For the advertising world there is a stake of awesome magnitude—this year program sponsors will spend \$950,000,000 in home TV.

The dispute's ramifications lead not only into uncharted economic fields, but also into largely unknown legal, technical, social and cultural spheres. Whatever approach is taken to toll TV, only one certainty emerges: There is hardly a single point on which there is any agreement.

THE PRESENT SET-UP

Today there is in operation a total of 429 commercial TV stations and ten non-commercial educational outlets. These stations broadcast over twelve channels (Nos. 2 through 13) in what is known as the very high frequency band (V.H.F.) and over seventy channels (Nos. 14 through 83) in the ultra-high-frequency band (U.H.F.).

It is the matter of channels—the space on the air—that distinguishes the controversy over subscription TV from disputes involving other mass media. The number of channels, unlike the number of printing presses, is subject to a physical limitation; there is not enough room on the air for everyone who might want to broadcast in every community. In addition, certain channels have a technical advantage over others. Accordingly, some communities may have seven choice channels; others, only one.

F. C. C. Rules Airwaves

How to make the best use of the available channels in each community is the responsibility of the Federal Communications Commission, the agency established by Congress to supervise the airwaves. The agency's authority derives from Federal law stipulating that the airwaves are the property of the people. A broadcaster only receives a license to use a channel; he does not own it. The F. C. C., in short, has the power to grant or withhold the permit necessary to broadcast.

In the toll TV controversy the task of the F. C. C. is to decide whether it can authorize pay-as-you-see to use broadcasting channels and, if so, under what conditions. Last February the agency invited comments on what it should do. It was swamped with a record mail—more than 25,000 communications as of last night. Now those for and against toll TV have until July 11 to enter rebuttals to one another's arguments.

What happens after that is part of the subscription TV controversy itself. To understand why, it is necessary to outline the ABC's of toll TV.

HOW TOLL TV WORKS

The underlying theory of subscription television is to make a program available only to those viewers willing to pay for it. But the basic technical problem is to find means of keeping the program away from those not willing to pay.

This trick is done by use of the principle of the combination lock that protects a bank safe; in this instance it protects a

television program. The toll TV broadcaster transmits his program with a certain electronic combination. Then he sells this combination to the set owner who wants to see his show.

Why this is feasible is better appreciated when it is first understood how a television picture travels through the air to a receiver. The TV image is not sent as the whole picture you see on the screen. Rather it is sent in the form of little pieces that are then reassembled at the receiver. There are many different ways both to send the pieces and to put them back together again. This is the heart of all systems of toll TV.

The Toll Systems

There are three major proposed methods of transmitting toll television:

Phonevision. This is the system developed by the Zenith Radio Corporation, of which the president is Eugene F. McDonald, generally regarded as the pioneer of toll TV.

The principle of Phonevision is to "scramble" the picture and sound at the transmitter. In effect, the components of the image and voice are mixed up electronically so that on today's conventional receiver the picture would be only jagged lines and the sound unintelligible.

On the receiver equipped to receive Phonevision there would be a device containing five knobs, each of which could be adjusted to one of seven positions. A given program would be assigned a special code number, say 54627. The dial corresponding to each digit would be set accordingly: a normal picture and sound then would be received.

Under the Zenith plan the necessary code information could be obtained from a program card. Punching out an insert on the card containing the digits for a specific show would represent a record of what was seen. A viewer would mail in the used card and then receive a bill.

Skiatron. This is the method advanced by Skiatron TV, Inc., headed by Matthew Fox, and Skiatron Electronics and Television Corporation, of which Arthur Levey is president.

Like Phonevision, Skiatron provides for coding, or "scrambling," the picture at the transmitter, and then decoding, or "unscrambling," the picture at the receiver.

The Skiatron device has provision for the insertion of a standard International Business Machine card on which is superimposed a printed electronic circuit. This circuit would act as an "unscrambler" when a button on the device was pressed. Pressing the button would automatically punch the card, making a record of the show seen.

Telemeter: This is the system proposed by Paramount Pictures, of which Barney Balaban is president, through its subsidiary, the International Telemeter Corporation.

The Telemeter system differs from the other two both in how it would conceal the box-office attraction from the nonpaying audience and its collection of admission fees.

Telemeter proposes to transmit two images on one channel, a development that in time might lead to applications beyond toll video. One image would consist of an advertisement of the program to be charged for; this would appear on existing sets. The second image would be the box-office attraction and could be seen only to sets equipped with a Telemeter attachment.

As the name suggests, Telemeter is basically a coin machine that would collect the money before each show was seen. There would be a slot to accept nickels, dimes and quarters and also automatic provision for a credit allowance if a viewer did not have the right change available. The boxes containing the coins would be picked up periodically, as in the case of pay telephones. Telemeter believes this method preferable to collecting a sizeable bill after shows have been seen.

A point is raised about pay-as-you-see methods: Would it be

feasible to "jump the meter" or break the codes and see box-office attractions for nothing? Technically, almost any method of concealment can be broken, but advocates of toll video insist it will be too much trouble to be practical on any significant scale.

What Will Toll TV Cost?

There are two cost elements to be considered, the initial investment and the upkeep. The price of installing the various devices has been estimated at between \$25 and \$100. Some systems propose to lease their equipment; others to sell it. In most instances it would have to be installed by a service man.

The box-office top most frequently mentioned for a toll TV program is \$2; the proposed minimums have been anywhere from 5 to 25 cents. Whatever the chosen price, multiply it by 35,000,000—the number of sets now used—for a rough idea of the money potential for a single program.

How much toll TV might there be? No definitive prediction is possible; the answer is part of all the basic quarrels. Some say there could not be more than a limited number of hours per night or per week; others have said toll TV might be programmed around the clock.

With a potentially big pie to divide, just about everybody might have a hard in controlling pay-as-you-see. Most predictions envision a three-way split of the money. A percentage would go to the company whose technical system of pay-as-you-see was used, a percentage to the broadcaster and a percentage to the program producer. Since a single corporate entity might fulfill more than one role, the anti-trust laws willing, actual control of toll TV could take many forms.

Commercials

The general assumption has been that toll TV would operate without the familiar interrupting commercials. As a matter of box-office policy it is not believed the public would be eager to put up cash to be regaled by plugs.

However, the question of advertising still has to be determined as a matter of fundamental policy. Already there have been proposals that the public might not object to some commercials if they led to a reduction in the box-office price.

THE LEGAL ISSUE

The legal debate over toll TV centers on the question of what is "broadcasting." In turn, this raises the matter of whether the Federal Communications Commission has the power to act on toll TV or whether the whole issue must go to Congress.

Section 3 of the Federal Communications Act of 1934 defines broadcasting as "the dissemination of radio communications intended to be received by the public, directly or by the intermediary of relay stations."

The opponents of toll television, who urge Congressional action, argue that a program that is scrambled is not intended to be received by the public but is intended to be withheld from all members of the public except those able and willing to pay. Further, it is contended that toll TV constitutes a discriminatory use of a public property—the airwaves—as opposed to advertiser-sponsored TV, which is available to everyone on an equal basis.

The supporters of toll TV, who contend the F. C. C. can act on its own, argue that a box-office program is intended to be received by the entire public. To ask the public to pay for the equipment necessary for subscription TV, they maintain, is legally no different than asking the public to purchase a receiver in the first place.

THE CASE FOR

Here is a summary of the argument in favor of subscription television:

TV broadcasting as it now exists is governed by what an advertiser can afford to do and by what he believes will stimulate the sales of his product. If there are some areas of programming in which the needs of the sponsor and the needs of the viewing public are compatible, there are other important areas in which they are not. It is in the incompatible areas that toll TV proposes to operate.

One of the areas is prime TV programming material—the brand new, full-length motion picture, right off the Hollywood griddle, to be offered without commercial interruptions. Here the inadequacy of an advertiser's resources are evident.

The average cost of production of a Hollywood feature is about \$900,000. Yet, as itemized by Paramount Pictures in its comments to the F. C. C., here are the single-performance costs, including talent and time on the air, of some of TV's currently most expensive shows:

1. Producers' Showcase . . .	\$351,446
2. Max Liebman Presents . . .	313,039
3. Best of Broadway	173,725
4. Shower of Stars	167,710
5. Milton Berle	162,504
6. Godfrey and His Friends . . .	152,902
7. Omnibus	147,201
8. Disneyland	146,144
9. Comedy Hour	138,652
10. Jackie Gleason	130,839

This huge economic disparity, according to toll TV's advocates, is what precludes from the home screen the newest and best that Hollywood can offer.

Similarly with sports. Worried over the competitive inroads of free TV, promoters have backed away from the medium. There has been only one championship bout on home TV since 1951; theatre television has been able to outbid the advertiser. Football is restricted and in some areas so is baseball. If baseball attendance continued to drop, further blackouts can be expected. Toll TV, on the other hand, could assure the economic vitality of sports and at the same time retain them for home viewing.

Each New York baseball club receives between \$500,000 and \$750,000 a season for allowing broadcasts of its game; toll TV—at 50 cents a seat—might mean \$50,000 for each of seventy-seven home games, or \$3,850,000 a season.

Broadway plays of full length could be offered regularly via toll TV, not merely occasionally. The two-hour running time of a play is prohibitive for most advertisers. Without the presence of the advertiser, who, as a business man, is normally averse to offending a prospective customer, greater artistic freedom could prevail.

In the whole field of so-called regular minority programming, such as the symphony concert, opera, ballet or straight educational feature, toll TV offers the only practical hope. Groups interested in such forms of programming may not be large enough to warrant the attention of an advertiser but they are large enough to support such attractions themselves. In addition, toll TV could represent a new source of revenue for a cultural institution such as the Metropolitan Opera or even for a school or college. Merely because an advertiser cannot afford to do certain things in TV is no reason to deny the public a chance to have these things by other means.

Toll TV does not constitute a threat to free TV. There is a limit to the amount of distinctive or qualitative programming for which a charge could be

made; in addition, there probably is a limit on how much the public would be willing to pay in a week for home entertainment. There still would be opportunity for both forms of TV, with the public benefiting from the rivalry for its attention.

Further, toll TV need not be a detrimental factor in communities where there is a single station. While temporarily a toll TV program might black out the only free program, the introduction of public financing of TV could lead to the industry's expansion in areas that do not have sufficient population to interest advertisers.

In any case, toll TV holds enough promise to warrant a chance to prove itself in the marketplace. The broadcasters did not complain when they lost attractions to theatre television or when some of their stations were "blacked out" by sports promoters. Their only basic fear is the first competition they ever have faced in their own medium.

THE CASE AGAINST

Here is a summary of the argument in opposition to toll television:

The advocates of subscription video are trying to pull the wool over the public's eyes by ignoring the elementary economics of the entertainment world: Stars, producers and writers in the show business go where the most money is.

If toll TV can outbid advertiser-sponsored TV for attractions not on the screen, then obviously it can outbid free TV for attractions that are. Toll TV won't stop with the ready-made shows of Broadway and Hollywood; it also will seek the ready-made box-office names familiar to the home TV audience. The public will not pay 10 cents to see Jackie Gleason if it can see him free, but it will pay 10 cents rather than not see him at all. And Mr. Gleason already has shown an interest in working for toll TV; other stars inevitably

will follow suit and, to enhance their box-office potential, would stay off free TV.

The economic dominance of toll TV would assert itself even further. With the available audience divided between free and fee TV, the advertiser would have less incentive than ever to meet TV's sizable costs. If his sales message is going to reach fewer people, he is going to trim his costs, not enlarge them. Only the loss of a few choice evening hours to toll TV is required to mark the beginning of free TV's end.

The rosy cultural future envisioned by toll TV is unrealistic and illusory. The inexorable law of the box office will result in toll TV catering to majority audiences much as existing TV does; the sponsors of toll TV will not be overly concerned with devising ways to make less money rather than more. Especially if facilities for toll TV are subject to a physical limitation, the public will be offered more of Lana Turner than of ballet.

Meanwhile, if the box-office held increasing sway over TV, the public-service programming that is now a by-product of advertising-sponsored TV, such as many news and political events, would be lost. There would not be the income from the popular shows to foot the bill for sustaining video.

Actually, television today provides much if not most of the fare promised by toll TV. Virtually all the stars of Broadway and Hollywood now appear on the home screen. Television dramas are bought by stage and screen producers. There is a trend toward doing Broadway shows after their run and a likelihood of original ninety-minute works before long.

As for movies, free TV's expanding economy is making possible the acquisition of some better pictures. Were it not for the golden promises of toll TV, existing TV might obtain newer releases. In the realm of sports, the loss of some attractions is offset by the presence of others. You may not see a championship fight but you can see the World Series or the Army-Navy game.

Broadcasters' Choice

The toll TV advocates cannot talk away the fact that subscription video proposes to operate on channels made possible by advertising-sponsored TV. When a toll TV program is on the air, it often may black out a program that has gone into millions of homes without charge.

The proposal that toll TV might be confined to a special category of broadcasters—such as the hard-pressed ultra high frequency station owners—is unrealistic. If it is democratic for a listener to have a choice of both types of programming, then it is democratic for a broadcaster to be free to decide which type he will offer. And producers of toll programs, as with today's advertisers, will turn to the big major stations that can deliver the largest ready-made audiences.

To say that toll TV only wants a chance is to evade the issue. Once toll TV is inside the door, free TV's days economically are numbered. Let toll TV prove itself and today's networks and broadcasters will be forced to enter the field to protect their investment.

For the public the question is a simple one; TV can be free: why pay for it?

THE EFFECTS

Subscription TV would affect other fields of entertainment.

The Motion Picture Industry: The impact of subscription television on the movies undoubtedly would be great, though how great is a controversy in itself. This impact would be different for the industry's two main divisions: (1) the producers of films, i. e., Hollywood; (2) the exhibitors of films, i. e., the movie houses.

For Hollywood toll TV would be pure bonanza, the most efficient and far-reaching method of distributing pictures imaginable.

For the exhibitors the prospect of toll TV is a nightmare. The Joint Committee on Toll TV, headed by Alfred Starr, a Nashville theatre owner, asserts bluntly that subscription video

constitutes a significant danger to the continued existence of motion picture theatres." With new movies going for home demonstration, the neighborhood theatre hardly would be in an enviable position. Small wonder the exhibitors are championing free TV, once regarded by them as the economic evil of all time.

The Broadway Theatre: Both Moss Hart, president of the Dramatists Guild, and Ralph Belamy, president of the Actors Equity Association, believe toll TV could prove a major boon to the legitimate theatre, stimulating production and providing a king-sized "angel." Skeptics have wondered, however, where all the necessary good plays would come from and if the content of many—"Bus Stop" and "Cat on a Hot Tin Roof," for example—would be suitable for TV's mixed family audience.

Educational Broadcasting: Subscription TV is seen as a possible form of deliverance for educational broadcasting, which has been assigned its own TV channels by the F. C. C. but has been plagued by economic headaches. A small TV audience—say 10,000—would still be a big school class. A \$1 fee for a course under these circumstances might lead to some new economic thinking on the nation's campuses.

THE FUTURE

The concensus of virtually all participants in the controversy is that the toll TV war will take the form of words rather than deeds for months, perhaps years, to come.

After receiving the rebuttals to the first flood of opinions, the F. C. C. can order an oral hearing, turn to Congress for guidance, order some experimental toll TV to learn more about the systems, or propose standards. Once the F. C. C. reached a determination, then there could be legal challenges on many different grounds, with the final decisions resting with the United States Supreme Court.

PUBLISHED WEEKLY BY RADIO NEWS BUREAU • WYATT BLDG. • WASHINGTON 5, D.C. • TELEPHONE STERLING 3-1755 • VOL. 11: No. 27

SUMMARY - INDEX OF THE WEEK'S NEWS—July 2, 1955

PHILCO ACCENTS RESEARCH in high-level planning to take advantage of burgeoning "electronics economy"; Balderston & Carmine discuss future (p. 1).

UHF EXCISE TAX EXEMPTION blasted by Administration, regarded as dead for this year, though last-ditch attempt will be made to revive it (p. 3).

OPPOSITION TO UHF allocations by past top-level scientific committees may provide clue to attitude of Senate Commerce Committee's engineering study (p. 3).

DEINTERMIXTURE OF VHF-UHF on "selective" basis given 50-50 chance after oral argument on Peoria, Evansville, Madison, Hartford & Albany (p. 6).

FINAL DECISION IN PORTLAND, Ore. gives Ch. 8 to KING-KGW; Ch. 6 finalized in Milwaukee, while WWSW-WJAS merger in Pittsburgh is contested (p. 6).

NEXT SEASON'S COLOR: Brilliant network program lineup (p. 2); RCA building chassis for other set makers; Philco offers first color sets, using 3-gun tube (p. 11).

NEW PHILCO & EMERSON LINES: Philco offers 48 TVs & battery phono; Emerson discloses new pricing policy, promises transistor TV (pp. 9 & 12-13).

TRADE PRACTICE RULES for TV-radio merchandising, issued this week by Federal Trade Commission, run into opposition within RETMA (p. 12).

ELECTRONICS MERGERS: General Dynamics-Stromberg approved by stockholders; Sperry-Remington Rand consummated; new Olympic-Victoreen combine (p. 15).

NOTRE DAME'S UHF STARTS as Newport News & Reading outlets quit; WFIL-TV buys off-air Lebanon (Pa.) station to revive it; other upcoming stations (p. 8).

MILITARY HIGH TOWER "BAN" defied by FCC initial decision overruling Pentagon's rejection of 1610-ft. tower planned by KSWV-TV, Roswell, N. M. (p. 16).

NETWORK TV-RADIO billings for May both up from April; PIB report shows 5-month TV total \$165,539,107 vs. \$125,477,346 in same 1954 period (p. 16).

1955 SPECTRUM CHART IN COLOR: As a service to our subscribers, and in cooperation with Tele-Tech & Electronic Industries, we send you herewith that magazine's newly revised spectrum chart covering not only the FCC Frequency Allocation Spectrum as of this year but also the Electromagnetic Spectrum from subsonic waves to gamma rays. It's 14x20-in., suitable for framing, very handy for quick reference to the broadcasting, marine, aeronautical, governmental, experimental, amateur and other allocations coming within FCC purview. TV-AM-FM segments are shown in dark red; suitable glossaries key the military designations and frequency band nomenclature. We regret we can provide only one copy of the Tele-Tech chart to a subscriber; extra copies can be had at 50¢ each from Caldwell-Clements Inc., 480 Lexington Ave., N.Y.

Note: Pocket booklet detailing all U.S. and international frequency allocations, compiled in 1953 but still up-to-date and very handy, is available on request (while supply lasts, no charge) from RCA Frequency Bureau, 1625 K St. NW, Washington.

'THE ELECTRONICS ECONOMY'—AND PHILCO: The thinking-at-the-summit of dynamic Philco, heretofore most noted for hard drive, hard sell, heavy advertising, potent executive power in depth -- with plenty of young-men-coming-along -- is turning more and more to research & development, patent structure, diversification of product and expansion apace with the burgeoning "electronics economy."

Chairman William Balderston and pres. James H. Carmine, the one an engineer-scholar, the other a sales-&-merchandising genius, told their distributors at Miami Beach convention this week some things that didn't get into press releases but that have considerable significance to the TV-radio-electronics business at large.

That \$20 billion-a-year rate forecast for the industry by '1965, as detailed in these columns last spring (Vol. 11:11), up from current \$9 to \$9.5 billion rate, was the touchstone of their expressed reasoning and planning. It was made plain that Philco expects to exceed by far the \$430,000,000 sales record achieved in 1953, from which it fell last year by some \$80,000,000 due to strikes, and that it intends to make the intense rivalry with RCA even more keen.

RCA is the prime competitor in TV-radio-electronics, and should go to better than \$1 billion this year, much of it from broadcasting and related services. But whereas RCA is strongly entrenched in research, patents and the TV-radio trade and is casting about for a bigger place in home appliances, Philco is notably strong in appliances as well as TV-radio and is bent on entrenching itself more firmly in research & development. Both are heavily engaged in govt. work -- RCA ranking 26th, Philco 30th in post-Korean prime contracts for July 1953-Dec. 1954 (Vol. 11:23).

Philco hasn't done anywhere near the job of publicizing its accomplishments, however, and it remained for Balderston to reveal it now employs 1800 scientists and researchers and is spending \$21,000,000 a year on civilian & govt. research, development, design & engineering. It also was the first time Carmin ever publicly challenged RCA's patent position in color TV (see p. 11), even though thus far Philco is using same tube RCA is now marketing while admitting its own one-gun isn't ready.

At Philco, research means earliest possible adaptation to commercial product -- evidenced by increasing use of transistors and other devices shown the distributors, notably a tiny new hearing aid (p. 9). Balderston said that in 1954 alone 48.4% of Philco's business was in products of its research dept., created during the preceding 10 years. He quoted National Science Foundation's Dr. R.H. Ewell that between 1928-1953 an American research expenditure of \$30 billion brought forth new products, lowered cost of existing products and produced other benefits worth \$400 billion -- hence paid off 13 to 1. Philco, he said, equals or betters that ratio.

As for the economic outlook, Carmin kept reiterating that it's "on a firm foundation" and expressed confidence "our business will continue at a high level for the foreseeable future." Balderston spelled it out in figures:

"The economic roadsigns for the next 10 years are certainly favorable," he said. "Our population will increase to 190,000,000 persons; our present 47,000,000 households will increase to 56,000,000."

"Our gross national product -- the amount Americans pay for goods and services -- will go well over the \$500 billion mark in 1965 as compared with the current record rate of \$370 billion. And the figure we are most interested in -- disposable income -- the money people have to spend for our products -- will skyrocket from \$250 billion in 1953 to an estimated \$380 billion in 1965, an increase of more than 50%."

* * * *

Note: Factory volume of electronics production will total \$6.2 billion this year, Commerce Secy. Weeks predicted this week end in mid-year economic statement. He thus revised upward his New Year's figure of \$6.1 billion (Vol. 11:1), despite fact that earlier prediction included an anticipated 150,000 color sets and that the current forecast is based on only 15,000. Higher-than-predicted output of black-&-white sets and military electronics more than makes up the difference.

The \$6.2 billion figure comes within a shade of the record \$6.3 billion in electronics production for 1953, and compares with \$5.8 billion in 1954. Unlike some industry estimates, Commerce Dept. figures are based on factory prices alone, do not include broadcasting revenues, repairs & servicing, wholesale or retail markups.

BRILLIANT COLOR LINEUP IN FALL SCHEDULES: Powerful network color programs are now assured for fall-winter season -- though color is almost completely dormant this summer (Vol. 11:25). It's agreed that last season's combination of too few color programs and high receiver prices is what left the consumer cold. Now, it's hoped at all levels of the industry that they'll have the right "formula" next fall.

Color programs already in prospect should do plenty to perk public interest -- and once sets begin to sell, color should unfold in a hurry. Whole industry has every incentive to push color. Manufacturers, distributors and dealers are most anxious to find a new "big ticket" item -- something with a heavy markup, in contrast with today's fast-moving but low-margin, low-end-of-line sets. Telecasters, near set saturation in many areas, look to color to "sweeten" and step up rate cards. Here's the fall color lineup of NBC and CBS (ABC still silent):

NBC-TV -- "Max Liebman Presents," every 4th Sat., 9-10:30 p.m., starting Oct. 1, series of 10 shows, sponsored by Oldsmobile; "Color Spread," every 4th Sun., 7:30-

9 p.m., starting Sept. 11, series of 14, numerous sponsors; "Producers' Showcase," every 4th Mon., 8-9:30 p.m., starting Sept. 19, series of 14, Ford & RCA; "Milton Berle Show," every 4th Tue., 8-9 p.m., starting Sept. 27, series of 13, Whirlpool, Sunbeam & RCA; "Howdy Doody," daily, 5:30-6 p.m., multiple sponsors.

Beyond that fixed schedule, NBC will offer in color some of the big Maurice Evans shows, Sun., 3:30-5 p.m.; some operas, some NCAA football, some World Series, some "Home" and "Today" inserts -- and still-to-be-determined special one-shots. There are also plans in the works for frequent daytime programs and/or test signals to permit dealer demonstrations and set servicing & installation.

CBS-TV -- "Shower of Stars," every 4th Thu., 8:30-9:30 p.m., date not yet set, series of 10, Chrysler; "Ford Jubilee," every 4th Sat., 9:30-11 p.m., starting Sept. 24, series of 10, Ford; Omnibus (majority color), every Sun., 5-6:30 p.m., starting Oct. 16, Aluminium Ltd. & 3 others to come.

In addition to these, CBS will have minimum of 2 regular weekly programs in color -- details not yet disclosed.

Both CBS and NBC will undoubtedly expand color schedules if conditions warrant, limited only by their color studio & remote facilities, playing situation by ear -- according to sale of sets and sponsor interest. Though ABC indicates nothing about color plans, quite a few affiliates are color-equipped and there's recurring rumor some Disney programs may be colorcast; they're on color film, easy to handle.

Note: For story on color receiver plans and prospects, see p. 11.

ADMINISTRATION HITS UHF TAX EXEMPTION: Aid to uhf in form of excise tax exemption for all-channel receivers -- endorsed by telecasters, set makers and Senate Commerce Committee -- can be written off as dead for this year, despite plans for a last-ditch effort next week to push it through House Ways & Means Committee.

Coffin was nailed shut this week when Administration raised strong objections not only to the loss of perhaps \$100,000,000 in taxes, but to the basic principle. Its views were expressed in Treasury Dept.'s comments to Ways & Means Committee on the uhf tax exemption bill (HR-4070) introduced in House by Rep. Ikard (D-Tex.):

"It is estimated that it would cost \$7-\$15 more to manufacture sets equipped to receive all TV channels; thus exemption from a 10% tax would make it cheaper for a manufacturer to make sets for all channels in every case where his price was as much as \$150. With cheaper forms of equipment, the same result would apply for sets produced by the manufacturer at \$70 or over.

"If all sets were made for uhf, as would seem possible under this bill, the revenue loss would be \$100,000,000. The loss would be reduced proportionately if only part of the sets were so made.

"The Treasury Dept. will oppose HR-4070 on the basis of revenue loss alone, but we are also opposed to the principle of using tax legislation to provide a subsidy for particular industries or products, except in limited situations involving national defense. The problem of uhf stations is apparently a difficult one, but we believe it should not be dealt with through differential tax treatment..."

Rep. Ikard will make effort to gain Ways & Means Committee consideration of his bill next week, but he concedes chances are slim due to Treasury's opposition and imminence of Congressional adjournment. By same token, a move to tack the proposal onto a House-passed tax bill from the Senate floor appears ill-fated.

HOW PREVIOUS 'AD HOC' GROUPS SAW UHF: If key to future lies in the past, important clue to the thinking of at least some members of Sen. Magnuson's advisory engineering committee on allocations (Vol. 11:26) can be found by looking at past studies by 2 top-level scientific groups -- both of which had some of same members as the ad hoc panel formed last week by Senate Commerce Committee.

The monumental 1952 Report on Radio Spectrum Conservation by Joint Technical Advisory Committee of IRE-RTMA (Vol. 8:4), later published by McGraw-Hill, criticized helter-skelter growth of radio services and proceeded to show how it could be rectified by reallocation for most efficient use of world's spectrum resources.

Subcommittee preparing report was headed by Donald Fink, then editor of Electronics, other members being Haraden Pratt, ex-IT&T, Philip Siling, RCA. Both Fink

and Pratt are members of current ad hoc committee. Among consultants to JTAC's study was NBC's Wm. S. Duttera, also now a member of Sen. Magnuson's engineering group.

JTAC urged one contiguous band for TV allocations, rather than current allocation breaking up TV into several different bands. Ideal TV allocation, its report said, would be 100-700 mc (beginning at current FM band and extending up through present Ch. 54). This would have permitted eventual allocation of 100 channels, as against today's 82. Breaking TV into scattered bands, JTAC survey stressed, "imposes considerable penalty on apparatus design and performance, especially receivers."

Choice of uhf band for TV's expansion, it commented, "seems unfortunate in that operation would be much more efficient in the region immediately above 216 mc [Ch. 13]. This region is now occupied by services which could operate effectively in a higher part of the spectrum."

JTAC spokesmen met with FCC as recently as last week in continuing effort to push plan for study looking toward more efficient use of radio frequency spectrum.

* * * *

Forecast of trouble for uhf stations was contained in earlier study -- by ad hoc committee formed in 1949 by Sen. Edwin Johnson (now Gov. of Colorado) when he was chairman of Commerce Committee. Though formed to explore color TV, the committee headed by Dr. Edward U. Condon -- then head of National Bureau of Standards -- injected strong note of warning about uhf problems in special appendix to its final report 5 years ago (Vol. 6:28, 30):

"The proposal to allocate uhf channels is open to a number of serious objections which stem from differences in the performance of transmitters and receivers and in propagation of radio waves..."

One effect of "a uhf allocation which is against the public interest," said the Condon report, "is the tendency to foster monopoly. In areas of dense population, such as the eastern seaboard, a vhf station can reach an audience much larger than can an equivalent uhf station. Accordingly there is serious doubt that a uhf station could, under these circumstances, compete with the vhf stations in the same area. The limited number of stations on the existing 12 vhf channels would then operate at a substantial competitive advantage."

Uhf propagation seems to have worked out better than committee had feared, but Condon group didn't come to grips with problem of set conversion.

Additional vhf channels would be preferable to uhf, the report said, blaming poor distribution of spectrum space on fact that no govt. agency "has authority to make a judicial review of the use of the entire portion of the spectrum involved."

Among the members of 5-man Condon committee were Donald Fink & Stuart Bailey -- both now members of Sen. Magnuson's ad hoc allocations study group.

San Francisco's educational KQED (Ch. 9) reports success in "do-or-die" campaign to raise \$65,000 in public contributions by June 30 to stay on air (Vol. 11:25). Gen. mgr. James Day said \$54,000 had been paid in cash as of June 30, additional sums pledged, and drive will be extended to July 11 while station stays on air. Campaign was assisted by spot announcements on all commercial stations in area. Among other educational TV developments this week, N. Y. State Comptroller Arthur Levitt urged establishment of 10-station educational network in state, as proposed several years ago by State Board of Regents but subsequently rejected by N. Y. State Temporary Commission on Educational TV (Vol. 9:9). Dr. Walter B. Emery, consultant to Joint Committee on Educational TV, was appointed to conduct study of educational TV's potentialities in state, to be assisted by 11-man advisory committee headed by Dr. Kenneth A. Bartlett, v.p. & dean of public relations, Syracuse U. Also this week, Washington Post's WMBR-TV, Jacksonville, pledged to Educational Television Inc., applicant for non-commercial Ch. 7 there, a complete 5-kw transmitter valued at \$69,000. It had previously pledged use of \$60,000 mobile TV unit, including 2-camera chain, microwave transmitter & truck.

Uncle Sam's TV activities abroad will be doubled in next year by U. S. Information Agency, which this week named Frederick A. (Ted) Long chief of TV div. A one-time CBS official, Long was v.p.-gen. mgr. of United Artists TV Corp. until 1954, and was recently exec. v.p. of Continental Pictures Inc. USIS plans to make American TV material available to 66 stations in 25 countries by end of next year, as compared to 28 in 20 countries which now receive it. The weekly U. S. newsreel will be turned into semi-weekly regionalized service, and films and kines emphasizing American objectives will be shipped abroad.

Worth reading: Very pro-educational TV, very well written, presenting strong case for his side whether you agree with it or not, Martin Quigley, who took leave from his public relations firm to promote St. Louis educational TV, writes of "Home-Grown TV in St. Louis" in July Harper's; it's story of KETC (Ch. 9) which is called a "magnificent experiment which can be duplicated in your own community."

Graybar named distributor of Ampli-Vision equipment for community TV, master antennas and closed-circuit use. Ampli-Vision is a div. of International Telemeter Corp., 2000 Stoner Ave., Los Angeles, 80% owned by Paramount.

Personal Notes: Vincent T. Wasilewski, NARTB chief attorney, named mgr. of govt. relations, effective Aug. 10, assuming duties of govt. relations v.p. Ralph W. Hardy, who becomes CBS Washington v.p. Sept. 1, succeeding Earl H. Gammons, retiring . . . Richard B. Hull, gen. mgr. & founder of Iowa State College's commercial WOI-TV, Ames, takes year's leave of absence to join Educational TV-Radio Center at Ann Arbor as director of survey of current status of educational TV, financed by Ford Foundation's Fund for Adult Education . . . George Klayer appointed to new post of CBS-TV eastern sales mgr., succeeded as midwest sales mgr. by Sam K. Maxwell Jr. . . . George B. Storer elected 1955 vice commodore of famed Key Largo Yacht Club, succeeding James H. Carmine; traditionally, the commodoreship comes next . . . Wm. E. Kelley promoted to eastern TV sales mgr. in expansion of Storer Bestg. Co. sales dept. under new national sales mgr. Robert C. Wood; Lewis P. Johnson promoted to midwest TV sales mgr., Chicago; John R. Porterfield, ex-WGLV, Easton, Pa., named eastern radio sales mgr.; Paul B. Evans, ex-NBC Spot Sales, named midwest radio sales mgr. . . . John B. Scheuer, exec. v.p. & gen. mgr. of KTVI, St. Louis (Ch. 36) for last 13 months, has resigned to rejoin Triangle Publications' new broadcast div. (Walter Annenberg's WFIL-TV, Philadelphia, WNBC-TV, Binghamton & radio stations) as public relations director; KTVI pres. Paul Pelatson, chief owner, is assuming supervision of station . . . James R. Bonfils resigns as sales mgr. of KTVI to form Midwest Radio & TV Reps, 706 Chestnut St., St. Louis . . . John Babcock rejoins Crosley stations—having been for last 4 years with New Idea Farm Equipment Co.—as director of its town & country div. in charge of developing farm programs & sales . . . Richard W. Hubbell, ex-CBS, recently with DuMont, named v.p. & gen. mgr. of new Carlos Franco Assoc., market & research firm formed by the ex-Young & Rubicam and Crosley executive . . . George H. Morris, ex-KMBC, Kansas City, named gen. sales mgr. of WGTH-TV & WGTH, Hartford, Conn. . . . John B. Burns, midwest mgr. of ABC Film

Syndication, moves to N. Y. Oct. 1 as national sales director, heading new sales div. offering more specialized program services; Nat V. Donato named eastern sales mgr., continuing as Canadian rep; Patric Rastall named acting midwest mgr.; Joseph F. Greene, traffic mgr., heads new client service dept. . . . John F. Patt, pres. of WJR, Detroit & upcoming WJRT, Flint, is now at home, 2718 Landon Rd., Shaker Heights, O., convalescing from heart attack at NARTB convention which had kept him hospitalized in Washington 4 weeks . . . Frank M. Devaney, ex-gen. mgr. of old WMIN-TV, St. Paul, purchased by Bitner interests which merged it with time-sharing WTCN-TV, named station mgr., reporting to gen. mgr. Ewing C. Kelly, of upcoming KCRA-TV, Sacramento (Ch. 3), due in Sept. . . . Harold P. Danforth, WDBO-TV, Orlando, elected pres., Florida Broadcasters Assn. . . . Charles Jennings, CBC supervisor of program planning, named asst. controller of broadcasting; Marcel Carter, director of personnel & administrative services, appointed asst. controller of administration . . . Walter A. Lawrence, ex-Fuller & Smith & Ross supervisor of Westinghouse account, named v.p. in charge of Kenyon & Eckhardt's Chicago office . . . John R. Sheehan, Cunningham & Walsh TV-radio director, elected a v.p. . . . Arthur R. Ross named eastern mgr., Campbell-Ewald TV-radio dept. . . . Ted Bliss, ex-CBS-TV & Young & Rubicam, named TV-radio director, Raymond R. Morgan Co., Hollywood . . . Len Firestone resigns as national sales mgr. of Unity Television Corp. . . . Wm. J. Stenton, ex-Weiss & Geller, appointed chief timebuyer of Campbell-Mithun, Chicago . . . Eda Purcell, ex-Benton & Bowles, joins Young & Rubicam on Procter & Gamble TV-radio account . . . Matthew J. (Matty) Fox, onetime pres. of Motion Pictures for Television, elected pres. of Western Television Inc., newly-acquired subsidiary of C & C Super Corp. (soft drinks) . . . John W. Kennedy, sales mgr., upped to v.p., Charles W. Pritchard named treas., new Stromberg-Carlson Bestg. Corp. (WHAM-TV & WHAM), div. of General Dynamics, headed by pres. Wm. Fay . . . Bertram Lehar Jr. resigns as sales v.p. of WATV & WAAT, Newark, effective Aug. 31.

NARTB pres. Harold Fellows has been voted new 5-year contract thru June 1960, providing for \$5000 annual increase until \$75,000 salary is reached in 5th year. He also gets \$10,000 annual expense allowance next 5 years. Under contract ratified by full board June 25, he will be consultant at \$20,000 annually for 4 years thereafter, retiring in 1964 (at age 65) on \$7500 lifetime annuity. In other actions, board voted to hold 1957 national convention in Chicago (probably Conrad Hilton Hotel, where 1956 convention will be held April 15-19) and in 1958 on west coast. Board itself will meet next Jan. in Phoenix, next June in Washington. Board also approved constitution & by-laws of newly-organized Assn. for Professional Broadcasting Education, designed to encourage more students to enter broadcasting (Vol. 11:25). Fellows will designate 5 broadcasters to serve on APBE board.

CBS reaped no ill-will—even drew some public praise—as result of events following week's sensational disclosure by newsman Winston Burdett that he once was a Communist spy (though not while he worked for CBS). Statement by CBS v.p. Sig Mickelson on network's continued confidence in Burdett, and Senate internal security subcommittee Chairman Eastland's endorsement of network's position represented the epitome of good public relations in an extremely touchy situation.

The late M. H. Aylesworth, first pres. of NBC, got options at 5¢ a share on 1000 shares of Ellington & Co. (redeemed \$100 a share) plus a \$2000 monthly expense account for swinging the Cities Service account to that agency, according to testimony in his widow's recent unsuccessful appeal from govt. claim for \$68,749 back taxes.

Application to buy WKLO, Louisville, Ky. (5-kw, 1180 kc, ABC), along with CP for off-air WKLO-TV (Ch. 21), for \$350,000 was filed this week by Great Trails Bestg. Corp. of Dayton, owned by ex-Secy. of Commerce Charles Sawyer. Selling group is headed by Joe Eaton, with E. R. Plunkett, Harold J. Plunkett, Emanuel Levi & Milton S. Trost only stockholders with more than 10% interest. Return to air is planned by new owners "when operating difficulties of WKLO-TV are solved and operation may be resumed on another channel." WKLO-TV has asked for Ch. 7 in Louisville deintermixture petition (Vol. 11:23). Great Trails operates radio station WING, Dayton, has interest in radios WCOL, Columbus & WIZE, Springfield; controls daily *Lancaster* (O.) *Eagle-Gazette* & weekly *Waverly* (O.) *Watchman*. WKLO-TV began operation in Sept. 1953, quit air April 20, 1954. Operating statement shows radio had net operating profit in 1954 of \$52,755 on \$284,364 revenue; net in 1953 of \$37,411 on \$284,403. In the early 4 months it was on air in 1954, TV had net operating loss of \$132,036 on \$13,300 revenue; net loss in 1953 was \$102,647 on \$9276 revenue.

Sale of Tucson's KVOA-TV (Ch. 4) & KVOA for some \$450,000 was approved this week by FCC (Vol. 11:21). Selling group headed by Chicago adman John J. Louis (Needham, Louis & Brorby) owns KVAR, Phoenix (Ch. 11), and radio stations KTAR, Phoenix; KYUM, Yuma; KYCA, Prescott—all in Ariz. Purchaser Arizona Bestg. Co. comprises five 20% stockholders from Los Angeles area: ex-publisher and ex-Congressman Clinton McKinnon, adman Bernard Weinberg, attorney Arthur A. Desser, druggist H. B. Garfield, KFVB sales mgr. Frank Oxarart.

DEINTERMIXTURE OF UHF & VHF channels on a market-by-market basis, once believed certain of turndown by FCC, improved its chances substantially this week—probably to a 50-50 possibility—as result of oral argument before full Commission.

Counsel for more than 30 parties addressed 6 commissioners (Hennock gone, Mack not yet sworn), for 2 solid days, and it was apparent from commissioners' questions that they've given plenty of thought to problem. Specific cases involved Peoria, Evansville, Madison, Hartford & Albany-Schenectady-Troy. The first 4 have uhfs in operation, no vhf—but each has a vhf channel awaiting final grant by Commission. In each case, the uhfs ask that vhf channels be moved out of area or given to educators. There's one vhf (WRGB) operating in Albany-Schenectady-Troy area, with petition pending to add another vhf channel.

Uhf attorneys had the tough job of persuading Commission to change basic policy on allocations and grants and disappoint vhf applicants who have made great expenditures of money, time and energy in competitive hearings. Among arguments of deintermixture proponents:

(1) Uhf must be used to give competitive nationwide service. To keep uhf alive, "islands" of healthy uhf stations must be maintained.

(2) In large markets, uhf can survive against competition from one vhf station—no more. In small markets, even one vhf is too much.

(3) If uhf "islands" are preserved, manufacturers have incentive to produce good uhf sets, and growth of 3 or more strong networks is fostered.

* * * *

Opponents of deintermixture made these main points:

(1) Uhf propagation is such that uhf stations will leave "white" areas—population which can be reached by vhf, however.

(2) Uhfs which have head start over vhf in their markets, where all sets are uhf-equipped, have made no

FINAL DECISION this week in one of oldest competitive TV hearings of all, for Ch. 8 in Portland, Ore., awarded grant to North Pacific TV Inc., which is controlled by owners of KING-TV, Seattle (Mrs. A. Scott Bullitt) and KGW, Portland. Turned down were Westinghouse and Portland TV Inc.—latter a non-radio group headed by banker Ralph E. Williams Jr.—while Cascade TV Co. was dismissed for failure to prosecute application. Comr. Lee dissented, would have given CP to Westinghouse.

Commission also granted CP for Ch. 6, Whitefish Bay (Milwaukee) to Independent TV Inc., made possible by dropout of competitor. Company is headed by Jack Kahn, yarn & hosiery mfr.

Portland winner was selected on basis of local residence, civic participation, ownership-management integration, programming plans. Portland TV, while superior on local residence and diversification, was held handicapped by lack of broadcast experience, less promising program plans, less civic activity. Westinghouse was penalized for lack of local ownership and for its more extensive broadcasting holdings.

An initial decision looking toward grant of Ch. 11, Pittsburgh, to WWSW (which is merging with WJAS application) was issued by examiner Charles J. Frederick—but this is being contested by Pittsburgh's WENS (Ch. 16),

convincing showing that vhf will hurt them. In short—no conversion problem.

(3) Complete deintermixture is impossible—because out-of-town vhf stations penetrate uhf markets.

(4) Piecemeal deintermixture is a weak palliative for a basically unsound allocation plan. If change in allocations philosophy is justified, it should be applied nationwide.

* * * *

Principal spokesman for deintermixture was attorney James A. McKenna, representing clients in 4 of the 5 cases. He's also counsel for ABC, which also has large stake in success of uhf.

McKenna extended his argument to top 100 markets, said selective deintermixture could keep uhf alive in 25 of them. He limited pitch to keeping only ungranted vhfs from starting, obviously feeling there isn't ghost of a chance of getting any operating vhfs moved to uhf.

If 25 markets are deintermixed, he said, some 65 uhf stations, serving areas with 8,000,000 TV homes, would be "saved." In addition, he felt that 25 more uhfs in other markets would have "reasonable chance to succeed," while some 20 others are probably doomed even if his proposal is adopted.

With adoption of plan, he said, following cities would be uhf-only: Allentown-Bethlehem-Easton, Scranton, Wilkes-Barre, Springfield-Holyoke, Mass., Springfield-Decatur, Ill., Peoria-Bloomington, Evansville-Henderson, Ft. Wayne, Madison, Youngstown-New Castle, Fresno-Tulare, South Bend-Elkhart.

Following would have not more than one Grade A vhf service: Hartford-New Britain-Waterbury, Albany-Schenectady-Troy-Pittsfield, Norfolk, Jacksonville, Miami-Ft. Lauderdale, Harrisburg, York, Reading, Raleigh-Durham, New Orleans, Beaumont-Port Arthur.

Every comment or question uttered by a commissioner was seized upon as clue to his probable vote—always a risky business. For what it's worth, here's sizeup by one veteran attorney: Bartley & Webster favor deintermixture generally; Doerfer & Lee are strongly opposed to it; McConnaughéy favors some, opposes others; Hyde is "on the fence, or just plain inscrutable."

which filed for Ch. 11 this week, advancing several legal arguments to effect that WWSW has 2 applications pending, must be returned to processing line.

Two channel changes were granted—WWLP, Springfield, Mass., from Ch. 61 to Ch. 22; WKNY-TV, Kingston, N. Y., from Ch. 55 to Ch. 21, also moving to Poughkeepsie. Acting in record time, WWLP planned to be on new channel July 2, using new GE antenna atop 700-ft. tower, radiating 206-kw.

Modification of "protest" section of Communications Act, in line with FCC's pleas (Vol. 11:26), sped toward Congressional approval this week when House Commerce Committee favored FCC-sponsored amendment. Senate Commerce Committee considers it July 7. Commission is being very cautious about protests, meanwhile. This week, it postponed effectiveness of CP for satellite KBAS-TV, Ephrata, Wash. (Ch. 43), on protest filed by radio KSEM, Moses Lake.

One of hottest allocations situations revolves around FCC proposal to make Des Moines' Ch. 11 commercial, at request of KGTV (Ch. 17). Commission has been deluged by comments from educational groups, asking that channel be kept for them. This week, KGTV asked Commission to establish new class of station—"mutual commercial-educational assignments."

One petition for channel change was filed—radio WABG, Greenwood, Miss., asking that Ch. 6 be shifted from Clarksdale to Greenwood.

Telecasting Notes: Something that only TV can do—and which it did for first time June 27—had the critics in raptures this week. It was Pat Weaver's *Wide Wide World*, whose success was so immediate that NBC lost no time in announcing the show will go on regular basis—produced by Barry Wood, who handled Mon. program—Sun. p.m. 2 or 3 times a month. Show has already been offered for sponsorship . . . Critics exulted over the way show fully realized TV's potentialities in transporting viewers to distant places with speed of light. If previous forms of TV entertainment are merely adaptations of radio, movies and theatre, *Wide Wide World* was "pure TV" . . . Immediacy was its great stock-in-trade; while format approximated a travelogue, it had an excitement that no travelogue ever approached—with Dave Garroway's low-keyed commentary heightening the effect by letting the pictures speak for themselves . . . On the technical side, *Wide Wide World* was a smooth performance. Camera work was excellent, and remote followed remote with the same precision as a switch from one studio camera to the other . . . Another feature film and another Broadway hit for NBC-TV's 90-min. spectaculars: J. Arthur Rank's *The Magic Box*, 1951 color extravaganza obtained from National Telefilm Associates, leased to NBC for single showing on *Producers Showcase*. Originally scheduled Mon. July 25, 8-9:30 p.m., it was postponed late this week to make room for *The Fourposter*, live with Hume Cronyn & Jessica Tandy playing the roles they created in the successful play . . . Movie producer goes TV: Sol Lesser, veteran independent, who made most of the movies' Tarzan films, hopes to make similar series for TV. He has formed partnership with *Cavalcade of America* producer Jack Denove . . . Adman hits big-time: NBC's *Robert Montgomery Presents* July 4 features "The 4th of July" by S. S. (Paddy) Schweitzer, ex-TV-radio director, Peck Adv. . . Jimmy Durante, who once said he would appear on TV only once a month so as not to wear out his welcome, apparently has changed his mind and will be on TV more frequently than ever next season: his NBC-TV show will be seen 3 weeks out of 4 for total of 30 shows, of which 11 will be filmed; he also has 5 filmed shows this summer . . . Republic Pictures' package of 123 Gene Autry and Roy Rogers features just released to TV by MCA, leased by General Teleradio for a reported \$1,500,000, will be shown on 6-nights-a-week basis on WOR-TV, New York and KHJ-TV, Los Angeles, a la *Million Dollar Movie* . . . First nationwide "film network" time sale: Guild Films signs Bardahl Oil Co. for year's co-sponsorship of *Confidential File* on basic lineup of 57 Vitapix affiliates; \$2,000,000 deal is also said to involve 53 non-Vitapix stations for same series and sponsor . . . CBS underwriting the upcoming Broadway musical version of *Pygmalion*, to star Rex Harrison, deal presumably also involving TV rights . . . "Alice in Wonderland" tentatively scheduled as first in Maurice Evans' series of Sun. afternoon 90-min. presentations on NBC-TV beginning next fall—probably in color.

New reps: WROW-TV, Albany, N. Y., to Harrington, Righter & Parsons (from Bolling); WTVD, Durham, N. C., to Petry (from Headley-Reed); KVVG, Tulare, Cal., to Adam Young (from Forjoe); KLIX-TV, Twin Falls, Ida. appoints Gill-Perna; KIVA, Yuma, Ariz., to Raymer (from W. S. Grant).

NBC served notice this week that it isn't renewing affiliation contract with WNHC-TV, New Haven (Ch. 8) when it expires Oct. 1, also is severing with radio WNHC on Dec. 1. Station also is served by ABC & CBS.

William Weintraub Agency changes corporate name July 15 to Norman, Craig & Kummell; Mr. Weintraub becomes chairman, Norman B. Norman pres., Walter Craig & Eugene Kummell, v.p.'s.

Network Accounts: NBC-TV has sold 22 partic. (at \$71,000 each) out of the 26 available for the first 4 of its Sun. 7:30-9 p.m. color "spectaculars" this fall, for gross of \$1,500,000. Sunbeam Appliances bought 12; Maybelline (eye makeup), 4; U. S. Rubber, 2; Tums, 2; Buick, one; Goodyear, one. For other news of color's uptrend this fall, see p. 2 . . . Indicative of confidence in future of NBC-TV's "magazine concept" trilogy of *Today*, *Home & Tonight*, *Simplicity Patterns* (ladies' dress patterns) signed 3-year contract for \$750,000 worth of partic. on all 3 shows, thru Grey Adv.; it withdrew ad funds earmarked for women's magazines to pay for shows . . . Procter & Gamble, already network TV's biggest sponsor, made another big purchase on NBC-TV this week, buying 5 quarter-hours per week of *Tennessee Ernie Ford Show* Mon.-thru-Fri. 12-12:30 p.m. and *It Pays to Be Married*, Mon.-thru-Fri. 3:30-4 p.m., thru Benton & Bowles . . . Camels buys 19 additional segments of *Feather Your Nest* on NBC-TV starting July 28, Mon.-thru-Fri. 12:30-1 p.m., thru Wm. Esty Co. . . American Chicle & Kleenex to be alt. sponsors of *Summer Theatre*, featuring re-runs of outstanding film dramas, on NBC-TV starting July 5, Tue. 9-9:30 p.m., thru Ted Bates & Co. & Foote, Cone & Belding . . . Post Cereals to sponsor *Commando Cody* on NBC-TV starting July 16, Sat. 11-11:15 a.m., thru Young & Rubicam . . . General Mills to sponsor *Tales of Texas Rangers* as substitute for *Captain Midnight* on CBS-TV next fall, Sat. 11:30 a.m.-noon, thru Tatham-Laird . . . Raleigh Cigarettes & Toni buy Sun. 10:30-11 p.m. time period on NBC-TV next fall for new show, as yet untitled . . . Quaker Oats to sponsor *Ozzie & Harriet* every 4th week on ABC-TV starting Sept. 23, Fri. 8-8:30 p.m., thru J. Walter Thompson . . . Brown Shoe Co. cancels *Andy's Gang* (formerly *Smilin' Ed's Gang*) on ABC-TV in favor of spot-booking in more than 100 markets starting Aug. 20, thru Leo Burnett Co. . . Atlantic Refining Co. to sponsor half of N. Y. Giants football games in N. Y.-New England hookup on DuMont, starting Sept. 24, thru N. W. Ayer.

Among advertisers currently reported using or preparing to use TV station time: Sales Builders Inc., Los Angeles (Red Tape lipstick), thru Doyle Dane Bernbach, L. A.; C & C Super Corp., N. Y. (Super Coola soft drinks), thru Cunningham & Walsh, N. Y.; Carnation Co., Los Angeles (Instant Chocolate Milk), thru Erwin, Wasey, L. A.; Yardley of London Inc., N. Y. (toiletries), thru N. W. Ayer, N. Y.; Weco Products Co., Chicago (Dr. West's toothbrushes), thru J. Walter Thompson Co., Chicago; Smoky Joe Products, Los Angeles (frozen barbecued sandwiches), thru Hadlock & Assoc., L. A.; Jan-U-Wine Co., Los Angeles (canned Chinese foods), thru Heintz & Co., L. A.; Wishbone Salad Dressing Co., Kansas City, thru Allmayer, Fox & Reshkin, Kansas City; Ferber Corp., Englewood, N. J. (Ferber "Vu-Riter" ball point pen), thru Emil Mogul, N. Y.; Kleen King Home Products Co., Burbank, Cal. (cleaners), thru Mottl & Siteman Adv., L. A.; Nelson Pharmacal Co., Chicago (reducing plan), thru Schwimmer & Scott, Chicago.

CBS Radio affiliates this week adopted proposal for one uniform rate 7 days a week from 7 a.m. to midnight, as suggested by affiliates board last month (Vol. 11:22). Effective Aug. 25, plan increases weekend rates 5% to equalize them with weekdays. Also approved was 20% reduction in rate of payments by networks to stations, to be offset by increased number of 70-sec. station breaks.

Norman H. Strouse, J. Walter Thompson v.p. & mgr. of Detroit office, elevated to pres., succeeding Stanley Resor, who moves up to chairman after 39 years as pres.; Henry C. Flower Jr. & Samuel W. Meek, both v.p.'s, elected vice-chairmen.

ABC Film Syndication Inc. moves to 10 E. 44th St., N. Y. (phone Susquehanna 7-5000).

NOTRE DAME'S WNDU-TV, South Bend, Ind. (Ch. 46) joins NBC July 15 as primary inter-connected affiliate, having started regular test schedules July 2 in wake of "unofficial" equipment tests June 20 (Vol. 11:26). It's third outlet in uhf area being served by *South Bend Tribune's* WSBT-TV (Ch. 34) and *Elkhart Truth's* WSJV (Ch. 52). University-owned station uses 121½-kw RCA transmitter, 500-ft. Ideco tower with RCA antenna, located 5 mi. south of South Bend, has studios on campus. Bernard C. Barth, ex-Crosley stations, is gen. mgr.; Wm. Thomas Hamilton, ex-CBS sales dept., sales mgr.; Edward J. Roth Jr., program director; Wm. A. Garden, ex-NBC public affairs, production mgr.; Robert F. Stolff, ex-CBS-TV, sales promotion; George C. Smith, ex-KEDD, Wichita, chief engineer. Base rate is \$500. Rep is Meeker.

* * * *

Two more uhf quit the air this week—WACH-TV, Newport News-Norfolk (Ch. 33) giving up for second time after having resumed on simulcast basis with radio WACH last Aug. 1 (Vol. 10:31); *Reading* (Pa.) *Eagle's* WEEU-TV (Ch. 33) signing off June 30 after more than 2 years on air. Norfolk area station's losses caused move, and owners have asked FCC to limit area to one vhf (pre-freeze WTAR-TV), all other commercial channels to be uhf, with Ch. 10 reserved for educational use.

Reading station, in heart of uhf area, blamed "tremendous operating costs, apathy of national advertisers, lack of equal opportunity," said it will resurvey field during next 6 months and return to air if the economic climate appears more favorable. It was second Reading uhf to go on air; WHUM-TV (Ch. 61) was first and is continuing.

Only 25 mi. away, in Lebanon, Pa., another uhf—WLBR-TV (Ch. 15)—may be resuscitated. It has been off air since last Oct. 16, this week was bought up by Philadelphia WFIL-TV owners for \$115,000 plus assumption of \$125,000 obligated for equipment. WFIL-TV aims to get it back on the air 45 days after FCC approval of trans-

fer, which usually takes about 30 days. It won't be satellite, though it will pick up and rebroadcast WFIL-TV programs daytime at start, with local live and film at night. WFIL-TV mgr. Roger Clipp plans only 9 employees, 4 program, one sales, 2 administrative, 2 engineer. Sellers are radio WLBR (52%) and *Lebanon News* (36%). WLBR owners will retain the AM. WFIL-TV ownership (Walter Annenberg) recently bought WBNF-TV, Binghamton, N. Y. (Ch. 12) for \$3,000,000 (Vol. 11:11, 19).

Note: Roster of on-air TV stations remains 433 (106 uhf) despite defection of 2 this week, for WJPB-TV, Fairmont, W. Va. (Ch. 35) is back on the air after having suspended last Feb. 28 (Vol. 9). It's owned by J. Patrick Beacom, who was elected mayor of the town in May; it has staff of 3, picks NBC & DuMont shows off air from KDKA-TV, Pittsburgh, rest of programming being mainly film. At \$150 rate, Beacom states, station just about breaks even, is sweating out prospect of securing educational Ch. 5 assigned to Weston, W. Va. Its rep is Gill-Perna.

* * * *

This week's equipment shipments: By DuMont—25-kw transmitter to upcoming KTBS-TV, Shreveport, La. (Ch. 3), which has Sept. target; 5-kw transmitter to WDBJ-TV, Roanoke, Va. (Ch. 7), due in Sept. By GE—5-kw transmitter to upcoming educational KRMA-TV, Denver (Ch. 6); 5-kw to educational WTTW, Chicago (Ch. 11), due in Sept.; 5-kw to KFJZ-TV, Ft. Worth (Ch. 11), due in Aug.; 5-kw to KVOS-TV, Bellingham, Wash. (Ch. 12); 1-kw to WPAG-TV, Ann Arbor, Mich. (Ch. 20); 5-bay helical antenna to WWLP, Springfield, Mass. (Ch. 61; due to switch to 22). By RCA—50-kw amplifier to WNCT, Greenville, N. C. (Ch. 9); 10-kw driver to KELO-TV, Sioux Falls, S. D. (Ch. 11), replacing old 5-kw driver, which will be installed at KELO-TV's satellite, KDLO-TV, Florence, S. D. (Ch. 3), due on air Sept. 15. GE reports order from KRLD-TV, Dallas (Ch. 4) for new 35-kw amplifier for early Aug. delivery. KRLD-TV's present 35-kw transmitter will be sold to KWFT-TV, Wichita Falls (Ch. 6).

IN OUR CONTINUING SURVEY of upcoming stations, these were latest reports received:

WDBJ-TV, Roanoke, Va. (Ch. 7) now has mid-Sept. test pattern target, hopes to join CBS next Oct. 1, reports managing director Ray P. Jordan for owner *Roanoke Times* and *World-News*. It has STA for interim operation using 5-kw DuMont transmitter, with RCA 6-section antenna on 73-ft. Blaw-Knox tower, plans 50-kw installation later. It will use former studios of defunct WROV-TV, whose assets it purchased for some \$245,000 to pave way for grant (Vol. 11:16). Blake H. Brown has been named TV sales mgr.; Charles A. Ballou, TV program mgr., reporting to Paul E. Reynolds, who adds TV to WDBJ programming chores; John W. Harkrader, promoted to asst. managing director & commercial mgr. Network hour will be \$500. Rep will be Free & Peters.

KTVO, Kirksville, Mo. (Ch. 3) filed application this week for extension of CP to next Oct., stating it has RCA equipment ordered for July 28 delivery, has Stainless tower ordered, expects to be in operation by Oct. 1. Majority owner is James J. Conroy, who also has interest in radio KBIZ, Ottumwa, Ia., WBIZ, Eau Claire & WLCX, La Crosse, Wis. Base rate and rep not reported.

WILL-TV, Champaign-Urbana, Ill. (Ch. 12, educational) has "early July" programming target, expects to start test patterns shortly, writes director Frank E. Schooley for grantee U of Illinois. Installation of 12-bay batwing antenna on Memorial Stadium's northwest tower was completed June 20 and 5-kw GE transmitter is now being tuned.

CBC board of governors June 28 recommended two TV grants, subject to usual Board of Transport approval: Gerald A. Alger was favored for Ch. 10, North Bay, Ont., over J. E. Grainger, gen. mgr. of *North Bay Nugget*. J. Conrad Lavigne, operator of predominantly French-language radio CFCL, Timmins, Ont., was sole applicant for Ch. 6 there. Board turned down Ch. 6 application of CKRD, Deer River, Alta., for financial reasons. It deferred for further study Ch. 9 application by Quebec North Shore & Labrador Railway Co. for outlet in new iron ore mining town of Schefferville, Que., on Labrador border. Railroad planned "non-commercial" outlet, using CBC kinescopes on free basis.

Sarkes Tarzian Inc., Bloomington, Ind. will manufacture all electronic components for CameraVision, combination film-live camera unveiled in April by Philip Rivero & Arthur S. Lyons in Hollywood (Vol. 11:17). Each CameraVision unit uses 4 combination cameras, with Tarzian expected to turn out all gear for first unit by Sept. Principle is similar to DuMont's Electronicam—chief difference being that CameraVision's film and live cameras use separate lenses, Electronicam's use same lens.

NARTB opposes increase in minimum wage beyond the 90¢ per hour requested by Administration. Testifying before House Committee on Education & Labor June 30, Charles H. Tower, mgr. of NARTB's employer-employee relations dept., said any rate higher than 90¢ would have "immediate and drastic" effect on smaller stations.

DuMont's latest color scanner shipment was to CBS, N. Y. this week; RCA's, to WOAI-TV, San Antonio.

BIG HITS, BIG PLANS AT TRADE CONVENTIONS: Philco's huge distributor convention in Miami Beach's lavish Fontainebleau Hotel was easily the high spot of the week -- though Emerson's convention in New York's Hotel Plaza brought out some rather significant departures from the industry's traditional merchandising practices (for details of new lines, etc., see pp. 1 & 11-13).

Philco had plenty up its sleeve -- considerably more than was revealed on its 100-station ABC-TV June 28 variety show. Besides unveiling 48 new TV models and new radio-phonograph lines to 1200 distributors & dealers, Philco executives:

(1) Disclosed new products and policy of diversification that seem certain to shore up pres. James H. Carmine's prediction that the company will again surpass \$400,000,000 sales this year. First half 1955, he told convention, is even with or ahead of 1954 period in all lines. Among the items ahead is TV, its No. 1 dollar item, and Philco is avowedly out for "5% more" of consumer market, in which it's unofficially estimated to have 15% or so of TV and considerably more of radio.

(2) Revealed research and development plans designed to rank it progressively higher on the electronics industry ladder (see p. 1).

(3) Disclosed color plans and thinking, which are highly optimistic for long-range future, but quite dubious about prospects before fall of 1956 (see p. 11).

* * * *

The TV-radio-phono lines were exciting -- especially such new features as top touch tuning, remote control tuning, battery-powered phonographs (entirely transistorized) and a new line of radios in all colors.

Entrance into hearing aid field for first time was revealed. Transistorized unit is no bigger than a book of matches, weighs less than an ounce, is powered by mercury battery. Mass production starts soon -- challenging established firms such as Zenith, Sonotone, Beltone, et al.

Philco is going heavier than ever into radio, and its accessory div. plans a national "Radio Fix-It Roundup" in Sept., when consumers will be invited to bring their broken-down radios into service dealer for repair at cost of \$1 plus parts.

Further diversification moves include adding new line of Dexter automatic washers and dryers soon in some markets, and the production of electric blankets (at \$33, \$38 & \$45) promised last summer.

Biggest ad campaign in Philco's history will support merchandising drive -- \$15,000,000 to be spent on cooperative advertising during remainder of this year alone. Philco is said to have sold more merchandise to its distributors this week than at any convention in its history. It even arranged to expedite solutions of financing and credit problems by putting regional teams of experts into the field, instead of requiring distributors to deal directly with Philadelphia headquarters.

Altogether, there was a "winning team" air about the convention, which led one of the company's now-numerous young second-generation distributors to remark to us, "This is like attending a college pep rally."

* * * *

Emerson's distributor convention, on far more modest plane, heard promise from pres. Benjamin Abrams that distributor and dealer discounts will be increased on new line, got an engineering "preview" from exec. v.p. Dorman D. Israel of a TV set with 2 or 3 transistors now on company's drawing boards, were told details of new dealer finance plan by v.p. Sol W. Gross. Abrams also announced new policy of eliminating "95¢" list price tags, ending regional price differentials, establishing a single price on all cabinet finishes of same model (p. 12).

"The pricing of consumer products has been subjected to hundreds of surveys," said Abrams. "For some years it has been generally accepted that prices should end with 95 cents to attract consumer attention. We have examined this price structure carefully and, as result of many actual tests, we are convinced today that consumers are not fooled by such price-ends and the new Emerson price formula is realistic."

Israel confirmed that company will market "Tinkertoy" modular-design TV set early next year (Vol. 11:24) and defended use of "series string" chassis, saying that "despite a peculiar industry prejudice" Emerson has not had one case of "epidemic" failure among tubes strung out in "Christmas tree" fashion.

Essence of dealer finance plan is that factory, cooperating with Commercial Credit Corp. and local finance companies, will pay for "floor planning" for 120 days covering merchandise bought in July and 90 days for merchandise bought in Aug. Up to now, dealers have had to finance own inventories.

Brief highlights of other major trade developments this week:

* * * *

Tinkertoy: "Eight of the 12 leading TV manufacturers" have been working with ACF Electronics, Alexandria, Va. "in varying degrees" in experiments with modular design of TV sets (Vol. 11:23-24). This is confirmed by spokesman of ACF, which is manufacturing the tiny stacked "Compac" component packages (developed originally by Govt. under name of "Tinkertoy"). DuMont may be first to market a set with modular components, having obtained first rights to the automatically-produced components. Company has been working with ACF for 8 months, will offer first Tinkertoy set some time after Oct. if current tests are successful. Other TV set makers which have confirmed they're experimenting with Tinkertoy are Emerson, Motorola, CBS-Columbia, Capehart-Farnsworth; with exception of Emerson, none of these appears to have any immediate plans for use of the technique.

Merger Talk: "We expect to be doing business at the same old stand all the time," was Philco pres. James H. Carmine's brief answer to speculation about any possible mergers involving Philco. All sorts of rumors are currently rampant in the TV-radio-appliance trade, apparently growing out of general "atmosphere of merger" in the industrial economy and, more specifically, to the projected Whirlpool-Seeger consolidation still undergoing Dept. of Justice scrutiny, in which RCA would acquire 20% ownership with Sears Roebuck and possibly others, if approved (Vol. 11:22).

Fair Trade: Pennsylvania State Supreme Court upheld legality of state's fair trade act, sustaining a lower court decision in favor of GE in suit against retail store in Harrisburg. Effect of ruling is to forbid dealers from selling products at prices below those set forth in fair trade agreements. Contrary view of fair trade agreements was taken last week by Indiana Superior Court, which ruled that a price-fixing pact between Arvin and Indianapolis dealer was unconstitutional (Vol. 11:26).

Installment Credit: Commerce Dept. reports increase in consumer installment purchases in May for 4th straight month, due mainly to auto buying. Consumer credit on May 31 was at all-time high of \$31.568 billion, up \$900,000 from end of April and \$3.196 billion higher than May 31, 1954. Treasury Secy. Humphrey, commenting on the rise in installment credit in testimony before House Ways & Means Committee, warned: "We believe at this time of great prosperity that all of us -- Government, business and individuals alike -- should exercise self-restraint in the use of public or private credit and the accumulation of debt."

Production: TV output declined to 116,698 week ended June 24, down from 131,801 in preceding week but slightly up from 110,766 in week ended June 10. It was year's 25th week and brought production for year to date to about 3,625,000, compared to 2,950,000 in corresponding 1954 period. Official 5-month production was placed by RETMA at 3,238,820, up 41% from the 2,301,055 TVs produced in first 5 months of 1954. Radio production totaled 265,592 (127,382 auto) in week ended June 24, compared to 268,822 preceding week and 264,054 week before. For 5 months, radio production was 5,853,954, up 44% from 4,048,904 turned out first 5 months year ago.

COLOR SET PLANS; PHILCO'S PATENT WARNING: Set makers' preparations for color this fall, paralleling those of networks (see p. 2), were highlighted by 2 developments this week, both indicating accelerating interest in color for next season:

(1) Disclosure that RCA is supplying complete color chassis and facilities of its RCA Service Co. as temporary assistance to other set makers who are not yet prepared to handle complete job themselves.

(2) Philco's announcement that it will offer color sets this fall for first time, using RCA-type 3-gun color tube made by Sylvania, while continuing intensive work on its own 1-gun "Apple" tube -- at the same time stating that its patents are essential to manufacture of all color sets.

Two more set makers introduced color sets this week: Emerson, with full-door 2-speaker mahogany console, \$895; Sentinel, with mahogany console at \$895, oak \$925.

* * * *

"We are definitely not going into the private-label business," said Robert Seidel, RCA consumer products exec. v.p. in outlining company policy of supplying color chassis to other set makers. "As always," he said, "we are willing to do anything helpful to licensees who have problems and ask us for help. This is a temporary measure until they are prepared to take care of their own needs. At this stage, it's just not economical for everyone to tool up for special parts.

"We are offering the facilities of RCA Service Co. where there is no one else ready to handle color servicing. We did the same in black-&-white, and we believe it is for the good of everyone concerned."

Magnavox is the only company, so far, indicating that it is employing RCA chassis and service, though several stated they're considering similar arrangement.

RCA's emphasis on color receivers in recent field rep & distributor meetings (Vol. 11:24) was considerably greater than is commonly believed, Seidel said. He stated that theme of meetings was that there's same market for color sets as for Cadillacs and mink coats, and he noted: "It's easier to breed minks than to manufacture color tubes and receivers."

* * * *

Philco's position on color was given at distributor meeting in Miami Beach this week. Pres. James H. Carmine stated that Philco has delayed offering color sets until it was convinced that satisfactory chassis had been developed; that Philco engineers had designed such chassis and sets would be offered this fall at \$795 & \$895; that they'd employ 3-gun tubes, "using the CBS-Hytron developed curved mask," supplied by Sylvania.

Carmine was dubious about prospects for substantial sales because of high prices, declaring: "We are still of the opinion that color TV will not get underway and really off the ground quantity-wise until a low-cost tube is developed."

Philco's challenge to RCA's patent position on color was based on participation of its representatives in NTSC work on standards and its own laboratory developments. "We wish to put the industry on notice," he said, "that in our opinion they will require Philco patents to build any kind of a TV receiver as our patents issue through the Patent Office." Philco is the only set maker other than Zenith, which is in litigation with RCA, which has not renewed license agreement with RCA.

Carmine estimated only 20,000-30,000 color sets in use now, quoted RCA pres. Frank Folsom's early 1954 statement that "for balance of this year and next year it is estimated that 350,000 color sets will be produced and sold"; Mr. Seidel's statement 4 months later that 1955 color production would be 200,000 sets; Motorola's July 1954 statement that it alone would build and sell between 25,000-30,000.

"Whatever quantity was produced," he noted with sarcasm, "lies in the hands of the manufacturer, distributor and dealer." Though he saw color moving slowly this fall, possibly beginning to move perceptibly by last quarter 1956, he concluded: "Certainly color TV offers us all a gigantic opportunity -- for the future."

Then he did some guessing of his own on TV set sales -- more than 7,000,000 this year, 8,400,000 in 1956, 9,200,000 in 1958. But he hastened to assert "this increase will not result from color [but rather] from second sets and replacements."

Topics & Trends of TV Trade: Federal Trade Commission's long-awaited TV-radio trade practice rules, promulgated this week, aren't being accepted wholeheartedly by industry—even though it took 4 years of tortuous industry-wide hearings to hammer them out (Vol. 7:39, 8:19, 9:41, 10:23). In fact, some RETMA members are so agitated about a few key provisions that the organization's legal committee will meet with counsel Glen McDaniel July 6 at New York's Broad Street Club to consider possible appeal to FTC for revision.

Principal points of contention are FTC's rules requiring (1) disclosure in ads whether diagonal measurement of tube is used to describe screen size; (2) full and accurate disclosure of all cabinet finishes; (3) designation of rebuilt picture tubes as "seconds" or "rejects." In all 3 instances, some manufacturers contend FTC's rules go too far, ignore what have become standard industry practices. FTC itself apparently anticipated industry opposition, for it made those rules (Nos. 6, 9 & 12) effective in 6 months, whereas rest of rules go into effect Aug. 1.

NARDA managing director A. W. Bernsohn, on behalf of dealers, gave qualified endorsement to rules, though he contended that defining tube size on diagonal would "weaken the impact of advertising copy." He also thought sections prohibiting discriminatory advertising and promotional allowances might be difficult to enforce.

Rules themselves are not legally binding, merely codify FTC's interpretations of the Federal Trade Act. They depend on voluntary compliance within industry for their effect. FTC cannot issue a formal complaint against a company on basis of alleged violation of the rules. FTC has copies of rules available on request—or we'll be glad to get one for you.

Regulations on advertising of cabinet finish permit use of "mahogany" or "solid mahogany" only when that is actual finish and decree that cabinets whose finish is transferred by photographic process must be so advertised, and not represented as wood. On imperfect CR tubes, FTC stipulates that tubes whose defects have been corrected before being demonstrated to public can be sold as new but that rebuilt tubes which has been used in a set must be designated as "reject" or "second."

* * * *

Trade Miscellany: Exciting salesmen's incentive prize: Philco to offer round-the-world trip to 56 on chartered Pan American Airways plane, and brought the pretty stewardesses to Miami Beach convention to plug contest; also there were former Miss America, Philco's Bess Myerson, along with last year's winner and 3 of this year's entries to promote Philco sponsorship of next Atlantic City pageant . . . Another promotion: Set of 10 World Encyclopedias for \$5 to be given with every purchase of \$300 Philco TV—Philco, distributor & dealer splitting rest of cost (\$16.50); also a \$39.50 Webster's Dictionary for \$1.75 to go with TVs costing \$230 or more, distributor-dealer each paying \$2.85, Philco the rest . . . CBS-Columbia "Blue Tag Double Feature" promotion, running for 30 days starting July 5, gives consumer \$35 clock radio with each "Advanced 1600" TV set; distributor cost on TVs has been reduced to allow dealers to make gift without expense to themselves . . . Mitchell Mfg. Co., Chicago (Gene Tracey), mainly in air conditioning, out with new transistorized radio weighing less than 1 lb. and listing at \$49.95 . . . Recommended reading: Full text of speech by Stephen Masters, head of Masters Inc., biggest N. Y. discount house chain, at recent Advertising Federation of America convention; in June 27 *Advertising Age*, he blames advertising industry & fair trade for rise of discounters.

Private label sets accounted for 41% of Hallicrafters TV production in quarter ended May 31, 9-month financial statement reveals.

Emerson's new line, introduced to distributors this week at New York's Plaza Hotel, establishes (1) uniform prices throughout country, made possible by prepayment of freight by factory; (2) rounded dollar prices, eliminating traditional policy of ending prices in 95¢; (3) one price for all finishes of receivers. Line contains a 14-in. AC-DC "portable" wood-finish set in red, white or blue, at \$158; 17-in. table at \$128; 21-in. tables at \$148, \$198 & \$206; 21-in. consoles at \$194, \$208, \$246, \$264, \$294 & \$348; 24-in. tables at \$214 & \$258; 24-in. consoles at \$298, \$372 & \$378; 21-in. combinations at \$378 & \$498. Optional uhf tuners are \$10-\$30 extra. Radio line ranges from plastic table model at \$16 to plastic clock set at \$44. Emerson pres. Benjamin Abrams said company's first transistor radio, introduced in early May, weighing less than 1 lb. and priced at \$44 (Vol. 11:19), is its biggest seller, promised more transistorized radios will be marketed shortly. Also introduced were 9 phonographs, starting with 3-speed portable at \$28 and going up to company's first high-fidelity console at \$198.

Excise tax adjustment, pushed by RETMA, may be considered by House Ways & Means Committee July 6. Two identical bills, introduced in the House this week by Reps. Keogh (D-N. Y.) & Simpson (R-Pa.) would repeal 10% tax on chassis, speakers, amplifiers, power supply units, phono mechanisms, built-in antennas and other parts, and correct inequities in present excise tax setup as it applies to TV-radio. The bills are same as S-2009 (Vol. 11:21) introduced in May by Sens. Martin (R-Pa.) & Dirksen (R-Ill.). Same language was contained in House-passed tax bill which died when 83rd Congress ended last year (Vol. 10:34). Another tax bill introduced this week by Rep. Herlong (D-Fla.) would repeal excise tax on phonograph records.

Accreditation plan for TV servicemen, to enable set owners to identify technically competent servicemen and to permit technicians to upgrade themselves for proper recognition, is proposed by RETMA in 8-p. booklet issued this week. It's titled *Suggested Accreditation Program for TV Receiver Service Technicians*, available free from RETMA or from us. Certificates would be awarded servicemen who complete RETMA-approved training courses or pass tests given by local service advisory groups. To assist latter, RETMA has prepared sample examination on industry-recommended course, providing for demonstration of techniques as well as written material.

Indicative of crackdown on bait-switch ads, 4 owners of Atlantic Sewing Stores Inc., Brooklyn, were convicted in Special Sessions Court this week of fraudulent advertising on TV—first conviction of kind in N. Y. State. Kings County District Attorney Silver predicted it would have wide effect on future TV-radio advertising. Defendants face possible 3-year jail terms and \$500 fines.

Kaye-Halbert Corp. permitted to continue in business under amended Chapter XI plan calling for payment of 10% to unsecured creditors with claims dated prior to May 7, 1954 and issuance of 162,414 shares of common stock to current stockholders (Vol. 10:32, 11:23).

RCA awarded \$132,000 tax rebate by District of Columbia Tax Court, covering TV-radio sets sold to Washington dealers in 1949-51, on legal technicality that city had no right to collect franchise tax on merchandise sold by field reps not located in city.

Capehart-Farnsworth to introduce new TV-radio-phonograph line at meetings of regional sales mgrs. July 11-12 at Hotel Commodore, N. Y.; July 18-19 at Edgewater Beach Hotel, Chicago; July 23-29 at Ambassador, L. A.

Sentinel Radio's new line, introduced this week to distributors at Chicago's Edgewater Beach Hotel, ranges from \$150 for 17-in. mahogany table to \$400 for 21-in. full-door blonde console with top-front tuning.

PHILCO'S NEW LINE, redesigned and restyled throughout, is built around 3 different chassis—called "Golden Grid 330," "Micro-Grid 390," "Custom 440 Upright." It steps up from a 17-in. metal table model at \$160 to a 21-in. TV-radio-phono combination at \$460 to a 24-in. fruitwood console at \$500. Tuning at top front is featured, called "finger tip tuning," and in some models there is so-called "top touch tuning" which permits channel selection by means of a finger-controlled treadle bar that triggers a mechanism dialing channels sequentially. Remote control unit for latter costs \$10, and this is the gimmick that Philco will play up most heavily in its merchandising in behalf of step-up buying.

Featured again in line is plug-in uhf conversion (all-channel unit reduced from \$45 to \$30, new single-channel unit offered at \$15). New addition is wood-cabinet Telechron clock at \$20 to put on top of set to turn it on & off at pre-set times.

The 17-in. at \$160 is a metal table offered in ivory, coral, forest green or mahogany finish; with legs, in mahogany wood, it's \$180. Shown was another 17-in. model on legs, to be called "The Executive" and to sell at \$170; it's to be made for a pitch for office TVs.

Fifteen 21-in. table models, most on swivelettes, range from \$180 to \$310; 22 consoles range from \$250 to \$420; three combinations are \$440, \$450, \$460. Nine 24-in. sets start with ebony table at \$260, all rest being consoles that range from \$300 to \$500. Some upper-end models have doors; mahogany and blonde are the dominant woods, with a few walnut and one teak in black-&-gold.

The total of 48 models, if you add up Philco's model designations, is believed to be something of a record in TV—certainly for the last few years. The accent is on colors, notably in the picture framing. As an added merchandising fillip, Philco has press-button arrangement whereby a window shopper can control the Philco TV on display via the new plug-in remote control.

Thirteen phonographs were shown, to list from a portable at \$30 to table at \$160 to console at \$200. Cynosure of the exhibit was the much-publicized, battery-operated, all-transistorized portable phono, to sell at \$60 (one of which was given to each distributor at the convention). A slightly larger model that stores a dozen or more 45rpm records will sell for \$70. Three tiny transistors and a motor weighing less than 3 oz. power these sets, and it's claimed they can play 150 hours on 2 sets of ordinary flashlight batteries costing 50¢ in all. It's possible to step up player speed as batteries wear down. Whole thing with batteries weighs about 7 lbs.

One clock radio-phono is in the line at \$100, and there are 14 other radios ranging in price from \$20 to \$65, quite a few with clocks.

For the first time, too, Philco revealed it's going to make clock radios—6 models, unpriced—for sale through specialty stores, notably jewelers. These will be sold in minimum lots of 250 and go exclusively to one store or chain in an area, delivered direct to them but billed through the distributor. They're Philco-branded, won't bear any private labels, are entirely different in design from regular radio line.

—■—
Chester H. Lang, GE v.p. for public relations, onetime mgr. of its radio stations and recently supervisor of its remaining TV-radio outlets in Schenectady, retired June 30 after 30 years of service; he was tendered testimonial dinner at the Edison Club, and has indicated he may run for Congress for the seat being vacated by Rep. Kearney (R), of Gloversville. His GE duties have been taken over by Ray H. Luebke, v.p., gen. counsel & secy.

Trade Personals: Reese Lloyd promoted to v.p. in Philco TV div.; he will report to Fred Ogilby, div. v.p. & gen. mgr. who was absent from this week's Miami Beach convention because of illness, his duties being assumed by div. v.p. James M. Skinner Jr. . . . James Archambault, pres. of Dormeyer Corp. & Nick Malz, asst. to Dormeyer chairman in charge of production & research, named assts. to Webster-Chicago chairman H. R. Blash, whose stock was recently purchased by Chicago industrialist Titus Haffa, who controls Dormeyer (Vol. 11:25-26) . . . Frank Folsom, RCA pres., returned from European business trip July 1 . . . Clarence S. Tay, gen. mgr. of Admiral distributing branches, recovering after recent surgery at Evanston (Ill.) Hospital, where he'll be confined about 2 more weeks . . . P. S. Christaldi, mgr. of DuMont instrument div., named mgr. of new technical products div., combining instrument & communication products, with emphasis on automation equipment . . . M. N. Brooks named mgr. of materials, Westinghouse TV-radio div., succeeded as purchasing agent by M. A. Gardner, ex-American Machine & Foundry, CBS-Columbia & RCA . . . Donald Grey Wilson, chairman of U of Kansas electrical engineering dept., appointed asst. director of research, Stromberg-Carlson . . . George Deters promoted to Raytheon mgr. of equipment CR tube sales, headquartering in Franklin Park, Ill. . . . Hendrix Blue named Hallicrafters adv. mgr., replacing Raymond Bermond, resigned.

* * * *

DISTRIBUTOR NOTES: Raytheon appoints Georgia Distributors Inc., 754 Ponce de Leon Pl. NE, Atlanta (Harry Hurt, pres.); Hicks Distributing Co., 519 N. Olympia, New Orleans (Hicks L. Young, pres.); Banks-Miller Supply Co., 742 Third Ave., Huntington, W. Va. (Robert S. White, pres.) . . . Capehart-Farnsworth appoints Ball Television & Radio Service, Cleveland, as service rep . . . Times Appliance Co., N. Y. (Westinghouse) elects Victor D. Kniss as pres., succeeding E. B. Ingraham, retired . . . Krich-New Jersey Inc., Newark (RCA) appoints Mervin Marcus sales mgr. . . . Ward Terry & Co., Denver (RCA) promotes John Burns to mgr. of electronics sales, succeeded as mgr. of home instrument dept. by Joseph Wagner . . . Sues, Young & Brown Inc., Los Angeles (Zenith) appoints Joseph M. Smyth adv. & sales promotion director, succeeding Peter Frank, now mgr. of small appliances . . . Warren-Connolly Co. Inc., N. Y. (Motorola) reports resignation of adv. & sales promotion mgr. Ralph E. Strand, who joins Martin Miller Adv., N. Y. . . . Motorola appoints Erskine-Healy Appliances Inc., 420 St. Paul St., Rochester, N. Y. . . . Emerson-Midwest, Chicago, elects Ruben R. Schoenberg as pres., succeeding Charles Robbins, transferred to Jersey City headquarters.

Richard Hodgson, pres. of Chromatic TV Labs, Paramount Pictures Corp. subsidiary, joins Fairchild Camera & Instrument Co. as v.p.-mgr. of reconnaissance systems div. He has long been associated with Paramount's TV activities, helped organize Chromatic, which was formed to develop 1-gun color tube invented by Dr. Ernest O. Lawrence. Chromatic chairman Paul Raibourn says that Hodgson will remain on board for present; that there's no financial tieup between Paramount and Fairchild; that progress on Lawrence tube is "good" and Hodgson's departure won't affect development.

Malcolm A. Hoffmann, who worked on TV-radio anti-trust matters as special asst. to the Attorney General in Dept. of Justice anti-trust div., resigned as of July 1 to join N. Y. law firm of Rosenman, Goldmark, Colin & Kaye.

—■—
Paul L. Lewis, 58, ex-gen. mgr. of Motorola-New York Inc. & onetime appliance sales mgr. of GE Supply Co., N. Y., died June 23. He is survived by his wife, Mrs. Marilyn Lewis, and a daughter, Mrs. H. Ward Sutherland.

Financial & Trade Notes: Supplement to July *Fortune Magazine* is a 12-p. "Directory of the 500 Largest U. S. Industrial Corporations"—and included in what it calls a "unique and distinguished roster" (those with net sales of \$50,000,000 or more) are more than a score of TV-radio and related electronics manufacturers. Census Bureau's "mining & manufacturing" classification was used in tabulating the listing, which excludes financial, transportation, trade, construction & service companies.

The 500 "industrials" have been ranked according to total assets, profit before income taxes, net profit, number of stockholders & employes. We've culled the list and, with permission of Time Inc., reprint below a listing of the TV-radio-electronics & related firms. Note that they're ranked first by sales and that the rankings appear in each column in boldface type; note also that essentially service concerns (like NBC, CBS, AB-PT) are not included. Nor does the full Directory include corporations that do not publish sales figures.

It should also be noted that most of the firms we have selected out of the big list are engaged in pursuits other than TV-radio which are usually considerably larger than their TV-radio operations—e.g., top-rankers GE & Westinghouse. Aircraft firms heavily in electronics are not included. Reprints of the full supplement can be had from *Fortune*, Room 1430, 9 Rockefeller Plaza, New York 20, N. Y. at 25¢ each.

* * * *

National Telefilm Associates Inc., which recently marketed 312,500 shares of common stock at \$5 per share (Vol. 11:22, 25), has been approved for listing by the American Stock Exchange. Headed by Ely Landau, it distributes TV & theatrical films, has 900 stockholders, 650,000 shares of common outstanding.

In list of 110 "Blue Ribbon" stocks that have never shown a loss, compiled for its June 27 issue by United Business Service, Boston, only ones in electronics or directly related fields are AT&T & GE.

Jerrold Electronics Corp., maker of community antenna equipment and operator of community systems, issued first public stock offering this week—through group of 13 underwriters headed by Van Alstyne, Noel & Co. and Butcher & Sherrerd. Offer comprises \$2,750,000 in 6% convertible subordinated debentures due 1975 and 200,000 shares of common stock at \$4. Prospectus shows net of \$189,733 (after taxes of \$216,051 on sales of \$3,413,506) for year ended Feb. 28. For fiscal 1954 net was \$167,663 (taxes \$167,792, sales \$2,779,725); for 1953, net \$24,513 (taxes \$43,189, sales \$1,396,203; for 1952, net \$18,695 (taxes \$30,696, sales \$1,024,868); for 1951, net \$18,609 (taxes \$16,343, sales \$854,910). Funds obtained will be used to expand generally, with emphasis on construction and operation of community systems.

More officer & director stock transactions reported to SEC during May: Allen B. DuMont sold 1100 DuMont Class A common, now holds 37,600; C. E. Underwood sold 3900 Hoffman Electronics, holds 1000; H. C. Andrus sold 2000 Lear Inc., holds 1003; Charles M. Green sold 9990 Sperry Corp., holds 2400; Robert McKinney bought 2000 IT&T, holds 13,250; Harold I. Thorp sold 2000 Decca Records, holds 3000; Spyros Skouras bought 4240 20th Century-Fox, holds 10,000; George Y. Wheeler II received 5000 RCA as gift from mother (in June), holds 10,500; Thomas A. Kennally sold 3000 Philco, holds 6997; Cramer W. LaPierre bought 1695 GE, made gift of 100, holds 2398; Chauncey G. Suits bought 2070 GE, holds 2152.

Davega Stores Corp. had net loss of \$331,798 on sales of \$23,818,893 in fiscal year ended March 31 vs. loss of \$181,181 on \$24,749,084 in preceding fiscal year. Assets of \$5,501,078 and liabilities of \$2,773,585 were listed as of March 31 vs. \$5,359,562 & \$2,608,089 year earlier.

Collins Radio Co. has registered 75,000 shares of Class B common stock with SEC, representing part of holdings of Mrs. Arthur A. Collins individually and as trustee; Kidder, Peabody & Co. and White, Weld & Co. are underwriters.

TV-Radio-Electronics Rankings in The Fortune Directory Of the 500 Largest U. S. Industrial Corporations

RANK	COMPANY	SALES ¹ (\$000)	ASSETS (\$000)	PRE-TAX PROFIT ² (\$000)	NET PROFIT (\$000)	STOCKHOLDERS	EMPLOYEES ³

474	Arvin Industries	53,373	27,979	4,631	2,231	3,953	3,480

(Figures in heavy type are rankings.)

¹ Net sales for fiscal years ending Jan. 1, 1954, through Jan. 2, 1955, unless otherwise noted. Some companies report "gross operating income," "net billings," etc., rather than sales. All figures include sales of consolidated subsidiaries. ² Before federal, state and foreign income

taxes. ³ As reported. In some cases average employment for year, in some companies, year end. ⁴ AT&T owns 99.81 per cent of stock. ⁵ Parent of Crosley. ⁶ Now part of General Dynamics.

Electronics Reports: Three mergers in electronics fields were approved by stockholders this week and a fourth announced. Stockholders of General Dynamics Corp. and of Stromberg-Carlson overwhelmingly ratified merger into firm with combined annual sales of \$713,000,000 (Vol. 11:18). Holders of Stromberg-Carlson will receive one share of General Dynamics common for each share of Stromberg. Stromberg pres. Robert C. Tait will continue as head of Stromberg-Carlson div. and will become a senior v.p. of parent company. General Dynamics pres. John Jay Hopkins hailed the acquisition as "a major move in diversifying the corporation's base of operations in the electronic field."

Olympic Radio & Television Inc., Long Island City, and Victoreen Instrument Co., Cleveland, this week announced plans to merge into new firm called Nuclear Electronics Corp., with headquarters in New York. To be headed by David H. Cogan, former pres. of CBS-Columbia, Nuclear is also seeking to buy and develop other firms in electronic, appliance, nuclear & radiation fields. Three shares of Nuclear will be issued for every share of Olympic and every share of Victoreen. Nuclear has agreement to purchase the 137,332 shares of Olympic now held by Fox, Wells & Co., investment firm, for total of \$1,038,230.

Olympic and Victoreen will be operated as subsidiaries of Nuclear Electronics, which will sell new convertible debenture of \$2,500,000. Olympic's assets totaled \$6,061,607 May 31, while Victoreen's assets at end of 1954 were \$1,670,908. In addition to Cogan, officers of parent company will be: Olympic chairman Adolphe Juviler, chairman; Olympic pres. Morris W. Sobin, v.p.; Victoreen pres. C. W. Haller, v.p. Bruce A. & Lloyd H. Coffin, who formerly headed CBS-Hytron, are now on Victoreen board.

Approved by stockholders this week were acquisition of Automatic Mfg., Newark, by General Instrument Corp., Elizabeth, N. J. (Vol. 11:24-25) and purchase of assets of Alliance Mfg. Co., Alliance, O., by Consolidated Electronics Industries Corp., Waterbury, Conn. Automatic's outstanding 1500 shares are exchanged for 555,000 shares of General Instrument stock, with Automatic pres. Martin H. Benedek now chairman and chief executive officer of General Instrument. Automatic exec. v.p. Moses Shapiro assumes same post at General Instrument. Both make TV-radio-military components. Consolidated Electronics' purchase of Alliance, maker of antenna rotators, small motors, etc., marks accelerated pace of North American Philips—which controls Consolidated—in electronics and components business (Vol. 11:21).

Biggest electronics merger of them all—Remington Rand and Sperry Co.—went into effect July 1, creating huge new Sperry Rand Corp., with assets of about half-billion (Vol. 11:12,22). And Daystrom Inc., which recently acquired several electronic subsidiaries, has given top priority to acquisition of more electronics firms, pres. Thomas Roy Jones told stockholders meeting this week.

* * * *

Dynamics Corp. of America (formerly Claude Neon), parent of Standard Electronics and Reeves Instrument Co., reports for 5 months ended May 31, profits of \$634,568 (24¢ a share) on sales of \$17,609,626, compared to \$613,991 (23¢) on \$17,036,785 same period last year. Unfilled order backlog was estimated at more than \$50,000,000. Pres. David T. Bonner told stockholders meeting that "substantial progress is being made in the development of new products for both defense and industrial applications, particularly in the field of automation."

Joseph P. D'Arezzo, former chief of Army's special weapons & air defense div. of office of chief of research & development, appointed divisional v.p. of American Machine & Foundry Co. (AMF) defense products group, Alexandria, Va.

New TV Factbook—Pre-Print Orders

TELEVISION FACTBOOK No. 21, the Fall-Winter edition of the TV-electronics industries' first and most widely used and quoted "almanac," will be off the presses about Aug. 1—containing basic data on all U. S., Canadian and World TV stations and networks (including digests of station rate cards and complete rate cards of the networks); digests of all CPs outstanding and applications pending for new stations, with details on principals involved, facilities, etc.; all allocation tables brought up-to-date. All other departments are updated, too, such as the directories of the FCC, TV sales reps, program producers & distributors, set-&-tube manufacturers, radio attorneys, engineers & consultants, laboratories, etc. Also updated are TV-radio production figures, time sales and other statistical tables. Included with each *Factbook* is revised copy of our 43x29-in. Map of TV Cities and network interconnections, in color, suitable for framing. One copy of the *Factbook* goes to each of our full-service subscribers. Extra copies, if pre-print orders are placed for 20 or more, are \$1.50 each; single copies, \$4.00.

TV will be "keynote" of New York's Palace of Progress, permanent world's fair and merchandise mart to be built by realtors Webb & Knapp above Pennsylvania station, according to lead article by editor Abel Green in June 29 *Variety*. The 3,000,000-sq. ft. \$100,000,000 building to be designed by architects Pereira & Luckman and planned by Webb & Knapp pres. Wm. Zeckendorf and showman Billy Rose is slated for completion by 1959. Quoting the architects, Green reports: "This 4th dimension—the videal phase—has never been engineered into any office structure. Every area of every floor will be designed to serve as a TV setting for closed-circuit or commercial telecast." Among other features, entire building will be lighted for TV pickups and cable outlets for closed-circuit or off-air TV will be everywhere, with places set aside for giant-screen projection TV. Intention is to make the Palace a vast origination point for both live & filmed TV shows, with every conceivable kind of facility for both origination and reception. The squat 2-square-block 10-story structure is to be topped with a TV tower "as tall as the Empire State Bldg. tower" if aeronautical clearance can be obtained.

Expanding TV ownership, General Teleradio (General Tire & Rubber Co. subsidiary) seeks to purchase WEAT-TV (Ch. 12) & WEAT, W. Palm Beach for \$194,000, in application filed with FCC this week. General Teleradio now owns WOR-TV & WOR, New York; KHJ-TV & KHJ, Los Angeles; WNAC-TV & WNAC, Boston; WHBQ-TV & WHBQ, Memphis; 55% of uhf WGTH-TV, Hartford. Sellers are J. Robert Meachem and his wife, 70% owners, with agreement stipulating Meachem be retained as mgr. for 5 years at \$12,000 annually. March 31 WEAT-TV balance sheet shows \$43,316 deficit. Liabilities are \$214,387 current, \$29,759 long-term. Of \$440,850 assets, current are \$98,211, fixed \$278,411, intangible \$98,211.

Donn Bennett Productions Inc., 1507 Walnut St., Philadelphia, whose *The Big Idea* show has been sponsored live on WCAU-TV since 1948 by Philadelphia Savings Fund, marketed 100,000 shares at \$3 locally this week to acquire working capital for current film production (at RKO-Pathe Studio, N. Y.) of 13 half-hours for syndication. Show is based on new inventions, features the inventors.

Admiral has shipped to RCA, licensee of its automation apparatus, first section of an automation line for TV sets; it inserts resistors in printed circuit boards, goes into Indianapolis factory, will be followed by machines to insert wire jumpers, tube sockets, other components.

Network TV-Radio Billings

May 1955 and January-May 1955

(For April report see *Television Digest*, Vol. 11:23)

NETWORK RADIO picked up slightly in May, as against April—but it's still running considerably behind 1954. Network TV billings continued in May at high level, more than triple radio, with CBS-TV retaining strong lead over NBC-TV, ABC-TV holding steady, DuMont down to lowest in many years. The May PIB report shows \$33,500,554 combined network TV billings, bringing total for 5 months to \$165,539,107 vs. \$25,922,161 & \$125,477,346 for same 1954 period. The PIB report:

NETWORK TELEVISION

	May 1955	May 1954	Jan.-May 1955	Jan.-May 1954

* In order to maintain continuity and comparability with previously published data, an adjustment factor of 1.817 has been used by PIB in calculating gross network radio time charges for those nighttime network radio programs where ABC Rate Card No. 6 was in effect.

† Revised as of June 30, 1955.

Note: These figures do not represent actual revenues to the networks, which do not divulge their actual net dollar incomes. They're compiled by Publishers' Information Bureau on basis of one-time network rates, or before frequency or cash discounts, so in terms of dollars actually paid may be inflated by as much as 40%. However, they're generally accepted in the trade as an index.

Signs of the TV times: National advertisers now buying TV time, shows, talent, etc. at rate of \$841,000,000 a year, up 33% from 1954, according to TvB pres. Oliver Treyz. Spot is up one-third, network (PIB figures) about same. "In one year," said Treyz, "TV has leaped from the third to the first medium in national advertising expenditures." . . . Well-situated uhf seems to be sharing upgrading TV economy, for CBS's recently acquired WXIX, Milwaukee (Ch. 19) reports it will gross \$2,000,000 in first year, gen. mgr. Ed Bunker basing estimate on first quarter billings of \$502,000 . . . Storer's uhf WGBS-TV, Miami (Ch. 23), affiliated with NBC, in 4 months from Feb. 1 to May 31 boosted sales volume 390% over Jan. billings, reports mgr. Noran Kersta.

Tall tower progress: WAGA-TV, Atlanta (Ch. 5) reports its 1100-ft. tower will be ready "soon," calls it "the highest man-made structure south of the Empire State Bldg. and east of the Mississippi." Unique 1521-ft. Ideco "candelabra" tower to be used by KRLD-TV & WFAA-TV, Dallas (Vol. 10:14) has reached half-way mark, is due for completion Aug. 31; it will be second-highest of all, surpassed for the present only by 1572-ft. structure of KWTV, Oklahoma City.

DEFLYING MILITARY'S unwritten ban on high TV towers, FCC examiner Hugh B. Hutchison this week issued initial decision in favor of 1610-ft. tower for KSWs-TV, Roswell, N. M.—despite fact that the 3 military members of Washington Airspace Subcommittee had denied it aeronautical clearance (Vol. 11:11, 21). If Commission itself takes the unprecedented action of standing up to the Pentagon on the tower issue by finalizing the decision, the Armed Forces' power to block towers on principle of height alone will be crushed.

Examiner Hutchison's principal points: (1) Civilian members of Washington Airspace Subcommittee—and all members of regional subcommittee—endorsed new-tower proposal. (2) Tower at new location has been shown to be less of a hazard than current 790-ft. tower; local Air Force base had even agreed to pay \$12,000 to help remove it and had endorsed the new site. (3) Spokesmen for Defense Dept. and aviation associations had presented testimony consisting largely of "general statements and expressions of opinion concerning the impact of higher TV & radio antenna structures," with little evidence connected with the specific case.

Roswell tower, if constructed ahead of several other proposed high towers, would be—for a time at least—world's tallest man-made structure.

Subscription TV activity: (1) Deadline for additional formal comments on toll TV was extended by FCC this week from July 11 to Sept. 9, after all major parties requested delay (Vol. 11:26). (2) Engineer John V. L. Hogan, consultant to exhibitors' Joint Committee on Toll TV, wrote to *N. Y. Times* to state there's "no early prospect" of putting 2 TV programs on one channel, as proposed by International Telemeter (Vol. 11:24). (3) Emerson pres. Benjamin Abrams, reversing earlier stand, came out against pay-as-you-see TV, told his distributors it would reduce TV's appeal, cut sales. (4) Zenith continued to reap ill will of telecasters with his flashlight-photoelectric gimmick for cutting commercials out of sets. Latest Zenith publicity shows viewer "shooting" beer commercial, inspiring *Broadcasting-Telecasting Magazine* to editorialize: "To advocate the adoption of subscription TV is Zenith's right, but to advocate toll TV by maliciously defaming commercial TV betrays dangerous irresponsibility. What's more, it shows inane disregard for the system from which Zenith itself has been profiting handsomely."

Georgia's ex-Gov. E. D. Rivers is selling for \$90,000 his 60% of WOBS, Jacksonville (1-kw, 1360 kc) with CP for WOBS-TV (Ch. 30) to 20% owner Jim Macri, according to application filed this week. With no down payment, Macri is to pay 40 quarterly installments of \$2250 each. Rivers is now out of TV, having earlier this year sold CP for WCTV, Thomasville, Ga. (Ch. 6) to John H. Phipps (Vol. 11:5, 20) and having last year sold CP for WMIE-TV, Miami (Ch. 27) to Storer, now operated on Ch. 23 as WGMS-TV (Vol. 10:51). This week Rivers filed application to acquire WWPB, Palm Beach, from Chas. E. Davis for \$185,000. He already controls WMIE, Miami & WGAA, Cedartown, Ga. Macri's other holdings are 40% of WABR, Winter Park, Fla., TV applicant for Ch. 18 in Orlando, and minority interest in WMIE, Miami.

The \$40,000 sale of WMFJ, Daytona Beach, Fla. was approved by FCC this week, seller W. Wright Esch retaining CP for WESH-TV (Ch. 2), planning start this month. Purchasers are Harold Kaye & Emil J. Arnold, each owning 25% of WORC, Worcester, Mass. Seeking to block sale in Florida courts are Ted Granik and Wm. Cook, who charge that Esch broke contract to sell station and CP to them (Vol. 11:25). They're major stockholders in WJNO-TV, Palm Beach (Ch. 5).

Recent power increases: KTBC-TV, Austin, Tex. (Ch. 7) to 245-kw ERP; CBOT, Ottawa (Ch. 4) to 50-kw.

SUMMARY-INDEX OF THE WEEK'S NEWS—July 9, 1955

NO DEINTERMIXTURE DECISION until Sept., Hyde urging reappraisal of allocations to equalize competition; CBS buys WGTH-TV, Hartford, as 2nd uhf (p. 1).

BIG TV CENTER in N. Y. suburbs proposed for all networks as city & state officials fear move of more live as well as film shows to Hollywood (p. 2).

COMMUNITY ANTENNA DIRECTORY of Factbook to list details of 392 systems serving 250,000-300,000 homes and more than 1,000,000 viewers (p. 3).

COLOR PLANS OF APPLICANT considered strong factor as examiner Elizabeth Smith chooses Times-Picayune over WWL & WNOE for New Orleans' Ch. 4 (p. 5).

TV TAPE NEARER commercial use as Bing Crosby Enterprises shows much improved color recorder, says \$50,000 unit will be ready in a year (p. 6).

RECORD TV TRADE YEAR foreshadowed by 6-month statistics showing production & sales well ahead of 1954; economic barometers zooming (p. 8).

ELECTRONICS END EQUIPMENT: Nearly \$6.6 billion sales by 509 firms last year; same companies predict more than \$7 billion for '55 in Navy survey (p. 11).

49th UHF OFF AIR: WNET, Providence, quits and asks FCC to permit pay-TV on uhf, to force network service; notes on upcoming stations (p. 6).

FARM TV SET COUNT being tabulated by U.S. Census Bureau county-by-county; first totals show TVs on 52% of N. H. farms, 38% of Vt., 9% of Nev. (p. 12).

ARMED FORCES TV SERVICE opens new stations in Arabia and Bermuda, looks into subscription TV decoders and wired systems to meet objections by Guam AM (p. 12).

FCC WEIGHS ALLOCATIONS; CBS BUYS 2nd UHF: Don't expect FCC action on deintermixture before Sept. -- Chairman McConnaughey says it's a "physical impossibility" because of vacations. But when the action does come, it may well be just one phase of the most serious reappraisal of TV allocations by the FCC since the freeze -- with prospects of change much greater than ever before.

Strong impetus to reconsideration of allocations picture was given this week when Comr. Hyde urged his colleagues to initiate a "study". "In light of experience," he says, "a study should be made to see how the allocations system has failed to anticipate economic problems."

Hyde has no fixed opinion on precisely what changes should be made, but he clearly feels that along with deintermixture, serious consideration must be given to change in vhf standards to permit more vhf stations -- to be properly distributed.

"Deintermixture can work both ways," Hyde points out. "You can keep uhf islands and you can add vhf to cities with too few vhf stations." He feels that study should weigh reduction in mileage separations, changes in powers & heights, use of directional antennas, etc.

"I don't advocate any freeze," he says, "but I think we should know what direction we're going. And I'm not foolish enough to think that you can take an eraser and start all over again. We've got to use the engineering techniques we have to improve network and station competition." He's thinking primarily of working with present vhf & uhf channels rather than seeking additional vhf spectrum.

Since Hyde was an architect of the present allocation plan -- he and Webster being the only holdovers from Commission that created the plan -- his proposal this week assumes more than incidental significance. Add to that the fact that at least 2 other commissioners, Bartley & Lee, have long urged that allocations plan must be overhauled; add to that the high-level engineering study being conducted by Senate Commerce Committee's ad hoc group (Vol. 11:26) -- and it's evident that there is a strong possibility that corrective efforts will be made.

Yet a change is not a certainty, for Commission is naturally fearful of losing more than it might gain. It feels that despite ills of uhf, TV industry is ren-

dering an enormously effective public service and is prosperous on an over-all basis -- though more stations and networks would be desirable.

Whole business is incredibly complex -- much more difficult than building the allocation in the first place. It's tightly bound to network affiliation pattern, for example. It's almost axiomatic that CBS or NBC affiliation in a large market is a guarantee of success for vhf or uhf stations -- intermixed or not.

CBS announced purchase of uhf WGTH-TV, Hartford, Conn. (Ch. 18) this week from General Teleradio-Hartford Times (Gannett) for undisclosed amount, hailing the purchase as "further proof of the network's confidence in uhf."

Assured of its own programs, CBS needn't give a hoot whether FCC deintermixes Ch. 3 out of the city or not. With NBC buying uhf WKNB-TV, New Britain, Hartford's Ch. 3 certainly has lost much luster for competitors WTIC and Hartford Telecasting (Harry Butcher), who await final action on examiner's initial decision favoring WTIC. Along same line, note booming billings of CBS's uhf WXIX, Milwaukee -- substantially in the black and doing business at \$2,000,000-a-year rate (Vol. 11:27).

* * * *

Commission isn't anxious to tamper with affiliation setup, either. Congress is expected to give FCC \$80,000 for a network study, but this sum is generally considered too small to produce definitive answers.

Commission's ultimate action on allocations and network-station relationships will depend greatly on pressures from Congress and climate of industry. Not too many months ago, it was summarily rejecting any change of policy. Now, it's prepared to entertain ideas, at any rate -- something that started when McConaughy first told Congress that FCC would take "a second look" at deintermixture.

Feeling at Commission is that root of uhf problem is error in allocations -- not network or receiver manufacturer practices. Generally, it's believed that normal business prudence and competition have dictated their actions. An example of manufacturer's attitude toward uhf was this statement by Philco v.p. James M. Skinner, at last week's distributor convention (Vol. 11:27):

"At the present time, it does not appear that any remedial action by the Govt. or anyone else is imminent, and therefore it is our opinion that the volume and scope of uhf broadcasting will be rather uncertain for at least the balance of the fall season...For the long pull, however, it appears to us that the future of uhf is pretty bright, for out of all the investigations taking place in Washington will undoubtedly come some plan or program which will encourage this type of broadcasting in the years to come." In meantime, Philco will continue policy of making receivers to which uhf tuners may be added easily in the field.

THE HEGIRA TO HOLLYWOOD WORRIES N.Y.: Their New York "housing problem" is a common headache for the TV network moguls -- and all sorts of panaceas are being talked about. City officials and even Gov. Harriman have interested themselves, too, very much concerned lest many more TV shows, live as well as film, gravitate to Hollywood. Their hope is to get the networks to agree upon one big Television Center in or near the city. But competition, personalities and present realty holdings being what they are, that hope right now would seem to be far from any prospect of fulfillment. The problem basically seems to resolve itself into this question:

Should a combination TV-radio-cultural center be built in Manhattan -- or, either as a combined or individual effort, should there be a Television City in an easily accessible suburb? Variety's Abel Green, whose contacts are top level, this week learned that City Construction Coordinator Robert Moses has suggested to Messrs. Sarnoff & Paley that they acquire Deepdale Golf Course in Great Neck, L.I. -- but that CBS has been surveying and testing sites near Idlewild Airport.

Networks must eventually get out of Manhattan, it's generally agreed, because of necessity for "horizontal" construction for TV production, props, etc. (not to mention parking). Gov. Harriman and Mayor Wagner have also offered to assist any centralization project, which might or might not include more film-making in N.Y.

But N.Y. has long way to go to catch up with Hollywood so far as filming is concerned, conceding its dominance as the theatre capital and originating point for

live TV programming. New York Times' Jack Gould, just back from Hollywood assignment, says 250 firms are now engaged in TV filming, their annual business representing some 3000 hours costing \$100,000,000, as against a turnout of 200 full-length theatrical films next year (300 hours) costing about \$350,000,000.

Filming in Hollywood by and for the networks, Gould reports, will total 597 hours for ABC next fall, 552 for CBS, 325 for NBC. Both ABC & NBC, moreover, are reported in position to begin their own film producing in Hollywood, hitherto proscribed by union jurisdictions.

What worries the N.Y. fathers is that NBC has 696 hours of live shows also scheduled out of Hollywood next season, CBS 520 hours, ABC 78. Networks will still produce more out of N.Y., center of the advertising business, but they're terribly cramped for space: CBS uses 19 different locations, NBC 16, including theatres, for audience shows. Only this week CBS arranged to add old Edison Studio in the Bronx for a new production; it's now known as Bedford Park Film Studio, was opened by the great inventor in 1904, used by D.W. Griffith for some of his early thrillers, has been rented for such shows as "You Are There" and "Men Against Crime."

ABC alone is reasonably well centralized in its 66th St. quarters. In fact, it owns whole block between 66th & 67th Sts. and Central Park West & Columbus Ave. As for DuMont, it has excellent modern quarters on 67th St. -- but it cuts little or no ice any more as a live network and isn't sure yet whether its new Electronicam system of simultaneously filming live shows (among them, Jackie Gleason's) should continue on a custom-job basis or for its own syndication.

Note: Latest Directory of Program Sources & Services, prepared for our upcoming TV Factbook No. 21 lists some 900 producers & distributors of film & live programs and/or services of various kinds related to programming.

VITAL STATISTICS OF COMMUNITY TV SYSTEMS: Most complete directory of community antenna systems compiled to date will be included in our new Fall-Winter TV Factbook, to be delivered to subscribers next month. Returns on our questionnaires have been excellent, and analyzing galley proofs, we come up with these figures & estimates:

(1) Now in operation -- 392 systems vs. 302 six months ago (Vol. 10:52).

(2) Average number of subscribers -- 772 vs. 740.

(3) Total homes served -- 250,000-300,000 vs. 150,000-175,000 -- reaching well over 1,000,000 viewers.

(4) Circulation of 1000-2000 is reported by 38 operators, 2000-3000 by 10, 3000 or more by 10. One claims 10,150.

(5) Pennsylvania remains prime CATV country, having 84 systems averaging 1260 subscribers each -- for total of more than 105,000 homes in that state alone. Pennsylvania is also the most mature in terms of community TV, most of its operations being several years old.

West Virginia has shown similar growth pattern, except that towns are smaller; it has 38 systems. Unless boosters & satellites or something else comes up to hamper systems' development, Washington and Oregon might well surpass the other states before long -- albeit many of their systems are very small. Factbook will show that Washington has 26 systems, Oregon 15.

Note: Armed Forces TV stations, while serving commercially insignificant total of viewers (estimated 75,000-100,000), continue to pop up around the world -- the latest being ZBK-TV, Kindly Air Force Base, Bermuda, which began July 4 (see p. 12).

Quiet week in subscription TV--incredibly: (1) Exhibitors continue to line up labor groups, getting Albany musician's local and Memphis CIO Council to resolve against pay-as-you-see. (2) At least 2 major magazines plan articles on subject--Milton Lehman working one up for *Saturday Evening Post*, Bill Davidson for *Colliers*. (3) Dealer spokesman Mort Farr, chairman of NARDA, took strong stand against toll TV in his column in July *Electrical Merchandising*, said it would be expensive, exclusive, confusing--and kill set sales.

Receivership was asked this week in Wichita Federal court for KEDD (Ch. 16), NBC affiliate represented by Petry--MCA-TV and Atlantic Television Corp. claiming \$5200 & \$1400 in unpaid bills, respectively. Managed by Stanley H. Durwood, of the Missouri theatre chain family, who owns 85%, with *Wichita Beacon* owning 5%, station started in Aug. 1953, claims virtually 100% conversion. At present, vhf service comes from local KAKE-TV (Ch. 10) and KTVH, Hutchinson (Ch. 12), with KARD-TV, Wichita (Ch. 3) due on air in fall.

Personal Notes: John L. McQuigg, ex-Lennen & Newell exec. v.p., named mgr. of J. Walter Thompson's Detroit office, succeeding Norman H. Strouse, new pres. of agency . . . Charles H. Philips, ex-WOR-TV sales mgr., named mgr. of new Petry sales development dept., reporting to v.p.-gen. mgr. Thomas F. Knode . . . Edward L. Cossman promoted to sales director of WATV & WAAT, Newark, assuming duties of v.p. Bertram Lebharr Jr., resigned; Sydney Kavaleer promoted to TV sales mgr. . . . John H. White named TV mgr. of CBS Spot Sales, San Francisco, succeeding MacLean Chandler . . . Eugene Litt resigns as N. Y. sales mgr. of Forjoe-TV rep firm to join NBC . . . T. Gordon Ferris elected pres. & gen. mgr., Radio Representatives Ltd., Toronto . . . Shelby Storck resigns as gen. mgr. of educational KETC, St. Louis . . . Robert M. Reuschle, ex-Young & Rubicam and McCann-Erickson, named sales mgr., WLAC-TV, Nashville . . . John H. Eckstein named asst. to ABC director of adv., promotion & publicity; Jack Fields named chief of exploitation unit; Adolph L. Seton asst. mgr. of publicity . . . Gerry Martin resigns as DuMont sales director . . . Merrill (Red) Mueller appointed NBC Mediterranean news director with headquarters in Rome . . . John H. Bachem, DuMont gen. mgr., adds duties of supervisor of Electronicam filming . . . H. G. Walker, CBC director of network coordination, named asst. network director for Ontario, headquartering in Toronto . . . Wm. H. Weintraub Jr., ex-TV-radio production mgr., Wm. H. Weintraub & Co., joins Mutual as program sales mgr. . . . Maurice E. McMurray, WJBK-TV national sales mgr., July 18 transfers his base of operations to Storer N. Y. offices . . . Marvin L. Rosene, gen. sales mgr. of KSTP-TV & KSTP, elected sales v.p. . . . Wm. H. Tankersley promoted to CBS-TV director of editing, Hollywood.

* * * *

FCC people: Florida Democrat Richard A. Mack, sworn in as commissioner July 7, plans to start work July 13, family moving up several months later . . . Edwin L. White, chief of Safety & Special Radio Services Bureau, retires July 31, moving to St. Petersburg, Fla. and establishing consulting practice. In some quarters, there's move underway to shift Curtis B. Plummer, chief of Broadcast Bureau, to position vacated by White; rumored as possible successors to Plummer are Christian E. Rogers, engineering asst. to Chairman McConnaughey, and John Fitzgerald, chief of Office of Opinions and Review . . . Mary O'Leson, veteran information office specialist, retires Sept. 30, to be succeeded by Miss Murle Edwards, who joined staff this week; Salina M. Lindo promoted to asst. chief of information office, headed by George O. Gillingham.

New officers of AM-PAR Record Corp., new phonograph record subsidiary of American Broadcasting-Paramount Theatres: pres., Samuel H. Clark; v.p., Harry Levine; secy., Edith Schaeffer; treas., Simon B. Siegel; asst. treas., Harry J. Wright. All officers, plus AB-PT pres. Leonard H. Goldenson & v.p. Robert H. O'Brien, are directors of new subsidiary.

Testimonial dinner for retiring FCC Comr. Frieda B. Henneck will be given at Washington's Shoreham Hotel July 20. List of sponsors is headed by former President Truman, includes all members of FCC.

John U. Reber, 62, J. Walter Thompson v.p., who headed its original radio dept. and has taken a leading part in its TV accounts, died July 3 after a heart attack. He is survived by his wife, 3 sons, one daughter; son John H. Reber is NBC-TV spot sales director.

Mrs. Eva Emily Crosley, 43, wife of Powell Crosley Jr., owner of Cincinnati Redlegs and formerly identified with ownership of WLW, died July 3 of cancer.

Cherry & Webb's WPRO-TV, Providence (Ch. 12) will come under new corporation, in which big dept. store chain retains 55%, under arrangement whereby local WHIM (1-kw, 1110 kc) is being sold for \$469,000 to Headley-Reed's Frank W. Miller. In application filed with FCC this week, it's revealed AM sale is designed to clear way for sellers Robt. T. Engles & C. Geo. Taylor (12½% each) to acquire 13% of the TV station. Other WHIM sellers, Harry H. Thomson & Theodora T. Kluge (35% each) are not involved in TV setup. Options to Engles & Taylor were agreed upon when they withdrew rival application for Ch. 12, permitting WPRO-TV to get started. Option on another 25% of new WPRO-TV corporation is held by Hope Bestg. Corp., headed by General Teleradio's John B. Poor, which also pulled out of Ch. 12 contest.

CP for WAGE-TV, Marquette, Mich. (Ch. 6) is being transferred to local radio WDMJ, subsidiary of *Marquette Mining Journal*; published by Frank J. Russell, who also controls WMIQ and *Iron Mountain News*, Iron Mountain, Mich. Sill also resigns as gen. mgr. of WMIL, Milwaukee, selling his 25% interest in that station and returning East. Marquette TV, originally planned for mid-July start, will be delayed until new transmitter site can be located and new equipment ordered. Sill has owned 67%, Herbert Herzberg 33%, and they're getting \$20,000 for their interest.

J. Elroy McCaw has purchased Eugene O'Fallon's pre-freeze KFEL-TV (Ch. 2) for \$400,000 plus assumption of approximately same amount of liabilities—and application for transfer will be filed next week. At one time or other on all networks, KFEL-TV is now operated as independent, and McCaw, who has similar situation with his KVTW, Tacoma (Ch. 13), thinks he can operate it profitably under same formula (Vol. 11:25). McCaw owns 25% of KONA, Honolulu (Ch. 11) and half of WINS, N. Y. and has interests in 4 other radio stations.

More than 100 theatres will carry closed-circuit telecast of Sept. 20 Marciano-Moore heavyweight title bout, says Theatre Network TV pres. Nathan L. Halpern, who added that delivery of 57 mobile projection units was completed this week by General Precision Laboratory, and all will be available for leasing to exhibitors for the fight. Of the portable units, 27 are capable of throwing image on screen up to 50x65-ft., rest being limited to 15x20-ft.

Feud in Phoenix between newspapers and its 4 TV-radio stations has resulted in the dropping of TV-radio columns (but not logs) from city's 2 daily papers (E. F. Pulliam, publisher). It started with editorial attack on stations for their treatment of "unfounded" storm-warning weather bulletin, evening newspaper charging TV-radio stations lack news judgment. Stations demanded retraction, didn't get it.

NARTB's TV dept. has published folder containing texts of recent convention's management conference addresses by Dr. Allen B. DuMont, ABC pres. Robt. Kintner, WBAP-TV's Harold Hough, ex-code chairman John E. Fetzer, NBC pres. Pat Weaver, CBS pres. Frank Stanton—available on request.

Educational TV: CBS-TV distributing 16mm films of its *You Are There* (sponsored by Prudential & local electric companies) and *The Search* (sustaining) to schools, libraries & local community groups for non-theatrical & non-broadcast use this fall. Distribution agreement was signed with Young America Films Inc.

San Francisco's educational KQED (Ch. 9) will remain on the air for next 6 months at least, having raised more than the \$65,000 goal it set for itself last month as minimum for survival (Vo. 11:25,27). Gifts came from nearly all commercial stations and newspapers in area.

COLOR WAS MAJOR FACTOR in a competitive hearing for first time, when examiner Elizabeth C. Smith recommended grant of New Orleans' Ch. 4 to WTPS-*Times-Picayune* over WWL (Loyola U). She turned down ex-Gov. James A. Noe's WNOE for lack of finances, said it wasn't in the running with other 2.

Examiner Smith found WWL and WTPS about equal in almost everything. "The deciding factor," she said, "is the fact that *Times-Picayune* merits preference on 2 important facets of proposed programming, namely, regularly scheduled programs of particular interest to residents of outlying communities located within the area to be served; and regularly scheduled color TV programs."

Color schedule proposed by *Times-Picayune*: 16 hours live and 1½ hours of film weekly, plus 21 hours of monochrome programs which will include color clips and slides.

On newspaper issue, Miss Smith credited paper with "long record of service to the community," said this about balances WWL's substantial contributions.

* * * *

Obeying Court of Appeals' mandate in famous Clarksburg case (Vol. 11:25), Commission this week ordered effectiveness of CP for WBLK-TV (Ch. 12) to be postponed and ordered a hearing to cover all the points court said should be covered.

In allocations, substitution of Ch. 11 in Houma, La. for Ch. 30 was requested by Fred Weber, a principal of WHTN-TV, Huntington, W.Va. (Ch. 13) due on air this fall, and pres. of defunct uhf WFPG-TV, Atlantic City.

Also requested was commercialization of educational

Ch. 3 in College Station, Tex., to be replaced by Ch. 48 or Ch. 54. Filing petition was John M. Lawrence III, for himself and as trustee for group of local businessmen.

* * * *

Modification of "protest" section of Communications Act seems likely to be approved by Congress, following hearing this week before Senate communications subcommittee which heard same testimony as House subcommittee 2 weeks ago (Vol. 11:26). House Commerce Committee has already approved bill (HR-5614), adding 2 minor amendments proposed by Federal Communications Bar Assn. and approved by FCC Chairman McConaughy. Principal opponent of the bill (Senate version is S-1648), attorney Benedict Cottone representing UHF Industry Coordinating Committee, dropped some of his opposition this week, said he would favor measure if it contained stronger limitations on FCC power to reject stays of CPs.

Subcommittee's alert and outspoken Chairman Pastore (D-R.I.), while indicating he generally favored the legislation, took the opportunity to express his opinions on what he thinks should be in the bill and on several other FCC matters. As to stays of grants, he said he'd like to devise "some quick procedure or trusteeship operation" whereby station would remain on air despite a stay. He also observed that it would be helpful if the bill spelled out "the particular grounds" on which FCC will grant a stay. He said that whenever possible hearings on protests should be held before grants are made—a suggestion strongly endorsed by Cottone. Pastore was particularly interested in subject of quick grants resulting from mergers of competing applicants, suggested that hearing be required in all mergers, so "public would know all the facts, why they got together."

Telecasting Notes: "Jesse James rides again," says authoritative and alert *Advertising Age* in scorching editorial indicting mushrooming free-plug practice in TV. "Advertisers pay a handsome sum for time and talent for nighttime TV. They are allowed 3 minutes for a half-hour show and 6 minutes for an hour show to sell their product. That is, if they pay for the time. If they don't pay for the time, but instead hire a grubby little agent, they get unlimited plugs on any number of shows for a nominal fee. These are the leeches and blood-suckers of our business" . . . Movie plugs are hit hardest: "The greatest of the leeches are the motion picture experts. It is remarkable what a bill of goods these high-powered press agents have sold the innocent and obviously inexperienced networks and producers and uncomplaining lambs representing agencies and advertisers. In exchange for a 6-min. plug for stars and vehicles, the motion picture industry this fall is going to 'give'—for a large amount of money—a program using a portion of a picture or the services of a contract star. [Is] it a nefarious plot on the part of the film people to force the public to get so exasperated with excess of commercials—legitimate and free—that they will yell for pay TV?" . . . Free plugs for magazines and airlines also are given a resounding editorial thwack—and *Advertising Age* ends by pleading with networks to "stop this evil practice" by "'going to black' when the unwanted visitor tries to climb aboard" . . . Tremendous publicity breaks being enjoyed every week by Revlon's *The \$64,000 Question* on CBS-TV, Tue. 10-10:30 p.m. Comparatively low-budgeted show may well bring back the giveaway, reminiscent as it is of the publicity harvest reaped by radio's *Stop the Music*, "Miss Hush" contest, etc. Contestants obviously are carefully selected, not only for their general knowledge but with a sharp eye to entertainment and news values. Examples: the cop who turned out to be an expert on Shakespeare, the grandmotherly Bible authority, the pretty 3rd grade schoolteacher who

knows everything there is to know about people named Sam . . . First packaged spectacular: Producers Walter Fried & Henry Newman sign Lena Horne to star in 90-min. TV adaptation of Offenbach's *La Belle Helene*. They'll try to peddle show to a network . . . New use for played-out feature films: Associated Artists sets up subsidiary, The 199 Corp., headed by Art Kalman, to sell stations permanent rights to 199 old Monogram features which have been available to TV stations for 6 years. Among uses for the library suggested by Kalman: cut them into half-hour or 15-min. shows, use footage for background on local live shows, cut pieces out of them for stock shot library . . . Special 90-min. opening of Disneyland park July 17, 7:30-9 p.m. on ABC-TV will use 24 live cameras, 63 engineers & technicians . . . J. Arthur Rank seeking TV bids on package of 33 features, including such boxoffice hits as *Kind Hearts & Coronets*, *Red Shoes*, *Caesar & Cleopatra*, *Odd Man Out*, *Seventh Veil* . . . Harold Lloyd planning to offer some of his old comedies to TV . . . Lucy goes British: CBS-TV Film Sales has sold *I Love Lucy* to Associated Broadcasting Development Co. for Britain's upcoming commercial TV . . . Alex Segal, ace producer-director who recently left ABC-TV, struck pay dirt this week with (1) NBC-TV contract, expected to include production of several spectaculars, (2) pact to direct 2 MGM pictures based on *U. S. Steel Hour* shows he directed on TV—"The Rack" and "Fearful Decision"—at a reported \$55,000 per picture . . . "You can't hardly get them No. 1 ratings no more": Newcomer to Nielsen's top spot is *George Gobel Show* with 41.4 rating for June; *Jackie Gleason* 2nd with 40.3, *Lucy* 39.7, *Ford Theatre* 37.4, *Disneyland* 37.3. ARB ratings for June give No. 1 spot to *Lucy* with 45 . . . One-shot *Wide World* (NBC-TV) won 31.9 Trendex . . . Orson Welles signed by CBS-TV to direct and star in series of 90-min. color programs this fall based on "contemporary and classical plays and novels"; *Tribby*, with Welles as Svengali, may be first.

Network Accounts: All networks want AT&T's first regular TV sponsorship—NBC pitching with its *Wide, Wide World*, CBS showing its wares Sun., July 17, 5:30-6 p.m., when it puts on *Let's Take a Trip*, visiting Bell System's Long Lines Dept. to show how the nation's and world's phones are interconnected, how teletypewriter exchange service works, how private lines operate, how TV-radio intercity programs are handled. C. E. Wideberg, gen. mgr., Long Lines Dept. eastern area, will act as guide for Sonny Fox, Ginger MacManus & Pud Flanagan, as CBS's traveling threesome . . . NBC-TV schedules more than 75 "mammoth one-shot programs and spectaculars" this fall—both color and black-&-white. Among them are 20-30 "telementaries," including *1976*, live show on life in 1976, *Rise & Fall of a Dictator*, as depicted in German films of Hitler. Also included are original musicals, operettas, outstanding motion pictures, operas & ballet. The 39 90-min. color "spectaculars" will be sponsored on Sat. (9-10:30 p.m.) by Oldsmobile; on Mon. (8-9:30 p.m.) by RCA & Ford; on Sun. by partic. sponsors, with 22 of 26 available partic. already signed (Vol. 11:27) . . . Jackie Gleason signs 3-year DuMont contract for Electronicam filming, starting Aug. 16, of Buick-sponsored *Honeymooners* series, which debuts Oct. 1 on CBS-TV Sat. 8:30-9 p.m. . . . Dromedary Co. (cake mix) buys 15 min. alt. weeks of *Tennessee Ernie* on NBC-TV starting Aug. 3, Mon.-thru-Fri. 12-12:30 p.m., and *World of Mr. Sweeney* on NBC-TV, Mon.-thru-Fri. 4:30-4:45 p.m., thru Ted Bates & Co. . . . Pharmaceuticals Inc. to sponsor *Life Begins at 80* on ABC-TV starting July 31, Sun. 9:30-10 p.m., will sponsor *Ted Mack's Amateur Hour* in that time period starting Oct. 30, when *Life* moves to another time, thru Edward Kletter & Assoc. . . . Sheaffer Pen Co. to be alt. sponsor (with Old Golds) of Herb Shriner's *Two for the Money* on CBS-TV starting July 9, Sat. 9-9:30 p.m., thru Russel M. Seeds Co.

Rate increases: KRCA, Los Angeles, adds new Class AA hour (7:30-10:30 p.m. Mon.-Sat. & 5-10:30 p.m. Sun.) at \$3600, 20 sec. (7:30-10:30 Mon.-Sat. & 6-10:30 p.m. Sun.) at \$650, Class A hour remaining \$3200. Aug. 1 WGAL-TV, Lancaster, adds Class AA hours (8-10 p.m. daily) at \$1200, min. at \$240, Class A hour going from \$900 to \$1000. July 15 WAVE-TV, Louisville, raises base hour from \$850 to \$950, min. \$170 to \$190. Also July 15 WTAR-TV, Norfolk, adds Class AA hour (7-10 p.m. daily) at \$875, 20 sec. at \$175, Class A remaining \$800. WLWA, Atlanta, raises base hour from \$700 to \$800, 20 sec. \$90 to \$130; KXLY-TV, Spokane, hour from \$490 to \$525, min. \$95 to \$105; KSBW-TV, Salinas-Monterey, from \$300 to \$350 & \$60 to \$75; WFIE, Evansville, Ind. from \$250 to \$300 & \$50 to \$60; KTIV, Sioux City, Ia. from \$250 to \$300 & \$50 to \$60; WTVY, Dothan, Ala. from \$100 to \$150; KXLF-TV, Butte, Mont. from \$100 to \$150; CFM-TV, Quebec City, Que., from \$300 to \$350; CJCB-TV, Sydney, N. S. from \$200 to \$250; KGO-TV, San Francisco has raised base hour from \$1200 to \$1350, min. \$250 to \$270.

Television Bureau of Advertising (TvB) this week released 67-p. presentation, *The 3 Hours of Television*, giving details of TV's sales power and including results of TvB study of its effectiveness in grocery field, which was highlighted in pres. Oliver Treyz's address to recent NARTB convention (Vol. 11:22). Copies are available from TvB, 444 Madison Ave., N. Y.

Good Housekeeping (circ. 3,500,000) increases its rates 5½% next Feb.; black-&-white page will cost \$10,000, four-color \$14,800.

Saturday Evening Post ad rates go up about 8% as of next Jan. 7—black-&-white page to \$18,145, back cover \$32,500.

MAGNETIC TV TAPE moved another firm step toward commercial emergence this week, when Bing Crosby Enterprises (25% CBS-owned) demonstrated latest refinements to group of newsmen in Hollywood. BCE exec. director Frank Healey now says that the tape will be ready within a year and that recording unit should sell for about \$50,000. RCA also has stated its tape equipment will be ready commercially in a year, following current field tests by NBC (Vol. 11:19).

BCE demonstration was highly successful. *N.Y. Times'* Jack Gould wrote: "The images had an amazing stability and in resolution and definition seemed equal if not superior to today's kinescope film recordings." *Variety's* Dave Kaufman called it "an exciting look into the near future in color TV, at present a one-shot, costly program problem due to the impossibility of kinescoping tint shows."

Actually, color kines have been made, but tape promises to produce much higher quality—at much lower cost and with great speed. West Coast audiences suffered through a lot of bad black-&-white kines until processes improved, and it's hoped that tape will bypass that phase in color. Current equipment handles both color and monochrome.

BCE's latest equipment records 5 tracks on ½-in. tape, compared with previous 12 tracks on 1-in. tape. Tape moves at 180-in. per second vs. 360-in. for earlier equipment. Eight minutes of programming are contained in 14-in. reel; BCE hopes to put 16 minutes on a reel soon.

Value of TV tape is not confined to replacing kines, by any means. Healey predicted that tape could cut shooting of TV films from several days to one day. However, it probably will be a long time before tape can record sufficient definition to make it a satisfactory replacement for 35mm film for theatre exhibition—as opposed to TV use. For distant future, there's possibility of home tape recording & playback equipment.

Credited with development are chief engineer John T. Mullin, assistants Wayne R. Johnston & Leslie Nelson.

Resounding blow to blacklisting practices in TV-radio was administered by AFTRA members in mail referendum tallied this week. Specific issue was move to reconsider vote at recent meeting which condemned AWARE Inc., so-called anti-communist outfit which "keeps tabs" on past affiliations of actors, etc. (Vol. 11:25). Though AFTRA leadership opposed condemnation of AWARE, membership voted nearly 2-to-1 for censure—982 for condemnation, 514 against. Magnitude of vote was so great it was interpreted by some as vote of no-confidence in union administration, presaging more liberal leadership.

Ewell & Thurber Assoc., Chicago, reverts to old name of U. S. Advertising Corp. with retirement of pres. J. C. Ewell & exec. v.p. Hal Thurber. C. E. Rickerd, mgr. of Chicago office, becomes pres.; J. E. Coombes, v.p. Headquarters continue in Chicago, with office in Toledo.

Walter Annenberg's *TV Guide*, in newspaper ads this week, makes impressive claim that during first quarter 1955 it ranked first in newsstand sales; in interim ABC statements to ABC, it claimed 2,378,064 vs. *Ladies Home Journal's* 1,733,906 and *Saturday Evening Post's* 1,547,309.

Good sponsor: St. Paul's Episcopal Church, Yuma, Ariz., is sponsor of baseball games on radio KOLD, the pastor's between-inning commercials inviting listeners to attend his church, reports Religious News Service.

Seagram Park Ave. Bldg., 38-story structure to be built between 52nd & 53rd Sts., N. Y., will be completely wired for closed-circuit TV.

A NOTHER UHF QUILTS the air as of July 10—WNET, Providence (Ch. 16), pleading “continued large operating losses with little or small expectations of gain.” FCC was informed July 7 that the station, on air since March 1954, hopes to resume operations if it can get Ch. 3 proposed to be allocated to Westerly, R. I. At same time, Commission was urged to authorize “a limited pay system of TV restricted to uhf stations for some reasonable period” and to adopt regulations requiring networks to serve all stations “under such reasonable conditions as would automatically ensure an equitable distribution of network programs to both U and V stations.” Despite 90,000 conversions in Providence, it’s stated, WNET got “insignificant revenues from networks or national advertisers.”

WNET is 17th uhf to leave air thus far this year, 49th since uhf began. Only 4 uhfs have started this year, one of them a revival in Norfolk, as against 24 vhf starters to date. Box score of TV stations in operation now stands at 432, of which 105 are uhf.

* * * *

In our continuing survey of upcoming stations, these are latest reports from principals:

WTHS-TV, Miami (Ch. 2, educational) now plans test patterns about Aug. 1, programming Aug. 15, reports Vernon Bronson, asst. director, Dept. of Radio & TV Education, Dade County Board of Public Instruction. Converted Ch. 2 antenna has been installed on FM tower on roof of Everglades Hotel, but conversion of old WTVJ Ch. 4 transmitter has been delayed.

WHIS-TV, Bluefield, W.Va. (Ch. 6) plans test patterns July 30, NBC programming shortly thereafter, reports station mgr. P. T. Flanagan for grantee *Bluefield Daily Telegraph*, controlled by Hugh I. Shott family. RCA 10-kw transmitter will be installed in 10 days; 100-ft. Ideco tower with 6-bay antenna is ready. Hugh I. Shott Jr. is gen. mgr., J. F. Byers chief engineer. Base hour will be \$200. Rep will be Katz.

WCTV, Thomasville, Ga. (Ch. 6) now has Sept. 1 test pattern target, Sept. 15 programming date, reports gen. mgr. Herschel Graves, promoted from radio WTAL, Tallahassee, Fla. Owner is John H. Phipps, who acquired CP this year from E. D. Rivers Sr., along with Thomasville radio WKTG from Fred Scott Jr. family (Vol. 11:20). Phipps also owns WTAL and radio WTYS, Marianna, Fla. GE 35-kw transmitter has been delivered and 5-bay antenna, due July 20, is scheduled for installation 10 days later on 669-ft. tower. Base hourly rate not set yet. Rep will be Meeker.

KSTF, Scottsbluff, Neb. (Ch. 10), oft-delayed satellite of KFBC-TV, Cheyenne, Wyo. (Ch. 5), now plans “mid-July” start, reports gen. mgr. Wm. C. Grove. It will have 2-kw RCA transmitter and 6-bay antenna, will be sold only in combination with KFBC-TV.

KFJZ-TV, Fort Worth (Ch. 11) still hopes to start Sept. 4 as an independent, writes Stan Wilson, asst. mgr. of grantee Texas State Network, also operator of KFDA-TV, Amarillo and 4 Texas AMs. GE 12-bay antenna on 1000-ft. Parkersburg tower is ready and 5-kw GE transmitter with 20-kw amplifier has been delivered. TSN national sales mgr. Dale Drake will be KFJZ-TV sales mgr.; Norman C. Long moves from KFDA-TV to be KFJZ-TV program director. Base hour will be \$600. Rep will be H-R Television.

WTTW, Chicago (Ch. 11, educational), aiming for early Sept. programming start on reduced scale, already has 5-kw GE transmitter in new Field Bldg. quarters, has

New TV Factbook—Pre-Print Orders

TELEVISION FACTBOOK No. 21, the Fall-Winter edition of the TV-electronics industries’ first and most widely used and quoted “almanac,” will be off the presses about Aug. 1—containing basic data on all U. S., Canadian and World TV stations and networks (including digests of station rate cards and complete rate cards of the networks); digests of all CPs outstanding and applications pending for new stations, with details on principals involved, facilities, etc.; all allocation tables brought up-to-date. All other departments are updated, too, such as the directories of the FCC, TV sales reps, program producers & distributors, set-&-tube manufacturers, radio attorneys, engineers & consultants, laboratories, etc. Also updated are TV-radio production figures, time sales and other statistical tables. Included with each *Factbook* is revised copy of our 43x29-in. Map of TV Cities and network interconnections, in color, suitable for framing. One copy of the *Factbook* goes to each of our full-service subscribers. Extra copies, if pre-print orders are placed for 20 or more, are \$1.50 each; single copies, \$4.00.

antenna due first week of Aug., reports chief engineer D. M. Weise. Regular 4-10 p.m. schedule begins after move to studio-office quarters in Chicago Museum of Science & Industry late this fall.

KBMB-TV, Bismarck, N. D. (Ch. 12) plans Oct. 1 test patterns, Nov. 1 start as CBS outlet, according to CP holder John W. Boler. With antenna atop State Capitol, it will be city’s 2nd TV—KFYR-TV (Ch. 5) having begun in Dec. 1953. Equipment was not specified, but Boler bought DuMont transmitters for his other 2 N. D. stations—KXJB-TV, Valley City & KCJB-TV, Minot. Base hour rate will be \$150, with \$637.50 combination rate for the 3 stations. Rep will be Weed.

WFLB-TV, Fayetteville, N. C. (Ch. 18) has GPL 1-kw transmitter ready, plans test patterns about July 15, CBS & NBC programming about Aug. 15, reports exec. v.p.-gen. mgr. L. W. Allen. GE antenna arrived this week for installation on 40-ft. tower. Nearest other outlet is WNAO-TV, Raleigh (Ch. 28), 53 mi. distant. Base rate will be \$150. Rep will be Adam Young.

* * * *

CJON-TV, St. John’s, Nfld. (Ch. 6) has again changed targets, now plans Aug. 15 test patterns, Sept. 4 programming, according to pres. Geoff Stirling. It will use 2-kw RCA transmitter, 12-slot Wavestack tower-antenna.

CFCL-TV, Timmins, Ont. (Ch. 6) plans start “late fall of 1956,” reports owner J. Conrad Lavigne, operator of predominantly French-language radio CFCL. Equipment hasn’t been ordered yet, but it will use 300-ft. tower. Rep will be Omer Renaud & Co. Ltd.

CKGN-TV, North Bay, Ont. (Ch. 10) is investigating chances of getting on air by Dec. 25, but doesn’t think it possible at this time, reports Gerald A. Alger, head of group which recently was approved for license by CBC (Vol. 11:27). Construction plans are ready, but contracts haven’t been awarded, nor has equipment been ordered.

— ■ —

GE reorganizes national broadcast equipment sales force under sales mgr. Albert F. Wild, as emphasis shifts from equipment for new stations to sales to existing stations. New regional managers: John Wall, Cincinnati, northeast; Charles T. Haist, San Francisco, west. New district sales managers: Lewis F. Page, Washington, D. C. (Va.-D. C.-Md.); Earl H. Platt, Syracuse (Ky.-W. Va.); Vernon H. Russell, Seattle (northwestern states).

HALF-YEAR FIGURES AUGUR RECORD TV YEAR: TV trade's 6-month report card, showing production and retail sales pace well ahead of record or near-record 1954, fore-shadows another peak year if final 6 months hold up as expected. And they will -- unless all economic barometers are out of whack. Last year, retail sales hit all-time high of 7,317,824; production of 7,346,715 was second to 1950's 7,463,800.

Production in first 6 months of 1955 is estimated at 3,800,000 vs. 2,800,000 in first half of 1954. Though data is incomplete, retail sales are placed at about 3,200,000 vs. 2,800,000. Inventories at all levels at end of June -- 2,300,000 vs. 2,000,000 end of June 1954 -- indicate this year's "balance" between production and retail sales isn't as comfortable as last year, but market men take heart from a decline in retail inventories last 3 months, quite unusual for this season. They attribute over-all inventory increase to factory stockpiling of new models.

[Note: RETMA weekly production figures, covering week ended July 1, were unavailable because of plant vacations and reporting problems.]

* * * *

Trade's cheery outlook has been enhanced by new merchandising features incorporated in lines introduced thus far: such attractions as RCA's "hidden" controls, Philco's "top-touch tuning", Emerson's single-price policy for all finishes of same models, remote control units -- to say nothing of continued low prices, embellished by such added starters as GE's 32-lb. 14-in. "portable" at \$99.95 & \$129.95, reported to us (by envious big-city competitor of GE) to be selling "like a house afire."

Lines also generally feature longer discounts to distributors and dealers, though no manufacturer is willing to reveal publicly his discount structure. The set makers have also facilitated step-up selling by dropping in models to narrow the price gaps in 21-in. series and by decreasing price of 24-in. sets. Motorola's new line, to be shown July 21 in Chicago, is expected to go along with these trends.

All manufacturers report excellent initial reaction by dealers to their new lines. "Open houses" for dealers are mushrooming all around the country, set makers claiming enthusiastic response in even the most saturated areas. Typical comment came from RCA spokesman, reporting largest dealer orders in history on all models. "We're selling our sets as fast as we can make them," he said -- and RCA reputedly sold well over 1,000,000 sets last year.

Brief highlights of other major trade developments this week:

* * * *

Economic Outlook: New York Times headline tells the story best: "Boom Forecasts Revised Upward; First Six Months Smash All Peacetime Records--End of Upsurge Not in Sight; Production Is Up 12%; Federal Reserve Index Hits New High of 138--Personal Income Is \$295 Billion." N.Y. Herald Tribune business columnist Harvey E. Runner: "The outlook for business is bright as the second half of 1955 begins. Confidence is running high -- and with good reasons. Not only has the U.S. economy rolled up its best January-thru-June period in history, but all indications point to a record six months. In fact, it now appears certain that 1955 will turn out to be the nation's all-time top year."

Two cabinet members lent official coloration to continuing boom. Labor Secy. Mitchell told news conference that national production mounted to record high in the April-June quarter, declared recent developments "all point to 1955's being a record year for the American worker." Buttressing his view was joint Labor-Commerce report showing record 64,016,000 employed during June, up 1,300,000 from May 31. Unemployment increased by 190,000, one of smallest June increases since World War II. Also this week, Commerce Secy. Weeks' midyear economic statement, in which he predicted \$6.2 billion factory volume of electronics production this year (Vol. 11:27), said

nation will set new sales & production records this year, with second-half output slightly under first 6 months and consumer durables sales holding first-half pace.

'Cooling-Off Period': Air-conditioner sales skyrocketed this week all over a sweltering nation, reaching record peaks and depleting inventories which piled up during a comparatively slack 1954 season. The over-90 temperatures in much of the nation started run on cooling units but left dealers unable in many cases to satisfy demand for immediate delivery & installation. Also moving well were 20-in. electric fans.

Guaranteed Wage: U.S. Chamber of Commerce reports, after canvass of state and local chambers, that unemployment compensation laws in nearly all states will have to be revised before any guaranteed annual wage plan can go into effect. This is needed, says Chamber, to permit workers to receive both unemployment compensation and guaranteed annual wage payments. Guaranteed annual wage will be key demand of IUE in new contract negotiations with GE starting July 19, and with Westinghouse at later date. That guaranteed wage isn't sitting too well with TV-electronics tycoons is manifest from this bit of sarcasm from Philco pres. James H. Carmine at distributors convention: "I suppose that should mean a guaranteed annual profit, too!"

Topics & Trends of TV Trade: RETMA asked Federal Trade Commission this week to postpone the effective date of its TV-radio trade practice rules, promulgated last week (Vol. 11:27), until Dec. 28 to allow its members "time for proper consideration." But chances for winning postponement appear slim—and prospects for revision of rules even slimmer.

All except 3 of the 32 rules are effective July 28. The remaining 3 (Nos. 6, 9 & 12)—involving misrepresentation of cabinet composition, deception as to size of picture and deception as to use of "new"—are effective Dec. 28. An FTC spokesman, commenting informally on RETMA's request, said any postponement of effective date would involve extremely quick action by Commissioners and administrative headache of notifying thousands of companies in trade of postponement.

RETMA's position is also weakened by fact that rules were promulgated only after 4 years of tortuous, drawn-out hearings in which RETMA participated and explained its views—rejected by FTC. Unless RETMA has new information to support its contention that certain rules will cause "confusion and uncertainty," it's doubted that it can win new consideration from FTC. Speculation is that RETMA's legal dept. wants to go on record with its expression of disapproval of some rules in event any manufacturer is subsequently cited for violation of rules.

* * * *

Proposal to end excise taxes on non-entertainment TV & radio, such as industrial TV and taxicab radio equipment, won approval this week from House Ways & Means Committee, which considered identical bills HR-7016 & 7024 (Vol. 11:27) by Reps. Keogh (D-N.Y.) and Simpson (R-Pa.). As approved by Committee, measure would also eliminate tax on items sold "for further manufacture," thereby cutting red tape involved in refunds, tax credits, etc. However, Committee didn't go along with section of the measure which would repeal excise tax on chassis, speakers, amplifiers, power supplies, built-in antennas and phonograph mechanisms.

House Commerce Committee seems likely to approve next week a bill (HR-2688) which could establish Congressional sentiment against principle of trans-shipment. Though bill itself prohibits trans-shipment of new autos only, committee sources say passage by Congress could pave the way for similar legislation in TV-radio-appliances. It's identical to bill (HR-9769) which passed House last year, was endorsed by NARDA, but failed to reach Senate.

Picture tube sales in first 5 months totaled 4,207,129, valued at \$81,649,060, compared to 3,275,301 worth \$69,052,136 in first 5 months of 1954, reports RETMA. May sales were 779,324 worth \$14,572,518, compared to 788,317 at \$14,620,075 in April and 584,782 at \$12,062,269 in May 1954. Receiving tube sales in first 5 months totaled 185,682,583, valued at \$137,421,579, compared to 134,677,745 worth \$99,025,891 in first 5 months of 1954. May sales were 32,920,310 worth \$25,914,821 vs. 35,426,153 at \$26,779,586 in April and 28,650,825 at \$20,465,451 in May 1954. [Note: Tabulation of picture and receiving tube sales, 1947-54 and first 5 months of 1955, with breakdowns by initial equipment, renewal, export, govt. & factory value, will be included in upcoming fall-winter edition of our *TV Factbook*, off presses about Aug. 1.]

TV set sales by Canadian factories in first 5 months totaled 218,350, production 301,309, reports RETMA of Canada. This compares with sales of 158,890, production of 179,172 in same 1954 period. Projected production estimate is for 153,277 more sets in June-Aug. period. Montreal led in 5-month sales with 37,559; Toronto, 36,717; British Columbia, 21,911; Manitoba, 18,765; other Ontario, 18,701; Nova Scotia, 14,817; Alberta, 13,839; Ottawa & eastern Ontario, 11,900; Quebec City, 11,091; Hamilton-Niagara, 10,318; New Brunswick & Prince Edward Island, 8792; Saskatchewan, 6246; Windsor, 6014; other Quebec provincial areas, 1309; Newfoundland, 371. May sales were 21,167 at average factory price of \$313, production 26,916. Inventory at end of May was 130,843, compared to 113,601 at start of month.

Hoffman Electronics' new line, introduced to distributors this week at Pasadena convention, features a "Super Black Easy-Vision" safety glass which company claims increases picture contrast by 75%. Cabinets are lower and considerably shallower than previous years. Line is divided into 3 series, each with a different type of chassis. The 17-in. tables start at \$150, 21-in. tables at \$180, 21-in. consoles at \$230, 24-in. tables at \$250, 24-in. consoles at \$330. At top of line is 21-in. cherry combination at \$595.

Excise tax collections on TV-radio-phonos totaled \$104,069,000 in 10 months ended April 30, compared to \$105,921,000 in corresponding period of preceding fiscal year, reports Internal Revenue Service.

Sylvania's new TV-radio line will be introduced to distributors at convention in Chicago's 8th Street Theatre July 28-30, addressed by chairman-pres. Don G. Mitchell.

Motorola signs licensing agreement with President Consolidated Ltd., Sydney, for production of TV-radio products in Australia under President-Motorola brand.

Trade Personals: Glenn W. Thompson, chairman & pres., Arvin Industries Inc., elected pres. of board of trustees, DePauw U; he recently was awarded an honorary degree by Franklin College . . . Douglas Y. Smith, v.p. & gen. mgr., RCA tube div., commencement speaker June 29 at Newark College of Engineering . . . Raymond A. Rich, v.p. & gen. mgr., Philco appliance div., who was stricken with appendicitis during Miami Beach convention last week, is resting comfortably at U of Pennsylvania Hospital, Philadelphia, following operation . . . Renville H. McMann, N. Y. district mgr., promoted to eastern regional mgr., Westinghouse TV-radio div., replacing Richard J. McCusker, resigned . . . Robert E. Kessler promoted to gen. manufacturing mgr., G. Robert Mezger to gen. sales mgr. of DuMont's new technical products div., headed by Dr. P. S. Christaldi . . . John H. Riddel, ex-Capehart-Farnsworth, named merchandise mgr., Sylvania TV-radio div., Buffalo . . . Donald R. Weisenstein promoted to mgr. of sales administration, RCA tube div. . . Norfleet Callicott, ex-mgr. of Hoffman Sales Corp. of Mo., named eastern sales mgr. of Hoffman Radio div.; Warren H. Rymer named district mgr. for Mich., Ill., Ohio, Kan., western Tenn. & northern Miss., succeeded as mgr. of Hoffman Sales of St. Louis by Joseph F. McFarland; John L. Evans named district mgr. for Ia., Wis., Minn., northern Neb. & Dakotas; Byron W. Brown promoted to sales mgr. of new radio-metric div., headquartering in Los Angeles . . . Charles Van Maanen, ex-Allied Appliance Co., Boston, named gen. sales mgr., Andrea Radio . . . Harry A. Roman named New England regional sales mgr., Motorola communications & electronics . . . Roy E. Berry promoted to district mgr. for equipment sales of GE tube dept., covering Chicago, Mich., Ohio & parts of Ind. & Ill., headquartering in Chicago; Frank A. Weeks Jr. heads new district covering Ky. & rest of Ind., headquartering in Indianapolis . . . Al D'Urso, ex-sales mgr., Sarkes Tarzian rectifier div., starts own electronic jobbing business, Valley Electronics Inc., at 1735 E. Joppa Rd., Towson, Md., Baltimore suburb . . . Harold S. Boxer, ex-Westinghouse TV-radio adv. mgr., appointed adv. & sales promotion mgr. of Fedders-Quigan Corp. (air conditioners) . . . Robert E. Chasen named director of industrial relations, Federal Telephone (IT&T) . . . Richard C. Wells, veteran radio engineer & announcer, named mgr. of new industrial sound dept., Newark Electric Co., 223 W. Madison St., Chicago . . . Larry Kline resigns as sales mgr., Ward Products Corp., Cleveland, to become commercial sales mgr. of Thompson Products Co., electronics div.; he's succeeded at Ward by John Altmayer, plant mgr. . . Wm. F. Walsh, ex-DuMont, joins James Lovick Co. Ltd., Montreal, in charge of account of Canadian Aviation Electronics Ltd., DuMont licensee.

* * * *

DISTRIBUTOR NOTES: DuMont appoints Kelvinator div. of American Motors, Bendix Radio's Los Angeles outlet, replacing Stewart & Stevens Inc. . . Pilot Radio appoints Eastern Electronic Sales Corp., New Haven . . . Packard-Bell appoints Claude Shellenberger, Fresno . . . CBS-Columbia appoints L. W. Lawson gen. mgr. of new Houston factory branch, 2602 Commerce St. . . Graybar appoints J. J. Lieske Chicago district sales mgr.

— ■ —

Mrs. Leslie F. Muter Sr., wife of pres. of Muter Co. & RETMA treas., and grandmother of 15-year-old boy, piloted single-engine Navion-260 plane from Long Beach, Cal. to Springfield, Mass. to second-place finish this week in annual "powder puff derby" for licensed women pilots. Under the handicap system by which contestant is judged by speed in relations to plane power capacity, however, she did not receive any of the 5 cash awards. Her co-pilot was Doris Langher, also of Chicago.

Financial & Trade Notes: Raytheon ended its fiscal year May 31 with sales of \$182,304,693 and net earnings after taxes of \$4,531,561, equivalent to \$1.72 per share of common stock after giving effect to 10% stock dividend totaling 217,694 shares distributed in July 1954 and after conversion of preferred stock into 223,845 shares of common during the fiscal year.

Both sales and net profit were up from preceding fiscal year when sales totaled \$177,099,790, net earnings \$3,523,316, or \$1.34 per share on basis of 2,628,781 shares outstanding on May 31, 1955. Board meeting July 7 declared 5% stock dividend as of July 18, pres. Charles Francis Adams Jr. stating it appeared advisable for the company to retain cash. Annual report is due Aug. 8.

* * * *

Twentieth Century-Fox, which last year grossed \$115,715,815 and earned \$3.04 per share, should earn about \$3.50 this year and around \$4 per share in 1956 and \$4.50 in 1957, says bulletin by Carl M. Loeb, Rhoades & Co., N.Y. bankers. Not only better film business but output of oil on Hollywood lot, purchase of South African theatre chain, Cinemascope & Eidophor business, and TV potential for its picture re-runs are given as reasons for bullish outlook.

Aerovox sales are running higher than last year and 1955 profits are expected to equal 1954 figure, pres. W. Myron Owen told N.Y. Society of Security Analysts this week. He said volume for first 6 months of this year was in excess of \$12,000,000, but net profit was a little lower than same period last year. Total sales last year were \$23,016,539, profit \$860,828. Company will pay a stock dividend at end of this year and in 1956, he added.

AB-PT pres. Leonard Goldenson is disclosed, in SEC registration of 210,600 shares of common stock issued to company officials under stock option plan, to have exercised options on 50,000 of 75,000 shares allocated to him. Options to company officials thus far total 215,000 shares at \$16.63; high for year thus far has been 31½, recent price around 29.

Pacific Mercury Television Mfg. Corp., manufacturer of Silvertone TVs for Sears, Roebuck in 11 western states, reports net profit of \$255,817 (37¢ a share) on sales of \$12,214,539 in fiscal year ended March 31, compared to \$196,015 (28¢) on \$13,996,559 in preceding fiscal year.

Kidder, Peabody & Co., 33 So. Clark St., Chicago, major old-line investment house, has entered field of purchasing, selling & financing TV-radio properties, appointing Robert E. Grant as dept. director.

Dividends: Raytheon, 5% stock payable July 29 to stockholders of record July 18; General Instrument, 12½¢ Aug. 15 to holders July 15; Howard W. Sams & Co., 10¢ July 25 to holders July 18.

— ■ —

Henry W. Fitzpatrick succeeds Horace S. Ford as director of MIT defense labs, including Lincoln Lab in Lexington, instrumentation lab in Cambridge, operations evaluation group in Washington.

Gen. Charles L. Bolte, who retired April 30 as Army vice chief of staff, joins ACF Industries Inc. as special asst. to chairman.

G. Dean Garner, former Southern Bell v.p., retired July 7 as staff director for communications in Defense Dept.'s Office of Transportation & Communications.

Ralph L. Hart, Western Electric distribution mgr., retires July 20, to be succeeded by Noble Armstrong, now acting distribution mgr.

Dr. Mervin J. Kelly, pres. of Bell Labs, elected to board of trustees of Stevens Institute of Technology, Hoboken.

Electronics Reports: Electronic end-item manufacturers plan to produce more than \$7 billion worth of equipment this year—nearly \$500,000,000 above last year's sales and less than \$250,000,000 below 1953's record of \$7.275 billion.

These figures are more than "estimates"—they're from most complete survey of electronics industry ever made public, compiled by the one "research organization" which has access to top-secret sales figures and production planning—the U. S. Govt. One of a continuing series of surveys by Office of Naval Materiel's electronics section, it's first one to be made public and is based on information obtained directly from approximately 600 "manufacturers or potential manufacturers of electronic end equipment."

Defining area of survey, Navy says: "Whenever possible, the data has been restricted to that applicable to electronic end items, systems, equipments, major assemblies or subassemblies and piece parts produced for direct assembly by the fabricator. Special effort was made to exclude data applicable to research & development, piece parts manufactured and sold as such, and non-electronic products. However, it was not possible to separate and exclude all of such data." Highlights of the survey:

Total of 509 firms last year reported military & civilian sales of \$6,595,500,000. This was only about 2/3 of capacity, however, for same firms could have produced \$9,672,300,000 in equipment (on one-shift basis). The 368 small-business firms (under 500 employes) reported sales of \$531,600,000, less than half of their capacity of \$1,303,900,000, while 141 big-business companies sold \$6,063,900,000, about 3/4 of their \$8,368,400,000 capacity.

The \$6,595,500,000 total for 1954 compares with record \$7,275,400,000 in 1953, \$4,147,795,000 in 1952 and \$3,218,200,000 in 1951—delineating rapid growth of industry's production following Korean war. In 1954 the 509 firms had 458,318 employes, as against 500,690 in 1953 (506 firms).

For 1955, end-equipment companies expect to do \$7,041,800,000 in business, almost evenly divided between civilian and military—\$3,780,900,000 vs. \$3,260,900,000. This figure could be optimistic, since last year in same survey the industry predicted it would do a record \$7,556,800,000, which turned out to be nearly \$1 billion too high, largely because of cutbacks in military procurement. However, in all previous ONM surveys, industry predictions have proven accurate within amazingly low margin of 2%.

Industry went into 1955 with military backlog of \$4,526,400,000, as compared to \$6,116,300,000 in 1954. As of first of this year, \$3,517,700,000 of the backlog was in prime contracts, about \$1 billion in subcontracts. This military backlog represents 69% of total 1954 sales (as opposed to corresponding figure of 84% in 1954)—71% for big business firms and 37% for small business.

The big business firms averaged \$14,536 in sales per employe in 1954, small business \$12,911, while the figure for all firms was \$14,391. Note: For list of top-ranking electronics military contractors, see p. 12, Vol. 11:23.

* * * *

Barnes Engineering Co. is new name of Olympic Development Co., Stamford, Conn., formerly a div. of Olympic Radio & TV Inc. The development firm, headed by physicist Dr. R. Bowling Barnes, became an independent company as result of last week's decision to merge Olympic Radio and Victoreen Instrument into new Nuclear Electronics Corp. (Vol. 11:27). Olympic Development, which last year reported (but never demonstrated) a 24-in. projection color receiver designed to sell for under \$500 (Vol. 10:31-32), is engaged in development & production of infra-red components and instrumentation for remote temperature measurements. It also makes automatic assembly machines through subsidiary Multra Corp.

Gerald C. Schutz named director of electronics, Gruen Watch Co., Cincinnati.

Hoffman Electronics enters components field through purchase of National Fabricated Products Inc., Chicago manufacturer of TV-electronic parts. National's subsidiary, National Semiconductor Products, Evanston, Ill., claims to be first to introduce silicon junction diode and first to produce solar batteries, and is now working on development of silicon transistors and silicon power rectifiers. National pres. Maurice E. Paradise will continue in same capacity under long-term contract. National employs about 400, has net worth of about \$2,000,000.

Two new uses for closed-circuit TV: (1) Detroit's streets & traffic dept. begins 30-day test of TV's value in "supervising" traffic on city's new high-speed express highway system. Using Bell System circuits, 2 cameras are scanning traffic on expressways in test to determine whether TV can be used on large scale to minimize traffic tie-ups. (2) Delegates to Building Owners & Managers convention in Cincinnati were able to watch reactions of passengers riding in new Westinghouse operatorless elevator via TV. Closed-circuit installation was supervised by Telecom Systems Inc., 501 Madison Ave., N. Y.

Tiny device with important implications for TV manufacturing companies and electronics industry is new silicon rectifier about the size of a pea developed by Bell Labs and slated for production soon by Western Electric. Miniature rectifier is said to do the work of 7 larger selenium rectifiers in TV set, with almost unlimited life span. Bell Labs says it operates at temperatures up to 400° F. Active element is silicon wafer smaller than pinhead.

Automation means survival for electronics manufacturers, in opinion of Aerovox pres. W. Myron Owen. He told N.Y. Society of Security Analysts this week that the "antiquated method" of hand assembly "is being discarded by far-sighted manufacturers. Automatic installations reduce assembly costs as much as 80%. Companies which do not adopt these modern methods will not survive in this highly competitive industry."

Textron American Inc., textile firm which has recently been expanding into other fields (including electronics through purchase of Dalmo Victor and other firms), has reached agreement to purchase Western Union's international cable system for approximately \$18,000,000. Sale would be subject to FCC approval and follows 13-year-old govt. order to WU to divest itself of cable system.

New rules on industrial heating equipment, proposed by FCC this week, would set up a type acceptance system including renewal procedure, make microwave frequencies and 915 mc available for the service, specify interference and radiation figures, etc. Comments are due Aug. 15. Notice is 55-758, available from Commission or from us.

DuMont building new west coast electronics center, for Oct. occupancy, at 11800 W. Olympic Blvd., Los Angeles, with 30,000 sq. ft. "to handle west coast electronics commitments and sales both for military and industrial purposes."

Corning Glass Works sets up new components dept., headed by Forrest E. Behn, responsible for manufacture and sale of new line of glass electronic components.

Sole maker of silicon transistors, Texas Instruments Inc., Dallas, now is offering 7 different types, at average price of \$15 each, about half the price when commercial production started 13 months ago.

New govt. technical manuals available from Office of Technical Services, Commerce Dept.: *Techniques for Application of Electron Tubes in Military Equipment* (100 pp., \$2.50), prepared Jan. 1955 by electronics components lab, Wright Air Development Center; *Radio Interference Suppression Techniques* (270 pp., \$6.75), dated Nov. 1953, prepared by Signal Corps Labs, Ft. Monmouth, N. J.

FARM TV CENSUS is now being tabulated by Census Bureau—first ever made—and it is being released on county-by-county basis. It's part of govt.'s Census of Agriculture, conducted in Oct.-Nov. 1954. TV figures are estimates projected from sample of approximately 20% of farms in each county.

A more significant TV set count was completed last month by Census Bureau, but data isn't due to be available until Sept. It will be govt.'s first nationwide set estimate since 1950 census—and was conducted as part of June Current Population Survey on basis of 25,000-home sample. Nationwide figure will be broken down regionally—north-east, southeast, central, west. The TV set survey is being financed by \$14,500 provided by NARTB, TV Bureau of Advertising and the 3 major networks, and coordinated by Advertising Research Foundation.

First 3 complete state tabulations in farm census showed wide variations in farm home set penetration. Nevada, with only 250 TV-equipped farms out of total 2857, had TV penetration of 9% of its farms. In New Hampshire, on other hand, 52½% of all farms had TV—or 5475 out of 10,411. Vermont had 38% TV saturation of farm homes, with 6068 out of total of 15,981 farms.

We'll print the county-by-county farm TV census figures for each state as rapidly as they're tabulated. Here's the count for farms in first 3 states released:

NEVADA

County	Total Farms	Farms with TV	County	Total Farms	Farms with TV
Churchill	619	20	Lyon	327	6
Clark	210	22	Mineral	53	—

Minneapolis Star and Tribune (Cowles) is purchasing Wichita area CBS affiliate KTVH (Ch. 12) for \$1,070,000, the 6 former owners getting 20% interest in newly formed operating company called Wichita-Hutchinson Co. Inc. Minneapolis newspapers will hold 80%; last year (Vol. 10:45) they paid CBS \$3,950,000 for 47% interest in WCCO-TV & WCCO, Minneapolis, the other 53% control residing in Ridder family (*St. Paul Dispatch* and *Pioneer Press*). Cowles family (*Des Moines Register* and *Tribune, Look Magazine*) also owns 60% of new KRNT-TV, Des Moines (Ch. 8) and KVTW, Sioux City, Ia. (Ch. 9). Former KTVH owners who will share new minority interests are Howard O. Peterson, gen. mgr.; R. J. Laubengayer, ex-publisher; W. D. P. Carey, ex-pres. of KTVH; Bess M. Wyse, operator of radio KWBW, Hutchinson; John P. & Sidney F. Harris, publishers of *Hutchinson News-Herald* and other newspapers in Kansas & Iowa and 24% owners of radio KFBI, Wichita.

ARMED FORCES now have 6 TV stations overseas—latest to begin operation being ZBK-TV, Kindly Air Force Base, Bermuda (Ch. 10), which went on air July 4 with 100-watt Dage transmitter. AJL-TV, Dharan, Saudi Arabia (Ch. 8), using equipment made by RCA, Dage and Electronics Research Laboratories (Hollywood), went on air June 16.

All overseas stations—plus Ch. 8 outlet at Loring Air Force Base, Maine—are operated by Office of Armed Forces Information & Education. Plans for an Armed Forces TV outlet in Guam are being held in abeyance as result of fight being waged by radio KUAM, Guam against the proposed govt. station (Vol. 11:22). Asst. Defense Secy. T. P. Pike last week pledged that Defense Dept. wouldn't permit the military station to go on air without "additional study."

Meanwhile it was learned that Pentagon has been approached by subscription TV proponents with proposition to run a "scrambled" TV service on Guam in order to meet KUAM's objections—with only authorized military personnel possessing the proper decoder mechanisms on their sets. Another alternative being considered for Guam is a wired TV system, which would be installed by one of leading manufacturers of community antenna equipment.

Note: Up-to-date list of all military TV installations, with personnel, technical data and starting dates, will be contained in new *TV Factbook*, due off presses next month.

Community TV regulation: While California Public Utilities Commission is considering whether to assert jurisdiction of community antenna systems, after conducting hearing June 22 on subscribers' complaints about system in Martinez, Arizona State Corporation Commission announced that it's taking over in its state. Unusual aspect of Martinez hearing was appearance of Spanish Mt. TV Corp., system operator in Ukiah, Cal., which argued in favor of state regulation, preferring it to present municipal control. E. Stratford Smith, exec. secy. of National Community TV Assn., argued against any govt. regulation.

TV film distributors' trade association—as yet unnamed—moved a step closer last week as organizational group named steering committee to obtain charter and formulate rules. Committee is headed by Dwight Martin, General Teleradio, and includes Ralph Cohn, Screen Gems; Frank Reel, Ziv; Lou Friedland, MCA; Jay Williams, Official Films; Ned Koenig, Hal Roach Productions; Saul Konkis, Studio Films; Dave Savage, Guild Films. Some 30 major TV film companies were represented at meeting which selected steering committee, due to report in 6 weeks.

Airborne Assn. this week presented statuette, named "Ernie" in memory of late correspondent Ernie Pyle, to NBC-TV for its "Operation Threshold" demonstration of combat use of TV from Ft. Meade, Md. last summer (Vol. 10:33) as example of outstanding journalistic contribution to national defense.

Kingsley Murphy family's sale of KSO, Des Moines, for \$125,000, allowing them to exercise option on 40% of Cowles' KRNT-TV (Ch. 8) there, was approved by FCC this week. New KSO owner is Lyman S. Ayers group, operators of Indianapolis' WXLW (Vol. 11:24).

Constructive critique: *TV and Your Child*, 45-p. booklet written by the Very Rev. Edwin B. Broderick, first TV-radio director for the Archdiocese of N. Y., 453 Madison Ave., N. Y.

More bingo trouble: Wisconsin Supreme Court last week ruled that "Banko," carried by LaCrosse's WKBT, is illegal, and a state law permitting bingo-type games on TV-radio is unconstitutional.

TV sets-in-use on June 1 totaled 36,100,000, up 291,000 during May, reports NBC Research.

SUMMARY-INDEX OF THE WEEK'S NEWS—July 16, 1955

RASH OF RUMORS — all denied — has color set prices halved, Ch. 2-6 in danger, Crosley selling stations, Washington Post buying 2 more (p. 1).
FEW LOW-POWERED STATIONS to be sought immediately, but satellites show promise in some areas — notably Pasco, Wash. and Lufkin, Tex. (p. 2).
81 AM STATIONS START in first half of 1955 vs. mere 27 TVs; year-by-year count shows radio rising steadily in "TV decade" but FMs dropping out (p. 3).
150 STATIONS, 8,600,000 SETS in foreign countries shown in new Factbook compilation; commercial TV gains, Canada leading in stations, Britain in sets (p. 3).
FCC OUTPUT LIGHT, includes CP for Ch. 7 to KOSA, Odessa, Tex.; more opposition to Pittsburgh's WWSW-WJAS merger; hot fight over Des Moines Ch. 11 (p. 4).

WHIRLPOOL-SEEGER-RCA get green light on merger from Dept. of Justice—RCA & Sears to own 20% each; new TV lines going over big (p. 8).
NO "SWEEPING" CUTS in color set prices expected, RCA says; NBC beefs up summer color schedule, fall fare grows, and Canada plans 1956 start (p. 11).
FORT BRAGG AREA (Fayetteville, N. C.) gets first station, a uhf, as U of Illinois starts non-commercial vhf; Ft. Dodge, Ia. uhf knocked off by lightning (p. 12).
GENERAL TELERADIO BUYS RKO from Howard Hughes for \$25,000,000, with eye to 400-700 feature films in vaults; will continue theatrical production (p. 7).
KENEHAN & BARR given top jobs in FCC Broadcast Bureau, Plummer & Kittner to head up Safety & Special Bureau; more changes due soon (p. 5).

CHECKUPS ON THE CURRENT CROP OF RUMORS: Though this is a rumor-ridden industry, wherein today's fancy often becomes tomorrow's fact, you can discount as hot weather gossip or old wives tales the current crop of trade chit-chat to the effect:

- (a) That color TV set prices will be slashed as much as half this fall as a means of hyping sales. Our authority: A flat denial by RCA (see p. 11).
- (b) That Channels 2-6 are in danger of usurpation by the military, either imminently or in the foreseeable future. Authority: Unequivocal statements by key govt. communications officials (Vol. 11:5), recently reiterated (Vol. 11:26).
- (c) That Crosley's 4 TV stations and radio WLW are about to be sold. Said Crosley Bcstg. Co. pres. Robert Dunville: "To the contrary, we're looking for more stations to buy if the courts should uphold Storer's no-limit appeal."
- (d) That the Washington Post Co. is about to buy stations in Atlanta and Birmingham -- presumably Crosley's WLWA (Ch. 11) or Storer's WAGA-TV (Ch. 5) in Atlanta and/or Storer's WBRC-TV, Birmingham (Ch. 6). Post's John Hayes denies this, as do spokesmen for both Crosley and Storer.

One long-rumored story that did materialize, though official details aren't out yet, was General Teleradio's purchase of the RKO movie backlog and production facilities in Hollywood (see p. 7) -- with all that that implies as the first break into vaults of the major producers who have kept their old product off TV to date. Except for fear of a glut and depreciated prices, it would seem to signal opening up of an enormous supply of "newer and better oldies" for TV showings.

* * * *

There will be more TV station sales and transfers, to be sure, to add to the 93 that have taken place since 1949, as tabulated for our latest Factbook. There's still the probability that DuMont's WABD, N.Y. may be sold (for reported \$5,000,000 valuation) as well as its WTTG, Washington (\$3,000,000). But the DuMont board, at this week's meeting, made no decision; Dr. DuMont wants to keep them, thinks they can earn as much as \$5,000,000 next year, but his Paramount and the banking directors are inclined either to sell or spin them off into a separate corporate entity.

Storer is known to have looked at WABD, as have others, and Storer also has

been looking into the Cincinnati situation with an eye to adding a station there for an Ohio triumvirate; he already owns WSPD-TV, Toledo & WXEL, Cleveland.

NBC's \$606,000 purchase of uhf WKNB-TV, New Britain-Hartford (Ch. 30), which was followed up last week by CBS's \$650,000 purchase of WGTH-TV, Hartford (Ch. 18) -- deals evidencing their expressed faith in uhf -- has been stymied pending opposition arguments, notably by area stations losing their network affiliations.

Overlap with N.Y. is one of the objections, and such overlap is also alleged in the proposed Westinghouse-NBC swap of their Philadelphia-Cleveland TV-radio stations (Vol. 11:21,25) which FCC was expected to approve this week, but didn't.

Westinghouse lost out in Portland vhf competition recently and, with 4 vhf's to date, is avowedly after a fifth -- possibly in Baltimore. Its pres. Gwilym Price is also on record as stating it will go for the allowable 2 uhf.

Crosley wants into Indianapolis badly, is awaiting competitive decision for Ch. 13 there. Washington Post Co., which owns the highly profitable WTOP-TV in the Capital as well as WMBR-TV, Jacksonville, avowedly wants more TV stations -- but they must be within the periphery of a triangle formed by lines from Washington to Miami to New Orleans, so Mr. Hayes candidly states.

Station brokers and other go-betweens, proceeding on assumption everyone has his price, have sent form letters to nearly all TV station operators asking whether they would entertain offers. It seems there are plenty of buyers but very few sellers among the 420 now-operating commercial stations, except for some faltering uhf's that are hanging on in hopes they too may be taken over.

NO RUSH FOR LOW-POWERED TV STATIONS: Though manufacturers are all set for low-power rules effective Aug. 1, permitting stations to operate with as little as 100 watts (Vol. 11:26), prospective applicants are mighty scarce. A canvass of attorneys shows very few such applications in preparation. Reason seems to be that while low-power rules cut construction & operation costs sharply, few prospective operators foresee revenues great enough to warrant risk -- even as satellites.

Under some conditions, however, satellites can work -- even as regular-power outlets. For example, mgr. Tom Bostic, of KIMA-TV, Yakima, Wash. (Ch. 29), operating satellite KEPR-TV, Pasco, Wash. (Ch. 19), reports that satellite is showing "good economic promise" after operating since Dec. 28, 1954.

He says response from national advertisers has been good, particularly since Pasco station actually covers slightly more people than Yakima "mother" station -- yet advertiser pays only 50% extra for Pasco.

Pasco carries all network and national business broadcast by Yakima but cuts away to insert local slide & film spots when Yakima has local spots. In May, Pasco carried 206 local commercial spots, 162 national & 162 local public service announcements. In Sept., station will add live facilities, "cutting away more and more as time goes on," according to Bostic. KIMA-TV has mobile unit that spends 1-2 days weekly in Pasco-Walla Walla area. Pasco has 8 employes -- mgr., 3 salesmen, 3 engineers, 1 office worker. Yakima has 40.

Same interests hold CP for another satellite, KBAS-TV, Ephrata, Wash. (Ch. 43) which is currently stymied by protest, must go through hearing. Similar arrangement is planned by Wm. Grove for KSTF, Scottsbluff, Neb. (Ch. 10), to repeat programs of his KFBC-TV, Cheyenne (Ch. 5). Scottsbluff is due on air in month or 2.

* * * *

Still another kind of satellite is KTRE-TV, Lufkin, Tex. (Ch. 9), due on air in Aug. or Sept. It has no ownership link with "mother" station KPRC-TV, Houston. Agreement between stations permits KTRE-TV to rebroadcast all KPRC-TV programs, including NBC's -- inserting local commercials before and after KPRC-TV programs.

There is no payment involved, and KTRE-TV is building own microwave to bring the programs in. It has to take care of own arrangements for ASCAP, BMI, etc. and if KPRC-TV is required to pay more for film or local material because of Lufkin coverage, KTRE-TV must pay the extra. KTRE-TV mgr. Richman Lewin is convinced that the setup is "right" and that "the economic base is assured."

Now operating in Hawaii are 2 more satellites of yet another kind. KGMB-TV, Honolulu (Ch. 9) has built KHBC-TV, Hilo (Ch. 9) & KMAU, Wailuku (Ch. 3) solely to fill in areas shielded by rugged terrain. So far, they represent outgo, for all 3 stations are quoted on one rate card -- which hasn't been increased since satellites started. Maui station is due to get competition from locally-owned KMVI-TV (Ch. 12) which will rebroadcast programs of KONA, Honolulu (Ch. 11).

There are few CPs and applications for satellites beyond these. There's a CP for KPAR-TV, Sweetwater, Tex. (Ch. 12) and applications for Walla Walla, Wash. & Mayaguez, P.R. It's apparent that low-power rules won't precipitate any landslide of demand starting Aug. 1 -- though one group is thinking about applying for 4. For the very long run, however, everyone seems to feel that low-power stations are bound to penetrate into smaller and smaller communities -- perhaps some day reaching the saturation achieved by radio today (see below).

MORE NEW AMs THAN TVs GOING ON AIR: Curiously enough, new AM stations authorized by FCC during first half of this year outnumbered TVs 64 to 33. New AMs that actually started during that period totaled 81, new TVs only 27. And only 4 AM licenses were turned in, 4 CPs dropped, as against 17 TVs that quit operating and 13 CPs turned in.

All of which may betoken a healthy condition for radio, though the comparison isn't altogether apt because (a) it takes vastly more capital to start and operate a television station -- 10 times as much, or more; (b) most of the new AM grantees and starters are local low power and/or daytime only projects. Indeed, most are going into crossroads communities; e.g., Mexico, Pa. (pop. 350); Fishkill, N.Y. (pop. 841); Golden Meadow, La. (pop. 2820); Rupert, Ida. (pop. 3098); Skowhegan, Me. (pop. 6183) -- and two rival grantees even got CPs recently in Thermopolis, Wyo. (pop. 2870).

July 1 count for our annual AM-FM Directory, which is kept current with weekly Addenda covering FCC grants, changes, withdrawals, etc., shows 2846 AMs authorized as against 2782 last Jan. 1 and 2697 year ago July 1. Of these, 2732 are on the air and 114 still in CP status.

Total AM radio stations in U.S. and possessions in late 1945, when wartime freeze on radio construction was ended, came to exactly 1056. In the "TV decade" since then, the figure grew steadily: by end of 1946, 1579; 1947, 1961; 1948, 2131; 1949, 2246; 1950, 2351; 1951, 2410; 1952, 2516; 1953, 2644; 1954, 2782. Applications still pending for new AMs totaled 222 on July 1, up from 174 last Jan. 1.

"Shrinkage" continues to be the FM trend: There were 552 FMs authorized as of July 1 (540 on air) as against 583 last Jan. 1 (549 on air) and 575 in mid-1954 (549 on air). Peak was 706 FMs at end of 1950.

150 FOREIGN STATIONS, 8,600,000 SETS: Comparing TV's expansion in foreign countries to the post-freeze pace in U.S. is like comparing an inchworm to a jet plane.

Our forthcoming fall-winter TV Factbook, due off presses early next month, contains what we believe to be the most complete, up-to-date and accurate directory of foreign stations ever published. It was compiled independently, using as sources trade channels, foreign governments and U.S. govt. & international agencies. Among the highlights of new foreign TV directory:

World now has 582 TV stations and 44,600,000 sets to receive them. Deducting the 432 stations and 36,000,000 sets-in-use in U.S., 35 other countries have total of 8,600,000 sets and 150 stations -- including experimentals, bloopers, satellites, but not including the 6 stations operated overseas by U.S. Armed Forces (also listed, with pertinent data, in separate Factbook section).

Number of stations in foreign countries has increased by 23 in last 6 months, number of sets by 2,000,000. The relatively heavy accretion of receivers is due principally to set sales in Great Britain, which now has 5,000,000 -- and to a lesser extent in Canada, Germany, France & Italy.

Next year should be foreign TV's biggest, with expansion plans solidified in many countries, and introduction of first stations slated in about a dozen others.

Commercial TV is general rule in Western Hemisphere, Govt.-owned non-commercial in Europe -- though tide may be turning toward commercial in western Europe:

Germany's big state-owned networks (22 stations) accept limited advertising. And, of course, Britain's BBC is due for competition this fall by govt.-run commercial Independent TV Authority (ITA). Italy's govt.-private partnership, Radio Audizione Italiana, plans to take commercial spots when set circulation is high enough.

New TV phenomenon in Europe is the establishment of high-power commercial outlets on mountaintops in small principalities bordering on France. Such stations are on air in Luxembourg, Monaco and The Saar (though not yet at full power). They beam programs out of their own countries, as Radio Luxembourg beams commercial AM.

Elsewhere in western sphere of influence, commercial TV may become the pattern. Of Japan's 6 stations, 2 are privately owned commercial; new Thailand outlet will take advertising. In Australia, first 4 stations (due next year) will be private and commercial. On other hand, a privately-owned pair of stations (backed by some American capital) failed to make a go of commercial TV in French Morocco, and is now asking French Govt. to take over.

Of foreign countries, Canada ranks first in number of stations (27); Britain is far ahead in number of sets (5,000,000). As of July 1, these were the world's runners-up (to U.S.) in TV: Canada, 27 stations, 1,500,000 sets; West Germany, 22 stations (including satellites), 300,000 sets; Britain, 13 stations, 5,000,000 sets; Cuba, 9 stations, 150,000 sets; Italy, 9 stations, 120,000 sets; Russia, reported to have 8 stations & 800,000 sets; France, 7 stations, 200,000 sets; Brazil and Mexico, 6 stations each and about 130,000 sets each.

LIGHT ACTION at FCC produced one CP via final decision this week—Ch. 7, Odessa, Tex., to Odessa TV Corp., owned half-&-half by Cecil L. Trigg (who owns 75% of radio KOSA) and Cecil Mills. They won out over Clarence E. Wilson & Philip D. Jackson, each of whom owns 1/3 of KBOY, Medford, Ore. Jackson was also v.p. and a 15% stockholder of recently reorganized KTVQ, Oklahoma City (Ch. 25).

Commission's choice was based on Trigg's local residence, activity in civic affairs and superior program proposals. It said the competitors were a standoff in regard to past experience and diversification.

Another effort to forestall grant of Ch. 11, Pittsburgh, to merged WWSW-WJAS was made this week—off-air WKJF-TV (Ch. 53) filing letter with FCC stating that merged application should be treated as a new one open to competition. Owner Agnes J. Reeves Greer said she would file application for Ch. 11. Recently, WENS (Ch. 16) applied for Ch. 11, asked for hearing (Vol. 11:27).

* * * *

One of hottest allocations battles is going on over FCC's proposal to open Des Moines educational Ch. 11 to commercial use, acting on petition of off-air KGTU (Ch. 17)—Commission's first move of that kind. Area educational groups have been snowing Commission under with comments in opposition—and KGTU has been snapping right back.

This week, Joint Committee on Educational TV stated: "Having lost substantial sums of money in its uhf commercial venture, KGTU has an understandable desire to recoup its finances by attempting to operate a vhf commercial station. They attempt to justify their financially-motivated objectives by ignoring the statements of the Des Moines educators of their intent to use the channel and claim that it will lie fallow."

Pursuing its proposal for mutual commercial-educational operation of the channel, KGTU declared: "In contrast to KGTU's specific detailing of the advantages inherent in such mutual operations, the educators only reiterate unsupported protestations of doom for educational TV na-

tionally, statewide and locally if any change whatever be made in the present allocation."

Allocations change sought this week was shift of Ch. 7 from Ponce to Mayaguez, P.R. Now competing for Mayaguez' Ch. 3, San Juan's WKAQ-TV and WAPA-TV asked for change so that each could get a grant without hearing. Commission also proposed shifting Ch. 3 from Pueblo to Alamosa, Colo. at request of KCSJ-TV, Pueblo (Ch. 5) which said it would apply in Alamosa.

* * * *

Another FCC investigation: Rep. Joe Evins (D-Tenn.), chairman of Small Business subcommittee, said he aims to investigate all independent agencies for this reason: "We want to find out whether they are becoming administrative rather than quasi-judicial. FCC was created as an arm of Congress. We want to inquire whether they are really independent, whether they rely solely on their own judgment or if they are called from the White House. The chairman is now more powerful than he used to be. The chairmanship doesn't rotate, isn't voted by the Commission itself. That means there can't be a Democratic chairman under a GOP administration or vice versa." Committee probably won't get to FCC until fall or next session; it starts on FTC Aug. 18.

Independent TV Authority, Britain's new commercial TV operator, disclosed this week that one of its 4 private franchises has been withdrawn—the one granted to Kemsley-Winnick Television Corp., which was to operate the Birmingham & Manchester stations starting in Dec. Kemsley newspaper chain is reported to have backed out, as did dept. store owner Isaac Wolfson, when it became evident that commercial TV might be a losing proposition for quite a while before turning a profit. (For franchise holders and their assignments, as well as other ITA data, see *TV Factbook No. 21*.)

ABC takes 60 newsmen—mostly from dailies and fan publications and a few from trade press—on weekend plane junket from N. Y. to California for July 17 opening of Disneyland Park and special 90-min. *Dateline Disneyland* telecast 7:30-9 p.m. They'll also get preview of ABC-TV's other new movie shows—*Warner Bros. Presents*, *MGM Parade*, *Mickey Mouse Club*.

Personal Notes: George C. McConnaughey, FCC chairman, and Mrs. McConnaughey leave for Europe July 22, flying first to Paris, planning to confer with telecommunications chiefs in several countries. Itinerary: Paris, Geneva, Bonn, Munich, Heidelberg, Stockholm, Oslo, Copenhagen, Amsterdam, Scotland, London—then boarding ship for home from Southampton Aug. 26 . . . Edward L. White, who retires July 30 as chief of FCC Safety & Special Radio Services Bureau after 30 years of govt. service, will enter communications system design practice at his new home at 460 Coffee Pot Riviera, St. Petersburg, Fla. . . . Pat Weaver, NBC pres., subject of cover story in current *Newsweek*, layout in *Life*; AB-PT pres. Leonard Goldenson and his company's fiscal rise (from 1955 low of 21½ to high of 32½) featured in July 15 *Forbes Magazine* . . . Lester Gottlieb promoted to director of CBS-TV daytime programming, reporting to Hubbell Robinson Jr., v.p. in charge of network programs . . . Charles L. Glett resigns as CBS-TV v.p. in charge of operations, Hollywood, his duties assumed by H. Grant Theis, from film service dept. . . . Horace R. Guillotte, director of CBS Radio network operations, named v.p. in charge of operations, continuing to headquarter in Hollywood . . . L. Byron Cherry, ex-mgr. of GE outdoor lighting dept., joins CBS as management consultant . . . Giraud Chester promoted to mgr. of NBC-TV program sales administration . . . Wm. Koblenzer promoted to mgr. of DuMont network sales & Electronicam production services, replacing Gerry Martin, resigned . . . Wm. P. Dix Jr., promoted to sales mgr. of WOR-TV & WOR, succeeding Charles H. Philips, now mgr. of Petry rep firm's new sales development dept.; Perry Bascom promoted to asst. TV sales mgr. . . . C. E. Miller promoted to chief engineer, KOMO-TV & KOMO, Seattle, succeeding late Francis J. Brott . . . Robert C. Fransen promoted to asst. gen. mgr., Richard M. Day to local sales mgr., KEYD-TV, Minneapolis . . . Pete Jaeger, ex-exec. v.p., Transamerican Broadcasting Corp., elected national sales v.p., Guild Films Inc. . . . John D. McTigue, ex-NBC Radio publicity mgr., joins R. F. O'Leary Jr. & Assoc., adv. & public relations firm, as asst. to pres. . . . Jack Boyle, TV research director, Daniel Starch & Staff, N. Y., elected a v.p. . . . Erik Hazelhoff promoted to mgr. of NBC partic. programs dept., reporting to Mort Werner, director of partic. programs . . . Bob Kane promoted to sales mgr., KSAN-TV, San Francisco . . . Mrs. A. Scott Bullitt, pres. of KING-TV & KING, Seattle, accompanied by Miss Gloria Chandler, stations' public service director, have returned from Milan, where they represented U.S. at "Conference on TV Programming for Youth."

Paul W. White, 53, who founded the CBS news bureau in 1930 and was v.p. in charge of news before retiring in 1943, returning later to newspaper work and to teach journalism, died at his San Diego home July 9 after a long illness. He had been news director of KFMB-TV & KFMB there for 5 years until his death. "The public as well as radio and TV newsmen the world over owe Paul White a real tribute for his great leadership in pioneering the pattern of electronic journalism as we know it today," said CBS pres. Frank Stanton. Survivors are his wife and 2 daughters.

Patrick W. Campbell, 64, TV-radio program officer in Great Britain for U. S. Information Service (Voice of America), veteran of the movie, radio & TV film fields, died July 9 in London of a heart ailment. A nephew and protege of the noted actress Mrs. Pat Campbell, he left stage & film fields to join Don Lee in Los Angeles in the early days of radio; from 1951-54 he was v.p. of George Bagnall & Assoc., TV-radio producers. Surviving is his widow, Mildred.

TOP FCC STAFF JOBS changed hands this week, including a surprise or two. Attorney Edward F. Kenehan, not mentioned in previous speculation, was appointed chief of Broadcast Bureau—probably most important staff position in Commission—succeeding engineer Curtis B. Plummer, who in turn becomes chief of Safety & Special Radio Services Bureau as replacement for retiring Edwin L. White.

At same time, attorney Joseph M. Kittner, asst. chief of Broadcast Bureau, moves with Plummer to become asst. chief of S&S bureau. Moving up to take Kittner's job is engineer James E. Barr, now chief of broadcast facilities div. Commission hasn't yet indicated who'll succeed Barr or a new berth for attorney Lester W. Spillane, whom Kittner replaces.

Previous talk about Broadcast Bureau job mentioned as candidates Christian E. Rogers, recently named engineering asst. to Chairman McConnaughey, and John Fitzgerald, chief of Office of Opinions & Review. It's understood, however, that Rogers wasn't considered a probability—but that FitzGerald had been offered job and declined.

Kenehan, 42, has had good variety of experience. He was an FCC attorney 1946-48, rising to chief of AM facilities branch. He joined Washington law firm of Welch, Mott & Morgan in 1948, left in 1951 to become member of RCA's legal staff in Camden. He returned to FCC last Feb., to office of general counsel Warren E. Baker.

Two important Broadcast Bureau jobs, long vacant—chiefs of hearing and renewal & transfer divs.—are now expected to be filled before long.

Commission's announcement of appointments stated: "All these appointees are present members of the Commission staff. Their transfers are part of the Commission's plan to streamline and implement its administrative work by exchanging people with valuable experience in key positions. In particular, the Commission recognizes that the Safety & Special Radio Services represents the largest and fastest growing group of radio users whose expanding services and problems require an increasing amount of attention." Changes are effective Aug. 1.

Col. Harry C. Wilder's WTRY, Troy, N.Y. (5-kw, 980 kc, CBS) was sold this week for \$500,000 to Providence broadcasters George Taylor & Robert Engle, 28% each; Maury Lowe, adman, 22%; Ken Cooper, ex-mgr. of WORC, Worcester, 22%. Deal was negotiated by Blackburn-Hamilton. Col. Wilder and wife, owning 55%, and 19 other stockholders, some of whom are also interested in WTRI (Ch. 35), currently engaged in litigation with CBS over its withdrawal of network service, state they intend prosecuting their claim against CBS to limit, however. Meanwhile, they propose to transfer their 50% stock in WTRI to National City Bank of Troy as trustee "to protect the interests of the present stockholders" because of uncertainty of WTRI's future and because new AM owners don't want to become involved.

Increase in FCC members' salaries from \$15,000 to \$22,500 is sought in HR-7387, introduced this week by Rep. Simpson (R-Ill.).

Thomas F. Harrington, 53, chairman of board of Ted Bates & Co., died of heart attack at his summer home in Candlewood Isle, Conn., July 10. He was a pioneer agency radio director, having handled Jack Benny and other notable stars after he joined Young & Rubicam in 1934. He became a Bates partner in 1948. Surviving are his widow and 2 sons.

Network Accounts: United Motors Service, a div. of General Motors, signed this week as first sponsor of bi-weekly *Wide Wide World* on NBC-TV starting Oct. 16, Sun. 4-5:30 p.m., thru Campbell-Ewald; it bought 30 min., with Alcoa, Allis-Chalmers & International Harvester leading prospects to grab off remaining hour of program, whose show-case few weeks ago drew exclamatory reviews (Vol. 11:27) . . . Ciba Pharmaceuticals to sponsor *Medical Horizons*, originating from hospitals & research centers, on ABC-TV starting Sept. 12, Mon. 9:30-10 p.m., thru J. Walter Thompson . . . American Chicle Co. to sponsor *Summer Theatre* on NBC-TV starting July 19, Tue. 9-10 p.m., thru Ted Bates & Co. . . . CBS-TV plans to keep *Morning Show* (Mon.-thru-Fri. 7-9 a.m.); this week it assigned Dick Van Dyke as m.c., replacing Jack Paar, who requested re-assignment to own show . . . Frigidaire & Toni to be alt. sponsors of *Frankie Laine Time* on CBS-TV starting July 20, Wed. 8-9 p.m., thru Foote, Cone & Belding and Weiss & Geller . . . Standard Brands buys Thu. 5:45-6 p.m. segment of *Howdy Doody* on NBC-TV starting Sept. 22, Mon.-thru-Fri. 5:30-6, thru Ted Bates & Co. . . . Ronson Corp. (lighters & electric shavers) to sponsor Wed. & Fri. segments of *Douglas Edwards and the News* on CBS-TV starting Aug. 24, Mon.-thru-Fri. 7:30-7:45 p.m., thru Norman, Craig & Kummel . . . Charles Antell (Lanolin hair preparation) buys Mon. 2:15-2:30 p.m. segment of *Robert Q. Lewis Show* on CBS-TV starting Sept. 12, Mon.-thru-Fri. 2-2:30 p.m., thru T.A.A. Adv. Inc., Baltimore . . . Cluett, Peabody & Co. (haberdashery) buys 24 partic. each on NBC-TV's *Today & Home* starting in Oct., thru Young & Rubicam . . . GE, for Telechron clocks, plans big campaign this fall on Dave Garroway's *Today* on NBC-TV, Mon.-thru-Fri. 7-9 a.m., thru N. W. Ayer.

Among advertisers currently reported using or preparing to use TV station time: Yosemite Winery Assn., Madera, Cal. (Carina Kan-O-Wine canned wine), thru Jewell Adv., Oakland, Cal.; J. C. Penney Co., N. Y. (chain stores), thru Ralph D. Allum Co., N. Y.; Cream of Wheat Corp., Minneapolis (cereal), thru BBDO, Minneapolis; Reader's Digest, Pleasantville, N. Y., thru Schwab & Beatty, N. Y.; E & J Gallo Winery, Modesto, Cal., thru Getschal Co., N. Y.; Sage Laboratories, N. Y. (safety bleach), thru Paris & Peart, N. Y.; Groveton Papers Co., Groveton, N. H. (Blue Ribbon paper napkins), thru Paris & Peart, N. Y.; Coffee-Time Products of America, N. Y. (Coffee-Time syrup & beverage), thru Bresnick Co., N. Y.; Cella Vineyard, Fresno, Cal. (Betsy Ross grape juice), thru Edwin Meier & Sons, N. Y.; J. B. Williams Co., Glastonbury, Conn. (Lectric shave lotion), thru J. Walter Thompson, N. Y.; Dietonic Beverage Co., Los Angeles (low-calorie beverages), thru Roy Durstine, L. A.; Bowman Biscuit Co., Denver, thru Ball & Davidson, Denver; Wyler & Co., Chicago (lemonade mix), thru Schwimmer & Scott, Chicago; Lady Esther, Div. of Zonite Products Corp., Chicago (4-Purpose liquid face cream), thru Dancer-Fitzgerald-Sample, N. Y.; Balanced Foods Inc., N. Y. (electric home juicer), thru Chester Gore Adv., N. Y.; Altex Engineering Co., Summerville, S. C. ("Flex-A-Lite" windows), thru Bishopric Green & Assoc. Inc., Miami.

Television Bureau of Advertising (TvB) reports 149 members as of July 15—140 stations, CBS-TV, 8 reps. Latest to join are Branham Co.; WEWS, Cleveland; WCPO-TV, Cincinnati; WMAL-TV, Washington; KTRK-TV, Houston; WUSN-TV, Charleston, S. C.

New Reps: Sept. 1 WWJ-TV, Detroit, goes to Free & Peters (from Headley-Reed) and WGR-TV, Buffalo, also goes to Free & Peters (from Hollingbery); KWVL-TV, Waterloo, Ia. has changed to Avery-Knodel (from Headley-Reed).

FEWER THAN 8% of Wyoming's farms have TV sets, according to Census Dept. survey conducted in Oct.-Nov. 1954 and released this week. Sparsely populated Wyoming has only one station—KFBC-TV, Cheyenne—although some border areas can receive signals from out-of-state. Grouped by counties, the figures indicate that farmers near state lines are viewing TV from Salt Lake City, Idaho Falls & Billings, Mont. Census Bureau counted only 870 TVs on 11,392 Wyoming farms (projected from 20% sample) in connection with its Census of Agriculture, being released on a county-by-county basis. Figures for first 3 complete states (Nev., N. H., Vt.) were printed last week (Vol. 11:28). The Wyoming farm TV story:

WYOMING					
County	Total Farms	Farms with TV	County	Total Farms	Farms with TV
Albany	310	58	Niobrara	381	2
Big Horn	849	69	Park	891	74
Campbell	509	4	Platte	676	56
Carbon	330	5	Sheridan	760	8
Converse	348	2	Sublette	204	3
Crook	540	5	Sweetwater	139	—
Fremont	1,271	17	Teton	98	17
Goshen	1,154	134	Uinta	301	60
Hot Springs	200	5	Washakie	290	1
Johnson	320	3	Weston	251	2
Laramie	667	296			
Lincoln	629	32	State Total	11,392	870
Natrona	274	17			

Rate increases: Aug. 1 WCIA, Champaign, Ill. raises base hour from \$550 to \$700 and adds 20 sec. at \$140, ID going from \$55 to \$70. KOA-TV, Denver, has raised base hour from \$550 to \$650, min. \$120 to \$150; KBTB, Denver, from \$450 to \$600 & \$90 to \$120. Sept. 1 WFBC-TV, Greenville, S.C. raises base hour from \$400 to \$450, adds Class AA min. only rate (7:30-10 p.m. daily) at \$112.50, Class A min. going from \$80 to \$90. Aug. 1 WTVD, Durham, N.C. raises base hour from \$350 to \$450, min. \$70 to \$90; KVOS-TV, Bellingham, Wash. hour from \$200 to \$300, min. \$40 to \$60; WLOS-TV, Asheville, N.D. from \$250 to \$300. WCNY-TV, Carthage-Watertown, N.Y. has raised hour from \$150 to \$200; CFPA-TV, Port Arthur, Ont., from \$150 to \$170; WJIC-TV, Sault Ste. Marie, Ont. from \$150 to \$170.

CBS-TV Spot Sales adds to N. Y. staff Richard P. Hogue, ex-v.p. of Headley-Reed; Robert M. Williams, from Chicago office; Norman E. Walt, ex-Harrington, Righter & Parsons; Charles McAbee Jr. Joining Chicago office are Robert Resinger, ex-WBBM-TV, Chicago; James E. Conley, ex-WISH-TV, Indianapolis; Frank R. Hussey, ex-O. L. Taylor Co.

Cute commercial: Audio portion of ReaLemon-Puritan Co.'s 8-sec. spot (for ReaLemon lemon juice) on WABC-TV, N. Y. is in French—with separate film track in English. Agency Rutledge & Lilienfeld explains: "We needed an attention getter. With only 8 seconds, we felt we'd get lost in the shuffle."

CBC-owned stations increasing rates: CBFT, Montreal raises base hour from \$700 to \$800; CBMT, Montreal, from \$500 to \$600; CBUT, Vancouver, \$270 to \$400; CBOT, Ottawa, \$250 to \$320; CBWT, Winnipeg, \$280 to \$320; CBHT, Halifax, \$200 to \$220.

Dr. Benjamin Spock, famed pediatrician, will have commercially-sponsored 30-min. program on NBC-TV Sun. afternoon this fall, continuing his weekly series on educational WQED, Pittsburgh.

Clicquot Co., pioneer radio sponsor, has "Lottie Sparkle," blonde girl in Eskimo costume, and "Klee-Ko," Eskimo boy, as animations for new TV adv. & merchandising campaigns by its 125 franchised bottlers.

NBC Film Exchange has been moved from Manhattan to new headquarters at Englewood Cliffs, N. J. under Frank C. Lopore, mgr. of film & kinescope operations.

Telecasting Notes: Purchase of RKO Pictures Corp. by General Teleradio (Vol. 11:24, 26) for reported \$25,000,000, with \$13,000,000 down payment, is now a certainty, though principals are mum on details. Deal with Howard Hughes involves RKO's 400-700 feature film backlog and physical properties, excludes RKO Radio Pictures, holding company owned by Hughes and financier Floyd Odlum . . . Under terms of deal, General Teleradio will continue theatrical film production on RKO lot for limited time, though it might sell the film producing facilities to another company. General Teleradio's interest mainly is the picture backlog—not only for its own 5 TV stations but for syndication to other stations. ABC-TV is said to be eyeing the RKO films for Sun. 7:30-9 p.m., may already be negotiating . . . General Teleradio's Tom O'Neil also plans to release some of the RKO oldies to theatres as re-issues, using others on TV in moderation so as not to depreciate their value . . . "Vidpix production swings into high gear in Hollywood this month, with an unprecedented \$28,000,000 worth of TV pix going before the cameras during the next 2 or 3 weeks," reports Hollywood *Daily Variety*. This figure is in addition to about \$25,000,000 worth of TV film already shooting, with further increase scheduled next month . . . 20th Century-Fox, now preparing hour-long film shows for its 20th Century-Fox Hour on CBS-TV next fall (sponsored by GE), plans to release same films later for theatrical showing abroad . . . Hopalong abroad: NBC Film div. has sold *Hopalong Cassidy* and *Inner Sanctum* series to Associated-Rediffusion Ltd. for forthcoming British commercial TV . . . TV success of old *Our Gang* comedies (renamed *Little Rascals*) has led New York's WPIX to dig up some early Shirley Temple one-reelers with all-kid casts . . .

ADVERTISING & TV in 1970 were subjects of some fascinating speculations in recent address by Arthur C. Fatt, Grey Adv. Agency exec. v.p. to Toilet Goods Assn., reprinted in July 1 *Grey Matter*, agency house organ. Excerpts from his talk:

"Already we have seen 63,000,000 people witness one spectacular, *Peter Pan*, on the NBC network. Now picture to yourself a manufacturer introducing a meritorious new [drug] product on *Peter Pan*. With one lightning-fast stroke, he could have brought this new product into the forefront of America's consciousness.

"Now project your thinking to 1970 with 20-30,000,000 color TV sets tuned in, many with life-size screens in 3-dimension. Think of what could happen if you were to introduce a worthy new product to 100,000,000 people with 6 or 12 minutes of commercials demonstrating the product, explaining its merits, showing what it can do and creating an almost irresistible desire on the part of the viewer to possess it. And picture in your mind's eye what would happen if that same viewer could buy the product immediately by flicking a dial.

"All that may be necessary for the consumer to make a purchase may be to push a button or two on the 'Selle-vision' panel of her TV set. One button will instantly and automatically register the customer's code number in the store; another will indicate the item wanted, whether to send it COD or charge, etc. Unbelievable? No more so than the idea of dial telephones must have seemed once . . . And what is to prevent TV giving forth scent as it does color and sound? . . .

"What will these new wonders of TV do to radio . . . Remember when radio was supposed to eliminate the phonograph from our lives? . . . Wrist watch radios are more than a dream. They are closer to reality than many of us

"Grown-up hour" in the traditional kiddie-hour 5-6 p.m. time slot is novel program switch by Los Angeles' independent KTTV, which next week begins using filmed *Mr. & Mrs. North* and *Boston Blackie* in that segment, pushing its old 5:30 p.m. kiddie show to 7 a.m. . . . More theatre on TV: DuMont's WABD, New York, has acquired right to televise its choice of 5 of the 8 plays scheduled by off-Broadway Phoenix Theatre next season, after each play has finished its run; also featured will be commentaries on each play by producer, directors, authors, designers, artists . . . You don't have to miss TV when you go to the ball game in Chicago. P. K. Wrigley, pres. of Chicago Cubs, has set aside 1200 grandstand seats at Wrigley Field as special "TV audio section," where spectators will hear the usual TV announcer's commentary while seeing the game live . . . Mrs. Catherine Kreitzer, who settled for \$32,000 this week on CBS-TV's \$64,000 *Question*, signed by Ed Sullivan for Bible readings on his CBS-TV show, starting in Oct. . . . Victor Borge, Danish comedian whose one-man show is in 2nd year on Broadway, has signed exclusive contract with CBS-TV . . . Culinary Institute of America, New Haven, Conn., doing series of 26 half-hour films titled *What's Cooking*, to be syndicated by Elan-Porter Productions, N. Y. . . . Latest movie company venture into TV, *MGM Parade* on ABC-TV (Vol. 11:26), has definitely been slotted Wed. 8:30-9 p.m., immediately following *Disneyland*, beginning Sept. 14; actor-dancer George Murphy will be director and m.c., with Pall Mall as alt. sponsor . . . Ron Serling, whose TV plays *Patterns* and *The Rack* are being made into movies, this week also sold a third; Republic Pictures bought *Taps on a Bugle*, story of a tough Army sergeant who becomes headmaster of a boys' military school.

imagine . . . Just as we now determine the time of day by looking at our wrists, we shall be able to click a tiny button on our wrist watches and get the news, the weather, music, a ball game, which only we can hear . . ."

Among Fatt's other predictions: Slick-paper newspapers, all in color, electronically printed in the home by facsimile; magazines using sense of smell as well as sight, with early deadlines eliminated through electronic transmission and reproduction.

Prospect of commercial TV, offering competition for viewership hitherto monopolized by BBC, has caused BBC to "pull its socks up," said BBC commentator Raymond Baxter at recent meeting of British Sales Promotion Assn. He for one welcomed the competition, due to start in Sept., as "a good yardstick by which we will be able to measure our own products." And Radio Luxembourg, supported largely by British advertising and competing with BBC non-commercial radio & TV, is planning ambitious autumn-winter program schedules designed to hold audience and sponsors.

As a fall film-buying guide for TV stations and ad agencies, Judy Dupuy's Broadcast Information Bureau, 535 Fifth Ave., N. Y. has issued new edition of *TV Film Program Directory—Series, Serials & Packages* (Vol. 2, Issue 6, \$15); 390-p. volume lists titles, distributors, open markets, present sponsors, etc.

Listing of 3069 film titles available for free distribution to TV stations as well as individuals, with addresses of the industries or services from which they're available, is contained in 1955 *Educators Guide to Free Films*, 15th annual edition, published by Educators Progress Service, Randolph, Wis. (591 pp., \$6).

Directory of TV-radio farm directors by city & state has been compiled by and is available on request from Phil Alampi, WRCA, N. Y.

WHIRLPOOL-SEEGER-RCA MERGER FAIT ACCOMPLI: RCA gets its rounded white goods line, long-coveted, as result of Dept. of Justice approval of the Whirlpool-Seeger merger, as proposed (Vol. 11:22) -- with all that's implied insofar as shifts in national distribution are concerned. Tipoff came early in week when Whirlpool stock jumped 8 points to 38 high, closing week at 36½, and Seeger jumped 8½ points July 15 to close at 56. Formal announcement will be made coincident with opening of Whirlpool distributor convention July 18. It will contain these salient points:

RCA and Sears, Roebuck will each hold about 20% of stock in merged corporation, to be known as Whirlpool-Seeger Corp., with Whirlpool's Elisha Gray II becoming president and Walter Seeger chairman. RCA & Sears will have minority members on board, RCA probably designating pres. Frank Folsom & corporate exec. v.p. Charles Odorizzi. RCA will contribute production of its Estate Appliance Corp. into the common pool, will brand all its white goods "RCA-Whirlpool." Sears will continue to be supplied with its own Kenmore washers and Coldspot refrigerators. Financial details will be announced next week by Mr. Gray.

It's understood Govt. interposed no objection under anti-trust laws because 9 other major concerns have had "complete lines" since 1940 -- and it looks now like battle of giants for white goods market now dominated by such names as GE, Westinghouse, Kelvinator, Frigidaire, Crosley-Bendix, Norge, Philco, et al.

* * * *

"I've never seen dealers so enthusiastic about TV. Judging from way they're gobbling up new lines, you'd think they never heard of the word 'saturation.'"

This was the general dealer reaction to the new lines in "open houses," as expressed to us by a top manufacturer this week. He could have been speaking of any line, so universal was the acclaim of dealers. Their attitude clearly betokens a confidence lacking in last few years, when cautious buying was the rule. Even allowing for their currently low TV inventories (estimated at less than 1,000,000), dealers aren't just buying for their stockpiles -- they're buying "for the market."

Their purchasing has been abetted by generally longer discounts, to be sure. And there's no denying the sales appeal of the "furniture" in the lines -- cabinet styling, colors & finishes. They also see good merchandisable features in tuning controls -- for examples, RCA's "hidden" controls, Philco's "top touch" tuning and Westinghouse's "tip top" tuning, among others.

But the tempo of TV trade currently is seasonally sluggish, however zealous the preparations for fall season. Plant shutdowns, consumer vacations, etc. have put the kibosh on business generally. Cut-price close-out sales, special deals and normal liquidation of old TV models are general. For example, in Washington this week, Admiral 21-in. table model ("new, in crates") was advertised for \$96 (regular price \$160); 21-in. Philco open-face console for \$116 (list \$230); 17-in. Motorola table model for \$79 (list \$140). Such close-outs were duplicated in other cities.

The under-\$100 sets are activating the normally dull market somewhat this summer, says NARDA managing director A.W. Bernsohn, on basis of reports from his member dealers. GE's 14-in. "portable" at \$99.95 & \$119.95 continue quite the rage in a number of big-city markets, though it's in admittedly limited supply. Indicative of interest in low price, Hallicrafters this week came out with 17-in. mahogany textured table model at \$99.95 (details of new lines introduced this week on p. 9).

Brief highlights of other major trade developments this week:

* * * *

What's With Admiral? Why is Admiral so silent these days, while its stock dipped to year's low of 21½ (closing week at 23%)? This is pres. Siragusa's explanation: "There isn't anything wrong that a little extra govt. volume wouldn't cure. Our

govt. business is off approximately 80% compared with a year ago, so even though our civilian business is considerably ahead, our over-all is slightly behind. We are doing much better in TV and refrigeration than a year ago...All in all, we are very optimistic about the future. Our bookings on the new [TV] line are up 60%. Our production in June was the highest on record." Admiral news releases this week reported (1) 78,388 TV sets produced during June. (2) Dealer purchases of consoles at distributor open houses "more than doubled" over year ago. (3) Radio receiver sales for first half at record high, running 40% ahead of last year and auguring best radio year since end of war -- radio div. sales mgr. Alfred A. Medica saying Admiral increase is 30% greater than the first-half industry-wide gain of 10%.

Economic Boom: Dun & Bradstreet survey of 1100 manufacturers, wholesalers & retailers finds 77% of them believe their dollar volume in 4th quarter of 1955 will exceed same 3 months year ago, 61% forecasting higher net profits. Some 35% said they planned to carry higher inventories than year ago, 26% anticipated higher price tags in 4th quarter. Also this week, Commerce Dept. reported national production in second quarter had increased "substantially" over record \$375 billion rate in the first 3 months of 1955.

Production: TV output, reflecting plant vacations, dipped to 53,028 week ended July 8, first week of second half of 1955. Total was way down from 129,879 preceding week and 116,698 week ended June 24. It was year's 27th week and brought production for year to date to about 3,800,000, compared to 2,800,000 in equivalent period of 1954. Radio production totaled 124,501 (77,897 auto) week ended July 8, also decreased from 212,079 (94,498 auto) preceding week and 265,592 week before. For 27 weeks, radio output was 7,200,000 vs. 5,300,000 corresponding 1954 period.

Topics & Trends of TV Trade: Broad investigation of distribution practices in major lines of consumer durables, including TV-radio-appliances, will be launched shortly after Congress adjourns by House Small Business subcommittee headed by Rep. Roosevelt (D-Cal.). Study of distributor franchises and discount house operations will be part of the investigation, he said, without mentioning how deeply TV-radio-appliances will be involved. Subcommittee has already approved his bill (HR-7096) making exclusive dealer contracts illegal.

On another merchandising front on Capitol Hill, a House Commerce subcommittee postponed action on bill (HR-2688) which would ban trans-shipment of autos and thus pave the way for similar legislation covering TV-radio. Instead, the subcommittee scheduled additional public hearings for testimony from Justice Dept., Federal Trade Commission & auto manufacturers.

* * * *

Higher prices on some major appliances, excluding TV, are planned by Philco as result of shortages and higher costs of steel, copper, aluminum and other raw materials. In telegram to distributors, pres. James H. Carmine said: "It will be impossible for manufacturers of finished goods to absorb these increased costs. This applies especially to refrigerators and air conditioners, which are heavily weighted with copper, which is in extremely short supply."

GE's new line, to be introduced July 18 at National Assn. of Music Merchants convention in Chicago's Palmer House, features 2 clock-TVs—14-in. table at \$129.95 and 21-in. open-face mahogany console at \$270. Line also includes company's first 24-in. sets, addition of another "low-boy" console and extensive use of swivel bases. New 21-in. sets are priced at \$190, \$220, \$240, \$250, \$260, \$270 & \$300; 24-in. sets are \$240 for table, \$290 for console.

Sylvania signed 2-year contract this week with IUE's Local 511, covering about 700 employes at its Buffalo TV-radio plants. Agreement omits mention of guaranteed annual wage, provides extended seniority coverage for employes if company builds additional plants in area.

Hallicrafters added 10 basic models in line shown this week at regional sales meeting in Chicago's Hotel Knickerbocker. New sets start with 17-in. mahogany table model at \$99.95, go up to 24-in. mahogany console at \$350. Some sets also come with mahogany table and casters. Nearly all sets have vertical chassis and greater voltage. The 17-in. tables are priced at \$99.95 & \$120; 21-in. table at \$150; 21-in. consoles at \$280 & \$300; 24-in. tables at \$200 & \$250; 24-in. consoles at \$300, \$310 & \$350. Eight models in old line were carried over. Also introduced were 3 portable radios, all priced at \$40.

Capehart-Farnsworth's new line, introduced this week to distributors in N. Y., starts with \$170 for 21-in. ebony table model, ranges up to 21-in. fruitwood de luxe console at \$390. Line of 9 basic models is divided into "Starline" and "Super Comet" series. All sets in latter series have front-mounted speakers and aluminized picture tubes. The 21-in. tables are \$170, \$200, \$250 & \$290; 21-in. consoles are \$220, \$300, \$350 & \$390; 24-in. table \$220. Also introduced were 10 radios ranging from 20 ebony table to \$160 8-band portable, and 11 high-fidelity radio-phonos from \$130 to \$550.

TV-radio merchandising panel July 20 will be one of features of National Assn. of Music Merchants' 5-day convention starting July 17 at Chicago's Palmer House. Speakers are Magnavox pres. Frank Freimann, "How Can a Music Dealer Successfully Promote TV?"; NARDA chairman Mort Farr, "Type of Service to Be Rendered by a Music Dealer"; F. K. Lutes, of Thearle Music Co., San Diego, "Outlook for TV-Radio Sales in Music Stores"; Wm. J. Lee, of Sherman, Clay & Co. Adv., San Francisco, "TV-Radio Advertising & Promotion."

Clark Kelsey, public relations director of Chicago's American Furniture Mart since 1939, resigns to concentrate on position as exec. v.p. of National Wholesale Furniture Assn.

Admiral TV-radio account was resigned this week by Erwin, Wasey; Russel M. Seeds Co., Chicago, now handling print media, will take on more Admiral business.

Trade Personals: Arthur L. Chapman, Sylvania v.p., adds duties of gen. mgr. of TV-radio div., Buffalo, succeeding Howard E. Riordon, now gen. manufacturing mgr. . . Charles R. Lunney promoted to adv. & sales promotion mgr., Sylvania TV-radio div., succeeding Wm. D. Strobin, recently resigned . . . Richard L. Myers, head of Paris office of Philco govt. & industrial div. (4 Rue Picot) returns as of Sept. 1 to become Chicago representative, with Robert McDonald going from Chicago office to replace him . . . E. R. Coblentz, ex-DuMont, named western mgr., Westinghouse TV-radio div., San Francisco, replacing Wm. P. Frost, who becomes independent Packard-Bell distributor in San Francisco . . . David Kaufman, ex-Sylvania, joins expanded RETMA engineering dept., now relocated at 11 W. 42nd St., N. Y. (phone remains Longacre 5-3450) . . . John O. Riggs, asst. production supt. of color tubes, promoted to mgr. of product administration, Westinghouse tube dept. . . . Oden F. Jester appointed asst. gen. mgr., Standard Coil, continuing as sales mgr. of distributor div. . . . John R. Howland, ex-Stewart-Warner & Zenith, named gen. sales mgr. of Dage TV div., Thompson Products, supervising sale of color systems & monochrome broadcast equipment . . . Larry S. Racine, pres. of Chicago Standard Transformer Corp., takes indefinite leave of absence because of ill health; chairman Wm. J. Shea adds duties of pres., with Ray Gislason appointed v.p. in charge of all plants . . . John Bentia, former exec. v.p., Alliance Mfg. Corp. (antennas, rotors, converters), named pres.-gen. mgr., replacing Murray D. Lincoln, as result of purchase of company by Consolidated Electronics Industries Corp. (North American Philips) . . . K. A. Jackson resigns as gen. mgr. of Hunt Capacitors (Canada) to become production mgr. of parent Canadian Marconi's new magnetron & power tube plant in Mt. Royal, Que.; he's succeeded by R. B. Finkle, Canadian Marconi's Toronto rep. . . . George B. Park, ex-GE adv. & sales promotion mgr., joins McCann-Erickson Sept. 1 as senior marketing executive . . . Frank Amaru promoted to gen. sales mgr. of RCA Victor's "Label X" records, replacing Joseph Delaney, now v.p.-gen. mgr. of Cadence Records . . . George Rowen, Sparton gen. mgr., elected a v.p. of parent Sparks-Withington Co. . . . Dr. James F. Battey, ex-Sylvania, named chief engineer of Transistor Products Inc., Waltham, Mass., unit of Clevite Corp. . . . H. Joseph Sarlin, ex-gen. sales mgr. of DuMont N. J. factory branch, named eastern district sales mgr., Westinghouse TV-radio div., reporting to Renville H. McMann, new eastern regional mgr.

Frederick Gordon Nixon, asst. controller of telecommunications of Canada's Dept. of Transport, Aug. 18 becomes controller, succeeding retiring G. C. W. Browne.

* * * *

DISTRIBUTOR NOTES: Sylvania appoints Wright & Wilhelmy Co., 10th & Jackson St., Omaha (J. C. Conley, pres.) . . . Trav-Ler Radio to open factory branch in Cleveland, replacing Shuler Distributing Co. . . . RCA Victor Distributing Corp., Chicago, appoints John Straus instrument sales mgr., replacing George Dorman, resigned . . . Westinghouse Electric Supply Co., Los Angeles, names John P. Adams TV-radio sales mgr., succeeding Edward G. Marten, promoted to mgr. of consumer products . . . Westinghouse Electric Supply Co. appoints Wm. B. Cone mgr. of Albany, N. Y. branch . . . GE Supply Co., Charlotte, promotes E. L. Dugger to consumer goods mgr. for Va. . . . Dallman Co., San Francisco (Philco) appoints Robert J. Parr adv. & sales promotion mgr. . . . Graybar names E. W. Windahl Indianapolis branch mgr., replaced as Duluth mgr. by D. A. Hilger.

Jack Rosen, sales v.p. of Raymond Rosen & Co., RCA's Philadelphia distributor, was hospitalized this week after being beaten and robbed of \$125 near Philadelphia home.

Financial & Trade Notes: Among officers' and directors' stock transactions reported by SEC for May, in addition to those previously published (Vol. 11:25, 27): John P. Richmond bought 150 ACF Industries, holds 200; Edward H. Litchfield bought 100 Avco, holds 100; Charles G. Munn sold 200 Consolidated Electronics Industries (controlled by North American Philips), holds 5500; Stanley F. Patten bought 100 DuMont Class "A," holds 500; Irving G. Rosenberg bought 100 DuMont Class "A," holds 200; John C. Harvell bought 200 Electronics Corp. of America, holds 500; George L. Irvine bought 900 GE, holds 1437; Donald L. Milham bought 200 GE, holds 1009; Wm. A. MacDonald bought 300 Hazeltine, holds 2300; Wilfred M. McFarland bought 100 Hazeltine, holds 310; Joseph S. McGee bought 250 Hoffman Electronics, holds 500; Arnold S. Kirkeby bought 1500 Magnavox, sold 1000, holds 1597; Thomas A. Kennally sold 3000 Philco, holds 6997; Emanuel Sacks bought 100 RCA, holds 445; Thomas B. Doe sold 800 Sperry, holds 1755; Bert T. Oakley sold 600 Sperry, holds 1820; Charles Ondrick sold 500 Sperry, holds 1400; John Sanderson sold 15,700 Sperry, holds 10,182; Paul J. Hemschoot sold 600 Tung-Sol, holds 40.

* * * *

Public offering of debentures (300, with \$1000 face value) is planned by Dolph-Petty Bcstg. Co., which seeks purchase of radio KMYR, Denver, in application filed with FCC this week. Purchasers (Wm. B. Dolph & Herbert L. Petty, major stockholders) also plan to exchange stock of Dolph-Petty for 42.5% of KULA-TV, Honolulu (Ch. 4) in which they now hold interests. Dolph and Petty are to hold 35,000 shares each, underwriters Cruttenden & Co. and Saunders, Stivers & Co. 8500 shares each, with public's debentures equivalent to 30,000 shares. Price of KMYR is \$60,000 plus cost of building facilities for 710 kc & 5 kw, for which KMYR holds CP.

Consolidated Television & Radio Broadcasters Inc. (Bitner group) reports profit of \$1,047,311 before taxes, \$505,024 after taxes for 6 months ended May 31 compared to \$1,606,320 & \$773,424 in same 1954 period. Decrease was attributed to entry of a second station in the Indianapolis market and program costs occasioned by shift of WFBM-TV from basic CBS to supplementary NBC & ABC and radio WFBM from basic CBS to supplementary ABC & Mutual. Included in report, which gave no grosses, were WOOD-TV & WOOD, Grand Rapids, but not newly acquired WTCN-TV & WTCN, Minneapolis.

Official Films Inc., which now claims 4500 share owners, reports earnings for fiscal year ending June 30, 1955 are still subject to audit but will exceed the \$317,172 earned in preceding year. Current accelerated pace of business, states pres. Harold L. Hackett, indicates profits before taxes for quarter ending Sept. 30, 1955 will exceed profits before taxes of entire fiscal year ended last June 30, so that current year "will be by far the best yet in terms of sales and earnings."

Reeves-Ely Laboratories Inc. reports net income for 5 months ended June 30 was \$1,001,733 (94¢ a share) vs. \$876,731 (82¢) same period last year.

— ■ —

Richards W. Cotton, 60, asst. to pres. of the National Co., Malden, Mass., died of heart attack July 11 while vacationing in Portland, Me. He served as chairman of top-level govt. Electronics Production Board and as director of National Production Authority's Electronics Div. during last 6 months of 1952, while on leave from his position as asst. to Philco pres. Wm. Balderston and v.p. of Philco International. At time of his death, he was serving without compensation as industry advisor to Electronics Div. of Commerce Dept.'s Business & Defense Services Administration. He is survived by his widow, 2 daughters & a son.

Color Trends & Briefs: "Nonsense," is how RCA spokesman describes dope stories that RCA will "halve" price of its color sets this fall. Current prices are \$795 & \$895. RCA will push color sales for all they're worth, backed by heavy NBC and CBS colorcasting schedules, but RCA people think current talk about price cuts may have been "planted" by a competitor as a "diversionary tactic."

Story gained currency last week when Commerce Secy. Weeks, in roundup business prediction, foresaw "sweeping" reductions in color receiver prices, bringing increased sales. Later, it was learned that Weeks' prediction was plucked out of the blue by an overzealous staff member—definitely was not result of evaluation by Commerce Dept. electronic specialists. At least one national business publication and one trade journal gave same impression recently. We checked, and here's what an RCA spokesman told us:

"It doesn't make sense. To cut the price that much would require a genius that's beyond us. We're making and selling sets and tubes, and we're in the color business to stay, but they won't be cheap for a while yet." Commenting on speculation that one-gun tube might contribute to price reductions, he took occasion to whack back at Philco pres. James Carmine's sarcastic references to RCA color promises during recent Philco distributors convention at Miami Beach (Vol. 11:26):

"It's our color tube they're using in their announced set, isn't it—even though they called it the Hytron-CBS and said they got it from Sylvania? It looks to us like their green apple has worms in it," he added, obviously referring to Philco's one-gun tube project, known as "Apple," which Philco has frankly stated isn't ready yet.

Sylvania reports it's making 3-gun tubes in sample lots for whoever wants them, including Philco, while experimenting "with all other kinds of tubes." It's also making developmental color sets, has bought some complete receivers from RCA—as have other set makers (Vol. 11:27). It will introduce color sets, disclose prices and plans, at July 28 distributors meeting in Chicago.

That RCA means business in color is also manifest from Canadian reports that color is being pushed there, notably by RCA Victor Ltd. of Canada, whose pres. F. R. Deakins this week welcomed Canadian Broadcasting Corp. plans to telecast color experimentally, starting fall 1956. Deakins said company goal is to have color set on Canadian market for less than \$1000. (Canadian receivers, due to heavy taxes, traditionally run higher than U. S. by 40% to 50% at retail.)

CBC has earmarked \$500,000 in new budget to modify transmitters in Montreal, Ottawa & Toronto, to enable them to rebroadcast color coming from U. S. networks. Goal is to start by fall of 1956.

"British Radio Leads the World" titles 18-p. colored brochure heralding annual National Radio Show to be held at Earls Court, London, Aug. 24-Sept. 3. It has 121 exhibitors scheduled, including all TV-radio manufacturers. New 66,000-ft. RCA Photophone Ltd. factory at Sunbury is scheduled to exhibit for first time—mainly high fidelity equipment. From Aug. 23-Sept. 15, Britain also is seeking overseas visitors for other radio & electronics shows—the Farnborough Flying Display & Exposition and the Engineering & Marine Exhibition. Details are available from Radio Industry Council, 59 Russell Sq., London WC-1.

General Instrument Corp. earned \$60,996 (4¢ per share) on sales of \$7,472,479 in 3 months ended May 31, compared to loss of \$176,302 on \$4,684,405 in same 1954 quarter. The 1955 data includes earnings & sales since March 1 of newly-acquired components subsidiary Automatic Mfg. Corp. (Vol. 11:26).

NBC injected more color into an otherwise almost "colorless" summer by converting to color the *Matt Dennis Show*, Mon.-Wed.-Fri. 7:30-7:45 p.m., starting July 18, adding *Vaughn Monroe Show* in color Tues.-Thu. 7:30-7:45 p.m. July 19. Singer-pianist-composer Matt Dennis replaces Eddie Fisher and Tony Martin shows for summer, Vaughn Monroe taking Dinah Shore spot. These are in addition to the 2 big color shows scheduled July 25 & Aug. 22—*Fourposter* and a spectacular starring Cyril Ritchard.

One of the most powerful color set sales stimulants yet devised is being prepared by NBC—daily hour live drama 3-4 p.m.—costing estimated \$4,000,000 and starting Oct. 3. It will include original drama plus second-run plays from *Kraft Theatre* and *Philco-Goodyear Playhouse*. Project is so ambitious that entire Burbank, Cal. color facilities will be devoted to it. Series will be best opportunity for dealer demonstrations contrived to date. It will be titled *Matinee*, with Albert McCleery as exec. producer. Almost all other color "blockbusters" are scheduled for evenings or week ends (Vol. 11:27). CBS is also expected to come up with more daytime color.

The NCAA football games to be telecast in color by NBC turn out to be: Miami-Georgia Tech, Sept. 17; Notre Dame-Michigan, Oct. 15; Iowa-Michigan, Oct. 29; Army-Navy, Nov. 26. Among big one-shots being considered is a Labor Day show featuring live pickups from National Air Races in Philadelphia, Pike's Peak auto races in Colorado, water carnival in San Diego. NBC's color mobile unit is now being rebuilt to handle 5 cameras instead of 3.

CBS's Orson Welles series (Vol. 11:28) is mighty ambitious schedule. It will comprise six 90-min. shows shot in Eastman color in Europe for total of \$3,000,000, to be shown theatrically after colorcasts. First will be *Trilby*, with Welles as Svengali; another is his modern version of *Twelfth Night*.

Halicrafters & Capehart-Farnsworth each introduced 21-in. color sets this week, both using RCA-type tubes. Halicrafters put no list price on set, though it had previously announced it would retail for \$695 (Vol. 11:18). Capehart's sets were a console at \$795, console at \$895. E. W. Gaughan, v.p. & sales mgr., estimated 100,000 color sets would be sold this year.

Eye-glasses containing prisms and red & yellow filters, plus control of studio lighting, is how to get color pictures out of black-&-white sets—according to Prisma-Scope Corp., Failing Bldg., Portland, Ore. At least that's impression given in its 40-p. brochure.

BBC experimental color transmissions will begin in London this fall, according to reports from Britain. Various systems will be tested with aim of possibly starting regular color programming by 1958.

ACF Industries Inc., whose ACF Electronics at Alexandria, Va. started in 1954 with 15 employes, now has more than 300 and expects to have 500 or more by year's end, reports sales of \$190,774,346 for fiscal year ended last April 30, down 22% from \$245,086,908 in preceding year; net income was \$6,855,320 (\$6.62 per common share), 12% under \$7,778,420 (\$7.93) year ago. ACF Electronics, among other things, is developing "Tinkertoy" or "Compac" components for TV (Vol. 11:23, 24, 27). Parent company also reports \$17,000,000 in unfilled orders for Engineering & Research Corp., Riverdale, Md., acquired last Nov. and employing 1800, mainly on govt. nuclear projects.

New 40-p. glossary of microwave and mobile communications terms has been published by RCA engineering products div., Camden.

W. Stanley Edgar, ex-contracts & services engineer, named Western Union director of development & research.

TWO STARTERS this week—one a uhf commercial outlet in Fayetteville, N.C., other a vhf educational in Champaign-Urbana, Ill.—brought on-air total to 434, of which 106 are uhf. It was a week free from news of more uhf defections, though KQTV, Ft. Dodge, Ia. (Ch. 21) wired FCC July 13 for permission to go off air for indefinite period in order to repair damage to transmission lines and antenna after being struck by lightning.

WFLB-TV, Fayetteville, N.C. (Ch. 18) is next door to big Fort Bragg, first local TV outlet in area, nearest other being WNAO-TV, Raleigh (Ch. 28), 53 mi. away. It began tests July 15 but doesn't plan programming with CBS & NBC until FCC approves projected private microwave relay, says attorney Bernard Koteen. It has 1-kw GPL transmitter with GE antenna on 40-ft. tower. Owners are 9 local business men headed by Harry B. Stein. L. W. Allen is exec. v.p.; Wm. B. Belche, sales mgr.; Marvin Rosenberg, program director; J. D. Goodrich, chief engineer. Base hour is \$150. Rep is Adam Young.

WILL-TV, Champaign-Urbana, Ill. (Ch. 12, educational) started test patterns July 14, goes on program schedule shortly, reports Richard L. Rider, asst. mgr. & program director. Owned by U of Illinois, it's the 14th educational on air. It uses 5-kw demonstrator transmitter donated by GE, with 12-bay GE antenna on tower of Memorial Stadium. Dr. David Henry, ex-JCET chairman, is now president of the university; Frank E. Schooley, director of broadcasting; Richard G. Lawson, operations director; Hubert V. Cordier, production mgr.; John R. Brugger, chief engineer. Community has one other vhf—commercial WCIA, Champaign (Ch. 3).

There were no new reports on upcoming stations this week, but latest transmitter shipments & orders reported were:

From RCA, 50-kw transmitter to KWVL-TV, Waterloo, Ia. (Ch. 7); from Standard Electronics, 25-kw amplifier to WMAL-TV, Washington (Ch. 7). Standard Electronics also announced order from CJOC-TV, Lethbridge, Alberta (Ch. 7)—due on air next fall—for new economy model 10-kw transmitter, for delivery Sept. 1, as well as 12-gain Alford antenna and multicon camera, through Canadian Westinghouse. Standard Electronics also has order for 50-kw from KFVS-TV, Cape Girardeau, Mo. (Ch. 12) for Aug. 1 delivery.

James S. Copley, chairman of Copley Press Inc., and the First National Bank of Chicago are named defendants in suit filed by William M. Copley, of Paris, alleging "gross abuse of business judgment" in purchasing KCOP, Los Angeles (Ch. 13) about 2 years ago and in otherwise acquiring newspapers, radio stations, etc. without approval of probate court. The younger brother's suit in Chicago circuit court alleges "dissipation" and "mismanagement" of the estate of their father Col. Ira Copley, who died in 1947. The Los Angeles independent TV station has been a consistent loser, it's claimed, ever since it was purchased for \$1,375,000 from Mrs. Dorothy Schiff Sonnenborn, who retained her profitable radio KLAC (Vol. 9:49,52).

Transfer of WBLN, Bloomington, Ill (Ch. 15) to Worth S. Rough, ex-gen. mgr. of WCBC, Anderson, Ind. by Cecil W. Roberts (Vol. 11:26) for token \$1 and assumption of some \$200,000 indebtedness, was approved by FCC this week. Also approved was stock issue by KOAT-TV, Albuquerque (Ch. 7) whereby radio KOAT holdings are cut from 56% to 33%, Albuquerque Exhibitors from 35% to 30%, remainder being held by minority stockholders.

Nuclear explosion resulted in "only minor surface damage" to RCA 250-watt radio transmitter and 2-way mobile communications equipment during last May's civil defense test at atomic test site in Nevada. The equipment "could have returned to the air minutes after the explosion," said RCA engineering products v.p. Theodore A. Smith. Although buildings housing the equipment were partially to completely destroyed, he said, "not a single tube or component was damaged." All the equipment, with the exception of one 2-way radio, was housed less than mile from blast center.

Community antenna system in Harrisonburg, Va. has been sold by Frederick Allman, operator of WSVA-TV (Ch. 3) there, to group headed by Martin F. Malarkey. System has 600 subscribers, sold for a reported \$60,000. Malarkey, pres. of National Community TV Assn., started with system in Pottsville, Pa., extended it to Minersville, purchased Schuylkill Haven, Pa. system last year (Vol. 10:9), plans further expansion. Name of Harrisonburg system is being changed to Harrisonburg Trans-Video Corp.

Dr. Milton Eisenhower, President's brother who heads Penn State U and is educational TV enthusiast, said his school will expand its classroom instruction by TV in next 5 years as result of survey showing practically no difference in grades of students taught by TV or by classroom lectures. So far, it has taught only psychology & chemistry by TV; next fall it will take up music appreciation & history, he said.

Educational TV at its best: Stephens College, Columbia, Mo., putting in closed circuit for simultaneous lectures to small groups of first-year students in 50 different classrooms twice weekly. Project is supported by grants for Fund for the Advancement of Education (Ford) and RCA.

Initial decision in Lamb case, by examiner Herbert Sharfman, probably won't be forthcoming until fall. FCC Broadcast Bureau and attorneys for Toledo broadcaster-publisher Edward Lamb are due to file initial proposed findings by July 25. After this, additional time (possibly 10 days) may be given for answers—and then Sharfman begins consideration.

Anti-trust suit against 12 leading motion picture makers to compel them to release 16mm films to TV and other non-theatrical outlets (Vol. 8:30) has been set for trial Sept. 20 in Los Angeles Federal Court before Judge Yankwich. Depositions, starting with RCA-NBC Chairman Sarnoff, will be taken next week.

"Sponsored" theatre-TV: Box Office Television Inc. (Sid Caesar, pres.) is offering "for local public service sponsorship" Notre Dame-Navy and Notre Dame-Iowa football games next fall, with local commercial firms acceptable to Notre Dame invited to underwrite telecast by distributing free or premium tickets.

TV hath charms to keep prisoners contented, and it even has reduced escape rate of convicts in Richland County, N.C., says supervisor C. L. Talbert. But "the boys still wander from restless camps," he says, and so he's looking for donors of sets.

The Edgar B. Stern family (WDSU-TV & WDSU, New Orleans) has provided \$145,000 fund to the Governmental Affairs Institute, Washington, affiliate of American Political Science Assn., for compilation of a handbook of American election statistics to appear biennially.

CBS commentator Eric Severeid has gifted his alma mater, U of Minnesota, \$1000 for 1955-56 scholarship to graduate student planning a TV-radio career.

Tax on theatre-TV boxing bouts—5% of admission price—will be asked by Pennsylvania Gov. Leader under proposed new boxing code.

SUMMARY-INDEX OF THE WEEK'S NEWS—July 23, 1955

SALE OF RKO to General Tire sets up new show business giant in movie-TV-radio-programming field. Other majors eye move; film network a possibility (p. 1).

BIG APPLIANCE MERGER, creating RCA-Whirlpool brand, with RCA owning 20% of new Whirlpool-Seeger Corp., due to change distribution patterns (pp. 2 & 11).

ABC SHOWING ZEST program-wise and financially as result of Hollywood tieups and new ventures, but allocations economics is still big obstacle (p. 3).

NEWSPAPERS ADVISED by Campbell-Ewald's H. G. Little to "forget worrying about TV" as a competitor and to take longer view of business expansion (p. 4).

PITTSBURGH GRANT goes to WWSW, merging with WJAS; KNTV, San Jose, starts as 435th station; NBC purchase of WBUF-TV, Buffalo, due for hearing (p. 5).

MOTOROLA'S NEW LINE follows industry pattern of easier step-ups; Admiral increases some TV prices, others likely to follow by fall (p. 9).

UHF PROBLEMS to simmer this summer, inactive with McConnaughey gone; Doerfer proposal includes all-uhf N. Y.; 4 FCC members on network study group (p. 5).

UHF BOOSTERS recommended to fill "shadows," as industry comments on FCC proposal; some ask vhf boosters, too; 3 uhf stations prefer deintermixture (p. 6).

HIGHER POWER permitted for Zone I vhf stations with heights over 1000 ft., as FCC creates new 1250-ft. ceiling; 18 due for increases, including N. Y.'s 7 (p. 7).

NBC & CBS COLOR SCHEDULES to break "chicken-egg" cycle next fall with over 12-15 hours of color weekly, stimulating set manufacturing & distribution (p. 13).

SIGNIFICANCE OF RKO SALE TO GENERAL TIRE: There's more behind General Tire's purchase of RKO Radio Pictures (Vol. 11:24,26,29) than the obvious fact that Hollywood's feature film vaults have finally been decisively cracked by TV.

The \$25,000,000 cash sale of a major movie studio to a large holder of TV and radio properties (through General Teleradio, 90% owned by General Tire, 10% by Macy dept. store interests) actually sets up a new giant in the entertainment world -- the most important move to date in the much-discussed "merger" of Hollywood and TV.

Under one corporate roof now are one of the largest theatrical film producing companies, a huge world-wide movie distribution setup, a potential top-flight TV film production outfit, a TV film distributor with mammoth stock of first-run-on-TV features, 4 TV stations (N.Y., Los Angeles, Boston, Memphis), 5 radio stations (same cities plus San Francisco) one nationwide radio network (Mutual) and 2 regional networks (Yankee & Don Lee).

What started as a quest for programming material by General Teleradio pres. Thomas F. O'Neil to keep his independent New York and Los Angeles TV outlets in the competitive race with the network flagships, appears destined to end up as a new TV-radio-movie empire -- with important ramifications for both TV and the movies.

In buying RKO, General Tire got much more than just the vaultful of 500-800 old features it originally set out to acquire -- it took over a going concern which grossed about \$44,000,000 last year and is reported by film trade press to have shown profit as result of its vast distribution operations, even though it has produced very few pictures of its own in the last 5 years.

The obvious facts are these: RKO-Radio's theatrical distribution activities will continue, the company operating as subsidiary of General Tire, under Thomas O'Neil. With theatrical exhibitors crying for more product, it's likely that he'll put RKO wholeheartedly back into movie production (perhaps floating a stock issue to supply needed capital to start production rolling). Either General Teleradio or RKO can be expected to make TV films at RKO studios in Hollywood, Culver City & N.Y.

Many of the top RKO feature film properties may go to theatres for re-runs before they're released to TV -- if it's found that the profit potential is high;

one RKO oldie -- "King Kong," originally released in 1933 -- went through a highly successful theatrical reissue last year.

What did General Tire get from RKO's vaults? Nobody knows exactly how many features and short subjects. Among outstanding boxoffice attractions were the Fred Astaire-Ginger Rogers musicals, some Shirley Temple films, Howard Hughes' controversial "The Outlaw," academy award winner "The Informer" and pictures featuring Myrna Loy, Cary Grant, John Wayne, Gary Cooper, Gregory Peck, Lucille Ball, Henry Fonda, et al. A glance through RKO's titles of the last 20 years also reveals plenty of stinkers -- some of them probably not even suitable for free showing on TV.

Included in the purchase were two unreleased films made by RKO under Howard Hughes -- "Jet Pilot" and "The Conqueror" -- and there's some speculation that these may be given their premiere via TV.

As with his "Million Dollar Movie" series and his TV film properties, O'Neil will eventually syndicate RKO features to other stations. Whether he will actually set up a "film network" -- selling the time as well as the programs -- is an unanswered question, but it's recalled that in the past he's hinted at the possibility.

Does subscription TV fit into the picture? Best guess is that it probably does not, although O'Neil has loaned his WOR-TV, New York and his WGTH-TV, Hartford (whose sale to CBS now pends FCC approval) for experiments with the Skiatron pay-as-you-see system. General Teleradio needs the new-to-TV feature material now, isn't too interested in holding out for pay TV, which is still a long way off -- though there's no question that O'Neil is being approached by fee-TV proponents.

Will the sale pry open the vaults of the other majors? One theatrical trade publication accuses Howard Hughes of pulling his finger out of the hole in the dike and starting the flood. The flood was inevitable, of course. But the events of this week have certainly stirred the other movie producers into serious thought as to whether the time is now ripe. The only remaining question: Who's next and when?

A NEW GIANT IN THE WHITE GOODS MARKET: Biggest of all the TV-radio manufacturers, RCA moves into a relatively new arena as it prepares to mix it with long-established competitors for supremacy of the home appliance markets with new brand that combines 2 respected names -- "RCA-Whirlpool." It's a battle that promises to exert profound changes not only at consumer levels but also among rival manufacturers, suppliers, distributors & dealers. And, no less important, it will have new meaning for all others who depend on these giants for revenue -- including stations, agencies, etc.

Advertising & merchandising battle royal for consumers' white goods as well as TV-radio dollar will be far more intense than ever -- what with RCA-Whirlpool-Seeger-Sears combine lined up, as result of their factory-source merger last week (Vol. 11:29), against GE, Westinghouse, Frigidaire, Kelvinator, Crosley-Bendix, Norge, Philco, Admiral, Maytag & others whose names have long been household words. Reduced to its simplest terms, merger brought together RCA's air conditioner and Estate stove business with Whirlpool's washer-dryer operations (nation's largest) and Seeger's big refrigerator business. As one newsman described merger, "it's like putting Ted Williams and Willie Mays on the same team."

Sears, Roebuck will be both a partner at the factory and competitor at the retail counter. Like RCA, it will own 20% of merged Whirlpool-Seeger Corp., which will turn out RCA-Whirlpool line; but it will also continue to be supplied with own brand of Kenmore washers and Coldspot refrigerators from the combined company.

Pattern of distribution threatens to be a hodge-podge before it's finally settled. It's manifest RCA entered the consolidation to give its distributors the benefit of a rounded white goods line. Of RCA's 69 distributorships, 17 currently also handle Whirlpool. And for the rest, it presumably means switching Whirlpool lines to all or most of them -- including RCA-owned distributors in Buffalo, Chicago, Davenport, Detroit, Grand Rapids, Kansas City & Los Angeles -- or else switching RCA lines to existing Whirlpool distributors. An RCA spokesman assures, however, that all RCA-Whirlpool distributors will be selected on merit; that nothing will be done overnight and plenty of time will be allowed to make adjustments; and that contractual obligations will be respected fully in any changeovers made.

[Details of merger, probably the biggest in appliance history, are on p. 11.]

ABC HITCHES WAGON TO HOLLYWOOD STAR: With its smash-hit Disneyland, ABC apparently has found the formula for adapting the movie industry's skills to TV -- and during a visit to Hollywood this week it seemed evident to us that ABC's plans for further exploitation of that formula could give it excellent chance of eventually blossoming into a really strong third network. The upcoming season should tell.

Program-wise, ABC-TV now feels it has something to crow about -- and last week's press junket to Hollywood afforded previews of some movie-originated shows that evoked as much enthusiasm as did opening of much-publicized Disneyland park.

Keystone of its new programming is ABC's happy pact with Walt Disney studios, where magic is now being scientifically compounded for 6 hours a week of TV shows, as well as the regular Disney movie releases (One Disney official told us: "We turn out more in a couple of days now than we used to in a year".)

We saw some of next season's Disneyland films -- there'll be 24 new ones -- and they are of same high quality as this year's series. One difference is that the new Disneyland shows will be aimed more at whole-family audience than at the kiddies alone. Included will be 2 scientific films, authoritative as textbooks but as enjoyable as Donald Duck. One of these -- "Our Friend the Atom" -- will have occupied fulltime energies of crew for 2 years when it is finally telecast next spring.

But ABC's biggest programming whammy is its breakthrough into daytime kiddie TV through its hour-long Disney-produced Mickey Mouse Club. Slotted for 5-6 p.m. daily in all time zones (via 2 telecasts from New York, 2 from Los Angeles), it's taking on the formidable competition of NBC-TV's Pinky Lee-Howdy Doody sequence. But ABC topkicks point out that show was nearly sold out even before prospective sponsors saw clips, and confidently predict lineup of 100-plus stations, including some which carried Howdy Doody this season. Plan is to make 100 shows, re-run best 20.

If samples we viewed at Disney Studios are typical of whole series, Mickey Mouse Club is due to be a winner with children of all ages (including our age). The shows combine new and old cartoon material, instructive fun, and live segments from all over world, as well as specialty acts by group of talented kids -- completely up to the standards of wholesome entertainment for which Disney is noted.

* * * *

ABC is hoping its new Warner Bros. show will be "another Disneyland" -- this one aimed completely at adults. On our visit to Warners lot we found TV completely dominant, with 3 large sound stages exclusively devoted to shooting the hour-a-week Warner Bros. Presents, using most elaborate sets ever built for TV film. All material will be new, based on characters and settings of past Warner Pictures.

ABC's third movie pact is with MGM for 30-min. weekly series. We found very little concern over TV at MGM studios, got impression that no production had begun on the TV series. The show will rely mainly on old theatrical short subjects, tied together by George Murphy as m.c. and with newly produced blurbs for current MGM releases, borrowing Disney's "behind the scenes at the studio" format.

Network has plans for still another Hollywood show -- this one Sun. 7:30-9 and consisting of never-before-on-TV film features, possibly including some of the RKO backlog taken over by General Tire (see p. 1), if negotiations are successful.

* * * *

While other networks continue to diversify further into the manufacturing business, ABC apparently has few ambitions in that direction (though it does own 1/3 interest in Microwave Associates, small Boston electronics producer). ABC and its parent American Broadcasting-Paramount Theatres believe there's no business like show business -- and their diversification has all been in that direction.

Most important AB-PT extra-curricular activity is participation in the new Disneyland Park (under terms of its TV contract with Walt Disney). AB-PT owns about 35% of it and is hankering to buy more of the 160-acre Anaheim, Cal. property -- which some day could bring it more income than its entire broadcasting operation.

Disneyland's promotional value is tremendous -- its name being the same as the ABC-TV show. The \$17,000,000 park is due to become as big a tourist mecca as Yellowstone National Park or Niagara Falls; it will certainly get more promotion

than either. The Park, which should gross around \$20,000,000 a year, will be publicized in national advertising by some of the 53 concessionaires and exhibitors -- including such big names as TWA, Santa Fe, General Foods, Eastman Kodak, Quaker Oats, Monsanto, American Motors -- all of whom lease space at \$20 a square foot.

Almost feverish public interest in the park and in ABC-TV's Disney activities was strikingly confirmed when network's June 17 special 90-min. Dateline Disneyland telecast far outranked all competition -- including Ed Sullivan -- in Trendex survey.

AB-PT stands to gain from Disneyland park in other ways, too. Its United Paramount Theatres operates 5 refreshment stands there, and it's one of landlords of 650-unit \$10,000,000 luxury Disneyland Hotel (which promises "color TV in every room") being built by Wrather-Alvarez interests, owners of KFMB-TV, San Diego. being built by Wrather-Alvarez interests, owners of KFMB-TV, San Diego.

AB-PT's latest expansion is into phonograph record field, through its Am-Par label -- which has rights to Disney material, including some brand new ditties to be aimed at the younger set in the Mickey Mouse Club show.

* * * *

Just 2½ years after the infusion of new showmanship and new money into the ABC organization through merger with United Paramount Theatres, the network's programming innovations and new sponsorships are beginning to register on the balance sheet. Network is solidly in black and AB-PT financial statement this week (see p. 13) discloses second-quarter profit double that of last year's same period, with figure for first half nearly twice 1954's -- and next season should be even better.

But ABC-TV is still a poor third in the network business -- its monthly billings never approaching even one-third of CBS's or NBC's. ABC chieftains know that while showmanship and money will help, something else is needed to pull the network up to major league status -- time clearances on more TV stations. Limiting factors are economics of TV stations and the FCC's allocation plan -- neither of which is conducive today to 3 strong networks. ABC pres. Robert Kintner had this in mind at last May's NARTB convention when he pointed out that only 42 of nation's 233 TV markets had 3 or more outlets (Vol. 11:22).

Lacking continual access to stations in all markets, ABC-TV's strategy now -- as exemplified by its Hollywood programming -- is to make its schedule so strong on certain days and in certain time segments that it can attract sponsors and outlets in 2-station markets which formerly were closed to it.

SAGE ADVICE TO NEWSPAPER COMPETITORS: From one of top figures in the advertising business came some profound advice to those newspaper publishers still stewing about TV as a competitor. Said Campbell-Ewald pres.-chairman Henry G. Little, speaking last week before the Newspaper Advertising Executives Assn.:

"I don't think TV will ever take the place of the newspapers any more than it did of radio. TV seems to be well on its way to replacing network radio, but I don't think it can hurt newspapers too much, nor do I think it has significantly affected local radio which is in the same boat."

Mr. Little's reasoning was that TV can help the newspaper business, in fact merits editorial support, for it's a stimulus to "the tremendous business expansion that appears to be ahead. If newspapers will forget worrying about TV for a while and take a little broader viewpoint of what's down the road [they will] share this expanding business -- perhaps even increase their share."

Increased lineage will develop, too, from sponsors backing up their TV shows as they fight for audiences, he noted. If the newspapers had been alert, he added, such competition as the program-listing TV Guide, with its more than 2,000,000 circulation, might never have started. (He might have added that more than 110 newspapers, out of the 434 on the air, are identified with alert newspaper ownership, as disclosed in our TV Factbook No. 21.)

Another speaker at same session was Harold Barnes, director of ANPA Bureau of Advertising, but he had another "practical competitive" angle: Noting that a lot of automobile dealer and beer advertising is being lost to TV and radio, he urged that newspaper space salesmen concentrate on sponsors of programs with low ratings.

FCC GRANTED 2 CPs this week—to WWSW, Pittsburgh (Ch. 11) and to Vidicon Industries of America, Laredo, Tex. (Ch. 8)—as one new vhf station started test patterns to bring on-air total to 435. The Pittsburgh station is to be owned jointly by *Post-Gazette* and H. J. Brennen interests; the Laredo outlet 50% each by H. C. Avery Jr., architect, and David H. Cole, contractor. This week, too, one CP was cancelled—for WRNY-TV, Rochester, N.Y. (Ch. 27), held by Schine Theatres, on which construction never started.

New starter is KNTV, San Jose, Cal. (Ch. 11) which started testing July 21, plans programs later, probably as an independent since networks all have San Francisco affiliations. It's only 42 mi. from San Francisco, uses 2-kw RCA transmitter with 12-bay antenna on 218-ft. Ideco tower on Peak Loma Prieta, is designed to cover valley area up to Palo Alto. A. T. Gilliland is owner of Sunlite Bakers, the CP holder, with Harry Maynard as mgr., Harry Bartolomei as chief engineer. Base rate will be \$300. Rep has not yet been chosen.

Grant of second commercial vhf in Pittsburgh, looks toward merger of Block newspaper's WWSW with Brennen interests, who will sell their WJAS. Commission said CP "is without prejudice to any action the Commission may take with respect to any future application to effectuate a contract of June 2 which resolved these competitive applications." At same time, FCC dismissed Ch. 11 application of WENS, Pittsburgh (Ch. 16), which sought to compete for the channel—saying WENS was never a party to the proceeding, had no right to join now. WENS plans court appeal.

* * * *

NBC's second uhf purchase—WBUF-TV, Buffalo (Ch. 17)—was snagged this week when FCC, acting on objections of present NBC affiliate WGR-TV (Ch. 2), sent WBUF-TV a McFarland Letter indicating hearing is required. FCC said that WGR-TV had raised "serious questions" about extent of NBC's station ownership and

that it's concerned about anti-trust suit pending against RCA. NBC's purchase of WKNB-TV, New Britain, Conn. (Ch. 30) is already scheduled for hearing.

Efforts of TV-radio manufacturer H. L. Hoffman to get his KOVR, Stockton, Cal. (Ch. 13) designated a San Francisco station were turned down as Commission ruled San Francisco already has plenty of stations and Stockton shouldn't be deprived of its only vhf channel.

Shift of Ch. 21 from Huntington, Ind. to Ft. Wayne, requested by WANE-TV (Ch. 69) and WINT (Ch. 15), was denied by FCC because co-channel spacing with Campaign-Urbana, Ill. would be too short. At same time, Sarkes Tarzian, who owns WTTV, Bloomington, Ind. (Ch. 4) and who has applied for Ch. 21 at Roanoke, Ind., with transmitter 3 mi. from Ft. Wayne, was sent McFarland Letter which frowned on that method of getting into Ft. Wayne. Tarzian will probably find another site for projected satellite.

* * * *

Though FCC has "5-mile rule" pending—to require transmitters to be located within 5 miles of principal city—Commission granted more distant sites to 2 grantees. KTRB-TV, Modesto, Cal. (Ch. 14) was authorized to build on Mt. Oso, 22 mi. from Modesto—Commission noting that station proposes no change in studios or programming or any loss of service to Modesto. KWVL-TV, Waterloo, Ia. (Ch. 7) was allowed to move to site 15.5 mi. from city on grounds it would be less of an air hazard, and would increase rural service.

■

FCC-requested modification of "protest" provisions of Communications Act (Vol. 11:26, 28) was passed July 21 by House, 77-10—but not without sharp debate. Most of those opposed expressed fear bill would render uhf stations defenseless against encroachment of high-power vhf outlets. Senate communications subcommittee under Pastore (D-R.I.) this week approved same measure, which will be considered by full Commerce Committee July 27. Passage of bill is certain—unless Senate drops it in last-minute race for adjournment.

ALLOCATIONS SITUATION will remain unsettled at FCC until Sept., now that Chairman McConnaughey has left for Europe (after designating Comr. Webster acting chairman). Then, Commission will come to grips with deintermixture, with Comr. Hyde's suggestions about weighing economics of allocations (Vol. 11:28), and with such things as Comr. Doerfer's drastic reallocation proposal which he laid before colleagues this week (with tongue in cheek, most observers believe).

A staunch opponent of deintermixture up to now, Comr. Doerfer proposed that Commission go the whole hog if it wants to help uhf—by moving all stations in major markets, such as New York, to uhf. Deintermixture proposals to date, he said, "would not solve the uhf problem but would create for a long time small islands of uhf markets contributing little or nothing to the objectives of the Sixth Report & Order."

He urged that vhf hearings be decided immediately in Madison, Peoria, Evansville & Hartford, stating: "It is manifestly unfair to single out a few communities which happened to be at the tail end of the priority hearing order for an experiment which gives little promise of making any substantial contribution to the objectives of the Sixth Report & Order."

Stating that cost of uhf conversion in New York "may well approximate \$500,000,000," Doerfer asked: "Why should a resident of New York City be permitted

to enjoy a choice of 7 channels without conversion costs and a farmer in Wisconsin, Indiana, Connecticut, and New York be denied any TV service?"

Rest of commissioners were a bit flabbergasted, were inclined (quite correctly, we believe) to feel that their colleague was seeking to dramatize, through *reductio ad absurdum*, his belief that current deintermixture proposals are futile. As one observer put it: "They wouldn't touch the idea with a 10-ft. pole."

Commission made first move, meanwhile, toward implementing network study, for which Congress has given it \$80,000, by designating 4 members as a "network committee"—McConnaughey, Hyde, Doerfer, Bartley. They're looking for a manager of the study, to come from outside FCC, but he isn't expected to be hired before McConnaughey's return Sept. 10.

■

KEDD, Wichita (Ch. 16) filed petition for reorganization under the bankruptcy act in Federal district court in Topeka July 21, pres.-mgr. Stanley Durwood claiming assets of \$551,000, unsecured debts of \$190,000 and secured or partially secured debts of \$520,000. Meanwhile, in state court, Ziv TV filed claim for \$20,000, Standard Rate & Data for \$1200; previously, MCA-TV had asked for receivership in Wichita Federal court on unpaid bill of \$5200, Atlantic Television Corp. on \$1400 (Vol. 11:28).

Further delay in Lamb case decision was indicated this week when examiner Herbert Sharfman extended deadline for filing initial proposed findings from July 25 to Aug. 15 at request of Broadcast Bureau.

Personal Notes: Howard S. Meighan, CBS v.p. since 1946 and first pres. of CBS Radio, named CBS-TV v.p. in charge of western div.; he was network's chief executive in Hollywood 1949-51 . . . Charles L. Glett, recently CBS-TV network services v.p., Hollywood, has joined exec. staff of General Teleradio to concentrate on motion picture activities . . . Capt. Wm. G. H. Finch, onetime Hearst Radio chief engineer and an inventor of facsimile systems, retires Aug. 1 from the Navy (Office of Naval Research) . . . Peter J. Smith promoted to mgr. of NBC telesales dept., succeeding Erik Hazelhoff, now mgr. of partic. programs . . . A. N. Bender promoted to gen. sales mgr., WHAM-TV & WHAM, Rochester, N. Y. . . . Robert M. Fisk, ex-NBC Film Exchange, named film supervisor, ABC Film Syndication . . . Fred Weber has resigned as gen. mgr. of WFPG, Atlantic City, to take charge of his upcoming WHTN-TV, Huntington, W. Va. (Ch. 13) due on air in Sept.; his successor at WFPG is Harry H. Foster . . . Hal Hackett, pres. of Official Films, elected chairman, succeeding Mike Nidorf, resigned . . . H. J. Eells succeeds Robt. Hoffman, resigned, as TPA Chicago sales mgr. . . . Robert Schlinkert, gen. sales mgr., WKRC-TV, Cincinnati, adds duties of asst. to David G. Taft, exec. v.p. & gen. mgr., with Roger Read becoming local sales mgr. . . . Peter Storer leaves CBS Spot Sales to rejoin Storer Bcstg. Co. as N. Y. national sales mgr. for WAGA-TV, Atlanta & WBRC-TV, Birmingham . . . John R. Overall, ex-CBS Radio eastern sales mgr., joins NBC-TV sales . . . Margot Anderson, ex-radio WSPA, Spartanburg, S. C., named exec. secy. of American Women in Radio & TV, replacing Betty Chapin, resigned . . . Frank Blotter, ex-Ruthrauff & Ryan, named v.p. & TV-radio director, Mumm, Mullay & Nichols, Chicago . . . Bradford B. DeMarcus, ex-Dage Products & radio WIBC, Indianapolis, named TV-radio production, Caldwell, Larkin & Sidener-Van Riper Inc., Indianapolis . . . Wickliffe W. Crider, TV-radio v.p., and G. Maxwell Ule, research v.p., Kenyon & Eckhardt, added to board of directors . . . J. J. Neale, v.p. of Dancer-Fitzgerald-Sample, takes over duties of TV-radio director, replacing Alvin Kabaker, resigned . . . Miss Pat Walsh placed in charge of new Hollywood branch of Campbell-Mithun Inc., Minneapolis, at 1680 N. Vine St. . . . Connie Ryan resigns as DuMont trade press editor to join Lennen & Newell on P. Lorillard Co. (Old Gold) account.

Lester W. Spillane is new chief of FCC Renewal & Transfer Div., filling vacancy left by resignation of Walter Powell, who joined NARTB staff. Spillane is a veteran Commission attorney, having joined Commerce Dept. radio div. in 1928, continuing with old Federal Radio Commission and with FCC. He has been asst. chief of Safety & Special Radio Services Bureau, is being succeeded by Joseph M. Kittner, ex-asst. chief of Broadcast Bureau (Vol. 11:29). Two important Broadcast Bureau jobs remain to be filled—chiefs of Broadcast Facilities and Hearing Divs.—and new Broadcast Bureau chief Edward F. Kenehan hopes they'll be taken care of within a month.

Two NARTB appointments this week: Robert L. Heald, with Welch, Mott & Morgan since 1947, becomes NARTB chief attorney Sept. 1, succeeding Vincent T. Wasilewski, new mgr. of govt. relations dept. succeeding v.p. Ralph W. Hardy, who becomes CBS Washington v.p. Heald is onetime law clerk to ex-Chief Justice Groner of U. S. Court of Appeals and was a wartime FBI agent. Also this week, Fred Garrigus, ex-CBS & WEEL, Boston, who had headed own Boston public relations firm, was named to new post of NARTB mgr. of organizational services, assuming duties of Oscar Elder, Hardy's former asst. now with Robert K. Richards Public Relations.

UHF BOOSTERS, or "amplifying transmitters," as FCC terms them, were generally recommended as good means of filling "shadows" in normal service areas of uhf stations—as industry filed comments this week on FCC proposed rule-making (Vol. 11:14).

RETMA's comments, submitted by Ben Adler, chairman of satellite-booster committee, are probably most representative. RETMA suggests that boosters be handled on case-to-case basis, tailoring them to each station's needs; that FCC adopt no blanket minimum powers, heights or separations; that boosters be permitted within a station's normal Grade B coverage area, assuming station were using maximum power and height; that no limitation be placed on number of booster per station; that unattended operation be authorized.

RETMA recognizes possibility boosters may degrade color somewhat, asks that color specifications be delayed until more information is available. Sylvania, in separate comments, says that "sound engineering opinion indicates that no substantial color degradation would occur."

Sylvania also reported that it has operated successful 10-watt booster in Emporium, Pa. for 4000 hours; that booster can be built for about \$19,500, operated for some \$9950 annually. Adler stated that interest shown by uhf operators in his experiments indicates that "practically every TV station operator utilizing a uhf channel is experiencing some sort of shadow problem which emphasizes the need for this type of service." RCA and NBC filed separate comments, both in line with RETMA recommendations.

Vhf boosters should also be permitted, according to WSM-TV, Nashville, which has had considerable experience operating vhf amplifier at Lawrenceburg, Tenn., 68 mi. from Nashville. Similar request was made by Quincy Valley TV Inc., Quincy, Wash., non-profit group of some 350 area residents who have been served by illegal vhf boosters. Group claims that on-channel vhf boosters can be built for \$1500, compared with 10 times as much for uhf "translator" such as is being operated experimentally in Manson, Wash. It also states that community antenna service is uneconomical because of low population density.

Three uhf station operators dissented from others' recommendations, stating that deintermixture, not boosters, will give uhf the help it needs. Stations filing were WFIE, Evansville, Ind.; WEHT, Henderson, Ky.; off-air WKLO-TV, Lexington, Ky.

Laurence G. Woodford, 66, retired gen. mgr. of AT&T Long Lines Dept., was found dead of a bullet wound July 16 at his home in Wilton, Conn. It was ruled a suicide; he had been in ill health.

John D. Allison, 41, sales mgr. of KGMB, Honolulu, and with Raymer and Headley-Reed before moving to Hawaii in 1952, died of a heart attack July 15. Survivors are his wife and 10-year-old daughter.

David Chapin, 15-year-old son of Slocum (Buzz) Chapin, ABC-TV network sales v.p., was one of 7 boys killed July 11 in an avalanche while climbing a mountain in Canadian Rockies during vacation near Banff.

J. Scott Milne, 57, IBEW pres., died July 20 at Portland, Ore. of a heart attack. Head of the 625,000-man union since April 1954, he is survived by his wife, 2 sons.

Belgian Post Office, which runs the country's 4 TV stations, now printing the phrase "Be a televiewer" on postage stamp cancellations.

ZONE I VHF STATIONS may now operate with full power permitted by FCC rules (100 kw for Ch. 2-6, 316 kw for Ch. 7-13) and with antenna heights up to 1250-ft. above average terrain. FCC this week finalized year-old proceeding which raises maximum from 1000 ft. Immediate effect is to permit 18 Zone I stations (northeast U. S.), now operating with less than maximum powers from heights above 1000 ft., to increase power. These include 7 in New York City. Rule doesn't affect uhf stations; they're permitted full power up to 2000 ft. in all zones.

Decision was a compromise, as expected (Vol. 11:2). Rule-making had been requested by WBEN-TV, Buffalo and WSAZ-TV, Huntington, both seeking to increase output to 100 kw with present antennas. FCC's original proposal would have increased Zone I ceiling to 2000 ft., same as in Zones II & III, but it brought flood of opposition resulting in the 1250-ft. compromise.

Seeking to forestall criticism that new rule would permit big vhf's to encroach on other stations' areas, particularly uhf's, FCC said: "The effect of the amendment would be to increase the limitation of other stations on a line between [stations increasing power] in the order of some 1 to 3 miles, assuming such other stations did not similarly increase antenna height and power. The extent of the increased coverage for stations going to the new maximum would be in the order of 4 to 5 miles, assuming no interference. Accordingly, we believe that stations operating under the new rule would have very little impact on the operation of other stations, both vhf and uhf, while at the same time such stations as WBEN-TV and WSAZ-TV would, through the use of maximum power and increased antenna height, be enabled to improve the service rendered to the public."

Commission also foresaw little possibility that new

Eventual U. S. Supreme Court ruling is expected to result from this week's indictment of UAW for using funds to pay for programs presenting Sen. Patrick McNamara and other Michigan Democratic candidates over WJBK-TV, Detroit during campaigns last year. Indictment charges violation of Corrupt Practices Act which prohibits unions, banks & corporations from using general funds for political purposes. Matter has never been tested in courts. UAW spent \$5985 for 9 programs, also invited GOP candidates to participate but they declined on grounds programs were illegal. UAW pres. Walter Reuther denied violating law, said that constitutional guarantees of freedom of press and speech permit union to express views through purchase of TV-radio time. He declared indictment was "inspired" by Postmaster General Arthur Summerfield and State GOP chairman John Feikens in effort to "save face" after party's defeat in Michigan last fall.

RCA has delivered "candelabra" antennas to be used by Dallas' WFAA-TV & KRLD-TV atop 1521-ft. Ideco tower, now past 1200-ft. mark. It will be 2nd tallest man-made structure, surpassed only by 1572-ft. tower of KWTW, Oklahoma City (Vol. 10:14; 11:8). Each antenna is of standard type modified to withstand high-altitude winds and will be mounted on 2 corners of triangular platform, 75-ft. apart.

GE's first image orthicon tubes are now in production after several years' preparation, will be delivered in early fall; GE also plans vidicon production. Up to now, RCA has been sole U. S. source of image orthicons, with production at Lancaster, Pa. plant. Westinghouse also plans to make them.

rule would encourage construction of taller towers and creating greater air hazards, pointing out that it has never had any limitation on physical height of towers and that case-to-case evaluation of hazards is always made.

The 18 Zone I stations which can now increase power are as follows, with new possible powers indicated, including presently authorized powers in parentheses: Detroit, WWJ-TV 100 kw (97.7); Manchester, N. H., WMUR-TV 316 (112); Newark-New York, WATV 316 (180); Binghamton, WNBC-TV 316 (166); Buffalo, WBEN-TV 100 (54); New York, WABC-TV 224 (110), WABD 79 (37), WCBS-TV 89 (42), WOR-TV 316 (129), WPIX 209 (100), WRCA-TV 63 (25.7); Schenectady, WRGB 100 (93); Cleveland, WEWS 100 (93); Dayton, WHIO-TV 316 (200); Johnstown, WJAC-TV 100 (70.8); Harrisonburg, Va., WSVA-TV 18 (8.32); Bluefield, W. Va., WHIS-TV 100 (50.1); Huntington, WSAZ-TV 100 (46.8).

New rule also makes it possible for Zone I CP-holders not yet on air to get modifications upgrading powers if their heights are greater than 1000 ft. Text of new rule reads as follows:

"(1) In Zone I, on Channels 2-13, inclusive, the maximum powers specified above for these channels may be used only with antenna heights not in excess of 1250 ft. above average terrain. Where antenna heights exceeding 1250 ft. above average terrain are used on Channels 2-13, or antenna heights exceeding 2000 ft. above average terrain are used on Channels 14-83, the maximum power shall be based on the chart designated as Appendix III, Fig. 2(a)." A new chart showing power-height relationships is substituted for old Appendix III, Fig. 2(a). Decision is Notice 55-802, Doc. 11181, effective Aug. 31. Copies are available from Commission or we'll get you one.

Power increases: KFMB-TV (Ch. 8) & KFSD-TV (Ch. 10), San Diego, both went to 316-kw ERP July 20; earlier, WTOG-TV, Savannah (Ch. 11) went to 209-kw; KOMU-TV, Columbia, Mo. (Ch. 8), to 251-kw.

Three NLRB actions this week affecting TV: (1) IBEW petition to represent TV-radio announcers and directors at KOLN-TV & KOLN, Lincoln, Neb. was turned down because bargaining unit should include "other employes who regularly or frequently appear before the cameras and microphones . . . including sports director, production director, newscasters and television personalities." Since IBEW had not demonstrated enough interest among this larger group, Board dismissed petition. (2) In case of unnamed station which had fired 4 TV directors who had refused to quit union, NLRB general counsel upheld regional decision that the men were "supervisors within the meaning of the Act and therefore the company had no duty to bargain concerning them." (3) On similar finding that directors were supervisors, board dismissed IBEW petition against KFMB-TV, San Diego.

This week's transmitter shipments: From GE—35-kw transmitter with film chain & portable camera chain to upcoming WKRQ-TV, Mobile (Ch. 5) due in Sept.; 5-kw transmitter to upcoming KTRE-TV, Lufkin, Tex. (Ch. 9), also Sept.; 5-bay helical antenna to WFLB-TV, Fayetteville, N.C. (Ch. 18). From RCA—25-kw amplifier to upcoming KCRA-TV, Sacramento (Ch. 3) due in Sept.; 12½-kw transmitter to upcoming WOSU-TV, Columbus, O. (Ch. 34, educational) due late next fall.

Tributes to Bob & Helen Coar, who celebrated 20th anniversary of establishment of their radio studio on Capitol Hill July 20, came from leaders of both Senate & House in floor speeches that day. TV studio was added in 1952. The facility currently is used by 269 Representatives & 80 Senators.

Network Accounts: Oldsmobile, for 3rd straight year, will sponsor 1956 Academy Awards nominations & presentations on NBC-TV next March after Motion Picture Assn. of America this week rejected proposal for movie industry-wide sponsorship. Cost of televising "Oscar" shows was said to be about \$900,000, which MPAA board regarded as too expensive . . . Ed Murrow's *See It Now*, dropped by Alcoa last month, will be presented next fall on irregular schedule as either hour or 90-min. program in undetermined evening time, no sponsor signed yet; no decision yet on replacement for Tue. 10:30-11 p.m. period, which has become more valuable as result of success of \$64,000 *Question* 10-10:30 p.m. . . . American Tobacco (Pall Mall) & General Foods (Instant Maxwell House Coffee & Minute Rice) to be co-sponsors of *M-G-M Parade* on ABC-TV starting Sept. 14, Wed. 8:30-9 p.m., immediately after *Disneyland*, thru Sullivan, Stauffer, Colwell & Bayles, Benton & Bowles and Young & Rubicam . . . Ralston Purina to sponsor *Grand Ole Opry* on ABC-TV starting in fall, every 4th Sat. 8-9 p.m., thru Gardner Adv. . . . Webster-Chicago to be alt. sponsor of *Tony Martin Show* on NBC-TV starting Sept. 5, Mon. 8:30-9 p.m., thru John W. Shaw Adv., Chicago . . . Mobile Homes (trailers) buys 15 partic. on NBC-TV's *Today*, Mon.-thru-Fri. 7-9 a.m. & *Tonight*, Mon.-thru-Fri. 11:30 p.m.-1 a.m., thru J. Walter Thompson . . . DuPont drops *Cavalcade of America*, will replace it with *DuPont Cavalcade Theatre* on ABC-TV starting Sept. 13, Tue. 9:30-10 p.m., thru BBDO; new series of 26 films will be produced by Four Star Productions Inc., Culver City, Cal. (Don Sharpe) . . . Minute Maid-Snow Crop Frozen Foods, for 2nd straight year, to sponsor Tournament of Roses from Pasadena Jan. 2, 1956 on NBC-TV, possibly in color, thru Ted Bates & Co. . . . Miller Beer to sponsor half of College All Star-Cleveland Browns football game on ABC-TV Aug. 12, starting 9:30 p.m., thru Mathisson & Assoc., Milwaukee; Atlantic Refining Co. will share sponsorship in 35 eastern markets, thru N. W. Ayer . . . Dr. Spock's new NBC-TV series, titled *Dr. Spock*, starts Oct. 9, Sun. 3-30 p.m.; no sponsor yet . . . Reynolds Metals to sponsor *Frontier* on NBC-TV starting Sept. 25, Sun. 7:30-8 p.m., as replacement for *Mr. Peepers*, thru Clinton E. Frank Inc., Chicago.

Changes in format of \$64,000 *Question* (CBS-TV Tue. 10-10:30 p.m.) are being considered by packager Louis G. Cowan in light of many suggestions that something be done to ease the tax burden and thus make it easier for contestant to go for the \$64,000. Syndicated columnist J. A. Livingston this week proposed that sponsor Revlon pick up the tax tab, but a Cowan executive said this wasn't likely, urged patience in working out problems of show that's skyrocketed in popularity in the 7 weeks it's been on air.

Rate increases: WKZO-TV, Kalamazoo, adds new Class AA hour (8:29-10:31 p.m. daily) at \$1000, min. at \$200, with Class A hour going from \$900 to \$950; KMBC-TV, Kansas City, adds Class AA hour (7-9:30 p.m. daily) at \$600, min. at \$200, Class A hour going from \$540 to \$480. Rate decrease: KEYD-TV, Minneapolis, cuts base hour from \$600 to \$450, min. \$120 to \$90.

NBC-Westinghouse swap of Philadelphia & Cleveland stations (Vol. 11:21) should be held up, WSTV-TV, Steubenville urged FCC this week, until Westinghouse's KDKA-TV, Pittsburgh, modifies its network affiliation agreements to permit WSTV-TV access to more ABC-TV programs—possible under new territorial exclusivity rule (Vol. 11:26).

CBS signs KSLA, Shreveport (temporarily using KCIS call) as primary and adds KIVA, Yuma, Ariz. under Extended Market Plan.

Crosley's MBS affiliation, whereby its WLW, Cincinnati was offered on special basis in addition to affiliate WCPO, was terminated as of July 22.

Among advertisers currently reported using or preparing to use TV stations time: Maltex Co., Burlington, Vt. (cereal), thru Bryan Houston, N. Y.; Oz Greeting Card Co., N. Y., thru Francis D. Gonda Co., Hollywood, Cal.; Balanced Foods Inc., N. Y. (electric home juicer), thru Chester Gore, N. Y.; Tastee Products of Cal., Los Angeles (Tastee Freez), thru Dreyfus Co., L. A.; Stroh Brewery Co., Detroit Stroh's Bohemian beer), thru Zimmer, Keller & Calvert, Detroit; Redi-Magic Milkshake Mix Co., Los Angeles, thru Roy S. Durstine, L. A.; Florida Power & Light Co., Miami, thru Bevis & Tyler, Miami; Dri-Zit Co., San Jose, Cal. (Dri-Zit deodorizing products for garbage cans), thru Long Adv. Service, San Francisco; Neuhoff Packing Co., Nashville, Tenn. (Old Hickory bacon), thru Doyne Adv., Nashville; Ivano Inc., Chicago (Plumite drain cleaner), thru Sullivan, Stauffer, Colwell & Bayles, N. Y.; Coats & Clark's Sales Corp., N. Y. (Crown zippers), thru Kenyon & Eckhardt, N. Y.; Japan Canned Crabmeat Sales Co. Ltd., Tokyo, thru Gotham-Vladimir Adv., San Francisco; Brother International Corp., Los Angeles (Select-O-Matic automatic zigzag sewing machine), thru Allen Christopher Co., N. Y.; Florida Citrus Commission, Lakeland, Fla. (fresh & processed citrus fruits), thru Benton & Bowles, N. Y.; Washington State Fruit Commission, Portland, Ore. thru Pacific National Agency, Portland; Kur-lash & Co., Rochester, N. Y. (eye beautifiers), thru Charles L. Rumrill & Co., Rochester; Mail Pouch Tobacco Co., Wheeling, W. Va., thru Charles W. Hoyt Co., N. Y.

"Communist infiltration" in TV-radio writing and acting and the legitimate stage will be investigated in extensive hearings scheduled to begin Aug. 15 in New York City by House Un-American Activities Committee Chairman Walter (D-Pa.) At least a dozen actors and writers reportedly have been subpoenaed. In entertainment industry, some connections were implied between the forthcoming investigation and the recent overwhelming repudiation by AFTRA members of AWARE Inc., alleged to be a black-listing organization (Vol. 11:28). One unnamed actor was quoted by *New York Times* as saying he understood that all performers subpoenaed had signed petition urging condemnation of AWARE. Meanwhile, AFTRA administration—which had endorsed AWARE—hurriedly began conducting membership referendum aimed at disciplinary action, including expulsion in some cases, against members who decline to answer Congressional questions about Communist affiliations. A performer expelled from union would be barred from employment by TV-radio networks, which have union shop.

Sears, Roebuck & Co., which has joined RCA (each with 20%) in new Whirlpool-Seeger Corp. (see pp. 2 & 11), may be planning TV advertising for first time. This week, NBC-TV presented closed-circuit showing to group of top-level Sears officials, at their request, to demonstrate what TV could do for retailers. NBC pres. Sylvester L. (Pat) Weaver Jr. made brief talk, followed by sales pitches from NBC merchandising consultant Edward Weiss. NBC centered its presentation around upcoming *Richard III* & *Matinee*, latter the new hour daytime dramatic color strip.

American Bar Assn. convention in Philadelphia week of Aug. 21 will be covered by TV, both live & closed-circuit, as means of demonstrating to jurists how unobtrusively cameras can cover legislative sessions & court trials. Coverage was arranged by NARTB as public service, will be handled under pooled arrangement by 3 local stations—WCAU-TV, WFIL-TV, WPTZ.

ABC, CBS & NBC agreed this week on new 3-year contract with United Scenic Artists Local 829 granting 210 members new minimum wage scale of \$230 for scenic designers, \$171.50 for costume designers, \$170 for scenic artists—40-hour week.

MOTOROLA'S NEW LINE; ADMIRAL UPS PRICES: Motorola took over trade spotlight this week with a new 22-model TV line that stresses easier step-ups, simplified tuning, accented cabinet colors. Last of the majors to introduce its line, Motorola is preparing its most ambitious promotion campaign -- \$15,000,000 covering next 12 months -- in effort to improve even further its position as one of industry's "Big Four." Whereas other top-ranking TV-radio manufacturers are heavily in white goods (see pp. 2 & 11), Motorola bills itself as "largest exclusive electronics manufacturer."

Price differential has been narrowed to \$10 in all sets listing under \$300 (14 of them) as means of encouraging step-up selling. Widest gap in entire line is \$30. Controls are located at right front of picture in most sets, whereas RCA has gone to side & top tuning, Philco to top tuning, Admiral to top & front, most others sticking to traditional front controls. (Details of Motorola's new line on p. 12).

Pres. Paul V. Galvin, setting forth immediate targets at convention of distributors in Chicago, said Motorola anticipates record volume of about \$225,000,000 this year, topping previous high of \$217,000,000 in 1953. He said sales in first half of 1955 "moderately exceeded" the \$92,000,000 of first-half 1954. Motorola seeks to "maintain 10%" of industry's consumer products business, he stated. It is accordingly expanding TV plant at Franklin Park, Ill., has new Chicago plant for plated circuitry production, and new transistor facility at Phoenix.

Electronics volume of \$10 billion, with largest single factor being estimated 7,500,000 TVs, was foreseen by Mr. Galvin, long a RETMA leader. He also predicted 1955 sales of 12,000,000 radios. By 1965, he estimated more than 65,000,000 TVs in use, more than half of them color. (For Motorola color set plans, see p. 13.)

Another of the "Big Four" -- Admiral, which was first to release its line last June (Vol. 11:23) -- this week raised prices of 7 new models by \$10 in vhf, \$15 in uhf, because of "higher material and production costs." Prospect is that others will also hike prices by fall, for increases are being talked up generally in trade now. Strength of the TV market and the national economy as a whole are cited as reasons for belief that time is ripe.

Shortages of copper and other basic materials, plus wage increases, are the other factors likely to send prices of TV sets higher around Labor Day. Many a competitor goes along with Galvin's remark that "the price structure in consumer electronics products cannot go lower without penalty to quality."

Brief highlights of other major trade developments this week:

* * * *

Music Show: Panel on TV-radio merchandising was center of keen interest at Chicago convention of National Assn. of Music Merchants, which was otherwise dominated by high-fidelity. On the panel, Magnavox pres. Frank Freimann & NARDA chairman Mort Farr attacked bitterly what they called "overloading" of merchandise on distributors & dealers. Freimann said many of the 100,000 TV-radio dealers are "in hock to the distributor or the local bank," said "jungle warfare" can be ended only when factory-distributor practices are improved. Farr said he's convinced the factories are trying to put a lot of small, fringe dealers out of business by overloading them and that eventually the only dealers who will stay in business are those who can afford to buy merchandise in carload lots.

Labor: GE and IUE negotiated fruitlessly for 2 days on new contract calling for guaranteed annual wage, then suspended talks while union considered grievances not involved in new pact. IUE asked in opening day for guarantee of 85-100% of wage of 125,000 workers in event of layoffs. John H. Callahan, chairman of IUE negotiation committee, said company had been notified of plans to strike if accord is not reached by Sept. 15. In addition to guaranteed wage, union is also asking increase in wages, ending of geographical differentials in pay, improvements in incentive

system, reinstatement of profit-sharing plan, 9 paid holidays, minimum of 4 weeks vacation after 20 years, improvements in pension & insurance and a union shop.

Economic Boom: President's Council of Economic Advisers spelled out for Congress the extent of national economic strength in second quarter of 1955. Here are highlights: (1) National production climbed to record annual \$383 billion rate, \$8 billion higher than first quarter. (2) Corporate profits before taxes rose to an annual rate of \$42.5 billion, up from \$40.9 billion in first 3 months; profits after taxes climbed to \$21.2 billion from \$20.4 billion in first quarter. (3) Average take-home pay of each person rose to record yearly rate of \$1619. (4) Consumer savings rose to annual rate of \$17.5 billion vs. \$15.3 billion in first quarter. (5) Consumers spent at record annual rate of \$249.5 billion.

Consumer Credit: Sen. Sparkman (D-Ala.), chairman of the Senate Small Business Committee, is one who believes the current \$20 billion level of installment buying isn't dangerous as long as personal income also remains high. In speech to National Retail Hardware Assn., he remarked that "sky-limit credit with little or no down payment and years in which to repay has become one of the characteristics of our present-day prosperity." He said, however, that a "somewhat anxious watch" is being maintained in Congress and Federal Reserve Board on level of installment credit.

Production: TV output, still reflecting plant vacations, totaled 78,968 in week ended July 15, compared to 53,028 preceding week and 129,879 week ended July 1. It was year's 28th week and brought production for year to date to about 3,900,000, compared to 2,900,000 in equivalent 1954 period. Radio production totaled 180,987 (109,087 auto) week ended July 15, compared to 124,501 week ended July 1 and 212,079 week before. Radio output in 28 weeks was 7,380,000 vs. 5,450,000 same 1954 period.

Trade Personals: Thomas P. Ryan, Sylvania TV-radio midwest sales mgr., promoted to gen. sales mgr., replacing Arthur A. Currie, now v.p.-gen. mgr. of Adams Distributors Co., Sylvania's Boston distributor . . . Morris S. Lewis promoted to mgr. of market planning & analysis, RCA tube div., Harrison, N. J. . . Frank D. Witten promoted to Philco electronics service mgr., succeeding Wm. Satterfield, now on leave of absence . . . Allen W. Dawson promoted to sales mgr., Corning Glass industrial bulb dept.; Phillip C. Leffel Jr. named sales mgr. receiver bulb dept. . . Paul W. Hessinger promoted to v.p. & gen. operations mgr., RCA Victor Mexicana, S.A.; Michael S. Hazzard, ex-RCA rep for Caribbean area, recently Zenith-Norge distributor in Cuba, appointed sales v.p. . . Maurice Scotti, ex-Motorola-New York Inc., named CBS-Columbia Long Island regional mgr., replacing Ed Weisl, resigned . . . C. A. Swanson, Standard Coil west coast sales mgr., promoted to gen. sales mgr. . . Titus Haffa, Chicago industrialist (Dormeyer Corp.) who with family controls Webster-Chicago Corp., elected pres., replacing Norman C. Owen, resigned; Nick Malz, Dormeyer production v.p., elected exec. v.p. & gen. mgr. of Webcor laminations div.; Noel McKay, from Chicago headquarters, named gen. mgr. of subsidiary Webcor (Great Britain) Ltd. . . J. Trevor Downer, ex-Radiomarine Corp. of America, named west coast sales mgr., Chatham Electronics (tubes) . . . Roy True, treas. of Industrial Development Engineering Assoc. (I.D.E.A.), elected exec. v.p. . . C. R. Bower appointed Emerson southwest district mgr., Denver . . . Edwin Cornfield, ex-Pilot Radio, named sales mgr. of tape recorder div., DeJur-Anso Corp., Long Island, N. Y. . . Curtis B. Hoffman elected sales v.p., Brush Electronics Co. div. of Clevite Corp. . . Russ D. Gawne resigns as sales mgr. of Crescent Industries home instrument div. (phonographs) to become sales mgr. of GC Electronics (resistors), new div. of General Cement Mfg. Co., Rockford, Ill. . . K. D. Kerr appointed marketing mgr. of new dealer products dept., Dominion Electrohome Industries Ltd., Kitchener, Ont.

DISTRIBUTOR NOTES: CBS-Columbia establishes factory branch at 1351 W. North Ave., Milwaukee (Sam Abramson, ex-Hallicrafters of Milwaukee, gen. mgr.), replacing Standard Electric Co. . . Motorola appoints Mountain Electronic Co. Inc., 708 Bigley Ave., Charleston, W. Va. (H. L. Kolin, pres.) . . . Sylvania appoints Tri-City Distributors, 300 N.E. 75th St., Miami (Sumner Swanson, pres.) . . . Admiral appoints Coffin & Wimple Inc., 142 Broad St., Bangor (Harold I. Hamm, gen. sales mgr.) . . . Raytheon appoints BESTelevision Distributing Corp., 14 E. Stratford Ave., Lansdowne, Pa. (Edward Clinton & Stewart Mears, partners) . . . Hallicrafters appoints E. O. Lundberg mgr. of Kansas City distributing branch, replacing John List, resigned . . . Emerson Radio of Michigan, Detroit, appoints Cy Perkins sales mgr., replacing Edward Henmon, resigned . . . Robert L. Rice Co., Portland, Ore. (Crosley-Bendix) names James Miles sales mgr., replacing Ralph Sacks, resigned . . . GE Supply Co., Milwaukee, appoints F. W. McDonald district mgr. of consumer products.

National Assn. of Music Merchants, at annual convention this week in Chicago, re-elected all officers: pres., Earl Campbell, Campbell Music Co., Washington; chairman, Russell B. Wells, Charles E. Wells Music Co., Denver; v.p., Paul E. Murphy, M. Steinert & Sons, Boston; exec. secy., Wm. R. Gard; secy., H. T. Bennett, Bennett Music Co., Santa Barbara.

Canadian Admiral pres. Vincent Barreca predicts retail sales of 800,000 TVs in Canada this year, 555,000 of them in second half, compared to 619,428 in all of 1954.

Frank J. Hughes, 58, contracts director of Avco's Crosley div., with headquarters in Washington, died of heart attack June 20 at his home. With Crosley since 1949, he formerly was v.p. of Warren Norge Corp., pres. of Brooklyn Servel Corp. & N. Y. mgr. of Kelvinator Corp. He is survived by a son & daughter.

Frank L. Nason, 71, retired New England manager for Westinghouse, died July 17 in Brookline, Mass.

A PPLIANCE MERGER involving RCA, Whirlpool, Seeger and Sears Roebuck was consummated this week after Justice Dept. approved consolidation in principle, even though Govt. has been frowning on many industrial mergers recently. Clincher, it's understood, came when RCA persuaded Justice it has been handicapped by lack of a full appliance line. Buttressing its contention was argument that out of 35 makers of home laundry equipment in 1940, the 9 who then had full or diversified line are still in business; 10 of the remaining 26 have sold out; 8 have gone bankrupt or otherwise liquidated or discontinued; of the 8 remaining, 4 are known to be up for sale.

New Whirlpool-Seeger Corp. will have total assets of about \$130,000,000 and a net worth of about \$85,000,000. RCA and Sears will each own about 20%, or combined interest of less than 50%. By agreement of 2 companies, the common stock owned by each in excess of 20% of total common stock outstanding will be voted by Whirlpool-Seeger pres., who probably will be Elisha Gray II, currently pres. of Whirlpool. RCA buys into new company with undisclosed amount of cash, plus its air conditioning & Estate stove business, acquiring 1,157,000 shares in new company.

Whirlpool-Seeger Corp. will issue 5,785,000 shares of common (\$5 par) and 211,000 shares of non-voting 4½% cumulative preferred (\$80 par). Under distribution plan, 3,080,000 shares of common will go on a share-for-share basis to present Whirlpool stockholders; about 1,548,000 shares of common and the 211,000 shares of preferred will go to Seeger stockholders on basis of 1⅓ shares of common and 3/16 share of preferred for each Seeger share. Whirlpool's 1954 annual report showed 3,079,524 shares outstanding as of Dec. 31, 1954, of which Sears owned 158,965 directly and 110,000 indirectly. Sears also owns about 348,335 of the 1,125,685 Seeger common outstanding.

Whirlpool is the nation's largest manufacturer of automatic washing machines, also makes dryers & ironers. It markets its products under own name and produces Kenmore washers for Sears. It has plants at St. Joseph, Mich., Clyde, O. & LaPorte, Ind., and employs about 5800. In 1954

it reported net profit of \$9,185,038 (\$2.98 a share) on sales of \$169,000,000.

Seeger manufactures Coldspot line of household refrigerators, farm and home freezers & dehumidifiers for Sears, and commercial refrigerators, display cases & ice makers for Frigidaire div. of General Motors. It employs about 6000 in plants at St. Paul & Evansville, Ind. For 1954, it reported profit of \$5,986,929 (\$5.52 a share) on sales of \$112,000,000.

In addition to Gray, who has been proposed for pres., Walter Seeger will serve as chairman of new company. RCA will be represented on board by pres. Frank Folsom & corporate exec. v.p. Charles M. Odorizzi.

* * * *

First appliances bearing the new "RCA-Whirlpool" brand are expected to hit the market about Dec. However, the contract under which Fedders-Quigan Corp. makes air conditioners for RCA runs until June 30, 1956, and companies are currently negotiating a possible extension, according to Fedders pres. Salvatore Giordano.

On RCA's part, the divestiture of its Estate stove business to the new company will not cut into its gross appreciably, said a spokesman; it was said that RCA would benefit primarily in the strengthening of its 69 distributorships, aside from the profit expected from its stock ownership in the new firm.

There was some reluctance at first in RCA organization to venture so deeply into white goods, but the fact that RCA retains its primary identity as an electronics & communications concern and the need for strengthening distribution of its TV-radio products with addition of established white goods lines overcame the reluctance. In this respect, the counsels of Folsom & Odorizzi, both merchandising veterans, prevailed.

Role of RCA Service Co. in new setup isn't determined yet, though it already does appliance as well as TV servicing in some cities. Up in the air is question of whether a single service contract, covering TV-radio & appliances, might emerge.

In letter to Whirlpool stockholders, Mr. Gray said only that "a more complete line of major home appliances must be offered to distributors and dealers if its home laundry equipment line is to retain its share of industry sales and continue to grow."

Topics & Trends of TV Trade: How are the discount houses doing? Depending on whom you're talking to, you can get all manner of answers—they're expanding, they're folding, etc. Seeking clarifications, *Wall Street Journal* conducted own survey of so-called "franchised" and discount dealers, and discovered:

(1) Discount houses are still flourishing and expanding, generally, though some "Johnnies-come-lately" have failed. (2) Counter-price-cutting by dept. stores & small retailers is making it difficult to define a discounter. (3) Retail stores specializing in appliances have been hit hardest, dept. stores least. (4) Clear-cut winner is the consumer—"smaller factory-to-household markups on consumer hard goods appears here to stay."

Among biggest discount houses, E. J. Korvette Co. and Masters Mart Inc., both N. Y., expect \$23,000,000 & \$20,000,000 grosses this year, respectively. Polk Bros., Chicago, reports more than 1000 on its payroll, with first-half 1955 sales 40% over first 6 months of 1954. Big gains are also reported from Philadelphia's Silo Discount House and Los Angeles' Wm. E. Phillips Co.

New high-fidelity directory & buyers' guide, titled *Audio Fair—Hi-Fi, Why, What & Where to Buy*, will be published in Oct. by Audio Fair Publishers, 67 W. 44th St., N.Y.

TV shipments to dealers totaled 2,677,630 in first 5 months, when production was 3,238,820, compared to shipments of 2,370,098, production of 2,301,055 in first 5 months of 1954, reports RETMA in state-by-state tabulation (county-by-county tables available to RETMA members on request). New York led, with 257,956; California second, 218,350; Pennsylvania third, 167,562. May shipments were 348,181, compared with 361,102 in April and 304,227 in May 1954. [State-by-state tabulations of TV shipments to dealers by years, 1950-54, first 5 months of 1955 and cumulatively from 1946-54, are included in upcoming *TV Factbook No. 21*, due about Aug. 1.]

Federal Trade Commission, as predicted (Vol. 11:28), this week denied RETMA's request for postponement of effective date of FTC's TV-radio trade practice rules so its members could study proposals further. Letter from FTC secy. Robert M. Parrish to RETMA counsel Glen McDaniel said merely: "It was the Commission's conclusion that no adequate grounds for the requested postponement have been presented."

Cooperative adv. steering committee of Assn. of National Advertisers includes J. R. Clemens, Westinghouse; J. W. Jackson, RCA; David H. Kutner, Motorola; E. B. Mercer, Philco; John G. Porter, GE.

RETMA of Canada's electronics div. next annual meeting is Sept. 22-23 at Hotel Chantecler, Ste. Adele, Que.

MOTOROLA'S new line, introduced this week at distributors convention in Chicago's Conrad Hilton Hotel, comprises 22 basic models ranging from a 17-in. ebony table model at \$150 to 24-in. blonde console at \$410. Prices are virtually same as old line. A feature of the line is a 17-in. table model with built-in clock timer (produced by Sessions Clock Co.) for \$170.

Motorola's big talking point is "Right-Up Front" tuning, in which the dual channel selector and fine tuning dial are at top right of picture, with other controls set directly below in vertical alignment. Explained gen. sales mgr. James E. Herbert: "Controls are on the right side close to the circuitry; up where they are within easy reach without stooping; and in front where they are ready for instant use. It's the easiest-to-tune set on the market."

Making these control locations possible, said Herbert, is a new vertical side-mounted chassis, called "Power Panel." Chassis is only 1 3/8-in. thick, with "unusually short" front-to-back dimension. All 21 & 24-in. models use 90-degree deflection tube. In all but the 17 & 21-in. leaders, the tube is aluminized. Line also goes in heavily for colors, featuring such cabinet finishes as bronze, charcoal, "carnation pink," "cerulean blue," "mist green."

The 17-in. tables are priced at \$150, \$160 & \$170; 21-in. tables at \$170, \$180, \$200, \$230; 21-in. consoles at \$230, \$250, \$280, \$290, \$300, \$310, \$340, \$350, \$360; 24-in. tables at \$250 & \$280; 24-in. consoles at \$300, \$350 & \$410.

Also introduced were 6 table radios ranging from \$15 to \$40; 6 clock radios from \$25 to \$50; 5 phonographs, including 2 high-fidelity units, from \$30 to \$210.

RCA's music synthesizer (Vol. 11:6) can now be heard in the home, RCA Victor having released \$3.98 record including 7 electronically created musical selections accompanied by commentary describing how synthesizer works. Record is available as 12-in. LP and 45rpm 4-record album.

New Andrea distribution plan: direct from factory to selected dealers, with factory handling all shipments, billings, etc.

NEARLY 20% of North Dakota farms now have TV sets, according to official U. S. Census of Agriculture. County-by-county census tabulated this week shows 11,178 of the state's 61,939 farms are TV-equipped. Analysis of distribution of sets shows them in counties clustered around the state's 4 stations in Bismarck, Fargo, Minot and Valley City, with no out-of-state stations close enough to reach the state's viewers. Greatest number of rural viewers are in Cass county, where Fargo and Valley City stations can be received—with 1365 farms TV-equipped out of total of 2323, or almost 60% penetration. TV figures were projected from 20% sample survey conducted in Oct.-Nov. 1954. Reports on earlier state tabulations were carried for Nev., N. H., Vt. (Vol. 11:28) & Wyo. (Vol. 11:29). We'll print future county-by-county tallies as soon as they are tabulated by Census Bureau. Here's county farm census of TV for North Dakota:

NORTH DAKOTA					
County	Total Farms	Farms with TV	County	Total Farms	Farms with TV
Adams	555	37	Mercer	852	46
Barnes	1,789	521	Morton	1,453	427
Benson	1,331	96	Mountrail	1,279	175

			State Total	61,939	11,178

Electronics Reports: Motorola's transistorized auto radio (Vol. 11:19) will reach "production stage" before end of this year, v.p. Elmer H. Wavering told this week's distributor convention in Chicago. Use of modular design components in new auto radios was hinted when Wavering said transistors offered the "possibility of developing functional modules" which would operate for years without failure and without servicing. "As time goes on," he said, "we may well introduce transistors in such other products as portable radios, phonographs and TV. However, we will incorporate transistor applications only where by their nature they will do the best job in the equipment, and we will retain vacuum tubes in those circuits where the tube does a better job."

Emphasizing Motorola's ambitious plans in auto radio field are 3 new plants—the big transistor facility now under construction in Phoenix, a new large radio factory being built in Quincy, Ill., and newly acquired car radio tuner plant in Arcade, N. Y. Only other major manufacturer to announce transistorized auto radio to date has been Philco, which will produce \$150 set for Chrysler (Vol. 11:18) to be introduced this fall. But transistors are such a "natural" for auto radios, there's little doubt that the day is not far off when all car radio production will use them.

* * * *

Electronics Corp. of America has formed Electronics Corp. of America (Canada) Ltd., Toronto.

Electronic Design Magazine shifts from monthly to semi-monthly next Jan. 1.

Technical papers on Willys' "flat tube" (Vol. 11:3) will highlight annual Western Electronic Show & Convention (WESCON) Aug. 24-26 in San Francisco Civic Auditorium, from the standpoint of TV receiver and tube industry. The mystery-shrouded tube—only about 3-in. deep—is said to be nearing production readiness, but only scanty engineering details have been released. The paper on the tube, due for presentation Aug. 24, will be: "A Thin Cathode Ray Tube," by tube's inventor Wm. Ross Aiken of Willys West Coast Electronic Lab, Palo Alto, and "Beam Focusing & Deflection in the Aiken Tube" by R. Madey, also of Willys.

Tiny battery with many possibilities for miniature transistorized equipment has been developed by Elgin National Watch Co. Designed for electronic wrist watch now under development, new cell is smaller than a penny, will deliver constant voltage for 2 years. Gen. mgr. A. P. Barton of Elgin electronics div. said it was made possible by use of indium as an anode. It delivers 1.15 volts, which can be stepped up to 1.37 by using different cathode material, does not leak, smell or emit gas. Suggested uses for the new battery, which is not yet in production: hearing aids, portable radios, miniature recording devices, photo-flash units, self-focusing cameras.

Don G. Mitchell, Sylvania pres., to testify on effects of automation in hearings of Joint Congressional Committee on Economic Report, Oct. 10-28.

RCA has contracted with Mochizuki Radio-Wave Laboratory, Tokyo, for rights to make and sell its TV coil.

Financial & Trade Notes: Sylvania had record earnings of \$6,088,019, or \$1.90 per share on 2,961,520 shares, in first 6 months of 1955, up from \$3,522,785 (\$1.08 on 2,679,686 shares) in first half of 1954 and \$5,169,092 (\$1.70) in 1953 period. Sales were \$138,713,949, up 9% over \$127,070,638 in first half of 1954 but below the \$149,092,932 in same 1953 period. Second-quarter profit of \$2,840,364 also established a record for period, comparing with \$1,401,298 (41¢) in 1954 and \$2,395,849 (78¢) in second quarter 1953. Second-quarter sales were \$64,733,722 vs. \$60,075,187 in 1954 and \$69,032,624 in 1953. In semi-annual report to stockholders, pres. Don G. Mitchell said unit sales of TV receivers held up well but dollar volume declined from first half of 1954. Picture & receiving tube sales exceeded first half 1954 by big margin, he said.

* * * *

American Broadcasting-Paramount Theatres continues improvement over 1954, showing consolidated net profit of \$1,488,000, or 33¢ per share on 4,119,542 shares outstanding, in second quarter vs. \$740,000 (15¢ on 3,967,496 shares) in same 1954 quarter. For 6 months, earnings were \$3,438,000 (79¢) vs. \$1,850,000 (40¢). For all 1954, net profit was \$4,931,487 (\$1.06) on total income of \$188,795,705. Pres. Leonard Goldenson reported ABC div. showed marked improvement, though separate figures were not released. Seasonal third quarter drop was predicted, with jump expected in fourth quarter and 1954 topped as result of improved fall-winter time sales.

Jack L. Van Volkenburg, CBS-TV pres. & CBS Inc. v.p., has exercised option to acquire 4630 shares of Class A stock, increasing holdings to 4956 shares. Simon B. Siegel, AB-PT treas., has exercised options on 5000 shares, holds 5100; James L. Brown, AB-PT comptroller, bought 1500 shares of AB-PT on stock option. Arthur F. Vinson, GE v.p. for manufacturing, bought 1185 shares of GE, increasing holdings to 3019; Willard H. Sabloff, GE v.p., sold 1545 shares, decreasing holdings to 465.

DuMont sales for 24 weeks ended June 19 totaled \$29,741,000, down from \$41,590,000 for comparable 1954 period. Loss was \$1,249,000, or 56¢ per share, compared to profit of 412,000 (18¢) in 1954. The 1954 sales figure included sales of WDTV, Pittsburgh, whereas 1955 sales figure embraced income of that station for only 10 days in Jan., or until it was transferred to Westinghouse in \$9,750,000 deal (Vol. 10:49-50).

The upbeat movie industry: Loew's Inc. (MGM) grossed \$131,372,000, earned \$4,514,242 (88¢ a share) in 40 weeks ended June 9 vs. \$138,250,000 & \$4,466,376 (87¢) in corresponding 1954 period. Stanley-Warner Corp. grossed \$68,750,740, netted \$2,222,053 (\$1.01 per share) in 39 weeks ended May 28 vs. \$44,411,850 & \$1,494,960 (64¢).

Packard-Bell earned \$362,131 (52¢ per share) on sales of \$15,267,000 in 9 months ended June 30, compared to \$334,830 (49¢) on \$14,727,419 in same period year ago. Unit sales of TVs in first 6 months were up 41% from same 1954 period, though revenue was up only 8% because of decrease in average price.

Dividends: Hazeltine, 35¢ payable Sept. 15 to stockholders of record Sept. 1; American Electronics, 12½¢ Sept. 15 to holders Sept. 1; Servomechanisms, 10¢ Aug. 15 to holders Aug. 1; Television-Electronics Fund, 8¢ Aug. 29 to holders July 31.

GE's earnings hit new high in first half of 1955—\$101,892,000 (\$1.18 per share) against 1954's \$93,856,000 (\$1.08). Drop in defense business was balanced by increased commercial sales.

P. R. Mallory & Co. reports 6-month net income of \$1,192,984 (\$1.66 a share) on sales of \$32,326,945 vs. \$313,383 (23¢) on \$26,819,875 in same 1954 period.

Color Trends & Briefs: Network color schedules for next season are shaping up so impressively that it may be said that NBC & CBS are truly breaking the chicken-&-egg cycle of "too few programs to encourage purchase of sets and too expensive sets to encourage production of more color programs." With NBC & CBS doing their part in color, industry will be looking to stations, manufacturers, distributors & dealers to make the most of it.

Precise number of color hours to be presented weekly can't be nailed down yet. But NBC is already committed to some 9-10 hours a week—5 of them during 3-4 p.m. daily, prime dealer demonstration time (Vol. 11:29). CBS officials say it's impossible to get accurate estimate yet "because the situation is still too fluid." However, CBS has already announced some 1½-2 hours weekly, is planning more. It's likely, therefore, that there will be at least 12-15 hours of color available to the nation weekly next fall & winter—much of it tied to the networks' most ambitious programs, those in the "spectacular" class.

What's even more impressive about the color programs is that sponsors are snapping them up. For example, U. S. Rubber has just bought \$3,000,000 worth of spots in NBC's Sun. 7:30-9 p.m. "Color Spread," starting next Jan. and running once a month for solid year. Standard Brands has bought 3 partic. in "Color Spread" starting Sept. 11. Only one partic. in the program is yet unsold. Great majority of NBC's & CBS's big shows are sellouts.

* * * *

RCA will make Hallicrafters' color sets and RCA Service Co. will service them, for time being, Hallicrafters chairman Wm. J. Halligan Sr. told distributors meeting in Chicago this week—joining others who have decided to ease into color that way (Vol. 11:27). Price of sets wasn't indicated, presumably will be near RCA's \$795 & \$895 (instead of the \$695 originally announced by Hallicrafters). Halligan told group that many in industry feel that color activity will be substantial within a year, and pres. Raymond W. Durst stated: "We are sure there will be a market for color this fall. Admittedly, it will not be big but there will be one. Therefore, we have planned a cautious limited production so that you can be identified with color."

Servicing will be much more important for color sets than it has been for black-&-white, opines Crosley national service mgr. R. H. Schneberger in July 11 *NARDA News*, predicting that dealers who don't provide adequate color servicing will fall by the wayside. As for future of color, he said: "It is our humble opinion that when color comes into its own it will have as great if not greater impact on our business than monochrome TV had when it first took its place alongside radio." Though he foresees color set dominating the living room, he expects black-&-white sales to hold up, as did radio.

Motorola's color sets, using 19-in. CBS-Hytron tubes, will be offered at \$695 for consolette, \$795 for console—\$200 less than when they were first introduced last year (Vol. 10:34). Edward R. Taylor, consumer products marketing v.p., told distributor convention in Chicago this week that network color schedules will give sales strong lift. "All we need now to accelerate the orderly growth of color," he said, "are the several hours of daily programs, daytime and evening, being planned by the networks to begin after Labor Day."

Upcoming network color schedules: NBC-TV—July 25, *Producers' Showcase*, "The Fourposter," with Jessica Tandy & Hume Cronyn, 8-9:30 p.m.; July 26 & 28, *Vaughn Monroe Show*, 7:30-7:45 p.m.; July 27 & 29, *Matt Dennis Show*, 7:30-7:45 p.m.; Aug. 1-5, daily 15-min. segment of *Home*, 11-12 noon; Aug. 22, *Producers' Showcase*, 8-9:30.

Double-page spread in *Life Magazine* next week is part of RCA's heavy promotion of color sets.

Telecasting Notes: "Sneak previews" of pilot films have been tried on TV from time to time to test audience reaction, but rarely on nationwide basis. In trade ads plugging its new *Great Guildersleeve* series, NBC film div. announced it had received 25,000 fan letters as result of preview of the series presented unannounced over NBC-TV network. Story behind the ad is this: Sneak preview was held nearly year ago, when NBC-TV was considering the filmed show as a network program. Though audience reaction to pilot film was favorable, network shelved the program because of lack of time availabilities and other problems. Later, NBC-TV film div., under v.p. Carl M. Stanton, became interested in the property based on the popular NBC Radio series, revamped cast & format, began shooting at Hal Roach Studios and offered the series for syndication . . . Add CBS's midweek extravaganzas to the growing list of powerhouse one-shot shows scheduled for next season. These previously unannounced shows are said to be in the works or in negotiation stage at CBS-TV: *Wonderful World*, original musical with music by Arthur Schwartz & Howard Dietz; *I Hear America Singing*, another original by Jean Holloway & Carroll Carroll, produced by Ken Murray; Broadway play *Time Out for Ginger*; old Broadway musical *Along Fifth Avenue* starring Jackie Gleason; F. Scott Fitzgerald's *The Last Tycoon*, written for TV by Budd Schulberg; Cole Porter & Orson Welles' musical adaptation of Jules Verne's *Around the World in 80 Days*; musical version of Maeterlinck's *The Bluebird*; a musical show featuring Judy Garland . . . **Electronicam progress report:** DuMont expects to net nearly \$2,000,000 next year from its combination film-live camera system. Among films now being shot by Electronicam in DuMont's New York studios: Jackie Gleason's CBS-TV show for next year; 11 half-hour documentaries on Russian propaganda, by Columbia U mass communications center; experimental filming of five 15-min. episodes of Colgate's *Modern Romances* series; test commercials for Chevrolet. Completed in one day using Electronicam was 90-min. pilot dramatic production by producer Warren Wade, based on his live *Broadway TV Theatre* on WOR-TV last season . . . **Craftsman Films Inc.**, 350 Fifth Ave., N. Y. (Jackson Dube) has purchased exclusive rights to 44 films of *Greatest Fights of the Century* from International Boxing Club and Mike Jacobs estate . . . Evangelist Billy Graham, who says he has TV offers from 2 U. S. networks, has agreed to do some 15-min. shows for one of the commercial franchisers of Britain's ITA, which starts in Sept. . . . Ralph Edwards has agreed to do version of *This Is Your Life* on BBC while in London next month . . . Book version of Ed Murrow's *See It Now* due from Simon & Schuster in Nov. . . . Lou Cowan, top packager, subject of encomium in current *Time*, called "Man of the Hour" in current *Variety* because of top Trendex achieved by his \$64,000 *Question* . . . TeeVee Togs, N. Y. (Herbert Gussow) introducing "Jackie Gleason" polo and sweat shirts, bearing pictures of characters on his CBS-TV show, retailing at \$1 . . . Ed Sullivan bows as summer stock actor Aug. 2 in Southbury (Conn.) Playhouse's *King of Hearts*.

Four applications for new TV stations were filed with FCC this week, bringing total pending to 141 (16 uhf). Week's applications: for Elmira, N. Y., Ch. 18 satellite, by WSYR-TV, Syracuse; for Laurel, Miss., Ch. 7, by insurance man Wm. S. Smylie, mayor of Meridian, and realtor S. A. Rosenbaum; for Cheboygan, Mich., Ch. 4, by Richard E. Hunt, the operator of local radio WCBY; for New Orleans, Ch. 8 (educational), by Greater New Orleans Educational TV Foundation. [For details, see *TV Addenda 21-B* herewith; for complete listings of all grants, new stations, applications, etc., see *TV Factbook No. 21*, due off presses shortly.]

Subscription TV's possible impact on advertising is getting too little attention, *Printers' Ink* says in July 22 editorial which concludes: "Powerful advertising media are an economic necessity in order to preserve our economic system and any developments that might weaken their ability to move tremendous amounts of merchandise have important economic implications . . . If paid TV will diminish the power of TV advertising, this factor should be taken into consideration . . . Other advertising media should be big enough to see the point made here and should not be swayed by any shortsighted delight over the body blow that paid-TV might give a strong competitor." Theatre exhibitors' Organizations For Free-TV, summarizing results of several newspaper polls, reports these figures: *Knoxville News-Sentinel*, 814 against pay-as-you-see, 6 for; *Minneapolis Star & Tribune*, 72% against, 22% for; *El Paso Herald Post*, 15-to-1 against; *Cincinnati Post*, 2132 against, 68 for. L. S. Hamm, pres. of No. California Theatre Assn., opined that toll TV will be tried out and fail. "You can't stop technological progress," he said, "and you can't stop the toll-TV people from trying out their idea, at least. Anyway, I suspect the FCC will look at it this way. I believe toll TV will fail because I just don't think the public wants to pay what it will have to pay for unsponsored TV." In Chicago, poll of dealers at National Assn. of Music Merchants convention showed 3630 against pay TV, 320 for.

RCA's contact with Air Force Secy. Talbott figured prominently this week in Senate subcommittee's investigation of his private relations with firms handling Air Force business. Substance of charges, on basis of subcommittee records, was that Talbott had tried to pressure RCA into renewing a contract with N. Y. management consultants Paul B. Mulligan & Co., of which he is still a partner. RCA had refused to renew the contract without an opinion from Attorney General as to both its legality & propriety, in view of Talbott's connection with firm. Talbott testified he had asked RCA chairman David Sarnoff to talk it over with Mulligan, but denied any pressure. He first denied, later admitted, he had subsequently spoken about the matter to RCA attorney Sam Ewing. Sen. Bender (R-O.), a Talbott defender, introduced figures which he said proved RCA received twice as much Air Force business from Talbott after refusing to renew the Mulligan contract.

Public likes TV commercials—and to prove point he made in his NARTB convention speech, replying to "an unreasoning attack which is now being skillfully exploited by the proponents of subscription TV," ABC pres. Robert E. Kintner this week cited Trendex survey made for his network. It revealed a whopping 92.5% found sales talk "interesting and informative." Covering 1000 N. Y. homes, it showed that about one-third had seen a complete TV program that day, that about two-thirds of these remembered the show's commercial. Of latter group (about 250), 89% approved the pitch, 7% disapproved, rest had no opinion. Phone poll was made in evening, so showed 85% of viewers had last seen a network show and more than 70% of those remembered the commercial. Results were said to support recent Starch and Videodex studies.

Transcript of Senate hearings on TV and juvenile delinquency held last April 6-7 (Vol. 11:15) is now available from Judiciary Committee. Included are statements & testimony of NARTB pres. Harold Fellows, NBC v.p. Joseph V. Heffernan, ex-Comr. Hennock, et al.

DuMont concentrates all broadcasting div. activities in its Telecenter, 205 E. 67th St., N. Y., quitting old executive & sales office at 515 Madison Ave.

Hearst's WTVW, Milwaukee (Chick Showerman, mgr.) switches to new 1105-ft. Blaw-Knox tower and 12-bay antenna this weekend and changes call to WISN-TV.

PUBLISHED WEEKLY BY RADIO NEWS BUREAU • WYATT BLDG. • WASHINGTON 5, D.C. • TELEPHONE STERLING 3-1755 • VOL. 11: No. 31

SUMMARY-INDEX OF THE WEEK'S NEWS—July 30, 1955

PUBLIC SPENT \$15.6 billion on their TV sets during last 10 years, nearly half now 21-in.; 4,191,000 TVs scrapped, 34,549,000 still in use (p. 1).

ASSAULT ON COLOR MARKET, planned by RCA-NBC, most far-reaching to date, including 6-fold increase in color programs, heavy ad schedule (pp. 2, 8 & 13).

LIVE REPEATS excite NBC pres. Pat Weaver, who aims to capture big juvenile audience with Sun. 7:30-9 p.m. re-runs of Sat. 9-10:30 p.m. spectaculars (p. 2).

BRICKER VETOES Magnuson plans for "freedom of air" probe and for aid from private foundations in TV study. Davis out as counsel, Dill offered job (p. 2).

TELEVISION FACTBOOK off the presses, on way to Digest subscribers—21st edition of TV-radio-electronics industries' standard reference volume (p. 3).

"MOVIES COME FIRST" says Tom O'Neil, aiming to expand RKO production. Some features may be issued, others released to TV in about year (p. 4).

TV PRICE HIKES due by fall, as result of increased labor & materials costs; color pace to be quickened by big RCA receiver promotion (p. 8).

WESTINGHOUSE AUGMENTS TV line with several white, yellow & blue-green models to be retailed through kitchen equipment dealers (p. 10).

STOCK PORTFOLIO of new Electronics Investment Corp. disclosed, totaling \$8,552,636. First-half earnings of RCA, Westinghouse, Hoffman, Storer, others (p. 12).

ABC'S "MOVIE" IDENTITY further solidified by purchase of 35 J. Arthur Rank films, 20 of which will be aired in 90-min. network show, others syndicated (p. 5).

COURTS CHECKING ON FCC: Rochester protest ordered to hearing, while Congress is on verge of pulling protest rule "teeth" (p. 5).

NEW VHF STARTERS in Bluefield, W. Va. and Miami, Fla. (educational) bring on-air total to 437; latest reports on upcoming stations (p. 7).

FABULOUS FIGURES—THE TV STATISTICAL STORY: In the 10 years since TV's emergence, 41,000,000 sets have been manufactured, 38,588,000 have been sold to the public, 4,191,000 have been scrapped -- making total of 34,549,000 sets-in-use as of July 1.

A public investment of \$15.6 billion is represented in the 38,588,000 sets sold at retail. Based on average retail price of \$270 for the 10-year period, the retail value of the receivers themselves comes to \$10.4 billion. Add about \$2.4 billion for servicing labor alone; about \$1.7 billion for components, antennas, accessories, etc.; about \$1.1 billion for tube replacements. Total: \$15.6 billion.

The 21-in. size accounts for 17,032,000, or 49.3%, of all sets in use; about 12,927,000 (37.4%) are 16-17-in.; 4,080,000 (11.8%) are 15-in. & under; 503,000 (1.5%) are over 21-in. As of July 1, some 8000 color sets were in use (15, 19 & 21-in.) out of an estimated 28,000 produced.

To give an idea of the current scrappage rate, some 600,000 sets were discarded in the first 6 months this year -- 306,000 of them under 15-in.; 246,000, 16-17-in.; 46,000, 19-21-in. Last year, 1,357,000 sets were discarded.

The figures are adduced from production, sales, inventory, sets-in-use and discard tables published in our TV Factbook No. 21, off the presses this week -- notably one table on the over-all trade pattern prepared by Frank Mansfield, Sylvania director of sales research. His table gives data on production, distributor sales, dealer sales, scrappage rates by screen sizes, 1953-55 (by quarters), plus 10-year accumulative tabulation of sets-in-use. Mansfield's estimates do not give market-by-market data on sets-in-use, a project still under study by NARTB (Vol. 11:22).

Current overwhelming popularity of 21-in. is evidenced by fact that of the estimated 3,182,000 sets sold to public in first half of this year, 2,624,000 were 21-in., the remainder mostly 17-in. Out of the 7,300,000 receivers sold at retail last year, about 5,785,000 were 21-in. (Complete table on p. 19, TV Factbook No. 21.)

Note: NBC Research monthly sets-in-use figures show 36,477,000 as of July 1 -- nearly 2,000,000 more than the Mansfield estimate.

ALL-OUT RCA-NBC FALL COLOR CAMPAIGN: Almost single-handedly, RCA-NBC are determined to put color across next fall-winter season in what shapes up as one of the most extensive and expensive efforts to establish a new product & service ever undertaken by any company in any industry. They're pushing with accelerating vigor on every front -- network programming, set & tube production, receiver and programming promotion & advertising, station equipment sales.

Rounding up programming plans this week, NBC exec. v.p. Robert Sarnoff drew attention not only to extent of color programs but to extremely important fact that many of them will be telecast in periods when sets can be demonstrated easily.

Volume of color programming, Sarnoff said, will be 5 times as great as last year's -- most of it in programs of great appeal -- strongly promoted live spectaculars and big sports events. In terms of volume, NBC will have 37 hours of studio-originated color in Oct. vs. 7 last year, 41 in Nov. vs. 8½, 38 in Dec. vs. 9. This is in addition to color remotes of sports and mobile pickups for inserts in other programs. (For summary of program plans, see Color Trends & Briefs, p. 13.)

On receiver production & promotion end, RCA is uncorking most extensive broad-side yet attempted for color (details on p. 8), while its broadcast equipment sales force is doing its utmost to persuade individual stations that investment in local color originating equipment will pay off competitively.

"REPEAT" IDEA WINS STRONG SUPPORT: Live repeats of hit TV shows, performed while they're still "hot" and buoyed up by word-of-mouth and critical acclaim, are being explored by NBC-TV -- with a vengeance. Pres. Pat Weaver is so sold on the idea (Vol. 11:17-23) that he's thinking in terms of "next day" repeats. First such might be Max Liebman's monthly Sat. 9-10:30 spectaculars, repeated Sun. 7:30-9 p.m. -- thought being mainly to capture audience of children for whom Sat. show is too late. Weaver has long felt that last year's Babes in Toyland (9-10:30 p.m., Dec. 18) could appropriately have reached vast audience of children at an earlier period next day.

First show for which a repeat is planned, assuming cost & clearance problems are settled, is Oct. 1 Heidi. Since Liebman will also produce several Sun. night spectaculars, job of clearances should be somewhat easier.

Most top network executives and producers appear to be in agreement that click performances ought to be repeated (Vol. 11:17-23), only objection being fear of losing audience ratings. The NBC-TV experiment, if it jells, will receive close attention. An exceptional candidate for a repeat was July 25 Fourposter, in color on NBC-TV. Starring Hume Cronyn and Jessica Tandy in show they did on the stage, it had viewers and critics bubbling with superlatives -- and those who missed it are asking, "Why can't we see it, too?" It's our hunch they will.

BRICKER VETOES MAGNUSON PROBE PLANS: Senate Commerce Committee's ranking minority member, former Chairman Bricker (R-Ohio), decided this week that Chairman Magnuson (D-Wash.) and his chief counsel Sidney Davis were flying just a little bit too high in their plans for TV investigation -- and he put his foot down hard.

The conservative Republican put the kibosh on Magnuson's announced plans to "farm out" certain portions of the inquiry to non-profit foundations (Vol. 11:26) -- after reports that Ford Foundation's Fund for the Republic, headed by Robt. M. Hutchins, had been approached to study "freedom of speech and thought on TV-radio."

Not only did he demand that the Committee have no truck with foundations, but he threatened active opposition to any "freedom of thought" investigation -- and his opposition to Davis was at least partly responsible for the majority counsel's resignation, announced this week. The liberal Davis, a New York attorney, asked to be relieved of his duties to undergo treatment next week for dislocated spinal disc.

Office of majority counsel will be offered to former Sen. Clarence C. Dill (D-Wash.) who is currently working on "legislative phases" of TV probe at Magnuson's request. Joseph M. Kittner, asst. chief of FCC Broadcast Bureau, had been rumored as replacement for Davis, but he has not been approached by the Committee. Robert L'Heureux will continue as minority counsel.

Bricker is known to feel Magnuson and Davis were straying far afield in the

TV investigation. Bricker wants inquiry to concentrate on uhf problems and "monopoly aspects" of the network question.

Hearing phase of TV inquiry is now scheduled for January -- plans for fall hearings having been abandoned because of difficulty of rounding up Senators during recess and to allow time for completion of preliminary staff work.

"There will be no lag" in the investigation, Magnuson said this week. Summing up progress to date, he said special ad hoc engineering committee (Vol. 11:26) is well into its study of allocations, the FCC has begun its network investigation and is also working to "simplify its procedures," while Sen. Dill continues his study of possible amendments to Communications Act.

Investigation will continue under Magnuson's personal supervision, he added, denying rumors that hearings would be turned over to Sen. Pastore (D-R.I.).

Note: One important help-uhf project endorsed by Senate Commerce Committee in both Republican 83rd Congress and Democratic 84th went by the boards this week -- for at least 6 months. House Ways & Means Committee declined to act on HR-4070, introduced by Rep. Ikard (D-Tex.), to exempt uhf-equipped receivers from 10% Federal excise tax, after Administration opposed principle of bill (Vol. 11:27).

"BIBLE OF THE BUSINESS"--21st EDITION: Television Factbook No. 21 is on its way to all full-service subscribers this week -- our 1955 Fall-Winter edition bringing up to date the many directories and statistical tables that have become the standard reference of the TV-radio-electronics industries over the last 10 years.

As a semi-annual barometer of TV progress, it's noteworthy that it details 435 stations on the air in U.S., 27 in Canada, as against 426 & 24 just six months earlier, listing also the 56 stations that have gone off the air to date; that its log of foreign stations has grown to 150 in 35 other countries, serving 8,500,000 sets; that there are now 392 community antenna systems serving some 1,000,000 people as against 302 six months ago; that there are now 6 Armed Forces TV stations.

Some 75 reference depts. comprise the 432-p. Factbook, including network & station rates, personnel & other data; lists of CPs outstanding, prospective starting dates of upcoming stations, applications pending for new stations; channel allocation tables; lists of stations equipped for colorcasting; directories of TV, radio & tube manufacturers; TV-radio receiver production, sales & inventories figures; major TV advertisers and time-&-talent expenditures on networks & stations; directories of the FCC, engineers, attorneys, technical services, laboratories, research firms, labor unions, trade associations; lists of educational, newspaper & theatrical ownerships of stations; multiple ownerships and group operators; data on all sales and transfers of stations from 1946-55 -- among other features.

One copy of the Factbook, along with new 1955 TV wall map, 42x29-in. and in color, goes to each subscriber. Map shows all TV cities, all existing and projected AT&T and private network interconnections, all cities involved in the TV allocation plan, all other cities of more than 10,000 population, with log of all U.S. & Canadian stations and their channels. Extra copies of the Factbook are available at \$4; extra maps at \$1, lower prices in quantities.

Praise for TV industry's efforts to improve juvenile programming came this week from Sen. Kefauver's juvenile delinquency subcommittee in its progress report. After acknowledging that industry is "making efforts to improve its programs," report stated: "We asked the TV broadcasters to adhere more closely to their code. We pointed out to them that many violations of their own code are occurring which could have detrimental effect on children. We then asked those not belonging to the radio & TV code to join, so that a united front could be presented for better programming. We were also especially interested in having those who produce films for TV come under some sort of industry regulation. At present they are subject to no restrictions. Our full TV report will be released in a few weeks." Meanwhile, Vincent M. Gaughan, subcommittee's special counsel for TV-motion pictures-

pornography-youth employment phases of probe, left the group on completion of his assignment to organize new law firm in Buffalo. He's v.p. of CP-holder WSTF, Stamford, Conn. (Ch. 27) and was one-third owner of Buffalo's uhf WBES-TV, now off air.

Purchase of off-air WLBR-TV, Lebanon, Pa. (Ch. 15), sought by Triangle Publications (WFIL-TV, Philadelphia, WNBC-TV, Binghamton) which proposed to put station back on air as soon as possible (Vol. 11:27), has been held up by FCC, which sent McFarland Letter based on objections raised by WHP-TV, Harrisburg (Ch. 55). Commission notes allegations that Lebanon area already has plenty of TV service; that WLBR-TV would be a satellite of WFIL-TV and thereby hurt area uhfs; that station's service area would overlap those of WFIL-TV & WNBC-TV.

GENERAL TELERADIO is in the movie business through its \$25,000,000 purchase of RKO Radio Pictures (Vol. 11:30)—and “theatrical motion pictures come first.” So said General Teleradio pres. (and now RKO board chairman) Thomas F. O’Neil at New York press conference this week at which he sketched in some missing details surrounding the General Tire purchase and the company’s future plans.

He said he hopes to work out plans to expand theatrical film production in the relatively inactive studio he took over from Howard Hughes. Production organization will be headed by Charles Glett, former CBS-TV west coast network services v.p. with long experience in motion picture production. O’Neil accented his plans for future theatrical production—obviously anxious to get on good terms with movie exhibitors—but main interest of most newsmen at conference was in his TV plans for the RKO product.

He estimated the feature film backlog at about 800, but said it may be as long as a year before any are on TV. He said it was difficult to estimate how many were suitable for TV; then, he added, there are some legal problems involving TV use of some of the pictures. Possibilities of re-release to theatres of some of the movies will be considered. He foresaw no “flood of features” to TV, pointing out that some 400 feature films came to TV in 1954, and adding that the “gradual release” of RKO product won’t result in any glut.

“No major film company is likely to make its entire library available at one time,” he said. “Rather, we should envision a judicious apportion that would recognize that there are older films which should probably precede the release of the newer product and that would take account of the physical realities in selling any given number of films. If these probabilities prove to be fact, it is not likely that

there will be any real upset of the TV feature film market, least of all any ‘loosening of the floodgates’ to pour thousands of films on a suddenly disinterested market.”

He also said that RKO’s 2 unreleased films—*Jet Pilot* & *The Conqueror*—would be shown in theatres before they’re released to TV; that he has “no immediate plans” to establish a film TV network; that TV film production at RKO studios was a “possibility”; that General Tire has “no immediate intention” of offering RKO stock to public. He revealed that \$20,000,000 of the \$25,000,000 price paid to Howard Hughes came from Chase Manhattan Bank, remainder from General Tire.

RKO sale doesn’t open the floodgates as far as 20th Century-Fox pres. Spyros Skouras is concerned. Asked at London news conference whether his company would sell its feature film backlog for TV, he replied that it would—to the first buyer willing to pay \$150,000,000.

* * * *

List of 612 pictures “to which RKO Radio is understood to have clear title,” and which presumably will eventually be offered to TV, was compiled by *Billboard* and printed in July 30 issue. Among the topflight titles:

Abe Lincoln in Illinois (Raymond Massey), *Alice Adams* (Katherine Hepburn), *Annie Oakley* (Barbara Stanwyck), *Bachelor & the Bobby Soxer* (Cary Grant, Shirley Temple), *Bachelor Mother* (Ginger Rogers, David Niven), *Big Street* (Henry Fonda, Lucille Ball), *Bring ‘Em Back Alive* (Frank Buck), *Citizen Kane* (Orson Welles), *Double Dynamite* (Jane Russell, Frank Sinatra), *Hunchback of Notre Dame* (Charles Laughton), *If You Knew Susie* (Eddie Cantor, Joan Davis), *King Kong*, *Kitty Foyle* (Ginger Rogers), *Last Days of Pompeii*, *Sister Kenny* (Rosalind Russell), *Mr. Blandings Builds His Dream House* (Cary Grant, Myrna Loy, Melvyn Douglas)—plus all of the Fred Astaire-Ginger Rogers musicals and pictures featuring John Barrymore, Jimmy Durante, James Stewart, etc.

Personal Notes: Terence Clyne, chairman of McCann-Erickson plans review board, assumes management supervision of TV-radio dept. . . . Alfred R. Stern promoted to new post of NBC Radio director of partic. programs; Nicholas Gilles upped to operations mgr. of partic. programs . . . John P. Jefferson, ex-Radio Free Europe, joins CBS as asst. director of public affairs; Ralph Backlund promoted to exec. producer of radio public affairs programs; Dr. George Crothers, in charge of CBS-TV’s *Lamp Unto My Feet & Look Up and Live*, named director of educational & religious broadcasts . . . Calden P. (Bud) Stitt, from Chicago office, promoted to v.p. in charge of rep John E. Pearson’s Minneapolis office, replacing James Bowden, now John Blair & Co., Chicago . . . Jim Terrell upped to asst. national sales mgr., WKY-TV, Oklahoma City, Bob Gamble replacing him as news director . . . Charles R. White has resigned as commercial mgr. of KPTV, Portland, Ore., to become gen. mgr. of new KLEW-TV, Lewiston, Ida. (Ch. 3), due on air next Nov. . . . Dean McCarthy promoted to program mgr., WISN-TV, Milwaukee, succeeding Mel Quinn, now public affairs director . . . Thomas Freebairn-Smith appointed to newly created post of exec. secy., Academy of TV Arts & Sciences, L. A.; he was recently with WCAU, Philadelphia . . . Cody Pfanstiehl resigns as public relations director of WTOP-TV & WTOP, Washington, to take charge of public relations for Washington Community Chest Federation; Robert Adams continues as promotion director for TV, Wm. Wiggins for radio . . . Gene P. Loffler, ex-KSO, Des Moines, named gen. mgr. of KMMT & radio KAUS, Austin, Minn., replacing Tom Steensland, resigned . . . Jerome D. Greenberg promoted to merchandising director, WATV & WAAT, New-

ark . . . Dick Peck promoted to chief engineer, WREX-TV, Rockford, Ill. . . . Roman W. Wassenberg, ex-gen. mgr. of now off-air KTVU, Stockton, Cal., named exec. v.p. & gen. mgr. of Wesley Dumm’s KSFO, San Francisco, replacing Alan Torbett, resigned . . . Walter Kingsley, Ziv western div. chief, moves to N. Y. to become sales mgr. of new national sales organization, Allen Johnston taking over western div. and Russ Clancy continuing in charge of eastern div.; new setup will serve national advertisers . . . Tony Azzato, ex-film director, WPIX, N. Y. and recently eastern sales chief, George Bagnall Assoc., has formed own eastern film sales firm, Tony Azzato Assoc. . . . Charles Levy, ex-eastern publicity, adv. & exploitation director, resigns from Walt Disney organization to start own firm specializing in TV & film . . . De Alton Neher, ex-WDSU-TV & WDSU, New Orleans, named TV-radio director, Bauerlein Adv., New Orleans . . . Frank Riordan, sales mgr., promoted to managing director of WGBS-TV, Miami, succeeding Noran E. Kersta . . . Don M. Alexander elected pres., Alexander Film Co., Colorado Springs, Colo., succeeding his brother J. Don Alexander, who died May 6.

FCC Comr. Richard A. Mack’s new legal asst. is Earl Barber, from Miami firm of Yonge, Whiteside & Prunty. Engineering asst. hasn’t been selected; Mack has “borrowed” John Doane from staff, meanwhile.

Gordon M. Freeman, of Cincinnati, elected pres. of IBEW (AFL) by executive board July 25; he succeeds the late Scott Milne and his term runs to 1958. H. B. Blankenship, of Canton, O., succeeds Freeman as v.p.

Telecasting Notes: ABC's purchase of 35 top British films is first of its kind by a network, besides marking ABC-TV's entry into regular 90-min. programming. For \$1,600,000, the network acquired unlimited 5-year rights to the J. Arthur Rank features—many of recent vintage. Network will slot 20 of the films Sun. 7:30-9 p.m. under title *Movie of the Week*, in the tough time spot opposite CBS-TV's 8-9 p.m. *Ed Sullivan Show* and NBC-TV's new *Colgate Variety Hour*. Remaining 15 films will be marketed to stations by ABC Film Syndication as "Anniversary Package." All are first-run-on-TV. Advertisers in Sun. "film spectaculars" will be offered 9 spots during 90-min. period, ranging in price from \$9450-\$13,500 each, depending on frequency, with each film due for one or 2 repeats next season a la *Disneyland* . . . Films to be shown on network include *Caesar & Cleopatra* (Vivien Leigh, Claude Rains, Stewart Granger), *Notorious Gentleman* (Rex Harrison, Lilli Palmer), *Clouded Yellow* (Jean Simmons, Trevor Howard), *Mikado* (Kenny Baker, Martyn Green), *Tight Little Island* (Joan Greenwood, Basil Radford), *Odd Man Out* (James Mason, Robert Newton), and possibly several Alec Guinness films. Slated for syndication are such films as *Great Expectations*, *Seventh Veil*, *Kind Hearts & Coronets* (Alec Guinness) . . . More than 60% of ABC-TV's programming next season will be on film, its movie industry-originated programming (Vol. 11:30) consisting of 1½ hours weekly of feature films, 7 hours of new material produced by movie studios (Disney & Warner Bros.), 30 min. of new-to-TV theatrical short subjects (MGM) . . . Educational spectacular: Granddaddy of the 90-min. programs, Ford Foundation's *Omni-bus*, returns to CBS-TV Oct. 9, Sun. 5-6:30 p.m., with several big projects scheduled, including musical comedy based on "Hans Brinker, or the Silver Skates" by Alan Jay Lerner & Frederick Loewe; Alec Guinness in new humorous play; "Battle of Gettysburg" by Pulitzer Prize winner Bruce Catton; and series of 3 programs called *TV World's Fair* . . . Talent & production costs for network programs

next season may hit the astounding figure of \$500,000,000, TV-radio editor George Rosen predicts in lead story in July 27 *Variety*; he points out that \$50,000,000 in agent commissions expected next season would have paid cost of all TV network programming only a few years ago . . . Ziv TV to produce film series on order for advertisers through new national sales organization in N. Y. headed by Walter Kingsley. New Ziv properties for regular syndication include now-in-works *Dr. Christian*, with Jean Hersholt & Macdonald Carey, and *I Love a Mystery*, Carleton Morse's former radio serial; *Mr. & Mrs. Theatre*, possibly with Rex Harrison & Lilli Palmer; *Craig Rice, Woman Detective*, with Barbara Stanwyck; *Man Called X*, by James Saphire . . . Some 4000 actors will be employed in NBC-TV's daily *Matinee* series of hour-long color drama shows (Vol. 11:29), to be produced at Burbank, Cal. studios at cost of about \$100,000 a week. Tieups with movie studios for talent (but no big names) are being explored by exec. producer Albert McCleery . . . "Film network" plans of Guild Films and station-owned Vitapix Corp. apparently have been discarded because of time-clearance difficulties, Guild announcing modification in its deal with Vitapix to allow it to sell its film shows to networks and to national sponsors for network airings . . . TV Inc., small-station-owned film purchasing organization which claims to have acquired more than \$250,000 worth of film for its members, has voted to let major market stations use its film buying services as "associates," but they can't be stockholders . . . TV Review-Preview section in July 27 *Variety* is good reading, studded with predictions and features by top network and TV film officials, and by leading TV writers, directors, producers, etc. . . . Another TV drama goes to Broadway: Paddy Chayevsky's "Middle of the Night," originally produced last year on *Kraft TV Playhouse* (NBC-TV), has been adapted by author for theatre, with opening tentatively set for Dec. . . . Both NBC & CBS reported negotiating with Irving Berlin to write and appear in a spectacular next season.

COURT OF APPEALS is certainly holding tight rein on FCC, particularly in its review of Commission action on protests. This week, court tossed another protest case back, telling Commission it erred in denying an evidentiary hearing to radio WSAY, Rochester, N.Y., which had objected to grant of shared-time CPs to WVET-TV & WHEC-TV.

It is enough, court said, that WHEC is owned by Gannett Newspapers, to require a hearing. Court noted Gannett's widespread newspaper & broadcasting interests, said FCC should look into charges that there is a "threatened monopoly control of mass media of communications in the Rochester area." Court went on to say this issue isn't "frivolous or immaterial," and it called attention to Clarksburg, W.Va. decision (Vol. 11:25) which emphasized same idea. Court called for a "broad reopening" of case.

It was touch-&-go at press time, meanwhile, as to whether Congress would accede to FCC's request to get the protest "albatross" off its neck. The House-passed measure, which would give Commission more discretion in calling hearings, was approved by Sen. Pastore's subcommittee, but appeared doomed after full committee failed to report it. Pastore wouldn't give up, polled members, got bill reported and placed on calendar, awaiting final action.

An earlier reversal by courts was implemented by Commission this week when it stayed CP for WANE-TV, Ft. Wayne (Ch. 69) and ordered reopening of hearing

between it and Anthony Wayne Bestg. Co. Court had ruled that role of Paul V. McNutt, Anthony Wayne principal who died after final decision, must now be considered differently (Vol. 11:25).

* * * *

Commission held its last meetings this week until end of vacation period Aug. 31. It got out flock of AM grants, sales, etc. but issued no TV grants. Final action on anything important will be delayed a month. Acting Chairman Webster & Comr. Lee will be only members regularly on hand.

One allocations change was finalized—addition of Ch. 6 to Hayes Center, Neb. Allocation of Ch. 12 to Santa Barbara, Cal. was sought in petition filed by James M. Monroe & Wm. E. Sullivan who asked FCC to cut mileage restrictions. WVEC-TV, Hampton, Va. (Ch. 15) asked change of rules to permit it to identify location as Hampton-Norfolk. Grantee WOBS-TV, Jacksonville, Fla. (Ch. 30) asked that city be deintermixed by making Ch. 12 educational, shifting Ch. 7 to Savannah.

Pay raise for FCC commissioners hung in the balance at week's end as Congress rushed toward adjournment. Both House & Senate Civil Service Committees had approved slightly different versions of President Eisenhower's proposals to increase salaries of about 250 top gov't. executives. House version would increase commissioners' pay from \$15,000 to \$19,000, Senate version to \$20,000 as requested by President. Chairman Magnuson (D-Wash.) of Senate Commerce Committee this week introduced bill to raise members of independent boards and commissions (including FCC) to \$21,500.

Station Accounts: Television Bureau of Advertising has launched local sales campaign, *Pinpoint Concept of Television*, mailing 34-p. presentation under that title to its members, advertisers & agencies. Presentation is first of a series of 5, deals with local news programs and is based on study conducted for TvB by Nielsen. It reveals that 63% of all TV homes regularly view local news programs, and that they watch these shows average of 2.7 times a week. Subsequent presentations will deal with children's programs, movies, women's programs & weather shows . . . Spot TV expenditures in first quarter, revealed by TvB on basis of N. C. Rorabaugh figures, showed increases in 8 product categories over first 3 months of 1954: shortenings, up 220%, mouthwashes 93%, toilet soaps 67%, shaving creams 40%, soaps & detergents 34%, shampoos 28%, dentifrices 21%, home permanents 18%. In addition, TvB disclosed gasoline & oil companies spent \$2,816,000 on spot TV in first quarter (no comparable 1954 figures available), top 10 sponsors being Esso, Shell, Standard Oil of Ohio, Standard Oil of Indiana, Phillips, Pure Oil, Bardahl Oil, Sinclair, Richfield, Ohio Oil . . . Old favorite, *The Goldbergs*, is now being syndicated by Guild Films as 30-min. program; under Old Dutch Coffee sponsorship, it returns as weekly feature on WABD, N. Y. starting Sept. 22, Thu. 7:30-8 p.m. . . . Among advertisers currently reported using or preparing to use TV station time: Marlin Firearms Co., New Haven, thru Scheideler, Beck & Werner, N. Y.; Calistoga Mineral Water Co., Calistoga, Cal., thru Charles R. Stuart Adv., San Francisco; Chattanooga Medicine Co., Chattanooga (Black-Draught laxative) thru Harry B. Cohen Co., N. Y.; Lucky Lager Brewing Co., San Francisco, thru McCann-Erickson, San Francisco; Heckman Biscuit Co., div. of United Biscuit Co., Grand Rapids, thru George H. Hartman Co., Chicago; Shulton Inc., N. Y. (men's toiletries), thru Wesley & Assoc., N. Y.; Armour & Co., Chicago (frankfurters), thru Tatham-Laird, Chicago; Petri Wine Co., San Francisco, thru Young & Rubicam, San Francisco; Byko Co. Inc., N. Y. (Oranjeboom beer), thru Ralph Jones, N. Y.; Continental Baking Co., N. Y. (Daffodil Farms bread), thru Ted Bates, N. Y.; Carnation Co., Los Angeles (Instant Chocolate Drink), thru Erwin, Wasey & Co., L. A.; Perkins Products Co., Chicago (Kool-Aid powdered soft drink), thru Foote, Cone & Belding, Chicago; National Lead Co., N. Y. (Dutch Boy paint), thru Marschalk & Pratt, N. Y.; Rogers Imports Inc., N. Y. (smoking accessories), direct; Kummeth Mfg. Co., Owantonna, Minn. (Trav-L-Eez baby carriages), thru Erwin, Wasey & Co. of Minn., Minneapolis; L. Sonneborn Sons Inc., N. Y. (Amalie Pennsylvania motor oil), thru Humbert & Jones, N. Y.

Signs of the TV-radio times: TV-radio took largest share of Canadian advertising dollar placed through 91 agencies during 1954, reports Dominion Bureau of Statistics; total ad volume last year was \$156,163,289, up 8.2% from 1953 . . . NBC's owned-&-managed stations, TV & radio, collectively registered gain of 13% in national spot, 12% in local sales in first 6 months of 1955, reports v.p. Charles R. Denny; biggest gainers were WRC-TV, Washington, up 43% in national; WNBK, Cleveland, up 34%. WRCA-TV, N. Y. registered 18% gain in local, WNBK 16%, KRCA, Los Angeles, 15%, and Cleveland's WTAM led local radio with 45% gain . . . Westinghouse's 5 radio stations earned 96% more profit in first 6 months of this year than last, with local sales up 25.9%, reports pres. Chris J. Witting; KYW, Philadelphia, alone, was up 60%. Its 4 TV stations, he added, without giving figures, are "regularly setting new highs, but then TV is a booming new medium" . . . Radio WWJ, Detroit reports increase in national spot was 8.9% in first 6 months, with local up 54.2%.

Network Accounts: Westinghouse will spend estimated \$5,000,000 to cover 1956 Presidential conventions, campaigns & election returns on CBS-TV & radio. In 1952, it paid CBS \$3,000,000 for similar sponsorship. Coverage will consist of special program the day before each party's convention, conventions themselves, weekly progress report on campaigns for 8 weeks, election returns. Democratic convention will open in Chicago Aug. 13, Republicans in San Francisco Aug. 20 . . . General Motors, whose United Motors Service div. recently bought 30-min. of NBC-TV's bi-weekly *Wide Wide World* starting Oct. 16, Sun. 4-5:30 p.m., has taken option on entire program, with other 2 segments likely to go to Frigidaire and one of its automobile divs. . . . AT&T's first regular TV show will be *Storyteller*, series of 30-min. filmed dramatizations of true human interest stories, filmed at Hal Roach Studios, on undetermined network this fall, thru N. W. Ayer; it will be narrated by John Nesbitt and tied to Bell Systems' "Second Phone for Every Home" campaign . . . Camels & Amana Refrigeration Co. to be alt. sponsors of Phil Silvers' *You'll Never Get Rich* on CBS-TV starting Sept. 20, Tue. 8:30-9 p.m., thru Wm. Esty & Co. and MacFarland, Aveyard & Co., Chicago . . . U. S. Savings & Loan League buys 3 partic. on NBC-TV's *Color Spread* next year, Jan. 1, March 25 & June 17; show is scheduled for every 4th Sun. 7:30-9 p.m., thru Christopher, Williams & Bridges, Chicago . . . Johnson & Johnson buys alt. Tue. 12-12:15 p.m. segment of *Tennessee Ernie Ford Show* on NBC-TV; alt. Tue. 3:15-3:30 p.m. of *Ted Mack Matinee*; Tue. 4:30-4:45 p.m. of *World of Mr. Sweeney*; 8 partic. on *Home*, Mon.-thru-Fri. 11 a.m.-noon, thru Young & Rubicam . . . Standard Brands buys alt. Fri. 12:15-12:30 p.m. segment of *Tennessee Ernie Ford Show* and alt. Fri. of *Howdy Doody* on NBC-TV, 5:30-6 p.m., thru Ted Bates & Co. . . . Dow Chemical buys *Football Scoreboard*, post-NCAA show, on NBC-TV this fall, thru MacManus, John & Adams . . . Pitching for more food sponsors, NBC-TV's *Home* starts year-round promotion of food industry Aug. 1—including weekly "editorial" on food, remotes from grocery stores & processors, tie-in display promotions with grocers.

Rate increases: WPTZ, Philadelphia, raises base hour from \$2500 to \$3200 and 20 sec. from \$500 to \$650; WXIX, Milwaukee, hour from \$700 to \$800, min. \$100 to \$125; KOTV, Tulsa, from \$700 to \$750, 20 sec. \$150 to \$175; WSJV-TV, Elkhart-South Bend, from \$250 to \$300, min. \$50 to \$60; KBAK-TV, Bakersfield, Cal., \$235 to \$275 & \$47 to \$55.

Miss Suzanne Herz, of Biow-Beirn-Toigo Inc., N. Y. agency, won first prize of \$400 in contest guessing when new 1105-ft. tower of WISN-TV, Milwaukee, would be completed; her guess was 12:05 p.m. July 25. Richard Scott, American Chicle Co., won second prize of \$200; Gene O'Fallon, KFEL-TV, Denver, third prize of \$100.

NBC-TV offers combination rate to sponsors for partic. on *Today*, *Home & Tonight* and weekend radio *Monitor*; exec. v.p. Robert W. Sarnoff said "typical schedule" of 18 messages (14 on *Monitor*, 4 on combination of TV shows) would deliver "29,000,000 commercial impressions" for \$30,853—or \$1.06 per 1000.

NARTB will back National Radio & TV Week Sept. 18-24 (Vol. 11:3) with kit of institutional spot announcements. TV pitch will stress new big-screen sets, urge public to think of second set purchase with theme "Dedicated to Better Home Entertainment." Networks, RETMA, NARDA, RAB & TvB have pledged support.

First Spanish-language ad agency in U. S. is branch of Publicidad Badillo, San Juan, Puerto Rico, opened in Chanin Bldg., N. Y. this week by exec. v.p. Harwood Hull.

TWO MORE VHF stations can be added to roster of those now operating—WHIS-TV, Bluefield, W. Va. (Ch. 6) and WTHS-TV, Miami, Fla. (Ch. 2, educational)—and they bring on-air total to 437, of which 106 are uhf.

Bluefield station turned on first test patterns afternoon of July 29, planned preliminary test programs daily from 6:30-10:30 p.m. and interconnection with NBC in 2 or 3 weeks, depending on completion of microwave relay. It's owned by Hugh I. Shott family, publishers of *Bluefield Daily Telegraph*, oldtime broadcasters, and it's located on W. Va.-Va. border where it opens up virtually new TV market since nearest other outlets are in Roanoke, 71 mi. distant, and Oak Hill, 50 mi. away. It uses 10-kw RCA transmitter, 100-ft. Ideco tower with 6-bay antenna on East River Mt. Ridge. Hugh I. Shott Jr. is gen. mgr.; P. T. Flanagan, station mgr.; J. F. Byers, chief engineer. Base hour is \$200. Rep is Katz.

Miami station, second vhf in city and country's 15th non-commercial educational, is slated for Aug. 1 test patterns, Aug. 10 programming schedule. It utilizes old GE Ch. 4 transmitter of local WTVJ, converted and located on top floor of downtown Everglades Hotel. In charge of operation for Dade County Board of Public Instruction is Vernon Bronson, asst. director of its dept. of radio & television education.

* * * *

In our continuing survey of upcoming stations, these are latest reports from principals:

KTBS-TV, Shreveport, La. (Ch. 3) now plans to start NBC programming Sept. 3, writes pres.-gen. mgr. E. Newton Wray. RCA antenna, on hand, is scheduled for installation on 1051-ft. Truscon tower Aug. 25, with test patterns due next day. DuMont 25-kw transmitter also is on hand for installation at site 3 mi. SE of Mooringsport, La. It will be city's second outlet, KSLA (Ch. 12) having begun in Dec. 1953. Base hour will be \$400. Rep will be Petry.

Two engineers who have done quite well: Frank C. Carman and partner Grant R. Wrathall have given 4-month option to publishers of *Salt Lake Tribune* and *Ogden Standard Examiner* to acquire all their TV-radio station holdings for sum reported in excess of \$1,000,000. Salt Lake City newspaper already owns 50% of KUTV (Ch. 2) and radio KUTA, ABC outlets, in which Carman, gen. mgr., and Wrathall, onetime Washington consulting engineer living in Aptos, Cal., are founder-owners of 25% each. Ogden newspaper, owned by Glassman family, including son-in-law George C. Hatch, pres. of radio KALL, Salt Lake City, is owner of radio KLO, Ogden; KIMN, Denver; and 40% of KMON, Great Falls, Mont. Carman & Wrathall own 12½% each of KLIX-TV, Twin Falls, Ida. (Ch. 11) and radio KLIX, also to be sold to the newspaper combine, which has not indicated how it will divide ownership; they also own 16¾% each of radio KOPR, Butte, Mont., whose counterpart KOPR-TV (Ch. 4) quit the air last year; 12½% each of radio KIFI, Idaho Falls, Ida.; 6¼% each of radio KWIK, Pocatello, Ida.—latter 2 stations to be sold to J. Robb Brady Trust Co., of Idaho Falls. Carman personally owns radio KGEM, Boise, and Wrathall is 100% owner of recently inaugurated KPOO, San Francisco, 10-kw daytimer on 1010 kc, and both those stations may go into the new newspaper group.

Latest private microwave: Upcoming WFLB-TV, Fayetteville, N. C. (Ch. 18) was granted CP for system to pick up signals of WFMY-TV, Greensboro & WTVD, Durham.

KCRA-TV, Sacramento (Ch. 3), planning Sept. 1 NBC programming, has set Aug. 25 test pattern target, reports pres.-gen. mgr. Ewing C. Kelly, writing from new headquarters at 310 Tenth St. Transmitter house is ready for 25-kw RCA transmitter due July 27. Coaxial cable is in place and Ideco 450-ft. tower is 60% completed for 6-bay 102-ft. antenna scheduled for installation week of Aug. 15. It will be 2nd vhf to compete with city's first outlet, KCCC-TV (Ch. 40)—KBET-TV (Ch. 10) having started last March. Base hour will be \$650. Rep will be Petry.

WITI-TV, Glendale, Wis. (Ch. 6, allocated to Whitefish Bay), granted June 29, expects to be on air by next Jan. 1, reports pres. Jack Kahn, Milwaukee yarn & hosiery manufacturer. Glendale is suburb of Milwaukee. Equipment not ordered yet, rep contract not signed.

WXEX-TV, Petersburg-Richmond, Va. (Ch. 8) now has Aug. 13 test pattern target, reports managing director Irving G. Abeloff. On Aug. 15 it takes over as NBC outlet for Richmond area from pre-freeze WTVR (Ch. 6). Pres. Tom Tinsley Jr., of Baltimore's WITH, has moved to Petersburg for summer to supervise installation, and 50-kw RCA transmitter is now reported nearly ready. Antenna is scheduled for installation Aug. 9 on 978-ft. Stainless tower at Hundred Rd. site, 12 mi. S. of Richmond. Base hour will be \$750. Rep will be Forjoe.

KTRE-TV, Lufkin, Tex. (Ch. 9), planning Sept. 1 commercial start using KPRC-TV programs via microwave from Houston, has Aug. 10 test pattern target, reports v.p.-gen. mgr. Richman Lewin. KPRC-TV is lending cameras and remote equipment for Aug. 30 opening program featuring live show from new Lufkin High School auditorium. GE 5-kw transmitter is now being installed; antenna is ready on 500-ft. Andrews tower. Base hour will be \$150. Reps will be Venard, Rintoul & McConnell and Clyde Melville Co. (Southwest).

WTTW, Chicago (Ch. 11, educational) now plans test patterns Aug. 15, preparatory to early Sept. programming. It's installing GE antenna atop Field Bldg., also has 5-kw GE transmitter. Regular 4-10 p.m. schedule begins after move of studios & offices to Chicago Museum of Science and Industry late this year.

FCC chief accountant Wm. J. Norfleet retires Oct. 31 after 39 years of govt. service, and Chairman McConaughy plans to split staff into 2 groups—incorporating economists into Broadcast Bureau as a separate division, putting accountants into Common Carrier Bureau, abolishing Office of Chief Accountant. Move is considered logical because economists have been working primarily on TV-radio, accountants on common carrier—and Commission has become acutely aware of TV-radio economics, principally because of Congressional pressures on color, uhf, network practices, subscription TV, etc.

FCC "line of succession" in case of disaster was announced this week. The first 10: chairman, "defense commissioner" (now Lee), "alternate defense commissioner" (Bartley), any other commissioner, chief of Field Engineering & Monitoring Bureau, general counsel, chief engineer, chief of Safety & Special Bureau, chief of Broadcast Bureau, chief of Common Carrier Bureau.

First authorization for 5-megawatt power went this week to New Orleans' WJMR-TV (Ch. 61, due to switch to 20). Commission's grant was experimental, to permit station to serve as proving ground for new GE equipment (Vol. 11:25). FCC's proposed 5-megawatt rule is expected to be finalized within few months.

Low-power uhf & vhf transmitters (150-watt) are among products described in technical bulletins issued by Adler Communications Labs, 1 LeFevre Lane, New Rochelle, N. Y. Also covered: video switcher, video distribution amplifier, video clamp amplifier.

PRICE HIKES DUE BY FALL, COLOR ACTIVATED: Increases in black-&-white TV prices this fall seem more certain than ever, in light of recent increases in costs of labor and raw materials -- plus the robust condition of TV market and national economy. Top set manufacturers and their components suppliers are virtually unanimous now in forecasting price increases in autumn -- though they're understandably cautious, for competitive reasons, about public predictions on their own plans.

RCA, Philco, Admiral, Motorola & Westinghouse are among set makers who have indicated that prices would be raised. Their theme generally is: "We're going to try to hold the price line, but we're not sure we can do it. We anticipated the higher labor costs, but not materials. In the long run, it depends on parts."

Leslie F. Muter, pres. of parts maker Muter Co., flatly predicts 5-10% hike in components prices shortly after Labor Day, saying parts prices now are 10-15% under year ago. He reflected a general attitude when he commented to us:

"We made only a 2% net profit in the first 6 months of this year. I think you'll agree with me that that's a pretty thin margin. In view of the strong TV business, there's no reason for it." (Muter Co. financial report is on p. 12.)

* * * *

Record or near-record TV year continues to be indicated in field reports and forecasts. Dealer enthusiasm -- and purchases -- at "open houses" continues to astonish the most experienced manufacturers. Important and especially gratifying aspect of their enthusiasm has been purchase of high-end, or "furniture" TVs.

Sylvania pres. Don G. Mitchell this week added his optimistic forecast to those which have emanated from trade leaders lately. Addressing his distributors' convention in Chicago, he predicted retail sales of at least 7,200,000 TVs this year -- perhaps more. In fact, he forecast unit sales to public will range from about 6,500,000 to 7,300,000 a year for next decade.

Closer attention should be paid to national economic trends, said Mitchell, because TV industry has "now come of age" and is tied closer than ever to economy at large. "In the years ahead," said Mitchell, "I think we [the TV industry] will get better traffic directions from the state of the economy than we will from the facts we used almost exclusively in the past" -- that is, statistics concerning past performances of the TV industry and its potential markets.

Magnavox pres. Frank Freimann, at dealer showing in N.Y., predicted a 20% increase in dollar volume of TV-radio-phono sales this year over 1954. He cited such factors as new TV stations, growth in second-set homes, improved programming. (Details of Sylvania and Magnavox lines are on p. 10.)

* * * *

Color is getting ready for another start this fall -- accelerated & sustained almost entirely by RCA, backed by an enlarged NBC colorcasting schedule including daily daytime Matinee (3-4 p.m.) for "showcasing" to customers (see p. 2). It's now preparing big receiver promotion campaign to get color rolling. It's admittedly aiming at outset for a relatively small portion of the 35,000,000 black-&-white set owners -- the 1% or so "Cadillac trade" which can easily afford the \$795-&-up sets. RCA feels they can provide momentum to push color into high gear by year's end.

How many color TV sets will be made rest of this year and next is conjectural and depends largely on what rest of the trade sees in public reaction to all-out RCA promotion. Sylvania is gearing to turn out RCA's 21-in. shadow-mask color tubes -- but so far as we can learn, it's only tubemaker besides RCA readying for quantity. RCA's own capacity at big color-converted Lancaster plant was said to be 30,000 a month, and the company has stated it will use all of its output for its own sets if regular tube customers don't want to buy.

RCA is making complete color sets for Hallicrafters & Magnavox and perhaps

others as yet undisclosed, and it's interesting to note that Hallicrafters withdrew its originally announced \$695 list price after revealing RCA would make its chassis. Magnavox never disclosed a price. Until production really starts rolling, RCA says there's very little chance of color prices coming down substantially.

Taprooms and cocktail lounges, as well as the carriage trade, could well be major factor in color set purchasing, just as they were mainstay of black-&-white market when TV first emerged in 1945 & 1946. This is supported in an article by 3 hotel operators in Feb. Hotel Management Magazine, pointing out that the few such color installations made so far have lured many customers.

RCA's ambitious color promotion was launched with 4-color spread in Aug. 1 Life Magazine, illustrated by shot from smash-hit Peter Pan colorcast. Tentative budget includes 23 one-page ads in color in 14 national magazines in 4th quarter, all devoted to color sets, plus 5 color-set ads in 5 magazines in conjunction with black-&-white line. In Sept., it will place full-page ad in 125 major newspapers in color reception areas and a full-page ad once a month in trade papers, tied in with the Producers' Showcase spectaculars on NBC. In addition, it will have 2½-min. commercial on color sets on RCA-sponsored portion of Producers' Showcase. Dealer co-op promotional material, radio scripts & TV slides round out the campaign.

That RCA intends to capitalize on recalcitrance of others vis-a-vis color, notably Philco & Zenith, is manifest from fact that many of the ads will carry the notation: "RCA pioneered and developed the compatible color TV system."

Brief highlights of other major trade developments this week:

* * * *

Whirlpool Merger: RCA's assurance last week that distribution pattern would not be changed abruptly as result of its 20% ownership in merged Whirlpool-Seeger Corp. (Vol. 11:29-30) was echoed this week by Whirlpool exec. v.p. John A. Hurley. He said that selection of distributors will be based on their ability to deliver satisfactory sales performance and ability to maintain adequate financial resources. "If and when changes of distributorship are to be made, I do not expect any quick decisions," he said. "These things require time and thought for best solution." It's assumed RCA-Whirlpool lines will be handled by a single distributor in each market, which inevitably means changes in present representations; best information available to date is that Whirlpool line is currently handled by about 17 RCA distributors, about 13 Admiral, 12 Philco and 5 Motorola outlets. Proxy notice going out to Whirlpool stockholders next week is expected to give further details.

Business Outlook: Still upbeat, judging by all the economic indicators. United Business Service interprets opinion of leading economic authorities thus: "Overall business outlook remains favorable. Mild summer slowdown, mostly seasonal, will give way to a renewed uptrend in the fourth quarter...Total production, after a third-quarter 'breather', is expected to expand moderately this fall...Retail sales will continue to hold above high year-ago levels over the remainder of 1955." U.S. News & World Report stresses that current economic prosperity is being "privately generated," points out that govt. spending is declining, while business outlays and individual spending are on the increase.

Production: TV output, still reflecting factory shutdowns, totaled 90,072 week ended July 22, compared to 78,968 in preceding week and 53,028 week ended July 8. It was year's 29th week and brought production for the year to about 4,000,000 vs. 3,000,000 in equivalent 1954 period. Radio production totaled 224,866 (125,619 auto), compared to 180,987 week ended July 15 & 124,501 week before. Radio output in 29 weeks was 7,600,000 vs. 5,650,000 same period of 1954.

Dun & Bradstreet reports 209 failures among TV-radio-appliance retailers in first 6 months, compared to 274 in first half of 1954. Liabilities in failures this year totaled \$6,213,000 vs. \$22,311,000 year ago. In June alone, there were 27 retail failures, liabilities of \$769,000, vs. 39 & \$947,000 in May and 54 & \$1,636,000 in June 1954.

Excise tax collections on TV-radio-phonos totaled \$128,443,000 in 11 months ended May 31 vs. \$135,096,000 in same period year ago, reports Internal Revenue Service.

NARDA's Institute of Management for 50 top-level TV-radio dealers will be held at American U, Washington, Aug. 14-20. Speakers will be John M. Otter, Philco; Joseph B. Elliott, ex-RCA, now pres. of Schick Inc.; Charles W. Theelen, GE; Dan Packard, McCann-Erickson.

TV Remote Control Co., Los Angeles, has appointed Tilds & Cantz Adv. there to handle local test campaign preliminary to national campaign for its remote control mechanism for TV sets.

Topics & Trends of TV Trade: Westinghouse will supplement its TV line shortly with several new models to be marketed through retailers of kitchen equipment, it's revealed by gen. sales mgr. Dan D. Halpin. The new table models, all 21-in., will be in same colors as appliances—white, "sunshine yellow" & blue-green—and will be priced slightly higher than their counterparts in regular line.

The action reflects 2 of Halpin's pet projects—to use more colors in cabinet finishes and to make a bigger dent in second-set market. Like several other set makers, Westinghouse is hitting hard with colors in cabinets this year, expects to expand its color offerings next year.

"Color in cabinets is one important feature that makes the customer feel he is getting something new," said Halpin. "Furthermore, it opens up several rooms in the house to TV—the kitchen, maid's room, den. The time is past when we can just sell brown sets."

Halpin also attacks "one-set thinking" in some segments of industry, comparing it to "the concept in my childhood days that the living room should have only one big center light." Getting a TV set into the kitchen is an ideal way of cracking the second-set potential and capitalizing on woman's intense interest in TV, he says.

Note: In 1949, Motorola showed 7-in. table TV, in ivory cabinet, for "kitchen trade" (Vol. 5:36), planned to sell it for \$140—but it was a novelty number, never did catch on.

* * * *

Sylvania's new line, introduced this week at distributors convention in Chicago, comprises 20 basic models ranging from 21-in. mahogany table model at \$200 to 24-in. full-door console at \$400. One 21-in. table model will be priced by distributors according to local market conditions. Big talking point in some sets is "cabinet of light," with all wood framing removed from the front of set, giving appearance of greater brightness. Other features are new all-channel tuner and increased power. The 21-in. tables are priced at \$200, \$210, \$230, \$250, \$260, \$270 & \$290; 21-in. consoles at \$230, \$260, \$270, \$300, \$310, \$320, \$350, \$370, \$380 & \$420; 24-in. table at \$330; 24-in. consoles at \$370 & \$400. Also introduced were 8 radios ranging from \$26 to \$47 and 2 high-fidelity units at \$150 & \$170.

Magnavox is misinterpreted by many as strictly a "premium-priced" company specializing in more expensive TV models, whereas actually the Magnavox line, model for model, is 10-25% lower than other brands of comparable quality. So said v.p.-gen. mgr. Leonard F. Cramer at his company's N. Y. showing of new models to press & dealers this week. For example, said Cramer, the Broadway 21-in. 3-way combination at \$298 is \$100 less than other models in its class, and the Operetta at \$349 is likewise \$100 under comparable models. Line ranges from 17-in. table at \$150 to 24-in. combination at \$600, has top or front top tuning in all models.

Motorola won't enter white goods field in the foreseeable future, no matter how many of its competitors do so, company spokesman emphasized this week. In wake of RCA's 20% purchase of Whirlpool-Seeger Corp. (Vol. 11:29,30), Motorola spokesman said company is determined to expand only in electronics, taking pride in billing itself as the "largest exclusive electronics manufacturer."

Two all-transistor portable radios will be introduced by RCA some time this fall, both at \$79.95. Six-transistor model will be 5½x3¼x1½-in., 7-transistor model about 10x7x3½-in. Other manufacturers with transistorized portables on market report public snapping them up.

Encouraging step-up selling, Admiral has added mahogany & blonde cabinet finishes (at \$10 extra) to its 21-in. ebony table model at \$170 only, and mahogany, blonde & maple to its 21-in. bronze mahogany console at \$200.

Bullish outlook for phono record business is shown in *Billboard Magazine* survey of dealers, pointing to peak retail gross of \$210,000,000 this year, up from previous highs of \$205,000,000 in 1954 & 1947. Biggest single development in pushing sales up this year—and, it's expected, in next few years—was industry-wide price slash on LP records at start of 1955 (Vol. 11:1-2). Salient points of survey: (1) More than 50% of all record dealers grossed more in first 5 months of 1955 than in same period year ago, average gain being 20%. (2) 67% of dealers increased or held same profit level. (3) Competition from mail order houses decreased sharply, resulting in more optimistic assessment of future. (4) Inventories are up, but are not regarded as dangerously high.

Phonograph sales are moving briskly, too. Bud Letzer, v.p.-gen. sales mgr. of Webster-Chicago, predicted at distributor convention last week that industry would sell 4,000,000 phonographs this year, slightly higher than last year. He estimated that there are now 29,000,000 phonographs in use, or about 37% saturation; that average phonograph in use is 4½ years old; that about 62% of all phonographs sold now are for replacement market.

* * * *

Demand for major appliances will rise as much as 300% in some cases by 1959, according to 8-p. booklet prepared by GE and mailed to its 350,000 stockholders and 14,000 dealers. Here's the way it foresees the estimated 1959 demand in units (industry's 1954 sales in parentheses): refrigerators, 4,000,000 (3,484,000); automatic washers, 3,600,000 (2,350,000); electric ranges, 2,200,000 (1,260,000); room air conditioners, 1,850,000 (1,230,000); electric water heaters, 1,600,000 (785,000); clothes dryers, 1,400,000 (660,000); freezers, 1,200,000 (925,000); food waste disposers, 850,000 (425,000); dishwashers, 700,000 (215,000).

Industry-backed excise tax revision bill, correcting inequities in current 10% Federal tax on TV-radio-phonos and components, was passed this week by both House and Senate. HR-7024, introduced by Rep. Simpson (R-Pa.) would remove excise tax from all non-entertainment TV-radio equipment and from components sold "for further manufacture" (Vol. 11:27-28). Only difference between House and Senate versions, both passed by unanimous consent, is that latter was amended to include an unrelated rider with regard to tax litigation. Final passage of Senate version by House is expected before adjournment.

Shortage of available distributors is forcing Hoffman Electronics & Capehart-Farnsworth to institute limited policy of direct factory-to-dealer selling in some markets. Hoffman gen. sales mgr. Walter L. Stickel said new program will be applied largely in big eastern metropolitan markets "where independent distribution of a quality character is not available to us." Capehart v.p. E. W. Gaughan said "such a step is necessary to gain the full advantages afforded by our extensive national advertising program."

Standard Coil Products Co. has formed wholly-owned Canadian subsidiary, Standard Coil Products (Canada) Ltd., having acquired 30,000-sq. ft. plant in Toronto. Jere Cavanaugh has been named gen. mgr.

Agency appointments: Crosley TV-radio to Compton Adv., N. Y., with Earle Ludgin & Co., Chicago, continuing to handle Crosley appliances & Bendix laundry equipment; Spartan TV-radio to Paxson Adv. Inc., Benton Harbor.

Sylvania introduced 21-in. color console, using RCA-type tube, at distributors convention this week. It was unpriced.

Sentinel Radio looking into jukebox TV field, one plan being to put sets in public places to operate 15 min. for 25¢.

Trade Personals: Charles P. Baxter, asst. gen. mgr. of RCA Victor TV div. since 1949, promoted to gen. mgr., succeeding v.p. Henry G. Baker, who will serve as staff adviser on consumer products sales & merchandising policies, reporting to Robert A. Seidel, exec. v.p. for consumer products . . . Norman C. Owen, ex-pres. of Webster-Chicago, named Zenith Radio distribution mgr. . . Robert K. Hartman, CBS-Columbia v.p. in charge of industrial & military manufacturing, appointed director of industrial & defense contracts for CBS-Columbia, CBS-Hytron & CBS Labs . . . Ross D. Siragusa Jr., son of Admiral pres., transferred from San Francisco factory branch to Chicago headquarters as asst. sales mgr. of TV div. . . B. H. Melton, sales mgr. of Admiral contract div., adds duties of sales mgr. of newly-integrated refrigerator & freezer-air conditioner div., replacing Wm. Doyle, who resigned as sales mgr. of freezers & air conditioners to join Crosley-Bendix, and J. M. Tenney, who resigned as sales mgr. of refrigerators, moving to Tucson as Admiral consultant; Evans T. Morton resigns as engineering director of Admiral appliance div. . . Richard B. Leng, ex-Sylvania, RCA & Raytheon, elected v.p. in charge of Packard-Bell's technical products div. . . Jack R. Feeney promoted to sales mgr., RCA Victor Co. Ltd., Montreal . . . F. H. O'Kelley Jr. named eastern regional sales mgr., GE tube dept. . . R. S. Sheetz, from lamp div., named asst. to R. J. Sergent, mgr. of Westinghouse major appliance div. . . Herman S. Sacks resigns as Bendix Radio director of adv. & sales promotion . . . Norman L. Harvey promoted to chief engineer, Sylvania TV-radio div. . . Robert W. Conner, mgr. of installation coordination & customer service, RCA engineering products div., Camden, transferred to RCA Victor Radio S.A., Rio de Janeiro, as head of new engineering dept. under pres. Perry F. Hadlock . . . Jerome E. Respass resigns as v.p. of La Pointe Electronics Inc. to become pres.-treas. of Johns-Hartford Tool Co., Hartford . . . Howard Cushing named sales director of Bell & Howell's new high-fidelity div. . . Bob Deatrick appointed administrative asst. to George Rowen, Sparton gen. mgr. . . J. R. Johnson, gen. mgr. of Los Angeles plant, promoted to technical asst. to Standard Coil pres. Glen E. Swanson . . . Barron W. Chandler named Indianapolis district sales mgr., P. R. Mallory . . . Stanley Kempner, ex-*Mart Magazine* (Caldwell-Clements) & onetime TV-radio editor of *Retailing Daily*, named public relations mgr. of Westinghouse TV-radio div., Metuchen, N. J. . . Norman Wicks resigns as mgr. of business development dept. & adequate wiring bureau, National Electrical Mfrs. Assn., to join General Precision Labs . . . Marcus S. Chacona appointed sales mgr. for GE's TV tables & bases, headquartering in Chicago . . . Manuel H. Rosen, ex-Majestic Radio, named Trav-Ler Radio New England regional mgr., Boston . . . Channing Dichter promoted to mgr. of industrial & military product engineering, GE picture tube sub-dept., Syracuse; Joseph W. Dreher promoted to mgr. of engineering administration . . . Wilfrid L. Larson, pres. of Switchcraft Inc., Chicago, elected chairman of Assn. of Electronic Parts & Equipment Mfrs., succeeding Theodore Rossman, Pentron; J. Wayne Cargile, Permo Inc., succeeds Larson as vice-chairman . . . James O'Connor appointed Sparton district merchandiser for east-central Texas, headquartering in Dallas.

Paul V. Galvin, Motorola pres., appointed chairman of a permanent RETMA organization committee, in charge of recommending changes in its organizational structure. Other members: Dr. W. R. G. Baker, GE; Max F. Balcom, Sylvania; H. J. Hoffman, Machlett Labs; F. R. Lack, Western Electric; Leslie F. Muter, Muter Co.; A. D. Plamondon Jr., Plamondon Magnetics; Robert C. Sprague, Sprague Electric.

DISTRIBUTOR NOTES: CBS-Columbia establishes factory branch, CBS-Columbia of Southern Ohio, 905 Broadway, Cincinnati (Charles E. Goodmanson, gen. mgr.) . . . Admiral appoints Certified Appliance Distributors Inc., 817 S. Alameda St., Los Angeles, for radios & phonos only, supplementing its factory branch, which will concentrate on TV . . . Crosley-Bendix appoints Lott & Geckler, Cleveland . . . GE appoints Lowry Electric, Williamsport, Pa., replacing Raub Supply Co., Lancaster . . . Admiral transfers Carl Lantz from gen. mgr. of Denver factory branch to Chicago headquarters as asst. to Clarence Tay, gen. mgr. of all distributing branches . . . Motor Radio, Kansas City (Motorola) appoints Gene Abrams sales mgr., replacing Joe Merchand, resigned.

Crosley-Bendix reorganization creates merchandising group at Cincinnati headquarters under F. E. Howell, v.p. of sales & distribution, separating it from field sales force. Herbert J. Allen, TV-radio sales mgr., becomes merchandising mgr. of all electronic products, including TV; James Farrell remains as asst. to Allen; Gene Huber is promoted as additional asst. to Allen. Joseph L. Armstrong, Bendix laundry sales mgr., becomes sales mgr. of all products, including TV. Wm. B. Doyle, ex-Admiral, named merchandising mgr. of all kitchen appliances. Sales regions are increased from 5 to 6—and each regional sales rep will merchandise all products, rather than specialties, calling on fewer distributors.

Stromberg-Carlson div., General Dynamics Corp., will convert present administrative building in Rochester into a factory and will build new \$2,000,000 administrative & engineering building adjacent to it by spring of 1956. John Jay Hopkins, General Dynamics pres.-chairman, and his exec. staff visited Rochester plant July 28; he was interviewed on Stromberg's WHAM-TV by gen. mgr. William Fay, later spoke to management group of 325, predicting bright future for GD's electronics-communications div.

John T. Hickey promoted to gen. mgr. of Motorola transistor manufacturing facility, Phoenix, reporting to Daniel E. Noble, v.p. in charge of communications & electronics div.; Dr. Virgil E. Bottom promoted to director of research & development; Edmund G. Shower, ex-National Union Electric, named product production mgr.

Dr. George A. Morton and Dr. Ernest G. Linder, research scientists at RCA Princeton labs, are members of U. S. delegation to International Conference on Peaceful Uses of Atomic Energy to be held in Geneva, Aug. 8-20.

Buyers guide edition of *Electronics Magazine* is out, listing some 3000 companies manufacturing electronics and/or allied products, classified according to products (McGraw-Hill Publishing Co., \$3).

Save-A-Tube Co., 2116 Walnut St., Philadelphia, is marketing "Save-A-Tube" plug-in unit designed to extend life of receiving tubes by absorbing shock of initial current surge, retails for \$5.95.

Home tube tester called Fil-A-Test, is offered by Bava Co., 3655 E. Canfield St., Detroit, claimed useful for testing CR and regular vacuum tubes. Selling for \$4.95, it operates on flashlight batteries, tests only filament.

Leslie F. Muter, winner of RETMA's 1955 Medal of Honor for contribution to industry, named chairman of committee to pick 1956 winner.

Magnavox retains Robert S. Taplinger & Assoc. for public relations.

William T. Meenam, 68, retired GE supervisor of TV-radio news and broadcasting pioneer who helped set up the broadcasts from Admiral Byrd's 1930 Antarctic expedition, died in Schenectady July 27. His wife survives.

Financial & Trade Notes: Initial portfolio of investments of recently organized Electronics Investment Corp., mutual fund set up by ex-broadcaster Charles E. Salik, Bank of America Bldg., San Diego (Vol. 11:17), was disclosed this week. It's dated July 1, shows total stock & bond investments of \$8,552,635.88 out of \$10,000,000 fund raised by \$5 per share offering of 2,000,000 shares last April. Holdings are as follows (market values as of July 1): 2000 shares of ACF Industries, \$134,500; 6000 American Broadcasting-Paramount, \$174,000; 1000 Babcock & Wilcox, \$95,125; 3000 Bendix Aviation, \$158,250; 2500 Borg-Warner, \$108,750; 4000 Burroughs Corp., \$131,500; 5000 Cleveite, \$111,250; 4500 CBS "A," \$123,750; 6000 Consolidated Engineering, \$159,000; 1500 Corning Glass, \$106,875; 1500 Cutler-Hammer, \$115,500; 4000 Garrett Corp., \$146,000; 3500 Gary (Theodore) & Co., partic. common, \$187,250; 3000 General Dynamics, \$178,125; 3000 GE, \$160,875; 2500 General Railway Signal, \$121,562.50; 300 IBM, \$124,200; 4000 Magnavox, \$145,500; 3000 Minneapolis-Honeywell, \$190,500; 1000 Minnesota Mining & Mfg., \$111,250; 2500 National Cash Register, \$104,375; 3000 North American Aviation, \$174,750; 1500 Otis Elevator, \$103,875; 4000 Philco, \$167,500; 200 Philips Gloeilampenfabrieken, \$225,200; 3500 RCA, \$182,875; 7000 Raytheon, \$156,625; 8125 Sperry-Rand, \$230,546.88; 3000 Sprague Electric, \$177,000; 2000 Square "D," \$94,000; 3500 Sylvania, \$169,312.50; 10,000 Texas Instruments, \$136,250; 3000 Thompson Products, \$156,375; 4000 Western Union, \$101,500; 2000 Westinghouse, \$134,750; 2000 Worthington, \$111,000; 1500 Zenith, \$177,375; 3000 P. R. Mallory pfd., \$166,500. Bondholdings consist of \$2,999,064 worth of govts.

* * * *

Financial histories of 69 companies in TV-radio-electronics fields, dating from 1950 through first quarter 1955, is a major reference feature of the 1955 Fall-Winter edition of the semi-annual *TV Factbook* which goes Aug. 1 to all subscribers to the full services of *Television Digest*. Dept. was compiled & edited by Edgar N. Greenebaum Jr., Chicago financial consultant on electronics, and has been expanded from previous editions. Whereas the preceding edition contained 62 listings, the new one adds such companies as American Broadcasting-Paramount Theatres, General Dynamics Corp., General Precision Equipment Corp., Hycon Manufacturing Co., Paramount Pictures Corp., Radio Condenser Co., Storer Broadcasting Co. Shown are the exchanges on which traded, capitalization (debt, if any, and shares authorized), sales, pre-tax earnings, net earnings per share, dividends, total assets, price ranges for fiscal years thru 1954 & for first quarter 1955.

* * * *

RCA executives expressed confidence this week that they'll achieve 1955 volume of \$1 billion (it was \$940,950,220 last year) as announcement was made of record first half sales & earnings. Consolidated statement shows 6-mo. volume of \$488,510,000, up about 10% from previous record of \$444,369,000 in same period 1954, while net profit rose to \$22,061,000 (\$1.46 per share), up 14% from the \$19,268,000 (\$1.26) for same 1954 period. Sales during second quarter were \$232,205,000, net profit \$9,493,000 (62¢) vs. \$217,760,000 & \$9,202,000 (60¢).

Westinghouse sales in first 6 months of 1955 were \$755,963,000, earnings \$29,417,000 (\$1.73 per share on 16,413,231 shares) vs. \$811,709,000 & \$45,359,000 (\$2.75 on 16,117,026) in same 1954 period. Second quarter sales were \$388,258,000, profits \$16,635,000 (98¢) vs. \$405,172,000 & \$19,073,000 (\$1.15). Drop was said by Pres. Gwilym Price to be due to lower billings for apparatus & defense products plus expense of new production facilities, but he predicted 1955 sales will approach 1954 record of \$1,631,045,480, though with lower earnings.

Hoffman Electronics Corp. reports \$17,354,339 sales and \$419,179 profit after taxes (59¢ per share on 721,528 shares outstanding) for first 6 months of 1955 vs. \$22,916,497 & \$818,683 (\$1.13) for same 1954 period. In quarter ended March 31, net profit was \$309,996 (43¢) vs. \$470,238 (65¢). Sales for all 1954 were \$42,647,008, earnings \$1,485,513. Scheduling of military shipments and seasonal characteristics of TV sales, said pres. H. Leslie Hoffman, accounted for the first-half decline, but he anticipated that both sales and profits for full year will exceed 1954.

American Broadcasting-Paramount Theatres officers & directors who have recently exercised their options to acquire AB-PT stock at \$16.63 (currently around 32), as reported to SEC: Leonard H. Goldenson, bought 50,000 shares, holds 52,450 directly; Walter W. Gross, bought 12,500, now holds 12,600; John Balaban, bought 7500, his total holdings; Robert M. Weitman, bought 12,500, holds 12,533; Edward L. Hyman, bought 12,500, total holdings. Disclosed this week: Overseas Securities Co. has purchased 1000 shares of AB-PT.

Storer Broadcasting Co. net income for 6 months to June 30 was \$1,851,908 (75¢ a share) vs. 1,617,336 (65¢) in same 1954 period; for second quarter, it was \$1,039,919 (42¢) vs. \$814,100 (33¢). On July 1, 1955, company redeemed and cancelled all its 7% cumulative preferred stock at \$107 per share, or aggregate of \$1,605,000.

Standard Coil Products reports loss of \$88,892 on net sales of \$30,638,113 for 6 months ended June 30 vs. profits of \$1,358,996 (92¢ a share on 1,470,000 shares) on sales of \$38,542,948 in same 1954 period, and about twice that in 1953. In first 1955 quarter, profit was 8¢ a share against 28¢ for same 1954 quarter.

General Precision Equipment Corp. 6-mo. earnings were \$2,173,654, or \$1.95 per share on 1,022,882 shares, on sales of \$70,238,745, vs. \$2,541,652 (\$3.37 on 749,509 shares) & \$54,305,196 in same 1954 period. Second quarter earnings were \$1,211,668 (\$1.10) on \$35,985,184 sales vs. \$1,485,993 (\$1.86) & \$30,816,064.

Muter Co. earned \$148,948 on sales of \$6,253,815 in first 6 months, compared to \$130,879 on \$5,926,825 in first half of 1954. In semi-annual report, pres. Leslie F. Muter predicted 5-10% increase in components prices around Labor Day, observing that they're now about 15% below July 1954.

Cleveite Corp. net profit went up to \$2,672,957 (\$1.40 per share) for first half of 1955 vs. \$1,646,758 (84¢) for same 1954 period. Company announced plans to expand transistor production and to purchase Intermetall GmbH, Germany.

National Union Electric Co. (C. Russell Feldman, pres.) has purchased most of stock held by estate of late Paul V. McNutt in Cayzor Athabaska Mines Ltd., uranium development near Uranium City, Sask.

Philco Corp. profit-sharing plan, holder of more than 10% of firm's outstanding common stock, bought 3000 more shares recently, sold 198, increasing holdings to 525,659, according to SEC report.

* * * *

Dividends: Storer Bcstg. Co., 35¢ payable Sept. 14 to stockholders of record Sept. 1; Gross Telecasting, 30¢ Aug. 10 to holders July 29; Standard Coil Products, 25¢ Aug. 16 to holders Aug. 5; Indiana Steel Products, 25¢ Sept. 10 to holders Aug. 23; Baltimore Radio Show Inc. (WFBR), 10¢ Sept. 1 to holders Aug. 15; P. R. Mallory, 50¢ Sept. 10 to holders Aug. 15; Westinghouse, 50¢ Sept. 1 to holders Aug. 8; Stewart-Warner, 5% stock div. plus 45¢ Sept. 10 to holders Aug. 12; General Dynamics, 55¢ Sept. 10 to holders Aug. 18; Stanley Warner, 25¢ Aug. 25 to holders Aug. 8; Seeger Refrigerator, 65¢ Sept. 2 to holders Aug. 8.

Color Trends & Briefs: Summarizing NBC's fall-winter color plans (p. 2), exec. v.p. Robert Sarnoff added several features not previously announced. One is Davis Cup tennis finals Aug. 27, 2:30-5 p.m., and Aug. 28, 2-5 p.m. Another is Mozart's opera *The Magic Flute*, Sun. Jan. 15, 4-6 p.m. Sarnoff also confirmed that all World Series games originating from New York will be colorcast, as will 4 NCAA football games—Miami-Georgia Tech, Sept. 17; Notre Dame-Michigan State, Oct. 15; Iowa-Michigan, Oct. 29; Army-Navy, Nov. 26.

"Blockbuster" of the NBC schedule in terms of volume and of receiver demonstration by dealers, will be *Matinee*, 3-4 p.m. 5 days a week, live drama from Hollywood starting Oct. 3. Also highly "demonstrable" will be daily 5:30-6 p.m. *Howdy Doody*, going permanently into color Sept. 12.

Once-a-month spectaculars will be: *Color Spread*, Sun. 7:30-9 p.m., starting Sept. 11 with *The Skin of Our Teeth*, starring Helen Hayes & Mary Martin; *Max Liebman Presents*, Sun. 9-10:30 p.m. beginning Oct. 1 with *Heidi*; *Producers' Showcase*, Mon. 8-9:30 p.m. starting Aug 22; *Milton Berle Show*, Tue. 8-9 p.m., first Sept. 27. Approximately once a month, Maurice Evans will present *Hallmark Hall of Fame*, Sun. 4-5:30 p.m., frequently in color, starting with *Alice in Wonderland* Oct. 23.

Beyond the foregoing, Sarnoff stated, there will be a steady series of color inserts in *Today*, *Home & Tonight*. And the ambitious bi-weekly *Wide Wide World*, Sun. 4-5:30 p.m., now wholly sponsored or optioned by General Motors div., will include frequent color segments, starting Oct. 16.

CBS officials still report situation "fluid" as regards final color schedule—but average of some 3 hours weekly is expected, as against NBC's 9-10. Announced to date: monthly *Shower of Stars*, Thu. 8:30-9:30 p.m., starting date not set; *Ford Star Jubilee*, Sat. 9:30-11 p.m., beginning Sept. 24. Majority of *Omnibus*, Sun. 5-6:30 p.m., first Oct. 9, will be in color. And 6 big 90-min. film shows produced by Orson Welles will be colorcast.

* * * *

Local color originations: (1) KRON-TV, San Francisco, is one of most active, in July 22-30 week offering all live commercials in color during 1-3 p.m. daily *Golden*

Gate Playhouse, plus whole 3-3:30 p.m. daily *Exclusively Yours* in color, plus one-shot half-hour color film *Champions All*. (2) WTVT, Tampa, has been colorcasting 4:30-5 p.m. daily film show since April 1. (3) WABD, New York (DuMont) reports ad agencies jumping at its offer of free time to permit sponsors to experiment with color. Mgr. Ted Cott said that after technical improvements have been completed, substantial stepup in color schedule will be achieved, particularly in film. Presumably, new "Vitascan" equipment (Vol. 11:21) will permit live colorcasts. (4) WIS-TV, Columbia, S. C., has begun distributor-dealer promotion, called "Operation Rainbow," with goal of getting public color-conscious by time of station's color debut Sept. 11. (5) RCA shipped 3-V color film cameras this week to WCAU-TV, Philadelphia & upcoming KCRA-TV, Sacramento, due in Aug. (6) WBAP-TV, Ft. Worth, now originates 11 hours weekly.

Here's how RETMA's new pres. H. Leslie Hoffman sizes up the upcoming color receiver market, as expressed in July 27 letter to shareholders: "The company has maintained a research staff on color television and was the first to introduce the new 21-inch set the early part of the year. Since then a limited number have been produced and sold and have given very excellent performance in the field. It is anticipated that with the telecasting of the World Series, college football and the material increase in color programming, color will begin to be a factor in the market this fall, and your company is in a good position to capitalize on it without exposing itself to any sizable hazard."

First big color year will be 1957, according to *Billboard Magazine's* survey of networks, stations, agencies, sponsors, etc. Respondents were asked: "When do you expect there will be an adequate circulation of color TV sets to warrant your engaging in color programming?" Total of 107 named 1957, 59 picked 1958, 29 picked 1956. Asked whether "there has been an undue delay in the expansion of color TV circulation," 100 said "yes," 113 "no."

Network color schedules for next 2 weeks: NBC-TV—Aug. 1-5 & 8-12, *Matt Dennis*, Mon.-Wed.-Fri. and *Vaughn Monroe*, Tues.-Thu., 7:30-7:45 p.m.; Aug. 1-5, segments of *Home*, 11:45-noon.

Proposed "Commprovision" closed-circuit wired system for Douglas, Ariz. (Vol. 11:24) has been withdrawn, according to I. W. Brayer, who has taken over an uncompleted regular community system there. Brayer, who owns Whitey's Radio & TV Co. in Phoenix as well as Whitey's TV & Co., Douglas, said community system hadn't been completed because of engineer's opinion that satisfactory signal couldn't be received. He reports, however, that his group recently managed to bring in usable picture of KTVK, Phoenix, at Saddle Gap Mt., 263 mi. from station, send it down to Douglas via cable. He plans to add 2 more stations to system.

Sale of radio WKLO, along with CP for off-air WKLO-TV, Louisville, Ky. (Ch. 21) for \$350,000 to ex-Secy. of Commerce Charles Sawyer's Great Trails Bcstg. Corp. (Vol. 11:27) was approved last week. Selling group is headed by E. R. & Harold J. Plunkett, Emanuel Levi & Milton S. Trost. Great Trails operates radio WING, Dayton, has interests in Ohio radio stations WCOL, Columbus & WIZE, Springfield, also controls Ohio newspapers *Lancaster Eagle-Gazette* & weekly *Waverly Watchman*. Return of TV to air is planned when "operation may be resumed on another channel," WKLO-TV having asked for Ch. 7 in deintermixture petition (Vol. 11:23).

The WAAM fellowship at Johns Hopkins, awarded annually by the Baltimore station for graduate studies in TV and valued at \$4500-\$6000, has been awarded for 1955-56 to John J. Moffitt, WEWS, Cleveland.

Three microwave applications to serve community antenna systems granted by FCC recently: (1) Antenna Service Co. Inc., to bring Phoenix signals to proposed systems in Clifton, Morenci, Stargo & Plantside, Ariz. (2) Televue Networks, for relaying signals of KOOK-TV, Billings to system in Sheridan, Wyo. (3) Inland Empire Microwave Co., to transmit Spokane signals to systems in Pasco-Kennewick-Richland, Wash. area.

The \$469,000 sale of WHIM, Providence, to Headley-Reed's Frank W. Miller (Vol. 11:28), was approved by FCC this week. This clears way for Robert T. Engles & C. George Taylor (12½% of WHIM each) to acquire 13% of WPRO-TV (Ch. 12).

S. H. Patterson, owner of KSAN-TV, San Francisco (Ch. 32), himself a former preacher in Kansas, has leased United Paramount's 2150-seat State Theatre on Market St. for his Radio Prayer League and proposes to use it as an interdenominational evangelistic center.

CP for experimental booster in Hawaii, held by Iresco Inc., Santa Monica, Cal., was relinquished after grantee told FCC stations whose signals it was to rebroadcast have withdrawn permission.

AT&T network interconnections scheduled for Aug.: KRNT-TV, Des Moines, by Aug. 1; WHIS-TV, Bluefield, W. Va., Aug. 8; WXEX-TV, Petersburg, Va., Aug. 15.

Television Bureau of Advertising (TvB) lists 153 members with addition this week of Westinghouse's 4 stations.

The subscription TV picture: (1) Off-air WFMZ-TV, Allentown, Pa. (Ch. 67) informed FCC it's willing to serve as guinea pig for 3-year tests, said it neither favors nor opposes pay-TV. Under its plan, outlined in 89-p. document, subscription-TV proponents would foot bill for decoders, first 5000 to be installed by Dec. (2) Demonstrations of Zenith's pay method, for purpose of checking effects of co-channel and adjacent-channel interference, will be conducted in Chicago Aug. 18 for benefit of FCC engineers Hart Cowperthwait and Edward Chapin. (3) *Tide Magazine*, in July 30 issue, says poll of its "leadership panel" of agencies, sponsors and public relations men shows 70% believe toll TV should be given a try. (4) Two more Congressmen got on record on the subject, Rep. Lane (D-Mass.) saying there's room for free and fee TV, Rep. Radwan (R-N.Y.) rejecting the idea of "scrambled phony-vision." (5) General Teleradio chairman Thomas F. O'Neil says he's "neutral" on subject; WOR-TV has been used for tests, and his company owns 5000 out of pay-TV proponent Skiatron's 1,200,000 shares.

Defense Dept. suddenly dropped opposition to new 1610-ft. tower proposed by KSWs-TV, Roswell, N. M., after opposing it in Airspace Subcommittee and at FCC hearing as an air navigation hazard (Vol. 11:11, 21). Commenting on recent initial decision in favor of station (Vol. 11:27), Pentagon this week told Commission it still considers tower a menace, but that "operational requirements necessitate the immediate removal of the present KSWs-TV tower [and] this can be most expeditiously accomplished by consenting to the grant of the pending application." Defense Dept. said its action is based upon "purely practical—not legal—considerations."

British Broadcasting Corp.'s TV service, which derives its revenues from the £3 (\$8.40) tax on receivers, and from part of 50% manufacturers excise tax on sets now selling at rate of more than 1,000,000 a year, during last fiscal year paid its own way for first time, BBC reported this week. Postoffice Dept. reported it had issued more than 1,250,000 TV licenses during the last year to bring total to 4,500,000. It also reported loss of 2,500,000 radio licenses (now totaling 26,000,000), presumably to TV, in second 1955 quarter, while estimating "adult TV public" at same time rose from 9,000,000 to 12,700,000.

General Teleradio now owns 5 TV stations outright, with FCC's approval this week of its purchase of WEAT-TV (Ch. 12) & WEAT, W. Palm Beach for \$194,000 (Vol. 11:27). Its other wholly-owned stations are in N. Y., Los Angeles, Boston & Memphis; it's selling to CBS its 55% of WGTH-TV, Hartford (Ch. 18). WEAT-TV seller J. Robert Meachem remains as mgr. for 5 years at \$12,000 annually.

Permission to sell CP for WAGE-TV, Marquette, Mich. (Ch. 6) to local radio WDMJ, subsidiary of *Marquette Mining Journal*, for \$20,000, was granted this week (Vol. 11:28). New owner is Frank J. Russell, who also controls *Iron Mountain (Mich.) News* and radio WMIQ, Iron Mountain. Sellers are Jerome Sill (67%) and Herbert R. Herzberg (33%).

Georgia's ex-Gov. E. D. Rivers Sr. no longer holds any TV interests, having obtained FCC approval this week for \$90,000 sale of his 59% holdings in CP for WOBS-TV, Jacksonville (Ch. 30) & WOBS to 21% owner Jim Macri (Vol. 11:27). Previously, he disposed of CPs for WCTV, Thomasville, Ga. (Ch. 6) and WMIE-TV, Miami (Ch. 27).

J. Elroy McCaw's purchase of pre-freeze KFEL-TV, Denver (Ch. 2) for \$400,000, plus assumption of some \$350,000 in liabilities (Vol. 11:25, 28), was approved by FCC this week. McCaw also operates KTVW, Tacoma (Ch. 13), owns 25% of KONA, Honolulu (Ch. 11), has interest in 5 radio stations.

FARM TV SET counts in Idaho and Utah were tabulated this week by U. S. Census Bureau as part of its annual Census of Agriculture. Based on 20% sampling in Oct.-Nov. 1954, census shows TV set penetration of 43% in Utah, and nearly 30% in Idaho. Utah's relatively high penetration—despite fact that Salt Lake City's 3 stations are only ones picked up in state—is due to extremely heavy farm TV set ownership in the counties within range of Salt Lake. Idaho figures indicate sparser distribution of farm viewers, though 7 stations can be received in various parts of state—2 in Boise, one each in Twin Falls & Idaho Falls, 3 from Spokane, Wash.

We'll continue to give full county-by-county farm TV count for each state as soon as they are tabulated (other state counts appear in the last 3 issues of *Television Digest*). Here's count for Idaho & Utah:

IDAHO					
County	Total Farms	Farms with TV	County	Total Farms	Farms with TV

RCA attorney Samuel Ewing testified this week before a Senate subcommittee that Air Force Secy. Talbott had continued to seek a contract with RCA for management consultants Mulligan & Co., in which he was partner, even after RCA had expressed doubts about contract's legality and propriety. Letter from RCA Chairman Sarnoff saying Talbott had never attempted to use the influence of his office to induce him to do business with the Mulligan firm was introduced in the record. The letter was sent, said Sarnoff, "in fairness to Secy. Talbott and at his request." On last day of hearings, Talbott announced his resignation from Mulligan & Co. but denied planning to resign secretaryship.

Good reading: Question-&-answer interview with Clair R. McCollough, WGAL-TV, Lancaster, Pa., TV chairman of NARTB, on his observations of upcoming commercial TV system in Great Britain and of plans to convert from AM to FM there, as well as on broadcasting in France; in July 25 *Broadcasting-Telecasting*.

Cooperative newsfilm exchange among Canadian stations has been set up under leadership of Walter Blackburn, pres., CFPL-TV, London, Ont.

PUBLISHED WEEKLY BY RADIO NEWS BUREAU • WYATT BLDG. • WASHINGTON 5, D.C. • TELEPHONE STERLING 3-1755 • VOL. 11: No. 32

SUMMARY-INDEX OF THE WEEK'S NEWS—August 6, 1955

REVOLUTIONARY RADIO communication system put to work by military for ultra-reliable long-distance use. TV may use it to span oceans & continents (pp. 1 & 8).

HOTEL & MOTEL ROOMS increasingly important outlets for TVs, some 10-15% of them now equipped; how the business is handled (p. 2).

FEATURE FILM FEVER grips networks, eyeing success of "Million Dollar Movie." CBS & NBC may underwrite or produce movies for TV first, theatres later (p. 3).

INITIAL DECISION favors Piedmont for Charlotte's Ch. 9; Clarksburg case moot with sale of station & CP; Congress leaves protest rule unchanged (p. 4).

ALLOCATIONS PLANS studied at all levels—include off-record FCC-RETMA session, new low-power vhf drop-in plan, Jan. 17 start of Senate hearing (p. 5).

CANADA'S 28th TV goes on air in St. John's, Newfoundland. New stations due to start next week in Petersburg-Richmond, Va. and Lufkin, Tex. (p. 7).

AUTO INDUSTRY offers guidance for repeat TV sales: liberal trade-ins, restrictive franchises, greater use of accessories. Admiral ups prices (p. 9).

MERGERS ACCELERATE, with "diversifications" the aim as big companies enter electronics; Avca again denies it's selling Crasley stations (p. 12).

TRANSISTORS REPLACE TUBES in aviation gear, survey showing 33% of sockets in equipment now under development are designed for tube substitutes (p. 12).

RCA-NBC COLOR CAMPAIGN evokes varying reactions; Dr. Baker skeptical, another manufacturer calls it "first real step"; gaad discounts on sets (p. 13).

NETWORK TV BILLINGS nearly \$200,000,000 for 6 months, may approach \$500,000,000 for year; PIB report shows radio down about \$6,000,000 (p. 14).

FILM ACTORS STRIKE won't seriously affect fall programming unless it continues for lengthy period. Prospects for immediate settlement are slim (p. 14).

REVOLUTION IN THE ETHER—VHF-UHF 'SCATTER': The hottest thing in radio communications -- and you'll be hearing plenty about it in coming months -- goes under the name of "forward scatter transmission," now in practical use by the military to transmit vhf signals for distances up to 1000 mi. and uhf as far as 400 mi. or more, both without intermediate relay hops.

The truly sensational aspect of the new type of transmission is this: For the first time, long-distance point-to-point radio systems are being built which are designed not to fail at all -- with reliability so close to 100% as to make radio communication even more dependable than wire or cable!

Its practical uses today are entirely military -- but AT&T is now conducting uhf scatter experiments with TV signals -- and scientists envision the new method as the vehicle by which TV will some day span oceans and continents.

First public revelation that scientists had harnessed "scatter" principles for long-distance radio communication was made by Television Digest on April 26, 1952 (Vol. 8:17) when we reported exclusively that the National Bureau of Standards was receiving vhf signals 774 mi. from transmitting point -- and the signals were constantly receivable "irrespective of season, time of day or geomagnetic disturbance."

Progress has been tremendous in the 3 years since that announcement. For the last 18 months, Air Force has been operating high-reliability vhf radio link, carrying multi-channel teletype transmissions, from Limestone, Me. to Thule, Greenland, over series of relays whose longest hop is 1000 mi.

Scatter transmission is used to connect stations in Arctic continental defense radar "DEW line." Bell System has installed another multi-channel system for military use, with uhf relay hops as great as 225-250 mi. The new "Texas Tower" offshore radar stations will be linked to mainland by many-channel scatter hookup, designed with standby equipment for reliability of 99.9% or better.

TV signals are being beamed over the horizon by Bell Labs and AT&T for distances as great as 200 miles in experiments described at this year's IRE convention

(Vol. 11:13). AT&T is now operating experimental uhf TV relay from Florida to Cuba. It should be borne in mind that scatter is useful only in point-to-point communications, and that home viewers' receivers won't pick up such long-distance signals.

(For description of "scatter" principles, etc., see story on p. 8.)

HOTELS & MOTELS—A GROWING SET MARKET: With little fanfare, a few set manufacturers and a handful of special lessors have been diligently and successfully working a vein of receiver and other equipment sales & servicing that seems to have plenty of potential in it yet -- namely, hotel and motel installations.

Though statistics are extremely difficult to pin down, it's estimated that there are some 2,750,000 hotel-&-motel rooms in the nation, and that not more than 10-15% have been equipped with TV sets.

Accentuating role of TV in recent years is fact that struggle between hotels and motels has become extremely intense, each seizing upon every feature that promises to enhance its appeal to the traveler -- and TV is a valuable "weapon."

It's estimated hotels have 1,500,000 rooms, motels a surprising 1,250,000. Last Census Bureau figures, 1948, show 8664 hotels with 50 or more rooms. There were only 25,919 motels then, but there are believed to be 48-50,000 now, growing at rate of 3000 a year -- most new ones having 50 or more rooms.

Hotel-motel business is handled by 3 principal methods: (1) Outright purchases of sets and associated equipment direct from manufacturers, practiced mainly by the major hotels. (2) Leasing arrangements with special contractors, by large & small hotels. (3) Leasing or coinbox deal with local distributors & dealers, a method employed generally by motels.

Penetration of hotels is much smaller than motels, percentagewise. Arthur J. Moxham, pres. of Master Video System, a major lessor, estimates less than 5% of all hotel rooms are equipped. Milton Shapp, pres. of Jerrold Electronics, installers of master antenna systems, believes 300-400 hotels are wired up, while E.M. Lurie, pres. of contractor American Communications Corp., sets higher figure -- 500-600.

Motel installations are really burgeoning. According to D.J. Berne, mgr. of RCA's sound & community antenna equipment dept., virtually all new motels are building in master systems and supplying sets. It's estimated that 3000 new motels provide potential of 150,000 new set sales annually.

Interest of hotel managers is growing, nonetheless. One contractor says he made 2000 set installations last year, expects to hit 5000 this year. Potential isn't merely in old or small hotels. For example, James B. Morris, mgr. of Washington's new Congressional, near the Capitol, says apologetically: "We're up-to-date in all respects, with air-conditioning, etc., but we missed putting in TV, and we have to do so soon. We've been renting sets, but our modern steel construction makes rabbit ears ineffective."

* * * *

Majority of hotel installations are made on lease basis, hotel buying no sets but laying out flat sum per set -- by year or by day of room occupancy. Daily fee ranges 20-50¢, depending on size & construction of hotel, kind of set, etc.

One lease operator gives this breakdown of his costs on recent job, figuring on a 5-year basis: \$140 for a set, \$85 antenna & installation, \$125 servicing, \$50 carrying charges -- total \$400 (22¢ per day per set over the 5 years). Hotel paid \$450 (25¢ per day), giving operator net of \$10 per year per set. Jerrold's Shapp estimates cost of installing master systems at \$20-\$50 per room.

Some of major Statler hotels have bought own sets. W.R. Lever, chain's engineering v.p., says they write own specifications for sets, antennas & service, then get competitive bids. As result, Statlers bought DuMont for New York, Boston and Hartford, RCA for Los Angeles and Washington. Among big hotels on lease basis is New York's Waldorf-Astoria, working through Master Video Systems, which provides sets made by CBS-Columbia. (For list of major lessors, see p. 14).

Cost of TV is almost always included in hotel room charge. Some hotels raised rates when TV was added, others didn't. Few use coin-operated sets.

Older motels rely heavily on coin sets, on other hand. With somewhat less solid financing, they were generally unable or unwilling to undertake outright pur-

chase or fixed rental fees. They're usually served by local distributor or dealer who handles everything, gives motel 10-25% of gross. Newer motels, however, are getting away from coin sets -- becoming more and more like hotels. Master antenna for motels is often simple installation handled by local men, whereas hotel systems frequently pose major construction and engineering problems.

* * * *

Most common hotel set is 21-in., motels leaning toward 17-in. Consolettes are preferred, with consoles going into fancier suites. Color is still no factor, though new antenna systems are designed to handle it.

Some outfits offer TV-only, others TV-radio-wired music set or even a TV-dresser-desk such as Wells TV Inc. is promoting. Other modifications may include tamper-proof back and limited volume control -- and sets are usually sturdier, featuring cabinets that resist burns and stains.

Servicing is extremely important, of course, to keep the guests happy. Most hotel contracts call for full-time serviceman for spot repairs and regular checks. In Washington's Statler, for example, serviceman handles 850-set installation from 9-5, house electrician taking over after-hours, doing no repairs but substituting one of 20 spare sets for any that go on the blink.

'FEATURITIS' GRIPS THE TV NETWORKS: The networks are out after top feature films for showing during prime evening hours -- even if they have to make them themselves.

It was General Teleradio's "Million-Dollar Movie" series which convinced the networks that "movies are your best entertainment" -- even in Class A time -- if they're top-notch feature films. So successful werethe "Million-Dollar" features that Teleradio first tried to buy out RKO's feature backlog, ended up by buying the entire motion picture company (see p. 7 and Vol. 11:30-31).

NBC-TV was actually the first network to announce feature film spectaculars when it broke stories on its coming TV premieres of British-made Richard III and The Constant Husband before their American theatrical showings (Vol. 11:23,26). It also plans spectacular featuring star-studded British oldie, The Magic Box -- which, incidentally, traces the history of the motion picture industry.

Then came ABC-TV's entry into the spectacular field -- to begin next fall -- via Sun. 7:30-9 p.m. series of new-to-TV J. Arthur Rank feature films (Vol. 11:31).

But now something new has been added -- the do-it-yourself feature film. The networks' reasoning apparently runs this way: If we can't get first-run features, why not make our own, show them on TV first, and later try to recoup some of our investment by peddling them to theatres? No doubt they bear in mind the success of Walt Disney's Davy Crockett in theatres after 3 runs on ABC-TV's Disneyland.

CBS seems to have led the way in the make-your-own-movies field. By putting a 90-min. spectacular on film, there's still something left to show again on TV -- or in theatres. So the network has already announced 2 Bing Crosby features and 6 Orson Welles productions, all 90 min. for first showings as TV spectaculars -- with theatre plans understood to be in the works if it looks profitable.

Biggest deal of all is now in negotiating stage between CBS chairman Wm. S. Paley and independent film producer Louis deRochemont for 3 full-length features to cost \$500,000-\$1,000,000 each on TV-first-theatres-next basis.

Another network venture into theatrical film production was revealed in this week's disclosure of long-term contract between CBS & United Productions of America for series of half-hour cartoon shows (26 next year) which eventually could wind up in theatres as short subjects. In addition, CBS will finance one UPA-produced full-hour cartoon for theatres. Whether the network will hold "second-run" TV rights to this feature wasn't disclosed.

NBC will make feature films too, if negotiations with Hal Roach Jr. and team of Laurel & Hardy bear fruit. Reportedly the plan is to turn out three 90-minute color films, NBC underwriting most of cost, for showing first as TV spectaculars, later in theatres abroad -- and domestically too, no doubt, if there's demand.

All of which suggests this interesting question: With networks apparently aiming to go heavily into feature film production, when will the movie exhibitors start crying for networks to release their backlogs to the theatres?

Personal Notes: Louis G. Cowan, packager-producer (*\$64,000 Question, Down You Go, Quiz Kids, Stop the Music*), joins CBS-TV as fulltime producer in development of new programs; he retains his interest in Louis G. Cowan Inc., to be operated by new pres. Harry Fleischman & exec. v.p. Steve Carlin . . . Howard G. Barnes promoted to CBS v.p. in charge of network radio programs, succeeding Lester Gottlieb, now CBS-TV director of daytime programming . . . Ernest Lee Jahneke Jr., ABC v.p. & asst. to pres. Robt. F. Kintner, and Ned Hullinger, regional mgr., ABC station relations dept., return Aug. 15 from tour of affiliates in mountain states in connection with fall operations . . . Jack R. Poppele, assistant director of USIS (Voice of America) for TV-radio, left this week for 6-week tour of European offices . . . Wm. M. Davidson, asst. gen. mgr. of NBC's WNBK & WTAM, Cleveland, named asst. gen. mgr. of WRCA-TV & WRCA, N. Y. . . W. C. Swartley, Westinghouse Bestg. v.p. & gen. mgr. of its WBZ-TV, Boston, elected pres. of Rotary Club of Boston . . . James J. Kane, CBS trade publicity mgr., N. Y., shifts to Hollywood as director of press information, succeeding Ted Wick, now handling special press projects . . . Gilbert W. Kingsbury, Crosley public relations v.p., assumes added management policy duties for news & special broadcast services programming; James E. Allen named director of special projects, succeeded as publicity & promotion director by James Bruce, program mgr. of WLWT, Cincinnati . . . Gene Cuny promoted to commercial mgr., KRLD-TV, Dallas, succeeding Wm. A. Roberts, now mgr. of AM affiliate KRLD . . . George Diefenderfer Jr., ex-Raymer, Chicago, and son of the NBC Chicago radio sales chief, named sales mgr. of WISH-TV & WISH, Indianapolis, succeeding Robt. F. Ohleyer . . . Wm. Geary promoted to station mgr. of WMGT, Adams-Pittsfield, Mass., succeeded as commercial mgr. by Allan L. Bonney, ex-WPMT, Portland, Me. . . . Roger Van Duzer, ex-KBET-TV, Sacramento, named station mgr. of KTVK, Phoenix, succeeding Ralph Watkins . . . Harry Stone, onetime mgr. of WSM, Nashville, recently with Texas & Arizona TV stations, named TV director of WSIX-TV . . . Wm. Grayson promoted to program mgr., WRC-TV & WRC, Washington, reporting to James E. Kovach, director of programs . . . James W. Frost, ex-sales development mgr., CBS Pacific network, named secy.-mgr. of Oregon State Bestrs. Assn., will also teach radio journalism at Oregon U . . . Richard A. Jackson promoted to public relations director, WOR-TV & WOR, N. Y. . . . Jack Gregory named Ziv western div. sales mgr., Allen Martini succeeding him as spot sales mgr. . . . Alfred Butterfield, ex-CBS-TV and *Life*, joins with Thomas W. Wolf, ex-Pathe and *Time*, to form Butterfield & Wolf Inc., packagers . . . Harold M. Tulchin, ex-Sterling TV Co., appointed commercial TV director & film dept. mgr., Hutchins Adv. . . . Gordon White, asst. business mgr., promoted to business mgr., TV-radio dept., Kenyon & Eckhardt . . . Sylvan Taplinger, TV-radio director of Peck Adv., recovering from emergency appendectomy.

Earl H. Gammons, who retires as CBS Washington v.p. Sept. 1, being succeeded by ex-NARTB govt. relations v.p. Ralph W. Hardy, is retaining offices at 1735 DeSales St. NW, and will continue to represent CBS in an advisory capacity, along with Storer Broadcasting Co. and ex-broadcaster John A. Kennedy, who recently acquired *Siox Falls* (S. D.) *Argus*.

Aurele Seguine, 51, Canadian Broadcasting Corp., executive, a widower and father of 3 sons, became a Dominican monk Aug. 3—recalling that NBC's pre-war Central European correspondent, Max Jordan, quit that company about 5 years ago to become priest in Germany.

ONE INITIAL DECISION, proposing Ch. 9 grant to Piedmont Electronics & Fixture Corp., Charlotte, featured week at FCC which was relatively quiet because of commissioners' vacations. One CP was dropped—WTVM, Muskegon (Ch. 35).

Examiner H. Gifford Irion picked Piedmont over WSOC and Carolinas' TV Corp. WSOC was turned down primarily because of financial weakness, and Piedmont was found to have enlisted Charlotte stockholders who "have materially contributed to fashioning that applicant's proposals," as opposed to less such activity on part of Carolinas' Charlotte stockholders. Piedmont's Charlotte stockholders are headed by theatreman Hershell H. Everett; 40% is owned by Wolfson-Meyer theatre interests, owners of WTVJ, Miami. Carolinas' is also composed of 2 groups—Charlotte interests headed by dept. store owner George M. Ivey and Broadcasting Co. of the South, latter operating radio WIST, Charlotte and WIS-TV & WIS, Columbia (G. Richard Shafto).

* * * *

Celebrated Clarksburg, W.Va. case, in which Commission took such a lambasting from Appeals Court (Vol. 11:25), was rendered largely moot this week when stock of Ohio Valley Bestg. Corp. was purchased for some \$250,000 by owners of WSTV-TV & WSTV, Steubenville (Berkman-Laux interests). Purchase includes CP for WBLK-TV, Clarksburg (Ch. 12) & WBLK and radio WPAR, Parkersburg. It's presumed sale removes situation that invoked court's criticism—overlap with Wheeling's WTRF-TV, concentration of media ownership, etc. It also eliminates need for weighing role of Clarksburg community antenna system in Wheeling-Clarksburg overlap question. At direction of court, FCC had scheduled hearing on matter Sept. 15. Case was initiated by protest of WBLK-TV grant by *Clarksburg Exponent & Telegram*.

Meanwhile, Commission will have to live with protest section of Communications Act for at least 5 months more, Senate failing to act on House-approved modifications which had been requested by FCC.

There were 2 requests for allocations changes: (1) WNOW-TV, York, Pa. (Ch. 49) asked that its channel be swapped with Lancaster's Ch. 21. (2) WNAO-TV, Raleigh (Ch. 28) submitted an alternate method of deintermixing—shifting Ch. 5 to Rocky Mount, adding a uhf channel to Raleigh for educational use, making Ch. 22 commercial.

New low-power rules, permitting stations as small as 100 watts, became effective Aug. 1 but no applications were filed this week. E. B. Craney, operator of KXLF-TV, Butte, Mont. (Ch. 6) announced he plans to file for satellites in Helena, Bozeman & Anaconda, but otherwise there are few such applications in the mill (Vol. 11:29).

Pentagon's tall-tower ban was overruled again this week in second initial decision by FCC examiner Hugh B. Hutchinson, who recommended that KGEO-TV, Enid, Okla. be permitted to move to 1356-ft. tower at new site despite opposition by 3 military members of Airspace Subcommittee (Vol. 11:11). Cunningham said evidence shows existing 816-ft. tower at present location presents greater air hazard than proposed higher one at new site. In a second issue, he found no evidence of an attempt to "straddle 2 communities" by moving tower closer to Oklahoma City. First case in which Hutchinson turned thumbs down on military opposition to high tower—that of KSWs-TV, Roswell, N. M. (Vol. 11:27,31)—is awaiting ratification by Commission, Pentagon having dropped its opposition.

VERY OFF-THE-RECORD meeting of FCC and top RETMA engineering officials, called by FCC Chairman McConnaughey July 21, day before he left for Europe, is only one of the many vhf-uhf allocations explorations going on—by FCC, by Senate Commerce Committee's ad hoc group of engineers, by private parties.

FCC-RETMA meeting is described as "extremely informal, exploratory," and it's understood that among ideas RETMA was asked to ponder was concept of eventually moving all TV to uhf. Sitting in for FCC with McConnaughey were Comrs. Webster, Bartley & Mack, chief engineer Edward Allen, technical research chief Wm. Boese. Representing RETMA were engineering director Dr. W. R. G. Baker, GE; Donald G. Fink, Philco research co-director (also secy. of Senate ad hoc committee); James Secrest, RETMA exec. v.p.

Another effort to produce vhf "drop-ins", via the reduced-mileage and low-power route, was made this week. Law firm of Welch, Mott & Morgan and consulting engineer John Mullaney submitted to FCC a "Supplemental VHF Allocation Report."

Essence of report is similar to proposals submitted previously by uhf grantees & applicants in Canton, O.; Bridgeport, Conn. & Asbury Park, N. J. and by UHF Industry Committee: (1) FCC rules provide for certain minimum co-channel spacings—170-mi. in Zone I, 190-mi. Zone II, 220-mi. Zone III. (2) Specific allocations are actually spaced much greater than those minima—about 250-mi. in Zone I, for example. (3) Therefore, why not put in new low-power stations with less than present spacings—provided they cause no more interference to existing stations than would full-power stations at 170, 190 or 220-mi.?

Mullaney notes that proposal follows ex-Comr. Robert Jones' thinking at time he dissented from final allocation plan in 1952—the "full triangular lattice" theory. Mullaney says Jones' predictions were "absolutely right."

Negotiating to buy WFBG-TV, Altoona (Ch. 10), and radio WFBG, Triangle Publications Inc. (WFIL-TV & WFIL, Philadelphia, *Philadelphia Inquirer* and *TV Guide*) is aiming at ownership of maximum number of TV stations. "It's far from a closed deal," says WFBG-TV v.p. W. Stanley Truby, indicating some negotiations have been held with other interests and that an impending tax ruling from Internal Revenue Bureau may be the deciding factor on whether station is sold. He didn't disclose proposed price. Already this year, Triangle has bought WNBF-TV, Binghamton (Ch. 12) with radio WNBF for \$3,000,000 (Vol. 11:11, 19), and off-air WLBR-TV, Lebanon, Pa. (Ch. 15) for \$115,000 plus \$125,000 in equipment obligations (Vol. 11:27). Triangle intends to put latter back on air after FCC approves purchase.

T. B. Lanford buys W. H. Allen's 52% of KALB-TV, Alexandria, La. (Ch. 5) & KALB, bringing his holdings to 97.2%. Allen gets \$150,000 clear, Lanford paying taxes incurred by sale; Allen is also retained as adviser at \$1000 monthly for 30 months. Lanford owns 1/3 of KPLC-TV & KPLC, Lake Charles, La.; 13.8% of WJTV, Jackson, Miss.; controls radio KRRV, Sherman, Tex. & KRMD, Shreveport, La.; has 23% of WSLI, Jackson, Miss. KALB-TV & KALB balance sheet for June 30 shows surplus of \$114,112 as of Jan. 1, \$29,246 profit up to June 30.

FCC members will have to wait until next session of Congress for that pay raise (Vol. 11:31). Various bills boosting salaries of top govt. officials were bypassed in rush to adjourn.

Important aspect of plan is assertion that it can be put into effect immediately, doesn't require rule-making. It's proposed that applicants simply apply wherever they choose—provided they tailor powers and heights to protect existing stations as much as they would be if full-power, full-height station were built 170, 190 or 220-mi. away. In brief, AM protected-contour principles would apply.

It's claimed that more than 200 additional vhf's could be dropped in this way, providing, among other things, a vhf channel for every uhf station that wants one. Uhf would be forgotten. Proponents say Comr. Lee is interested in plan; that Lee's engineering asst. Wm. Campbell has given them considerable help; that Congressional "sympathy" has been shown.

It's proposed that powers as low as 100 watts be permitted as close as 85.5-mi. from co-channel stations, though average Zone I Ch. 2-6 station would probably be about 125-mi. away. Typical adjacent-channel separation would be 31-33.5-mi. Also proposed is use of directional antennas, with suppressions up to 20 db. Mullaney says less than 30% of all new stations would need DA's.

* * * *

Senate Commerce Committee chairman Magnuson (D-Wash.), meanwhile, again needled FCC about action on deintermixture, stating: "The Commission has a real and moral responsibility to inform the public as quickly as possible as to what it expects to do on the question of selective deintermixture. Every day the Commission delays such a pronouncement, large sums of money continue to be invested by the public in converting or purchasing sets so that uhf signals may be received. Yet, if the experience of the past 2 years is any guide, many of these people may be making a futile expenditure." Clearly, the Senator likes deintermixture.

Magnuson also set specific date for start of hearings on his all-embracing study of TV—Jan. 17. With resignation of Sidney Davis (Vol. 11:31), Committee is looking for another counsel; ex-Sen. Clarence Dill, now a committee consultant, won't take the job.

FCC's equal-time rules on political broadcasts don't apply to foreign stations, Commission told Detroit lawyer Gregory M. Pillon who says he plans to be Congressional candidate next year. Pillon noted that UAW had shifted its *Meet the UAW-CIO* program from WJBK-TV to CKLW-TV, Windsor, Ont., and asked whether he'll be entitled to equal time if an opponent appears on the program. FCC said it has no jurisdiction and no international agreement covers the situation.

Radio station sale: WTRX, Bellaire, O. (1270-ke 1-kw, daytime) with WTRX-FM sold this week by Washington, D. C. businessman John Kluge, who also owns several other AMs, for \$85,500 to public relations counsel Robert K. Richards (former NARTB admin. v.p.) and Walter Patterson, both of Washington, owners of 2 W. Va. AMs. Sale was handled by Blackburn-Hamilton.

Kansas City Star was fined \$5000 and its advertising director, Emil A. Sees, was fined \$2500 this week for monopolizing and attempting to monopolize advertising & news in violation of Sherman anti-trust act. They were convicted of criminal charge Feb. 22 (Vol. 11:9), but companion civil anti-trust suit still pends. Pres. Roy A. Roberts stated appeal would be filed.

John Battison, the consulting engineer and onetime gen. mgr. of CHCT-TV, Calgary, has purchased KAVE, Carlsbad, N. M. (1240 ke, 250 watts, ABC), which holds CP for Ch. 6, and expects to move there from Washington this fall. Sellers are group headed by Val. Lawrence, gen. mgr. of KROD-TV, El Paso; purchase price was \$150,000.

Station Accounts: Spot TV pulling power will be subjected to 2 separate tests in coming weeks. Stations represented by CBS-TV Spot Sales are offering to advertisers a "Spot-Check Plan" in which a series of "before-&-after" interviews are conducted by independent research organization in large panel of test market homes to determine effectiveness of TV spots. First advertiser to use service is duPont, which on Aug. 29 starts 13-week campaigns on Jacksonville's WMBR-TV, Charlotte's WBTV, Galveston's KGUL-TV. Also, WRCA-TV will team up with Macy's and the Abraham & Straus dept. store "to test the selling muscles of TV" in 10-week spot campaign starting Aug. 15. Their schedules will cover 10 & 20-sec. station breaks & one-min. spots; station has assigned task force headed by Max E. Buck, director of adv., promotion & merchandising, to advise stores on getting maximum use out of TV, and stores will make public sales results of campaign as guide to other dept. stores contemplating use of TV. (For story of Revlon's big sales boost resulting from \$64,000 *Question* on CBS-TV, see adjoining column) . . . Top 25 spot advertisers in second 1955 quarter, with number of spot schedules and stations they used, as reported in July 25 *Rorabaugh Report on Spot TV Advertising*: Procter & Gamble, 32 schedules & 955 stations; Brown & Williamson, 5 & 422; General Foods, 24 & 334; Colgate-Palmolive, 18 & 277; Sterling Drug, 11 & 276; Block Drug, 17 & 234; Standard Brands, 7 & 216; U. S. Rubber, 19 & 201; National Biscuit, 14 & 187; Alka-Seltzer, 5 & 181; Bulova Watch, 1 & 180; Carter Products, 17 & 165; American Chicle, 9 & 163; Toni, 8 & 162; General Motors, 13 & 148; Purex Corp. Ltd., 7 & 142; Ford Motor, 6 & 141; Kellogg Co., 10 & 120; Chesebrough Mfg. Co., 2 & 116; M&M Candy, 1 & 116; S. C. Johnson & Son, 5 & 109; Nehi Corp., 6 & 105; Coca-Cola, 1 & 102; Welch Grape Juice, 8 & 102; General Mills, 16 & 101. New to the second-quarter list were U. S. Rubber, American Chicle, Purex, M&M, S. C. Johnson, Nehi, Coca-Cola, Welch . . . Falstaff Beer, in deal described as biggest local live purchase on West Coast, buys *San Francisco Tonight* variety show on KGO-TV for 52 weeks, Mon.-thru-Fri. 10:30-11 p.m., thru Dancer-Fitzgerald-Sample . . . Listerine to sponsor Instructo Corp.'s new Les Paul & Mary Ford show on 150 stations starting about Oct. 1, thru Lambert & Feasley, N. Y.; it will be filmed by DuMont's Electronicam . . . Ziv's upcoming 30-min. *Highway Patrol* has been bought in 75 markets, with 30-market purchase this week by Ballantine Beer, which also sponsors Ziv's *Eddie Cantor Comedy Theatre* in 28 markets; other regional sponsors of *Highway Patrol* are Kroger Stores, Pfeiffer Brewing, Carnation Milk . . . Among advertisers currently reported using or preparing to use TV station time: Colonial Stores Inc., Norfolk (Our Pride bread), thru Liller, Neal & Battle Adv., Atlanta; Jacobsen Mfg. Co., Racine, Wis. (power mowers), thru Klau-Von Pietersom-Dunlop, Milwaukee; Gaines Dog Food, N. Y., thru Benton & Bowles; Purex Corp. Ltd., South Gate, Cal. (clothing bleach), thru McCann-Erickson, Los Angeles; Church & Dwight Inc., N. Y. (Sal baking soda), thru Brooke, Smith, French & Dorrance, N. Y.; Power Products Inc., Grafton, Wis. (Super Jet paint sprayer), thru Seitz Assoc., Milwaukee; Charles Pfizer Co. Inc., Brooklyn (drugs), thru Wm. Douglas McAdams, N. Y.; Fisher Flour Mills, Seattle, thru Pacific National Adv., Seattle; Rosita Products Inc., Phoenix (Rosarita Mexican food), thru Curry Adv., Phoenix; Lay's Potato Chips, Atlanta, thru Liller, Neal & Battle, Atlanta; Coast Fisheries div., Quaker Oats Co. (Puss 'n Boots Cat Food), thru Lynn Baker Inc., N. Y.; Olin Mathieson Chemical Corp. (Winchester men's toiletries), thru Cunningham & Walsh, N. Y.; American Hardware Mutual Insurance Co., Minneapolis, thru Campbell-Mithun Inc., Minneapolis.

Network Accounts: Revlon's sales of cosmetics have increased as much as 500% on some items since it started sponsorship of highly-popular \$64,000 *Question* on CBS-TV 8 weeks ago, according to Norman B. Norman, exec. v.p. of Norman, Craig & Kummel, Revlon agency. He said Revlon's Pink Shade Lipstick "sold out in 10 days after start of the show," and company recently received largest number of orders in its history for a single day. Show has been particularly beneficial in smaller markets, he said. Show skyrocketed to No. 1 position in ARB ratings for July; Nielsen placed it No. 3 in TV homes reached, No. 4 in percent of homes reached for 2 weeks ended July 9 . . . Alcoa drops option on Tue. 10:30-11 p.m. time period on CBS-TV (where it sponsored Ed Murrow's *See It Now*); it will sponsor unusual "vertical saturation plan" on NBC-TV for one day only, Dec. 6, in which it will buy into 8 shows on behalf of "Christmas Creations of Aluminum"—2 partic. each on *Today, Home & Tonight; Matinee, Ding Dong School, Tennessee Ernie Ford Show, Feather Your Nest & World of Mr. Sweeney*, thru Fuller & Smith & Ross . . . GE Lamp Div. to be alt. sponsor (with Dow Chemical) of *Medic* on NBC-TV starting Sept. 5, Mon. 9-9:30 p.m., thru BBDO, Cleveland . . . Pond's to be alt. sponsor (with Campbell Soups) of new dramatic anthology series, *Star Stage*, on NBC-TV starting Sept. 30, Fri. 9:30-10 p.m., thru J. Walter Thompson . . . Chunky Chocolate Crop. to be alt. sponsor (with Kellogg's) of *Super Circus* on ABC-TV starting Sept. 25, Sun. 5-6 p.m., thru Hilton & Riggio . . . Toni & Viceroy to be alt. sponsors of Louella Parsons film show on NBC-TV starting Oct. 2, Sun. 10:30-11 p.m. . . . Carter Products & Geritol to be alt. sponsors of *Joe and Mabel* on CBS-TV starting Sept. 20, Tue. 9-9:30 p.m., thru Sullivan, Stauffer, Colwell & Bayles and Edward Kletter Assoc. . . . Kraft Foods buys 7 partic. in *Color Spread* on NBC-TV this fall, Sun. 7:30-9 p.m., thru J. Walter Thompson; Corning Glass takes option on 6 partic. . . . Whitehall Pharmacal buys alt. sponsorship of *Wanted* this fall on CBS-TV, Thu. 8-8:30 p.m. . . . Vick Chemical Co. (Sofskin cream) buys 13 partic. on NBC-TV's *Home* starting Sept. 19, Mon.-thru-Fri. 11-noon, thru BBDO . . . CBS-TV to shift reruns of *I Love Lucy* (under Lehn & Fink sponsorship) to Sun. 6 or 6:30 p.m. this fall . . . Charles Antell (liquid makeup) to sponsor *Hollywood Backstage* on ABC-TV starting Aug. 7, Sun. 7:30-8 p.m., thru Product Services Inc., N. Y.

Signs of the TV times: Rev. S. H. Patterson, owner-founder of San Francisco's uhf KSAN-TV (Ch. 32, base rate \$225) tells *Variety* interviewer his station was \$5000 in the black in July, earned profit also in May & June; it specializes in sports, programs 5 hours daily for Negro audience . . . KEY-T, Santa Barbara, Cal. (Ch. 3) reports first-half sales up 35%, pres. Colin Selph stating local sales (within 100-mi. radius) will be up 50% this fall.

New network affiliations: WKNB-TV, New Britain-Hartford (sale pending to NBC; Vol. 11:2, 26) switches from CBS to NBC Oct. 1, replacing WNHC-TV, New Haven-Hartford, which retains ABC. Other area outlet, WGTH-TV, is being sold to CBS (Vol. 11:28).

New rep: WBNF-TV, Binghamton, N. Y. to Blair (from Bolling); WKBT, La Crosse, Wis. to H-R Television (from Raymer); KARD-TV, Wichita (CP), to Petry.

Assn. of National Advertisers next annual meeting has been scheduled for Oct. 31 & Nov. 1-2 in New York's Hotel Plaza; Bristol-Myers adv. v.p. Donald S. Frost is program chairman.

William A. Hart, retired duPont adv. director, named pres. of Advertising Research Foundation, succeeding Edgar Kobak Nov. 1.

Telecasting Notes: Intense network competition this fall will be accompanied by intense promotion. For example, CBS-TV is setting up first station co-op deal—paying for 50% of newspaper space and supplying art; it will be 10-day campaign late Oct. or early Nov., plugging entire program line-up. NBC-TV is planning sponsor co-op series in its 5 owned-&-managed cities, may extend it to 10-15 other Trendex areas; plan is already complete for 5 sponsors of *Perry Como Show*. ABC-TV will have own newspaper program in key markets . . . Abel Green-Joe Laurie Jr. best seller, *Show Biz*, published in 1951, tracing history of show business from vaudeville to video, will be adapted for Sun. Oct. 9 NBC color spectacular, 7:30-9 p.m., in spot originally scheduled for Alexander Korda first-U. S.-run film, *The Constant Husband*, which has been moved up to Nov. 6 . . . "New stars, shows zoom to top in 3rd TV film poll" headlines Aug. 6 *Billboard*, which also includes fact-packed "Spotlight on Fall TV Program & Time Buying" section. Over-all winners of *Billboard's* 3rd annual TV film program and talent awards: *Disneyland* (ABC), selected as best TV film series, best new TV film series, and TV film series contributing most toward raising cultural standards; Jack Webb of *Dragnet* (NBC), best actor; Loretta Young (NBC), best actress; Bob Cummings of *Bob Cummings Show* (NBC), best performer in new series; *Medic* (NBC), series performing greatest public service. Runners-up in "best series" category: *Medic*, *I Love Lucy* (CBS), *I Led 3 Lives* (Ziv) . . . Free plugs for movies in upcoming TV shows (Vol. 11:26) get the full treatment in Aug. 8 *Sponsor*, which figured out that non-TV movies will get total of 70,000,000 "commercial home impressions" each week this fall—40,000,000 of these on regular shows such as *Disneyland* & *Warner Bros. Presents*, 30,000,000 through tieups with existing programs such as special "salutes" and hour-long "previews." Presenting both sides of question, *Sponsor* says some ad executives feel

public enjoys the trailers and Hollywood news, others are wondering whether trailers will be kept in the realm of entertainment and out of category of straight commercials . . . **Mathematicians at ABC-TV**, according to Aug. 10 *Variety*, figure profit of \$1,500,000 in first year of Sun. evening network showings of 20 new-to-TV J. Arthur Rank features (Vol. 11:31)—if all sponsorships are sold . . . **MCA-TV's Frank Mincolla**, through his new merchandising-licensing dept., exploiting toy *Dragnet* guns & badges, Jack Webb kiddie clothes; *This Is Your Life* and *Truth or Consequences* parlor games; toy tugboat replica of the one in *Waterfront* . . . **Barbers talk a lot**—so live-wire Tom Bostic, gen. mgr. of KIMA-TV, Yakima, Wash., got idea of inviting 30 of them who had Mon. off to come by chartered bus for tour of station; they even got 15 min. on air to talk about their profession and demonstrate haircutting (on continuity chief Joe Ryan) with plenty of publicity and goodwill resulting . . . **WMCT cameras** were ordered out of Memphis city hall hearing on corruption in municipal parks this week, leading gen. mgr. Hank Slavick to charge mayor and attorneys with imposing restrictions on freedom of the press; radio was permitted to stay . . . **Betty Hutton** signed by NBC-TV for color spectacular on Oct. 4; Ethel Merman & NBC still negotiating . . . **Mrs. Dione Lucas**, the cookery expert, signed for 6 half-hour films to be shown on new British commercial TV . . . **Another TV play for stage:** *My Kewpie Doll*, by Greer Johnson, seen on ABC-TV July 21, which Eva Marie Saint and director-husband Jeffrey Hayden plan to produce . . . **Hit show, Children's Corner**, from KQED, Pittsburgh educational, gets NBC-TV airing for 4 Sats., 10:30-11 a.m., Aug. 20-Sept. 10.

— ■ —
 NBC Spot Sales becomes U. S. rep for Associated Broadcasting Co. Ltd., British ITA commercial program contractor, under arrangements this week by Harry A. Towers & Richard L. Meyer with v.p. Tom McFadden.

ONLY NEW STARTER this week was Canada's 28th—CJON-TV, St. John's, Newfoundland (Ch. 6) which put on first test patterns Aug. 3, goes commercial Sept. 4. It has 2-kw RCA transmitter with 12-slot Wavestack antenna. Geoffrey Stirling is pres.-gen. mgr.; Don Jamieson, v.p.-program mgr.; Art Hartnett, production director; Oscar Hierlihy, chief engineer. It starts with \$160 base hourly rate, going to \$200 Oct. 1. Reps are Weed & All-Canada.

Due to start momentarily, probably during week of Aug. 7, are WXEX-TV, Petersburg-Richmond, Va. (Ch. 8), due to become NBC basic, and KTRE-TV, Lufkin, Tex. (Ch. 9), to operate as satellite of KPRC-TV, Houston.

No equipment shipments were reported this week, and in our continuing survey of upcoming stations the only report received was from KARD-TV, Wichita, Kan. (Ch. 3). Its v.p.-gen. mgr. Wm. J. Moyer states it now plans commercial debut Sept. 1 as an independent outlet, with test patterns probably by Aug. 25. Transmitter house is half completed and work is under way on 1000-ft. Stainless tower. RCA 25-kw transmitter is due Aug. 10, with 6-bay antenna due to be installed Aug. 15. It will be area's 4th outlet, others being a uhf and 2 vhf. Base hour will be \$350, rep Petry (shifting from uhf KEDD).

— ■ —
Hazards of the business: Toots Shor, the restaurant man, sues Stork Club's Sherman Billingsley for \$1,100,000, alleging latter libeled him on his ABC-TV *Stork Club* program by saying he was "financially insolvent" and "reckless or dishonest in his business dealings"—and AB-PT as well as producer Mayfair Productions Inc. are named co-defendants.

Reorganization of RKO Radio Pictures under General Teleradio (Vol. 11:30-31) was well under way this week, with the appointment of CBS Inc. senior v.p. Daniel T. O'Shea as pres. of RKO, succeeding James R. Grainger. Highly regarded in film industry, O'Shea was pres. of David O. Selznick's Vanguard Films Inc. & exec. v.p. of Selznick International Pictures Inc. before joining CBS in 1950. Another former CBS v.p., Charles Glett, heads RKO production organization. Also announced this week was elevation of C. R. (Bob) Manby to General Teleradio v.p., headquartering in New York and serving as liaison between RKO and parent company. Manby has been responsible for development and expansion for Phillips H. Lord properties acquired by Teleradio—notably the *Gangbusters* syndicated TV film and the theatrical motion picture by same name. Latter has been released to theatres in a few cities under novel arrangement whereby, in exchange for on-the-air promotion, one TV station in area gets cut of the theatre's gross.

TV breaks bank at Monte Carlo: One of biggest financial scandals in history of small principality of Monaco has been precipitated by failure of commercial TV station at Monte Carlo. It resulted in a run on Monaco's biggest bank, which closed its doors Aug. 1 with deficit estimated at \$8,625,000, and resignation of 4 of Prince Rainier III's cabinet members. Both the bank and the govt. officials were involved in the TV operation.

Houston area's 3 commercial stations—KGUL-TV, KPRC-TV, KTRK-TV—have agreed to contribute \$10,000 each toward support of U of Houston's educational KUHT (Ch. 8) during upcoming academic year.

NEW "SCATTER" method of point-to-point communication (see p. 1) uses new techniques and equipment to harness a phenomenon which has long been familiar to propagation experts—but which was considered an impediment to efficient radio communications. As long ago as 1913, A. E. Kennelly of Harvard ("Kennelly-Heaviside Layer"), writing in *Proceedings of the IRE*, noted the loss of radio signals in the upper and lower levels of atmosphere through "scatter."

Recent development of high-powered transmitters, high-gain antennas, sensitive receivers—and application of new knowledge, including information theory—has made it possible to utilize this "loss" to develop a radically new system of long-distance point-to-point communication, in which the signal is always unfailingly present so long as the equipment is working.

A visual analogy to scatter transmission principle is the glow which can be observed at night in the clouds from the lights of a distant city over the horizon. While vhf and uhf have been considered "line of sight" services, their "glow" can be picked up far beyond the horizon.

Because the "glow" is so faint, brute force techniques must be used. A thin, tremendously powerful beam is transmitted, but most of it shoots through the atmosphere and is wasted. Using newly developed techniques, high-gain antennas are focused upon the small percentage of the signal which is "scattered." This faint signal is fed into ultra-sensitive receivers and amplified.

Two types of "scatter" have been harnessed. The vhf system employs signals scattered in the E layer of the ionosphere (40-70 mi. up), and is currently used as a super-long-range system, with medium channel-carrying capacity, bandwidths up to 20 kc now being used.

Uhf system picks up signals which scatter in the troposphere or lower atmosphere (up to about 5 mi.); its principal advantage is that wide bands of frequencies can be transmitted—up to and greater than TV channel width—though systems now in use are limited to ½ mc.

Vhf systems are currently attaining distance of 600-1300 mi. in one hop, using frequencies of 30-50 mc (TV broadcast band starts at 54 mc). Uhf systems are useful for 50-400 mi., currently are in 300-1000 mc range, though it's believed frequencies up to 3000 mc could be used.

Powers used by the systems are tremendous. Vhf systems have used transmitters rated at 50-kw, antennas with 23 db gain, ERP up to 10 megawatts—most powerful ever attained in radio communications. Uhf systems use transmitters with power as high as 20-kw fed through antennas with 45 db gain, for ERP of 6 megawatts.

Ultra-reliability of the signal in scatter transmission has created demand for equipment with reliability never before attained. Obviously an ever-present signal is of little advantage without ever-operative equipment.

* * * *

Basic research for vhf-scatter principle was conducted almost solely by the National Bureau of Standards. Uhf scatter is based on research by NBS, Bell Labs and MIT's Lincoln Labs. Air Force has been prime mover in harnessing both types of scatter transmission, with much of the pioneering military work handled by Page Communications Engineers, headed by Washington consulting engineer E. C. Page. Most of the equipment to date has been built by Collins Radio, National Co., Radio Engineering Labs (Long Island City), Rixon Electronics (Silver Spring, Md.), D. S. Kennedy & Co. (Cohasset, Mass.).

Applications of scattered principle will be the subject of heavy splurges in electronics technical journals this fall. IRE considers this development so important that it plans to devote entire issue of its *Proceedings* to it.

DIFFERENCES in terrain, population distribution and station powers show up sharply in farm TV set counts for 2 more western states, tabulated this week by U. S. Census Bureau as part of its 1954 Census of Agriculture. Based on 20% sample measured in Oct.-Nov. 1954, South Dakota is shown to have farm TV set penetration of 17% (10,600 sets on 62,520 farms), despite fact that at the time of the census only one area could receive TV. Montana, with stations in 4 different cities, had penetration of only 9% (2970 sets on 33,059 farms).

South Dakota's TV sets are clustered in southeastern part of state, around powerful stations in Sioux Falls, S. D. and Sioux City, Ia., with no appreciable farm TV ownership elsewhere in state (KOTA-TV in Rapid City had not yet come on air when set count was made). Rugged Montana with its wide open spaces and low-power stations in Billings, Butte, Great Falls & Missoula, reflected TV inroads only in counties immediately adjacent to stations, with very little long-distance viewing.

In our continuing coverage of the first farm TV census ever conducted, here are the official county-by-county figures:

MONTANA					
County	Total Farms	Farms with TV	County	Total Farms	Farms with TV
Beaverhead	339	32	Meagher	155	—
Big Horn	815	84	Mineral	85	—

Note: Previously published tabulations—Nev., N.H., Vt. (Vol. 11:28); Wyo. (Vol. 11:29); N. D. (Vol. 11:30); Ida., Utah (Vol. 11:31).

REPEAT SALES—HOW AUTO INDUSTRY DOES IT: A TV industry seeking ways to stimulate second-set & replacement sales this year might profitably look to the automobile industry for lessons in how to keep the customers coming back every 2 or 3 years, in opinion of several manufacturers familiar with both industries. Though they stress that TV industry obviously can't go as far as auto people in merchandising controls, here are some of the auto features which they say might well be copied:

(1) More liberal trade-ins. The auto industry uses high trade-ins as entering wedges both for new car sales and for making used cars available at just about any price customer wants to pay. TV trade-ins, by contrast, are too often hit-or-miss. In many instances, potential second-set and replacement customers have turned away from stores after dealers may have offered as low as \$10 for a working TV set for which he once paid \$300 or so. Great need in TV, it's said, is for more liberal trade-in and/or rational explanations to customers why more cannot be offered. Thus they would be encouraged to turn in sets or buy an additional receiver.

(2) Increase value of franchises. With lessons gained from 40 years of experience, auto industry has made a dealer franchise highly coveted. While nobody suggests a TV manufacturer could exercise such rigid control over his non-exclusive dealers, there's room for a manufacturer, in NARDA's words, "to give meaning to a franchise." Best ways to do it, it's suggested, are to be more discriminating in selection of dealers, choosing only those who are adequately financed, who can sell aggressively and who can render necessary servicing to satisfy customers.

(3) Greater use of accessories. Auto industry is quick to promote product obsolescence by adding something new to each year's models; for example, new body designs, new color motifs, turn signals, various gadgets, etc. etc. TV is making first moves in this direction with its remote control units, tuning gimmicks, color cabinets, clock timers, etc. -- but there's room for many other accessories.

* * * *

Admiral raised prices by \$10-\$20 on 17 of its 41-model line this week, attributing increase to recent hikes in steel and copper, together with other "substantial material and labor boosts." The 21-in. console leader was increased from \$200 to \$220 and another 21-in. console was hiked from \$230 to \$250. Remaining 15 models, all 21 & 24-in., were each raised \$10. It was Admiral's second price hike in 3 weeks, having previously raised 7 models by \$10 in vhf, \$15 in uhf (Vol.11:30).

Admiral's action is concrete evidence of general disposition to raise prices in near future (Vol.11:30-31). Shortage of selenium rectifiers, result of strike of copper miners in west, is starting to pinch many TV manufacturers -- and any settlement which causes copper prices to go up even further is likely to add impetus to the price-raising movement. Production of selenium rectifiers has reportedly dwindled sharply at Federal & Sarkes Tarzian, 2 of biggest producers. Economically, it's impractical to use silicon as substitute for selenium in rectifiers, an official of Sarkes Tarzian says. He said it costs \$16 for a silicon rectifier, compared to 60¢ for a comparable selenium rectifier. Moreover, he says, there isn't enough silicon available to make it commercially expedient to use it.

Other components are also due for price boosts, according to trade reports. A 6% increase in steel tubing is anticipated shortly, along with new increases in brass, aluminum strip & lead-ins.

Set makers themselves continue to talk of price hikes, though only Admiral has raised them so far. Arthur L. Chapman, Sylvania v.p., told distributors convention he foresaw an average retail price increase of "a \$20 bill." A purchasing agent for a major TV maker told us he foresaw "no alternative" to price hike.

Brief highlights of other major trade developments this week:

Consumer Buying Plans: A new survey of consumer finances, conducted in June by U of Michigan Survey Research Center as part of continuing series for Federal Reserve Board reveals: (1) Consumers are generally more optimistic this summer than year ago about their personal financial situations and general business outlook. (2) Greater number than a year ago plan to buy houses; about same number to buy autos & major household appliances, though TV buying plans "appear to be lower" than last June. About 34% of the 2000-family sample said they are better off financially than year ago, compared to 30% in both June & Oct. 1954. Number reporting "worse off" fell to 20%, from 25% in June 1954 & 27% in Oct. Good business conditions are expected by 72% of all families -- and by 82% of those with over-\$5000 income. The report, available from FRB, thus summarizes findings: "Practically all indicators of consumer attitudes have a more favorable position now than a year ago. Consumers as a whole are aware of the great improvement in American business conditions which took place during these 12 months and have revised their expectations upward."

Consumer Credit: Federal Reserve Board reports consumer installment debt hit record \$24.914 billion at end of June, following rise of \$765,000,000 in June alone. The June total was 75% over June 1954 & 300% over June 1953. Autos reportedly accounted for \$12.5 billion as of June 30, or nearly 50% of all outstanding credit. To counteract increase in installment credit, FRB this week approved boost in discount rate for member banks, permitting rate up to 2½%. FRB officials have predicted that less favorable credit risks among manufacturers and retailers would have harder time of it in dealing with their banks for advances.

Production: TV output totaled 113,864 week ended July 29, compared to 90,072 preceding week & 78,968 week ended July 15. It was year's 30th week (7 full months by RETMA calculations) and brought production for the period to about 4,250,000 vs. 3,200,000 in same 1954 period. RETMA this week officially set 6-month TV production at 3,828,793 vs. 2,845,147 in first half of 1954. Radio output totaled 203,343 in week ended July 29, bringing 7-month output to 7,800,000 vs. 5,800,000 in same 1954 period. Here's RETMA's 6-month TV-radio production table:

	PRODUCTION		RADIO PRODUCTION BY TYPES			
	Total TV	Total Radio	Home Sets	Portables	Clock	Auto
January.....	654,582	1,068,146	280,121	47,303	166,885	573,837
February.....	702,514	1,089,724	232,831	109,120	150,031	597,742
March (5 wks)	831,156	1,482,274	300,840	233,465	173,944	774,025
April.....	583,174	1,099,775	193,431	265,866	72,602	567,876
May.....	467,394	1,114,035	161,357	258,701	130,608	563,369
June (5 wks).	589,973	1,204,935	181,930	255,833	182,605	584,567
TOTAL.....	3,828,793	7,058,889	1,350,510	1,170,288	876,675	3,661,416

DISTRIBUTOR NOTES: Shifting pattern of appliance distribution to be touched off by RCA-Whirlpool-Seeger consolidation, though certain to be gradual, was evidenced this week in Atlanta, where RCA distributor Yancey Co. Inc. took over Whirlpool line from Charles S. Martin Distributing Co., which in turn assumed Easy washing machines from Yancey. Pres. Charles Martin was quoted as saying he voluntarily relinquished Whirlpool line because of its tie-up with RCA . . . Interstate Electric Co., New Orleans (RCA) elects George C. Howell Jr. as pres.; he's onetime Whirlpool adv. mgr. . . . Admiral appoints newly-formed Onthank-Harrison Co., 800 S. 72nd St., Omaha (George W. Onthank, pres.), replacing Bi-State Distributing Corp.; it also appoints Lewis Bear Co. Inc., 404 S. Palafox St., Pensacola (Lewis Bear, pres.) . . . Motorola appoints Boyd Corp., 84 W. Cove St., Portland, Me. (James W. Boyd, pres.) . . . Philco appoints Heath Furniture Co., Amarillo, as associate distributor . . . Stromberg-Carlson appoints Electronics Laboratories & Supply Co., 1414 Oriskany St. West, Utica, and Rome Electronics, 102 Erie Blvd. East, Rome, N. Y. . . . Bendix Radio appoints Cerullo Electric Supply Co. Inc., Hazelton . . . Major Appliance Distributors Inc., Charlotte, relin-

quishes Admiral line . . . Allison-Erwin Co., Charlotte (Zenith) promotes exec. v.p. John C. Erwin to pres., succeeding Henry J. Allison, who moves up to chairman; Jack Johnston named v.p.-gen. sales mgr. . . . Krich-New Jersey Inc., Newark (RCA) appoints Lawrence M. Braun, ex-Zenith N. Y., as mgr. of electronic parts dept. . . . RCA Victor Distributing Corp., Detroit, appoints Victor Parker as adv. & sales promotion mgr. . . . Graybar, N. Y. appoints Irwin Schutzer as manager of all electronics sales . . . CBS-Columbia of Philadelphia appoints Samuel Cohen, ex-Emerson Radio of Pennsylvania, as district sales rep. . . . Industrial Sales Co., New Orleans (Motorola) names James Coleman as district mgr. for Jackson, Miss. . . . GE Supply Co., N. Y., appoints George B. Colesworthy Jr. consumer goods sales mgr. . . . American Elite Inc., N. Y. (Telefunken radios) organizes American Elite (Canada) Ltd., 1214 Bishop St., Montreal (Frank J. McNichol, sales mgr.) . . . Sylvania appoints Cladco Distributors Inc., Buffalo (R. W. Cook, gen. mgr.) . . . Capehart-Farnsworth appoints Edgar A. Brown Inc., 4109 Carnegie Ave., Cleveland, and Radio Trade Supply, 1224 Grand Ave., Des Moines . . . Olympic Radio opens factory branch, Buffalo Ortec Inc., 84 Pearl St., Buffalo (Paul B. Hunter).

Topics & Trends of TV Trade: The 6,100,000 radios sold at retail in first half of 1955, compared to 4,500,000 in first half of 1954, have many in trade predicting nearly 13,000,000 year for radios—a fine comeback story overshadowed in publicity by TV's strong year. Nearly 13,000,000 radios were sold in 1953, but last year sales slumped to 10,000,000.

Transistorized radios are expected to hypo sales considerably this fall, brightening chances of reaching the 13,000,000 goal. Selling at \$45-\$55, they haven't exerted too much influence on the market so far, but the price is expected to come down by fall. Average retail price of radio currently is about \$21.

The 3,661,000 auto sets paced the first-half sales rise, comparing to 2,081,000 in first half of 1954. Of the 2,429,000 home radios sold in first 6 months this year, 1,071,000 were table models, 637,000 clock, 721,000 portables. In first 6 months year ago, 2,411,000 home radios were sold—1,182,000 table, 559,000 clock, 668,000 portables.

* * * *

Factory production of uhf-equipped sets totaled 558,802 during first 6 months of 1955, or 14.6% of total TV set production of 3,828,793, according to RETMA. This compares with 22.5% in first 6 months of 1954. However, the figures are not considered entirely compatible, since several companies—notably Philco—are now following practice of installing all uhf tuners in field, none in factory, to simplify dealer-distributor inventory problems.

Emerson pushes air conditioners year-round by cutting unit price to dealer for purchases between Aug.-Dec. New price schedule will be issued monthly, with national advertising on air conditioners starting in Sept. Pres. Benjamin Abrams said he expects other manufacturers to come up with similar plans to put production on year-round basis.

Dr. Allen B. DuMont added another powerboat racing laurel last week when his 54-ft. Hurricane III won 31-mi. Westchester power squadron's predicted-log cruiser race on Long Island Sound.

Trade Personals: J. H. Craft Jr., Stromberg-Carlson, named chairman of RETMA service committee, succeeding H. J. Schulman, CBS-Columbia; W. L. Parkinson, GE, named chairman of vocational training subcommittee; J. A. Hatchwell, DuMont, appointed chairman of advisory committee to N. Y. Trade School, which conducts RETMA's training courses . . . Ralston H. Coffin, RCA director of adv. & sales promotion, elected a v.p. . . Thomas P. Ryan, Sylvania TV-radio midwest sales mgr., promoted to TV-radio sales mgr. of TV-radio div., replacing Arthur A. Currie, now v.p.-mgr. of Adams Distributors Co., Sylvania Boston distributor; Ryan reports to gen. sales mgr. Bernard O. Holsinger . . . Herman S. Sacks, ex-Bendix Radio, joins Allied Radio Corp., Chicago, as marketing mgr. of sound & technical products; Wm. Senescu promoted to marketing mgr. of components . . . Dan D. Halpin, Westinghouse TV-radio gen. sales mgr., and Charles Golenpaul, Aerovox v.p., to address Texas Radio & TV Service Clinic & Electronics Fair at San Antonio's Gunter Hotel, Aug. 26-28 . . . Franklin Greene Jr. promoted to manufacturing mgr. of GE's TV-radio dept., Syracuse, succeeded as mgr. of Utica radio plant by Wm. N. Maddox, mgr. of Auburn, N. Y. plant . . . Wm. H. Eutzy promoted to new post of mgr. of sales administration, Westinghouse TV-radio div. . . John W. Fenton appointed mgr. of new RCA Victor TV-radio components plant now under construction at Renfrew, Ont.; F. R. Deakins, pres. of Canadian RCA subsidiary was guest of honor at parade and celebration July 21 when ground was broken for new 52,704-sq. ft. plant, due to employ 450 at outset . . . Luther M. Sandwick,

Crosley's new line, introduced at distributors convention this week in Chicago, comprises 15 TVs & 22 radios—including a transistorized, printed-circuit portable radio designed like a book. Prices are being withheld until Aug. 10. TV line is divided into Custom V, Advanced V & Super V series. The Custom V series comprises 9 models, all with "Zoom-A-Tenna," a multi-directional antenna which slides into chassis when not in use, and illuminated channel indicator with ½-in. numerals. The Advanced V series consists of 17 & 21-in. table models in mahogany or blonde & featuring "leathergleam" enamel finish. Super V series is continued from old line in 17 & 21-in. walnut models. Eight tables & 2 clocks round out the radio line.

TV set sales by Canadian factories in first 6 months totaled 245,917, production 337,369, reports RETMA of Canada. This compares with 181,233 & 211,480 in first half of 1954. Projected production estimate for July-Sept. period is 226,283 more sets. June sales totaled 27,567 at average price of \$304, production 36,060. Inventory at end of June was 139,336 compared to 130,843 at start of month. Montreal led in 6-month sales, with 44,428; Toronto, 40,116; British Columbia, 24,911; Manitoba, 20,882; other Ontario, 20,817; Nova Scotia, 16,458; Alberta, 15,660; Ottawa & eastern Ontario, 12,931; Quebec City, 11,886; Hamilton-Niagara, 11,445; New Brunswick & Prince Edward Island, 9522; Saskatchewan, 6926; Windsor, 6639; Newfoundland, 1891; other Quebec areas, 1405.

Capehart-Farnsworth makes regional bid for big Los Angeles market with specially-designed "California-styled" series of TV & high-fidelity models, to be marketed only on west coast. Designed by Lowell Wood, of Rogers & Wood Co., Capehart's Los Angeles distributors, new series has 5 different designs in 21 & 24-in. High-fidelity offerings are a \$395 console & \$695 tape recorder.

Excise tax repeal on non-entertainment TV-radio and components used in "further manufacture of TV-radio" was finally passed by House, which last week end accepted Senate version of bill (Vol. 11:27-28,31). It awaits President's signature.

ex-Wilcox-Gay & Scott Radio, named sales mgr., Pilot Radio . . . Wm. R. Thurston named to head TV equipment sales at General Radio Co., Cambridge, Mass., C. Wm. Harrison being transferred to N. Y. office . . . Herbert A. Bell, founder-pres. of Packard-Bell, presented plaque by Variety Club of So. Calif. for his service to entertainment field at luncheon marking firm's 30th anniversary . . . Kenneth B. Bryden, mgr. of research & financial controls, RCA tube div., named mgr. of govt. coordination & services, Harrison plant . . . Donald M. Strathearn, engineering director of Crosley laundry equipment, named engineering director of all products; Albert Emanuel II, laundry product mgr., named gen. product mgr. . . Harry M. Rich, ex-GE tube dept., appointed asst. to Leonard Ashbach, pres. of Majestic International, in charge of setting up parts & service facilities for German Grundig-Majestic radios & phonos . . . George M. Hakim, ex-Hoffman Electronics & Raytheon, named west coast regional mgr., DuMont TV receiver sales div., where he was adv. mgr. from 1950-52 . . . Andrew M. Wiswell, ex-Muzak v.p., named head of Capitol Records Inc. repertoire div. . . Richard C. Rowley promoted to Motorola Texas regional mgr., Dallas . . . Oliver S. Hulley promoted to consultant of GE's manufacturing training & education service, Schenectady . . . Wm. M. Sevy, ex-Arvin & Capehart-Farnsworth, named Olympic Radio regional mgr. for Ind., Ky., western Mich.

James H. Simon, 50, pres. of Simon Distributing Co., Washington area Zenith distributor, died Aug. 3 of heart attack. He is survived by his wife and 3 sons.

MERGERS of electronics companies are daily news now—particularly small firms being taken over by larger non-electronic entities—and you'll be hearing of more such "get-togethers" in ensuing months. The mergers of larger companies—whether they involve consumer lines (TVs, radios, appliances), as in the case of RCA-Whirlpool-Seeger (Vol. 11:29-31), or industrial and defense electronics, as in the cases of Sperry-Rand and General Dynamics-Stromberg—are symptomatic of the desire of big industrial entities to stake a claim in the burgeoning electronics fields.

One financial journal had Raytheon "ready" for merger recently, but there were no details and there is no verification. The amusement trade press continues to hammer away at rumors of Avco's disposal (possibly to Storer) of its 4 Crosley TV and one radio station, again stoutly denied by chairman James Shouse of Crosley Broadcasting Corp. There's still talk of "something happening" at DuMont, now apparently more likely to be a spinoff of its 2 telecasting stations into new corporation rather than their outright sale.

Checking the Crosley story, we did run into the information that ex-Crosley sales div. v.p. W. A. Bles last year tried to engineer a deal whereby what is now the Crosley & Bendix home appliance div. (TVs, radios, white goods) would be bought out by Ford Motor Co. in order to give it a better diversified competitive position with General Motors, which of course owns Frigidaire and Delco Radio. That came to naught, but it's a good guess that Avco's Victor Emanuel would not be averse to selling out or merging his Crosley-Bendix operations.

General Dynamics, it's learned, likes the Stromberg-Carlson properties it acquired recently, most particularly for defense electronics facilities, but it wouldn't be surprising to see it either (a) sell out WHAM-TV & WHAM, Rochester, or (b) acquire more telecasting properties

and operate in a bigger way in that field a la Westinghouse, Storer, et al.

While the mergers of industrial giants make the big news, the merger mill is kept going by the nearly one-a-day rate of absorption of smaller electronics companies by larger companies and by weddings-of-convenience of 2 or more small companies into more diversified combines.

The what's-my-line of American industry is becoming a difficult guessing game. For example, Reynolds Spring Co., recently sold out its spring business, changed name to Consolidated Electronics Industries Corp., purchased a number of electronic properties including Alliance Mfg. Co. (antenna rotors, small motors, etc.). At the same time its control passed into the hands of North American Philips, affiliated with the fabulous Philips of Holland electronics and lamp combine.

Metamorphosis of a company in throes of diversification is demonstrated by recent changes in Daystrom Inc., Elizabeth, N. J., which started out as a manufacturer of printing equipment (American Type Founders), then branched out into kitchen furniture, then into electronics (Crestwood tape recorders). This year it purchased Weston Electrical Instrument Co. and Heath Co., maker of do-it-yourself electronic kits. Daystrom will soon announce that it has sold off its printing equipment subsidiary—its original business—for price in the neighborhood of \$8,000,000. Even before sale of ATF, pres. Thomas Roy Jones had predicted that 70% of Daystrom's business in 1955 would be in electronics, electrical and related fields.

* * * *

Latest mergers involving electronics firms: Link-Belt Co., Chicago materials-handling equipment maker, this week announced plan to acquire electronics maker Syntron Co., Homer City, Pa., through exchange of stock. Curtiss-Wright Corp., Woodridge, N. J., purchased Elly Electronics Corp., Fair Lawn, N. J., Elly pres. J. George Sauer becoming mgr. of thermal devices sales for Curtiss. Lavoie Laboratories, Morganville, N. J., acquired Matawan Electronics & Bayshore Electronics, Keansburg, N. J.

Electronics Reports: Transistors are rapidly replacing tubes in aviation electronic equipment, according to *Aviation Week* survey reported in July 25 & Aug. 1 issues by avionics editor Philip Klass. Nineteen leading manufacturers reported that 22% of all sockets in equipment now under development are intended to hold transistors, and 11% magnetic amplifiers, also a vacuum tube substitute. By 1957 these percentages are expected to jump to 50% & 15%. Use of these two replacements varies widely in branches of the avionic equipment field, from a low of 11% in radar equipment, to a high of 61% in digital computers.

Communications equipment now under development uses 14% transistors & 4% magnetic amplifiers, is expected to use 28% & 7% in 1956, 37% & 9% in 1957. Totals in all categories will rise, according to the survey: radar, from 11% to 27% to 43% in 1955, 1956 & 1957; navigational aids, 28%, 50%, 58%; automatic controls, 49%, 74%, 88%; instrumentation, 43%, 55%, 72%; digital computers, 61%, 78%, 94%.

Main advantage of transistors is saving in weight, size & power requirements. Disadvantages are reliability & cost, but reliability is increasing & cost decreasing as production rises. For aviation use, current increased cost is made up by reduction of weight needed to dissipate heat. Douglas Aircraft estimates that transistorizing a jet fighter as fully as possible will save \$48-54,000 per plane vs. an extra \$2-3000 for transistors.

Cost of transistors is dropping rapidly. GE estimates prices will be competitive with tubes by 1957, cheaper by

1960-63. Current ratio of production is 200 vacuum tubes for each transistor, but Bell Labs expert Dr. Wm. Shockley, one of developers of transistor, states that growth curves show that transistors will pass tubes before too long.

* * * *

Maj. Irving Koss, recently Signal Corps, named administrative asst. to Daniel E. Noble, v.p. in charge of Motorola communications & electronics div., succeeding Robert Barton, now asst. mgr. for contract technical administration at Phoenix military research & development facility; Paul Jones named asst. mgr. for contract business administration at Phoenix.

Wm. G. Laffer, pres. of Cleveland Graphite Bronze Co. elevated to pres. of parent Clevite Corp., Cleveland, succeeding James L. Myers who continues as Clevite chairman. Among Clevite divisions are Brush Electronics and Transistor Products Inc.

Dr. Benjamin H. Alexander, former Sylvania semiconductor engineering mgr., named mgr., CBS-Hytron semiconductor operations; Leo E. Dwork appointed chief engineer of CBS-Hytron's Lowell, Mass. semiconductor plant.

Herbert A. Haworth, ex-Sprague Electric, named chief engineer, Condenser Products Co. div., New Haven Clock & Watch Co.

Frederick D. Herbert, 81, who retired this year as pres. of Kearfott Co., died Aug. 4 at his home in Upper Montclair, N. J.

Financial & Trade Notes: Philco sales in first 6 months of 1955 totaled \$178,041,000 as against \$174,676,000 in same 1954 period. Net income was \$3,387,500 (90¢ a share) after preferred dividends vs. \$1,547,500 (41¢). Second quarter sales totaled \$81,216,000, net income \$1,128,000 (28¢) vs. \$60,899,000 & \$703,000 loss year ago due to 45-day strike. Federal and state income taxes for first half of 1955 went up to \$4,160,000 from \$3,115,000. Additional 1954 income taxes payable by reason of retroactive repeal of Sec. 462 of Revenue Act, amounted to \$2,217,068; beginning in 1955, company changed accounting policy to charge prepaid taxes directly to applicable reserves, and as result has transferred \$1,090,549 directly to surplus. If this net adjustment had been included in the income statement, the additional income would amount to 29¢ per share on the 3,771,850 shares outstanding as of June 30.

Motorola expects to achieve \$225,000,000 sales year, said pres. Paul V. Galvin in Aug. 3 report to stockholders, disclosing first half sales of \$93,293,119 compared with \$92,465,210 in same 1954 period, and second quarter sales of \$41,414,940 vs. \$44,458,410. First half earnings were \$2,945,001 (\$1.52) vs. \$2,858,301 (\$1.48); second quarter earnings were \$791,963 (41¢) vs. \$1,214,217 (63¢). In connection with second quarter decreases, Mr. Galvin stated that "about 40% of second quarter TV sales last year was new merchandise, whereas this year there was only a nominal amount of the new TV lines recorded as sales in the second quarter. This will correct itself in the third quarter." Also, Motorola's military sales for first 6 months were disproportionately low compared with the total anticipated for the year. Sales of 2-way radio communications and auto radios for second quarter were substantially up, while home, portable & clock radio sales were up 54%. In 1954, Motorola's gross was \$217,000,000.

Zenith earnings for first half of 1955 were \$3,126,061 (\$6.35 a share) on sales of \$71,455,702 vs. \$1,288,246 (\$2.62) & \$56,681,409 for the same 1954 period. For the second quarter, profits were \$1,051,101 (\$2.14) in 1955 & \$460,725 (94¢) in 1954 on sales of \$31,083,890 & \$27,346,219, respectively. First half TV set sales jumped 71% from 1954 to 1955, compared to an overall industry increase of about 20%, but "because of competitive conditions and increased proportion of table model receivers," pres. E. F. McDonald Jr. told stockholders, "average unit sales prices were substantially lower and the dollar volume increase in television sales was not commensurate with the record number of TV receivers sold."

Tung-Sol reports record first-half 1955 earnings of \$1,528,792 (\$2.20 a share on 643,412 shares) on sales of \$23,754,485 vs. \$1,001,537 (\$1.73 on 555,402 shares) & \$19,102,826 for same 1954 period. Chairman Harvey Harper says new aluminized CR tube will be pushed vigorously for renewal market.

International Resistance Co. reports Jan. 1-June 26 (25 weeks) profits of \$323,290 (24¢ a share on 1,342,598 shares) on sales of \$7,291,888 vs. \$123,080 (9¢ on 1,331,163 shares) & \$5,701,000 for first 25 weeks of 1954.

Whirlpool Corp. sales were \$91,965,427, net income \$5,910,567 (\$1.92 a share) in first 6 months of 1955 vs. \$85,204,210 & \$4,035,176 (\$1.31) year earlier.

Gross Telecasting Inc. earned net profit of \$374,673 (94¢ per share) during first half of 1955 vs. \$332,576 (83¢) in same 1954 period.

* * * *

Dividends: Magnavox, 37½¢ payable Sept. 15 to stockholders of record Aug. 25; Globe-Union, 30¢ Aug. 10 to holders Aug. 1; Tung-Sol, 25¢ Sept. 2 to holders Aug. 18; Whirlpool, 35¢ Sept. 10 to holders Aug. 31; Paramount Pictures, 50¢ Sept. 15 to holders Aug. 26.

Color Trends & Briefs: Still highly skeptical about color's prospects, GE's Dr. W. R. G. Baker, who also is RETMA director of engineering, feels set prices are still too high to get the medium rolling. "I don't think the situation this fall will be much different from last year," he said. "Oh, maybe a little better, but not much."

"The price ought to be around \$495 to open color up—maybe lower," he said. "The whole merchandising job is entirely different from that of black-&-white when it started. There was nothing like TV before. The old man saw it in a barroom and wanted it in his own home."

"But how do you merchandise color? Is it a specialty job? Do you put one in the customer's home and leave it there for him to try out? I don't know."

GE is continuing work on tri-color tubes, meanwhile, Dr. Baker said, aiming for unit cheap enough to permit production of receiver priced within average customer's means. He said he hopes to have something to report before long.

* * * *

Another big set maker, who preferred to remain anonymous, told us: "We believe the RCA-NBC program expansion is the first real step needed to take color off the ground. We feel this will stimulate fall sales of color receivers and will hasten the development of the rectangular color tube so badly needed."

Attitude of RCA-NBC, prime movers in the color crusade, is one of determination, backed by millions being poured into color programming and promotion. "We mean business," said a spokesman, "and if some of the others won't come along, we will go it alone or with those that believe in color, as we do." It was intimated, but not disclosed, that others besides Hallicrafters & Magnavox have also arranged to have RCA make their initial color receivers (Vol. 11:31).

Hypo to color sales is seen in sizable discounts on the \$795 & \$895 being allowed. Reported discount to distributor is 40%, distributor discounts to dealer run 30-32%.

* * * *

Milton Berle color series next season is getting a lot of promotional push from NBC. This week's *Variety* carries full-page ad in form of letter to Berle from NBC pres. Pat Weaver, with caption "Colorfornia Here He Comes!" Letter recalls how Berle became known as "Mr. Television"—"with the sales of black-&-white TV sets racing to keep up with your ratings" and goes on: "Within the next months we are bound to see you carve out a new and colorful career for yourself, giving a tremendous push to color set sales."

Network color schedules for next 2 weeks: NBC-TV—Aug. 8, 10, 12, 17 & 19, *Matt Dennis*, 7:30-7:45 p.m.; Aug. 9, 11, 16 & 18, *Vaughn Monroe*, 7:30-7:45 p.m.; Aug. 8-12 & 15-19, segments of *Home*, 11:45-noon; Aug. 22, *Producers' Showcase*, "The King & Mrs. Candle," starring Cyril Ritchard, Joan Greenwood, Richard Haydn & Irene Manning, 8-9:30 p.m.

Set makers who have announced color receivers for the fall market thus far, according to NBC, prices ranging from \$695 (Motorola) to \$950 (Magnavox): Andrea, Capehart-Farnsworth, DuMont, Hallicrafters, Magnavox, Motorola, Philco, RCA, Sentinel, Sylvania, Stromberg-Carlson.

One index to color tube production is output of masks, and Aug. *Electronics Magazine* estimates 80,000 have been produced to date—about 50,000 of them 19 & 21-in., 2000 of them 22-in., remainder 15-in.

"Flat" color tube: Engineers at Willys West Coast Electronic Lab, Palo Alto, are working on color version of Dr. Wm. Ross Aiken's still-secret "flat" TV picture tube (Vol. 11:3).

Network TV-Radio Billings

June 1955 and January-June 1955

(For May report see *Television Digest*, Vol. 11:27)

HALFWAY through the year, network TV billings came very close to \$200,000,000 mark as against \$150,013,054 at same point last year—and, on basis of record fall-winter bookings, there's every likelihood they will be nearer \$500,000,000 than \$400,000,000 when year ends. Fact that NBC-TV now claims to be 50% sold out daytime, in which classification CBS has been sold out consistently, enabling it to take top position in over-all TV billings, also leads to expectation that 1955 will far surpass 1954's \$320,154,274 (for 1949-54 monthly PIB figures, see p. 32, *TV Factbook No. 21*).

Network radio's \$9,321,858 in June compares with \$10,764,481 in same 1954 month, brought Jan.-June total to \$61,591,309 vs. \$74,529,314 for same 1954 period. Only radio network to show gain in June was NBC, second runner to CBS, but it was a miniscule gain. Here's latest Publishers Information Bureau report:

NETWORK TELEVISION

	June 1955	June 1954	Jan.-June 1955	Jan.-June 1954

* In order to maintain continuity and comparability with previously published data, an adjustment factor of 1.817 has been used by PIB in calculating gross network radio time charges for those nighttime network radio programs where ABC Rate Card No. 6 was in effect.

† Revised as of Aug. 3, 1955.

Note: These figures do not represent actual revenues to the networks, which do not divulge their actual net dollar incomes. They're compiled by Publishers' Information Bureau on basis of one-time network rates, or before frequency or cash discounts, so in terms of dollars actually paid may be inflated by as much as 40%. However, they're generally accepted in the trade as an index.

Major hotel TV lease operators (see p. 2), as far as can be learned, are the following (brand of receiver in parentheses): American Communications Corp., 280 Broadway, N. Y. (GE); The Ira Hirschmann Co., 654 Madison Ave. (CBS-Columbia); Hotel Radio Corp., 1040 W. Fort Ave., Detroit (private label); Master Video Systems, 37 W. 52nd St., N. Y. (CBS-Columbia); Telerent Corp., 870 Seventh Ave., N. Y. (Admiral); Tel-Hotel Corp., 50 Central Park So., N. Y. (Westinghouse); Tele-Sound Inc., 1505 Race St., Philadelphia (Capehart); Wells Television Inc., 52 Vanderbilt Ave., N. Y. (RCA).

East Germany has opened 2nd regular TV station, at Brocken Mt., close to West German border.

STRIKE of TV film actors, which began Aug. 4, isn't expected to have much effect on fall programming unless it drags on for a month or more. Most new film series due for debut this season are reported to have many episodes already in the can, and old series can throw re-runs into the breach, if necessary. As for network filmed shows, there's always the possibility they can convert to live in a pinch.

At press time, prospects for quick settlement seemed slim, with no negotiations expected until "some time next week," according to a management group spokesman. Strike involves some 200 producers and 2-3000 Screen Actors Guild members as well as some 3000 craft workers in other unions. Principal issue is Guild's demand for re-run payments for 2nd runs; current re-run payments begin with 3rd run.

Management bargaining groups directly affected are Alliance of TV Film Producers and Assn. of Motion Picture Producers, but most non-affiliated TV film makers have followed the position adopted by the 2 groups. Seven independent TV film producers reportedly have settled with Guild—including Lewislor Enterprises Inc. and Lewman Ltd., owned respectively by Loretta Young and Jane Wyman, both members of SAG. Contracts also have been signed by Charles E. Skinner Productions (*Sgt. Preston of the Yukon*) and Quintet Productions (*Judge Roy Bean*) as well as Spectrum Film Productions (5 & 15-min. films) and 2 firms in Cleveland.

At least 43 major film series, produced at 23 Hollywood studios, and 4 or more made in New York area, have been interrupted by strike. Surveys by entertainment trade press found backlogs of unreleased TV film episodes varied from 3 to 18, with median being about 6. Since most of the series won't begin using the new material until Sept. or Oct., strike would have to last at least a month before it would cause any widespread shortage of TV film.

The 8% excise tax on installation of community antenna connections came close to elimination this week, when House passed HR-3414 with amendment submitted by Rep. Cole (R-N. Y.); Senate failed to act on it, however. Community operators would much prefer to get 8% excise lifted from monthly charge rather than from original installation, will try again next session.

Looking for personnel? Radio & Television Executives Society, 420 Lexington Ave., N. Y. publishes monthly applicant listing of persons seeking posts in networks, stations & agencies—including management, sales, production, direction, writing, promotion, public relations.

Rocket enthusiast Andrew G. Haley, Washington communications attorney, now attending Sixth International Astronautical Congress in Copenhagen, Denmark, has asked International Telecommunications Union to allocate frequencies for use with satellites.

TV cuts drinking, so pubs in Norfolk, England have petitioned for later closing hours. They say customers used to show up at 7 p.m., but since TV reached area don't venture out until 9. Authorities sympathized, now permit beer to flow half hour longer to 10:30.

How TV newscasting is handled on 11 stations is subject of U of Missouri bulletin (*Journalism Series No. 135*) by Samuel Brownstein, titled *Television News Practices in Missouri*, available on request.

TV network service now reaches 364 stations in 241 U. S. cities, AT&T Long Lines announced this week. KRNT-TV, Des Moines, hooked up last week end, was latest to join Bell System facilities.

Fire virtually demolished plant of WCOV-TV, Montgomery, Ala. (Ch. 20) on Aug. 5, forcing it off air indefinitely. Radio WCOV was also badly damaged.

PUBLISHED WEEKLY BY RADIO NEWS BUREAU • WYATT BLDG. • WASHINGTON 5, D.C. • TELEPHONE STERLING 3-1755 • VOL. 11: No. 33

SUMMARY - INDEX OF THE WEEK'S NEWS — August 13, 1955

EXPANSION INTO ELECTRONICS eyed by many big companies in nearly every industry. Survey shows mergers and diversification in last 12 months (pp. 1 & 14).

DuMONT SPINS OFF stations, plans separate corporation, seeks new president (possibly via merger) for manufacturing operations, Dr. DuMont to be chairman (p. 1).

COLOR SET SALES in 1956 will run 600,000-1,000,000 if properly handled, RETMA pres. H. L. Hoffman believes; sees price dropping only with mass sales (p. 3).

NEWEST STOCK OFFERING involving TV-radio stations due from Dolph-Petty Broadcasting Co., which proposes initially to buy into Honolulu, Denver stations (p. 6).

NEW STATIONS in Ft. Worth (Ch. 11), Richmond area (Ch. 8), Scottsbluff, Neb. (Ch. 10, satellite). Texas outlet starting with \$1,000,000 local business (p. 8).

HIGH JULY-AUGUST TV SALES indicate fall buying by consumers has begun in earnest; price hikes by Emerson & Trav-Ler; labor signs with GE (pp. 9-10).

WESTINGHOUSE SELLS 1000 TVs to new Hilton-Statler Hotel in Dallas; shipment comprises specially-designed 17 & 21-in. receivers (p. 11).

CBS INC. GROSSES \$202,173,713 for first half, profit up 22% to \$6,327,672. Financial reports on Raytheon, et al; officer-director stock transactions (p. 12).

DuMONT'S VITASCAN live color equipment to get first public showing as Gimbels N. Y. invites customers to "see yourself on color TV" (p. 13).

MOVIEMAKERS' ENTRY INTO TV assailed by Ziv as "by-product activity" using second-class talent and "loaded with free ads at expense of sponsors & stations" (p. 5).

'ELECTRONICS' IS STILL THE MAGIC WORD: If further proof were needed that the future of virtually all industry is tied up with the ever-expanding applications of electronics, it's contained in the growing list of old-line companies expanding into the fields of electronics -- through mergers or establishment of electronics divisions.

While considered an industry in itself, electronics actually is also a part of every other industry -- either through electronic production techniques or the integration of electronics into the end product. The most exciting scientific and industrial frontiers now before us are the harnessing of the atom and the conquest of outer space -- both of which will be made possible through extensive application of new advanced electronic techniques and systems.

It's only natural, then, that companies in nearly every field have plans for expansion into electronics, either to supplement their principal product, or in search of a new "principal product" to replace one which is becoming "outdated."

Principal electronics mergers and expansions of last 12 months are detailed in story on p. 14, which brings up-to-date the analysis of industrial diversification into electronics which appeared in our May 15, 1954 issue (Vol. 10:20).

THE DuMONT SPINOFF—PLANS AND PURPOSES: Changes in the DuMont capital and operating structures, both manufacturing and telecasting, will be wrought before year's end pretty much along lines predicted (Vol. 11:19-20,32) -- with these plans and purposes agreed upon at board meeting this week, subject to approval of stockholders in Oct.:

(1) Dr. Allen B. DuMont will relinquish presidency of Allen B. DuMont Laboratories Inc. in favor of a new operating head, yet to be chosen, possibly coming into the firm by way of a merger with or acquisition of another electronics company. Dr. DuMont will become chairman of board under long-term contract, with stock options.

(2) DuMont Broadcasting Corp. will be set up to own and operate TV stations WABD, New York and WITG, Washington (both Ch. 5), along with big 67th St. Tele-Centre in N.Y. In spinoff of telecasting operations, stock in new corporation will be distributed to DuMont stockholders on basis of one share for each 2½ now held, and some new stock will be sold in order to raise working capital.

(3) There will be no network operation, and Electronicam system of filming TV shows will be retained by the manufacturing concern and be made available to all

comers on lease basis. New DuMont Broadcasting Corp. may acquire more stations, possibly including KTLA (also Ch. 5), owned by major stockholder Paramount Pictures.

(4) One class of stock will replace present DuMont A & B, and stockholders will be asked to authorize 5,000,000 shares of \$1 par. Of these, 1,801,054 will be issued to replace the A, 560,000 to replace the B. Besides 124,343 shares of \$20 par 5% cumulative preferred stock, there are presently authorized 2,440,000 shares of A, with some 12,000 stockholders holding the 1,801,054 outstanding, and 560,000 of B all held by Paramount Pictures Corp. There are 494,169 shares of A unissued and unreserved; 136,777 A reserved for conversion of the preferred; 8000 A optioned (at \$10.22) to Wm. H. Kelley, v.p. & gen. mgr., when he joined company in 1953.

(5) New broadcasting corporation will have 2,500,000 shares of common, of which approximately 1,000,000 will be distributed to present stockholders and additional shares offered by underwriters to provide additional capital. Officerships & directorships remain to be worked out, with presumably some overlap planned.

(6) Directors of the manufacturing concern will be increased to 10, with all officers elected by board. One of the 2 new directors will be the new president of Allen B. DuMont Laboratories Inc., the other possibly a banker. Dr. DuMont, as the chairman, would secure options to buy 35,000 shares of common stock; 90,000 more will be reserved for purchase options by other company executives.

* * * *

That's the basic plan, as worked out largely by Armand G. Erpf, partner of Carl M. Loeb, Rhoades & Co., who displaced Dr. DuMont's brother Bruce T. last May as member of DuMont board. Other banker member of present board is Percy M. Stewart, partner of Kuhn-Loeb & Co. Plan presumably also had collaboration of "Gov. Dewey" law firm of Dewey, Ballantine, Busby, Palmer & Wood, who have represented Erpf.

Reorganization was entirely amicable, it's understood, despite long-prevailing friction between DuMont majority directors (Dr. DuMont, T.T. Goldsmith Jr., Stanley F. Patten, Mr. Stewart) and Paramount minority (Barney Balaban, Paul Raibourn, Edwin L. Weisl). Respective classes of stocks were different only in voting power.

Paramount got into DuMont through advances amounting to some \$164,000 in mid-30s, has since bought more A shares in the open market to bring its cumulative A & B total to 628,000 shares. Loeb, Rhoades owns or controls some 400,000, so that the 2 could vote well over 1,000,000 shares -- reason for the Erpf influence.

* * * *

Dr. DuMont was shown in last proxy statement (March 24, 1955) to own 39,800 shares of common, 200 preferred, and to hold 8000 common and 2000 preferred in trust for his son. He has sold off some of his holdings since, was shown in a recent SEC report to hold 37,600 common. His 1954 salary was \$68,339. Directors Goldsmith, Patten & Stewart hold 1900, 400 & 1000 shares, respectively.

Firm's 1954 annual report showed assets of \$32,954,000, common stock's book value \$12.28. Gross sales last year were \$99,570,000, net earnings \$7,597,000, but profit figure included \$6,727,000 realized after capital gains from sale of Pittsburgh station to Westinghouse (now KDKA-TV) for record \$9,750,000 (Vol. 10:49). In 1953, sales were \$91,829,000, profit \$1,544,000; 1952, \$76,367,000 & \$1,425,000; 1951, \$50,742,000 & \$583,000 loss; 1950, \$76,096,000 & \$6,901,000.

Last year's report blamed telecasting network operations for low net earning power, and it was estimated DuMont Network operation losses from inception amounted to \$16,000,000. Last year it ran \$5,000,000, forcing curtailment of network to mere skeleton hookups (Vol. 11:1, 13). Today it's a network in name only.

TV set, tube and electronics manufacture have been reasonably profitable, the telecasting business dragging down earnings consistently. Dr. DuMont noted that in 1954 manufacturing earned 3% on sales after taxes whereas average of 7 major competitors was 3.3%; in 1953, manufacturing earned 3%; in 1952, 3.2%.

So far this year, two 12-week reports have been issued. First, to March 25, showed \$27,000 loss on sales of \$15,989,000; second, for 24 weeks to June 19, showed \$1,249,000 loss on \$29,741,000 sales. The 24-week report compared with profit of \$479,000 on sales of \$41,590,000 in corresponding 1954 period.

The TV stations are said to be building up gradually, apace with the upsurge of telecasting; Washington outlet is "about breaking even." At all events, they're definitely not for sale, now that the spinoff has been decided upon. Paramount's KTLA, which may be brought into the fold, is reputedly a money maker. There's no disposition whatsoever to get back into networking, we're told; in fact, main reason for spinoff is "to take us out of showmanship into electronics."

UP TO 1,000,000 COLOR SALES IN 1956—HOFFMAN: Big color programming push begins just about a month from now (Vol. 11:31), sooner than most people realize, and virtually everyone is willing to take a crack at predicting what will happen to demand.

One of the most thoughtful analyses we've seen comes from RETMA president H. Leslie Hoffman, the energetic west coast manufacturer. He states flatly, in response to our inquiry: "I believe that if we can handle the industry publicity properly there should be a minimum of 600,000 and a maximum of 1,000,000 sets sold next year." He arrives at that conclusion via the following reasoning:

"Technically, NBC and CBS are now properly equipped facility-wise, manpower-wise & know-how-wise to do a good job of color broadcasting and do it on a national network basis. Based on our own experience, receivers are still complicated to build but once they are properly checked out they are simple to operate by the consumer and require no abnormal service.

"Sponsors have indicated their willingness to support color programming. As a matter of fact, so far they are ahead of the manufacturers, dealers and public.

"What then is making the distributor and dealer hesitant to push color, and the consumer hesitant to buy and ask for it? From the distributor and dealer viewpoint, he is worried about the potential drop in the price of the sets and has been exposed to the propaganda that the present price structure is too high. He is also afraid that if he pushes color it will hurt his healthy black-&-white sales. He also is out of the habit of home demonstrations, TV parties etc., that prevailed in the early days of black-&-white, and these must be reactivated for color.

"The consumer feels that color is still some time off and that he will wait until the prices come down. The only answer to this is to expose him to the color broadcasts and romance sufficiently what he is missing. My own opinion is that the price is not too high if it is properly sold.

"There is a certain segment of the industry that feels that we can go no place with color until the price comes down. The only way to get the price down is to get the thing going so that we can effect mass production and thereby reduce the price.

"I think the key words in getting color launched are exposure and excitement -- and if the two are properly handled I believe the price will fall in line.

"Speaking for ourselves, we have kept our engineering know-how up-to-date and have gone beyond that. As a matter of fact, we were the first in the country to introduce the 21-in. simplified chassis in Jan. 1955. We have since produced approximately 300 units. We have them in the field, they are operating satisfactorily, and the people who own them are satisfied customers.

"We have a limited production schedule for this fall, and we are going to produce them ourselves because we want the experience and are willing to pay for it. We think that color is going to get started this fall and will continue to pick up momentum until color TV becomes the topic of conversation in the average home.

"I think there is one factor which needs to be taken into consideration in both the programming and the selling of color TV, and that is the fact that the women in the home have the greatest color sense and appreciation, and that they will be the key person on the color decision in the average American home."

NARTB's schedule of 8 regional conferences this fall, which replace the 17 district meetings held in past years: Region 1 (replacing Districts 1 & 2), Sept. 21-23, Saranac Inn, Saranac, N. Y.; Region 2 (Districts 3 & 4), Oct. 12-14, Roanoke Hotel, Roanoke, Va.; Region 3 (Districts 5 & 6), Sept. 28-30, Jung Hotel, New Orleans; Region 4 (Districts 7-9), Sept. 19-21, Edgewater Beach Hotel, Chicago; Region 5 (Districts 10 & 11), Nov. 7-9, Ft. Des Moines Hotel, Des Moines; Region 6 (Districts 12 & 13), Nov. 15-17, Baker

Hotel, Dallas; Region 7 (District 14), Nov. 1-3, Broadmoor Hotel, Colorado Springs; Region 8 (Districts 15-17), Oct. 24-26, St. Francis Hotel, San Francisco. Opening day of each conference will be devoted to radio, second to assn. business, final day to TV. The TV sessions will include talks by TV v.p. Thad Brown, code review affairs director Edward H. Bronson and Television Bureau of Advertising pres. Oliver Treyz. An FCC commissioner will address the banquet of each conference.

Station Accounts: Commercial success of General Tele-radio's *Million Dollar Movie*, which is repeated up to 16 times a week (Vol. 10:37), is assured on WOR-TV for coming season starting Sept. 19, reports v.p.-gen. mgr. Gordon Gray. He said show is virtually sold out for new season, with 7 sponsors already in line (4 renewals). New-comers are Philip Morris, thru Biow-Beirn-Toigo; Mueller Macaroni, thru Scheideler, Beck & Warner; Lee Ltd. (Soft-Set shampoo), thru Foote, Cone & Belding. Renewals came from Sterling Drug, Piel's Beer, N. Y. Telephone Co., Rival Dog Food. Of the 39 films scheduled for coming season, 10 are 1955 releases, 21 were released between 1950-54 . . . Carnation Milk buys alt. week sponsorship of *Annie Oakley* in 90 additional markets, bringing total to 130, thru Erwin, Wasey & Co., Los Angeles; Continental Baking Co. is alt. sponsor in 75 markets starting Jan. 1 . . . Sears, Roebuck, an infrequent TV sponsor, buys filmed drama series, *Dr. Hudson's Secret Journal*, on KTTV, Los Angeles, thru Roche, Williams & Cleary, Chicago . . . Wine Advisory Board to spend more than \$500,000 in campaign during National Wine Week Oct. 15-22, thru Roy S. Durstine Inc., San Francisco . . . Mennen Co., entering women's cosmetic field with Mennen Skin Magic, plans all-media campaign this fall, thru Grey Adv. . . Toy Guidance Council, on behalf of leading toy manufacturers, to sponsor series of 15-min. film programs featuring ventriloquist Paul Winchell in 75 markets starting Nov. 1, thru Friend-Reiss Adv. . . Buitoni Foods Corp. plans all-media campaign with theme "Close Your Eyes and You're Eating in Italy," thru J. Walter Thompson . . . duPont to conduct annual fall spot campaign on behalf of Zerone and Zerex anti-freeze, thru BBDO, N. Y. . . Among advertisers currently reported using or preparing to use TV station time: Boyle-Midway Inc., Chicago (Aerowax), thru Geyer Adv.; W. T. Young Foods Inc., Lexington, Ky. (Big Top peanut butter), thru Rutledge & Lilienfeld, St. Louis; Bostwick Lab Inc., Bridgeport, Conn. (Hep Aerosol insect killer), thru Ovesey, Berlow & Strauss, N. Y.; Continental Baking Co. (Daffodil Farm bread), thru Ted Bates; Endicott-Johnson Corp., Endicott, N. Y. (Johnsonian men's shoes), thru Charles L. Rumrill & Co., Rochester; Mangels, Herold Co., Baltimore (King syrup), thru Buddemeier Co., Baltimore; Dusorb Co., Shenandoah, Ia. (Dusorb cleaner), thru Ayres & Assoc., Lincoln, Neb.; Griffin Grocery Co., Muskegoe (Griffin's coffee & tea), thru R. J. Potts-Calkins & Holden, Kansas City; Sunnyvale Packing Co., Sunnyvale, Cal. (Aunt Penny's White Sauce), thru Young & Rubicam, San Francisco; L. Sonneborn Sons, N. Y. (Amalie oil), thru Humbert & Jones, N. Y.; Brown Shoe Co., Robin Hood div., St. Louis, thru Leo Burnett Co., Chicago; Maryland Pharmaceutical Co., Baltimore (Rem cough medicine), thru Joseph Katz Co., Baltimore; Peter Hand Brewing Co., Chicago, thru BBDO; Wyler & Co., Chicago (packaged soups), thru Schwimmer & Scott, Chicago; Fradelis Frozen Food Corp., Los Angeles, thru Mogge Privett Inc., Los Angeles.

CBS-TV's "Six Plan," announced this week, gives advertisers a 25% volume discount for each 6 announcements a week in time classifications other than AA or A on any of its 4 owned stations (WCBS-TV, WBBM-TV, WXIX, KNXT). First advertisers to use plan are Florida Citrus Commission, thru Benton & Bowles, and Toni Co., thru Weiss & Geller, Chicago.

Chicago's radio WMAQ (NBC-owned) to use special closed-circuit telecast at noon Aug. 17 for sales presentation to key agencies & prospective clients in Chicago & N. Y. on its round-the-clock program schedule. Kine will be made and will be available for subsequent use by agency & client representatives in other cities.

Network Accounts: NBC-TV will cancel one regularly-scheduled commercial program per month in prime evening time starting this fall in order to present series of hour-long filmed public affairs programs depicting outstanding events of recent history. Network says new series, to be presented monthly at irregular times, is open to commercial sponsorship, but will go on sustaining if necessary. Cost of each show is estimated at about \$125,000. First will be *Nightmare in Red*, depicting rise of Communism, tentatively scheduled Thu. Nov. 3, 8-9 p.m. Other films include *Rise and Fall of a Dictator*, story of Adolf Hitler; *The Jazz Age*, covering period from end of World War I to Wall St. crash in 1929; *Rebirth of Freedom*, story about Austria pegged to reopening of Vienna State Opera in Nov.; repeat of prize-winning *Three, Two, One—Zero*, documentary on atomic energy. Henry Salomon, who produced *Victory at Sea*, heads project . . . General Motors buys Tue. 10:30-11 p.m. time period on CBS-TV relinquished by Alcoa, for undisclosed program, thru Kudner . . . Procter & Gamble to sponsor *It's Always Jan* on CBS-TV starting Sept. 10, Sat. 9:30-10 p.m., thru Compton Adv. . . General Foods (Post cereals) to sponsor *Fury*, new TPA film series derived from classic "Black Beauty," on NBC-TV starting Oct. 15, Sat. 11-11:30 a.m., thru Benton & Bowles . . . Chesterfields to sponsor TV version of its CBS Radio series, *Gunsmoke*, on CBS-TV starting Sept. 10, Sat. 10-10:30 p.m., thru Cunningham & Walsh . . . Revlon to sponsor its highly-popular *\$64,000 Question* on CBS Radio as well, simulcasts to start in fall . . . General Mills to sponsor *Tales of the Texas Rangers* on CBS-TV starting Sept. 3, Sat. 11:30-noon, thru Tatham-Laird, Chicago . . . Old Golds to sponsor *Truth or Consequences* on NBC-TV starting Aug. 16, Tue. 10-10:30 p.m., moving to Fri. 8-8:30 p.m. starting Sept. 30, thru Lennen & Newell . . . Swift & Co. to sponsor *White Mane* as replacement for *Horace Heidt Show* on NBC-TV starting in fall, Sat. 7:30-8 p.m., thru J. Walter Thompson . . . S.O.S. Cleanser & Mattel Inc. (toys) to share Wed. 5:30-5:45 p.m. segment weekly on *Mickey Mouse Club* on ABC-TV starting in fall, Mon.-thru-Fri. 5-6 p.m., thru McCann-Erickson . . . Chrysler buys half of Canadian football schedule on CBC-TV this fall, thru BBDO . . . Arlene Francis to conduct new interview program, *The World at Home*, on NBC-TV starting Aug. 22, Mon.-thru-Fri. 10:45-11 a.m., immediately preceding her *Home* show.

NBC-TV released results of survey, conducted for it by Psychological Corp., showing that housewives ranked Arlene Francis' *Home* (Mon.-thru-Fri. 11 a.m.-noon) second only to the magazine *Better Homes & Gardens* as a source of homemaking information. Nationwide study of 5000 women, titled "Home on the Brain," showed they ranked information sources in this order: *Better Homes & Gardens*, *Home*, *Good Housekeeping*, *Ladies' Home Journal*, *McCall's*, *Woman's Home Companion*, *American Home*, *Arthur Godfrey Time* (CBS-TV), *The Big Payoff* (NBC-TV), *Woman's Day*. NBC research & planning director Hugh M. Beville Jr. said results were especially gratifying as *Home* had been on air less than year when survey was conducted in Feb.

WDSM-TV, Duluth-Superior (Ch. 6), controlled by Ridder publishing interests, who also control WCCO-TV, Minneapolis (Ch. 4), will switch basic affiliation from CBS to NBC "in the near future," according to Harry Bannister, NBC station relations v.p. Present NBC affiliate, KDAL-TV (Ch. 3), will join CBS. WDSM-TV contract with CBS-TV runs to Jan. 31, 1956. Minneapolis station presumably remains with CBS, which once owned 47% interest that was purchased last year for \$3,950,000 by Cowles' Minneapolis Star & Tribune Co. (Vol. 10:45).

Telecasting Notes: Movie majors' entry into TV drew bitter blast this week from chairman Frederick W. Ziv of leading TV film producer-syndicator Ziv Television Programs Inc.—in marked contrast to the “sweetness & light” with which other TV film outfits have “welcomed” the movie moguls into TV. “The production of TV film,” said Ziv, “can only be a by-product activity of these great theatrical motion picture producers—by-product loaded with free advertising for their movies at the expense of sponsors and TV stations” . . . “Who are these men,” asked Ziv, “who now talk of embracing this exciting new medium which has already learned to make most effective use of their basic product—film—without their help? They are the men who a few short years ago were consumed with fear and confusion as they sought to meet the competitive challenge when TV's home audience impact began to be felt at their theatre boxoffices. What new ideas emerged from their crisis? Meet the decreasing boxoffice grosses with lower and lower budgets. Depreciate quality to get costs down. Reduce staff” . . . Movie industry's recovery, Ziv said, came only with the realization that top quality product was the answer, using “budgets running into the millions; with boxoffice star names, writers and directors. Yet these are not the stars, writers and directors they plan to use in their TV programs. These people must be reserved for feature picture production” . . . Ziv will spend \$650,000 this year for advertising, promotion, research & merchandising, 37% increase over last year . . . Network interest in feature films (Vol. 11:32) intensified by availability of General Teleradio's RKO backlog; all 3 networks reported bidding for some of the oldies. Teleradio says its first RKO features will be released to TV “within the next few months” . . . Out to acquire still more films, General Teleradio is negotiating for huge library of J. Arthur Rank's British short subjects, including 30-40 color cartoons . . . “Million Peso Movie”: Teleradio's 26-film Bank of America package now in foreign syndication—Goar Mestre's CMQ, Havana, acquiring rights for Cuba

Television Bureau of Advertising hit back this week at claims of Hearst Advertising Service that 174 advertisers have dropped out of network TV since 1953. Gordon A. Hellman, TvB station relations director, commented to us that as long as the grand total of network advertisers showed increase each year, TV industry would stand on its record. Quoting PIB figures, he said network TV had 52 advertisers in first quarter of 1949, 102 in first quarter of 1950, 169 in 1951, 177 in 1952, 168 in 1953, 214 in 1954 & 236 in first quarter of 1955. The Hearst compilation, as published with gleeful editorial comment in Aug. 6 *Editor & Publisher*, was accompanied by some biting comments from Hearst research director Frank LaRose, who said: “These advertisers tried TV to the tune of \$42,676,117 in time costs alone. A conservative estimate of 80% of time costs for talent and production would boost this investment to a whopping \$76,817,000—an investment which apparently was a faulty one, one without satisfactory return . . . We have shown in previous *TV Facts* bulletins [published by Hearst] that TV is not the perfect infallible medium; that it does not deliver a captive audience; and that many advertisers have tried TV and found it wanting . . . TV guarantees nothing per se. TV is possibly the most speculative medium in the advertising world.” Note: Hearst interests own WBAL-TV, Baltimore & WISN-TV, Milwaukee.

Prodigious volume: *Radio-Television Daily's* 188-p. “Shows” edition Aug. 10, listing some 1800 TV-radio program ideas with guide to producers-distributors. There's also symposium on TV programming by agency topkicks, a survey of telecasters ideas, with summaries of shows reported by various stations.

and Puerto Rico . . . First sale of ABC Film Syndication's 15 J. Arthur Rank films (Vol. 11:31) was to New York's WCBS-TV, which reportedly outbid WOR-TV & WPIX with offer of \$100,000 for unlimited runs over 3 years, beginning in Nov. . . . **Ambitious TV film project:** Independent movie producer Joseph Kaufman has acquired world TV rights to 104 top French plays of all time from Societe des Auteurs et Compositeurs Dramatiques, says he'll produce at least 26 color film shows per year, 60 & 90-min. in length, shooting in Paris, New York & Hollywood, first group to be ready for distribution by winter. He plans to produce all 104 in 4 years . . . Eddie Cantor seeking release from his contract with Ziv which provides for 39 more half-hour films besides 39 already completed; though he owns 50% of his Ziv TV & radio shows, he says the activity is “just too much for me” . . . “The announcer, once thought of as the lowest of the low in broadcasting,” writes Leon Morse in Aug. 13 *Billboard*, “has risen to a position of eminence and financial security in TV second only to the top stars. In most cases, top video announcers make more money than most of the men who employ them”; “the class group” among announcers grosses \$150,000-\$200,000 a year, and “the day is not far away when they will be earning \$250,000 each year.” In top category are Rex Marshall, Nelson Case, Bob Dixon, Ed Herlihy, Dick Stark. Betty Furness' income from her Westinghouse shows is estimated at \$100,000 yearly . . . First spectacular to spawn a hit song may be NBC-TV's upcoming *The King & Mrs. Candle* Aug. 22; RCA released recordings considerably in advance of the show, and one song, *Young Ideas*, is getting heavy play by disc jockeys . . . Irving Mansfield, producer of *This Is Show Business* and *Jane Froman Show*, among others, has returned to CBS-TV as a producer . . . NBC Hollywood staff orchestra increased from 25 to 45, will be used on transcontinental shows for first time; new salary scale hikes musicians from \$145.48 to \$200.76 per 4-hour, 5-day work week, from \$145.48 to \$242 for 5-hour, 5-day week.

Network radio in transition: NBC topkicks are considering plan to adapt format of commercially successful weekend radio series *Monitor* to weekdays 10 a.m.-5 p.m. Decision won't be reached until fall, when it will be submitted to affiliates, but there's lots of sentiment for give-weekday radio the same commercial shot in arm that the segmented *Monitor*, with its partic. sponsors, gives weekend radio. Possibility is that a modification, with perhaps 2 hours a day of *Monitor*-type programs as a start, might be worked out by fall. Meanwhile, ABC Radio comes up with its own weekend radio service. Called *It's Time*, program will comprise 18 five-min. dramatic news programs each weekend, to be produced by *Time Magazine* & ABC Radio starting Aug. 20. ABC said “the new program will deal only rarely with top headline news but will often provide background anecdotes on major news stories and personalities.”

“Formula” for ending week-long strike by Screen Actors Guild against TV film producers (Vol. 11:32) was announced jointly Aug. 12 by SAG and employer groups, Assn. of Motion Picture Producers and Alliance of TV Film Producers. Terms of settlement weren't disclosed, pending approval by producers' boards and SAG membership, but it was generally agreed that producers had yielded to a certain extent to actors' demands for extra payments for each re-run of film, plus increase in salary minimums. About 200 producers were closed down by strike.

NBC pres. Sylvester L. (Pat) Weaver Jr. appears on *Home* Aug. 19 (11 a.m.-noon) to discuss fall program schedule, especially new dramatic series, *NBC Matinee Theatre*, Mon.-thru-Fri. 3-4 p.m. (formerly *Matinee*).

Personal Notes: Charles L. Glett, who quit as CBS v.p. to take charge of RKO studio operation after sale to General Teleradio, elected exec. v.p. of the producing company as well as board member under pres. Daniel T. O'Shea, who also resigned as CBS v.p. recently . . . Emanuel Sacks, RCA corporate v.p., and Albert S. Waters, v.p. & operations mgr., RCA International, left Sept. 11 on business tour of Europe . . . Glenn Marshall Jr., pres. and gen. mgr. of WMBR-TV & WMBR, Jacksonville, elected a director of Washington Post Co., parent company . . . Fred N. Dodge, ex-NBC merchandising director, opens own market consultant office, 115 Central Park West, N. Y. (Trafalgar 4-1907) . . . Albert G. Hartigan promoted to program mgr. of WPIX, N. Y. . . Arthur C. Schofield, Storer director of adv. & promotion, transferred from N. Y. office to Miami Beach headquarters; Mrs. Vonne Monsell, editor of *Storer Story*, house organ, also transferred to Miami Beach . . . George Diefenderfer Jr. has been named director of national sales service, WISH-TV & WISH, Indianapolis, and not sales mgr., as erroneously reported last week; Robert F. Ohleyer is stations' sales mgr. . . Morris Novik, consultant specializing in labor radio problems, elected pres. of radio WOV, N. Y., whose controlling interest he recently purchased from Richard O'Dea; Ralph N. Weil re-elected exec. v.p., Arnold Hartley program v.p. . . Larry Stevens resigns as local sales mgr., KGMB-TV, Honolulu, to open own ad agency at 835 Keeamoku St. . . Newell T. Schwin named sales development mgr., CBS Radio spot sales . . . Tom Myers promoted to program mgr., KPTV, Portland, Ore. . . Frank A. Tessin, ex-Headley-Reed, joins San Francisco office of rep Free & Peters . . . Clifford M. Kirtland Jr. named business mgr., WGR-TV & WGR, Buffalo . . . Roger D. Rice named Seattle mgr., Wm. Rambo Tacoma mgr. of KTVW, Tacoma . . . Tom P. Hawley, ex-CBS & WATV, Newark, named sales mgr. of Princeton Film Center Inc., headquartering in N. Y. . . Walter L. Dennis, ex-gen. mgr. of WJNO-TV, Palm Beach, named sales director of management consultants Telerad Inc., Pueblo, Colo. . . H. Quenton Cox, KQFM, Portland, Ore., named chairman of NARTB's FM committee, succeeding Ben Strouse, WWDC-FM, Washington . . . Jon E. Arden named merchandising director, WTVJ, Miami . . . Myron P. Kirk, TV-radio v.p., elected a senior v.p. of Kudner Agency . . . Dr. Gerhart D. Wiebe, CBS Radio research psychologist since 1946, named asst. to Frank Stanton, pres. of CBS Inc. . . Robt. Grebe, ex-MBS, named ABC trade news editor, succeeding Al Seton, now asst. mgr. of publicity . . . Stuart Novins relinquishes duties as CBS associate director of public affairs to become moderator of *Face the Nation* on TV and *The Leading Question* on radio.

Week's junket to England to see how *The Adventures of Robin Hood* series is produced has invitation list of 66 editors from as many newspapers in as many cities where the CBS-TV & CBC-TV show will be carried starting Sept. 19 under co-sponsorship of Wildroot (BBDO) and Johnson & Johnson (Young & Rubicam). They leave on chartered plane Aug. 30, headquartering at London's new American-owned Westbury Hotel. Sapphire Films Ltd. is shooting the series at Nettlefold Studios, Walton-on-Thames, with Official Films as U. S. distributor. Sapphire is controlled by Prince Litler, a principal in Incorporated TV Programs Co. Ltd., London.

George Frey, NBC-TV sales v.p. and one of the industry's top golfers, scored a 32 on back 9 of Greenbrier course during recent drug convention there, beating score of Sam Snead, who was in foursome just ahead and carded 33—on his own course. Frey's score for the 18 holes was 67.

George Angus Burns, 58, editor of CBC house organ *Radio* and an ex-CBC news editor, died in Ottawa Aug. 7.

SUCCESS of the Storer, Consolidated (Bitner) and Gross stock issues has led to organization of Dolph-Petty Broadcasting Co. as "a vehicle for acquisition of radio and TV stations and application of management in such a manner as to increase their value after which they may be sold or traded for other stations with greater potentials."

Public offering of stock & debentures is due shortly after Labor Day, through Cruttenden & Co. and Saunders, Stiver & Co. They will underwrite sale of \$300,000 in twelve-year 6% debentures together with 30,000 shares of 10¢ par common stock to be sold as units, each unit consisting of a \$1000 bond and 100 shares of common, to be sold at \$1000 per unit. After expenses and underwriting discounts, net proceeds to the company would be about \$266,000.

In addition, \$127,500 of 5½% preferred stock (\$100 par), 12,750 shares of common stock and \$19,125 cash will be exchanged for 42½% of the common stock of Pacific Frontier Bestg. Co., Honolulu, owner of KULA-TV (Ch. 4) and radio KULA. Also, 95,500 shares of Class B common will be sold for cash at 10¢ per share, of which 70,000 will go to directors William Dolph and Herbert Petty, 8500 shares each to the 2 underwriters, 8500 also to Reynolds & Co., which will also be represented on the board.

Besides acquiring the interest in the Honolulu stations, whose holding company is 40% owned by KJBS, San Francisco, in which Dolph & Petty have one-third interest, and 42% by American Broadcasting Stations Inc. (WMT-TV & WMT, Cedar Rapids, Ia.), of which Dolph is pres. and 29% stockholder), company also will acquire radio KMYR, Denver (250 watts, 1420 kc, holding CP for 5 kw, 710 kc) for which \$155,000 purchase contract has been signed.

Honolulu company's net worth was \$97,733 at end of 1954, earned profit of \$35,328 after taxes and depreciation in 1953; in April 1954 its TV station began operating, showing loss in first 6 months of \$41,111. In Jan. 1955 the TV lost \$16,000, but by May showed profit of \$1000 after depreciation at rate of \$5000 a month; Dolph & Petty, according to preliminary prospectus, believe the station can be expected to show a net profit of about \$100,000 a year after taxes "within a reasonable period of time." They also expect to sell KULA eventually.

KMYR would be operated as a "sweet music station" along lines of KJBS, San Francisco (average earnings: \$180,000 a year for last 10 years) with Alfred V. Crapsey, ex-KOA, Denver, recently with NBC, San Francisco, as mgr. KMYR lost \$11,374 in 1954, earned \$4409 in 1953, earned \$14,641 in 1952. With expenses of present ownership removed—amounting to \$32,000 in 1954, \$48,000 in 1953, \$41,000 in 1952—prospectus says these earnings can be built up to approximately \$100,000 per year before taxes or \$50,000 after taxes.

Dolph started in radio as mgr. of WOL, Washington, which was later swapped for WMT, Cedar Rapids; he developed the radio program *Double or Nothing*, has agented other programs, is still agent for Fulton Lewis Jr. Petty, his brother-in-law, was original secy. in 1934 of the Federal Communications Commission, later was radio director for MGM, managing its WHN, New York (now WMGM). In 1944, Dolph & Petty formed syndicate to buy KJBS; in 1941 they bought into WEMP, Milwaukee.

Executives Radio-TV Service, Larchmont, N. Y. (James M. Boerst) has published new edition of its semi-annual *Time Buyers Register*, listing more than 2000 of them and 6000 accounts.

FARM TV SET counts for Colorado and Minnesota were tabulated this week by Census Bureau as part of its Oct.-Nov. 1954 Census of Agriculture. Based on 20% sample, Minnesota was shown to have TVs on 55,045 of its 165,225 farms, or one-third. In Colorado, 11,101 of 40,749 farms—or slightly over 27%—are TV-equipped. Minnesota has stations in Minneapolis-St. Paul, Austin, Rochester & Duluth-Superior, also views out-of-state TV stations from Fargo, N. D., and Sioux, S. D. Colorado's stations are in Denver, Colorado Springs, Pueblo & Grand Junction, with Cheyenne, Wyo. also receivable across border.

Note: Previously published tabulations—Nev., N. H., Vt. (Vol. 11:28); Wyo. (Vol. 11:29); N. D. (Vol. 11:30); Ida., Utah (Vol. 11:31); Mont., S. D. (Vol. 11:32).

ORLANDO'S Ch. 9 should go to WORZ, over WLOF, examiner Basil P. Cooper recommended in week's sole initial decision. He found that WORZ had better local ownership-management integration, superior broadcast history, more adequate technical facilities. In addition, he held that principals of WLOF sought to deceive FCC in connection with a letter calling Commission's attention to disbarment proceedings against onetime WORZ principal Wm. O. Murrell Sr.

Favored applicant is controlled by Naomi Murrell, her son, daughter & son-in-law. WLOF is controlled by Joseph L. Brechner and John W. Kluge, principals of WGAY, Silver Spring, Md. Kluge is also majority owner of AMs KXLW, Clayton, Mo.; WILY, Pittsburgh; WKDA, Nashville. He's selling WTRX, Bellaire, O.

Seeking to forestall shutting down WVET-TV & WHEC-TV, Rochester, N. Y., FCC asked Court of Appeals for "stay of mandate" pending consideration of appeal to Supreme Court. Court of Appeals decision on protest of WSAY, Rochester (Vol. 11:31) forces FCC to take stations off air unless court grants stay.

In allocations, WLBE, Leesburg, Fla. asks shift of Ch. 7 from Jacksonville, while Video Independent Theatres, Oklahoma City, seeks to get Ch. 8 moved from Woodward to Elk City, Okla., substituting Ch. 35 for it.

Also related to allocations, Richmond's WTVR asked FCC to issue cease-&-desist order to stop WXEX-TV, Petersburg, from identifying itself primarily with Richmond.

Power hikes for 18 stations in Zone I, permitted by new rules effective Aug. 31 (Vol. 11:30), will take varying degrees of time to accomplish. Some involve only a few kw, will require little more than twist of knobs after FCC approval. Others may require new transmitters and/or antennas. Consulting engineer Dr. Frank Kear, coordinating New York's 7 stations for Empire State Bldg. management, estimates it will take up to 2 years for some to achieve increases. CBS & NBC have additional problems because their purchases of WGTH-TV, Hartford (Ch. 18) and WKNB-TV, New Britain (Ch. 30), respectively, are already being challenged because of alleged overlap with N. Y. stations. Some stations aren't in any hurry to increase power, feeling that additional coverage is insufficient to warrant equipment expenditures.

Arguing community antennas vs. boosters, Jerrold pres. Milton Shapp wrote Senate Commerce Committee Chairman Magnuson (D-Wash.) and FCC Chairman McConaughy, comparing the 2 methods. Magnuson has been pressuring FCC to legalize clandestine boosters still operating in Washington and neighboring states (Vol. 11:24). CATV systems, Shapp said, offer superior pictures, choice of programs, present no interference problems. Some \$4,000,000 is invested in CATV in Northwest, he stated. He added that booster operators are seeking to mislead Commission as to cost of boosters; they run \$5-\$25,000 per channel, he said, as against \$1000 claimed by booster proponents.

Very low-powered vhf co-channel boosters are sufficient to serve small towns, KXLV-TV, Butte, Mont. (Ch. 6) told FCC this week. Reporting results of experiments in Anaconda, owner E. B. Craney stated that booster is "adequate to re-direct and boost a fully usable TV signal from a favorable location to an entire town the size of Anaconda, i.e., 12,000 population, located in an unfavorable location." Equipment used: two T372 transformers, one Jerrold 401A-6 pre-amplifier with 404P remote power supply, one Ampli-Vision AGC 300-6 amplifier with regulated power supply, 250 ft. of RG57U cable.

Licensed TV sets in Britain increased 52,505 in June to total of 4,676,422.

FT. WORTH & RICHMOND areas got their second vhf stations this week, and vhf satellite began testing in Scottsbluff, Neb.—bringing to 441 the on-air total, 106 of them uhf. New Petersburg-Richmond outlet becomes basic NBC; one in Ft. Worth will be independent.

WXEX-TV (Ch. 8), authorized for Petersburg, Va., but with offices in nearby Richmond, started test patterns at midnight Aug. 11, goes on full schedule with NBC interconnection Aug. 15. It has 50-kw RCA transmitter, 978-ft. Stainless tower at site about 12 mi. south of Richmond. President is Tom Tinsley Jr., who operates radios WLEE, Richmond & WITH, Baltimore, holding CP for WITH-TV (Ch. 72). Irving Abeloff, from WLEE, is v.p., managing director & national sales mgr.; George Oliviere, ex-WTAR-TV, Norfolk, local sales mgr.; Charles E. Seward, ex-WBTW, Charlotte, operations mgr.; James L. Dodd Jr., ex-WLWA, Atlanta, program director; John Costello, ex-DuMont, NBC & WPIX, chief engineer. Base rate is \$750. Rep is Forjoe.

New Ft. Worth station is KFJZ-TV (Ch. 11), which started testing Aug. 9, goes on commercial schedule Sept. 11. According to v.p.-gen. mgr. Charles B. Jordan, \$750,000 in local business is already on the books and \$1,000,000 expected by commercial target date. Veteran broadcaster Jordan, ex-aide to grantee Texas State Network's pres. Gene L. Cagle, has been succeeded at TSN by Stan H. Wilson, will devote full time to TV.

KFJZ-TV uses 20-kw GE transmitter with 12-bay antenna on 1074-ft. tower, is radiating 210-kw ERP. Executive staff comprises Dale Drake, from radio KFJZ, national sales mgr.; John Hopkins, also ex-KFJZ, commercial mgr.; Buck Long, ex-KFDA-TV, Amarillo, onetime WFAA-TV, Dallas, program & operations mgr.; Joseph B. Haigh, chief engineer. Base rate is \$600. Rep is H-R Television Inc. Same interests (noted oilman Sid W. Richardson is 62% owner of TSN) also operate KFDA-TV, Amarillo (Ch. 10) and have various radio station interests.

Third newcomer is long-delayed KSTF, Scottsbluff, Neb. (Ch. 10) which ends current test patterns with programming starting Aug. 21 as satellite of KFBC-TV, Cheyenne, Wyo. (Ch. 5). It has 2-kw RCA transmitter, 6-bay antenna on 120-ft. tower on Abrupt Peak, 10 mi. north of Scottsbluff, 79 mi. northeast of Cheyenne. It's second such satellite to get under way, first having been KEPR-TV, Pasco, Wash. (Ch. 19), operated in conjunction with KIMA-TV, Yakima (Ch. 29). KSTF & KFBC-TV will be sold in combination at \$150 rate. Rep for both is Hollingbery.

Equipment shipments: From RCA—25-kw transmitter Aug. 10 to KARD-TV, Wichita (Ch. 3), due on air Aug. 25; 10-kw Aug. 11 to KONA, Honolulu, due to shift to Ch. 2 from Ch. 11; 1-kw Aug. 6 to WCOV-TV, Montgomery, Ala. (Ch. 20) to replace equipment damaged by fire last week (Vol. 11:32). From GE—5-bay antenna to WCTV, Thomasville, Ga. (Ch. 6), with Sept. 1 target. From DuMont—50-kw amplifier to KDUB-TV, Lubbock, Tex. (Ch. 13). DuMont reports order from WITI-TV, Milwaukee (Ch. 6), due on air next winter, for 25-kw transmitter, 6-bay antenna, studio terminal and complete color equipment, for delivery by Sept. 1; also, order from WTVD, Durham, N. C. (Ch. 11) for 50-kw amplifier, delivery by Aug. 15.

WNAO-TV, Raleigh, N. C. (Ch. 28) now completing new large modern TV-radio center at 2128 Western Blvd., which includes studio seating nearly 1000. It plans to install live color equipment late this fall.

In our continuing survey of upcoming stations, these are latest reports from principals:

WAGE-TV, Marquette, Mich. (Ch. 6) is aiming for Dec. 1 start, reports new owner Frank J. Russell, publisher of *Marquette Mining Journal* (WDMJ), which recently acquired CP for \$20,000 from Jerome Sill & Herbert R. Herzberg (Vol. 11:31). RCA equipment has been ordered for delivery in 90 days. Microwave connection with WBAY-TV, Green Bay, Wis. CBS affiliate, is proposed—stations to be sold in combination, but WAGE-TV won't be a satellite, according to Russell. Bids are now out for buildings, including microwave houses. Rep will be Weed.

WITI-TV, Glendale, Wis. (Ch. 6), planned as Milwaukee area outlet, hopes to be on air by next Feb. 1, reports pres. Jack Kahn. DuMont transmitter and 963-ft. Kimco tower have been ordered. Architects are now working on building plans and bids will be asked in about two weeks. Soren Munkhof, ex-WISN-TV, Milwaukee, WREX-TV, Rockford, Ill. & WOW-TV, Omaha, has been named gen. mgr., with Milwaukee engineering consultant Daniel Gellerup as chief engineer. H-R Television will be rep.

WITN, Washington, N. C. (Ch. 7) had 350-ft. of 821-ft. Stainless tower built when hurricane Connie stopped work, reports pres.-gen. mgr. W. R. Roberson Jr. However, construction is far enough along so that station plans Sept. 1 test patterns, expects to meet Sept. 26 target for NBC affiliation. Nearest other TV is WNCT, Greenville (Ch. 9), 18-mi. away, other outlets are 90 or more mi. Transmitter house near Grifton is ready for 20-kw GE unit due next week and Alford 100-ft. antenna also is en route. This week, Roberson family filed application to take over control (see below). WITN ownership interlocks with local radio WRRF and WELS, Kinston, N. C. T. H. Patterson, WRRF gen. mgr., is being promoted to commercial mgr. of WITN; radio's chief engineer, L. E. Hiland will be WITN chief engineer; Hal Wilson, production mgr. Base hour will be \$325. Rep will be Headley-Reed.

KRBB, El Dorado, Ark. (Ch. 10) plans fall start, having signed NBC affiliation, reports 1/3 owner-gen. mgr. Wm. M. Bigley. It has transmitter house ready for installation of 5-kw RCA unit purchased from Terre Haute's WTHI-TV (Ch. 10), already has installed 6-bay RCA antenna on 600-ft. Skyline tower, 5 mi. south of town. KRBB owners control radio KVMA, Magnolia, Ark., have appointed Carroll Blewster chief engineer for TV. El Dorado is near southern border, over 100 mi. from Little Rock, nearest TV stations being KNOE-TV, Monroe, La. (Ch. 8), 59-mi., and KSLA, Shreveport (Ch. 12), 81 mi. Base hour will be \$200. Rep will be Pearson.

Control of upcoming WITN, Washington, N. C. (Ch. 7), due in Sept., is being acquired by W. R. Roberson family through purchase of 12,184 shares held by W. H. Anderson and R. M. Fountain (25.38% each). Each is being paid \$60,920 plus \$5,000 for expenses. Anderson controls WVOT, Wilson, N. C., has 20% of WGTC, Greenville. Fountain owns 37% of WCPS, Tarboro, N. C. After sale is approved, W. R. Roberson Sr. will hold 11.72%; W. R. Roberson Jr., 17.45%; J. P. Roberson, 15.84%; Hannah R. Bagwell (daughter), 15.84%—to bring family holdings to 67.82%, when minority interests by other family members are included. Also increasing holdings (from 17% to 25.31%) is Wm. S. Page (not related), who also controls radio WELS, Kinston, N. C.

Slowly catching up, Govt. Printing Office now offers Vol. 13 of FCC Reports covering Commission decisions and reports July 1, 1948-June 30, 1949. It's 1329-p., costs \$4.25. Vol. 12 came out Feb. 1951.

JULY'S OOMPH ACCELERATES INTO AUGUST: Though it's been characterized as a "deal" market, in which liquidations and close-out sales abound, current TV unit sales pace is astonishingly high. Official Aug. sales data is not yet available, but almost all manufacturers report a sales upbeat continuing into this month which indicates that fall buying by consumers has already begun in earnest.

July was an extremely good month in unit sales, perhaps best July in TV's history. Preliminary reports indicate the amazing total of about 400,000 TVs sold at retail in a month which normally sees retail sales at their lowest point. That means retail sales were at a going rate of 7,500,000 a year, adjusted for seasonal differences. Last year's 7,300,000 retail sales set a record.

Sharp production cutbacks accompanied high retail sales, largely as result of plant shutdowns. TV output was estimated at mere 335,000, lowest of year, and happy result was that excessive inventories were worked off smoothly. As of Aug. 1, inventories were down to 2,400,000 at all levels, characterized by one trade expert as "higher than a year ago but not too high in proportion to going rate of sales."

* * * *

Emerson and Trav-Ler raised TV prices by \$10 this week, joining Admiral in announcing increases -- and there seems little doubt now there will be industry-wide price hikes by fall. Increased costs appear to make it imperative for manufacturers to raise prices, though competitive factors might make it difficult in some cases.

"Metal components, especially those made of copper and steel, have increased as much as 10% to 20% in recent days," explained Emerson's Benj. Abrams. And this week American Metal Co. Ltd. raised price of selenium to domestic consumers from \$7 to \$10 per pound as result of higher prices being paid overseas, as well as because of stronger demand here and in Europe. The shortage of selenium rectifiers is already starting to pinch many TV manufacturers (Vol. 11:31-32).

Prospect of early end to copper strike, which has contributed greatly to the rise in cost of components, brightened with agreement Aug. 12 between Kennecott Copper Corp., one of the biggest producers, and 8 unions. The Kennecott strike alone was estimated to have cut off about 130,000,000 lbs., or one-third of the domestic copper supply, since strike began July 1.

Brief highlights of other major trade developments this week:

* * * *

Regional TV Lines? Idea of designing some TV sets for exclusive marketing in certain geographic areas is beginning to catch on. Motorola, Capehart-Farnsworth & Westinghouse have announced they're now designing and marketing special "California-style" TV sets exclusively on west coast. RCA and Admiral spokesmen say they do not plan to do so in foreseeable future; former says "we have a TV line with universal appeal," latter says Admiral had a few "California-style" models on market 2 years ago but didn't make much impression. Philco has a light-furniture line which can be adapted to any geographic area, said spokesman. The California models have cabinets designed on west coast in motif peculiar to local tastes. Westinghouse's Dan Halpin says company probably will have some "Texas-style" sets to meet demand in southwest area for local designs at some future date.

Labor: It now appears that there's no threat of guaranteed annual wage in TV industry for at least 3 years -- result of GE's settlement with IUE this week on a 5-year contract. Pact calls for average 3% wage increase, omits mention of guaranteed wage for 80-100,000 workers at GE's far flung plants. Contract cannot be re-opened for guaranteed wage talks until 1958. Since union has regarded GE as entering wedge for guaranteed wage in electronics industry, it's highly improbable it will launch another concerted drive for the clause until 1958. Meanwhile, an ad

placed by union this week in Retailing Daily, prior to signing of agreement, stirred considerable comment. It showed picture of an appliance deliveryman taking TV set away from disconsolate family with headline: "No More Howdy Doody for Johnny," -- explaining "This TV set got laid off because his dad doesn't have guaranteed employment." According to IUE pres. James B. Carey, ad was one of series intended to show that guaranteed wage would be "good for the workers, good for the company and good for the community, including thousands of appliance dealers."

Profit Picture: Wall Street Journal reports, as typical of American industry, that 4 selected TV-radio companies showed 19% increase in profits in second quarter over same period year ago, with 10 electrical equipment manufacturing concerns up an average 8.1%. First National City Bank of N.Y. reports profits of 24 electrical equipment makers, including TV-radio, dropped average 1% in first half from same 1954 period, despite a 5% increase in second quarter. National Credit Office Inc. reports first-quarter profit of TV-radio-electronics manufacturers up average 21% over first 3 months year ago, with sales up average 4%.

Whirlpool Merger: Though it's contrary to Justice Dept. policy to comment on such matters, anti-trust chief Judge Stanley N. Barnes explained this week, in reply to query by wire services, why he approved projected merger of Whirlpool and Seeger into a single corporation to be owned about 20% each by RCA and Sears (Vol. 11:29-30). He said an extensive study proved that the transaction would have no major impact on competitors in the markets involved. He said Dept. considered, but rejected, prospect that new corporation "might develop into something like the duPont and General Motors combine in the white goods line." RCA gave assurances, he said, that it would not use its position to supply Sears with TV-radio-phonos. He concluded: "We found the RCA stove line is in poor health and that both companies [RCA & Sears] are comparatively small in this field. The move will have little impact on the 11 other major producers who certainly are strong and healthy enough to buck the competition." He said there are 1648 distributors handling white goods lines and 2250 handling either white goods or TV products.

Installment Credit: Too much or too little? There's a poser that divides govt. experts down the middle. Federal Reserve Board conferred with representatives of sales finance companies and banks on rise of consumer credit, amid recurring reports that govt. planned new restrictions. One report, authoritative but lacking confirmation, had President Eisenhower indicating he may ask Congress for new credit controls next Jan. or earlier if a special session is called. Meanwhile, General Motors Acceptance Corp., world's largest auto finance company, urged GM dealers to tighten up on "easy credit" for car buyers. On the other side of coin, another big credit firm, C.I.T. Credit Corp., said level of installment credit isn't too high, added: "American consumers have illustrated by their outstanding record of payment on installment obligations that they are excellent credit managers and make a major contribution to our vigorous economy."

Production: TV output totaled 134,959 week ended Aug. 5, compared to 113,864 preceding week & 90,072 week ended July 22. It was year's 31st week and brought TV output for year to date to about 4,385,000 vs. 3,350,000 in same 1954 period. Radio production totaled 209,689 (86,356 auto) week ended Aug. 5, compared to 203,343 in preceding week and 224,866 week before. For 31 weeks, radio production was placed at 8,000,000 vs. 6,000,000 in corresponding period year ago.

Retail Sales: RETMA report stated, as expected, that retail TV sales in first 6 months set all-time record for period at 3,202,995, compared to 2,410,893 sold in first half of 1954. Retail sales of radios, excluding auto sets, were 2,429,018, compared to 2,410,893 sold in first half of 1954.

Philco launched campaign to smash what it calls "the multi-million dollar racket in TV and radio tubes," by which "worn-out and discarded receiving tubes are being resold by unscrupulous concerns to the public, servicemen and dealers at tremendous profits." Racket is estimated to cost TV-radio users \$100,000,000 annually.

Company is offering, through its distributors, a 5¢ credit to all technicians & servicemen for each old tube turned in, and said "the old tube will be smashed in the presence of the serviceman." It said industry-wide adoption of its program would keep up to 30,000,000 old tubes a year out of the hands of racketeers.

Trade Personals: Louis Martin, ex-Standard Coil & RCA, named gen. sales mgr., Westinghouse tube div., Elmira, N. Y. . . Raymond McClintock, from Waltham headquarters, named sales mgr. of Sylvania's microwave tube lab, Mountain View, Cal. . . Edward C. Madden named Admiral director of traffic, succeeding Wm. C. Curtis, resigned; he's replaced as traffic mgr. by Thomas A. Gaudette . . . Wm. F. Hafstrom, ex-GE light military electronic equipment dept., appointed asst. to Sid Curtis, Stromberg Carlson v.p. for govt. contracts . . . Howard L. Foote named staff asst. to A. H. Bergeson, Stromberg-Carlson engineering v.p. . . Charles Robbins, ex-pres. of Emerson Chicago factory branch, named v.p. of Sonora Radio & TV Corp., Chicago, currently setting up distributor sales program . . . Ernest Kohler, ex-chief commercial engineer for GE's Ken-Rad div., ex-sales mgr. of Raytheon tube div., recently Washington rep. for Hallicrafters, now operating own sales & engineering service in Cleveland, has opened additional office at 40 Greenhouse Dr., Dayton, O., where he will headquarter . . . Donald W. Tait, ex-Raytheon, joins Bendix Aviation as supervisor of adv. & public relations for Pacific div. . . Burley T. Cram promoted to Sylvania west coast distribution service mgr., Los Angeles . . . P. Newton Cook promoted to gen. sales mgr., Chicago Standard Transformer Corp., subsidiary of Essex Wire Corp. . . Maxwell H. Sroge promoted to director of district mgr. sales, Bell & Howell (phonos), succeeding A. H. Bolt, now asst. to v.p. for western operations; Robert D. Lipson named sales promotion mgr. . . Eugene B. Lucas, ex-Jewel Radio, named eastern regional sales mgr., Wilcox-Gay Corp. & its Majestic International subsidiary . . . Noel K. Mackay, from N. Y. office, named gen. mgr. of new Webcor (Great Britain) Ltd. . . Walter J. Fitzpatrick, ex-GE, named mgr. of CBS-Hytron's So. Cal. sales district, Los Angeles; Albert J. Hatcher named tube plant mgr. at Kalamazoo, replacing Leonard A. Freeman, resigned.

* * * *

DISTRIBUTOR NOTES: Admiral appoints Southern Bearings & Parts Co. Inc., 500 N. College Ave., Charlotte (Fred N. Hall Jr., mgr.), replacing Major Appliance Distributors Inc. . . Raytheon appoints Birch Distributing Co., Columbus, O. . . Olympic Radio establishes factory branch, Olympic Television of Northern California Inc., 715 Bryant St., San Francisco (Dore Schwab Jr., gen. mgr.) . . . Philco Distributors Inc., N. Y., promotes Wallace Meyer to TV-radio sales mgr., assisted by Leonard Kanter; Irving Small promoted to major appliances sales mgr.—both reporting to gen. sales mgr. Robert Kelly . . . Admiral Denver factory branch appoints Harris Hesketh, from Los Angeles branch, as gen. mgr., succeeding Carl Lantz, now asst. to Clarence Tay, gen. mgr. of all branches; Admiral Distributors, Boston, names John R. Hodgens, from Albany branch, as gen. sales mgr.—his brother, Thomas J. Hodgens, takes extended leave of absence as gen. mgr. . . American Elite Inc., N. Y., agent for German Telefunken radios in U. S., appoints Thurow Distributors, Tampa; Mutual Distributors Inc., Boston; Gem Electronics Distributors Inc., Hicksville, L. I. . . Dorn's Inc., big 13-store Los Angeles TV-appliance chain, promotes merchandise mgr. Jack Pokard to v.p.

Recommended Reading: *Retailing Daily's* 4-article series this week on multifarious problems of distributors, based on 11-city survey.

David Kaye, 40, ex-Kaye-Halbert v.p., died Aug. 7 of heart attack. He is survived by his widow, son & 3 brothers: Harry, pres. of Kaye-Halbert; Ted, v.p. of Kaye-Halbert; Herman, ex-pres. of Caltech Electronics.

Julien M. Tuteur, 29, sales mgr. of Canadian Westinghouse TV-radio div., was killed Aug. 7 when his auto was struck by train at a crossing near Guelph, Ont.

Topics & Trends of TV Trade: Westinghouse sold more than 1000 TVs this week to new Hilton-Statler Hotel, opening in Dallas in Oct., in big single hotel-installation deal, amounting to more than \$200,000. Negotiated by gen. sales mgr. Dan D. Halpin, transaction is further evidence of the mushrooming market for TVs among nation's hotels and motels on which we reported fully last week (Vol. 11:32).

Of the sets sold, 802 are 21-in. table models in "Statler walnut," equipped with swivel base and called "Marseilles" model; 167 are 17-in. table models in custom-colored black, with gold trim, also on swivel base, called "Beverly"; 27 are 21-in. open-face consoles, in "Statler walnut," called "Turin"; 14 de luxe 21-in. 3-way combinations in white birch and other "antique" finishes.

All sets have Westinghouse's "Tip Top Front Tuning" and "Silver Safeguard Deep-Etched Printed Circuit" and are equipped with special silver nameplate in center bearing legend "Hilton-Statler." The Westinghouse label is printed, as usual, on lower part of mask. Seven trailers will transport the sets from Metuchen, N. J. plant to Dallas.

For Halpin, deal brings to about 6000 the number of sets he's sold to hotels, starting with 18 RCA receivers in 1946 to New York's Hotel Pennsylvania (now Statler). Subsequently he sold 3800 DuMont sets to Statler chain.

* * * *

Picture tube sales in first 6 months totaled 4,914,024, valued at \$94,893,559, compared to 3,957,238 worth \$82,985,981 in first half of 1954, reports RETMA. June sales were 706,890 worth \$13,244,499, compared to 779,329 at \$14,572,518 in May and 681,937 at \$13,933,845 in June 1954. Receiving tube sales in first 6 months totaled 226,502,544, valued at \$168,675,903, compared to 165,709,060 worth \$120,720,391 in first half of 1954. June sales were 40,819,961 at \$31,254,324 vs. 32,920,310 at \$25,914,821 in May and 31,031,315 at \$21,694,500 in June 1954.

Trade Promotions: Motorola to launch multi-million dollar campaign this fall in all media, starting with 4-p. spread in *Life Magazine*, thru Leo Burnett; Admiral starts ad drive in late Aug. to back reduction on 24-in. table model from \$240 to \$200 and "king-size" trade-in allowance on 24-in. console; DuMont ties up with Gimbels, N. Y. dept. store, in 2-week display of new line starting Aug. 15, coinciding with N. Y. Summer Festival, in which complete color studio will be set up (see p. 13).

Federal Trade Commission this week ordered Recoton Corp., Long Island City, to stop representing itself in ads as the world's largest manufacturer of phonograph needles or that its needles have sapphire, ruby or other jewel tips without stating they are synthetic. Company agreed to order, without admitting or denying guilt.

Prices of Crosley's new line, introduced last week (Vol. 11:32): Super V, 17-in. tables, \$130 & \$160; Advance V, 17-in. tables \$150 & \$210, 21-in. tables \$170 & \$180; Custom V, 21-in. tables \$200, \$210, \$215 & \$225, 21-in. consoles \$250, \$260 & \$290, 21-in. combinations \$360 & \$370. Optional uhf tuners are \$20 extra.

CBS-Columbia to introduce new line at series of regional distributor meetings starting Aug. 18 at Essex House, N. Y. Other meetings are scheduled Aug. 22 at Chicago's Drake Hotel, Aug. 24 at New Orleans' Hotel Roosevelt, Aug. 29 at Los Angeles' Ambassador Hotel.

Senate Judiciary subcommittee, headed by Sen. Kilgore (D-W. Va.), will start hearings Aug. 23 on distribution practices in various industries, including probe of discount house operations. It's uncertain whether, or to what extent, TV will be directly involved.

International Resistance Co. to open branch plant, its 5th, at Burlington, Ia. about Dec. 1 for resistor output.

Financial & Trade Notes: CBS Inc. revenues in first 6 months of 1955 soared to record \$202,173,713, its consolidated net profits to \$6,327,672, or 87¢ per share based on average shares outstanding during the period, adjusted to reflect 3-for-1 stock splitup of April 1955. Profit went up 22% from the \$5,177,449 (74¢) on revenues of \$176,016,777 for first half of 1954. There were 7,339,123 shares outstanding as of last July 2 and 2,340,904 a year earlier. Most of first half's profit was recorded in first quarter, when it amounted to \$3,892,677 (53¢) vs. \$2,866,365 (41¢) in first quarter 1954. For whole of 1954, CBS Inc.'s gross was \$373,290,731, net \$11,414,645 (\$4.85 per share, before splitup) vs. \$313,908,771 & \$8,894,642 (\$3.80) in 1953.

Raytheon reports new record for year ending May 31 with sales of \$182,305,000 & earnings of \$4,532,000 (\$1.72 a share on 2,628,781 shares) vs. \$177,100,000 & \$3,523,000 (\$1.53 on 2,176,942 shares) in fiscal 1954. Total current assets are \$68,717,754, about \$12,000,000 below last year; total current liabilities \$36,185,243, \$14,000,000 under 1954; net working capital \$32,533,000, up \$2,000,000. V-Loan obligations are down to \$10,000,000 from \$20,000,000; backlog of unfilled govt. orders down to \$96,000,000 from \$150,000,000. All preferred stock has been retired and company declared 5% stock dividend last July 7 in lieu of cash (Vol. 11:29). Proxy statement calling for stockholders meeting Sept. 15 shows that Adams holds 12,800 shares, received \$75,650 remuneration for year; v.p. David Schultz (8354 shares) drew \$55,650; v.p. Percy Spencer drew \$45,000. All directors were renominated.

Admiral sales were \$94,018,923 and earnings \$1,946,192 (82¢ a share) for the first half of 1955 vs. \$105,201,498 & \$2,558,850 (\$1.08) for same 1954 period. Second quarter earnings were \$708,016 (30¢) on sales of \$43,984,527 vs. \$1,054,806 (45¢) & \$49,223,936. John B. Huarisa, exec. v.p., stated that a 66% drop in govt. billing in the first 6 months more than offset higher civilian business. "The movement of TV receivers to dealers was 21% higher in first 6 months than last year," he said. Outlook for the 2nd half is brighter, but any additional govt. restriction on credit might change the picture, he added.

Sears, Roebuck & Co., like RCA a 20% owner of projected new Whirlpool-Seeger Corp. (Vol. 11:29-30), owned 536,756 shares of Whirlpool Corp. as of July 1—158,956 directly, 108,800 thru Sears' Allstate Insurance Co., 269,000 thru Sears-Roebuck Foundation, according to SEC's July summary of security transactions & holdings. In June, Allstate sold 1200 Whirlpool, Sears-Roebuck Foundation sold 1000.

Stewart-Warner Co. electronics div. sales in first half of 1955 were 29% ahead of same 1954 period despite discontinuance of TV-radio business, and company may double its net income this year (to \$4-\$4.50 per share) over 1954, according to study by Glore, Forgan & Co.

Texas Instruments reports profits for first half 1955 of \$696,010 (22¢ a share) on sales of \$12,991,191 vs. \$591,596 (20¢) & \$11,616,810 for same 1954 period. Second quarter profits were \$305,934 (9¢) & sales \$6,680,331 vs. \$220,766 (7¢) & \$4,891,806.

Sparks-Withington Co. has increased its no par value common stock from 2,000,000 shares (900,666 shares outstanding) to 3,000,000 at \$2.50 par—with intention "to make some acquisitions."

Indiana Steel Products Co. reports sales for first half of 1955 were highest in its history, with net income before taxes of \$736,525 and earnings per share of \$1.24 vs. \$653,343 & \$1.10 in same 1954 period.

Aerovox earned \$320,090 (35¢ a share) on sales of \$12,336,835 in first 6 months of 1955, compared to \$346,747 (41¢) on \$11,830,760 in corresponding period year ago.

AMONG OFFICERS' and directors' stock transactions reported by SEC for June, in addition to those previously reported (Vol. 11:30-31): W. J. Conaty bought 100 ACF Industries, holds 100; Chester H. Gifford bought 1000 Avco, holds 1000; John A. McDougald bought 1000 Avco, holds 1000; Joseph H. McConnell, ex-NBC pres., sold 6500 Colgate-Palmolive, holds 3525; J. L. Van Volkenburg exercised option to buy 4650 CBS "A", holds 4956 personally and 3000 jointly with wife; John L. Hanigan sold 200 Corning Glass, holds none; O. Pomeroy Robinson Jr. sold 700 General Dynamics, holds 4448; Carleton Shugg bought 4750 General Dynamics, holds 7150; Gilbert W. Humphrey bought 100 GE, holds 100; Roy W. Johnson bought 3225 GE, holds 6726; Ray H. Luebke bought 2070 GE, holds 2250; Donald L. Millham bought 1600 GE, holds 2609; W. V. O'Brien bought 1000 GE, sold 500, holds 801; Gerald L. Phillippe bought 600 GE, holds 1622; Willard H. Sahlhoff sold 1545 GE, holds 465; Harold F. Smiddy bought 1875 GE, holds 3750; Arthur F. Vinson bought 1185 GE, holds 3019; Carl DiMartino bought 100 Hazeltine, holds 300; Frank M. Freimann bought 200 Magnavox, sold 4000 thru trusts, holds 49,385 personally and 25,484 thru trusts; Paul V. Galvin sold 300 Motorola, holds 101,503 personally and 186,696 thru trusts; Edward R. Taylor bought 300 Motorola, holds 2160; Edwin C. Wolf bought 100 Oak Mfg. Co., holds 600; James T. Buckley sold 2500 Philco, holds 13,252; Philco employes profit-sharing plan bought 3000 Philco, sold 198, holds 525,659; David Sarnoff sold 15,000 RCA, holds 15,000; Lawrence Hoguet sold 150 Skiatron, holds none; John J. Smith bought 300 Sparks-Withington, holds 7441; Bernard E. Finucane, thru T. W. Finucane Corp. & trust, bought 420 Stromberg-Carlson, sold 210, holds 1000 personally and 1215 thru T. W. Finucane Corp.; George C. Gordon III bought 142 Stromberg-Carlson, holds 342; Anthony G. Schifino bought 100 Stromberg-Carlson, holds 923; John M. McKibbin bought 500 Westinghouse, owns 3536.

ABC has "definitely emerged from the fledging stage" and its TV operations offer "exciting possibilities," says July 20 report on American Broadcast-Paramount stock by J. R. Williston & Co., N. Y., which concludes: "With the amount spent on TV advertising expected to increase from \$1 to \$2 billion a year in the next 5 years, with the movie exhibition field apparently having turned the corner, and with the possibility that ancillary enterprises [notably the Disneyland Park project] may provide an additional boost to earnings, American Broadcasting-Paramount promises to be a rewarding investment over the longer term." Similarly upbeat is July 21 follow-up report on AB-PT by Eastman, Dillon & Co., which calls Disneyland Park "perhaps the most exciting development affecting this company" and expresses belief AB-PT "offers considerable promise of future growth because it appears to be in a better position to expand its broadcasting activities at this time and at a faster rate than [CBS and NBC]."

Cornell-Dubilier earned \$1,381,448 (\$2.61 per share) after taxes of \$1,497,000 on sales of \$27,120,078 in 9 months ended June 30, compared to \$1,012,280 (\$1.88) after taxes of \$1,237,000 on sales of \$29,824,401 in corresponding 1954 period.

Electronics Corp. of America reports profit of \$161,427 (21¢ a share on 707,428 shares) on sales of \$2,851,250 for first 6 months of 1955 vs. \$99,992 (14¢ on 700,001 shares) & \$2,647,114 for same 1954 period.

Dividends: CBS "A" & "B," 20¢ payable Sept. 9 to stockholders of record Aug. 26; Cornell-Dubilier, 30¢ regular and 20¢ extra Sept. 22 to holders Sept. 12.

Add ABC-Paramount stock options (Vol. 11:31): Robert H. O'Brien, v.p., bought 12,500 common, increasing direct holdings to 12,600.

Color Trends & Briefs: Clever merchandising tieup between Gimbels N. Y. and DuMont is Aug. 15-27 closed-circuit colorcasts in Gimbels using DuMont's new Vitascan live color setup (Vol. 11:21).

Program has 2 phases—"see yourself on color TV" and display of goods. Color monitors will be spotted in windows and around store, and customers will parade before dolly-mounted scanner 50 min. each hour; other 10 min. will be devoted to showing merchandise. In addition, new DuMont black-&-white TV receiver line will be featured in store, while WABD will originate some black-&-white programs there. There will be no color broadcasts. New lighting equipment, giving normal illumination, will be employed.

Promotion is being kicked off with full-page ads in Sun. Aug. 14 *Times* and *News*. After Aug. 27, equipment will be moved to WABD.

DuMont announced, meanwhile, that its first complete color equipment package, including Vitascan, will be shipped Sept. 1 to new WITI-TV, Milwaukee-Glendale (Ch. 6), due on air Dec. 1.

* * * *

"Color is the magic word for 1955," says NARDA chairman Mort Farr in his Aug. *Electrical Merchandising* column. Predicting minimum of 30,000 set sales this fall, he calls this more profitable than sale of 180,000 black-&-white 17-in. table models, describes current product as technically sound, claiming that today's color chassis will be recognized as finest ever built, comparing it to record established by famed 630-TS black-&-white chassis. He suggests that "keeping up with the Jones" spirit might be fostered by adopting distinctive antenna "so that public would recognize a color set owner by glancing at his antenna." Some manufacturers are now offering colored antennas; last year, CBS-Columbia included yellow one with each color set.

Burden of pushing color is up to retailers, now that networks have announced plenty of color for their fall-winter schedules (Vol. 11:31)—opines columnist Harry Martin in Aug. 3 *Retailing Daily*. "If this isn't the moment for us to stop apologizing about the price," he says, "if this isn't the moment for us to stop talking about exaggerated comparative price, if this isn't the time for us to get into creative selling, we'll never have the moment. Let's show the networks that the biggest show is going to be in retail selling."

Hugh H. Eby Co., Philadelphia components maker, has filed SEC registration to sell 360,000 shares of 10¢ par stock to raise approximately \$1,750,000 in order to acquire \$124,000 in preferred stock, purchase real estate, pay up certain obligations. Offering will be through Hallowell, Sulzberger & Co., Philadelphia; Weill, Blauner & Co. and Baruch Bros., N. Y.

Paramount Pictures 6-mo. earnings were \$5,165,000 (\$2.36 a share on 2,188,916 shares) vs. \$3,962,000 (\$1.79 on 2,217,036 shares) in same 1954 period. Second quarter earnings were \$2,307,000 (\$1.05) in 1955 vs. \$1,726,000 (78¢) in 1954. Figure for 1954 includes \$832,000 (38¢) from non-recurring profit on sale of investments.

National Theatres reports income of \$1,768,490, or 64¢ a share on 2,769,486 shares, in 39-week period ending June 25 vs. \$1,884,636 (68¢) in same 1954 period. Third fiscal quarter 1955 showed profit of \$487,941 (18¢) vs. \$577,586 (21¢) for same 1954 quarter.

Warner Bros. reports net profit of \$3,312,800, or \$1.33 a share on 2,474,275 shares, for 9 months ending May 28 vs. \$2,536,707 (\$1.02) for same 1954 period.

Decca Records reports first half 1955 earnings of \$1,610,691, or \$1 a share vs. \$1,204,288 (75¢) in 1954 period.

Network color schedules for next 2 weeks: NBC-TV—Aug. 17, 19, 24, 26, *Matt Dennis*, 7:30-7:45 p.m.; Aug. 16, 18, 23, 25, *Vaughn Monroe*, 7:30-7:45 p.m.; Aug. 15-19 & 22-26, segments of *Home*, 11:45-noon; Aug. 22, *Producers' Showcase*, "The King & Mrs. Candle," starring Cyril Ritchard, Joan Greenwood, Richard Haydn & Irene Manning, 8-9:30 p.m.; Aug. 26 & 27, segments of Davis Cup tennis matches, 2-5 p.m. Fri. & 2:30-5 p.m. Sat. NBC has renamed its upcoming daily 3-4 p.m. color drama *Matinee*, calling it *The NBC Matinee Theatre*. CBS's radio KNX, Los Angeles, has show called *Matinee*.

"Conversion" of station-break sponsors to color at NBC's WRCA-TV, N. Y. (Vol. 11:26) has gone very well, according to v.p.-mgr. Hamilton Shea. He reports that all except one sponsor of breaks adjacent to or within regular color shows have agreed to use color. Total cost, based on color facilities charge, comes to slightly over 10% more than black-&-white charges. Rate card provides that if sponsor doesn't elect to use color, spot will be offered to others.

"British NTSC" color system to be tested in London this fall, tailored to U. S. system, is described in technical detail in Aug. *Wireless World*. Tests are preliminary to adoption of final color system, will run 2-3 unspecified days on BBC this month. A compatible system has been recommended to Postmaster-General by his Television Advisory Committee.

Color can change the apparent size of surfaces as much as 13.5%, plus or minus, according to a study completed recently by Johns Hopkins U for Pittsburgh Plate Glass Co. Hue alone can cause 9.5% change, brightness 8.5%, saturation 6%. Summary is available from Pittsburgh Plate's public relations dept., 632 Ft. Duquesne Blvd., Pittsburgh.

Color will cost 25% more to sponsors, in opinion of TV industry cross-section polled by *Billboard Magazine*; consensus was that extra cost would be worth it, and that color would attract more advertisers to TV.

Arthur S. Matthews, 52, pres. of Color TV Inc., San Carlos, Cal., died last week. CTI was one of 3 color system proponents, with CBS and RCA, during FCC color hearings, unsuccessfully championing line-sequential system. In recent years, CTI concentrated on govt. business, though its engineers still did some color work, outlining principles of a one-tube color camera (Vol. 10:7, 36).

Gabriel Co. reports first-half 1955 sales of \$6,759,792 and profit of \$1654 vs. \$10,032,940 & \$150,785 (26¢ per share) in same 1954 period. Second quarter sales were \$3,713,023, profits \$129,045 (23¢ a share on 507,753 shares) vs. \$5,012,853 & \$87,437 (15¢ on 505,960 shares) in same 1954 period.

Beckman Instruments Inc. sales for year to June 30 were \$21,000,000, net income \$1,300,000, or \$1.05 per share on 1,249,735 common shares outstanding, compared with \$18,652,870 & \$920,280 (85¢ on 1,079,730 shares) in preceding year.

Lear Inc. reports sales of \$29,023,044 and income of \$876,866 (39¢ a share) for 6 months ending June 30 vs. \$27,248,706 & \$1,397,558 (66¢) same 1954 period.

Globe-Union Inc. reports 1955 first half net of \$489,000 (68¢ a share) on sales of \$19,664,000 vs. \$208,000 (29¢) & \$17,097,170 for same 1954 period.

Arvin Industries reports profits of \$913,233 (\$1.02 a share) for quarter ending July 3 vs. \$461,873 (52¢) for similar 1954 period.

Frederick H. Schroeder, v.p. of Lee Higginson Corp., N. Y. bankers which underwrote recent \$1,250,000 debenture issue, elected a director of Trav-Ler Radio Corp.

Electronics Reports: Importance of guided missiles and electronics in nation's military aviation plans was strikingly underscored this week by President Eisenhower's appointment of an electronics engineer—Donald A. Quarles—as Secretary of the Air Force, succeeding Harold E. Talbott.

Appointment was generally applauded by electronics industry, which has closely followed Quarles' work as Asst. Defense Secy. for research & development, in which capacity he has been a prime mover in guided missile development program. At 61, Quarles is former pres. of Western Electric's Sandia Corp. (guided missiles), former v.p. of Western Electric, a fellow and former pres. of AIEE, onetime mayor of Englewood, N. J. He started working for Bell Labs in 1919.

Anticipating close scrutiny from Democratic Congressmen, Quarles announced he is now reviewing his "rather modest list of security holdings" and will divest himself of any that "imply a conflict of interest." Meanwhile, Sen. Morse (D-Ore.) said he would ask Senate Armed Services Committee to explore any possible conflicts. "This is particularly important in view of reports of Administration plans to turn over the air-raid warning system to AT&T," he said.

* * * *

Industrial electronics conference, sponsored by IRE & AIEE, at Detroit's Rackham Memorial Auditorium Sept. 28-29, will feature paper on "How Can Industry Use Television?" by H. F. Schneider, RCA. Automation session speakers will be Dr. Cleo Brunetti, General Mills; J. J. Graham, RCA; E. C. Johnson, Bendix Aviation; A. J. Carr Jr., Raytheon. Further information from Guido Ferrara, 8106 W. Nine Mile Rd., Oak Park 37, Mich.

Worth reading: "Automatic Manufacture of Electronic Equipment," in Aug. *Scientific American*, traces history and status of art, with emphasis on Project Tinkertoy (modular design of components); "The Two-Plus-Two of Sperry Rand," in Aug. *Fortune*, good summary of "conglomerate" merger, a union of 2 non-competitive electronic companies with nothing in common except a desire to face the future together.

Underwater TV, using RCA closed-circuit system, is being employed by U. S. Fish & Wildlife Service to test performance of experimental fishery methods and equipment under actual oceanic conditions.

DIVERSIFICATION into electronics has become a keyword in nearly every "non-electronic" industry (see p. 1)—and even electronics companies themselves continue to diversify and expand into related electronics fields. Aircraft industry is the classic and oft-cited example of the new emphasis on electronics—every airframe manufacturer now being in electronics research & development, many of them in electronics production of one form or another.

Our roundup of diversification into electronics 15 months ago (Vol. 10:20), which was widely quoted, cited some outstanding examples of companies which originally weren't even remotely connected with electronics and which now are heavily in the new field. Since that time, trend has continued, even intensified. Some examples:

General Dynamics, a leader in atomic and aircraft field, needed electronics know-how, so it bought Stromberg-Carlson (Vol. 11:18), and incidentally got itself involved in TV-radio broadcasting field.

The American watch industry, which has been in a

Panel on future of automation will be highspot of RETMA symposium at U of Pennsylvania, Sept. 26-27. With GE's Dr. W. R. G. Baker, in chair, panel includes Maj. Gen. J. D. O'Connell, Army Chief Signal Officer; James Bright, Harvard Business School; Seymour Sherman, U of Pa.; John Diebold, editor of *Automatic Controls*. Other sessions will cover high volume assembly methods (Dr. J. Harrington Jr., U. S. Shoe Machinery Corp., chairman), data sensing & utilization (D. Griffin, McGraw-Hill), low volume production methods (D. Cottle, GE), redesign for automation (W. H. Hannahs, Automatic Production Research Co.).

Bellanca Aircraft Corp. is being sued for \$420,000 in Washington district court by National Electronics Labs., Washington, for alleged breach of a merger contract. Stock payment had been arranged for June 30, but NEL pres. Frank Mallinson claimed that Bellanca withdrew when its stock went up from \$17.50 when pact was signed to about \$30 on effective date of exchange. Bellanca just recently acquired the controlling interest in Waltham Watch Co., Waltham, Mass., which will dispose of watch inventory but retain other divisions, including instrument div., which produces electronic, electromechanical and servomechanical instrumentation.

North Carolina's fastest growing industry, according to Aug. 6 *Journal of Commerce*, is electronics, which will distribute \$75,000,000 annual payroll to 25,000 employes when current construction is completed. At present, 44 electronics and electrical products plants are in operation or construction in the state.

Tax inducement for electronics plant expansion will continue, despite fact that rapid writeoff program has been suspended in 38 other fields. Office of Defense Mobilization says tax-aided expansion of electronics facilities will continue as in past "for military requirements when the Defense Dept. recommends and supports the project."

"Revolutionary guided missile" contract has been awarded to Magnavox by Defense Dept., pres. Frank M. Freimann announced this week. No details were disclosed. He said company also has contracts for 3 different airborne radar systems.

An "instrumentation reference service" has been set up by Bureau of Standards as aid to scientists of govt. agencies and their contractors. It employs new type of "multidimensional" indexing system said to be unusually effective. It's described in report No. 1925.

perpetual depression for many years due to Swiss competition, recently discovered its talents were especially suited for manufacture of some electronic gear, notably miniature precision parts and relays. Every American watch company is now in electronics. One firm, Elgin National Watch Co., this year purchased Advance Electric & Relay Co., American Microphone Co. and Neomatic Inc. (relays)—and Waltham was recently bought by Bellanca Aircraft, which will keep its electronics business, liquidate watch inventories.

While some TV manufacturers are diversifying into white goods, the white goods makers are diversifying into electronics—the RCA-Seeger-Whirlpool combine being good example of how some companies are pooling their products and distributive structures for mutual benefit. Easy Washing Machine Corp. recently invested \$2,000,000 in National Co. (communications, military radio, hi-fi), and Thor Corp. (washing machines) has sold its Cicero, Ill. automatic washer plant to raise money for expansion into electronics.

Textron American Inc., once a textile firm, is now deeply in electronics, having bought Ryan Industries, Detroit (airborne electronics), after purchasing Dalmo Victor Co., San Francisco (radar), now is going into com-

munications field through proposed purchase of Western Union's international cable system. Western Union goes deeper into electronics manufacture through its recently acquired 1/3 interest in Microwave Associates Inc., Boston, which is also 1/3 owned by American Broadcasting-Paramount Theatres.

Fairchild Camera has acquired Freed Electronics & Control Corp., offshoot of old Freed-Eisemann, TV-radio manufacturer. International Silver Corp. bought Times Wire & Cable Co. (electronic coaxial). Link-Belt Co., maker of industrial conveyors, is buying Syntron Co., electronics manufacturer. Pump maker Bell & Gossett Co. has set up electronics div., has military orders. Carrier Corp. (air conditioners) is now in electronics production through subsidiary Cambridge Corp.

Automotive industry is going heavily into electronics. The extent to which GM is in the field is little known (except for its Delco Radio subsidiary), but it has a number of prime military contracts involving electronic items. Willys Motors once produced TV cameras at Toledo and had planned to turn out TV station equipment including transmitters, but bowed out of the field and later opened electronics lab at Palo Alto, Cal., where Dr. Wm. Ross Aiken developed his flat TV picture tube. Studebaker-Packard bought Aerophysics Development Corp., Los Angeles (guided missiles). Mack Trucks bought White Industries and Radio Sonic Corp., both in aviation & military electronics. Reynolds Spring Corp., taken over by North American Philips, sold its automotive business, changed its name to Consolidated Electronics Industries and purchased other electronics properties. Detroit auto parts maker F. L. Jacobs Co. bought Eicor Inc., maker of electronic items.

Telautograph Corp., old-line manufacturer of non-electronic handwritten message transmission system, has "electronified" its equipment, and purchased Walsco Electronics Corp., maker of printed-circuit TV chassis, TV antennas, etc. Hupp Corp., onetime auto manufacturer, turned into holding company, bought the electronics business of Brown-Allen Chemicals Inc. (crystals, phototubes, transistors, TV components).

Last few months have also seen these combinations and diversifications of companies already in electronics: Hoffman Electronics (TVs) bought Analyzer Corp. (computers) and National Fabricated Products Inc. (TV-electronic parts, semi-conductors). Norden Laboratories, after merging with Ketay Instrument, has acquired several other electronic properties, notably Vari-Ohm Corp. and Scientific Specialties Corp. Electronics Corp. of America bought W. S. MacDonald Co., makers of electronic business machines. Olympic Radio and Victoreen Instrument merged into new diversified firm, Nuclear Electronics Corp.

Westinghouse Air Brake's electronics subsidiary, Melpar Inc., has steadily been acquiring smaller electronics companies, latest one being Corvey Engineering Co., Alexandria, Va. Resistor manufacturer International Resistance Corp. purchased EMEC Inc., maker of magnetic clutches for electronic applications. IT&T bought Kethe Laboratories (tubes). Raytheon & Minneapolis-Honeywell jointly set up new Datamatic Corp. (computers). Hycon Mfg. Corp. helped to finance Hycon-Eastern Inc., research firm jointly owned with 2 leading MIT scientists.

V. Charles Schorlemmer, ex-Consolidated Vultee, named administrative v.p., and Leslie E. Neville, ex-director of Armed Services Technical Information Agency, named director of public relations & adv., American Bosch Arma Corp.

Datamatic Corp., computer firm owned jointly by Minneapolis-Honeywell and Raytheon, has bought new 40,000-sq. ft. factory building in Newton Highlands, Mass., near Boston, plans all operations there by Oct. 1.

RCA was ordered to produce, in London by Aug. 16, papers that Zenith Radio wants to examine in connection with its counterclaim patent suit against RCA, GE & Western Electric. Chicago Federal Judge Igoe signed order directing RCA to deliver to the U. S. consulate in London papers it removed from its London office when it shifted European headquarters to Zurich in April. Zenith wants the documents to take depositions, a practice forbidden by Swiss law when trial is to be held outside Switzerland. Judge Igoe signed order after RCA attorney Albert E. Jenner Jr. told court "there is not a scintilla of truth" in any assumption that transfer of RCA's office from London to Zurich had any connection with Zenith litigation, and accused Zenith of misrepresentation in its claims.

Western meeting of National Community TV Assn. Oct. 25-26 has been shifted from Denver to Antlers Hotel, Colorado Springs, Colo. Conference will include equipment exhibits, and all sessions will be of "open forum" type. Latest western community systems reported are Price Trading Co., Sunnyside, Utah, due to start within 30 days, according to mgr. Oscar Carlson Jr., and Rawlins Community TV Co., which has asked Wyoming Public Service Commission for authority to build \$105,000 system in Rawlins.

Intriguing reminiscences about early days of radio, comprising interviews developed with aid of Radio Pioneers Club, are featured in Aug. *American Heritage Magazine*. Particularly interesting are Herbert Hoover's account of early govt. regulation when he was Secy. of Commerce and Arthur Judson's report on start of CBS. Others interviewed: H. V. Kaltenborn, Wm. S. Hedges, Lyman L. Bryson, E. L. Bragdon, Dorothy Gordon, Laurence A. Hawkins, Donald G. Little, Chester H. Lang, Thomas H. Cowan, Walter C. Evans, Orestes H. Caldwell.

Comments on space satellites by Andrew G. Haley, Washington TV-radio attorney and former pres. of American Rocket Society, received considerable attention in the press this week when he returned from International Astronautical Congress in Copenhagen. He said that after talking to Russian representatives he's "absolutely convinced" that U. S. has lead over Soviets in satellite program.

Competition, it's wonderful: To CBS's claim that its Wm. Worthy was first to send an uncensored broadcast to U. S. over facilities of Radio Moscow (Aug. 4), NBC publicity dept. retorts this week that its Irving R. Levine, now touring Russia with the American agricultural delegation, was first to broadcast, uncensored, from Moscow to its *Monitor* program for 5 minutes on July 16.

TV served as FBI "wanted" circular on CBS-TV's *What's My Line* Aug. 7. While panel was guessing correctly that contestant was an elephant trainer, viewers in Royal Oak, Mich. guessed that he was also the man alleged to have stolen roommate's car a year ago, whereupon he was arrested and held on \$1500 bail.

Sir Gordon Radley is new director general, British Postoffice Dept.; he recently had title of director of radio and accommodation. Sir Ben Barnett remains in charge of broadcasting.

Britain's Independent TV Authority has moved to permanent headquarters at 14 Princes Gate, London SW-7; telephone, Knightsbridge 5341.

Four \$2500 scholarships have been awarded to high school students by antenna maker Technical Appliance Corp. (Taco), Sherburne, N. Y.

U of Missouri holds 3-day national agricultural TV Clinic, Sept. 2-4.

Power increase: KTBC-TV, Austin (Ch. 7) Aug. 7 to 316-kw ERP.

CRITICAL REPORT on children's programming on NBC-TV was issued this week by its recently-organized Children's Program Review Committee, along with recommendations for improvement. Committee members are Dr. Frances Horwich, who is "Miss Frances" of NBC-TV's *Ding Dong School*; Mrs. Douglas Horton, wartime WAVES commander and an NBC director; Dr. Robert Goldenson, psychologist and expert on family relations. Committee listed 13 points of weakness but commended NBC for "trying to maintain a common standard of excellence" in children's programming. Among points criticized were sequences showing destruction of public property, shooting seltzer water or throwing things, bad grammar and poor pronunciation, frequent use of slapstick of questionable taste, over-excitement of solid hour of disjointed action, over-emphasis on money, misuse of commercials. Its recommendations called for better balance in children's programs, elimination of some westerns on o-&o stations, using 5-6 p.m. segment for 6-12 year group and 9-11 a.m. for nursery age, more how-to-do-it shows, more music & story-telling programs, improved standards for commercials. Richard A. R. Pinkham, NBC v.p. in charge of network programs, sent copy of report to all producers, along with letter urging prompt attention to its critical aspects. On a related front, NBC's WRCA-TV & WRCA has joined N. Y. Youth Board in attack on juvenile delinquency in city, using its facilities & personalities to acquaint public with conditions in a test neighborhood designated as "Area 4." Stations' participation include regularly scheduled progress broadcasts, counseling of delinquent youths by station personalities, and information to citizens on how they can help.

Two radio station sales this week, with TV overtones: R. H. Drury, Oklahoma auto finance man who controls KSWO-TV, Lawton, KMID-TV, Midland, Tex. & radio KRHD, Norman, heads group buying radio KGWA, Enid (1-kw daytime, 960 kc, MBS) for \$62,500. He holds 74.5% of purchasing firm, Ted Warkenton owning 15.5%, Allan Page 10%. KBAK, Bakersfield, Cal. (1-kw on 550 kc, MBS) has been sold for \$85,000 by *San Francisco Chronicle* interests, who retain KBAK-TV (Ch. 29). Purchasers are partnership comprising John Hearne, one-time FCC attorney now practicing in Los Angeles, and Benjamin Pasacal & Howard Tullis, L. A. admen. Radio call letters will be changed. Deal was handled by Jack Stoll, L. A. broker. Note: Rumor was abroad this week that Cantrell & Cochrane, Englewood, N. J. (Super-Coola canned soft drinks), whose mainspring is ex-Pepsi-Cola pres. Walter S. Mack, was seeking to buy up a string of western radio stations—but there was no confirmation.

On eve of "subversion" hearings on New York entertainment industry, AFRTA members overwhelmingly approved resolution calling for severe disciplinary measures, up to expulsion from the union, for members who refuse to tell Congressional committees whether they are or have been Communists (Vol. 11:30). Some 27 entertainers have been subpoenaed for the hearings by Rep. Walter (D-Pa.) and his House Un-American Activities Committee. Most witnesses are from legitimate stage, with no big TV names announced. Scripps-Howard newspapers, in 4-part series this week by Frederick Woltman, timed as curtain-raiser to the hearings, explored subject of TV "black-listing," came to conclusion there's no formal blacklist.

Suspension of operators charged with disabling KPIX, San Francisco and radio KEAR, San Mateo, Cal. during labor-management trouble (Vol. 11:8) was recommended by FCC staff in proposed findings. Staff said evidence shows operators deliberately disabled stations, recommended 90-day suspension for 3 operators involved at KPIX, 30-day for 2 involved at KEAR.

Week's toll-TV developments: (1) Dealers will be helped rather than harmed by pay-TV, Zenith v.p. Leonard Truesdell argues in Aug. *Electrical Merchandising*, challenging NARDA chairman Mort Farr's opposing views. Truesdell claims that subscription TV will mean better programs, hence more sales. (2) Pro-toll results of recent *Saturday Review* poll tell more about magazine's readers than about general public opinion on the subject, researcher Elmo Roper says in Aug. 13 issue of the magazine. He notes that magazine's poll showed 74% favoring subscription TV while his survey of Columbus, O. indicated people are 67% against (Vol. 11:25). His conclusions: "SR's readers are an unusual segment of society." One piece of evidence, he said, is that SR readers rank nation's No. 1 program, *I Love Lucy*, as 26th. (3) George Sidney, Screen Directors Guild pres., opines that public is willing to pay for good movies on TV; that "good TV shows are becoming too expensive to give away." (4) Skiatron pres. Arthur Levey states: "The networks are attempting to cloud the real issues with irresponsible statements that are in a very real sense a betrayal of the public interest."

Walter Annenberg's Triangle Publications Inc., publisher of *Philadelphia Inquirer*, operator of pioneer WFIL-TV & WFIL and owner of other publishing & TV-radio properties, is seeking a satellite for WNBF-TV, Binghamton, N. Y. (Ch. 12), which was recently acquired with WNBF for \$2,700,000 (Vol. 11:11, 19), in application filed this week for uhf Ch. 18 in Elmira, N. Y., 48 mi. away. Previously, it made deal to purchase now-silent WLBR-TV, Lebanon, Pa. (Ch. 15) for \$235,000 with intention of reviving it but transfer has been stymied by objections from Harrisburg uhf operators. Elmira previously had 2 uhf stations, on Ch. 18 & 24, but both went off air last year (Vol. 10:22, 45), unable to make a go of it. Triangle's pending purchase of WFBG-TV, Altoona, Pa. (Ch. 10) with WFBG (Vol. 11:32) was finalized this week, subject to certain adjustments; it will pay \$2,900,000 cash to the Gable dept. store interests and give them an additional \$750,000 advertising credit. Howard Stark was broker.

Recently purchased WPFH, Wilmington, Del. (Ch. 12) and radio WIBG & WIBG-FM are being brought under one parent corporation, WPFH Bcstg. Co., according to application filed with FCC this week by owner Paul F. Harron. Corporation would take over some \$2,000,000 in obligations for TV from Harron who retains control of Class B stock which will have power to elect 10 of 15 directors. Being brought in is Wanamaker dept. store, to hold 5.3%. Others who will hold 3.1% or more: auto dealer John P. Crisconi, 4.7%; Dr. Patrick J. Kennedy, 3.1%; Robert M. Brown, Esslinger Brewery v.p., 3.1%; Charles E. Compton, mgr. of Brown & Bigelow (calendars, etc.), St. Paul, 3.1%; Boardman Smith Corp., 3.1%. Some 60 others will hold smaller percentages, among them John Morgan Davis, judge of Philadelphia common pleas court.

WCOV-TV, Montgomery, Ala. (Ch. 20), whose technical equipment was destroyed by fire Aug. 5 in the transmitter room (Vol. 11:32), apparently caused by a short circuit in the master clock, unloaded new RCA equipment Aug. 9 and expects to have test pattern on air within 10 days and to resume regular program service Aug. 25. Gen. mgr. Hugh M. Smith reports entire control room as well as transmitter destroyed, large studio severely damaged, 2 cameras in bad shape.

High-tower grant to KSWs-TV, Roswell, N. M., was finalized this week by FCC after Pentagon dropped its opposition—though first voting against the new 1610-ft. structure as member of Washington Airspace Subcommittee (Vol. 11:27, 31).

PUBLISHED WEEKLY BY RADIO NEWS BUREAU • WYATT BLDG. • WASHINGTON 5, D.C. • TELEPHONE STERLING 3-1755 • VOL. 11: No. 34

SUMMARY - INDEX OF THE WEEK'S NEWS — August 20, 1955

COLOR PREDICTIONS of top set makers still have wide bullish-to-bearish range on eve of color program splurge; price remains biggest question (pp. 1 & 10).

TV IN 67% OF U. S. HOMES, or total of 32,000,000 reports Census Bureau on basis of June survey requested by Advertising Research Foundation (p. 1).

NEW DuMONT PLANS exclude networking; legal aspects of spinoff of stations now occupying bankers & lawyers. Paramount's position in new setup (p. 2).

PROFITABLE STATION operation assured if station has CBS or NBC affiliation, with \$30,000 monthly revenues apparent break-even point, FCC finds (p. 3).

TV DOESN'T HURT BASEBALL attendance nearly as much as poor stadium facilities and slow games, according to survey of fans and writers (p. 3).

ADVERTISERS SPENT \$803,600,000 on TV in 1954, ranking it second to newspapers; advertising bill, all media, totaled \$8,164,100,000, up 5.3% in year (p. 4).

DISCOUNT HOUSE DECLINE seen by dealers as stabilizing TV trade, causing little anxiety over price increases and high inventories (p. 9).

PHILADELPHIA UHF sought by Herbert Mayer as 2 uhf grantees cancel; commissioners ponder allocations solutions; court refuses Pittsburgh CP stay (p. 6).

SATELLITE KTRE-TV, Lufkin, Tex. (Ch. 9), linked to Houston's KPRC-TV, starts as 441st station. Notes on upcoming stations (p. 8).

NARDA MANAGEMENT conference in Washington, 47 dealers attending, big success and expansion urged (p. 12). Joyce upholds the distributor (Special Report).

TELEVISION-ELECTRONICS FUND assets rise to \$104,639,-370 (9,132,272 shares) as of July 31; reports on portfolio changes in quarter (p. 14).

AVCO-HYCON AGREEMENT is diversification move for both, for exchange of scientific know-how & facilities and acquisition of defense contracts (p. 15).

TOP SET MAKERS SIZE UP COLOR PROSPECTS: Standing by to evaluate impact of color programming when it breaks in a few weeks, industry leaders differ as vigorously as ever in their predictions of public reaction and set sales. Conducting our own survey of top set producers on eve of major network programming start, we find them generally feeling that there will be sufficient sales this fall-winter to be labeled an authentic "start" on color -- but relatively few see the industry really rolling in the proverbial "house afire" fashion in less than 1-2 years.

It's agreed there were 3 principal barriers to movement of color last year -- picture size, programs & price. With the emergence of 21-in. tube, none doubts that size is adequate. With 12-15 hours of color shows weekly, most feel that programming will probably be sufficient to stimulate public. Big controversy remains over price -- \$695 up -- and only performance on dealers' floors will settle it.

Attitude of top color proponent RCA needs no reiteration; it's all-out. Of replies from others received to date, there's wide range from optimism to bearishness. H.L. Hoffman, quoted last week (Vol. 11:33), is one of most bullish. The responses are highly quotable -- and they're excerpted on pp. 10-11.

67% OF ALL U. S. HOUSEHOLDS HAVE TV SETS: Two out of every 3 American households, or total of 32,000,000, owned a TV set as of last June, according to preliminary report by U.S. Census Bureau released this week. It states these represent 67% of all U.S. households. That means very nearly one-third of all homes remain to be sold, if you accept recent estimate by CBS that 97% of all the 47,500,000 families in the nation are within reception range of existing stations (Vol. 11:26).

Census Bureau survey should not be confused with sets-in-use count because it does not purport to include sets in public places and second sets in homes -- though it did ask how many sets were owned, on which a report will be made later. Figures appear to substantiate Sylvania sales research director Frank Mansfield's estimate of 34,549,000 sets-in-use as of last July 1, as tabulated in our TV Factbook No. 21 (p. 19). Present figure is probably well over 35,000,000, considering that more than

6 weeks have elapsed. NBC Research estimated 36,447,000 sets-in-use on July 1.

This question was asked of a 25,000-family sample as part of Census Bureau's continuing Current Population Survey: "Do you own a TV set?" From that sampling the 32,000,000 figure was projected -- Census Bureau noting that it represents more than 6-fold increase over April 1950 estimate of 5,000,000 TV households. That was only previous time it conducted TV count. Additional information, covering distribution of sets by 4 geographic areas and by size of TV households, will be released soon.

Advertising Research Foundation contracted for survey, with cost defrayed by networks, NARTB and Television Bureau of Advertising. Each has its own use for the data, NARTB planning to use it in connection with its long-awaited sets-in-use count (Vol. 11:21) on which field work on "methodology" is still being conducted. There's no assurance, however, that such a continuing market-by-market census will ever get under way, despite urgent need for regular industry-approved counts. Main effort in that direction, currently, is Television Magazine's monthly market-by-market set estimates (changed from county-by-county) which gives total of 36,288,500 for July 1.

Note: Market Research Corp. of America, day after Census release, came up with own estimate of 68% of households equipped with TVs as of July. Based on the continuing reports of its 5800-family panel, survey showed most increases in small towns and rural communities during last year. (For percentage breakdowns of MRCA findings on TV ownership by regions, city size, family income, education of family head, size of families, age of housewife, number of children, see p. 16.)

NO NETWORK IN THE NEW PLANS FOR DuMONT: DuMont Network will not be revived as such -- that much can be stated positively on authority of those now arranging the legal details of spinning off the DuMont stations from manufacturing, incorporating new DuMont Broadcasting Co., securing transfers of station licenses, and performing the multitudinous other tasks implicit in last week's board action (Vol. 11:33).

Nor is it likely Paramount Pictures will gain control of the new company, even though its 26% ownership of present DuMont stock will make it the largest single stockholder, initially at least, after distribution of 1-for-2½ shares is completed. Moreover, neither the president nor other officers of the new DBC has been decided upon as yet; at outset, they will be same as present parent company, then new names will appear -- most likely including a new president as operating head.

Vice president Ted Cott, who joined DuMont recently after quitting his NBC v.p. job, is definitely slated "to continue running the stations."

Foregoing are the facts, despite all rumors you may hear and dope stories you may read. The network having lost some \$16,000,000 in its nearly 10 years of existence, there's no disposition on the part of the bankers to pour more into attempt to perpetuate it. Instead, we're told, "We'll first get the stations [WABD & WTTG] and Telecentre running well at a profit. They must stand on their own feet."

Of the 2,500,000 shares of common stock in the new DBC, 1,000,000 will go to present stockholders. At least \$1,000,000 in working capital will be raised by selling some of the other shares. No price has been fixed yet; it depends on "unraveling" the bookkeeping of stations from network, determining their worth, assessing their earning potential. There's apparently little doubt in the bankers' minds that the stations can be made to earn reasonable profits as independents.

Paramount may relinquish its KTLA, Los Angeles, to the new company, taking payment in stock -- but that's indefinite. In that event, and if it goes into the open market to buy up new stock, Paramount might gain control of DBC. Its motivation might be to have own outlets for subscription TV, which Paramount pres. Barney Balaban is convinced is inevitable -- despite the thorny paths of Washington.

Network is a mere skeleton of its former self now, loses the Heinz-sponsored "Studio 57" film series and Swift's "All About Baby" in next few weeks. That leaves only Mon. night boxing from St. Nicholas Arena, which continues on special hookup. Also booked are N.Y. Giants pro grid games to 32 stations next autumn, half on co-op basis, other half under sponsorship of Atlantic Refining Co.

Note: It can be disclosed now that General Teleradio's Tom O'Neil made firm offer of \$4,000,000 for WABD, with idea of retaining its Ch. 5 for his WOR-TV in N.Y. and asking FCC to move WOR-TV's Ch. 9 into one-station Binghamton, N.Y.

CBS OR NBC AFFILIATION VITAL TO PROFIT: A strong NBC or CBS affiliation and revenues of at least \$30,000 monthly were virtual guarantees of profitable operation for post-freeze TV stations last year. Stations could make a go of it without the networks -- but their chances were much slimmer.

That's essence of FCC's third study of post-freeze TV stations released this week. Study doesn't reflect upsurge of ABC-TV, which has accelerated tremendously since survey was conducted; it's plain, though, that if the Commission authorizes similar survey for coming year, ABC will play much more significant role.

Results of study aren't surprising, but they do document industry's general understanding and make it possible for each operator to determine how he's doing, compared with others in similar situation.

Study of 144 vhf and 122 uhf stations operating Jan.-Oct. 1954 shows 52 (36%) of the vhf's with overall profitable operation during the period, another 50 (35%) with profit at least during Oct. (and presumably out of the woods), remaining 42 with continuing losses throughout period.

Only 18 (15%) of the 122 uhf had overall profit during the period, while 15 (12%) had at least a profitable Oct. Remaining 89 had continuing losses.

A "strong" CBS or NBC affiliation, according to Commission's calculations, seems to be one that supplies 7½ or more hours weekly. Of the 101 post-freeze vhf's carrying NBC or CBS, 83 (82%) were profitable, compared with 19 (45%) of those with fewer than 7½ hours of either network. Of the 42 uhf's with CBS or NBC, 26 (62%) were profitable, vs. 7 (14%) of those without as much as 7½ hours from NBC or CBS.

The \$30,000 figure seems to be the break-even point. Half the vhf stations took in \$30,000 or more monthly -- and 90% of these were profitable by Oct. About one-fourth of the uhf's received \$30,000 or more -- and 75% of these were profitable.

Vhf competition hit uhf's harder than it did vhf's -- to no one's surprise. Of uhf's with no competition, 12 out of 18 were profitable; with one vhf competitor, 11 of 39 were profitable; with 2 or more vhf competitors, 10 of 34 were in black.

Of the vhf's, 33 of 44 were profitable where they had no competition; 39 of 55 were in black when facing one vhf competitor; when bucking 2 or more vhf competitors, 30 out of 44 were profitable. "Competitor" is defined as station whose signal is received by 50% or more of homes in area -- according to ARB survey.

FCC study comprises 15 tables, breaking down statistics many ways -- by vhf and uhf, monthly revenues, CBS or NBC affiliation, competition, population. Survey is FCC Notice 23055 -- copies available from Commission or from us.

BASEBALL ON TV--MOSTLY HITS, FEW ERRORS: TV isn't hurting baseball nearly as much as baseball is hurting itself. That's central conclusion of recent survey by research-public relations firm Stephen Fitzgerald & Co., N.Y., initiated at request of Baseball Commissioner Ford Frick to determine causes of lagging attendance at games. In general, its findings support thesis of earlier studies by N.W. Ayer's Jerry Jordan -- that sports must look to its own shortcomings, not TV, for boxoffice declines (Vol. 10:9). Survey, conducted among management, sports writers & fans, finds:

(1) Difficulty in getting to ball parks, parking troubles, high prices and poor service on tickets & slow games were chief complaints of fans, far outweighing any apprehensions about TV.

(2) Fans generally like TV commercials of baseball games, about 50% of those surveyed declaring them "just about right," about 25% contending they're too long or too frequent. Three times as many find them interesting as find them offensive.

(3) TV has increased interest in baseball, in opinion of 77% of the 763 sports writers and editors surveyed, but 60% felt TV had hurt attendance somewhat. Still, they rated TV far behind such deficiencies as long games, poor seating, bad parking facilities as biggest factors affecting attendance. Some 83% of the sportscasters felt TV had increased interest in baseball, though only 36% contended it hurt attendance. Some 95% thought radio built up interest in game.

Note: Recent Associated Press poll of fans came to much the same findings. About 45% said TV had increased their interest. Some 63% opined that if telecasts seriously hurt baseball attendance, they would favor blacking out the games.

Personal Notes: Joseph M. Bryan, 1st v.p. of Jefferson Standard Life Insurance Co. & pres. of its WBTW, Charlotte and WBTW, Florence, S. C., nominated for pres. of American Insurance Convention meeting in Oct. . . . Wm. C. Gittinger retires Sept. 5 as CBS v.p. . . . Wm. Balaban has resigned as head of ABC-TV closed circuit operations to join Lou Edelman, producer of *Danny Thomas* and new *Wyatt Earp* shows . . . Robert Purcell, ex-operations director, KTTV, Los Angeles, recently a consultant working for NATS on KTVQ, Oklahoma City (Ch. 25), joins KEYD-TV & KEYD, Minneapolis, as managing director under v.p. Lee Whiting . . . Wm. Brennan, ex-program director of KNXT, Los Angeles, resigns to package own shows . . . Walter Jacobs promoted to production mgr., WLWT, Cincinnati, replacing Robert Roberts, now with Biow, N. Y. . . . Eugene Tanner, commercial mgr. of WSIX-TV, Nashville, elected a v.p. . . . Andrew G. Hubbell, TV sales mgr., promoted to gen. sales mgr., WNBF-TV & WNBF, Binghamton, succeeding Stanley N. Heslop, retired . . . Col. Lester W. Lindow reports Aug. 22 to Pentagon for reserve duty with Army public information div., in which he served during war; he's gen. mgr. of Bitner's WFDF, Flint, Mich. . . . Paul C. Brines, ex-WGN-TV & WGN, Chicago, recently with WIRL, Peoria, named director of *Elkhart* (Ind.) *Truth's* WSJV (Ch. 52) & radio WTRC . . . Beryl L. Reubens promoted to CBS-TV trade press editor, succeeding James Kane, now director of press information, CBS Hollywood . . . Edward J. McKernan, asst. to Ben Ludy, gen. mgr. of WIBW-TV, Topeka, has returned home from hospital, and is recovering from heart attack . . . John Courcier, ex-KOOL-TV, Phoenix, named operations director of KTVW, Tacoma; Don Wood promoted to program director; Wm. Rambo, ex-KOVR, Stockton, Cal., is Tacoma mgr. . . . Verne W. Behnke, ex-MPTV eastern sales mgr., joins Petry; John W. Carter, ex-Adam Young Inc., now in Petry promotion dept. . . . M. D. Morris, ex-WATV & WAAT, Newark, now mgr. of radio WORC, Worcester, Mass. . . . W. Hugh Clark promoted to sales supervisor for CBC-TV's Ontario province; Donald J. Macdonald promoted to news mgr.; Charles Fouriezios named legal asst. to Ontario director Ira Dilworth . . . Glenn Boundy Jr., son of Storer chief engineer, appointed operations mgr., WGBS-TV, Miami . . . Jack Wormser, ex-ABC Hollywood, joins TV-radio dept., Erwin, Wasey & Co., Los Angeles . . . Allen McGinnis, from BBDO's TV dept., N. Y., transferred to Los Angeles as copy chief, succeeding Harry Bell, who returns to N. Y. as copy group head . . . Charles B. Bellante, ex-Soundmasters Inc., named technical director of TV films, Sullivan, Stauffer, Colwell & Bayles.

Donn B. Tatum, ex-NBC & ABC, and Donald A. Norman, ex-KRCA, Los Angeles, have formed Tatum-Norman & Co., consultants, with offices in Los Angeles & Oakland, Norman continuing his work with Television East Bay, 717 N. Highland Ave., Los Angeles, the Ch. 2 applicant for San Francisco backed by oilman Edwin M. Pauley.

Robert D. Swezey, WDSU-TV, New Orleans, appointed chairman of NARTB freedom of information committee, succeeding Edgar Kobak, radio WTWA, Thomson, Ga.; Grover Cobb, KVGB, Great Bend, Kan., named chairman of AM committee, succeeding James L. Howe, WIRA, Ft. Pierce, Fla.

Frank Stanton, CBS pres., disclosed by Defense Dept. as one of group of distinguished citizens acting as consultants with Defense Advisory Committee on Prisoners of War in framing the Code of Conduct released this week.

Frederick S. Siebert, director of U of Illinois School of Journalism, named acting director of the Graduate School's Institute for Communications Research for one year while Prof. Wilbur Schramm is at Leland Stanford.

PRINTERS' INK finalizes its preliminary estimates of 1954 advertising volume (*TV Factbook No. 21*, p. 22), as compiled for it by McCann-Erickson research dept. (Robert J. Coen), by reporting total was \$8,164,100,000—of which TV, now third among all media, accounted for \$803,600,000, or 9.8%. Figures represent what advertiser actually spends, which means, in case of TV, aggregate cost of time, talent & production. Talent & production factors for TV are stated as 1.75 times net time cost in case of network, 1.17 spot, 1.5 local.

The grand total for all media represents a 5.3% increase over 1953, comparing with \$7,755,300,000 for that year. That it's still going up, is evidenced in *Printers' Ink* advertising index for June, showing all advertising as whole running 10% ahead of year ago and 3% ahead of month previous, with network TV up 26% from June 1954 and 4% from May 1954.

Network TV accounted for \$417,900,000 of the 1954 national total, or 5.1% as against \$319,900,000 (4.1%) in 1953. Spot TV ran \$205,200,000 (2.5%) vs. \$145,500,000 (1.9%). Local TV ran \$180,500,000 (2.2%) vs. \$140,700,000 (1.8%).

Radio totaled \$564,900,000, or 7% of the 1954 national total, down from \$611,200,000 (7.9%). It broke down thus: network radio, \$114,500,000 (1.4%) vs. \$141,200,000 (1.8%) in 1953; spot radio, \$135,400,000 (1.7%) vs. \$145,600,000 (1.9%); local radio, \$315,000,000 (3.9%) vs. \$324,400,000 (4.2%).

Newspapers led the list, of course, accounting for \$2,695,300,000 of total or 33%, up 1.9% from preceding year. Direct mail was second, totaling \$1,202,400,000, or 14.7%, up 9.4%. Magazines represented \$667,900,000, or 8.2%, up .1%; business papers, \$407,500,000, or 5%, up 3.2%; outdoor, \$186,900,000, or 2.3%, up 6%.

Complete table is published in Aug. 19 *Printers' Ink* and should be used in lieu of the preliminary table as published in TV Factbook No. 21.

“Foundation of a big new TV network” is foreseen by *Forbes Magazine* in Aug. 15 article titled “Crack in the Curtain,” covering fiscal aspects of General Teleradio's purchase of Howard Hughes' RKO Radio Pictures Inc. (Vol. 11:30). “By renting the films to independent TV stations,” says *Forbes*, “General could compete with star-packed movies against the top attractions of the CBS and NBC networks without spending the heavy cash required for live shows and expensive coaxial cable fees. “It cites how General bought 30 oldies from Bank of America, and in barely a year has crossed \$2,100,000 on them, or almost double their cost, via its *Million Dollar Movie* syndication. It quotes Tom O'Neil: “I hope to make money with RKO very quickly. I'm a very nervous man.”

McKee & Albright, Philadelphia agency handling Breyers Ice Cream, Keebler Biscuit & Reading Coal accounts, planning to dissolve at end of year, partners Roy McKee and David Albright retiring.

Television Bureau of Advertising (TvB) reports 156 members as of Aug. 17, most recent being Washington Post Co.'s WTOP-TV, Washington & WMBR-TV, Jacksonville, and Cowles' KRNT-TV, Des Moines & KVTW, Sioux City.

Vice President Nixon to address Radio & TV Executives Society at first fall luncheon at Roosevelt Hotel, N. Y. Sept. 14; subsequent meetings will have FCC members as speakers.

Fortune Magazine raises onetime black-&-white page rate in Jan. to \$3670, up about 5%.

Station Accounts: Low budgets can mean high sales if used to maximum advantage—and 3 case histories of successful use of spot TV-radio, as reported in Aug. 15 *Sales Management Magazine* article by Victor Seydel, TV-radio v.p. of Anderson & Cairns, show how it can be done. The 3 companies are Brooklyn Paint & Varnish Co., which introduced a new product, Drem flat enamel, in 8-week spot campaign in N. Y. market at cost of \$16,000, resulting in busiest reorder season in its history from more than 160 dealers; Du Maurier Co., which promoted its filter-tip cigarettes in 13-week campaign in major markets at cost of \$40,000, and sharply reduced gap separating it from its competition; Associated Bulb Growers of Holland, whose spot campaign in 8 major markets to convince consumers to buy bulbs year-round cost \$80,000, resulted in big sales increase . . . Bowling bonanza for stations and sponsors is cropping up in several sections of nation as result of smash success of bowling shows on Chicago stations, reports Aug. 17 *Variety*; in addition to live shows on Chicago stations, it's estimated that series of bowling films, produced by Chicago auto dealer Pete DeMet (original sponsor of first live bowling show on WNBQ in 1953) and distributed by Walter Schwimmer Co., will be in 100-150 markets this winter. Griesedieck & Genesee Brewing Co. are among biggest multi-market sponsors . . . Bulova Watch Co. starts biggest spot campaign in its history Oct. 19 with barrage of 20-sec. announcements on 275 TV-radio stations on behalf of its "La Petite" series of ladies' diamond watches, thru McCann-Erickson . . . Kraft Foods using TV spot campaign to test-market new orange juice product packaged in paper cartons, thru J. Walter Thompson, Chicago . . . Monsanto Chemical to divert ad budget for "All" detergent from newspapers to daytime TV spot campaign in about one-third of all markets, thru Needham, Louis & Brorby, Chicago . . . Food sponsors are gravitating to

NBC-TV's *Great Gildersleeve*, which Kraft sponsored for 13 years on NBC Radio; 26 regional and local food advertisers have signed thus far as spot sponsors, led by Colonial Stores with 11 markets . . . Among advertisers currently reported using or preparing to use TV station time: Alkaid Corp., N. Y. (Alkaid's antacid tablets), thru Emil Mogul Co., N. Y.; B. & M. Corp., Houma, La. (Aluminum lawn umbrellas), thru Sewell, Carie & Radlauer, New Orleans; C-Johns Mfg. Co., Detroit (Cera-Lux car wax, Cinch shampoo for car interiors), thru Dick Frederick Agency, Detroit; Min-Sun Trading Co., Chicago (Chinese Maid food products and Canton Combo-Pack), thru Sherwin Robert Rogers & Assoc., Chicago; Oz Greeting Card Co., Los Angeles, thru Francis D. Gonda Co., L. A.; Leslie Salt Co., San Francisco, thru Honig-Cooper Co., San Francisco; Pacific Telephone Co., San Francisco, thru BBDO, San Francisco; Pen-Jel Corp., Kansas City (Pen-Jel fruit pectin), thru R. J. Potts-Calkins & Holden, Kansas City; Commercial Solvents Corp., N. Y. (Peak anti-freeze), thru Fuller & Smith & Ross, N. Y.; Clark-Cleveland Inc., Binghamton, N. Y. (Fasteeth, Motol, Thyoquent for the skin), thru Ralph D. Allum Co., N. Y.; J. Strickland & Co., Memphis (Hoyts cologne), thru Greenshaw & Rush, Memphis; Fisher-Price Toys Inc., E. Aurora, N. Y., thru Lloyd Mansfield Co., Buffalo; Silex Co., Chicago Electric div., thru Robertson Potter Co., Chicago; Vitality Mills Inc., Chicago (feeds), thru Standart & O'Hern Adv., Kansas City; Nenette Inc., Chicago (dust absorbing polisher), thru Marthens, Galloway & Simms, Chicago; W. E. Stephens Mfg. Co., Nashville (Stephens & Year's Work brand work shirts & pants), thru McDonald & Haggard, Nashville; Wasatch Chemical Co., Salt Lake City (Morgro garden products, All-in-One insecticide), thru Robert B. Ward Co., Salt Lake City; Deering, Milliken & Co., N. Y. ("Agilon" nylon yarn), thru Amos Parrish Co., N. Y.

Network Accounts: Philco drops alt. sponsorship of *Television Playhouse* on NBC-TV, which it has sponsored since 1948; Alcoa promptly picked up period (alternating with Goodyear) to start Oct. 2, Sun. 9-10 p.m., thru Fuller & Smith & Ross. Philco meanwhile is negotiating with NBC-TV on coverage of 1956 national political conventions, though spokesman says "asking price is very high." It has first option by virtue of sponsorship on NBC-TV in 1952. Westinghouse will sponsor on CBS, as in 1952 . . . Frigidaire to place *My Favorite Husband* in Tue. 10:30-11 p.m. time period it purchased last week on CBS-TV, starting in fall, thru Foote, Cone & Belding . . . Campbell Soups to sponsor *Lassie* on CBS-TV starting Sept. 11, Sun. 7-7:30 p.m., thru BBDO . . . Revlon drops alt. sponsorship of *Johnny Carson Show* on CBS-TV Thu. 9-9:30 p.m.; General Foods reportedly will fill in . . . Ralston Purina buys Wed. 10:30-11 p.m. on NBC-TV starting Oct. 12 for undetermined show, thru Guild, Bascom & Bonfigli . . . Beech-Nut to be alt. sponsor of *Dr. Spock Show* on NBC-TV starting Oct. 9, Sun. 3-3:30 p.m., thru Kenyon & Eckhardt . . . Procter & Gamble (Ivory) to sponsor *Fire-side Theatre* on NBC-TV starting Aug. 30, Tue. 9-9:30 p.m., thru Compton Adv. . . Mogen David Wines to sponsor Jan Murray's *Dollar a Second* on ABC-TV starting Sept. 2, Fri. 9-9:30 p.m., thru Weiss & Geller . . . CBS-TV discloses change in format of General Foods' *Our Miss Brooks* starting Oct. 14, Fri. 8:30-9 p.m.; it will feature "Mrs. Nestor's Private School for Girls" as story line . . . NBC-TV offers to affiliates for local sales the one-fourth sponsorship remaining open on NCAA football schedule and regional games, which have 3 network sponsors (General Cigar, Schick, Avco); Gulf Oil bought southwest regional games on 59 stations, thru Young & Rubicam . . . Morgan Beatty starts new series, *People*, on NBC-TV Aug. 21, Sun. 5-5:30 p.m..

Rate increases: WSB-TV, Atlanta, adds new Class AA hour (7:30-10 p. m., daily) at \$1000, min. \$200; WAGA-TV, Atlanta, adds Class AA hour (7:30-10 p. m. daily) at \$1000, min. \$200, Class A hour going from \$850 to \$900; KFSD-TV, San Diego, adds Class BB hour (7-7:30 p.m., 10-10:30 p.m., daily) at \$370, min. \$75; KHSL-TV, Chico, Sept. 1 adds Class AA hour (7:30-9:30 p. m., daily) at \$250, min. \$42.50, Class A hour remaining \$225; KEYT, Santa Barbara, Oct. 1 adds Class AA hour (7:29-9:59 p. m., daily) at \$450, min. \$90, Class A hour remaining \$400; KPIX, San Francisco, raises base hour from \$1250 to \$1500, min. \$260 to \$300; WDAF-TV, Kansas City, hour from \$860 to \$960, min. \$172 to \$192; WBZ-TV, Boston, from \$2000 to \$2250 & \$400 to \$450; KSTP-TV, St. Paul, from \$1200 to \$1450 & \$280 to \$320; KFYY-TV, Bismarck, N. D., from \$150 to \$200 & \$30 to \$40; KIEM-TV, Eureka, Cal., from \$150 to \$200 & \$30 to \$40; KBES-TV, Medford, Ore., from \$150 to \$200 & \$30 to \$40; KFBB-TV, Great Falls, Mont., raises Class B hour from \$112 to \$120.

Two new community antenna systems reported by NCTA: Lincoln TV System Inc., Wecoma Beach, Ore.; Abar TV Cable Co., Eugene, Ore. I. W. Brayer, owner of Whitey's TV & Cable Co., Douglas, Ariz., reports he's starting system in Williams, Ariz.

Reps: Storer reappoints Katz under long-term contract to represent 6 TV stations, 6 radio, continuing 16-year association; WPFA-TV, Pensacola, Fla., to McGillvra; KOMO-TV, Seattle, to NBC Spot Sales (from Hollingbery).

Jack Benny ends 23-year radio career this fall, will devote full time to *Jack Benny Show* on CBS-TV alt. Sun. 7:30-8 p.m. (Lucky Strikes), plus 6 productions in *Shower of Stars* series on CBS-TV every 4th Thu. 8:30-9:30 p.m.

NBC-TV leased famed Ziegfeld Theatre at 6th Ave. & 54th St., N.Y. for use as studio, mainly for color shows, takes over in Oct. for 7 years with 5-year renewal option.

Telecasting Notes: Boycott of sponsor products is clearly indicated in sharp resolution adopted by this week's San Diego convention of California State Theatrical Federation, comprising AFL unions and guilds with 67,000 membership, condemning Sterling Products Inc. for "evasion of American labor standards" in filming commercials in England "at rates of compensation for the English craftsmen and actions employed thereon that are below the standards established by American unions and guilds"—thus giving Sterling "an unfair competitive advantage" over those producing their filmed ads in U. S. . . . Pat Somerset, CSTF pres. and delegate from Screen Actors Guild, introduced resolution, which mentions particularly the British-produced commercials for Bayer Aspirin, Phillips Milk of Magnesia, Phillips Tablets, Dr. Lyons' Tooth Powder, Haley's M-O, Energine. Resolution is similar to one passed by N. Y. State Federation of Labor recently—may be forerunner of concerted effort by labor to fight shooting of film shows abroad . . . Britain & Mexico are chief locations for U. S. filming, though Germany gets its share of TV and theatrical films. This week, Valley Forge Beer's agency, Alvin Epstein Adv., Washington, was reported having ceramic and wooden dolls for its stop-action TV commercials made in Germany, the filming being done in Munich . . . Shortage of TV production personnel—cameramen, film editors, sound editors, sound technicians, etc.—is beginning to be felt in Hollywood, reports *Billboard*, and may become chronic. Employment has ranged from about 40% in late spring to 98%-100% in Aug. & Sept. . . . IATSE, which trains own people, claims there's no real shortage, responds to charges of being closed corporation, almost impossible to get into, by noting it's merely protecting its own—though unions' unpreparedness for

TV boom is manifest from fact that cameramen's local had 850 members in 1946, now has 1050, mostly cartoon filmers . . . Y. Frank Freeman, Paramount Pictures production v.p., tells *Film Daily* his company has no plans to follow example of other majors in going into TV film production, will rent new \$2,000,000 TV plant (5 stages, with entirely separate producing facilities) to other producers, including own KTLA . . . National Society of TV Producers, Hollywood (Max Gilford, gen. counsel) plans Sept. meeting to consider code for TV similar to theatrical movie code . . . Walt Disney expected to produce one of *Screen Directors Playhouse* series starting on NBC-TV Oct. 5 (Wed. 8-8:30 p.m.), which means show would be directly competing with his *Disneyland* on ABC-TV, Wed. 7:30-8:30 . . . Another live repeat: *Goodyear TV Playhouse* to do over again Robert Alan Aurthur's "Spring Reunion" Aug. 28, first seen in April 1954 . . . Another TV star wins Hollywood stardom: James Daly, who did *Foreign Intrigue* series in Europe, plays attorney role in "The Court Martial of Billy Mitchell," with Gary Cooper . . . Edinburgh Film Festival has selected ABC-TV cameraman Leroy Stone's documentary on the Fulton Fish Market for showing.

Surprising finding in Trendex survey of live vs. film TV preferences of the audience: 51.8% preferred live shows, 6% preferred film—and 42.2% expressed indifference! Telephone survey first asked what program was being viewed at time of call and whether it was live or film; 70.8% correctly identified production as live or film, 9.7% were wrong, 19.5% didn't know. Those favoring live shows said it was because pictures are clearer, more realistic; those favoring film said it was because scenery is better, production more finished, more action.

WITH UHF CPs being cancelled left and right, including 2 more this week—WTBO-TV Cumberland, Md. (Ch. 17) and KCTL, Seattle (Ch. 20)—comes now Herbert Mayer and applies for Philadelphia's Ch. 23, prompting speculation he'll also apply for uhf elsewhere.

Mayer's TV experience in both uhf & vhf is one of the sagas of the industry, but he gives no indication in his application just how he expects to put uhf over in all-vhf Philadelphia. But after his fabulous success in TV, starting when most broadcasters considered TV a will-o'-the-wisp, then selling his WXEL, Cleveland (Ch. 8), KPTV, Portland, Ore. (Ch. 27) and Empire Coil Co. to Storer for \$10,000,000 (Vol. 10:44), everyone feels he must have something unusual up his sleeve.

He proposes to build 266-kw station for \$414,100, operate it first year for \$500,000, taking in \$200,000—operating with staff of 34. He lists funds available as "in excess of \$3,500,000." Currently, he's on a round-the-world trip with his family, had his onetime partner Martin W. Kramer, of New York, file the application.

* * * *

FCC commissioners are still wracking their brains about allocations problems. Comr. Hyde is planning to give his analysis of situation at Washington Lions Club luncheon at Mayflower Hotel, Aug. 31. Comr. Lee, ex-FBI chief clerk who likes to do his own on-the-spot checking, is out examining station operations. Recently, he breezed through New York ad agencies and came back with opinion there's nothing "mysterious" about reluctance to use uhf; that sponsors are interested solely in circulation.

Allocations shifts continue to be sought, meanwhile: (1) Jacksonville, Fla. educators asked FCC to reserve Ch. 36 for them instead of Ch. 7. They noted that WJHP-TV,

now using Ch. 36, has offered them its facilities, said they could never afford to build Ch. 7 station themselves; they asked that Ch. 7 be given to WJHP-TV. (2) Video Independent Theatres, which last week asked shift of Ch. 8 from Woodward, Okla. to Elk City, this week requested that Ch. 9 be moved from Monahans, Tex. to Hobbs, N. M., to be replaced by Ch. 35.

One of cutest documents filed with FCC in many a moon was request for oral argument and list of exceptions submitted by WWL, New Orleans, contesting examiner's initial decision favoring WTPS for Ch. 4. WWL's puckish counsel Paul Segal had document printed on half-dozen colors of paper, in inks of several colors, drawing attention to examiner Elizabeth Smith's preference of WTPS on basis of what she considered were superior color plans.

In Court of Appeals, WENS, Pittsburgh (Ch. 16) was turned down in its request that CP of merged WWSW-WJAS be stayed. It was 2-1 vote, Judge Fahy dissenting from Judges Miller & Bastian. Another decision was appealed, meanwhile—KXOA, Sacramento (Lincoln Dellar) contesting grant of Ch. 3 to KCRA (Ewing C. Kelly).

Low-power TV rules should be relaxed more, RETMA told FCC this week, stating: "The initial installation cost of a TV station is incurred only once by a station operator; it is the daily operating cost of small stations which will undoubtedly prevent the early widespread use of low-power TV broadcasting. Therefore, further attention should be given by the Commission to those rules governing daily operation which will permit savings in daily operations. The use of remote control and directional antennas, for example, will permit the low-power station to function at reduced cost. It may also be appropriate to consider that the 100-watt minimum power rule could be waived in certain cases upon proper showing."

FARM TV SET counts for Kansas and Wisconsin were released this week by Census Bureau as part of its Oct.-Nov. 1954 Census of Agriculture. Based on 20% sample, Wisconsin was shown to have TVs on 60,333 of its 153,558 farms, or about 40%. In Kansas, 34,004 of 120,167 farms—or nearly 30%—are TV-equipped. Wisconsin has stations in Milwaukee, Madison, Eau Claire, Green Bay, La Crosse, Marinette & Wausau, also receives stations in Minnesota and Illinois. Kansas stations are in Great Bend, Hutchinson, Pittsburg, Topeka & Wichita, with out-of-state viewing possible from stations in Missouri, Nebraska & Oklahoma.

Note: Previously published tabulations—Nev., N. H., Vt. (Vol. 11:28); Wyo. (Vol. 11:29); N. D. (Vol. 11:30); Ida., Utah (Vol. 11:31); Mont., S. D. (Vol. 11:32); Colo., Minn. (Vol. 11:33).

Reaction at FCC to illegal boosters in Northwest, which continue operating despite pending Commission action against them, has two phases: (1) Operations are against the law, must stop. (2) Demand for service, indicated by the boosters, should be met by Commission action. One plan getting some consideration at FCC is to establish a new class of service—tiny uhf “translators,” operating in band set aside for them, perhaps to 10 uhf channels. They’d use as little as one watt, operate unattended, free from compliance with many technical standards which make regular stations so expensive, financed by municipalities, clubs, etc.

Screen Actors Guild members went back to work this week, ending 12-day strike against TV film producers (Vol. 11:33) followed ratification of 5-year contract providing for increases in minimum rates, residual payments from second to sixth runs of films and other fringe benefits. New contracts call for payments of not less than 35% of minima for second runs, 30% for third re-runs, 25% for fourth. Minimum daily wages for actors was increased from \$70 to \$80. Strike idled estimated 10,000 actors and tied up about 400 producers.

Rocky Marciano-Archie Moore fight via theatre TV Sept. 20 will have at least 100 theatres hooked up, as against peak of 83 for Marciano-Cockell bout in May, reports TNT pres. Nate Halpern. It’s blacked-out in 50-mi. radius of Yankee Stadium, nearest to carry it being a drive-in on Long Island.

TV consulting service to builders, architects & contractors, designed to help them plan construction of hotels and other gathering places with TV originations in mind, is being offered by Miami’s WTVJ, whose gen. mgr. Lee Ruwitch sent letter to prospects this week. Service will be handled by Jack Shay, operations v.p., who has supervised technical installations of TV equipment for some 90 network originations by WTVJ. Station itself is expanding equipment, has ordered new 35-ft. trailer capable of handling color which it says will be “the largest remote unit in the world.”

What Britain’s commercial TV is offering the public will be subject of half-hour film on CBS-TV, Sept. 25, or immediately after new ITA services begin Sept. 22. Planning to go to London for commercial debut, among other U. S. notables, is NBC pres. Pat Weaver. It’s estimated, by London research firm known as Political & Economic Planning, that TV will account for \$56,000,000 worth of ad billings in first year, about 10% of England’s ad budget, going to \$84,000,000 in 1957, \$100,000,000 in 1958.

NBC-TV awarded first 2 scholarships this week in program to help raise standards of drama shows. The Presidents’ award went to Robert E. Dierbeck, 27, TV coordinator of Milwaukee Public Museum, who gets \$6000 cash prize to work for one year at NBC-TV on documentary dramas. The employes award went to Frank M. Skinner Jr., 24, NBC page who gets \$2700 cash prize and year’s scholarship to Yale for study of scenic design.

KTRE-TV, LUFKIN, TEX. (Ch. 9), opens up new TV area in heart of rich timber country which v.p.-gen.-mgr. Richman Lewin says has "the thirstiest-for-TV population in Texas," being 83 mi. from nearest other station—in Tyler, Tex. It aired first test patterns Aug. 17 but had to go off for adjustments and expected to be on test schedule by week's end. It's 441st on-air station, plans big inaugural Aug. 31 with Mrs. Oveta Culp Hobby, recently in President Eisenhower's cabinet, as guest of honor, and goes on regular commercial schedule Sept. 1 as satellite to Mrs. Hobby's KPRC-TV, Houston (Ch. 2).

Though it will get full NBC schedule via own 124-mi., 2-hop microwave link with Houston, reported "working perfectly," KTRE-TV will also program locally and has \$110,000 worth of business already signed, reports Lewin. It has 5-kw GE transmitter with 6-bay antenna on 540-ft. Andrews tower. It's owned mainly by local business group headed by R. W. Worthman Jr., but has *Shreveport Times'* Henry B. Clay, who heads upcoming KTVH, Little Rock (Ch. 11), as 11% stockholder. Danny Kirk, ex-WCHS-TV, Charleston, W. Va., is program mgr.; Harold Riley, ex-KTRK-TV, Houston, production mgr.; Murphy Martin, sales mgr.; Fred C. Hill, chief engineer—latter 2 from radio KTRE.

KTRE-TV will have one local & national rate \$150 an hour, which will be discounted 25% if time is purchased for simultaneous telecasts with KPRC-TV. Rep is Venard, Rintoul & McConnell.

* * * *

Chicago's educational WTTW (Ch. 11) got its antenna up Aug. 14 but didn't meet test target this week because of recent storms, reports exec. director John W. Taylor. It may start testing week of Aug. 22, plans to put on city-wide faculty meeting with city's board of education Sept. 6, first day of new school term, and to start regular programming Sept. 19.

Only new equipment shipment reported this week was 10-kw RCA to WTOK-TV, Meridian, Miss. (Ch. 11). KPTV, Portland, Ore. (Ch. 27), reported its high-power uhf antenna as on hand and it expects to increase shortly to a megawatt, making it third 1,000,000-watt uhf station. Hike was originally scheduled for July 1, but antenna was dropped during fabrication at RCA plant (Vol. 11:22). Other megawatt stations are Wilkes-Barre's WILK-TV (Ch. 34) and WBRV-TV (Ch. 28).

* * * *

In our continuing survey of upcoming stations, these are latest reports from principals:

KFJI-TV, Klamath Falls, Ore. (Ch. 2), has delayed anticipated summer or fall start, despite delivery of 5-kw GE transmitter, pending FCC action on application of KBES-TV, Medford, Ore. (Ch. 5), for new site on Soda Mt., 25½ mi. to east, which KFJI gen mgr. Alan K. Abner says "would mean [if granted] the elimination of any national business for the station [KFJI-TV] that could deliver only one market [and which] would mean that the Klamath Falls and surrounding market would no longer be a reasonable risk to the TV investor." Studio-transmitter house, he reports, is half built. Plan is to use 120-ft. tower on 6000-ft. peak. Base rate would be \$150.

WAIQ, Andalusia, Ala. (Ch. 2), third educational outlet granted Alabama Educational Television Commission, now has Jan. 1, 1956 test target and will program by Jan. 15, reports pres. R. D. Hulbert. It has ordered 35-kw GE transmitter with 4-bay antenna, plans 500-ft. tower,

begins construction about Nov. 15. It's to be hooked up with WTIQ, Munford (Ch. 7) and WBIQ, Birmingham (Ch. 10), now operating, to form state network. Thad Holt is consultant for the state commission; James Evans, chief engineer.

WORA-TV, Mayaguez, Puerto Rico (Ch. 5), owned by sugar grower Alfredo R. deArellano Jr., reports its GE transmitter is on hand, studio-transmitter building ready, 100-ft. tower planned—and tests should begin Sept. 25. It will be affiliated with George Mayoral's WJMR-TV, New Orleans. Base rate will be \$120. Rep is Adam Young.

WCTV, Thomasville, Ga. (Ch. 6), is still aiming for Sept. 1 tests, Sept. 15 program schedule, with CBS & NBC affiliations, reports gen. mgr. Herschel Graves, promoted from radio WTAL, Tallahassee, 37½ mi. distant. WTAL owner John H. Phipps, of the noted Fla. financial family, acquired CP recently from ex-Gov. E. D. Rivers Sr., along with radio WKTG, Thomasville (Vol. 11:20). Phipps also owns WTYS, Marianna, Fla. GE 35-kw transmitter has been installed, 669-ft. tower by Tower Structure Inc. is being readied for 5-bay antenna due to go up Aug. 22. Base hourly rate will be \$200. Rep is Meeker.

WDBJ-TV, Roanoke, Va. (Ch. 7), is now installing 5-kw DuMont transmitter, has taken delivery of RCA 6-bay antenna, but awaits steel for new top for tower to be delivered in latter Aug. Accordingly, reports gen. mgr. Ray P. Jordon, it has pushed test target forward to Sept. 22, expects to begin CBS programming about Oct. 1. Network rate will be \$500. Rep is Free & Peters.

WDAM-TV, Hattiesburg, Miss. (Ch. 9), headed by Dave A. Matison Jr., operator of 3 Miss. radio stations, now plans "early 1956" starting date. Equipment has not yet been reported, nor rep chosen.

KTHV, Little Rock, Ark. (Ch. 11) has Oct. 15 test target date, will start programming early in Nov., joins CBS as of April 1, 1956, meanwhile will carry CBS & ABC programs not cleared by present affiliate KATV, Pine Bluff-Little Rock (Ch. 7), reports Henry B. Clay, exec. v.p. *Shreveport Times* interests (KWKH) owns 42%, *Arkansas Democrat* 32% of grantee company. It has ordered 50-kw RCA transmitter for Sept. 6 delivery, 12-bay antenna for Oct. 1, will transmit from 1175-ft. Ideco tower, which will also support antenna of KARK-TV, Little Rock (Ch. 4) and on which construction has begun. Transmitter building is about 40% complete, and work on studio building started this week. Also being constructed is 150-ft. tower with 6-bay RCA antenna for auxiliary purposes, rising about 800 ft. above average terrain, also to be ready by early Oct. Gen. mgr. will be B. G. Robertson, gen. mgr. of 50-kw radio KTHS. Rep will be Branham.

WHTN-TV, Huntington, W. Va. (Ch. 13) should make Sept. 15 test target, Sept. 25 ABC network interconnection, if RCA equipment is delivered on time, reports Fred Weber, v.p.-gen. mgr., ex-WFPG and now-silent WFPG-TV, Atlantic City (Ch. 46). It has 5-kw RCA driver & 20-kw GE amplifier on order, along with custom-built RCA antenna. Control is held by A. B. Hyman, pres., head of local theatre group. Base rate will be \$450. Rep is Petry.

* * * *

CKVR-TV, Barrie, Ont. (Ch. 3) is due to get delivery of 5-kw GE transmitter Aug. 16, will have studio-transmitter house completed shortly, begins erection of 393-ft. Stainless tower Aug. 25. Test target is now Sept. 10, reports Pres. Ralph T. Snelgrove, with programming Sept. 15. Newly added to executive staff are Charles Tierney, ex-CJFX, Antigonish, N. S., as sales mgr. and Claude Baikie, ex-CHCH-TV, Hamilton, Ont. as production mgr. Base rate will be \$240. Rep is Paul Mulvihill.

DEALERS BUOYED BY RISING TV STABILITY: Price increases and high inventories are factors that normally might worry TV dealers as they prepare for fall season. But they aren't worrying in the least now; in fact, they generally feel that both price hikes and inventories can be used to their advantage.

Some 47 top TV-appliance dealers attended NARDA-sponsored First Institute of Management at Washington's American U this week (see p. 12). In talking to many of them, we got the distinct impression that they're far more encouraged by stabilizing factors in TV trade than they're concerned with ominous portents.

One of most stabilizing influences, they generally feel, is slow but steady decline of discount house competition. Many feel they have the most flagrant discounters on the run -- driving them out of business or forcing them to compete on equal terms -- and were heartened when one of the biggest manufacturers, Philco exec. v.p. John M. Otter, agreed. He told them at luncheon session:

"The discounter has learned his lesson -- he has to earn a profit to stay in business, and as a result he's getting a higher price for his merchandise today than ever before. Those who are still left in business are assuming the normal overhead of hiring salesmen and giving service."

Price increases already announced, and the certain prospect of more to come, seem to hold no fears for the dealers now. Two major reasons are given for their apparent lack of concern: (1) Many are rather heavily stocked in old merchandise at lower prices, feel it will take them until perhaps early Nov. to work off excess inventories of old models. (2) Their markets generally are proving more robust than they expected -- as witness record retail sales of 3,202,995 in first half 1955 -- and view is that they can pass increases to consumers with little effect on sales.

* * * *

More details on Whirlpool-Seeger-RCA merger and how the new white goods giant will operate came out this week in press conference with Elisha Gray II, pres. of Whirlpool, and in his letter to stockholders of both Whirlpool and Seeger. It's set for ratification by stockholders Sept. 12, and Mr. Gray said he anticipated that new company, Whirlpool-Seeger Corp., would be a reality Sept. 16. Officers of new corporation are: chairman, Walter G. Seeger, chairman of Seeger; pres., Mr. Gray; v.p., John S. Holl, pres. of Seeger; v.p.-treas., Mason Smith, Whirlpool financial v.p.; secy., Edward C. Cudmore, Whirlpool comptroller. In addition, directors who will serve until first annual meeting of shareholders are Sears Roebuck's R. E. Brooker & Edward Gudeman, RCA's Frank M. Folsom & Charles M. Odorizzi, investment banker Maynard H. Murch & ex-Whirlpool v.p.-treas. Frederick S. Upton.

First appliances under RCA-Whirlpool brand, laundry equipment, will hit the market in Jan. 1956, said Mr. Gray. Eventually there will probably be a full line, including kitchen cabinets, dishwashers, food disposers, sinks, water heaters and vacuum cleaners. He reiterated that there are no immediate plans for distribution changes -- but said distributors will "want to rearrange their lines" so they can handle both RCA's TV line and new RCA-Whirlpool appliances. Company does not plan to utilize RCA Service Co., he declared.

Proxy notice places combined sales of Whirlpool, Seeger & RCA stove and air conditioner depts. last year at \$307,600,000, earnings nearly \$14,000,000. RCA stove-air conditioner operations showed net loss of \$2,400,000 prior to adjustments for income taxes. Pro forma balance sheet, assuming merger in effect, indicates total assets of \$123,700,000 for new company. Whirlpool's present long-term indebtedness of \$10,200,000 will be paid off, according to proxy statement. Whirlpool-Seeger will pay RCA \$86,667 per month in exchange for 5-year agreement covering advice & assistance on manufacture, on research & development, economic planning, etc.

Brief highlights of other major trade developments this week:

Copper Price Up: Prospect of further TV price increases heightened as three domestic producers -- Anaconda, Phelps Dodge and American Smelting & Refining -- boosted copper prices from 36¢ to 40¢ per lb. They attributed increase to higher labor costs resulting from recent strike, higher prices in European markets, plus pressure from Chile to make its prices competitive with domestic producers. The 40¢ price was said to be highest since 1872.

Used Tubes: Philco's plan to smash what it calls "the multi-million dollar racket" in resale of used TV-radio tubes, by giving 5¢ credit to servicemen for each old tube turned in (Vol. 11:33), got rather chilly reception from other set makers. No manufacturer announced immediate plan to join Philco in offering credit, though service groups generally endorsed idea. National Alliance of TV & Electronic Service Assns. was to discuss subject at its convention in Chicago, Aug. 20-21.

Economic Outlook: Is the current record prosperity based on real money or merely easy credit? President's Council of Economic Advisers wrestled with problem at meeting this week -- and was said to be divided on whether to ask for economic controls more stringent than such financial manipulations as recent Federal Reserve Board increase in banks' interest rate. The top-level advisers were apprehensive about possible new inflationary spiral resulting from recent wage-price increases. Administration, however, was said to be firmly committed to avoid use of any but indirect controls except in national emergency. Meanwhile, consumer installment credit outstanding rose to all-time high of more than \$33 billion in July.

Production: TV output totaled 154,798 week ended Aug. 12, compared to 134,959 preceding week and 113,864 week ended July 29. It was year's 32nd week and brought TV production for year to date to about 4,540,000 vs. 3,500,000 in same 1954 period. Radio production totaled 240,148 (109,334 auto) week ended Aug. 12, up from 209,689 preceding week and 203,343 week before. For 32 weeks, radio output was estimated at 8,250,000 vs. 6,220,000 in corresponding period of 1954.

COMMENTS ON COLOR set sales prospects, obtained from manufacturers in our current survey (p. 1), shows that they all look hopefully to color as a great new phase of the business-- though they differ markedly on when they think color will reach that stage.

Interesting aspect of survey is that the manufacturers can have strong opinions on color, yet disagree so substantially in their analyses and predictions--content to let events prove them right or wrong. Most are quite willing to be identified though a few chose not to be at this time. Following are excerpts from replies received to date:

James H. Carmine, Philco pres.: "We are consistent in our opinion that production of color TV receivers will progress slowly. The industry is only just entering the real training period on all phases of color TV--service and field training, manufacturing experience, production of color tubes, to mention only a few. Further, industry has taken only the first steps toward gaining necessary experience in programming, camera techniques and broadcasting . . . All of the factors involved are of major importance. From a short range point of view, I want to point out that it has taken several years to build even the first color receivers which we all hope will give stable, satisfactory service in the field. We are now almost in Sept. and only a very few color TV receivers have been manufactured. As a consequence, it is inevitable that the quantity of color receivers available this fall must be very limited. All these considerations have entered into our opinion that it will be summer and fall of 1956 before manufacturers can achieve even minimum volume production of color receivers that can be safely sold to consumers . . . There have already been too many false starts in color TV. The industry cannot

afford any more. That is why Philco will move forward carefully and very cautiously during the fall season this year."

Robert W. Galvin, Motorola exec. v.p.: "NBC and CBS are to be commended for their ambitious color programming schedules this fall. NBC's program is particularly noteworthy. The quantity, quality and diversity of these shows have already re-enthused our distributors for the color market and will awaken increased interest on the part of the dealers. The combination of these programs and increased enthusiasm at the marketplace will improve the market prospects substantially over last year. We anticipate a steady, though moderate, sale of color receivers this fall."

A. L. Chapman, Sylvania v.p.-operations: "It is my opinion that the increased amount of programming and telecasting in color which is planned for this fall and for next year will stimulate consumer interest in color TV sets. It appears now that there will be some 25,000 sets sold in 1955, and it is very possible that the industry will sell from 200,000 to 250,000 sets in 1956. This fall could very likely be the starting point for color, with color then having a slow but steady growth in the coming years."

E. W. Gaughan, Capehart-Farnsworth v.p.-gen. sales mgr.: "Color TV could be sold in a fairly large volume beginning the middle of Sept. this year and the balance of the season if the dealers will take an interest in displaying, promoting and demonstrating color TV sets. However, I am fearful that the average merchant or dealer will place a color set on their floor and expect the public to break down their doors in an effort to make a purchase . . . As far as Capehart is concerned, we fully intend to do our part in promoting, advertising and conducting both sales & service clinics in Ft. Wayne and out in the field to create more interest . . . It may be well to mention that Capehart is one of the very few in

the electronics field who have to date invested more than \$1,000,000 in research, development, tooling and design in the color TV field . . . We are not dependent upon any other manufacturer for a chassis, circuitry or design when it comes to color TV. If the retailers will show an interest, it is my personal opinion that close to 100,000 color sets could be sold by the industry the balance of this calendar year. Next year I believe this figure could far exceed 300,000."

Robert S. Bell, Packard-Bell exec. v.p.: "While I would certainly be delighted to be an optimist about the earlier part of this period—i.e., the coming fall—I fail to see where there will be much headway made in selling the product to the people. However, the idea of color TV as a well-known art and as commercially feasible should be a reasonably short additional job, and I hope and look forward with confidence that within the next year and a half we will get to the point where they can be produced at a price which will reach at least a fair portion of the market. It is my firm belief that we do not have a chicken and egg fight at all in color TV as we did in black-&-white, and I just feel certain that as soon as adequate programming, amounting to an hour or more every night, is available, people will begin to believe that color is really here. Up to now, they have been deluged with about 99% misinformation for the last 7 years. I think it will take a little while to break through the crust of their indifference to any ballyhoo."

Raymond W. Durst, Hallicrafters pres.: "It will take some time for the public to get a greater awareness of the magic and excellence of color. My guess, and it is just that, is that there will be from 25,000 to 50,000 color receivers sold at retail between now and Dec. 31. I hate to make what might appear like a very unrefined guess of the retail sales in the calendar year 1956 but I think it has a potential of from 500,000 to 1,000,000 receivers. The so-called 'carriage trade' alone can account for a goodly number."

Morris Sobin, Olympic pres.: "We believe that the continuing efforts of RCA and others in their broadcasting activities as well as the recent stepped up consumer advertising campaigns will effectively overcome the inertia which now prevails on the part of the public. At the present rate of interest we feel that by this Christmas a small, modest quantity of color receivers will have been sold at the retail level. Olympic has been keeping abreast of color receiving developments and our factory is equipped for color production in moderate quantities. Several pilot model units have been produced and small-scale production is scheduled for Nov. Olympic will proceed slowly with color production and as market tests indicate increasing demand, production will be increased accordingly."

C. J. Hunt, Stromberg-Carlson TV-radio v.p.: "With the price tags that are on the 21-in. color sets, sales are bound to be limited. On the other hand, I feel that with the type of programming that is coming considerable consumer interest will be created and if the industry can produce 21-in. instruments at a greatly lowered retail price in 1956 it will sell all it can make."

Ernest Alschuler, Sentinel pres.: "We have felt convinced that color TV was coming along in a most encouraging manner and of course, now with the release of the news that RCA-NBC color plans are going to be on such favorable basis, we are quite pleased to have our views confirmed. Our confidence in color TV is evidenced by our devoting a considerable amount of effort in the complete engineering of our color TV receiver, and we have just recently decided to increase our planned production."

H. C. Bonfig, CBS-Columbia pres.: "The increased programming projected by the networks this fall, plus the programming planned by a number of local stations, will help stimulate color TV set sales and increase interest in the color medium. Sales in the fall of 1955 will be better than those we had in 1954, due to this increase in programming. In 1956, we will see a substantial increase over the 1955 color sales figure. Right now, one of the principal deterrents to sales is the price factor. As long as the consumer weighs the black-&-white prices today against the possibility of color set prices tomorrow this will be a stumbling block. When color sets get to the \$400-\$500 level, they will be able to be sold to the mass market. It's difficult to say when that level will be achieved, as it may take some time. Perhaps it will arrive by the end of 1956."

* * * *

Here are the views of those few manufacturers who prefer not to be identified now:

One fairly large producer estimated that this year's production would be 60,000 sets, sales 50,000; for 1956, he predicted production of 250,000, with 200-220,000 sales.

A medium-sized producer stated: "I believe that there may be a market for between 5000 and 10,000 sets this year. As regards next year, I would rather see what happens between now and the first of the year before making any estimate."

A smaller set maker writes: "With the type of color-casting plans that RCA has announced, color TV should at last get started. Receivers have been sufficiently improved so that they produce an entirely commercial picture. Although units of sales this fall should not be significant, total dollars will be important. In 1956, color TV will represent an important part of the TV industry's billing."

Another small producer says: "In view of the strong emphasis which NBC and CBS are placing on color broadcasting for this coming fall, I believe this will serve to create a definite continuing interest in color by consumers. The extent of this interest will depend on the quality of the programs, and more especially, the quality of the color reception and the price of color TV receivers. For the first time, it appears that color TV will have a continuing place in the market."

Still another small manufacturer puts it this way: "I am still of the very firm opinion that the color set market will not get off the ground until such time as sets can be retailed for under \$500 with a reasonable profit to the dealer. Even at this retail figure I am of the opinion that it would not represent more than 10 to 12 percent of the total set sold. However, these percentages can accelerate rapidly as costs drop."

GE small appliance div. has cancelled all advertising in *Life Magazine*, shortly after June 20 editorial stating that fair trade is "dying" and expressing "good riddance." GE is one of most active fair traders, particularly in small appliances. GE's action, explained company spokesman, was prompted by decision to divert more advertising to network and spot TV and "has no other significance whatever." Division had been spending more than \$500,000 a year in *Life*.

British TV production in first 6 months totaled 776,000, up 51% from the 508,760 sets produced in first half of 1954, reports British Radio Equipment Manufacturers Assn. Output of radios, including auto sets, totaled 1,109,431 in first half vs. 885,677 in first 6 months year ago. During June, said BREMA, about 57% of TV sales were on installment credit, which is being further restricted in second half of year under new regulations.

Topics & Trends of TV Trade: NARDA rates kudos of the whole industry for sponsoring First Institute of Management Conference for TV-appliance dealers this week at American U, Washington—and some who participated in and observed the sessions are enthusiastically suggesting it should be an annual affair, perhaps expanded on a district basis in order to take in more “students.”

Workshop sessions and luncheon speakers comprised the 6-day “course”, attended by 47, and these were topped by “bull sessions” about the business that lasted far into the night in the campus dormitories where they were billeted.

One of most important, timely and lucid speeches, to our thinking, was Aug. 15 talk by Thomas F. Joyce, pres. of Raymond Rosen & Co., Philadelphia RCA distributor; we’re printing it in full text as Special Report herewith, and we’ll run off reprints for other distributors (who may want them for their dealers) at nominal rates on request.

Joyce defended role of the distributor, but only if he performs his proper responsibilities for his “dealer partners.” He listed these as carrying adequate inventories of end products and replacement parts, providing adequate credit facilities, giving sales & merchandising assistance, training dealer servicemen, giving dealer “maximum territory and market protection.” In reply to questions after speech, he told the dealers they had no reason to fear discount houses unless the discounters were buying at lower prices.

Here are highlights of some of the topics covered by other speakers:

Servicing—Magnavox gen. sales mgr. Ray Yeranko said 50% of dealer’s TV business depends on how well he services products he sells. He urged them to equip service depts. with accurate test equipment, check every set for performance and appearance before delivery, have service technician install every set and instruct customers on operations for best results, advertise service depts., develop new prospects through leads furnished by service depts.

Sales Training—Philco exec. v.p. John M. Otter urged dealers to tap college graduates and teachers as sources of salesmen. “Point out that they can make more money with you than with a wholesaler,” he said, referring to fact that many young college graduates want to join distributor organizations for training. He also stressed necessity of proper training of salesmen, urged dealers to hold daily sales meetings.

Consumer Attitudes—Magnavox v.p.-gen. mgr. Leonard F. Cramer said public is demonstrating willingness to buy up into higher-priced merchandise, and it’s up to dealer to develop that tendency. He urged dealers to emulate auto agencies in reselling public on pride of ownership, saying that an auto gives its owner only a fraction of the pleasure derived from TV set.

Dealers and distributors attending Aug. 15-20 sessions: Vergal Bourland, Ft. Worth; David S. Brihart, Scottdale, Pa.; Robert H. Cloud, Lexington, Ky.; Paul Dettling, Jackson, Mich.; Mort Farr, Upper Darby, Pa.; Steve Feinstein, Boston; Mike Flynn, Washington, D. C.; Carl E. Forsberg, Brockton, Mass.; Don Gabbert, Minneapolis; Stuart Greenley, Flint, Mich.; Robert Grinnell, Flint; Stewart Grove, Flint; J. H. Hampton, Pontiac, Mich.; B. F. Hannah, Tucson; Scott Hanson, Louisville; J. D. Hodsdon, Portsmouth, Va.; S. M. Hollis, Memphis; Earl T. Holst, Des Moines; J. R. Hopkins, Hollywood, Fla.; Charles H. Jett, Lexington, Ky.; Robert Justis, Newport, Del.; J. W. Leon, Toledo; Frank Low Jr., Rocky Mount, N. C.; Paul Meyer, Mankato, Minn.; Francis L. Monette, Lowell, Mass.; James I. Morningstar, Dawson, Pa.; George Pazik, Milwaukee; Henry F. Pieratt, Lexington, Ky.; Nick Powell, Richmond, Ky.; Harry B. Price Jr., Norfolk; Lawrence F. Rahn, Brookfield, Ill.; Max Rhodes, Prospect Heights, Ill.; Jerry Ritter, Port Huron, Mich.; Edward Rosen, Philadelphia; Fred O. Schwender, Utica, N. Y.; J. H. Shenk, Harrisburg; D. M. Shoffner Jr., Port Huron, Mich.; A. H. Smith, Gainesville, Fla.; Ken J. Stucky, Ft. Wayne; Robert B. Sudd, Oildale, Cal.; W. L. Tait, Portland, Ore.; F. Engle Taylor, Columbus, O.; Don C. Tobin, San Francisco; J. R. Waters, Fairmont, W. Va.; Gross Williams Jr., Shreveport; J. B. Wood, Norfolk.

SHIPMENTS OF TVs to dealers in first half of 1955 totaled 3,084,717, compared to production of 3,828,793, according to RETMA state-by-state report released this week. They compared with 2,667,603 shipped in first half of 1954, when production was 2,845,147. New York led, with 299,913; California was next, 257,209; Pennsylvania third, 190,012. June shipments were 407,087, compared to 348,181 in May and 297,505 in June 1954. Here’s state-by-state report for first 6 months (county-by-county tables available to members from RETMA on request):

State	Total	State	Total
Alabama	55,072	New Hampshire	11,016
Arizona	17,299	New Jersey	98,043
Arkansas	36,884	New Mexico	10,961
California	257,209	New York	299,913
Colorado	22,411	North Carolina	82,950
Connecticut	41,115	North Dakota	9,873
Delaware	6,430	Ohio	153,946
District of Columbia	31,400	Oklahoma	46,059
Florida	105,008	Oregon	40,546
Georgia	68,413	Pennsylvania	190,912
Idaho	13,121	Rhode Island	14,216
Illinois	166,254	South Carolina	47,494
Indiana	77,357	South Dakota	10,030
Iowa	43,354	Tennessee	65,307
Kansas	40,710	Texas	186,941

Mississippi	29,549		
Missouri	81,938	U. S. TOTAL	3,071,906
Montana	9,227	Alaska	4,590
Nebraska	24,807	Hawaii	8,221
Nevada	4,232		
		GRAND TOTAL	3,084,717

Raytheon introduced twin-speaker “Super T” transistorized portable radio, which company claims can play for 2 years on single battery with normal use, as one feature of its TV-radio line shown to press at New York’s Hotel Astor Aug. 18. Henry F. Argento, TV-radio v.p., said: “This radio completely removes any necessity for the plug-in variety of radio . . . as we have known it for 28 years.” It retails for \$89.95. The TV line has a 17-in. ebony table leader at \$140; 21-in. tables at \$160, \$170, \$180 & \$210; 21-in. consoles at \$200, \$250, \$300 & \$320. All models have top tuning controls, 90-degree aluminized picture tubes and an overload relay which customer can reset by pushing button.

CBS-Columbia’s new line, introduced to distributors Aug. 20-21 at New York’s Essex House, comprises 9 basic 21-in. models and one 24-in. console, ranging from \$170 to \$300. Engineering and styling include illuminated dials, front tuning controls, improved “photo-electron gun” designed for uniform focus, aluminized picture tubes, improved audio circuits. The four 21-in. table models are priced at \$170, \$180 & \$240, with price of one model to be set by local distributors; five 21-in. consoles are \$200, \$230, \$250, \$270 & \$300; the 24-in. console is \$290. Optional uhf tuners are \$20-\$30 extra.

Stromberg-Carlson increased prices on 4 basic 21-in. models \$5 to \$15 this week, joining Admiral, Emerson & Trav-Ler Radio in announcing increases thus far (Vol.11: 31-33). TV-radio v.p., C. J. Hunt, wired distributors: “We have delayed making this announcement as long as possible, even in the face of constantly rising material costs and increased labor costs,” and said company hoped to confine increase to the 4 models and to “hold the line” in its fall pricing. The “Cremona” was raised from \$260 to \$270, “Milano” from \$320 to \$330, “Regency” \$460 to \$475, “Empire” \$490 to \$495.

Hallicrafters reports 20% increase in TV-radio unit sales at dealer meetings this year over 1954, which marketing director Michael D. Kelly attributes largely to company’s 17-in. table model at \$99.95 and new \$19.95 remote control unit.

Sparton will introduce new TV line, titled “Royal Scot,” at meeting of district merchandisers Aug. 25-26 at Jackson, Mich. plant.

Trade Personals: James H. Carmine, Philco pres., sailed Aug. 17 on *Queen Elizabeth* for European business trip, expects to return after Labor Day; Robert F. Herr, v.p., already touring NATO countries to check on Philco equipment and personnel, due to return in mid-Sept. . . . Frederick D. Ogilby, Philco TV-radio div. v.p., recovering nicely from his heart attack of last spring, expects to be back on job sometime in Sept. . . . Fritz A. Gross, chief engineer of Raytheon equipment engineering div., promoted to div. mgr., assuming duties of J. Ernest Smith, who continues as v.p. & engineering director of Datamatic Corp., owned jointly by Raytheon & Minneapolis-Honeywell . . . John F. Frazier promoted to mgr. of Corning Glass Works TV dept., succeeding Dr. John L. Sheldon, appointed staff research mgr. of electrical products div. . . . James Kieth, owner of Los Angeles electronic parts maker S. A. Asquith Co., elected pres. of Kaye-Halbert, currently operating under Chapter XI proceedings and starting recapitalization drive with court permission; he replaces founder Harry Kaye, resigned . . . Gordon L. Jolly promoted to mgr. of product information, Westinghouse TV-radio div. . . . Donald G. Wilson, Stromberg-Carlson asst. research director, appointed vice-chairman of electronics committee, American Institute of Electrical Engineers . . . Donald Kirk Jr. and Caywood C. Cooley elected v.p.'s of Jerrold Electronics Corp., Simon Pomerantz treas., James J. Fuld secy. . . . Charles Berman named asst. to Trav-Ler sales mgr. Tully Friedman . . . D. B. Jones named Bendix Radio mid-Atlantic regional mgr. . . . Richard Linke, ex-Capitol Records, named sales mgr. of Columbia's "single" records.

* * * *

DISTRIBUTOR NOTES: Philco appoints TCR Distributors Inc., 1205 E. River Drive, Davenport, Ia., replacing Schmiers Distributing Co., Rock Island . . . Admiral appoints Capital Appliance Distributors, 2200 N. New York St., Evansville (Kenneth Somers, gen. sales mgr.) . . . Sylvania appoints V. J. Stanley Inc., Rochester, N. Y. . . . Capehart-Farnsworth appoints Keps Appliance Co., 5000 Baum Blvd., Pittsburgh (Joseph Elias, pres.); Edgar A. Brown Inc., Carnegie & E. 40th St., Cleveland (Edgar A. Brown, pres.); Neil Distributors Inc., 1035 NW 71st St., Miami (Herbert S. Neilinger, pres.); Radio Trade Supply, Des Moines . . . GE appoints L. Luria & Son Inc., Miami, as supplementary distributor . . . Trav-Ler Radio opens factory branch at 193 N. Broadway, Milwaukee (Howard V. Schwartz, ex-Raytheon Distributors, gen. mgr.) . . . Marshall-Wells Co., Duluth, one of world's largest wholesale hardware firms and Arvin Radio distributor there, announces resignation of pres. John H. Moore.

Crosley-Bendix plans \$3,500,000 ad campaign this fall, biggest in its history, concentrating on network TV and magazines, thru Compton Adv. and Earle Ludgin & Co. It will sponsor *Midwestern Hayride* on NBC-TV Fri. 8-8:30 p.m. and co-sponsor NCAA football game-of-the-week on NBC-TV. It will place 64 pages in national magazines.

Emerson's sales in 6 months ended July 31 were highest in company's 40-year history, said pres. Benjamin Abrams in letter to distributors, which also stated defense business continues at high level; recent projects are new contracts for hemispheric defense, fire control computers, guided missiles.

Allied Electric Products Inc., Irvington, N.J., parent company of tube maker Sheldon Electric Co., was adjudicated bankrupt this week in Newark Federal Court. Date will be fixed later for public sale of assets. Company was headed by the late Nathan Chirelstein.

House Ways & Means subcommittee headed by Rep. Forand (D-R.I.) will start hearings Oct. 4 on all excise tax problems, including TV-radio.

Color Trends & Briefs: Dealer caution about color was evident at NARDA Institute of Management at Washington's American U this week. Leonard Cramer, Magnavox v.p.-gen. mgr., and Thomas Joyce, pres. of Philadelphia RCA distributor Raymond Rosen & Co., gave bullish talks on color, were followed by Philco exec. v.p. John M. Otter who told dealers not to buy more sets than they knew they could sell.

In question period, Rosen's Edward Rosen asked Otter why he differed with others. Otter replied: "Color TV isn't ready, either in the tube or in the circuitry, and Philco will not push anything that isn't ready." Then Harry B. Price Jr., NARDA pres. and owner of big Norfolk chain, took floor to say he'd been stuck with color sets last year, wasn't going to buy until he was sure of orders. He was roundly applauded by fellow dealers, indicating general agreement with him. NARDA chairman Mort Farr, Upper Darby, Pa. dealer also attending sessions, tells us he's going all-out, on other hand, having recently hired high-priced salesman to concentrate solely on color.

* * * *

Network color schedules for next 2 weeks: NBC-TV—Aug. 22, *Producers' Showcase*, "The King & Mrs. Candle," 8-9:30 p.m.; Aug. 22-26 & Aug 29-Sept. 5, segments of *Home*, 11:45-noon; Aug. 23, 25 & 30 and Sept. 1 & 6, *Vaughn Monroe Show*, 7:30-7:45 p.m.; Aug. 24, 26 & 29, *Matt Dennis Show*, 7:30-7:45 p.m.; Aug. 26, 27 & 28, Davis Cup tennis matches, 2-5 p.m. Note: First CBS-TV color spectacular will be *Ford Star Jubilee* Sept. 24, Sat. 9:30-11 p.m., starring Judy Garland, with David Wayne guest star.

Vertical chassis 21-in. color set, first of its kind, was introduced by Raytheon this week, priced at \$795 for table model, \$895 console. Receiver has 24 tubes, 3 rectifiers, and console is 29-in. wide, 23-in. deep, 37-in. high. Henry F. Argento, TV-radio v.p., stated that company had another design fully developed 8 months ago but scrapped it to concentrate on new chassis. CBS-Columbia announced this week that it was reducing from \$1100 to \$795 the price of its 19-in. set (205C).

Color in movies and TV will be theme of SMPTE convention at Lake Placid Club, Essex County, N. Y., Oct. 3-7. TV sessions Oct. 6 include: discussion of "grainless phosphor screens for TV tubes and the light amplifier," 5-man roundtable on network telecasting; DuMont Vitasecan; colorimetric problems in film; report on international conference in Stockholm last June.

Technical articles on tri-color tubes in Aug. *Proceedings of the IRE*: "Color TV Luminance Detail Rendition," by W. G. Gibson & A. C. Schroeder, RCA Labs; "A New High-Efficiency Parallax Mask Color Tube," by M. E. Amdursky, R. G. Pohl & C. S. Szegho, Rauland (Zenith); "Design of Lens-Mask Three-Gun Color TV Tubes," by R. C. Hergenrother, Raytheon.

Further strengthening color schedule, NBC-TV will offer 26 filmed half-hour children's programs, *Golden Time*, produced in collaboration with publisher Simon & Schuster, to be colorcast Sat. or Sun. mornings. NBC also announced that *Matinee*, its 3-4 p.m. daily color show, would start Oct. 31 instead of Oct. 3; that Jose Ferrer has been signed for "Cyrano de Bergerac" on *Producers' Showcase* Oct. 17.

Live daily colorcasts will originate from Texas State Fair at Dallas, Oct. 7-23. RCA "caravan" will handle them, and programs will be carried on WFAA-TV & KRLD-TV.

"Color TV: On the Way at Last?" is question posed in title of article in Aug. 13 *Business Week*—and tenor of article leans toward affirmative answer.

Henri, Hurst & McDonald has installed 21-in. RCA color set in reception room, believes it's first Chicago ad agency to do so.

Financial & Trade Notes: Television-Electronics Fund Inc. net assets increased to \$104,639,370 (9,132,272 shares) as of July 31, up from \$96,182,331 (8,489,045 shares) as of April 30, including these stocks added during the quarter: 5300 shares of Cincinnati Milling Machine with market value of \$344,500; 2000 duPont, \$453,000; 2600 Ex-Cell-O Corp., \$123,825; 6500 Friden Calculating Machine, \$169,000; 1400 General Mills, \$108,150; 5500 Precision Radiation Instruments, \$45,375; 6000 DuMont 5% convertible preferred, \$126,000; 1000 Texas Instruments 4.48% cumulative convertible preferred "A", \$26,875; \$80,000 worth of American Electronics 5% convertible debentures. Also included are \$6,000,000 in Treasury notes.

Fund added to holdings in following stocks during quarter ended July 31: ACF Industries, Addressograph-Multigraph, AT&T, Babcock & Wilcox, Beckman Instruments, Bell & Gossett, Bell & Howell, Bullard Co., Bulova Watch, Carborundum, Chance Vought, CBS "A", Continental Telephone, Cornell-Dubilier, Corning Glass, Curtiss-Wright, Douglas Aircraft, Eastman Kodak, Electric Controller & Mfg., Electronic Assoc., Elgin National Watch, Garrett, General Dynamics, General Tire, Goodyear, Hazeltine, I-T-E Circuit Breaker, Lockheed, Minneapolis-Honeywell, National Acme, Northrop Aircraft, Paramount Pictures, Pullman, Raytheon, Royal McBee, Ryan Aeronautical, Servomechanisms, Sperry Rand, Square "D", Stewart-Warner, Taylor Instrument, Thompson Products, United Aircraft, Western Union.

Part of holdings were sold in Admiral, Aerovox, Aircraft Radio, Allis-Chalmers, AB-PT, American Chain & Cable, American Phenolic, Arvin, Bendix Aviation, Borg-Warner, Burroughs, Clark Controller, Columbia Pictures, Cutler-Hammer, Eaton Mfg., Electro-Data, Electronics Corp. of America, Emerson Radio, Gary (Theo.), General Controls, GE, General Railway Signal, Hammond Organ, Indiana Steel Products, International Resistance, IT&T, Magnavox, Minnesota Mining & Mfg., Motorola, National Cash Register, North American Aviation, Philco, RCA, Robertshaw-Fulton, Sylvania, TelAutograph, Tung-Sol, United-Carr Fastener, United Shoe Machinery, Walt Disney, Westinghouse, Zenith.

Eliminated were Fund's 800 shares of Consolidated TV & Radio Broadcasters (Bitner stations) and Raytheon \$2.40 cumulative convertible preferred, latter converted to common. The Sperry Rand holdings replace Sperry Corp. and Remington Rand which merged. And General Dynamics holdings reflect acquisition of Stromberg-Carlson.

(For similar report on Feb. 1-April 30 quarter, see Vol. 11:21, p. 15.)

* * * *

General Dynamics Corp. earned \$9,384,757, or \$1.87 a share, on sales of \$342,989,927 in first half of 1955, compared to \$9,840,825 (\$1.93) on \$323,305,659 in same 1954 period. Figures includes operations of recently acquired Stromberg-Carlson (Vol. 11:18) which chairman John Jay Hopkins said is functioning at "high production levels" on both commercial products and govt. contracts. "Productive capacity is being increased for an expected expansion of the division's telephone equipment business," he said, adding that the new TV line "was received enthusiastically by distributors and dealers." He said corporation's backlog of unfilled orders was \$1.124 billion as of June 30, besides \$800,000,000 worth of contracts then under negotiation.

Erie Resistor Corp., in 24 weeks to June 12, had net sales of \$8,837,707, net profit of \$383,903, or \$1.25 per share (\$1.11 assuming full conversion of preferred at 1.1 rate). This compares with sales of \$6,572,643, profit of \$60,673 (8¢) for corresponding 1954 period. Consolidated report includes British and Canadian subsidiaries.

COLUMBIA RECORDS formed "record-of-the-month" subscription club this week, in cooperation with its distributors and 6200 dealers, in effort to get its share of estimated \$20,000,000 worth of records purchased annually by subscription. As first step, it appointed its gen. attorney Norman A. Adler, as v.p.-gen. mgr. of Columbia LP Record Club, with special club headquarters at 165 W. 46th St., N.Y. It will spend \$1,000,000 in next 8 months advertising, through Maxwell-Sackheim, N.Y.

Columbia made a point, in big promotional ads, of emphasizing that distributors and dealers will participate—unlike other record clubs, where dealer is by-passed. Dealer will be given a 20% commission on all sales made to each subscriber he signs up, as long as he continues as an active member. Distributors will be given a 4% commission on all sales to members recruited by dealers in their area. Subscribers will be offered a free 12-in. LP when they join; they will have to buy a minimum of 4 records a year at list price and will be entitled to a free bonus record for every 2 records they buy. Columbia will draw on its full catalog for club selections, including both classical and popular music.

RCA Victor, associated with Columbia as 2 top producers in record industry, announced through v.p. Emanuel Sacks that it had no intention of forming its own record club. He commented: "The best way to realize the growth potential we see for the record industry is through aggressive dealers stocked with competitively priced quality merchandise. That is why we lowered the price of our long-playing records as much as 40% earlier this year. As a result, record sales have soared to a new high and dealers, both large and small, have benefited."

RCA Victor disclosed it will stop producing 78rpm records early next year. Sacks said popularity of 45s has made 78s unprofitable. Shipments will begin about Aug. 20 on a new 12-in. LP to retail for 98¢, featuring selections from both popular and classical albums. Slow demise of 78rpm records was not unexpected, with trade press speculating it will be industry-wide trend by fall of 1956.

■

More officers' & directors' stock transactions reported by SEC, in addition to those published last week (Vol. 11:33): Frank Stanton sold 30,000 CBS "A", holds 104,058 CBS "A"; Ralph J. Cordiner bought 4500 GE, holds 10,395; Clarence H. Linder bought 2070 GE, holds 4710; Howard C. Briggs sold 1000 Hoffman Electronics, holds 1000; Oliver J. Greenway bought 800 International Resistance, holds 8650; Charles H. Griffith bought 1200 International Resistance, holds 5300; Edward A. Stevens bought 1800 International Resistance, holds 8840; Percy L. Spencer sold 2200 Raytheon, holds 3.

Sperry Rand Corp., in first report since recent Sperry and Remington Rand merger, reports combined net income of predecessor companies of \$9,027,895 (35¢ a share on 25,205,632 shares outstanding) on shipments of \$157,796,605 for quarter ended June 30.

P. R. Mallory & Co. declares 3-for-2 stock split, with distribution Sept. 15 of added share for each 2 held as of Aug. 30; common will go on 35¢ quarterly dividend in lieu of present 50¢.

Oak Mfg. Co. earned \$839,076, or \$1.60 a share, on sales of \$11,370,124 in first 6 months of 1955 vs. \$500,243 (95¢) on \$8,096,471 in first half of 1954.

Dividends: Philco, 40¢ payable Sept. 12 to stockholders of record Aug. 31; Standard Radio Ltd. "A", 15¢ Oct. 11 to holders Sept. 20; Clevite, 25¢ Sept. 9 to holders Aug. 26.

Servomechanisms Inc. sales were \$6,073,000, profit \$216,000 (28¢ a share) in first half of year vs. \$5,967,477 & \$303,743 (40¢) in same 1954 period.

Electronics Reports: Further example of old-line companies expanding and diversifying in fields of electronics (Vol. 11:33): Avco this week concluded agreement to acquire 60,980 shares of Hycon Mfg. Corp. (out of 2,329,990 shares outstanding) in exchange for 73,139 shares of newly issued Avco common (8,922,585 outstanding, 15,000,000 authorized) and will also purchase \$500,000 of new Hycon 10-year 5% convertible debentures. Main purpose is for Avco, notably its Crosley div., to exchange scientific know-how and facilities with Hycon and for Avco to participate in Hycon's defense contracts. Each will have one director on other's board.

Hycon makes special purpose electronics equipment as well as aerial cameras, photogrammetric equipment, ordnance products; its prime defense contracts, mainly involving basic components of the "Mighty Mouse" 2.75-in. rocket, ran some 80% of its billings in 1954 and will run about 60% this year. First fiscal half-year ending July 31 showed earnings, due to heavy developmental expenses, of about \$100,000 vs. \$280,154 (16¢ a share) on sales of \$5,874,086 in same period last year, reports pres. Alden E. Acker. Second half sales are expected to reach \$7,000,000 for a fiscal year's volume above 1954's \$11,972,107.

Hycon has 10 plants in Pasadena, Cal., which it proposes to centralize into one new \$1,000,000 structure at LaVerne, Cal. It recently formed Hycon-Eastern Inc., Cambridge, Mass., research concern in which it holds 60% interest. California firm expects to be listed on American Stock Exchange in Nov.

Note: Avco discloses it will have instrument for testing color TV sets ready for mass production in Sept., to sell for \$415.

* * * *

Stromberg-Carlson div. taking over production of charactron tube from General Dynamics' Convair div. Stromberg also has acquired former Electronic Control Systems Inc., Los Angeles, specializing in automation and electronic computers; it previously had part interest. Also disclosed this week, with declassification of TACAN (tactical air navigation), was that it is manufacturing system under contract with Navy. Leonard Mautner, Stromberg asst. v.p., has been assigned to head expanded west coast operations; Alexander F. Brewer, also an asst. v.p., will be resident mgr. of electronic control labs, Los Angeles.

Herold Radio & Electronics Corp., Mt. Vernon, N. Y., which produces radios & phonos for Sears, Firestone, CBS-Columbia, etc., plans to apply for listing on American Stock Exchange, according to chairman Roland Kalb. It sold 100,000 shares to public (at \$3 per share) in recent offering. Sales in 4 months ended June 30 rose to \$1,100,000 from \$570,000 in corresponding period year ago.

A. L. W. Williams named pres. of Clevite Research Center, formed by merging Brush Laboratories Co. & Clevite-Brush Development Co.; he succeeds Dr. C. Baldwin Sawyer.

Dr. Otto Heinz, ex-Bell Labs, and Dr. Clarence M. Ablow, senior research mathematician, join Stanford Research Institute's engineering div.

Harry L. Owens, ex-Signal Corps Labs, Ft. Monmouth, N. J., joins Texas Instruments Inc., Dallas, as chief engineer of semi-conductor products div.

Dr. Truman S. Gray, MIT associate professor of engineering electronics, has been named consultant on nuclear energy to Brown Instruments div., Minneapolis-Honeywell.

Dr. F. Ralph Kotter, ex-MIT, rejoins National Bureau of Standards electricity & electronics div.

Edgar S. Bloom, 79, retired ex-pres. of Western Electric, 1926-39, died Aug. 14 at his home in N. Y.

The Russians view transistors: "Radio receivers and TV sets already exist having no vacuum tubes (apart from picture tubes), which have been replaced by miniature solid electronic amplifiers that possess great advantages over tubes: longevity, minute power consumption, mechanical ruggedness and small size. They find the widest application in the complex systems of phone stations, in calculators, and in many automatic installations."—Prof. A. Berg, in May 1955 *Radio* (Russian). "It is now completely beyond doubt that in the next few years low-power vacuum-tube electronic devices will be supplanted by semiconductors . . . In the very near future small-size radio broadcast receivers will be widely installed having germanium triodes with an output signal up to 0.5v, supplied by dry batteries of 3-6v having a high sensitivity of 35mkv/m . . . It must be assumed that in the near future semiconductor rectifiers will find wide application [also] in powerful radio broadcast stations where they will with success replace high-vacuum kene-trons and vacuum tubes."—Prof. A. Kugushev, same publication.

New 226-p. microwave manual, *Point-to-Point Radio Relay Systems—44 mc to 13,000 mc*, originally prepared for Air Force, is being offered commercially for \$2 by RCA Govt. Service Dept., Camden. Manual covers propagation, interference, etc., includes charts, curves & monograms.

David M. Rice, pres. of Electronic Publishing Co., Chicago, publisher of electronic parts & hi-fi distributor catalogs, pricing digests, etc., has acquired all outstanding stock in the corporation, plans new quarterly *Dave Rice's Official Pricing Digest* as of Oct. 1.

The 11th annual National Electronics Conference, sponsored by AIEE, IRE, RETMA, SMPTE & 7 midwestern universities, will be conducted at Chicago's Hotel Sherman Oct. 3-5, featuring 24 sessions and 131 exhibitors.

Tiny silicon power rectifier is first product to come from new semi-conductor dept. of Automatic Mfg. Corp., subsidiary of General Instrument Co. It occupies only .03 cu. in., weighs .07 oz., operates at temperatures up to 200° C.

Smallest walkie-talkie FM set ever built is RCA's claim for new experimental unit built for Signal Corps. Said to have ¼-mi. range, transceiver is 5½x3x1-in., weighs 15 oz., uses 12 transistors and one tube.

Russian TV set production in 1955 will total about 500,000—twice last year's output but below govt.'s 760,000 goal—reports *New York Times* in recent analysis of Soviet consumer goods output.

New textbook: *Elements of Electronics*, by USN chief radio electrician Henry V. Hickey & Lt. Wm. M. Villines (McGraw-Hill, 487 pp., \$6.50).

New John F. Rider publications: *Selling Your TV-Radio Service*, by GE Tube Dept. (64-p., \$1); *Picture Book of TV Troubles*, by Rider staff (96-p., \$1.80).

A 350-mi. microwave system for California civil defense is being installed by RCA; it has 9 hops, uses 2450-2700-mc band.

"Industry's All-American Team" is 28-p. brochure published by RCA as a "salute" to its small suppliers.

Electronic Parts Distributors Show, to be held next year in Chicago 3rd week in May, elects these officers for 1956: pres., W. D. Jenkins, Radio Supply Co., Richmond; v.p., Theodore Rossman, Pentron; secy., W. Walter Jablon, Presto; treas., Herbert W. Clough, Belden.

Annual western winter furniture market is scheduled Feb. 6-10 at Western Merchandise Mart, San Francisco (A. Cameron Ball, gen. mgr.).

TELEVISION OWNERSHIP, as adduced by Market Research Corp. of America on basis of continuing reports of its 5800-family panel (see p. 1), embraced 68% of all households as of July, compared to 67% in April, 64% in Jan. and 61% in Oct. 1954. The breakdowns show TV ownership predominates in northeast region, in cities of more than 500,000 population, and in families in upper fourth of income bracket where head of family has high school education. Here are complete MRCA breakdowns:

TELEVISION OWNERSHIP				
Percent of Families in Each Group With TV Sets				
	Oct. 1954	Jan. 1955	April 1955	July 1955
UNITED STATES TOTAL ...	61%	64%	67%	68%
Regions:				
Northeast	78%	81%	84%	85%
South	42	46	50	54
North Central	64	68	70	70
Mountain & Southwest	42	46	46	52
Pacific	61	64	65	66
City Size:				
Farm	31%	35%	38%	43%
Under 2,500	44	49	53	56
2,500 to 50,000	42	49	50	53
50,000 to 500,000	67	70	74	75
500,000 & Over	83	85	87	87
Total Family Income:				
Upper Fourth	71%	76%	77%	81%
Next Fourth	68	70	72	76
Next Fourth	62	66	69	69
Lowest Fourth	44	46	48	48
Education of Family Head:				
Grade School	53%	57%	60%	62%
High School	68	71	74	75
College	66	71	71	73
Size of Families:				
1 & 2 Members	51%	56%	57%	59%
3 Members	68	68	73	73
4 & 5 Members	71	75	77	78
6 Member & Over	57	58	62	66
Age of Housewife:				
Under 35 Years	68%	70%	73%	75%
35 thru 44 Years	69	73	74	74
45 Years & Over	52	56	59	61
Presence of Children:				
5 Years & Under	68%	70%	73%	75%
6-12 Years	68	72	75	76
13-20 Years	61	66	69	71
No Children	53	58	60	61

Barton Pitts' KFEQ-TV, St. Joseph, Mo. (Ch. 2, CBS), with radio KFEQ (5-kw, 680 kc, MBS) is expected to be sold shortly for \$550,000 plus assumption of about \$235,000 in liabilities to syndicate in which Bing Crosby, Kenyon Brown & George Coleman will each own 25%; John E. Fetzer & Paul O'Bryan, 12½% each. Deal was handled by Robert Grant, representing Kidder, Peabody & Co., Chicago. Pitts has long sought to sell the stations and retire, due to ill health. Bing Crosby would enter deal as an investor, having been partner with Kenyon Brown, part owner of KWFT-TV, Wichita Falls and other stations, and Mr. Coleman, Miami, Okla. banker, in the old time-sharing KMBY-TV, Monterey, Cal., which they sold last year (Vol. 10:45 & 11:6). Fetzer operates pioneer WKZO-TV, Kalamazoo (Ch. 3), KOLN-TV, Lincoln, Neb. (Ch. 3) and several radio stations. O'Bryan is partner in Washington law firm Dow, Lohnes & Albertson.

Madison Ave. and entire TV-radio advertising fraternity, reading generally favorable reviews this week of Al Morgan's new novel, *The Great Man* (Dutton, 317pp, \$3.50), are playing guessing games as to who is real-life prototype of Herb Fuller, the dubious "hero" of the narrative. Fuller is "the great man" to millions of TV-radio fans, but in actual life (the story is told by commentator Ed Harris as he puts together the Herb Fuller Memorial Show after he dies in a car crash) was a downright heel. Author of book that's causing more talk in trade than any since *The Hucksters* is senior editor of NBC *Home* show.

Horace P. Moulton elected v.p. & gen. counsel of AT&T Aug. 17, succeeding T. Brooke Price, who retires Sept. 1.

Celebrated Edward Lamb case, in which FCC accuses the broadcaster-publisher of lying to it about past communist leanings, moved another step toward finale this week when Commission and Lamb attorneys filed proposed findings and conclusions on the hearing which ran from Sept. 15, 1954 to May 24, 1955. At stake is license of Lamb's WICU, Erie, Pa. (Ch. 12). Commission counsel submitted 335-p. document, while Lamb attorneys filed 14-p. brief. FCC brief is signed by 5 lawyers headed by Joseph M. Kittner, quotes at length from testimony and from Lamb's writings, including his book *The Planned Economy of Soviet Russia*, and concludes that he once did advocate communist economy and govt. as superior to that of U. S.; that he was active in un-American groups; that he contributed to communist groups—and that he lied when he swore to the Commission that he didn't. Lamb counsel J. Howard McGrath, former U. S. attorney-general, Russell M. Brown & Philip Bergson, attacked character and credibility of FCC's witnesses and argued that whole procedure was illegal and/or unconstitutional. In addition, they stated that testimony shows Lamb has record of active opposition to communism. Next move is reply of respective counsel to each others' briefs. Then examiner Herbert Sharfman will issue his initial decision. Oral argument before FCC will follow, after which Commission will render final decision. These steps are expected to run case well into next year.

Probe of alleged communist infiltration in entertainment industry by House Un-American Activities Committee this week got plenty of headlines—but got little information connecting communism with TV. Tony Kraber, ex-CBS & DuMont producer, pleaded 5th Amendment when questioned about possible Red links following sarcastic exchanges with committee members. Richard S. Salant, CBS v.p., said Kraber had resigned Sept. 28, 1951 as network's director of special events "by mutual agreement."

Suit against S. I. Newhouse, Syracuse interests, including WSYR-TV & WSYR, demanding \$1,088,112 in anti-trust damages, was thrown out Aug. 19 by Federal Judge Brennan. Plaintiff WNDR, Syracuse MBS outlet, had charged unlawful restraint of interstate commerce through "package deals in advertising" and alleged Newhouse interests had spread false rumors about WNDR's financial stability. Action was started in Nov. 1952.

WUSN-TV, Charleston, S. C. (Ch. 2) is selling its radio WUSN (1450 kc, 250 watts daytime, MBS) for \$110,000 to Low Country Bestg. Co., owned 50% each by Sol Panitz, TV-radio director of Alvin Epstein Adv., Washington agency, and Barry Winton, TPA. WUSN-TV owners (J. Drayton Hastie family 43%, *Evening Post* 40%) state they want to devote full attention to TV.

Signs of the TV times: *New York Times* assigns reporter fulltime to cover TV film beat in Hollywood under its ace movie reporter Tom Pryor . . . BBC's weekly *Radio Times*, devoted largely to reprints of significant broadcasts, had ABC circulation average of 8,832,579 for first 6 months of 1955 . . . *Houston Chronicle* (KTRK-TV) latest to add special Sun. TV section, starting with 8 pages.

Edward Lamb's original radio station WTOP, Toledo (1-kw daytime, 1560 kc, independent) was sold for \$125,000 this week to John L. Booth, who operates string of Michigan stations, is applicant for Ch. 10 in Parma-Onondaga, once operated WKBZ-TV, Battle Creek (Ch. 64) but took it off air in April 1954.

Canada has 1,376,101 TV sets in use, CBC reported this week in seeking \$13,740,000 budget for its TV network. They're located: in Province of Ontario (729,970), Quebec (401,794), British Columbia (100,339), Prairie Provinces (100,536).

A Wholesaler Speaks Up

Real Role of the TV-Appliance Distributor

Full Text of Remarks by Thomas F. Joyce, President, Raymond Rosen & Co.

Before First Institute of Management for Appliance & TV Dealers, Washington, D. C., Aug. 15, 1955

EDITOR'S NOTE: *If you're a TV or radio station executive whose commercial dept. must deal with local distributors & dealers—certainly if you're in any way connected with the manufacture and marketing of TV-radio receivers and household appliances—we commend a close reading of this transcript of Mr. Joyce's lucid and persuasive talk before the Institute conducted at American University in Washington this week under auspices of NARDA. Of the many talks, this one seemed to us to be unusually significant because it deals head-on with a topic that has had merchandisers buzzing for a long time, especially in light of the recent upsurge of discount houses. Mr. Joyce's position is quite clear: He's all-out for the wholesale function, in principle—but only for the distributor who really performs specific and needed services for his dealer "partners." That Mr. Joyce knows whereof he speaks, is evident not only from his background as an RCA executive but from his 10 years with Raymond Rosen & Co., Philadelphia, one of RCA's most important distributors.*

WHEN MORT FARR asked me to speak at the Institute of Management for Appliance and TV Dealers, I asked him: "What do you want me to talk about?"

Mort replied: "About the distributor and the functions he performs. A number of appliance and television dealers think that there is no place for the distributor and that he should be eliminated. These dealers would like to buy direct from the manufacturers and get the gross profit that now goes to the distributor."

By what Mort stated, I assume that there is some question as to whether or not a distributor is worth what he is paid, for the functions he does or does not perform.

Obviously, you expect my viewpoint on the subject to be that of a distributor executive who, in addition, has his entire capital invested in the distributing business.

Well, first, I would like to give you my viewpoint on the subject when I was an executive for one of the nation's leading manufacturers in this industry. In March 1944, at the symposium on post-war distribution conducted by the Sales Managers Club of New York, I made a talk on the subject: "The Future of Independent Wholesale-Retail Distribution." During the war years, some starry-eyed bureaucrats with the Office of Price Administration in Washington were predicting the demise of the wholesale distributor in the post-war period. The wholesale distributing function, in the appliance and radio fields, was virtually eliminated during the war years by reason of the fact that there were no goods to distribute. This, therefore, was the ideal time to change the basic structure of distribution, by seeing to it that the distributor did not come back to life, after the war.

Middleman Mentioned in the Bible

A number of distributors in those years were concerned about the line of thinking in Washington. I thought that I might make some small contribution to allaying their fears, by referring to history. In that talk I said:

"The earliest records of wholesaling go back to the beginning of history. One authority, for example, traces it to Genesis, the first book of The Bible, and the story of

Joseph, whose father made him a coat of many colors. Joseph's brothers were jealous of him, and sold him in bondage to 'a travelling company of Ishmaelites (who) came from Gilead, with their camels bearing spicery and balm and myrrh, going to carry it down to Egypt.' These ancient caravans transported goods in quantity to be parceled out for sale by local merchants.

"The Phoenician Empire in the Mediterranean was built around wholesaling. The fleet of ships of the Phoenician Empire brought merchandise from port to port. At each port the merchandise was sold to a 'middleman' who in turn brought the goods back into the interiors for distribution to retail merchants.

"Now, the wholesaler has been an important instrumentality in the distribution of goods for thousands of years for only one reason. He performs useful services. And upon how successful he is in performing these services depends his present and future success.

"The popular conception of the middleman is that he is a useless appendage on the distribution system—eliminate the wholesaler and you eliminate his costs. That is not so. You may bring about some reduction in costs, but you do not eliminate them. Manufacturers' branches are wholesaling establishments. Chain-store warehouses perform some of the functions of the wholesaler."

Evidently I believed in what I said in March 1944, for in April 1945 I became associated with Raymond Rosen & Co. as a partner. Today—a little more than 10 years later—I have no cause to regret that decision.

The success of the specialty appliance wholesaler is measured, in the final analysis, by one yardstick—and one only: The ability of the distributor's organization to secure from the market he is responsible for covering the percentage of the industry volume to which the manufacturers he represents are entitled by virtue of the value of the product and merchandising programs they have to offer. A specialty appliance distributing organization must be first and foremost a sales organization. The distributor must deliver to the manufacturers the volume they have a right to expect—or sooner or later the distributor will

have his franchise cancelled. All of the activities of the distributor must be for the purpose of achieving sales results.

One of my distributor associates put it aptly when he said: "A distributor is an employee of the manufacturer with the temporary right of investing his capital in the manufacturer's business."

"Our Responsibility to Our Dealer Partners"

Now, we can't do this job by ourselves. We need to have "partners" in this distribution enterprise and those "partners" are our dealers. As we see our responsibility to our dealer partners, they are to:

(1) Carry an adequate inventory, so that goods may be made promptly available to dealers for their customers. Our company inventory averages \$2,500,000 at cost.

(2) Carry adequate stocks of replacement parts so that this merchandise may be promptly serviced. This operation of our inventory averages \$300,000 at cost.

(3) Provide the dealer with adequate credit facilities to assist the dealer in financing his business. This includes financial advice, guidance and assistance. Our accounts receivable exceeds \$2,000,000.

(4) Give the dealer sales, advertising, merchandising assistance and sales training so that maximum sales volume may result for the dealer. Our cooperative advertising expense—50% contributed by the manufacturers—runs \$750,000 a year.

(5) Provide the dealer with service training.

(6) As a reward to the dealer for discharging the responsibility, to provide the dealer with maximum territory and market protection.

It is fundamental that the success of a distributor depends upon the lines he represents and the individual and collective success of the dealers with whom he does business. Granted that a distributor has good lines, he must develop a strong, financially healthy dealer organization to move the volume of goods the manufacturers expect to be handled in a given marketing area. And everyone in the distributing organization must realize these simple truths. We constantly reiterate to our organization the fact that we are the servant of both the manufacturer and the dealer.

How the Dealer Judges a Distributor

As a seller, a distributor must not only create, but maintain dealer goodwill. Every employe in the distributor's organization must be constantly educated to the important part he plays in developing and holding dealer goodwill. They know that the little things we are sometimes prone to overlook—common courtesy, attention to small details, answering dealer telephone calls, follow-through on dealer requests, are not little things in the eyes of the dealer, but are things by which the distributor is judged. Distributors must constantly impress upon the members of their organizations the important part every individual plays in giving good service to the dealer—from receiving to shipping and the service after the sale is made.

Granted that the distributor has a good headquarters organization, then he must have sound policies for selecting and developing dealers.

The place to start good relations with a dealer is with the appointment of a dealer to merchandise the line or lines a distributor handles. He must be careful in appointing dealers to make certain that the proposed new dealer will take nothing away from those dealers who are in the proposed new dealer's marketing area, but, rather, will add strength to the overall dealer organization. No hasty decisions should be made. Each new dealer application

should be reviewed by a New Dealer Committee, consisting of principles in the distributing business. Every angle should be considered before a final judgment is made.

It is all too easy to add a dealer to a distributor's organization, but it is not too easy to take him off, if a mistake has been made. That this policy has proven sound in the operation of our business is evidenced by the fact that the turnover in our dealer organization averages less than 5% a year.

Fewer the Accounts, Larger the Volume

As a specialty appliance distributor, we believe in doing business with the fewest possible number of accounts. In carrying out that policy we follow the principle laid down long ago by Kelvinator: an adequate dealer for every market, an adequate market for every dealer. We do this for a selfish purpose. The fewer the number of accounts, the larger the volume per account, the more satisfactory the business relationship and the lower the distributing operating cost. Almost without exception, Raymond Rosen & Co. accounts for 25% or more of the major appliances—radio and television volume of the accounts with which we do business. In many cases, it is from 50% to 100%. In all of these cases we are a major "partner" with the dealer.

Having appointed a new dealer, the distributor's interest should then be to contribute all that he can to the success of that dealer—whether the dealer be absolutely new to the appliance business or a tried and proven veteran.

The quality of the contribution a distributor can make to the dealer rests with his sales organization, whose job is not to sell the dealer, but to help the dealer sell. The value of the assistance a distributor can give to a dealer depends upon the ability, experience, know-how and willingness of his product sales managers and the territory district managers who work under their direction.

How to Assist the Dealer

This assistance to the dealer is nothing spectacular. It is the simple a-b-c's of merchandising:

(1) Suggest store layout and display. Assist the dealer in properly setting up and displaying the merchandise he distributes.

(2) Give the dealer good, sound merchandising advice and ideas enabling him to attract people to his store and sell them.

(3) Gives sales information to and sales-train the dealer sales organization. Keep the dealer and his organization informed of changes in and availability of product.

(4) Assist the dealer in getting sales and other personnel.

(5) Assist the dealer with his advertising and promotional activities. Help plan and schedule store events, sales anniversaries, sales contests, store demonstrations, etc. Provide and maintain the proper inventory of materials for display and sales promotion to help the dealer sell goods.

(6) Carefully watch inventory to maintain balance and recommend sales action that should be taken if dealer inventory is out of balance.

(7) Assist the dealer by actually working in his store during special sales events.

(8) Make available information regarding industry trends on which, because of the broader scope of the distributor's activities, he should be better informed than the dealer.

(9) Prove to the dealer that he has as much interest in helping the dealer sell merchandise as he has in selling to the dealer.

When the territory manager or the distributor sales

manager has earned the respect and confidence of the dealer, he finds that he has become the dealer's respected counselor and confidant—and that the orders for merchandise thereafter are automatic.

The distributor, as a servicing dealer's teammate, must assist the dealer with his servicing problems. This starts with an adequate replacement parts stock to enable servicing dealers to give their customers prompt, efficient, low-cost service.

In addition, there must be made available field trouble shooters to help dealers with particularly difficult service problems, regular product service training meetings, bulletins to keep dealers up to date on service shortcuts, problems, etc.

In large metropolitan markets, where centralized service is maintained for dealers, the distributor must provide the kind of home demonstration and service the dealer would expect if he had his own service organization doing the job. The customer contacts made by distributor service personnel with the dealer's customers must be such as to insure a fine relationship between the customer and the dealer.

This is done through high quality, prompt and courteous service in and out of the warranty period, and when out of the warranty period, at reasonable prices.

Need Dealer Suggestions and Criticisms

As a teammate with dealers, progressive distributors constantly solicit dealer suggestions and criticisms of the distributor organization and its operation. They know that they are far from perfect. They believe they have the right objectives and have a sincere desire to improve.

As distributors welcome criticism and suggestion, they feel at liberty to make a few suggestions to their dealer teammates. For what they may be worth, here they are:

(1) Those dealers who handle multiple lines should reduce the number of lines to certainly not more than two or three. In many cases, one line will suffice. Do this in your interest, for you then will be able to offer your customers a complete range of models in a given manufacturer's line from which to select; you will have better and more effective salesmanship; you will reduce your inventory investment; increase your turnover; reduce your obsolescence losses and increase your profits.

(2) Consult regularly with your banker. Make him a

real teammate in the operation of your business. Don't try to hide unfavorable trends from him or from the credit managers of your distributors. They can help you most when unfavorable trends start to develop.

(3) Take advantage of all of the helpful materials provided by your teammates, the manufacturers.

(4) Be an important account in dollar billings to one or two distributors, so that you will be important to that distributor or those distributors. Don't divide up your business in such a way that you are not important to any distributor. Don't be a fair-weather friend to a distributor. Stick with the one or two distributors you decide are best for you, and you will find that in good times or in bad times these distributors will stand by you. You will find them to be real teammates.

Are Distributors Overpaid?

Now, I would like to come back to Mort's original question, which basically was: "Are distributors overpaid for what they do?" To answer that question, let's look at the record:

In the report of the National Assn. of Electrical Distributors on the value added by distributors' functional services for the year 1954, we find that the gross margin of specialty appliance members in large metropolitan cities was 13.60%, operating expenses were 11.08% and profit before Federal and State taxes was 2.52%. For specialty appliance members with headquarters in cities of less than 1,000,000 population, the gross margin was 15.80%, operating expenses were 13.34%, and profit before taxes 2.46%.

To be successful as a specialty appliance distributor requires the constant vigilance of the owners and managers. You can't rest on your accomplishments of yesterday. For if you attempt to do so, you find out that your sales performance has slipped, your profits have disappeared, your banker has reduced his credit line, you have lost dealer support—and if you don't take measures quickly to reverse the trend, you are an ex-employee of your manufacturers and if you own (usually in cooperation with the mortgagor) the buildings you use in your business, you end up by being in the warehousing business instead of the distributing business.

The price of success in our business, as in every business, can be summed up in two words: Eternal Vigilance.

Television Digest

with **ELECTRONICS REPORTS**

PUBLISHED WEEKLY BY RADIO NEWS BUREAU • WYATT BLDG. • WASHINGTON 5, D.C. • TELEPHONE STERLING 3-1755 • VOL. 11: No. 35

SUMMARY - INDEX OF THE WEEK'S NEWS — August 27, 1955

MORE VHF STATIONS via drop-ins, using low power and directional antennas, strong possibility in light of changing FCC allocations philosophy (p. 1).

FEW 2-SET HOMES as yet, ARB survey shows, giving added force to last week's Census Bureau survey indicating good first-set market potential, too (p. 3).

JUVENILE DELINQUENCY can't be blamed directly on TV, says Senate committee, which sees industry taking "calculated risk" with crime programs (p. 3).

ZONE I 1250-FT. CEILING blasted by UHF Committee, WNHC-TV and aircraft interests; NBC & WFIL-TV urge FCC approve their purchases of uhf stations (p. 4).

MORE TV PRICE HIKES coming as material and labor costs continue to soar; Motorola next. Philco creates 2 factory service branches (p. 9).

ELECTRONICS FACES glowing future, according to Loeb, Rhoades report on RCA, which projects its revenues to \$1.7 billion by 1959-60 (pp. 7 & 12).

SATELLITE DEAL revives Stockton, Cal. uhf outlet, now getting programs off-air from Sacramento uhf. Reports on upcoming stations (p. 8).

ALL-OUT FOR COLOR, big Philadelphia distributor outlines campaign to sell 150 sets weekly; Tom Joyce sees parallel with TV in 1939 (p. 13).

ANNUAL TV-RADIO POWER BILL \$650,000,000: Among the most vigorous proponents of TV in its early days were the electric power companies (Chicago's was one of most active, as we recall) -- and today it's easy to see why. Public's annual power bill for running TV sets comes to a very handsome \$481,000,000. Add to that radio's \$169,000,000 and you get total TV-radio bill of \$650,000,000. That's not counting the power bill of the nation's 3300-odd AM & FM radio stations and 442 TV stations.

Here are the factors used in arriving at those figures: TV set is turned on average of 35 hours weekly (per American Research Bureau); average current, 280 watts (Edison Electric Institute); average rate, 2.74¢ per kwh (Edison); total sets-in-use, 34,500,000 (Sylvania's Frank Mansfield). Average TV set uses \$13.96 worth of electricity a year. Fewer statistics are available for radio, but it's estimated there are about 75,000,000 radios in use (excluding auto & portable) turned on for average of 2½ hours daily. They use about 90 watts each -- \$2.25 worth a year.

TV ranks near top of home appliances as power consumer, according to power companies: Deep freeze consumes \$18.63 annually; refrigerator, \$9.59; washing machine, \$1.23; vacuum cleaner, 68½¢.

Power consumption is but another aspect of TV's direct contribution to the economy -- to be added to set sales volume of \$1.227 billion and servicing volume of \$1.5 billion annually (Vol. 11:25) -- aside from its incalculable contributions as an advertising medium.

COMMISSIONERS LEAN TOWARD VHF DROP-INS: Major TV allocations upheaval is a distinct possibility in coming months. Among FCC commissioners, there's accelerating thinking that time is ripe for abandoning present allocations principles -- fixed-mileage separations, full-power, non-directional -- and dropping in vhf channels on whole-sale basis, using protected-contour principles employed in AM.

Chances that majority of commissioners can be mustered to vote for such a move are very strong. Comr. Hyde has shown distinct leanings in that direction (Vol. 11:28), will expound further in Aug. 31 speech before Washington Lions Club. Comr. Lee has little doubt that move is warranted, and he may elaborate his views in Sept. 20 speech at NARTB regional meeting in Chicago. And it's very probable that at least 2 more members will endorse the allocations action.

Turnover in membership of Commission and top staff members has substantial role in the changed thinking. Of members who formulated present allocations plan,

only Hyde and Webster remain -- with Hyde already willing to explore change. Of the staff, ex-Broadcast Bureau chief Curt Plummer, who is said to have had a leading role in planning existing allocations, has been shifted out of the TV picture, is now chief of Safety & Special Radio Services Bureau.

Though Hyde and Lee tend to same ideas on vhf drop-ins, they diverge when it comes to "what to do about uhf?" Lee would put new vhf assignments anywhere they fit physically and there's demand. He'd like to help uhf operators by giving them a preference for the new vhf assignments -- if that's legally possible. Hyde likes what may be termed "two-way deintermixture" -- keeping predominantly uhf areas clear of vhf while adding more vhf to predominantly vhf areas in need of more stations.

* * * *

There's nothing new about vhf drop-in proposals now being pushed. The idea of an "engineered" plan was broached by many, without avail, when FCC was considering how to end freeze in 1948-52.

Most consulting engineers have always felt that allocation-by-mileage was an arbitrary and unrealistic principle; they've claimed that stations should be made to serve specific markets rather than be given same power-height potential regardless how large or how small a market they serve.

Current proposals have this theme: Assign vhf channels wherever they're applied for -- provided they cause no more interference to existing stations than would stations located at minimum distances now specified in rules. The new stations would generally have lower powers and heights, use directional antennas. One engineer estimates average would radiate 5-kw ERP. First such petition was filed year ago, Aug. 31, 1954 by off-air uhf WFPG-TV, Atlantic City, prepared by its counsel Arthur Scheiner, former chief of FCC Rules & Standards Div. Five other similar petitions have been submitted since then.

Lee feels that drop-ins are good for short-range relief. Long-range, he'd like to get more vhf channels, principally from the military, and he believes that a determined effort might be fruitful.

* * * *

We've spot-checked a few leading consulting engineers and find they generally believe that careful use of drop-ins would be helpful on short-run basis -- but few think that the 12 vhf channels will satisfy demand for the long pull.

"My pat answer about drop-ins," says one engineer, "has always been this -- 'they're bound to come because they always have, in broadcasting.' As for getting more vhf channels from the military, I don't believe the FCC would have a chance. The military has some very expensive 'hardware' flying in the 225-400 mc band. But I believe quite a competitive system could be built with 3-4 more channels."

Another argues: "I've always claimed that the FCC should have authorized 'controlled power' for stations. Why should a station in Podunk have 316 kw and 2000 ft.? It will never use it. However, some of these drop-in stations wouldn't amount to much -- just a buzz around the transmitter."

"It's a good stop-gap idea," states another, "meaning more stations and better total use of the channel. But it's not a long-range solution; 12 channels are not enough. In the next 10-20 years, I foresee a rough parallel to the growth of radio -- and Lee's idea of getting more spectrum from the military is a good one."

Drop-ins could add some 25% more assignments, another calculated. "It could be helpful in quite a few areas," he says. Chances of getting more vhf channels in addition to present 12 are "pretty poor," he says, adding: "Then you still have a conversion problem. It would cost less to convert to new vhf than to uhf -- but it's still a problem."

Though most attorneys believe rule-making is needed to put drop-in procedure into effect, firm of Welch, Mott & Morgan, who with engineer John Mullaney are the latest to urge drop-ins (Vol. 11:34), claim that rule-making is unnecessary, that years of delay can be avoided. One commissioner, at least, says there's no doubt that rule-making is required, adds that it could be completed in 90 days. Thereafter, applications could be filed, then granted where there's no conflict, set for hearing where competition develops.

LESS THAN 5% OF HOMES HAVE 2 TV SETS: The big market potential for TV receivers reflected in last week's Census Bureau report, showing one-third of U.S. households without TV as of June (Vol. 11:34), is reemphasized in nationwide survey by American Research Bureau showing only 4.3% of all TV homes had 2 or more sets as of July.

Taken together, the reports point to a continuing high first-and-second-set sales potential for some time to come. Add color sets, which loom increasingly important, and you have a truly rainbow-hued horizon for TV -- assuming, of course, a continuing favorable national economic climate.

Survey by ARB (National Press Bldg., Washington; James Seiler, director) is one of a continuing series, based on data secured in course of audience studies in all TV areas, and is sold to set manufacturers. In addition to national figures, it gives data for 31 selected markets, and rates the set manufacturers according to their share of those markets and of the U.S. market as a whole. It also provides data on age and screen size of sets-in-use, rate of replacement purchases, and homes having second-hand sets.

Another source of second-set and replacement business, as disclosed by the survey: 38.8% of sets-in-use are 3 years or older, 10.9% have screen sizes under 17-in.; it should be noted, though, that there's probably some duplication in these categories. Survey also shows 44.5% of sets-in-use are 21-in., 36.8% are 17-in., 2.1% are 24-in. -- figures not much at variance with the Sylvania Research tabulations published in our new Television Factbook No. 21 (p. 19).

We were permitted by ARB to use only selected excerpts from the survey, which is replete with valuable data for telecasters and merchandisers alike. For example, multi-set homes are most common in Baltimore, where 8.6 families in every 100 have 2 or more of them. Seattle-Tacoma area has lowest multi-set saturation of pre-freeze markets, with only 2.6% of TV families having 2 or more sets.

Philadelphia led all cities in replacements -- 75.3% of sets bought there going to homes which already had a set. Chicago is next, with 73.9%, then Detroit, 71.8%. Dayton and Los Angeles have greatest percentages of homes with second-hand sets -- 11.8% and 11.1%, respectively.

These markets are covered in survey: Atlanta, Baltimore, Boston, Buffalo, Chicago, Cincinnati, Cleveland, Columbus, O., Dayton, Davenport-Rock Island-Moline, Detroit, Evansville, Jacksonville, Los Angeles, Minneapolis-St. Paul, New York, Philadelphia, Providence, San Diego, San Francisco, Scranton-Wilkes-Barre, Seattle-Tacoma, southeast Florida (Dade, Broward & Palm Beach counties), Spokane, Toledo, Tulsa, Washington, Wichita, Wilmington, Winston-Salem, Youngstown.

Note: ARB has offered to make a one-shot county-by-county census of sets-in-use next spring, to be released in early summer. The proposal will be submitted to Advertising Research Foundation & networks to underwrite estimated \$1,500,000 cost.

SENATORS WARN OF TV CRIME 'POTENTIAL': Direct blame for juvenile delinquency cannot be placed on TV -- but the industry is taking a "calculated risk" of contributing to youthful crime by continuing "saturated exposure" of children to telecasts of crime and violence, according to juvenile delinquency subcommittee of the Senate Judiciary Committee, headed by Sen. Kefauver (D-Tenn.). Conclusion is reached in 106-page report released this week, which offers the industry's programmers food for thought.

Anxious to preserve rapport with the TV industry that proved valuable to him in his crime-busting start, Sen. Kefauver carefully points out: "The subcommittee did not concern itself with the excellent children's programs produced by the networks and individual stations, nor the many outstanding public service telecasts suitable for viewers of all ages of which the industry is rightfully proud." At the same time, he risked alienating the industry by recommending FCC program control.

Confuting the do-gooders who have often pounced upon TV, report says subcommittee "has been unable to gather proof of a direct causal relationship between the viewing of acts of crime & violence and the actual performance of criminal deeds."

On the other hand, it says it hasn't found "irrefutable evidence that young people may not be negatively influenced in their present-day behavior by the satu-

rated exposure they now receive to picture and drama based on an underlying theme of lawlessness and crime which depict human violence."

TV is potentially most dangerous of all media investigated, report says. It states: "Attending a movie requires money and the physical effort of leaving the home, so an average child's exposure to films in the theatre tends to be limited to a few hours a week. Comic books demand strong imaginary projections...must be sought out and purchased. But TV, available at a flick of a knob and combining visual and audible aspects into a 'live' story, has a greater impact on its child audience."

* * * *

Subcommittee is careful to note that there's controversy, even among the experts, as to whether TV contributes to juvenile delinquency -- but it takes the position that there's a dangerous potential which must be minimized. As a program to reduce such danger, the report offers 6 recommendations:

- (1) Formation of more local "listening councils" to induce stations to reduce number of objectionable programs and scenes.
- (2) More FCC control over programs, including the levying of fines and revocation of licenses, for "violating an established code."
- (3) Adherence to NARTB code by all stations.
- (4) Extension of NARTB code to TV film.
- (5) More private and public research on problem.
- (6) Establishment of a Presidential Committee, by legislation, to study the impact of media on juvenile behavior.

Most controversial recommendation, of course, is the one which urges more FCC "control" over programs. In testimony before subcommittee, virtually all witnesses -- including FCC members and even the most vigorous critics of TV programs -- were emphatic in their rejection of the implications of censorship inherent in such a recommendation (Vol. 10:43). Only ex-FCC Comr. Hennock asked for it.

Other members of committee, in addition to Kefauver: Hennings (D-Mo.), Daniel (D-Tex.), Langer (R-N.D.), Wiley (R-Wis.). TV hearings were conducted June 5 and Oct. 19-20, 1954 and April 6-7, 1955. Included in appendix to report are texts of NARTB television and radio codes, movie code, letters from 34 psychiatrists, reproduction of our Jan. 1955 TV Factbook map. Copies of the report are available from the subcommittee -- or we'll get one for you.

HIKE OF CEILING for vhf stations in Zone I from 1000 ft. to 1250 ft. (Vol. 11:30) was lambasted from several angles this week. UHF Industry Coordinating Committee, filing petition for reconsideration, was particularly bitter, stating:

"At this crucial moment in the history of TV when the fate of uhf stations all over the country hangs by a slender thread, it is almost incredible that the Commission, by a vote of only 3 of the 7 commissioners, would take an action which would virtually clip that thread and plunge those stations into complete destruction . . . It is inconceivable that the action was taken with full awareness of such possible consequences. The action, moreover, (1) renders sterile the solemn commitments made by the Commission to the U. S. Senate, to the public and the broadcast industry concerning measures the Commission had under consideration for remedying the plight of uhf stations; and (2) prejudices and renders moot other pending rule-making proceedings and petitions."

Vhf WNHC-TV, New Haven (Ch. 8) also asked for reconsideration, noting that CAA limits it to 720 ft. while New York's adjacent-channel WABC-TV (Ch. 7) and WOR-TV (Ch. 9) can increase powers 2-2½ times, creating more interference to WNHC-TV.

Also asking for another look were T. P. Pike, asst.

defense secy., and Air Transport Assn. They asked that things be held up pending conclusion of study of air hazards being conducted by Air Coordinating Committee.

* * * *

NBC and WFIL-TV, Philadelphia, answering McFarland Letters, urged FCC to approve their purchases of WBUF-TV, Buffalo (Ch. 17) and WLBR-TV, Lebanon, Pa. (Ch. 15), respectively (Vol. 11:9, 11, 15 & Vol. 11:27). NBC argued that "it is perfectly evident that uhf will not survive in Buffalo unless remedial action is taken soon"; that FCC's theory of helping uhf by permitting owners of 5 vhf to acquire 2 uhf is still sound; that pending Justice Dept. anti-trust proceedings against RCA have no bearing on case.

WFIL-TV, answering complaint of WHP-TV, Harrisburg (Ch. 55), said that WLBR-TV won't be a satellite; that uhf will be helped because public will be induced to buy uhf sets when off-air WLBR-TV is resuscitated; that competition will be increased because radio WLBR and *Lebanon News*, now co-owners of WLBR-TV, will compete between themselves and with WLBR-TV after sale.

One allocations change was requested this week: WLBT, Jackson, Miss. (Ch. 3) asked that Ch. 6 be moved from Clarksdale to Cleveland or Ruleville, said it would apply for channel if no one else does. One CP was dropped: KMPT, Oklahoma City (Ch. 19), which quit operating Feb. 4, 1955.

Personal Notes: George C. McConnaughey, FCC chairman, returning by ship from month's European trip, is due to reach N. Y. Sept. 2, expected back at desk Sept. 6. Acting Chairman Webster and Comr. Lee have been staying on job full time; rest of commissioners have spent most of month's vacation in Washington, dropping in on offices occasionally . . . Sylvester L. (Pat) Weaver, NBC pres., addresses Institute of Practitioners in Advertising at London's Hotel Dorchester Sept. 27, speaking on American TV; he's going over also to observe start of Britain's commercial TV Sept. 22 . . . Alvin Cooperman promoted to mgr. of NBC-TV program sales, reporting to program sales director Michael Dann . . . George W. Bartlett, ex-radio WDNC, Durham, N. C., named asst. to A. Prose Walker, mgr. of NARTB engineering dept. . . . Arthur J. Underwood Jr. promoted to mgr. of Katz Agency Inc.'s Detroit office, replacing W. Fiske Lochridge, who transfers to newspaper div. in N. Y. to succeed John L. Cross Jr., killed in Aug. 4 airplane accident . . . Al Perlmutter named mgr. of special projects, WRCA-TV & WRCA special events dept.; he's succeeded as promotion coordinator by Al Slep . . . Robert Reed, onetime exec. producer of *Major Bowes' Amateur Hour*, recently with radio WRC, Washington, named program mgr. of WOAI-TV & WOAI, San Antonio . . . Raymond F. Guy, NBC, reappointed chairman of NARTB's engineering advisory committee . . . Ray W. Colie promoted to national TV sales mgr., WWJ-TV, Detroit, as Wendell P. Parmelee becomes TV sales development mgr. and asst. TV sales mgr. Douglas L. Sinn is named local TV sales mgr. . . . Gene Ellerman, ex-radio WJLB, Detroit & WBBC, Flint, named sales mgr. of WWTW, Cadillac, Mich. . . . Ralph Davison Jr. promoted to gen. sales mgr., Mel Wright to national spot sales mgr., KGMB-TV & KGMB, Honolulu . . . Richard Depew handling ABC's closed circuit dept. since resignation of Wm. Balaban . . . Bill Adler, ex-WRCA-TV & WRCA, named director of press & special events, WABD, N. Y. . . . Harlan J. Dunning, ex-BBDO, named CBS Radio network program supervisor . . . Burt Hanft, Screen Gems Inc. business mgr., has new title of director of business affairs; Dan Glass, ex-Louis Nizer law firm, named business mgr.; James Dodd, ex-Columbia Pictures International, named coordinator of international sales . . . Russ Raycroft, ex-v.p., Robert Orr Assoc., heads new N. Y. offices of Roland Reed-Gross Krasne commercial div., 521 Fifth Ave.; Burton Neuberger, ex-Kling, heads Chicago office in Hearst Bldg. . . . Carl Flower, ex-WKNB-TV, Hartford, named TV-radio director, Post, Johnson & Livingston Adv., Hartford . . . Wm. R. Wyatt, Nielsen v.p., appointed central div. mgr., Chicago, with v.p. George E. Blechta heading eastern div. in N. Y. . . . Clarence Hatch, ex-exec. v.p. of D. P. Brother & Co., Detroit and long active in TV circles there, joins Kudner Agency in N. Y. as senior v.p. . . . Henrick Booraem Jr., McCann-Erickson v.p. in charge of new program development, appointed director of TV-radio planning; Frank Gilday promoted from business mgr. to mgr. of agency's N. Y. TV-radio dept.—both reporting to Terence Clyne . . . Dan Seymour resigns as of Oct. 1 as v.p. in charge of TV-radio programming & production, Young & Rubicam, joining J. Walter Thompson Co. as v.p. . . . Ted Oberfelder resigns as v.p.-gen. mgr. of WABC-TV & WABC, N. Y., his duties assumed temporarily by ABC v.p. Slocum Chapin . . . Russ Truesdell resigns as mgr. of KSCJ-TV, Pueblo, Colo. to become operations mgr. of KNTV, San Jose, Cal. . . . Dave Baylor resigns as v.p. of Telerad Inc., management company for KSCJ-TV, Pueblo, and KGA, Spokane . . . Scott McLean promoted to eastern sales mgr., Crosley Bestg. Corp. . . . Walter Koessler, ex-WITV, Ft. Lauderdale, named sales mgr. of Storer's WGBS-TV, Miami . . . Frank Papp promoted to exec. producer of NBC Radio's weekend *Monitor*, replacing James Fleming, resigned.

Fund for the Republic, headed by Robert M. Hutchins, which seeks to promote civil liberties and racial & religious tolerance, has allotted \$300,000 for TV series featuring Herbert L. Block, Pulitzer prize-winning cartoonist of *Washington Post* known as "Herblock." Titled *Herblock Week*, it will comprise 26 films, 15-min. each, with Herblock illustrations and commentaries. Reggie Schuebel Inc., N. Y. has been engaged to place series with stations and sponsors, with 25-30 already committed. Howard Chernoff is TV consultant to the Fund, which this week also announced that top prizes in its TV script-writing contest went to: Burton & James Benjamin, \$5000 for documentary *Pepito*, dealing with adjustment of a Puerto Rican youth to N. Y. life; Mrs. Lillian Schoen Andrews, W. Englewood, N. J., an ex-NBC radio writer, \$5000 for play *The Conspirators*, devoted to Elijah Lovejoy, abolitionist editor. Altogether, \$29,000 in prizes was awarded, and effort will be made to have all the scripts produced on TV. Note: Fund also has famed director Worthington Miner working on half-hour series titled *Challenge*, slated for NBC-TV.

Voice of Democracy contest, industry's annual public-spirited promotion, sponsored by RETMA, NARTB & Junior Chamber of Commerce, gets under way Oct. 1 when high schools start local competitions. High school students write and recite original 5-min. scripts on theme "I Speak for Democracy." Local winners are selected in personal competitions; state & national winners are chosen from recordings. The 4 national winners are entertained in Washington during week of Feb. 22, and are awarded \$500 checks toward college education. All state and national winners receive TV sets, among other prizes, donated by RETMA members. James D. Secrest, RETMA exec. v.p., is chairman of contest committee. Among other committee members are Robert K. Richards, NARTB consultant, Joseph M. Sitrick of NARTB staff, RETMA's Peter H. Cousins.

The O'Neils' General Tire empire—comprising rubber, TV-radio, rockets & synthetics—is subject of Aug. 27 *Business Week* cover story, tracing rise of 40-year-old firm from founding by chairman Wm. F. O'Neil to recent \$25,000,000 purchase of RKO by his son Tom as head of General Teleradio subsidiary (Vol. 11:30).

"A friend of mine recently exposed to a 50-minute Julius Caesar [on TV] is still in a state of shock and goes around muttering, 'This was the most unkindest cut of all.'"—Richard Maney, theatrical agent, substituting for columnist John Crosby.

Chamber of Commerce, Minneapolis, has taken unusual step of publishing handbook, available on request, explaining setups of city's TV & radio stations and how to utilize their facilities.

Tri-dimensional TV "that won't have nearly the impact of color" was foreseen by Dr. Lee DeForest as he celebrated 82nd birthday in Hollywood Aug. 26. He also said he may live to see man travel to the moon.

Its technical equipment destroyed by fire caused by short circuit in transmitter room Aug. 5 (Vol. 11:32-33), WCOV-TV, Montgomery, Ala. (Ch. 20) returned to full-time operation Aug. 20, reports gen. mgr. Hugh M. Smith.

"TV Listener" is device for individual listening produced by Telex Inc., Telex Park, St. Paul, Minn. It comprises headsets, 15-ft. cord and remote-control volume regulator.

Alfred Jackson, WRCA-TV & WRC technical supervisor, is in England on loan to Associated Broadcasting Corp., ITA contractor, preparing for commercial TV.

NARTB changes dates of its Region 1 conference meeting (New England) to Sept. 22-24 at Saranac Inn, Lake Saranac, N. Y.

Network Accounts: Auto industry is spending whopping \$83,400,000 on network TV this fall, reflecting fiercely competitive intra-industry struggle. This is increase of \$24,800,000 from the \$58,600,000 auto makers spent last year. Biggest spenders will be General Motors, laying out \$25,400,000 (vs. \$10,400,000 year ago); Chrysler, \$21,400,000 (vs. \$16,750,000); Ford, \$13,900,000 (\$9,200,000). At least one auto-sponsored show will be on network TV every night this fall . . . NBC-TV's answer to CBS-TV's top-rated \$64,000 *Question is Big Surprise*, to be sponsored Sat. 7:30-8 p.m. starting Oct. 8 by Speidel Watch Bands & Purex Corp.; packaged by Louis G. Cowan Inc. (whose pres. recently joined CBS as v.p.), show is novelty quiz in which contestant gets "lifetime ambition" fulfilled on program, with prizes up to \$100,000 . . . Kellogg Cereals replaces Frigidaire as co-sponsor of *Arthur Godfrey & His Friends* on CBS-TV this fall, Wed. 8-9 p.m., thru Leo Burnett; Toni replaces CBS-Columbia as co-sponsor of *Arthur Godfrey's Talent Scouts* starting Oct. 3, Mon. 8:30-9 p.m., thru Tatham-Laird . . . Coca-Cola buys two 15-min. segments per week of *Mickey Mouse Club* on ABC-TV starting in fall, Mon.-thru-Fri. 5-6 p.m., thru D'Arcy; TV Time Pop Corn buys one 15-min. segment, thru Ruthrauff & Ryan; Johnson's Wax & Alka Seltzer share one 15-min. segment, as do General Mills & Vick . . . Armour & Co. (canned meat div.) buys 20 min. alt. weeks of *Perry Como Show* on NBC-TV, Sat. 8-9 p.m., thru Foote, Cone & Belding . . . Standard Brands to be alt. week sponsor of *Topper* on ABC-TV starting Oct. 3, Mon. 7:30-8 p.m., thru Compton Adv. . . Admiral to sponsor Bishop Sheen's *Life Is Worth Living* for 4th straight year, this time on ABC-TV starting Oct. 13, Thu. 8-8:30 p.m., thru Russel M. Seeds Co., Chicago; Admiral will also sponsor the prelate on ABC Radio at different time . . . American Home Products (Anacin, Heet, Freezone) & Procter & Gamble to be alt. sponsors (with Western Union) of *Down You Go* on ABC-TV, shifting to Thu. 9:30-10 p.m. starting Sept. 15, thru Biow-Beirn-Toigo . . . Wesson Oil & Snowdrift Sales Co. to sponsor Tue. segment of *Valiant Lady* on CBS-TV starting Sept. 6, Mon.-thru-Fri. noon-12:15 p.m., thru Fitzgerald Adv., New Orleans . . . Ford Dealers Assn. buys co-op sponsorship in 4 markets of NCAA football series on NBC-TV this fall . . . General Tire to sponsor Detroit Lions-Green Bay Packers football game Thanksgiving Day on ABC-TV starting at 2 p.m., thru D'Arcy Adv., Cleveland . . . Tums to sponsor horse race between Swaps and Nashua from Chicago on CBS-TV, Wed. Aug. 31, 6-6:30 p.m., thru Ruthrauff & Ryan, Chicago . . . ABC-TV starts weekly *Outside U.S.A.* as sustainer Sept. 1, Thu. 10-10:30 p.m., featuring historian-commentator Quincy Howe in documentaries about foreign lands; first is agriculture in Soviet.

Two important affiliates meetings next month may determine future direction of network radio. NBC meeting Sept. 9 in the Waldorf-Astoria, N. Y. will consider proposal to extend commercially successful weekend *Monitor* to 7 days a week, 10 a.m. to 5 p.m., adopting same partic. sales pattern. Affiliates are reportedly divided on local revenue benefits to be derived from such extension. CBS affiliates, meeting Sept. 12-14 in Detroit's Sheraton-Cadillac Hotel, will discuss new partic. formula involving single, uniform charge for 5-min. segments of any 15-min. program, day or night. Plan was evolved by CBS Radio pres. Arthur Hull Hayes when he was gen. mgr. of KCBS, San Francisco.

Another radio casualty: *Lux Radio Theatre* quits this fall after 21 years on NBC, sponsor Lever Bros. continuing *Lux Video Theatre* on NBC-TV, Thu. 10-11 p.m.

Station Accounts: Second of series of 5 presentations by TV Bureau of Advertising under general heading of *Pinpoint Concept of Television*, all designed to stimulate local sales, is 24-p. brochure based on Nielsen study and devoted to children's programs, noting that 36% of all homes listen to them regularly; first presentation covered news programs (Vol. 11:31), next will deal with movies, women's programs, weather shows . . . TvB pres. Oliver Treyz also made a pitch this week for more dept. store advertising on TV, telling convention of National Industrial Stores Assn. in Washington that experience of General Dept. Store, Huntington, W. Va. (whose merchandise mgr. Paul C. Jamieson is NISA pres.) demonstrates local sales pulling power of TV; he said firm credits local spot campaign with greatly contributing to 81% sales increase in home furnishings over 1954 . . . Earl Selby's *Mr. Fixit* on WCAU-TV, Philadelphia, Mon.-thru-Fri., 6:25-6:30 p.m., sponsored by Philadelphia Gas Works Co., subject of how-he-does-it writeup in Aug. 29 *Time* . . . Stokely-Van Camp allots \$500,000 of new TV-radio budget to TV spots in 53 markets, thru Calkins & Holden . . . Blatz to test-market a milder beer, "Tempo," with big spot campaign in several cities, thru W. H. Weintraub & Co. . . Among advertisers currently reported using or preparing to use TV station time: Gerity-Michigan Corp., Adrian, Mich. (dishwashers), thru Elwood J. Robinson Co., L. A.; Amen Industries, Beverly Hills, Cal. (Fine Line arts), thru Walter McCreery, L. A.; Phillips Aviation Co., South Pasadena, Cal. (electric monorail toys), thru West-Marquis, L. A.; U. S. Rubber Co., N. Y. (Koylon foam mattresses), thru Fletcher D. Richards, N. Y.; Molson's Brewery Ltd., Montreal (Molson's ale), thru Fay Adv., Albany; Boyer International Laboratories, Chicago (H-A hair arranger), thru Schwimmer & Scott, Chicago; Nestle Co., White Plains, N. Y. (instant chocolate flavor), thru McCann-Erickson, N. Y.; In-Sink-Erator Mfg. Co., Chicago (garbage disposal device), thru Robert Christopher, Chicago; E. L. Bruce Co., Memphis (floor wax & cleaner), thru Christiansen Adv., N. Y.; Albers Milling Co., Los Angeles (Carnation corn flakes), thru Erwin, Wasey, L. A.; Marlowe Chemical Co., N. Y. (Fire Chief home-unit fire extinguisher), thru Kastor, Farrell, Chesley & Clifford, N. Y.; John H. Dulany & Son, Fruitland, Md. (frozen & canned foods), thru Erwin, Wasey, N. Y.; American Sugar Refining Co., N. Y. (Domino sugar), thru Ted Bates, N. Y.; Mid-Continent Petroleum Corp., Tulsa (D-X Sun-Ray oil), thru R. J. Potts, Calkins & Holden, Kansas City.

Rate increases: WBTV, Charlotte, raises base hour rate from \$900 to \$1000, min. \$180 to \$200; WMTV, Madison, hour from \$200 to \$280, min. \$40 to \$56; KTVK, Phoenix, \$300 to \$400 & \$60 to \$80; WBTW, Florence, \$250 to \$300 & \$50 to \$60. KNTV, San Jose, has new rate card at \$350 for Class AA hour (7:30-10 p.m., daily), min. \$70. Rate decrease: WTOM-TV, Lansing, cuts base hour from \$200 to \$150, min. \$35 to \$30.

All-network one-shot "spectacular" is planned by Civil Defense Administration this fall, featuring big-name entertainers. President Eisenhower may film message for show, directed by Nat S. Linden, CDA TV-radio chief.

San Francisco's KRON-TV, NBC affiliate (Harold P. See, gen. mgr.), has purchased 42 one-min. spots on city's NBC-owned radio KNBC, to promote upcoming shows, account placed thru Abbott Kimball, S. F.

DuMont stockholders' special meeting will be held at Clifton (N. J.) plant Oct. 10 to ratify proposed spinoff of TV stations, elect 2 new directors, approve other proposed policy & operational matters (Vol. 11:33-34).

Telecasting Notes: Washington correspondent of *London Times*, as prelude to commercial TV starting in Britain Sept. 22, writes in one of series of articles on TV here: "One of the more pointless inventions of American TV is the rating system, devised to reassure the sponsors that their programmes and the commercial pill within them are at least being watched. It can be the bane of the players, who can be at the top of the list one week and nearly at the bottom the next, and the limited telephone canvass on which the system is based often reflects juvenile rather than adult tastes, because the children are probably watching when the man calls" . . . American Research Bureau, for 2nd month, rates \$64,000 *Question* at top (48.4) for Aug. 17; *Toast of Town*, 2nd, 29.4; then *Robert Montgomery Presents*, 28.8; *What's My Line? & Two for the Money*, 28.1; *Best of Groucho*, 27.9; *Climax*, 27.8; *I've Got a Secret*, 27.2; *Four Star Playhouse*, 26.6; Wed. fights & *Lux Video Theatre*, 25.9 . . . New Screen Actors Guild contract (Vol. 11:34), covering extra pay for actors up to 7 re-runs, will add 6%-10% to TV film production costs, in opinion of TPA's Milton Gordon; next demands expected are from Writers Guild of America (West) for same type of agreement . . . Shortage of animators, due to demand for TV filming, is noted by Telefilm pres. Walter Lowendahl, pres. of Film Producers Assn. of N. Y., who urges specialty schools to train more of them; Motion Picture Screen Cartoonists local confirms that there's full employment among its members . . . 20th Century-Fox names Otto Lang, from theatrical staff, as executive in charge of TV productions under v.p. Sid Rogell, with Julian Johnson & David Brown heading story dept. and Alistair Cooke writing portions of *Cavaleade*, due in Sept.; studio has completed *Orbow Incident* for GE's CBS program, is making *My Friend Flicka* for CBS, soon starts *Laura* series based on 1944 film . . . Warner Bros. reports Hugh Benson succeeding Garry Stevens as gen. mgr. for TV film in charge of upcoming *Warner Brothers Presents* on ABC-TV; Jack L.

Warner is boss, with Wm. T. Orr as liaison executive . . . Still hot against what it calls "plug-uglies," Aug. 15 *Advertising Age* again calls down "timid" telecasters and sponsors for permitting "free-loading" on their shows—citing plugs to movies, airlines, etc.; editorial particularly condemns *Arthur Godfrey's Talent Scouts* for giving "3-min. commercials" to American Airlines for free rides it gives talent, noting that 2 transcontinental airline tickets would cost only \$450 to \$650—and "for this skimpy investment, American—according to our clocking—gets just about as much time as did Lipton's on this expensive show" . . . Another flagrant example cited is "unblushing 52-min. commercial" by Jack Webb on *Colgate Variety Hour*, plugging his movie *Pete Kelly's Blues*. Writer sees avalanche this fall "when the smart Hollywood boys, who have outfoxed client and network alike, will graciously let the sponsor have 6 min. of commercial (the shows will cost around \$150,000 an hour for time and talent) while they take 9 min. to talk about their pictures" . . . Titled *President of the United States*, series of 34 one-hour color films, each a dramatic episode in life of a President, is planned by newly formed World Films, Hollywood, headed by Wm. Rowland & Monte Brice; A. B. Guthrie Jr., the author, has been hired as story editor and co-producer, and it's proposed that sponsorships all be institutional and that 20 min. will be added for foreign theatrical releases . . . "Tarzan" slated for TV film series from Sol Lesser-Jack Denove TV Films Inc., Hollywood, with Gordon Scott playing role . . . "Brain trust" set up at NBC-TV, Hollywood, to develop new program ideas for its talent roster: Elliott Lewis, Milton Josephsburg, Merritt Barnum . . . KOVR, Stockton, Cal. (Ch. 13) opens studios & offices in Mark Hopkins Hotel, San Francisco.

KCMO-TV & KCMO, Kansas City (Meredith) sponsoring 3 tours of Europe by farm study groups leaving Nov. 1 under direction of C. W. Jackson, its farm director.

Financial & Trade Notes: Carl M. Loeb, Rhoades & Co., New York bankers with heavy interests in DuMont and other electronics firms, this week issued 42-p. printed report on RCA which delves deeply into the outlook for the electronics industry in general (see p. 12) and the financial and technical dominance and prospects of RCA in particular. Tracing RCA's post-war fiscal history, analyzing its capital structure and operations, report concludes:

"Looking ahead 5 years into RCA's future, we project revenues of \$1.7 billion by 1959-60, based upon a 12% annual growth factor compared with a better than 15% average in recent years. During this period the company's pretax profit margin should widen from the current rate of 9% to possibly 12% because:

"(a) The heavy costs of introducing color TV will have been absorbed and volume color receiver production should be achieved.

"(b) The company's NBC subsidiary, one of the nation's 3 major telecasting networks, should become more profitable as time rates and advertising volume increase.

"(c) Transistorized radios, both pocket-size and console models, should reverse the recent downtrend of radio manufacture while radio broadcasting activities should again produce normal profits when program formats have been adjusted and advertising revenues stabilize.

"(d) New commercial and industrial electronics products, serving large markets, should yield the high margins that usually attach to precision equipment; and

"(e) The lucrative replacement parts business will expand with the industry.

"Hence we postulate pretax earnings in the order of \$200,000,000 by 1960 and, if income taxes at that time are 50%, indicated net income of \$100,000,000 calculates to \$7

per common share of which one-half might be disbursed."

As largest single factor in electronics, only company in \$1 billion class whose activities are devoted primarily to electronics as distinguished from electrical equipment, RCA in 1954 accounted for approximately 10% of the industry's \$5 billion manufacturing volume and 40% & 30%, respectively, of network TV and radio broadcasting revenues, report points out. It reprints table below showing postwar growth of electronics industry and RCA compared with gross national product, with no adjustments for price increases and excluding figures for RCA Institutes and RCA Communications; source is RCA reply brief in govt. anti-trust complaint of last March 29, about which the report states:

"We believe that the Govt.'s anti-trust action against RCA will not have any material effect upon future growth because the company's strength is founded on its technological know-how and integrated manufacturing operation and because many of its most important patents and license rights are not affected by the suit."

	Gross National Product Billions	Electronics Industry* Millions	RCA Revenues	% RCA of Industry
1954	\$357.2	\$9,230	\$921	10.0%
1953	364.9	7,940	834	10.5
1952	346.1	6,567	676	10.3
1951	328.2	5,128	581	11.3
1950	285.1	4,445	571	12.8
1949	257.3	2,903	383	13.2
1948	257.3	2,762	343	12.4
1947	232.2	2,487	300	12.1
1946	209.2	1,653	221	13.4

*Includes broadcasting, services and consumer goods at retail but does not include certain industrial electronic products.

SATELLITE IDEA brought revival this week of off-air KTVU, Stockton, Cal. (Ch. 36) under agreement to transfer control to KCCC-TV, Sacramento (Ch. 40), capital's first TV operation which started 2 years ago and is reportedly one of the more successful uhf stations. Details of sale deal have not yet been disclosed, but CP of KTVU, which went off air last April 30 after some 18 months of operation, was slated to expire Oct. 7. Plan is to have it duplicate all KCCC-TV programs, picking them off air from Sacramento, 45 mi. distant. KCCC-TV is headed by Ashley L. Robison, nephew of late Comr. Harold Lafount, who owns it in partnership with Harry McCart.

On-air total now is 442, of which 107 are uhf. Poised to begin testing momentarily, possibly during present week end but not ready at press time, were 4 new starters: KCRA-TV, Sacramento (Ch. 3); KARD-TV, Wichita (Ch. 3); KTBS-TV, Shreveport (Ch. 3); WCTV, Thomasville, Ga. (Ch. 6)—all originally scheduled for this week.

Only shipment reported was 50-kw RCA transmitter to KTVH, Little Rock (Ch. 11), which left Camden Aug. 23 and is due on air Oct. 15.

* * * *

In our continuing survey of upcoming stations, these are latest reports received:

KTVO, Kirksville, Mo. (Ch. 3), authorized in Dec. 1953 and with CP extension expiring next Feb. 1, now reports RCA transmitter and antenna on way, with Sept. 28 as target for test patterns. Stainless tower has also been ordered. Berg Allison, mgr. of KBIZ, Ottumwa, Ia., is slated to be gen. mgr. CBS affiliation is anticipated as of Oct. 1. Station is 3/4 owned by James J. Conroy, attorney who also controls KBIZ and radio stations in Eau Claire & La Crosse, Wis. Rep not yet chosen.

KHAS-TV, Hastings, Neb. (Ch. 5) will take delivery in Sept. of its 10-kw RCA transmitter, when it will also install 650-ft. Ideco tower. Target date for test patterns now is late Oct. or early Nov., reports gen. mgr. Duane L. Watts, ex-KHOL-TV, Kearney, Neb., who will operate station for Seaton Publishing Co. (*Hastings Tribune*) and other owners. It will be NBC affiliate, starting in mid-Nov. Duane B. Allison is chief engineer. Base rate will be \$200. Rep is Weed.

WITN, Washington, N. C. (Ch. 7), replacing Greenville's WNCT (Ch. 9) as NBC basic affiliate on Sept. 26, now has test target date of Sept. 20, reports pres.-gen. mgr. W. R. Roberson Jr., whose family recently acquired control (Vol. 11:33). Now under construction are 800-ft. Stainless tower, surmounted by 21-ft. Alford antenna, at Grifton, N. C., about 25 mi. southwest of Washington, with 20-kw GE transmitter due to radiate 316-kw ERP for coverage of 756,300 population in heart of state's rich tobacco-growing area. Executive staff will include T. H. Patterson, commercial mgr.; Hal Wilson, program director; L. E. Hiland, chief engineer. Network base rate is \$300, local \$325. Rep is Headley-Reed.

WTWV, Tupelo, Miss. (Ch. 9), originally planned for Sept. debut, now looks forward to beginning of operations sometime in Oct., reports gen. mgr. Frank K. Spain—but conversion of studio-transmitter building and installation of equipment still awaits FCC & CAA approval of new site. Mr. Spain is ex-engineering chief, WHEN-TV, Syracuse, owns 35% of new project; his chief engineer Joseph G. Petit, ex-NBC-TV, N.Y., owns 25%. He plans to use custom-built 5-kw transmitter, GE antenna, 300-ft. tower. Rep not yet chosen.

FARM TV SET count for Oklahoma was released this week by Census Bureau as part of its Oct.-Nov. 1954 Census of Agriculture. Based on 20% sample, Oklahoma was shown to have TV on 41,695 of its 118,979 farms—or nearly 33%—with stations in Oklahoma City, Tulsa, Ada, Enid, Lawton, Muskogee and with out-of-state viewing possible from stations in Kansas, Missouri, Arkansas & Texas.

Note: Previously published tabulations—Nev., N. H., Vt. (Vol. 11:28); Wyo. (Vol. 11:29); N. D. (Vol. 11:30); Ida., Utah (Vol. 11:31); Mont., S. D. (Vol. 11:32); Colo., Minn. (Vol. 11:33); Wis., Kan. (Vol. 11:34).

KBMB-TV, Bismarck, N. D. (Ch. 12), granted in May to John W. Boler interests (KCJB-TV, Minot & KXJB-TV, Valley City), has ordered 10-kw Federal transmitter and Federal 4-bay antenna, due for delivery Sept. 15 when antenna is slated to be installed atop State Capitol. Test target date is Oct. 1, with CBS programming slated to start Nov. 1. Weed is rep for Bismarck station which will operate as satellite of Valley City, with all 3 stations offered at combination rate of \$637.50.

* * * *

CJLH-TV, Lethbridge, Ont. (Ch. 7) now aims to test week of Oct. 17, go commercial by Oct. 15, reports Bob Ranson for co-equal owners Norman Botterill, mgr. of radio CJOC, and Hugh Buchanan, publisher of *Lethbridge Herald*. It has ordered Standard Electronics transmitter, first of kind in Canada, shipment by Canadian Westinghouse awaiting completion of new 112x93-ft. studio-transmitter building. Tower is 600-ft. Stainless with 35-ft. Alford antenna. Mr. Botterill will be mgr., with Robt. Reagh as technical director and Douglas Keough, from CBUT, Vancouver, as sales representative. Reps will be All-Canada and Weed.

CKGN-TV, North Bay, Ont. (Ch. 10) has fixed Dec. 10 as target date, having ordered GE transmitter and 373-ft. Stainless tower. Construction has begun at Callendar, Ont. site and staff selection is under way. Licensee company has changed name to Tel-Ad Co. Ltd., is headed by G. A. Alger. Rep not yet chosen.

MORE PRICE HIKES COMING IN BOOM MARKET: Another major manufacturer is about to hike TV prices -- Motorola, which reveals the raises are due around Labor Day but won't state extent of increases beyond fact that they won't be across-the-board.

RCA states it has no immediate plans to increase, reiterating that it's trying to hold price line "as long as possible." But a Philco spokesman referred to a recent telegram by pres. James H. Carmine warning of possible price hikes on major appliances (Vol. 11:29) and said situation applies equally to TV. Admiral, Emerson and a few others have already raised TVs average of \$10 (Vol. 11:30, 33, 34).

CBS-Columbia pres. H.C. Bonfig, revealing plans to raise prices shortly after Labor Day, told distributors convention in Chicago that today's TV market is best characterized as "profitless prosperity." He said no manufacturer "can make much profit on any set retailing for under \$200, if any [profit] at all."

Increased costs of labor and materials, plus robust condition of market, are the primary reasons for price hikes. If further justification were needed, it came this week from Anaconda Copper, which raised copper price to record high of 43¢ per lb. -- 4th price increase for this indispensable metal so far this year.

* * * *

Standard & Poor's raises only dissent to prevailing industry view that 2nd-half TV business will be as good as, if not better than, record first-half. Its Aug. 25 analysis of electrical products reports: "The normal seasonal improvement in TV production is not expected to develop in the second half of 1955 because of large factory inventories...Inventories at all levels of the distribution pipeline will probably increase by 200,000 units for the year, and should somewhat exceed 2,000,000 sets at year's end." Actually, a leading trade statistician points out that inventories declined in July, are expected to come down further in Aug. to about 2,300,000 on Sept. 1 -- not regarded as excessive for this time of year.

Production in last 6 months of 1955 will total about 3,400,000, or 22% under final half of 1954, Standard & Poor's predicts -- omitting mention of fact that set makers underproduced intentionally in first half of 1954 as means of working off excessive inventories. Consequently, they went full speed ahead in last half.

Earnings of TV manufacturers will generally show moderate improvement over those of 1954," reports S&P, "while leading appliance makers are expected to register substantial year-to-year earnings increases. GE earnings should gain somewhat over those of 1954, but a decline is foreseen for Westinghouse. Dividends may be increased by some TV and appliance manufacturers. Payments by most others should be in line with the 1954 experience."

Brief highlights of other major trade developments this week:

* * * *

Philco Service: Is Philco going to emulate RCA in establishing its own national factory service subsidiary? Company will shortly open factory service branches in Philadelphia and Pittsburgh, supplementing the one which has been operating several months in Chicago -- but officials maintain silence on where they'll go from there. The branches are operated by Philco Service Co., chartered in Ill. & Pa. thus far.

Discount House Decline: Further indications that so-called franchised dealers have turned the tide in battle against discount houses, expressed quite freely at last week's NARDA-sponsored Institute of Management (Vol. 11:34), came this week from Wm. Burston, merchandise mgr. of National Retail Dry Goods Assn. In address at Salt Lake City, he said TV-radio-phono sales in dept. stores in May-July period were up 3% over same 1954 months, major appliances up 33%, as 2 examples of commodities in which competition from discount houses is most severe. He said retailers are winning battle by de-emphasizing merchandise sold in discount houses, by deciding to

give shoppers model and serial numbers, by "keeping up a ceaseless barrage of complaints" to manufacturers, by giving service and merchandising trade-ins.

Growing Markets: Census Bureau reports number of households has been increasing at rate of about 850,000 a year since 1950, reaching 47,788,000 in April 1955, compared to 43,554,000 in March 1950 and 39,107,000 in April 1947. Urban & rural non-farm households increased by about 1,000,000 a year since 1950, whereas rural-farm households declined about 150,000 a year. Of the 47,788,000 households in April 1955, about 43,243,000 were non-farm. The number of married couples increased from 36,100,000 in 1950 to 37,600,000 in April 1955. Those not maintaining their own households dropped to postwar low of 1,300,000 this year, compared to 2,000,000 in 1950 and 2,900,000 in 1947. In a related report, the Federal Reserve Board bulletin noted that U.S. labor force is growing so rapidly it will probably exceed 80,000,000 by 1956. Titled "The Labor Market in Mid-1955," report said labor force is expected to increase by about 1,200,000 a year during 1960-65, compared with annual increase averaging 750,000 during last 5 years. July employment was at record 64,995,000.

Economic Outlook: Still very, very upbeat, judging from time-tested economic barometers and the comments of businessmen. Consensus of 131 firms participating in recent survey by National Industrial Conference Board was that business generally in second half will be as good as, if not better than, first half of year. About 40% expected dollar billings to exceed first 6 months, 33% foresaw reductions, 25% anticipated about same level. More than 50% predicted production increase in second half of year, 25% foresaw decline, 25% about same. Commerce Dept. chipped in with preliminary report noting exceptionally good summer business lifted gross national product to annual rate of \$386 billion in midsummer vs. \$375 billion in March.

Fair Trade: GE continues to press its fight -- albeit almost single-handedly -- to strengthen fair trade law enforcement. It filed 18 separate suits this week in Milwaukee against local dealers charged by GE with selling its small appliances at below fair trade prices. And in Providence Federal Court, it won temporary injunction against sale of GE products at cut-rate prices in nearby Pawtucket. Judge said GE had made "an honest effort" to police its fair trade contracts in Rhode Island. Meanwhile, American Fair Trade Council stated that fair trade laws had been upheld by Supreme Courts in 15 of the 20 states where they had been tested. Only Nebraska has invalidated state fair trade laws, according to Council.

Production: TV output totaled 180,094 week ended Aug. 19, compared to 154,798 preceding week and 134,959 week ended Aug. 5. It was year's 33rd week and brought TV production for year to date to about 4,720,000 vs. 3,675,000 in same 1954 period. Radio production totaled 255,855 (101,594 auto) week ended Aug. 19, up from 240,148 preceding week and 209,689 week before. For 33 weeks, radio output was estimated at 8,500,000 vs. 6,500,000 in corresponding period of 1954.

DISTRIBUTOR NOTES: Hallicrafters appoints Harrisburg Radio Laboratory Supply Co., 1124 Market St., Harrisburg (Louis J. Zaydon, gen. mgr.); Kerr Tire & Rubber Co., Woodrow Wilson & Bailey Aves., Jackson, Miss. (Robert L. Nickey, sales mgr.); Bell Electronic Supplies Inc., 1835 W. 9th St., Chester, Pa. (James Housman, pres.); Television City, 208 E. North St., Rapid City, S. D. (B. H. Dail, owner) . . . CBS-Columbia appoints King Distributors, 1924 Central, Kearney, Neb. (E. W. King, pres.) . . . Emerson Radio of Pennsylvania takes over Harrisburg area distribution from Dauphin Electric Co. . . . Brown-Rogers-Dixon Co., Greenville, S. C. (Crosley-Bendix) appoints Harold Huffman district mgr. . . . Park Radio Service Inc., N. Y. (Trav-Ler) appoints Moe Zimble Long Island district mgr. . . . Raymond Rosen & Co., Philadelphia (RCA) moves to 51st & Parkside Ave.; its govt. subsidiary Raymond Rosen Engineering Products remains at 32nd & Walnut Sts. . . . Olympic Radio appoints Maloney Distributing Co., 1117 Farnam St., Omaha (James J. Maloney, pres.); firm is ex-Arvin Radio distributor.

Magnavox pres. Frank Freimann, in Aug. 21 interview in *New York Times* business section, foresees "indiscriminate distribution" of TV receivers collapsing as retail price cutters are weeded out. He said some manufacturers sell TVs to as many as 10,000 dealers. His own company, he states, sells directly to 1500. "Very few" of the nation's 100,000 TV dealers are making an adequate profit, he said. Story, by business writer Alfred R. Zipser Jr., traces Magnavox's growth since Freimann took over as a top executive in 1938 (at age 32), tells of his personal interest in music, having served as pres. of Ft. Wayne Philharmonic Orchestra.

TV in 1965, as foreseen by Westinghouse's Dan D. Halpin in address Aug. 28 at Texas Electronics Fair: 85,000,000 sets-in-use in more than 50,000,000 U. S. & Canadian households, 50-60% of them color; many picture-on-the-wall sets; battery-powered portable TVs; average retail price of TV about \$200, slightly higher than at present; annual sales of 8,000,000 sets at over-the-counter value of \$2.25 billion.

Topics & Trends of TV Trade: National Radio and Television Week, the big industry-wide promotion Sept. 18-24, shapes up as coordinated merchandising effort—with plans well advanced in more than 100 major markets to push TV-radio sales that week. RETMA, NARDA, NARTB & National Electrical Dealers Assn. are sponsors.

Regional committees—headed by outstanding local dealers, distributors or broadcasters—are in charge of arrangements in each area. Many are planning banquets in municipal auditoriums or hotels, to be addressed by top-flight industry leaders, as means of kicking off promotion. In addition, more than 100 daily newspapers plan to publish special TV-radio supplements, with copy supplied by *Saturday Evening Post* as service to TV-radio industry. Also, *Life Magazine* is furnishing display banners and posters to distributors & dealers.

NARTB is supplying promotion kit to all networks and stations. It includes 67 station breaks, spots and general announcements for use throughout the week, keyed to theme "National Radio and Television Week . . . Dedicated to Better Home Entertainment." Announcements urge listeners to "see the outstanding TV programs on new large-screen TV receivers," also promote radio-in-every-room and radio-for-every-purpose themes.

* * * *

Indicative of dealer-manufacturer cooperation, NARDA is setting up own consulting service for TV-radio-appliance manufacturers who wish to determine dealer attitudes towards their products. For fee of \$1000 to each manufacturer, NARDA will conduct survey among panel of 300-500 member dealers on how dealers regard competitive strength and weaknesses of lines, pricing factors, styling, etc. Only national surveys will be conducted, though manufacturers will be able to determine regional responses for themselves from the individual replies which NARDA will turn over to them. Two white goods manufacturers have already signed for surveys, said NARDA managing director A. W. Bernsohn.

Crosley will market what it calls Cadillac-class series of 4 higher-priced TV sets in Oct.-Nov. "in order to rid the public of the idea that all we produce are low-priced Custom V sets." Prices haven't been set yet on series, called "El Dorado," which will reportedly include at least one 3-way combination. About 6000 of the sets are to be produced this year.

Wilcox-Gay Corp. and subsidiaries Garod & Majestic Radio, whose Chapter XI hearings are scheduled Sept. 10 in Grand Rapids bankruptcy court, reports balance on hand of \$31,696 as of July 15—covering operations since Jan. 20. Receipts totaled \$1,950,930, disbursements \$1,919,233. Company is offering unsecured creditors 50% of claims, payable over 5 years.

Ray C. Ellis, Raytheon, named chairman of RETMA international dept., replacing Wm. M. Adams, Sprague Electric, who resigned because of illness; Henry A. Correa, Bendix Aviation, appointed vice-chairman of exec. committee; Ernest A. Marx, DuMont, chairman of TV-radio committee; R. A. Parsons, Collins Radio, chairman of electronics committee.

GE is latest with transistorized portable—\$49.95 radio with 5 transistors. With battery, it weighs 15 oz., measures 5 3/8 x 3 3/16 x 1 1/2-in.

CBS-Columbia budgets \$1,750,000 for all media up to end of year to promote new TV line, thru Ted Bates.

Automation developments at MIT's Automatic Control Research Center will be subject of telecast on CBS-TV's *The Search*, Sept. 6, 10:30-11 p.m.

Kenyon & Eckhardt, Whirlpool agency, gets ad account of new Whirlpool-Seeger Corp.

Trade Personals: Seymour Mintz, recently pres. of CBS-Columbia Inc., onetime Admiral adv. v.p., joins Kudner Agency, N. Y. as merchandising consultant on Frigidaire and other accounts; he also is consultant to National Co., Cambridge, Mass., plans to open own offices soon . . . James H. Carmine, Philco pres., and Leslie J. Woods, engineering v.p., due back from European business trip Sept. 6 . . . Brig. Gen. David Sarnoff will receive annual Gold Medal of Hundred Year Assn. of N. Y. for outstanding service to community at Waldorf-Astoria dinner, Sept. 29 . . . Norman C. Owen, serving as Zenith mgr. of distributors since his resignation in July as pres. of Webster-Chicago Corp., promoted to v.p. in charge of distribution . . . James A. Frye, mgr. of Stromberg-Carlson's recently-discontinued Chicago factory branch, appointed national merchandise mgr. for TV-radio . . . Lloyd E. Swedlund promoted to mgr. of monochrome tube product engineering, GE cathode ray tube sub-dept., Syracuse . . . Wm. W. Stefany promoted to asst. to L. L. Hardin Jr., research director, National Union Electric Corp. . . . Morris Spector, asst. mgr. of material, DuMont receiver div., assumes added duties of mgr. of cabinet dept., replacing Sidney Schwartz, resigned . . . Arthur J. Richards, Arvin service mgr., appointed chief radio engineer, Arvin electronics div., succeeding Robt. McGreggar . . . Kenneth G. Gillespie, v.p.-gen. mgr. of Jenkins Music Co., Kansas City, and TV-radio chairman of National Assn. of Music Merchants, returns from European tour of Philips of Eindhoven plants . . . Joseph B. Rickard, ex-MacFadden Publications, named adv. mgr. of new Columbia LP Record Club, 165 W. 46th St., N. Y. . . . John P. Doran promoted to asst. to Bendix-Crosley sales mgr. J. L. Armstrong . . . Samuel M. Whisler promoted to Motorola mgr. of customer services, succeeding Richard C. Rowley, now Texas territorial sales mgr. . . . Edwin Freed resigns as sales mgr. of General Instrument Corp. . . . Mrs. Julia Kiene resigns as director of Westinghouse Home Economics Institute, where she had served 17 years, to form own appliance consulting service . . . Roger Mackay named mgr. of Raytheon Atlanta district for equipment marketing, in reorganization of sales & service regions; Edward Kessler named Baltimore and W. J. Monroe Kansas City mgr. . . . John W. Grant promoted to mgr. of product planning, GE cabinet dept. . . . Anthony Dillon, CBS-Columbia midwestern regional mgr., transferred to N. Y. headquarters to work on expansion of distribution . . . Loren Larscheid named Scott Radio sales mgr. for Dakotas . . . Herbert A. Frank, ex-DeWald Radio & Higgers-Galanek Co., named national sales mgr. of distribution divs., Steelman Phonograph & Radio Co., reporting to gen. sales mgr. Paul E. Featherstone . . . Pat J. Morrisey named industrial sales mgr., Gramer-Halldorson Transformer Corp. . . . Frank Freimann, pres. of Magnavox, left for Europe this week, returns at end of Sept.

Hazeltine's Arthur V. Loughren is nominee for 1956 IRE president in mail ballots circulated to membership this week. Herre Rinia, of Philips of Holland, is the v.p. nominee. For directors at large, 1956-58, two to be elected: Lloyd V. Berkner, pres., Associated Universities Inc.; Edward W. Herold, RCA Labs; Theodore A. Hunter, pres., Hunter Mfg. Co.; Prof. John R. Whinnery, U of Calif. Regional directors, 1956-57, one to be selected in each. Region 1—Prof. Charles R. Burrows, Cornell U; Harry F. Dart, Westinghouse tube dept.; Lawrence B. Grew, So. New England Telephone Co. Region 3—Prof. John G. Brainerd, U of Pennsylvania; Prof. Lawrence R. Quarels, U of Virginia. Region 5—Joseph J. Gershon, DeVry Technical Institute; Robert E. Moe, GE receiving tubes dept. Region 7—Lenwood E. French, Neely Enterprises; C. Frederick Walcott, Gilfillan Bros.

Electronics Reports: Here's more on the magnitude and potential of electronics as a whole, as discussed in report released this week by N. Y. investment bankers Carl M. Loeb, Rhoades & Co. It's one of the most noteworthy sizeups since speech by Sylvania's finance v.p. W. Benton Harrison, titled "The Electronics Industry: Present Rate and 10-Year Potential," forecasting \$20 billion-a-year by 1965—published by us in full text as a Special Report last March 12 (for digest, see Vol. 11:11). It's part of a financial study [on RCA] designed to set forth "the investment attraction" of electronics; summary-conclusion on RCA in particular will be found on p. 7, but this is the chapter on electronics generally:

"Here is an industry," report states, "based upon the vacuum tube and transistor, that thrives upon the accumulating discoveries of science, whose products reduce the manufacturing costs of industry, lighten the burden of labor, put a sharp edge on our military weapons, and provide entertainment and comfort for the populace.

"Consequently, the manufacturing volume of electronics has expanded 20-fold within 15 years and has almost doubled over the past 3 years to become a major \$5 billion industry in 1954. In addition, there is perhaps another \$5 billion of related volume, allowing for \$1.4 billion of radio-television broadcasting revenues, a \$100 million business in phonograph records, over \$2 billion of retail markups on consumer products, some \$1 billion of service, and the balance in electronic gear that is concealed in non-specified military purchases and in the total figures for office equipment and industrial machinery.

"Each component of today's \$5 billion manufacturing volume is on firm ground:

"(1) Military electronic procurement and sponsored research, estimated at \$2½ billion by trade sources and expected to reach \$5 billion by the 1960's, is consistent with this country's long-range defense program that increasingly must stress electronically controlled weapons and protective devices in an age of supersonic flight, guided missiles and undersea warfare. This program also contributes importantly to the development of new civilian products.

"(2) Television receivers, virtually nonexistent in 1945, produce \$1 billion of manufacturers' sales. The imminent breakthrough of color television should double the industry's volume.

"(3) A \$230 million business in radios is lower than formerly but should expand again in view of normal turnover of some 130 million radios in use and new technological developments.

"(4) Replacement parts and tubes, a \$550 million business, can only grow as the nation's inventory of electronic products builds up.

"(5) Phonographs, high fidelity equipment and home tape recorders yield \$175 million of manufacturers' sales and the trend is upward.

"(6) Industrial electronics, still only a \$600 million business, should expand threefold by 1960 due to large-scale construction of microwave transmission facilities, heavy building of TV stations, growing use of closed-circuit television, and the emergence of 'automation' as a huge market for computers and control devices.

"However, we must also weigh the dramatic potential for electronics in nuclear energy, a heavy overall obsolescence factor for all electronic products, and an ever-widening stream of fundamentally new developments arising from a vast network of research laboratories employing perhaps 25,000 scientists. Some of these major new concepts and products, which have materialized already but are still in their infancy, include the transistor, printed circuitry, and video tape recording. Still in the laboratory but certain of eventual commercial development are electronic household appliances including air conditioning, the

atomic battery that will power transistorized portable equipment, and a true amplifier of light that will make possible 'picture-on-the-wall' TV screens, electronic photography, and devices to see in the dark.

"Hence electronics gives the assurance of a broad industrial base and accelerating growth over future decades—obviously fertile ground to plant the investment dollar."

* * * *

"Future defense volume," says another portion of the 42-p. Loeb, Rhoades report, "should parallel the development of military electronic procurement which is expected to rise from last year's \$2.5 billion level to \$5 billion by the 1960's. Rather than being tied to the overall rate of defense expenditures, which primarily affects conventional armaments, the projected expansion of military electronics is the product of modern warfare and an inexorable trend to guided missiles, supersonic aircraft, automatic gun fire and bombing control, and reliable countermeasures, all of which are essentially electronic systems subject to rapid obsolescence."

This is why as much as half the cost of modern military aircraft is represented in electronic equipment, according to the report: Fighter plane uses approximately 600 tubes, 900 capacitors & resistors, patrol bomber uses 1200 & 20,000, radar observation 3000 & 60,000, heavy bomber 5000 & 115,000—these in their complex apparatus for communications, navigation, flight planning, gun-fire control, radar, power controls, photography, missiles.

* * * *

Work on Willys flat tube (Vol. 11:3, 30), to adapt it to color, is being carried on by Hoffman Electronics in conjunction with Willys, pres. H. L. Hoffman disclosed at Western Electronics Show and Convention in San Francisco this week. Inventor of flat tube, Willys' Wm. Ross Aiken, said it would be ready for home TV use "tomorrow, engineering-wise," foresaw no production difficulties.

Transistors: (1) Bell Labs announces experimental "junction tetrode" transistor which can operate over 1000 mc, highest frequency yet. It has sufficient bandwidth to carry TV or numerous telephone conversations. (2) GE cuts prices on 8 types, reductions running 15-50%. (3) Transistor radio has been produced by a Japanese firm, Tokyo Tsushin Kogyo KK.

Magnavox expects \$75,000,000 volume by end of current fiscal year in June, 1956, reports pres. Frank M. Freimann. For fiscal year ended last June 30, it was about \$55,000,000, with net profit after taxes reaching new high of \$2,400,000, or \$3 per share on 800,000 shares outstanding before recent 5% stock dividend. This compares with \$63,000,000 sales and \$2,000,000 profit (\$2.77) for preceding fiscal year. Firm plans to expand into digital computer field, already has govt. contracts for guided missiles, radar, sonar, navigational systems.

Dividends: Sylvania, 50¢ Oct. 1 to stockholders of record Sept. 9; Zenith Radio, 75¢ Sept. 30 to holders Sept. 9; Sprague Electric, 30¢ Sept. 14 to holders Aug. 31; Radio Condenser, 5¢ Sept. 30 to holders Sept. 1; General Precision Equipment, 60¢ Sept. 15 to holders Sept. 7; Sperry-Rand, 16¢ Sept. 30 to holders Sept. 8; Hoffman Electronics, 25¢ Sept. 30 to holders Sept. 15; Wells-Gardner, 15¢ Sept. 15 to holders Sept. 2; Admiral, 25¢ Sept. 30 to holders Sept. 11.

Hazeltine Corp. net sales dropped to \$10,225,000 in first 6 months of 1955 from \$24,350,000 in same period last year. Net income was \$772,000 (\$1.10 a share) vs. \$1,927,000 (\$2.75).

Plans for merger of Nuclear Electronics Corp., Olympic Radio & Television Inc. and Victoreen Instrument Co. have been terminated "pending further study," according to Olympic statement this week.

Color Trends & Briefs: One of most aggressive distributors in color field is Raymond Rosen & Co., Philadelphia RCA distributor, whose pres. Thomas F. Joyce predicts: "If the industry really gets behind color, it could easily sell 25,000 sets in our market this fall & winter. We've set a goal for ourselves of 150 a week." Among actions being taken to achieve goal:

(1) Rosen is detailing Edward Burns, "one of its most alert, aggressive promotion specialists," according to Joyce, exclusively to color starting Sept. 1.

(2) Budget of \$45,000 has been set aside for newspapers, TV & radio advertising.

(3) Company executives are making speeches before civic groups. Joyce has already spoken to Norristown Lion's Club, says he knows of 5 or 6 in the audience who now plan to buy sets.

(4) Some 300 dealers are expected to hold open house for big shows, inviting selected customers. Last year, Joyce says, about 200 participated, demonstrating to thousands—"but lack of sufficient programming made it impossible to sustain interest."

(5) Starting Sept. 11, Rosen will co-sponsor, with Upper Darby dealer Mort Farr (who is also NARDA chairman), *Bulletin* columnist Frank Brookhouser's *Man About Town* on WCAU-TV Sun. 11:15-11:30 p.m. It has "a large following in the tavern, night club and restaurant fields." Half of show will be devoted to selling color, half to black-&-white.

(6) Extensive joint promotions with all major dept. stores will be conducted.

Joyce is convinced that situation is no different from that prevailing when industry obtained FCC "yellow light" on color in 1939. At that time he was gen. adv. mgr. of RCA. After 4 months of selling, only 81 sets had been moved in New York, reasons for inactivity being similar to those quoted today—high price, few shows, low discounts, no service, insufficient promotion, fear of price reductions, radio-phono competition, etc. RCA team then moved into Newburgh, N. Y. as test area, went into "a specialty selling campaign," sold 100 sets in 10 weeks. Joyce feels that history will be repeated in color.

* * * *

Reporting that dealers are accelerating interest in color, Joyce relays these comments from several large and small Pa. dealers:

Stanley Frazee, div. mdse. mgr., Gimbel's, Philadelphia: "Just as Gimbel's took the lead in promoting black-&-white TV in the Philadelphia market, Gimbel's is now taking the lead in promoting color. We have set up a sales budget for \$50,000 worth of color sales for this fall and expect to reach it."

J. C. Holtby, Lansdowne, who has sold 9 color sets to date: "We wholeheartedly agree now is the time to aggressively build the foundation for our coming color TV business. The color schedule you showed for this week in today's *Inquirer* was impressive and brought home the fact color is no longer just around the corner."

Charles E. Gerhard, Glenside (2 sets sold): "The American public is always ready for a change if that change is an improvement. Look how color conscious we are in our everyday life. Men with their loud clothing; women with colored kitchens and, to top it all, pink automobiles. Some good old home demonstrations and in-store parties will get color TV off the ground this fall."

Louis Pearlman, Doylestown (5 sets sold): "We feel now is the time to go on color TV. The new color sets are beautiful and easy to tune. Programming is improving, which will enable us to move in and close those color prospects we already have. By gradually building that excitement as we did black-&-white, we will soon have color

TV rolling. We expect to sell 25 color sets between now and Christmas."

Note: Another indication of dealer attitudes toward color: NARDA chairman Mort Farr's informal survey of 47 top dealers attending NARDA's Institute of Management last week at American U (Vol. 11:34) asked: "Do you handle color TV?" 32 replied yes, 4 no. Then, "How many have you sold?" 26 replied none, 10 had sold from one to 7 sets each. Then they were asked: "Should you promote color this fall?" 19 replied no, 14 yes, 3 didn't answer.

* * * *

More big color shows in the works: CBS-TV disclosed that *Ford Jubilee Theatre* will include: Noel Coward's *Blithe Spirit* and *Peace in Our Time*, Coward starring in both; Bing Crosby in *High Tor*; play *The Day Lincoln Was Shot*; *The Big Banjo* (story of American rhythm); *Wonderful World*, a musical; Maeterlinck's *Blue Bird*. *Shower of Stars* will include: Jack Benny in 5 shows; *Nutcracker Suite* with original libretto by Sam & Bella Spewack. CBS is also negotiating for operetta *Porgy & Bess*, now touring South America, to be colorcast in Nov. if agreement is reached. A "jungle spectacular" of *Zoo Parade* is expected of NBC-TV; Marlin Perkins and staff (plus TV columnist John Crosby) have been shooting color film in Africa.

New technique for colorcasting art work will be demonstrated Aug. 31 & Sept. 1 by WTMJ-TV, Milwaukee. Says asst. gen. mgr. Russ Winnie: "One of the problems confronting TV stations throughout the country interested in stimulating the success of color TV has been in the inability of finding the means of transmitting in color art work in its original form . . . As a result of research & development in our engineering dept., a system of transmission of art work in the form of cards or original art has been developed which we think is little short of sensational."

Network color schedules for next 2 weeks: NBC-TV—Aug. 29, last *Matt Dennis Show*, 7:30-7:45 p.m.; Aug. 30, Sept. 1, 6 & 8, *Vaughn Monroe Show*, 7:30-7:45 p.m.; Aug. 29-Sept. 2 & Sept. 5-9, *Home* segments, 11:45-noon; Sept. 11, *The Skin of Our Teeth*, starring Helen Hayes, Mary Martin, George Abbott & Florence Reed, 7:30-9:30 p.m.; Sept. 12-16, beginning of regular *Howdy Doody* colorcasts, 5:30-6 p.m.

Liberty Music Shops, big N. Y. chain, keeping Madison Ave. store open evening of Aug. 22, had audience of 200 on hand to watch NBC-TV color-cast of *The King & Mrs. Candle*, reported interest intense. Bruno-New York, RCA distributor for area, reports some 150 dealers now have color sets on display, says dealers are talking more about color than ever before, adds "we look forward to a pretty good business."

Foto-Video Laboratories Inc., Bloomfield, N.J., reports shipments of color & monochrome equipment to WABD, New York; WCCO-TV, Minneapolis; KTVX, Muskogee, Okla.; KING-TV, Seattle; WSPD-TV, Toledo.

RCA's 22nd technical training program on color & monochrome station equipment, for station engineers, etc., will be conducted in Camden, Sept. 26-30.

Gwilym A. Price elected chairman as well as pres. of Westinghouse at board meeting this week, which promoted v.p. Mark W. Cresap Jr. to exec. v.p., succeeding Latham E. Osborne, now vice chairman. John K. Hodnette promoted from v.p. in charge of apparatus products divisions to v.p.-gen. mgr. in charge of operations of all product groups. A. C. Monteith, engineering-research v.p., succeeds Hodnette, and Dr. John A. Hutcheson, v.p. in charge of research labs, heads all engineering & research.

NORTHEASTERN flood disaster caused millions of dollars damage to TV-radio-appliances of dealers and consumers, destroying or wrecking equipment which will take millions to replace or repair. Difficulty of communicating with badly-hit areas made it difficult to assess total damage as we went to press. All segments of industry joined to extend helping hand.

Philco set up service depots in stricken areas to rehabilitate refrigerators and freezers as first priority among householders and to render necessary services to dealers. RCA's New England office said dealers are being assisted by distributors, with most severe cases referred to factory. NARDA promised to borrow test equipment, service technicians and replacement parts from other Eastern dealers to aid its stricken members.

Floods blacked out WATR-TV, Waterbury, and WGTH-TV, Hartford, on Aug. 19. One radio station in Waterbury, with transmitter and studio at river's edge, was swept away, and several other AM stations were blacked out. Stations won high praise from public officials and press for keeping public informed and for their more direct aid to victims. For example, WKNB-TV, New Britain-Hartford, staged 16-hour all-night telethon, raising \$147,064 for destitute victims.

— ■ —

Avowedly out to acquire 5 TV stations (as are quite a few other and even bigger TV-radio interests) and allowable limit of 7 radio stations, new syndicate called Continental Telecasting Corp., headed by Arthur B. Hogan, pres. of Albert Zugsmith Corp., Los Angeles promoter, movie producer & station-newspaper broker, this week announced its first acquisition was radio KRKD, Los Angeles (5-kw D, 1-kw N, 1150 kc) at price reported around \$500,000. At week's end, however, application for transfer had not yet been filed with FCC. In another radio station deal this week, Bartell Broadcasters, who control WMTV, Madison (Ch. 33) and own radios WOKY, Milwaukee & WAPL, Appleton, bought WBGE, Atlanta (250 watts, 1340 kc) for \$100,000, paying \$15,000 down and remainder over 5-year period at 6%.

Two applications this week: Ch. 7, Redding, Cal., by Shasta Telecasters, headed by Redding mayor George C. Fleharty, publisher of *Anderson Valley News*; Ch. 8, Presque Isle, Me., by Elson TV Co., partnership of Thomas B. Friedman and wife. Friedman is consulting engineer and mgr. of broadcast systems engineering for Adler Communications Labs. Channel is now occupied by Air Force station at Loring Air Base, Limestone, Me., and FCC has told military it must give up channel when commercial station starts in area. Friedman plans to build 420-watt station for \$53,570, operate it for \$72,000 first year.

TV blackout of home night games next season is being considered by N. Y. Yankees and Giants as means of halting slumping attendance—despite survey by research-public relations firm Stephen Fitzgerald & Co. showing that fans are staying away from ball parks primarily because of difficulty in getting to stadium, parking troubles, high prices and poor service on tickets (Vol. 11:34). Both teams air full schedules on WPIX.

To test site for proposed 2003-ft. tower (Vol. 11:8), WHAS-TV, Louisville (Ch. 11) has asked FCC for permission to send aloft balloon with 2-watt battery-operated oscillator operating at top of Ch. 10. Because of air hazard, tests would be conducted by chief engineer Orrin Towner during day, so Ch. 11 can't be used while WHAS-TV is operating. Site is near Mt. Washington, Ky.

Add high towers: Sarkes Tarzian's WTTV, Bloomington, Ind. (Ch. 4) has filed application to build 1649-ft. structure near Trafalgar, Ind., some 20 mi. south of Indianapolis. Present site is at Cloverdale, Ind.

NBC profits are never disclosed separately in RCA financial reports, nor does CBS tell how much of its revenues and profits comes from broadcasting operations. But, intensity of competition between them being what it is, someone at RCA "leaked" these figures to *Variety* this week: NBC profits before taxes in first 6 months of this year exceeded \$14,300,000, will run better than \$6,400,000 after taxes. That's out of net profit of \$22,061,000 for all RCA operations (Vol. 11:31). Accordingly, *Variety* makes comparisons with CBS Inc.'s consolidated net \$14,248,000 before taxes, \$6,328,000 after taxes in same period (Vol. 11:33), observing that NBC alone is earning slightly more than CBS's total operations (including set & tube manufacture) despite fact that CBS TV-radio network billings have consistently led NBC's for last few years. NBC says it's losing some \$2,000,000 this year on radio networking, whereas CBS has claimed it's still making money on radio. Key to anomaly undoubtedly lies in TV profits, which neither is disclosing, and to CBS's difficulties in making its set & tube businesses pay.

Illegal booster operators in Northwest have another champion—Sen. Wayne Morse (Ind.-Ore.), who this week urged FCC to establish new rules to legalize boosters. Previously, Sens. Magnuson (D-Wash.) & Jackson (D-Wash.) made similar requests. Noting booster operations in Oakridge, Princeville & Sheridan, Ore., Sen. Morse stated: "Present rules of the FCC are a stumbling block to the type of inexpensive short-distance booster station needed in many small communities. A set of rules should be written promptly so that small communities can have the service that large communities already have. It is the responsibility of the Commission to make TV service available to everyone, and citizens of small communities should not be penalized."

NARTB's 8 regional conferences will each be addressed by an FCC commissioner, in this schedule: Comr. Lee, Region 4, Sept. 20 at Chicago's Edgewater Beach Hotel; Comr. Bartley, Regions 1 & 7, Sept. 23 at Saranac Inn, N. Y. and Nov. 2 at Broadmoor Hotel, Colorado Springs; Comr. Mack, Region 3, Sept. 29, St. Charles Hotel, New Orleans; Chairman McConnaughey, Region 2, Oct. 13, Hotel Roanoke, Roanoke, Va.; Comr. Webster, Region 8, Oct. 25, St. Francis Hotel, San Francisco; Comr. Hyde, Region 5, Nov. 8, Ft. Des Moines Hotel, Des Moines; Comr. Doerfer, Region 6, Nov. 16, Baker Hotel, Dallas.

First microwave of proposed series to feed community systems in Wyoming (Vol. 11:22) was sought in application filed this week by Pioneer Transmission Corp., Worland, Wyo. (H. B. Van Buskirk & J. R. McKibbin). It seeks to install Raytheon KTR-100E equipment on Boysen Peak, at cost of \$13,165, to relay programs of KOOK-TV, Billings, Mont. to Riverton, Wyo. Aim is eventually to serve additional towns of Worland, Lander, Thermopolis, Rock Springs, Rawlins & Green River.

New York U will use closed circuit-TV to extend lecture-demonstrations in English composition & literature to multiple classrooms, GPL installation being made possible by \$52,359 grant from Fund for the Advancement of Education. Previously, Stephens College, Columbia, Mo., announced similar project.

NBC-TV joined Television Bureau of Advertising this week, bringing membership to 162, annual budget up to \$500,000; Charles R. Denny, v.p. for owned-&-managed stations, goes on board. CBS-TV joined previously, and efforts are being exerted to bring in ABC-TV.

Power increases: WAKR-TV, Akron (Ch. 49), from 18.2 to 213 kw, due latter Sept.; KCOP, Los Angeles (Ch. 13), from 31.4 to 170 kw, due Sept. 12; WSJS-TV, Winston-Salem (Ch. 12), from 40 to 316 kw, due early Sept.

PUBLISHED WEEKLY BY RADIO NEWS BUREAU • WYATT BLDG. • WASHINGTON 5, D.C. • TELEPHONE STERLING 3-1755 • VOL. 11: No. 36

SUMMARY - INDEX OF THE WEEK'S NEWS — September 3, 1955

5 NEW STATIONS start, dozen more due in Sept. Wichita, Mobile, Thomasville, Ga. starters, Chicago & Detroit educational, bring total to 447 (pp. 1 & 8).

PROGRAM TRENDS of new season include more one-shots & irregular programs, more multiple sponsorships, more movie tieups—and emphasis on color (p. 1).

BRITISH TV IMAGES superior for reason they engineer programs more intensively with more men; program plans for Sept. 22 commercial debut (pp. 2 & 7).

CHANGE IN ALLOCATIONS again urged by FCC Comrs. Hyde & Lee, in speeches this week—but they differ on how far they'd go with vhf drop-ins (p. 3).

FIERCE COMPETITION, stemming from station growth, sparks many complaints, protests and appeals before Commission and Court of Appeals (p. 5).

PRIME TV SALES MARKETS once again are big pre-freeze metropolitan centers, buying replacements & second sets. Another blow dealt fair trade (p. 10).

NARTB PLANS GRASS-ROOTS campaign among local bar groups to fortify TV's right to cover trials & hearings; ABA demonstration success (p. 5).

NATIONAL AWARENESS of TV at unprecedented peak, emphasized by major articles in U. S. News & World Report, Saturday Evening Post, Newsweek (p. 6).

SELZNICK TO RKO as executive producer, handling TV as well as theatrical projects; several bid for backlog. TPA-Screen Gems deny merger reports (p. 7).

SUBSCRIPTION TV no urgent matter at FCC as Sept. 9 deadline for comments nears; Collier's article notes proponents' plans for foreign countries (p. 14).

5 NEW STARTERS, OTHER SEPT. PROSPECTS: Five more new stations are on the air, including 2 educational -- and it looks like a dozen or so others may begin this month to make it the biggest of year for new starters. The 5 latest, which bring count of on-air stations to 447 (108 of them uhf): KARD-TV, Wichita, Kan. (Ch. 3); WKRG-TV, Mobile, Ala. (Ch. 5); WCTV, Thomasville, Ga. (Ch. 6); WTTW, Chicago (Ch. 11, educational); WTVS, Detroit (Ch. 56, educational). [For further details, see p. 8.]

Scheduled for Sept. debuts also, though there's always the possibility of unforeseen delays, are KBMB-TV, Bismarck, N.D. (Ch. 12); KDLO-TV, Florence, S.D. (Ch. 3); WHTN-TV, Huntington, W.Va. (Ch. 13); KTVO, Kirksville, Mo. (Ch. 3); WORA-TV, Mayaguez, Puerto Rico (Ch. 5); WDBJ-TV, Roanoke, Va. (Ch. 7); KCRA-TV, Sacramento, Cal. (Ch. 3); KTBS-TV, Shreveport, La. (Ch. 3); KMVI-TV, Wailuku, Hawaii (Ch. 12); WITN, Washington, N.C. (Ch. 7). Canada also has one Sept. candidate -- CKVR-TV, Barrie, Ont. (Ch. 3).

Most imminent of these are Sacramento and Shreveport outlets. Also previously reporting Sept. starts, but highly uncertain now: WCBI-TV, Columbus, Miss. (Ch. 4); WESH-TV, Daytona Beach, Fla. (Ch. 2); KRBB, El Dorado, Ark. (Ch. 10).

NEW SEASON—'GOLDEN ERA' OF TELECASTING: Fall-winter TV season that gets under way immediately after Labor Day looks like a whing-ding from viewers' standpoint -- and it also means good business for all the TV trades.

Besides the hardy perennials, world series and football, the networks have so much top-grade program material on their agendas, new and old, that it may well be that a golden age of home entertainment really is upon us, albeit the industry is a scant 10 years old. One thing is certain:

Network TV is unshackling itself from certain traditions and rigidities that were handed down from radio -- is creating its own entertainment art forms. And the brilliant lineup of stars lends force to CBS's recent statement that "there is no great pool of talent which TV does not reach." Some 35 brand new regular shows are scheduled on the 3 surviving networks this fall. These seem to be the basic trends:

(1) More one-shots and irregularly scheduled programs, less demand on top-rated performers for weekly stints. For example, Ed Murrow's See It Now will go on

for 60 or 90 minutes only 8 or 9 times this season, instead of weekly; Jack Benny will be seen but once monthly (forsaking radio entirely); Orson Welles will be an irregular, also on CBS-TV.

These are simply scattered examples. NBC-TV is canceling one regular commercial period a month for an hour-length public affairs show based on recent history; it also plans several irregular "telementaries," starting with "1776" Oct. 9, Sun. 4:30-5:30 p.m. They're examples of departure from "formula," adding force to recent closed-circuit remarks of CBS-TV program v.p. Hubbell Robinson Jr.:

"Formula is nothing. Execution is everything. You mark down in the book that any producing organization that goes to the same well too often is going to find it dried up." Every show on the air, he went on, will be there "because of its own creative merit and capability to entertain, to inform or to educate."

* * * *

(2) More multiple-sponsor shows. High cost of TV time, talent & production make trend to more participating and alternate-week sponsorships inevitable. Having achieved great success with Today, Home and Tonight, NBC-TV reports it's virtually sold out on its Sun. 7:30-9 p.m. Color Spread (at \$71,000 per 1-min. commercial). Single-sponsor shows will drop to about 60 from 80 last season.

Yet it all will add up to very Big Business. If any further proof of magnitude of the network effort is needed, fact that their first 6-mo. billings (PIB, Vol. 11:32) leaped to nearly \$200,000,000 from \$150,000,000 in same period last year can be cited. It's anticipated second half may go much higher -- maybe by as much as 50%, to make year's total a fantastic half billion dollars -- or more than all radio (with 4 networks and 3300-odd AM-FM stations) aggregated in any one of its 35 years.

(3) More movie tieups: Up-&-coming ABC-TV began this trend with its big hit Disneyland, will also have Disney's new Mickey Mouse Club, MGM Parade, Warner Bros. Presents. CBS-TV has the 20th Century-Fox Hour. NBC-TV hasn't joined in yet. All of these programs have other sponsors footing time and talent bills while Hollywood builds the shows and rides one of the sweetest publicity gravy trains of all time. Whether trend is for TV's betterment or for worse, time alone will tell.

* * * *

(4) Emphasis on color shows. Most of the NBC & CBS "spectaculars" will be in color -- not only to stimulate color set sales but to add promotional zing. NBC has three once-a-month 90-min. spectaculars on tap: Color Spread, Max Liebman Presents, Producers' Showcase. In color also will be once monthly Maurice Evans Hall of Fame, portions of bi-weekly Wide Wide World, and unprecedented daily live 3-4 p.m. series titled Matinee Theatre which will become dealers' prime showcase for color sets.

CBS is gradually revealing big scope of its "blockbusters" -- disclosing that Ford Jubilee Theatre will include Noel Coward's Blithe Spirit and Peace in Our Time, Coward starring in both; Bing Crosby in High Tor; stories like The Day Lincoln Was Shot, Maeterlinck's Blue Bird, The Big Banjo (story of American Rhythm). Its Shower of Stars will include Jack Benny in 5 shows and an original libretto to Nutcracker Suite written by Sam & Bella Spewack. Most of Omnibus will be in color, as will six 90-min. films produced by Orson Welles. A daytime color series is also planned.

AMERICANS FIND BRITISH TV IMAGE BETTER: Why are the British Broadcasting Corp.'s TV signals so apparently superior to most of ours? It can't be merely that there's lots of power behind them, the govt.-owned BBC monopoly being unworried about co-channel or adjacent channel interference. Certainly, fact that British TV is on a 405-line standard as against our 525-line should argue just the opposite. British receivers, craftsmen though the Britons are, can't be that much better.

When we undertook our personal inspection of British TV last autumn -- a visit that has since been followed by a veritable "invasion" of American telecasting executives, technicians, admen, even editors -- we remarked on the fine workmanship of British TV sets and on the vastly superior picture we consistently got on a 14-in. set in our hotel room in the Mayfair district of London (Vol. 10:45).

Nobody disputed those observations; in fact, many who followed confirmed them and the promotion-minded TV trade over there made a lot of to-do about them. There

were all manner of explanations -- but this week, from one of the top American TV research & engineering executives, connected with one of the great laboratories and unconnected with any of the U.S. networks, gave the answer that makes most sense:

"The BBC," said this technician, who has just returned from a periodic visit to England, "has 4 times as many engineers per program as we have at our networks and stations. They keep their equipment up to snuff more intensively than we do, and their personnel is top-grade. They have the manpower and time to keep their equipment in tip-top shape all the time. It's as simple as that." The British technicians, he said, are among the best in the world.

Commercial as well as technical success for British TV was foreseen by this observer. He was also of the opinion, expressed in our stories, that commercial TV will go over big despite political and clerical opposition. And for some reasons:

Britons dislike monopoly no less than we do. They're accustomed to film and slide commercials in their theatres on a scale and with blatancy far surpassing anything of the kind done here. They respond to radio commercials from the Continent, notably from popular Radio Luxembourg. And British industrialists and admen, among the smartest merchandisers in the world, know that commercial TV will be a powerful force for creating wants and moving goods.

How much the new TV system will profit by the American example, good and bad, how many programs and what kind they will import and copy from America, remains to be seen when it gets under way Sept. 22. (For report on commercial plans, see p. 7.)

COMRS. HYDE & LEE PUSH ALLOCATIONS CHANGE: Revisions of TV allocations being urged by FCC Comrs. Hyde & Lee (Vol. 11:35) were elaborated on by both in speeches this week -- Hyde at Washington Lions Club, Lee at W.Va. Broadcasters Assn. meeting in White Sulphur Springs, W.Va. As indicated last week, both favor changes in standards to permit drop-ins of more vhf stations -- but they differ greatly in degree.

Here's how Hyde put it: "I would suggest the judicious application of less rigid separation standards than those of the Sixth Report, more emphasis on market areas and the use of such engineering techniques as directional antennas where such would contribute to the objective of the overall re-examination. The ultimate purpose of course would be to encourage the larger and more effective use of available TV channels. The ultimate full development of TV in this country should not be hamstrung by having been limited to 12 channels in its pioneer stages."

Hyde frowns on "indiscriminate" drop-ins, however. He said: "The squeeze-in or shoe-horn technique, if experience in other fields is to be relied upon, can be expected to cause interference in outlying areas, the cumulative effect being to provide additional services in population centers at the expense of outlying areas where it is most needed. Any such move would, of course, inevitably undermine present incentive to development of ultra-high channels."

Amplifying on his speech later, Hyde told us: "Drop-ins all over the map, with no overall objective, would take us back to before the freeze. We need deintermixture both ways -- to preserve competition in uhf markets, add competition to vhf markets. You can't get a reasonable amount of deintermixture without some flexibility in allocations. We need more stations rather than reduced coverage."

Lee expounded on his thesis that best solution is to get more vhf channels from the military, but that partial answer is to fit more stations into present 12 channels -- through reduced powers & mileages and directional antennas. He doesn't feel that deintermixture is answer to uhf problems; he'd let uhf operators get vhf. Among portions of govt.-used spectrum Lee has in mind is 132-152 mc, and he feels that military equipment in this band could work just as well in uhf.

Interference which might be created by vhf drop-ins has been worrying FCC staff. One argument against them, they say, is that they'd bollux up the offset carrier situation, a major factor in reducing interference. On the other hand, some consulting engineers claim new offset carrier plan can be devised.

FCC staff is cautious about drop-ins, generally. One member states: "If the Commission concludes that uhf should be forgotten and that we should try to make the most of only 12 vhf channels, it's my belief that we should reexamine the whole

allocation plan, to make it most efficient. The technique of just dropping in low-power vhf stations here and there is only a minor help."

A former FCC staff member, influential in setting up present plan, says: "During the freeze, I told the Commission that the plan would serve only 2-3 years, enough to set the pattern, after which it could be dropped. Well, that's what it has done -- and it looks as if the time is ripe for a change."

Personal Notes: Sydney Rubin, ex-mgr. of NBC licensing div., appointed CBS-TV director of licensing, handling all subsidiary program rights to live & film shows . . . Frank Stanton, CBS pres., returns from short European trip immediately after Labor Day . . . William Grant, attorney, businessman & 5.5% owner of KOA-TV & KOA, Denver, as well as pres. of the licensee corporation in which actor Bob Hope owns 39%, has succeeded Don Searle as gen. mgr. . . . Sylvia Kessler, ex-chief of FCC Office of Opinions & Review, recently with Cohn & Marks, has opened own law offices in Tower Bldg., Washington (District 7-2805) . . . John S. Auld promoted to mgr. of technical operations for DuMont's Electronicam system . . . Charles Singer resigns as MBS chief engineer; John H. Burnett, producer-director of Harry Wismer's TV-radio *General Sports Time*, named sports director, replacing Paul Jonas, resigned . . . Ross Donaldson promoted to mgr. of NBC-TV writing services, buying and developing scripts . . . Barton L. Griffith, TV-radio instructor at U of Michigan, named director of distribution activities, Educational TV & Radio Center, Ann Arbor; Wm. A. Harper, ex-Wittenberg College publicity director, named director of information services . . . Frank Barron promoted to local sales mgr., John Garfield to national sales exec., WXEL-TV, Cleveland . . . Bill Adler, DuMont press & promotion director, promoted to program director . . . Wynn Nathan, MCA-TV sales v.p., announces appointment of these new v.p.'s: Tom McManus, eastern sales mgr., N. Y.; Ray Wild, southwest sales mgr., Dallas; Henry Long, western sales mgr., Beverly Hills, newly named to mideastern sales mgr. at Cleveland under v.p. D'Arv G. Barton and succeeded by v.p. Robert Greenberg . . . Herb Jaffe elevated to exec. v.p., Herman Rust to sales v.p., Official Films Inc. . . . Edward F. Ryan, from parent *Washington Post & Times Herald*, named director of news & public affairs, WTOP-TV & WTOP, Washington . . . Freeman Mann promoted to chief engineer, Dresser-Ideco Co. (towers) . . . Hugh O. Kerwin, ex-KTVI, St. Louis, named TV mgr. of Petry's St. Louis office, succeeding George Stevens, shifted to Chicago office . . . Josephine Maggio, ex-traffic mgr. CBS-TV Spot Sales, joins Petry as head of special services traffic div. . . . Jack Thompson promoted to asst. eastern sales mgr., Free & Peters . . . Albert B. Shephard, ex-Empire Coil Co., recently Forjoe-TV sales mgr., and Richard C. Landsman, ex-Harrington, Righter & Parsons, join Katz . . . Edward Cahn, ex-Avery-Knodel, onetime exec. v.p. of George H. Hartman Co., Chicago agency, heads new Pulse Inc. branch office at 6399 Wilshire Blvd., Los Angeles . . . Guy S. Warren Jr. promoted to exec. v.p., D. P. Brother & Co., Detroit, succeeding Clarence Hatch, now Kudner senior v.p. . . . Norman Heyne resigns as Ruthrauff & Ryan TV-radio production v.p. to become partner in new Wesley, Heyne & Cuca Adv. . . . Robert P. Mountain, Young & Rubicam v.p., takes over as director of TV-radio dept., replacing Dan Seymour, now J. Walter Thompson; Nat Wolff, as v.p. & director of program development, to concentrate on creating new program ideas; David Bradshaw continues as operations mgr. of TV-radio dept. . . . George Haight promoted to west coast TV-radio programming director, McCann-Erickson; Mary Harris promoted to mgr. of TV-radio production, N. Y. . . . Richard W. Bowman, TV copy supervisor, elected v.p., Norman, Craig & Kummel Inc.

Associated Press Radio & Television Assn., by mail ballot announced Sept. 2, added these 9 members to its board, whose next meeting is scheduled for Sept. 19: Albert Larsen Jr., WALL, Middletown, N. Y.; Ted Jaffe, WAAM, Baltimore; Jack Knell, WBTV & WBT, Charlotte; Duane Hatch, WSAV, Savannah; Lester Lindow, WFDF, Flint; John A. Engelbrecht, WIKY, Evansville; H. J. Chandler, KFLW, Klamath Falls, Ore.; James H. Connolly, KGO-TV & KGO, San Francisco; Pat Cullen, KHQ-TV & KHQ, Spokane. Seven holdovers, comprising original association, are Daniel W. Kops, WAVZ, New Haven; Tom Eaton, WTIC, Hartford; Joe H. Bryant, KCBD-TV & KCBD, Lubbock, Tex.; Matthew Bonebrake, KOCY, Oklahoma City; Jack Krueger, WTMJ-TV & WTMJ, Milwaukee; Jack Shelley, WHO-TV & WHO, Des Moines; Les Mawhinney, KHJ-TV & KHJ, Los Angeles (president pro tem).

Robert W. Sarnoff, NBC exec. v.p., named chairman of Advertising Federation of America's committee for National Advertising Week, Feb. 19-25, with Foote, Cone & Belding (Roger Pryor, TV-radio v.p.) serving as task force agency. Committee of 23 top-level admen from all media, as named by Ben R. Donaldson, Ford director of institutional advertising and chairman of AFA, includes from TV-radio: Ted Cott, DuMont; Robert E. Kintner, ABC; Kevin B. Sweeney, Radio Advertising Bureau; J. L. Van Volkenburg, CBS.

FCC Comr. E. M. Webster is in Gothenburg, Sweden, heading group of U. S. observers at Baltic & North Sea Radiotelephone Conference on maritime safety. Others in delegation to 3-week sessions: C. M. Jansky Jr., Jansky & Bailey; John Cross, State Dept.; Austin Bailey, AT&T; Capt. G. C. Graves, Coast Guard.

Paul A. O'Bryan, a senior partner of Dow, Lohnes & Albertson, elected chancellor of Delta Theta Phi law fraternity, highest ranking post, at Washington convention this week. Alfred C. Cordon Jr., with same firm, chosen associate justice of the fraternity's supreme court.

Oliver M. Presbrey, of the agency family, with his wife Martha Rountree, who used to be co-owner and moderator of *Meet the Press*, have applied for 5-kw daytime radio station on 1420 kc in Warrenton, Va., where they now make their home.

Charles F. Nelson promoted to AT&T long lines dept. asst. v.p. in charge of revenue requirements & regulatory matters.

Commercial Film Producers Assn. has been formed in Hollywood with Ray Patin, of Ray Patin Productions, 6650 Sunset Blvd., as pres.

Graphic Consultants, 40 E. 51st St., N. Y. has been formed by Phil Hirsch, ex-mgr., NBC graphics dept.

William G. Butts, 64, FCC examiner, died Aug. 28. Native of Dearborn, Mo., he joined Interstate Commerce Commission in 1929, moved to FCC in 1934, became an examiner in 1952. He had 11 radio and common carrier cases, no TV, pending in various stages of hearing at time of death.

E. Lansing Ray, editor & publisher, *St. Louis Globe-Democrat*, which he sold to Newhouse last March and which owns 23% of KWK-TV & KWK, died suddenly at Rye Beach, N. H., on his 71st birthday, Aug. 30.

TIGHTER COMPETITION, as number of stations increases, was much in evidence this week—in FCC actions and in complaints filed with Commission. They covered great variety of situations:

(1) Responding to complaints following recent decision lifting Zone I vhf stations' ceiling to 1250 ft. (Vol. 11:35), Commission postponed effective date of decision from Aug. 31 to Oct. 1.

(2) Commission turned down request that it issue cease-&-desist order to stop KTVX, Muskogee, Okla. (Ch. 8) from identifying itself as Tulsa station. Complaint was by KVOO-TV (Ch. 2) & KOTV (Ch. 6), Tulsa. Commission said that it "is not inclined to inject itself into commercial situations involving competing broadcast interests," but it noted that KTVX conceded failure to use Muskogee station identification and that it had exaggerated coverage claims in ads. This pattern of operation, Commission said, "has given it pause" in considering case. However, Commission concluded that it would put station on best behavior, "imposing a condition that its future operations will be further reviewed."

(3) WESH-TV, Daytona Beach, Fla. (Ch. 2) was advised, via McFarland Letter, that hearing appears necessary on its application to change site to spot 22 mi. from city toward Orlando and to increase power from 1.26 to 100 kw. Commission also received opposition from upcoming WHTN-TV, Huntington, W. Va. (Ch. 13) to application of WCHS-TV, Charleston (Ch. 8) to move closer to Huntington, increase height to 1218 ft.

(4) Broadcast Bureau recommended hearing on WWSW-WJAS grant of Ch. 11, Pittsburgh, unless stations remove "infirmities" of merger agreement "which run athwart Commission policy and may involve a violation of Section 310(b) of the Communications Act." Objections to grant were raised by WENS (Ch. 16).

(5) Miami-Ft. Lauderdale's WGBS-TV (Ch. 23) and WITV (Ch. 17) asked Court of Appeals to enjoin FCC from finalizing Miami Ch. 7 & 10 decisions before acting on their deintermixture petitions. WFDF, Flint and Butterfield Theatres filed briefs supporting their appeals against grant of WJRT, Flint (Ch. 12).

(6) WNHC-TV, New Haven, Conn. (Ch. 8) requested hearing on sale of WGTH, Hartford (Ch. 18) to CBS; WHUM-TV, Reading, Pa. (Ch. 61) sought hearing to explore sale of WLBR-TV, Lebanon (Ch. 15) to WFIL-TV, Philadelphia; WIRK-TV, W. Palm Beach, Fla. (Ch. 21) protested sale of WEAT-TV (Ch. 12) to General Tele-radio.

* * * *

Rule-making on several allocations was begun: (1) Shift of WKST-TV's Ch. 45 from New Castle, Pa. to Youngstown. (2) Move of Ch. 6 from Indianola to Clarksdale, Miss. (3) Shift of Ch. 13 from Calumet, Mich. to Marquette, replacing it with Ch. 5. (4) Move of Ch. 10 from Roswell to Artesia, N. M., requested by KSVP which plans 100-watt station.

Eugene P. O'Fallon, former owner of KFEL-TV, Denver (Ch. 2), filed opposition to shift of Ch. 3 from Pueblo to Alamosa, Colo., stating he plans to apply in Pueblo. Uhf grantee WOBS-TV, Jacksonville, Fla. (Ch. 30) amended its deintermixture proposal to request addition of Ch. 8 to Brunswick, Ga.

One CP was dropped, WBCK-TV, Battle Creek, Mich. (Ch. 58), and one was revoked—WSHA, Sharon, Pa. (Ch. 39). Latter was first TV revocation. Grantee Leonard J. Shafitz had been charged with misrepresenting finances, failed to show up for hearing or communicate with Commission.

NARTB PLANS grass-roots campaign among state bar associations as next step to convince legal groups that TV can unobtrusively cover public courtroom trials and legislative sessions. Its freedom of information committee is setting up arrangements for live coverage of state bar meetings, similar to handling of American Bar Assn. convention last week by the 3 Philadelphia stations, which Judge Justin Miller, ex-NARTB pres., now its consultant, called "highly successful."

Possible guidance for local coverage came from P. A. (Bud) Sugg, exec. v.p. & mgr. of Oklahoma City's WKY-TV. Reporting to NARTB pres. Harold Fellows on his station's demonstration of TV cameras at district judge's meeting July 14 at Grand Lake, Okla., Sugg stated some jurists feared TV stations would not cover trials in full, or would edit films to give biased version. They also felt news media only wanted to cover "sensational" trials.

"Our answer [to the first objection] was that neither the spectators nor the reporters were required to sit through the entire trial, nor is the newspaper required to print each word of testimony," wrote Sugg. As to the "sensational" aspect, he said news cameras at any trial "would provide the public a picture of a dignified judge, presiding over an orderly meeting, and not a mob of citizens crying for vengeance as might be portrayed by some Hollywood movies, or even the newspapers." He said a number of judges were so impressed they invited WKY-TV to cover their courts.

Freedom of information committee chairman Robert D. Swezey, WDSU-TV, New Orleans, said volume of favorable reports and comments about ABA meeting in Philadelphia "indicates the ability of TV and radio to cover public sessions without jeopardizing the dignity and decorum of such proceedings." He said Philadelphia example "illustrates the tremendous advances that have been made in the art of radio and TV news coverage."

Distinct fear of censorship over TV and other mass communications media is reaction of newspaper editorial opinion to Kefauver subcommittee's report on juvenile delinquency (Vol. 11:35). Most agree that the cure (censorship) for excessive violence and crime on TV would be worse than the "disease." Objecting to any form of censorship, *Washington Post* endorses idea of presidential study commission, commenting: "We know far less than we need to know about a matter that cannot fail vitally to influence the whole shape of the American future." *Washington News* rejects all recommendations, calling each a kind of censorship which would create a "three-headed bureaucracy to impose, directly and indirectly, a censorship—not only on TV but on all 'mass media,' meaning radio, magazines, newspapers and whatever." *St. Louis Post-Dispatch* says proposals skirt censorship and, praising high quality of some children's TV shows, asks: "Are other good children's shows . . . too much of a strain on producers? Is the crime show just the result of laziness?" Meanwhile, NARTB code review board, under chairman G. Richard Shafto, WIS-TV, Columbia, S. C., meets in Washington Sept. 8-9, will review Senate report. Each NARTB regional conference will include workshop session on "The Challenge of the TV Code," conducted by Edward H. Bronson, director of TV code affairs.

A one-shot estimate of sets-in-use, county-by-county, may be released late this year, projected from information now available. Representatives of networks, NARTB, Advertising Research Foundation & Television Bureau of Advertising conferred in N. Y. Aug. 31, agreed such an estimate might be feasible and agreed on "exploratory investigation" for a few weeks. It would be based on data from Census Bureau, Nielsen, RETMA, other sources.

CONSCIOUSNESS of TV has reached all-time peak, as the medium enters its "golden age" with start of great fall programming schedules (see p. 1). Nowhere is this more evident than in the intense coverage being given TV in the general magazines.

Suffering as much as any medium from TV's assaults on its advertisers and readers, magazines seem to be engaged in a sort of "join 'em if you can't lick 'em" program by catering to public's fascination with TV.

Examples: 15-p. cover story "What TV Is Doing to America" in Sept. 2 *U. S. News & World Report*; major feature on KDUB-TV, Lubbock, Tex. in Sept. 3 *Saturday Evening Post*; cover-story analysis of "The \$64,000 Question" in Sept. 5 *Newsweek*; cover story on General Tire in Aug. 27 *Business Week*, prompted by subsidiary General Teleradio's recent \$25,000,000 purchase of RKO (Vol. 11:35).

We've read all of them and, a vital part of our job being to cull and digest for busy executives, who are our readers, here's a summary of what they say:

* * * *

"The greatest new force in American life" is what *U. S. News & World Report* calls TV, but it concludes that it will be at least a generation before anyone knows just what its sociological effect has been—good or bad. Trying to get at TV's impact statistically, magazine comes up with these findings:

(1) Viewing time is rising—average set being turned on 4 hours & 50 min. daily, up 4% from 1954. Viewing hits peak just after set purchase, falls off temporarily, then builds up toward new peak, height yet unknown.

(2) Before buying TV, average person spent 2 hours & 58 min. daily with radio, newspapers and magazines, one hour & 34 min. after buying.

(3) Women watch more than men do, both viewing more than do children. Those low in income, education or job status spend more time with TV than those at higher levels.

(4) Among families with no children, 54% own sets; those with one or 2 children, 79%; with 3 or more, 83%.

Opinions are sharply divided as to sociological impact. One group feels children are losing ability to read and play physically. Some think there's definite connec-

tion between TV and juvenile delinquency, or at least the "calculated risk" seen by Senate committee in report last week (Vol. 11:35). Many parents think most programs are "grossly inappropriate for children" while others say "exposure to a reasonable amount of TV does increase vocabulary, word recognition and general knowledge."

* * * *

Small-town TV is paying off for KDUB-TV, Lubbock, Tex. because of showmanship and an uncanny knack of catering to "off-beat" neighborhood needs and tastes, according to article in *Saturday Evening Post*, by Joe Alex Morris. Much credit is given to station's colorful pres. Wesley De Wilde (Dub) Rogers Jr., who started show business as a top-notch clarinet player. First post-freeze station in medium-sized market, starting in Nov. 1952, "Kay-Dub," as it's known locally, immediately began operating like a country newspaper—featuring everything from hill-billy bands to town symphony.

KDUB-TV's rival KCBD-TV is also successful, article reports, stressing a more formal approach (e.g., announcers wear ties), but management of both attribute prosperity to tremendous population growth and natural wealth of area. Coverage area has 400,000 people, per capita income of \$1818 (highest in U. S. for its size), 18,700 farms with annual income of \$316,718,000, world's third largest inland cotton market, 12,000 producing oil wells, etc.

* * * *

Excellent analysis of "The \$64,000 Question" in *Newsweek* examines impact on public, contestants, sponsor & competitors, lists 5 fabulous new quizzes now being offered sponsors, concludes:

"In the light of all this furious and munificent activity, the imaginary quizmaster might well ask his enormous and at least temporarily spellbound audience: 'How long will this current quiz craze last?'"

"Thinking back on the long history of short-lived national fads from mah-jongg, flag-pole sitting, miniature golf, and open galoshes to bank night, the mambo, and raccoon hats, the quizzee would probably greet him with a blank and puzzled look and hesitantly give the only possible answer: 'We don't know.'"

Note: Sept. 16 *Collier's* is out with article on subscription TV titled "Will You Pay for TV?" by Bill Davidson (see p. 14); *Saturday Evening Post* article on same subject, by Milton Lehman, due shortly.

Crusading isn't forte of NBC or its stations—but WRC-TV, Washington, has launched a public service campaign that has community and its newspapers buzzing. It's film series titled *Our Beautiful Potomac—Progress Report*, carried in prime time, showing how waste and filth are polluting one of the country's liveliest and most precious rivers and rendering it a menace to health to the shame of the nation's capital. "Putrid Potomac," the narrator and planner Stuart Finley boldly calls it, with visual proof. "We're going to stay with this until something is done about it," says v.p.-gen. mgr. Carleton Smith, who started the whole thing.

FCC turned down protest by Ted Granik and Wm. Cook, major stockholders in WJNO-TV, Palm Beach, against recent approval of \$40,000 sale of radio WMFJ, Daytona Beach, by W. Wright Esch to Harold Kaye & Emil J. Arnold (Vol. 11:25, 27). Granik and Cook seek to block sale in Florida courts on grounds that Esch broke contract to sell them station and CP for WESH-TV, Daytona Beach. FCC said it's up to courts to determine whether Esch violated any agreement and that Granik and Cook were not "parties in interest." WESH-TV has announced plans to get on air in Sept., though FCC is questioning proposed site move.

Control of KALB-TV, Alexandria, La. (Ch. 5) & KALB goes from W. H. Allen to T. B. Lanford, FCC approving deal whereby Lanford pays \$150,000 for Allen's 52% to bring holdings to 97.2% (Vol. 11:32). Lanford also owns 1/2 of KPLC-TV & KPLC, Lake Charles, La.; 13.8% of WJTV, Jackson, Miss.; has interest in 3 other southern radio stations. Also approved was transaction whereby Seaton Publishing Co. (Fred A. Seaton, asst. to President Eisenhower) transfers CP for KHAS-TV, Hastings, Neb. (Ch. 5) to new Nebraska Television Corp., with more than 100 new stockholders. Seaton retains control of new firm, with 56%; only other stockholders with more than 1% are Mission Quirk Grain Corp. and D. H. Mires, each 3.6%.

Denver's KBTB (Joe Herold, mgr.) distributing to timebuyers and friends total of 25,000 shares of Liberty Oil & Uranium Co., prospecting firm.

B. P. (Tim) Timothy, one of founders of Avery-Knodel rep firm, has purchased 75% of KMBY, Monterey, Cal. (250 w, 1240 kc) for \$50,000 from Fred Gwyn; Blackburn-Hamilton handled deal.

TV sets sold within 50-mi. radius of Chicago up to July 31 totaled 1,977,919, up 281,400 in year, reports Chicago Electric Assn.

Telecasting Notes: David O. Selznick becomes executive producer for RKO, his company committed to produce at least one feature a year as well as TV shows, under 3-year agreement made this week with General Teleradio's Tom O'Neil, board chairman of RKO which he recently bought for \$25,000,000 (Vol. 11:29-30). One of Selznick's first chores will be to come up with a TV show, presumably along lines of those of other major movie producers that are making network debuts this season (see p. 1) . . . RKO thus reestablishes itself in movie production, Selznick thus returns to company where he served as production chief, 1931-33. RKO also takes over redistribution of some Selznick productions (*Rebecca, Tom Sawyer, The Third Man, Spellbound, The Paradine Case*)—which presumably sets at rest rumors Selznick is about to release 11 of his features to ABC-TV, although there's no formal agreement on that score . . . Adaptation of TV filming principles to movies is part of RKO "master plan" being discussed by Selznick with RKO exec. v.p. Charles L. Glett, according to *New York Times'* Thomas L. Pryor, who states there's a gentlemen's agreement that Selznick "will assume direct overall operation of the company's theatrical and TV projects" . . . RKO backlog of some 650 films, meanwhile, is reported by *Billboard*, which specializes on TV films, as subject of "spirited bidding"—and it states that price is between \$10-\$14,000,000 plus profit participation plus another \$4,000,000 to clear rights and for selling expenses; MPTV and an unnamed theatrical distributor are said to be chief bidders, latter proposing theatre rereleases ahead of TV . . . "The RKO features," says *Billboard*, "were pitched at the networks but neither CBS-TV nor NBC-TV was interested. ABC-TV has shown some spark, but it doesn't need as many films as the package contained. Whoever gets the features, it is fairly certain that some of them will appear on the networks, certainly in daytime periods and perhaps nighttime" . . . Television Programs of America, which claims to be one of the Big 3 (with Ziv-TV & MCA-TV) of the TV film syndication business, isn't for sale and isn't being sold, according to pres. Milton I. Gordon. "Absolutely nothing to it," says Screen Gems pres. Ralph Cohn; that's their retort to published reports of a merger. Gordon admitted, however, that there have been several approaches by various companies with proposals to consolidate . . . TPA's Mr. Gordon this week announced what he said was "largest transaction of its kind in TV film distribution"—purchase from Chertock Productions Inc. of negatives of 104 episodes of *Private Secretary* starring Ann Sothern. They will be syndicated under new title *Susie*, new Chertock productions under old title continuing for American Tobacco Co. on CBS-TV. Price was stated as \$1,000,000 down plus percentage of gross receipts . . . Locally filmed programs may soon be as important to TV as taped programs in radio, in opinion of rep Joe Weed; he thinks syndicated series and feature-length films, important for national spots, can be enhanced with locally-produced inserts giving "hometown" salesmanship touch . . . Unusual program: WDSU-TV, New Orleans, on its weekly *Sunday Supplement*, telecasts ceremonies of young woman taking vows as nun of the Carmelite Order.

Kiesewetter, Baker, Hagedorn & Smith Inc. goes out of business at end of year, with H. M. Kiesewetter, who founded 25-year-old agency, retiring; S. S. Baker joining Donahue & Co.; H. B. Smith entering another business.

Ad volume of \$15 billion by 1965 is forecast by Foote, Cone & Belding exec. v.p. Elwood Whitney, projecting from *Printers' Ink* 1954 estimate of close to \$8.2 billion (Vol. 11:34).

COMPETITION—it's wonderful, evidenced already by fact that British Broadcasting Corp., longtime TV-radio monopoly, is increasing its service by 15 programs a week as of Sept. 22, debut date for commercial TV. With £1,000,000 (\$2,800,000) added to his budget, BBC program controller Cecil McGivern has announced expansions designed to retain its 12,000,000 audience against the commercial upstart which can claim only about 22% of TV homes (in London area) as yet equipped with dual-band sets capable of receiving the second signal.

BBC promises more sports (Oxford-Cambridge boat races, Wimbledon tennis matches, Ascot races, soccer championships); more light entertainment (including a giveaway show); more drama (in which it excels); more documentaries and children's shows, and even one show a week from the Continent via Eurovision. It has already, as a competitive measure, signed up with UP-Movietone News to compete with extensive news coverage projected by ITA.

When commercial TV begins in London at 7 p.m., Sept. 22, it will be hailed with banquet speeches by the Lord Mayor of London, Sir Seymour Howard; the Postmaster-General, Dr. Charles Hill; the director general of ITA, Sir Kenneth Clark—and there's some talk that Prime Minister Anthony Eden, whose Conservative Party put through ITA against Labor opposition, will participate.

First on "new TV" screens will be panorama of the "face of London"; then the Guildhall ceremonies until 7:45, interspersed with overture conducted by Sir John Barbirolli. Then, at 8 p.m., drama with John Clements, Kay Hammond, Alec Guinness, Pamela Brown, Edith Evans and Sir John Gielgud appearing in 10-min. excerpts from famous plays; 9:10, Terence Murphy-Lew Lazar middleweight championship bout from Shoreditch; 10, news; 10:15, interviews with famous stars, cabaret & fashion show from Mayfair Hotel; 10:50, trailer of shows to come; 11, sign-off.

Schedule for next day starts at 10:45 a.m. with opening installment of *Sixpenny Corner*, Britain's first daily TV serial; then morning magazine show for women. Children's *Tea-V-Time* is from 5-6 p.m. By agreement, both BBC & ITA shut down 6-7 p.m.—it's time for supper and for the youngsters to prepare for bed. From 7-8, there will be news, romantic singer Sheila Matthews, *Sports Club* and *Pets Parade*; 8, *Take Your Pick*, quiz show; 8:30, *Dragnet*; 9, *Confidentially*, family sketches; 9:30, *'Round the World with Orson Welles*; 10, news & newsreels, followed by *Out of Town*, featuring Leslie Perrins as a townsman with an inquiring mind; 10:50, *And So to Bed*.

That gives you an idea. Number of U. S. shows is limited by fiat; *I Love Lucy* & *Dragnet* have been bought and there will be others. Quite a few American entertainers will appear on the live and British-produced film shows. Family shows, cookery, beauty hints, music, news will dominate the daytime. Commercials will be interspersed like our spots, but with the advertiser in no way identified with the program.

"We are not offering people something which they have to accept," said Associated-Rediffusion's program controller Roland Gillett, handling Mon.-thru-Fri. London programs, obviously referring to the lack of choice on BBC. "We are offering them the power to switch. We are offering them something which we hope they will like."

Entire first-night profits will go to charity, advertisers paying double card rates and artists performing free. Capt. T. M. Brownrigg, gen. mgr. of Associated, estimates that not less than £10,000 (\$28,000) will go to charity.

LATEST STARTERS (see p. 1) include one opening up virtually new market—WCTV, Thomasville, Ga. (Ch. 6), located on Fla. border and 64 mi. distant from nearest other station, in Albany, Ga. Test patterns began Sept. 1, and on Sept. 15 it becomes CBS primary non-interconnected, taking some NBC shows, too. It has 35-kw GE transmitter, located halfway between Thomasville & Tallahassee, with 5-bay antenna on 669-ft. tower. Owner is John H. Phipps, who acquired CP from ex-Gov. E. D. Rivers, Jr. and who operates radio stations in Tallahassee & Marianna. Herschel Graves is gen. mgr.; Joe Hosford, program director; Wm. Snowden, chief engineer. Base rate is \$200. Rep is Meeker.

WKRG-TV, Mobile, Ala. (Ch. 5) begins CBS programming Labor Day, having tested from Aug. 29; it's second vhf in city, has 35-kw GE transmitter with 4-bay antenna. Kenneth R. Giddens heads owners, holds 20%, with local Spring Hill College holding 6.66%. C. P. Persons is v.p.-gen. mgr.; Frank Conwell, asst. mgr.; Bob Johns, production mgr.; James Evans, chief engineer. Base hour is \$400. Rep is Avery-Knodel.

KARD-TV, Wichita, Kan. (Ch. 3) began programming Sept. 1 as an independent after 2 days of tests. It's 4th outlet in area—other being one uhf, 2 vhf. It has 25-kw RCA transmitter, 6-bay antenna on 1000-ft. Stainless tower. Principals are George M. Brown family, local merchants, with v.p.-gen. mgr. Wm. J. Moyer holding 6.8%. Dale W. McCoy Jr., ex-KFBI, is sales v.p.; Tom Maloney, program v.p.; Robert Marie, chief engineer. Base hour is \$350. Rep is Petry.

* * * *

Chicago's 5th vhf is WTTW, (Ch. 11), 17th non-commercial educational on air, and it begins regular operation Sept. 6 after short test period, with supt. of schools Benj. Willis addressing city's 14,000 teachers. On Sept. 19, it goes to twice-a-week 4-10 p.m. programming, with more extensive schedule planned later in year after studios-offices move into Chicago Museum of Science and Industry. It is using 5-kw GE transmitter in Field Bldg., with rooftop antenna 617 ft. above ground. It's backed by 60 civic organizations as members of Chicago Educational TV Assn., whose exec. director is John W. Taylor, ex-deputy gen. of UNESCO. Other top executives: James Robertson, ex-WTMJ-TV, Milwaukee, program director; Colby Lewis, ex-WGBH-TV, Boston educational, production mgr.; Duane Weise, ex-U. of Missouri's KOMU-TV, chief engineer.

WTVS, Detroit (Ch. 56, educational) is now testing and aims for Oct. 2 regular programming. It's 4th educational uhf, others being in E. Lansing, Mich., Cincinnati, Madison. It has 12-kw GE transmitter with 5-bay antenna on 500-ft. Stainless tower located at city's board of education headquarters. Studios are at U of Detroit and Wayne U as well as at headquarters. It's operated by Detroit Educational TV Foundation Inc., comprising 18 local organizations. Wm. E. Stirton is exec. secy.; C. Allen Harlan, pres.; Mrs. Frank Couzens, treas.

Next educational stations on air, according to Joint Committee on Educational TV's Ralph Steetle, will be in Denver, New Orleans, Oklahoma City, Atlanta, Columbus, Memphis, Monroe, La. & Andalusia, Ala. All should be on air by next June 30, he believes.

* * * *

In our continuing survey of upcoming stations, these are latest reports from principals:

KBST-TV, Big Spring, Tex. (Ch. 4) now has Nov. 15 target, according to pres.-gen. mgr. Wm. J. Wallace. Con-

struction of studio-transmitter building has begun. GE 5-kw transmitter, 3-bay antenna and vidicon film chain, studio camera and other gear are to be shipped in 30 days. Owners include Robert W. Whipkey, publisher of *Big Spring Herald*, and Lewis O. Seibert, who owns San Angelo radio KGKL and 45% of KPLT, Paris, Tex. Joining CBS Extended Market Plan, it will have \$150 rate. Rep will be Pearson.

KOKE, El Paso, Tex. (Ch. 13), planned by Gordon McLendon as a specialized station, with emphasis on Spanish-language programs, has moved forward projected starting date to Dec. 15, plans Standard Electronics transmitter, has fixed no rates as yet. Meanwhile, McLendon, who operates radio KLIF, Dallas, is on tour of stations around country to study TV operations.

WJRT, Flint, Mich. (Ch. 12) may be delayed until sometime in 1956, reports v.p.-gen. mgr. Worth Kramer, who states economic injury protests filed with FCC by WKNX-TV, Saginaw, WTOM, Lansing and WWTW, Cadillac prevent WJRT from building at site near Chesaning, northwest of Flint, until final decision is issued. WJRT has leased former uhf WTAC-TV facilities, plans to use Emsco tower, already has RCA 50-kw transmitter and 12-bay antenna on hand. Signed with CBS, it has stated base rate will be "at least \$450." Rep will be Harrington, Righter & Parsons.

WNYC-TV, New York (Ch. 31), granted in May 1954, is still in "indefinite status", reports Seymour N. Siegel, mgr. of municipally-owned WNYC. Last week he asked City Planning Commission for 1956 budget of \$446,485, most of funds to be used for new uhf TV station. Among other public services, he cited televising of Police Dept. lineups as way of saving some 400 man-hours per week.

* * * *

CKRS-TV, Jonquiere, Que. (Ch. 12) has ordered 2-kw RCA transmitter for delivery first week in Oct., is already working on new transmitter house and 250-ft. wavestack antenna, has set Oct. 10 as target date for test patterns, Oct. 15 for programs, according to mgr. Tom Burham. It will cover headquarters of Saguenay River area. Rep will be Joseph A. Hardy & Co.

W. Walter Tison is selling WALT, Tampa (1110 kc, 1-kw) for \$100,000 plus lease of building for \$400 monthly, according to application filed with FCC this week. Sale was made to fulfill commitment made during hearing preceding grant of Tampa's Ch. 13 to WTVT, of which Tison is v.p.-gen. mgr. & 20% owner. WALT's new owners are admen Harold Kay & Emil J. Arnold, who together own 50% of WORC, Worcester, Mass. and recently acquired radio WLOW, Portsmouth, Va. and WMFJ, Daytona Beach (Vol. 11:20, 27).

Equipment shipments: From GE—5-kw transmitter this week to KLEW-TV, Lewiston, Ida. (Ch. 3), due on air in Nov.; 35-kw amplifier to KRLD-TV, Dallas (Ch. 4); 12-bay batwing antenna to WSJS-TV, Winston-Salem (Ch. 12). From RCA—12½-kw amplifier Aug. 26 to WCOV-TV, Montgomery, Ala. (Ch. 20). GE also reports orders for 1-bay helical antenna to be shipped in Oct. to WIIC, Pittsburgh (Ch. 11), due in mid-Nov.; 12-kw transmitter for Nov. shipment to WTSK-TV, Knoxville, Tenn. (Ch. 26).

FCC denied request of KOTA-TV, Rapid City (Ch. 3) to intervene in hearing on competing applications of Bartlett & Reed Management and Blackhills Video Co. to build microwave to serve Rapid City community antenna system. At same time, it granted request of AT&T to join in hearing because it might help determine need for such microwaves. It denied KOTA-TV on grounds that microwave wouldn't compete with station.

Network Accounts: Pontiac, further demonstrating auto makers' affinity for network TV, on which they will spend estimated \$83,400,000 in coming season (Vol. 11:35), this week bought 2 and took option on 4 of Ed Murrow's 90-min. See *It Now* programs on CBS-TV, and bought entire series of hour-long "Project 20" telementaries on NBC-TV, thru MacManus, John & Adams. Both series will be spotted irregularly throughout prime evening time. First 2 Murrow shows, in late Oct. and mid-Nov., will cover job of U. S. Vice President and a profile of N. Y. The first 3 "telementaries" will be *Nightmare in Red*, depicting rise of communism; *Jazz Age*, covering 1920s; *Rise and Fall of a Dictator*, story of Hitler's life . . . Chevrolet to sponsor filmed drama series, *Crossroads*, based on true experiences of clergymen, on ABC-TV starting Oct. 7, Fri. 8:30-9 p.m., thru Campbell-Ewald . . . Lettuce Inc., Salinas, Cal. is latest (and 14th) sponsor of *Mickey Mouse Club* on ABC-TV starting Oct. 3, Mon.-thru-Fri. 5-6 p.m., thru John Cohan Adv., Salinas; it bought 15 min. segment for 26 weeks . . . Helene Curtis replaces Speidel Watch Bands as 20-min. sponsor of *Caesar's Hour* on NBC-TV starting Sept. 26, Mon. 8-9 p.m., thru Earle Ludgin Inc. . . . Hazel Bishop to sponsor *Arthur Murray Party* on NBC-TV starting Oct. 2, Sun. 10:30-11 p.m., thru Raymond Spector, following cancellation of *Louella Parsons Show* in that time period by Brown & Williamson and Toni . . . Quaker Oats to sponsor *Sgt. Preston of the Yukon* on CBS-TV starting Sept. 29, Thu. 7:30-8 p.m., thru Wherry, Baker & Tilden . . . Necchi Sewing Machine Co. & Quality Goods Mfg. Co. to be co-sponsors of *Stop the Music* on ABC-TV this fall, Thu. 8:30-9 p.m., thru Grey Adv. . . . State Farm Insurance Co. to sponsor *Red Barber's Corner* on NBC-TV starting Sept. 2, Fri. 11:30-11:45 p.m., thru Needham, Louis & Brorby . . . Lever Bros. (Liquid Lux & Rinso Blue) to sponsor Fri. 10:15-10:30 a.m. segment of *Garry Moore Show* starting Oct. 7, thru J. Walter Thompson; Scott Paper moves to Fri. 11:15-11:30 segment . . . Amana Refrigeration Co., one of 4 sponsors of NCAA football on ABC-TV last fall, buys half of Big 10 and Pacific Coast regional schedule on CBS-TV starting Sept. 24, thru Maury, Lee & Marshall, N. Y. . . . Charles Antell (Lanolin hair preparation) to sponsor 3 segments of Ern Westmore's *Hollywood Backstage* on NBC-TV this fall, Mon.-thru-Fri. 10:30-11 a.m., thru T.A.A. Inc., Baltimore . . . GE's *20th Century-Fox Hour* will start Oct. 5, instead of Sept. 21, on CBS-TV Wed. 7-8 p.m., because of production delays.

Good idea for tiding over time lag before networks return to standard time schedules: WMAR-TV, Baltimore, will program different first-run *Sherlock Holmes* films 6 nights a week, 10-10:30 p.m., from Sept. 25, when Maryland returns to EST, to Oct. 29, when networks do so. After that, show will be moved to once-weekly after 11 p.m. V.p. E. K. (Jack) Jett explains that plan is designed to establish the film series strongly in Baltimore, while providing local sponsor with prime evening time and high-rated network adjacencies. Each episode will be sold to single or 3 partic. sponsors.

Walter Winchell has sued ABC for \$7,000,000 for alleged breach of "lifetime" contract, terminated last March 10. Network says it would fight suit to finish, claiming Winchell had negotiated to take his Sun. night program to another network and had asked to be released. Later, ABC stated, he asked to be reinstated but the network declined. Note: Winchell now scheduled to start on MBS Sept. 11, Sun. 6-6:15 p.m.

New network affiliation: WTTV, Indianapolis area outlet (Ch.4) becomes fulltime ABC affiliate Sept. 15; it has been sharing NBC with WFBM-TV.

FARM TV SET count for Nebraska was released this week by Census Bureau as part of its Oct.-Nov. 1954 Census of Agriculture. Based on 20% sample, Nebraska was shown to have TVs on 33,661 of its 100,846 farms—or about 33%—with stations in Omaha, Kearney, Lincoln & Scottsbluff and with out-of-state viewing possible from stations in Iowa, Missouri, South Dakota & Wyoming.

NEBRASKA

Note: Previously published tabulations—Nev., N. H., Vt. (Vol. 11:28); Wyo. (Vol. 11:29); N. D. (Vol. 11:30); Ida., Utah (Vol. 11:31); Mont., S. D. (Vol. 11:32); Colo., Minn. (Vol. 11:33); Wis., Kan. (Vol. 11:34); Okla. (Vol. 11:35).

FCC approved sale of WTRY, Troy, N. Y. for \$500,000 this week to Providence broadcasters George Taylor & Robert Engle, 28% each; adman Maury Lowe, 22%; ex-mgr. Ken Cooper of WORC, Worcester, 22%. Sellers are Col. Harry C. Wilder and 19 others (Vol. 11:19) who retain 50% interest, with Stanley Warner Theatres, in now-silent WTRI, Troy (Ch. 35), whose CP is being transferred to National City Bank of Troy as trustee pending litigation with CBS over shift of affiliation to WROW-TV, Albany (Vol. 11:6, 9).

Rate increases: KABC-TV, Los Angeles, Sept. 15 raises base hour from \$1500 to \$1750, min. \$275 to \$400. WBEN-TV, Buffalo, has raised base hour from \$800 to \$950, min. \$140 to \$175; KVDO-TV, Corpus Christi, hour from \$150 to \$200, min. \$30 to \$40; CHCH-TV, Hamilton, Ont., from \$400 to \$450, & \$90 to \$100.

"Big-name" authors' works will be adapted for weekly *Pontiac's Playwright Hour* on NBC-TV starting Oct. 4. First will be Philip Wylie's "The Answer," followed by other adaptations from Faulkner, Hemingway, F. Scott Fitzgerald and others.

New reps: KEDD, Wichita, Kan. to Adam Young (from Petry); KTVW, Tacoma-Seattle to Hollingbery (from Adam Young); KTVQ, Oklahoma City to McGillvra.

BACK-TO-THE-BIG-CITY TRADE MOVEMENT: The trend to replacements and second sets -- plus the slower pace of new market openings -- is once again making primary sales markets out of big pre-freeze metropolitan centers, which were the biggest sources of initial sales in TV's earliest days.

Monthly RETMA county-by-county tabulation of shipments to dealers, not made available for publication, give statistical support to fact that the industry's best markets are again the highly-saturated metropolitan centers.

So does American Research Bureau's recent 31-market survey (Vol. 11:35) showing highest replacement purchases in such centers as Philadelphia (75.3%), Chicago (73.9%), Detroit (71.8%), Dayton (71%), New York (70%). National replacement rate is 44.4%. ARB defines "replacement rate" as "the percentage of sets sold in last 15 months to homes already having a TV set." Advertest Research found in June survey of N.Y. TV homes that more than 12% have more than one set -- much higher than the national ARB average of 4.3% for second-set ownership.

RETMA exec. v.p. James D. Secrest, addressing Franchised Appliance Dealers Assn. of Atlanta Aug. 31, said: "One out of every 5 TV receivers sold so far this year has gone to a second-set customer. As this trend is rising, the ratio is expected to be one out of 3 by the end of the year." A RETMA spokesman later said the bulk of second sets were sold in metropolitan centers.

"Older sets are wearing out faster than many of us realize," said one major manufacturer. "Inasmuch as the older sets are mainly in metropolitan areas, it's only natural that they're getting the most replacement business. In a few years the newer, smaller markets will get the big replacement business, and then it will shift back again to the big cities. You can expect those marketing waves for some time."

Scrappage figures compiled by Sylvania Research, published in TV Factbook No. 21 (p. 19), give further documentation. They show steadily rising discard rate in the 18 months ended June 30, totaling 600,000 sets scrapped in first half of 1955 -- and it seems sure that rate will continue to rise. Sylvania figures give no indication of where the scrappage was highest -- but spokesman said it was "entirely logical" to assume it was concentrated in pre-freeze metropolitan centers.

Westinghouse's decision to abandon fair trade prices on electric housewares and other small appliances dealt a shattering setback to concept of fair trade. It left field almost entirely to GE and Sunbeam to police -- with whatever aid state courts give them, since Justice Dept. has ruled it's powerless to help enforce such laws (Vol. 11:14). How long they can continue the battle is anybody's guess.

Willard H. Sahloff, GE v.p. & gen. mgr. of small appliance div., commented: "We intend to continue our vigorous fair trade policy as far as is legally practicable in all states where the laws permit. This division has already invested a considerable amount of money in its fair trade program and has filed 1274 legal actions against alleged violators of our fair trade prices." He said the sales gains of his div. this year were attributable in great measure to "effectiveness" of fair trade.

Westinghouse's action was frank acknowledgement that fair trade laws weren't working, according to John J. Anderson, mgr. of portable appliances. He said: "It is our belief that the public will recognize the value of a quality product that is displayed attractively and priced fairly. Actually, we believe in fair trade, but under the present conditions it is not workable."

Electrical housewares affected: roaster ovens, frying pans, mixers, toasters and coffee makers, grill and waffle irons, hot plate rotisseries, heating pads. TV sets are not generally fair traded, except by a few smaller manufacturers.

Brief highlights of other major trade developments this week:

Philco Service: Philco plans to establish factory service branches in those cities where adequate service is not being provided by dealers -- but at the moment has no plans to create a national service subsidiary a la RCA. That's official word from company spokesman, though admitting "situation is very fluid and could change overnight." He said company's purpose in establishing service branches in Chicago, Philadelphia & Pittsburgh (Vol. 11:35) was to "supplement the efforts of independent servicemen." He wouldn't say where company would move next.

Selenium Shortage: A selenium recovery program for TV-radio industry has been launched by Commerce Dept.'s Business & Defense Services Administration. Shortage of selenium, needed for rectifiers and other TV-radio components, resulted mainly from recent copper mining strike (Vol. 11:33-34). Set makers and service firms have been urged to return to rectifier producers all used or defective rectifiers from which metal can be extracted and re-used. RETMA is cooperating in drive, sparkplugged by Harry Sharpe, director of BDSA miscellaneous metals & minerals div. TV-radio industry uses about 1,000,000 pounds of selenium a year, or half of U.S. supply. Meanwhile, Sarkes Tarzian disclosed he's giving 10¢ credit on each rectifier turned in.

Consumer Credit: Still going up -- but is it dangerously high? Shortly after Federal Reserve Board reported installment credit rose another \$562,000,000 during July, reaching all-time high of \$32.896 billion as of Aug. 1, Research Institute of America concluded that installment obligations are not out of line with consumer income. Said exec. director Leo Cherne, one of nation's top economists: "We find no significant increase in repossessions. There is less wild credit than generally believed. In our judgment, it is fringe stuff -- not enough to rock the boat. A.W. Zelomek, of International Statistical Bureau Inc., generally sides with Cherne. He points out that disposable income is rising rapidly -- and, as a result, consumers will be able to support a continually higher level of installment debt. Some experts in govt. disagree. This bloc sees an inflationary spiral resulting from the high installment buying, wants to establish tighter monetary controls. But National Foundation for Consumer Credit, declaring installment purchasing is in healthiest condition since World War II, reported credit delinquencies lowest in several years.

Texas Taxes: Set manufacturers and distributors are carefully studying, for its possible industry-wide implications, a new Texas tax law requiring any distributor who sells or gives away a set to a consumer to classify himself as a retailer, and to get a retailer's permit and pay sales tax. New law was advocated by dealer groups to prevent unfair competition and curb "back-door" selling. Some set makers have expressed belief privately that law goes too far and industry will suffer if other states adopt similar legislation. They say it's common practice for distributors to sell or give sets to friends or to customers for special occasions.

Production: TV output totaled 167,471 week ended Aug. 26, compared to 180,094 preceding week and 154,798 week ended Aug. 12. It was year's 34th week and brought TV production for year to date to about 4,890,000 vs. 3,875,000 in same 1954 period. Radio production totaled 239,401 (96,538 auto) week ended Aug. 26, down from 255,855 preceding week and 240,148 week before. For 34 weeks, radio output was estimated at 8,740,000 vs. 6,750,000 in corresponding period of 1954.

"The Vice-President Problem" titles sometimes-serious sometimes-amusing article by Perrin Stryker in Sept. *Fortune Magazine*. Conclusion is that production of v.p.'s has gone on at such a vigorous rate that the title is beginning to have a "tinny ring." Most profligate with the title are ad agencies, McCann-Erickson being most brass-laden--84 v.p.'s, with average of 27 employees each--compared with, for example, General Motors' 31 who average 18,602 employees. Among largest industrial companies, range is from U.S. Steel's 93 to DuPont's 10. In TV-radio field, article says CBS pres. Frank Stanton gives as one reason for 19 v.p.'s in TV & radio divisions the "contamination by advertising agencies, since one vice president has to take another vice president to lunch." CBS has 27 more in other divisions. NBC lists 25 all

told, ABC has 17. RCA has 32. There seems to be 6 categories of v.p.'s, largest of which embraces "those who have been knighted for the sake of customer relations." Banks are most notable example of category; Bank of America leads with 149 v.p.'s.

TV-radio retail business failures declined in first 7 months to 122, with liabilities of \$3,000,000, from 185 failures & \$5,717,000 liabilities in first 7 months of 1954, reports Dun & Bradstreet. In July, 20 failures representing \$546,000 in liabilities were reported, compared to 27 & \$769,000 in June and 39 & \$1,010,000 in July 1954.

RCA Service Co. to be host Sept. 7-8 to about 75 independent local service organizations from all regions, to bring them up to date on color developments and to tour Camden, Cherry Hill & Princeton facilities.

Topics & Trends of TV Trade: Record industry has been thrown into turmoil by Columbia Records' newly-formed record-of-the-month subscription club (Vol. 11:34), with dealers either heartily endorsing or violently opposing—few taking middle ground. Extremes impelled pres. James B. Conkling to issue statement explaining club's formation as (1) necessary to prevent raiding of Columbia's talent, and (2) best means of creating new customers.

In New York, for example, one prominent dealer reported signing up 300 subscribers, while another said he was canceling all Columbia orders because of his opposition. In Philadelphia, many dealers were reported enthused; but Raymond Rosen & Co., RCA distributor, sent letter to dealers warning that mail order business in records "eventually eliminates the retailer, and while you may not be interested, the wholesaler, too!" Washington dealers generally favored plan, judging from reports. Opposition was said to be strongest in Los Angeles.

Conkling said Columbia was on verge of losing to opposition record clubs such contract properties as N. Y. Philharmonic, Philadelphia and Cleveland symphonies & Andre Kostelanetz. He said such "raids" would have raised hob with company's classical catalogs and depreciated dealers' inventories. He said further that record clubs are far better way than lowering prices to create demand among those who buy no records. He observed:

"The entire program is man-made and as such was certain to have a number of flaws . . . However, we will make refinements in its operation as we go along, as we ourselves see some of its shortcomings and as our dealers point them out to us."

* * * *

GE offers new finance plan to enable service dealers to sell picture & receiving tubes and installations on credit and be reimbursed in full immediately by GE tube distributor. Under plan, announced by tube distributor sales mgr. J. T. Thompson, customer pays minimum of \$5 and is given 6 months to pay balance. It covers tubes themselves, all parts needed for installation, dealer's labor costs & complete TV overhaul. GE Credit Corp. assumes all bookkeeping problems from dealers. Said Thompson: "Our surveys show that a great deal of dealer capital is tied up all times in sets which are fully repaired but unclaimed because their owners are without the cash to pay for the service performed. The new GE plan will enable dealers to eliminate this problem, and use all their capital for the development of their business." Another advantage, he said, lies in new service business to be created by more liberal financing. "We know as many as 1,000,000 TV sets are inoperative because of money problems," he said. "Now this dormant business will come to life and new service dollars will be created."

Britain's TVs, dominantly 14-in. with some 17-in. among the newer models, may trend to 21-in. soon as result of agreement this week whereby Sylvania and Thorn Electrical Industries Inc. will set up new company, Sylvania-Thorn CR Tubes Ltd., with investment of about £1,000,000, to produce them at expected rate of 500,000 annually. Thorn is Britain's largest producer of electric lighting products; is parent of Ferguson Radio Corp. Ltd., said to be country's largest TV set producer; has long had tieup with Sylvania in connection with lighting items, last year joined with Sylvania in setting up color TV labs. New project may mean Sylvania's entry on bigger scale into export field, with British plant handling some of present export business of U. S. firm. **Note:** While in London, Sylvania pres. Don G. Mitchell disclosed that Sylvania last year manufactured 2,500,000 CR tubes, said it's aiming to exceed that total this year.

Trade Personals: John Stevens promoted to director of engineering & manufacturing, Hoffman Radio div. of Hoffman Electronics; Charles Nichols, ex-Packard-Bell, named director of engineering activities under Stevens, Robert Unger continuing as director of industrial relations; Marvin Whitney promoted to new post of administrative asst. at Los Angeles headquarters . . . Emanuel Sacks, RCA staff v.p., off for Europe on business on the *Queen Elizabeth* Aug. 31 after 3 weeks delay; he returns Oct. 2 . . . Nathaniel B. Nichols, mgr. of Raytheon research div., promoted to mgr. of commercial equipment engineering activities . . . Edward Kantrowitz, Emerson Radio adv. mgr., promoted to asst. to Lester Krugman, v.p. in charge of marketing . . . Lewis D. Spencer, Motorola legal director, elected to board of Tax Executives Institute Inc. . . . Benjamin C. Bowker, onetime gen. mgr. of radio WLIB, N. Y., heading own public relations firm in Toledo recently, named public relations mgr. of DuMont manufacturing divs., succeeding Jacob H. Ruiter, now adv. & promotion mgr. of technical products div. . . . George S. Peterson, ex-Chicago district mgr. of GE TV-radio dept., named western sales rep for TV cabinets, headquartering in Chicago . . . Orville Barnes, ex-Philco Detroit, named Bendix Radio's Great Lakes regional mgr., Detroit . . . Frank Loring resigns as DuMont midwest regional sales mgr. . . . Robert Barnard promoted to Arvin service mgr., succeeding Arthur J. Richards, now chief radio engineer of electronics div. . . . Ed Manzo, from Atlanta office, named eastern sales mgr., General Precision Labs, headquartering at Pleasantville, N. Y. . . . Richard Johnson promoted to mgr. of Syracuse sales office, International Resistance Co.

* * * *

DISTRIBUTOR NOTES: Admiral appoints Tarbell-Watters Co., 144 Chestnut St., Springfield, Mass. (L. H. Tarbell, pres.), replacing own Boston factory branch . . . Emerson West Coast opens factory branch at 234 NW 14th Ave., Portland, Ore. (Ralph Sachs, mgr.) . . . Olympic Radio organizes Cardinal Distributors, 7155 Manchester Ave., St. Louis, as factory branch (Maurice L. Krieger, mgr.) . . . Graybar Buffalo (Crosley-Bendix) appoints Dwight Slade mgr. of major appliances . . . American Elite Inc., exclusive U. S. agent for German Telefunken radios, appoints Aaron Lippman & Co., Newark . . . Almo Radio Co., Philadelphia parts distributor, appoints Moe Eisenberg, ex-mgr. of Emerson Radio of Pennsylvania, as asst. to pres. & sales director . . . Lyon & Healy, Chicago, one of nation's largest music retail chains, appoints Donald Broman mgr. of TV-radio-phonos, replacing Gerald Ward, resigned.

Hoffman factory branches on west coast will start distribution of ABC laundry line this month, but pres. H. L. Hoffman insists company does not plan to manufacture laundry equipment or merge with any white goods producer. In message in company publication, he said: "However, we do believe that it makes sense for our sales corporation to distribute a top quality laundry line."

RETMA's fall meetings at New York's Plaza Hotel Sept. 13-15 to consider: Federal Trade Commission's new trade practice rules for TV-radio merchandising (Vol. 11:27); pending excise tax legislation; plans for National TV-Radio Week starting Sept. 18; military specifications for electronic components. All divisions and committees meet first 2 days, board final day.

Bendix Radio was hit by strike Sept. 1 as 4-week walkout at parent Bendix Aviation in Cleveland spread to TV-radio plant in Towson, Md. Some 3000 members of International Assn. of Machinists (AFL) rejected company's proposal for 18¢ hourly pay hike, spread over 3 years.

Financial & Trade Notes: United Business Service, Boston, in tabulating 200 stocks with "above-average growth prospects" on Aug. 29, lists these 17 under category of Electronics & Radio-TV:

	Recent Price	1954 Earnings	Price-Earnings Ratio	Div. Rate	% Yield
Allied Control	†14	\$1.31	10.7	\$0.80	5.7

† American Stock Exchange. ‡ Over-the-Counter. All others N. Y. Stock Exchange.

RCA may shortly borrow additional finances to cover "expanding business in electronics in the military and civilian fields," according to statement by chairman David Sarnoff following board meeting Sept. 2. "The issuance of \$100,000,000 of subordinated convertible debentures in anticipation of these future needs was discussed," he said, "but final decision as to the amount or the manner in which these funds would be raised has not yet been made. The corporation is carrying on discussions with Lehman Bros. and Lazard Freres & Co. with respect to its financing program."

RCA's capitalization now consists of \$200,000,000 in long-term notes held by insurance companies, 900,824 shares of preferred stock (\$1.50 div.), 14,031,016 shares of common. Its 1954 gross was record \$940,950,220, net after taxes \$40,525,459 (\$2.66 per share) vs. \$853,054,003 & \$35,021,778 (\$2.27) in 1953 (Vol. 11:9); for first 6 months this year gross was \$488,510,000, net \$22,061,000 (\$1.46), up from \$444,369,000 & \$19,268,000 (\$1.26) in same 1953 period (Vol. 11:31). Net assets were \$234,865,104 at end of 1954, up from \$130,902,127 at end of 1950.

Philco borrowed \$15,000,000 from John Hancock Mutual Life Insurance Co. this week through sale of 25-year 3½% sinking fund notes, financial v.p. Courtney Pitt stating it was to finance "expanded volume . . . in the advanced electronic and appliance fields, particularly with the coming of color TV and the mass production of transistors." It also took option to borrow another \$10,000,000 on same terms within next 18 months.

Teleprompter Corp. gross revenues went up to \$420,435 during first half of 1955 vs. \$217,886 in same 1954 period and \$533,661 for all 1954. Net earnings were \$34,081 vs. \$11,889; for all 1954 they were \$49,421. Chairman-pres. Irving B. Kahn, in Aug. 30 report, forecast "continuation of this excellent trend," noted that goal of 21 new installations per month has been exceeded so far in 1955, gave details of proposed merger of Teleprompter National Sales Corp. into parent firm, depending on stockholder approval at Sept. 8 annual meeting.

Dividends: Bendix Aviation, 50¢ payable Sept. 30 to stockholders of record Sept. 10; Canadian Westinghouse, 50¢ Oct. 1 to holders Sept. 15; Canadian GE, \$1 Oct. 1 to holders Sept. 15; WJR The Goodwill Station, 10¢ Sept. 16 to holders Sept. 6; Columbia Pictures, 30¢ Oct. 31 to holders Sept. 30; Loew's Inc., 25¢ Sept. 30 to holders Sept. 9; RCA, 25¢ Oct. 24 to holders Sept. 16.

American Electronics Inc. earned \$144,161 (29¢ per share) on sales of \$3,074,878 for 6 months ended June 30 vs. \$138,325 (27¢) on \$2,073,002 in same 1954 period.

Color Trends & Briefs: Distributors' attitudes on color prospects aren't deviating much from policies expounded by their manufacturer-suppliers, we find in a spot-check survey—following up on our recent poll of manufacturers (Vol. 11:33-34). RCA's distributors are among most optimistic, e.g., Raymond Rosen & Co., Philadelphia (Vol. 11:35). But distributors of GE, Philco & Admiral, who responded to our query, range from cautious to downright resentful about color.

John P. Stewart Jr., mgr., Southwest Radio & Equipment Co., Oklahoma City (Philco), sees color as eventual "very big boost" but not this year. He feels that price and stability of sets must improve before mass market emerges. W. G. Medaris, pres., Medaris Co., Dallas (Philco), calls current color push "premature," says it can lead to confusion and loss of black-&-white sales.

K. V. Martin, radio-TV-appliances sales mgr., GE Supply Co., states: "We are a very small and newer market with very little of the 'Cadillac trade' that RCA plans to hit." A. A. Demarest, appliance div. sales mgr., Stratton-Baldwin Co., New Orleans (Admiral), also called current color promotion "premature." "We all realize and agree," he says, "that color is inevitable and it does add to the enjoyment of TV, but why muddy the waters now? I think color TV should be looked upon as something for the immediate future only after prices and service problems have been dealt with."

Color Balop "that works" is the new device reported last week by WTMJ-TV, Milwaukee (Vol. 11:35). Developed by staff under chief engineer Philip B. Laeser, new "Colorbal" permits direct colorcasts from "live" art work, bypassing process of making 2x2-in. color transparencies. Advantages of device, as listed by Laeser:

- (1) Permits use of larger art work, reducing possibilities of faulty reception as color screens become larger.
- (2) Eliminates cost of making transparencies, which run \$4-\$5 each.
- (3) Avoids loss of color fidelity through aging of transparencies.
- (4) Employs very stable equipment.

"Colorbal" uses flying-spot scanner and 3 photoelectric cells, picking up 7½x10-in. cards. In addition to art work, unit also handles small and relatively flat packages or products, and it can be used for black-&-white. One limitation is that ambient light in rooms must be quite low.

Network color schedules for next 2 weeks: NBC-TV—Sept. 5-9, *Home* segments, 11:45-noon; Sept. 6 & 8, *Vaughn Monroe Show*, 7:30-7:45 p.m.; Sept. 11, *Color Spread*, "The Skin of Our Teeth," starring Helen Hayes, Mary Martin, George Abbott & Florence Reed, 7:30-9:30 p.m.; Sept. 12-16, beginning of regular *Howdy Doody* colorcasts, 5:30-6 p.m.; Sept. 17, NCAA football game, Miami vs. Georgia Tech, 3:30-6 p.m.; Sept. 19, *Producer's Showcase*, "Our Town," starring Frank Sinatra, Eva Marie Saint & Paul Newman, 8-9:30 p.m.

Market for some 250,000 color sets in New York area, at \$750, is implied in survey reported by Advertest Research. June poll of 751 owners of black-&-white sets shows: (1) "Less than 7%" willing to buy color now. (2) More than 20% have seen color. (3) About 70% know color sets are on the market. (4) "Most" feel it will be 4-5 years before they own color set. Applying the "less than 7%" figure to 4,000,000-plus TV homes in area gives market potential of approximately 250,000.

GE reports order from WJIM-TV, Lansing, Mich. (Ch. 6) for continuous motion color projector with dual projectors and dual slide equipment.

Newly leased Ziegfeld Theatre will be used by NBC-TV to originate N. Y. color programs in about year.

WITH DEADLINE for pay-as-you-look comments up next week, Sept. 9, FCC has little sense of urgency in disposing of the matter—being much more concerned with uhf-vhf-allocation problems (see p. 3). Formerly quite eager for quick action on pay-TV, Comr. Lee is now much more active in pursuit of solution to allocations matters. Only other commissioner who seemed anxious for speed was Comr. Hennock, no longer in office. At staff level, too, most would like to see allocations problems made first order of business.

Major parties to subscription-TV fight, meanwhile, are prepared to unload on FCC their summer's work of seeking loopholes in opponents' arguments. However, there won't be quite the deluge of paper that snowed FCC under when first comments were filed last June 9 (Vol. 11:24). Attorneys for parties generally indicate that their briefs will be considerably slimmer—though several will run 50-100 pages.

There have been few formal filings with Commission since June 9. One was request of off-air WFMZ-TV, Allentown, Pa. (Ch. 67) for permission to be "guinea pig" (Vol. 11:31). This week, theatre exhibitors' Joint Committee on Toll TV asked FCC not to grant request, stating that a grant would be "a premature determination of the matters at issue . . . and would moot some of the issues raised by the Commission."

Sept. 16 *Collier's Magazine* is out with article on toll TV by Bill Davidson, nicely timed with FCC deadline. After quoting principals' arguments, author says he noted lack of opinion from viewers who participated in tests conducted several years ago by Zenith in Chicago and Telemeter (Paramount Pictures) in Palm Springs, Cal.

He said he interviewed dozens, "found that out of 103 people from all walks of life, only 2 would not welcome toll TV on a permanent basis." He says that Earle Strebe, an exhibitor who cooperated in Palm Springs test, claims more than 50 other exhibitors have asked him how they can get in on the ground floor of pay TV. Davidson also reports Zenith hopes to get started within a year in Great Britain, Australia & New Zealand; that Skiatron has similar plans for Cuba; that Telemeter aims to start soon in Canada—in addition to starting wired systems in 2 U. S. cities.

Signs of the TV times: ABC-TV reports \$69,737,937 time sales (71 sponsors) on books for this year, which would compare with \$34,713,098 in 1954 (PIB figures; *TV Factbook No. 21*, p. 32). Of 1955 total, \$44,835,995 (52 sponsors) represents new business . . . It's news worth releasing, thinks So. Calif. Broadcasters Assn., when radio set sales exceed TVs; Electric League figures for 7 counties showed 59,673 radios (31,700 auto units) sold during July vs. 23,655 TVs . . . Radio Advertising Bureau, in new study by Fact Finders Associates Inc., shows 83% of all 1955 cars (totaling 7,000,000) are leaving dealers radio-equipped; that 5,800,000 new ones will go into service this year; that as of July 1 there were 31,000,000 autos with radios; that auto radio market alone comprises 27.5% of nation's total working radios . . . NBC's 5 owned-&-managed TV stations increased local sales 13% in July over year ago—with KRCA, Los Angeles, up 62% for that month alone and 22% for 7 months; 5 radio stations were up 27%, WMAQ, Chicago, leading with jump of 59%.

Power increases: WNCT, Greenville, N. C. (Ch. 9) went from 93-kw to 316-kw visual ERP; WMTV, Madison, Wis. (Ch. 33) from 17.1-kw to 209-kw visual ERP.

Aid to northeastern flood victims continued from all levels of trade this week, as consumers and dealers began enormous task of rehabilitation amid multi-million dollar disaster. Following Philco's emergency repair-replacement program for appliances (Vol. 11:35), Westinghouse instituted plan whereby major appliances would be returned to operating condition at nominal cost to consumer. Many dealers offered to suspend temporarily time payments on purchases of TV-radio-appliances; others provided delayed down-payment terms and special discounts. A Trenton dealer offered all merchandise to disaster victims at cost, with no down payment and up to 3 years to pay. One Philadelphia discount house offered free service for all flood-damaged merchandise bought at store. Meanwhile, TV-radio stations continued to win praise of public officials for their fund-raising programs. Red Cross chairman E. Roland Harriman said: "The entire broadcasting industry—both network and local—has rallied magnificently in support of the Red Cross campaign for flood relief."

DuMont applied to FCC this week for authority to transfer WABD & WTTG to projected new subsidiary, DuMont Broadcasting Co. (Vol. 11:33), stating as reason that "local TV broadcasting has constituted a business that is a separate and distinct part of this corporation's activities." Pro forma statement indicates 1,000,000 shares will be issued at \$1 par for 1-for-2½ distribution to present stockholders, does not state how many more will be marketed for new capital. Narrative statement accompanying application says DuMont "has been obliged to terminate and liquidate its TV broadcast network operations because they could not be operated profitably under the existing system of allocations and control of TV broadcast stations and affiliations." Besides the 2 stations, DuMont Tele-Centre at 205 E. 67th St., N. Y. will be taken over by subsidiary which is incorporating with present DuMont officers and directors.

Six new station applications, most in months, were filed with FCC this week. They include 3 by Video Independent Theatres Inc., Oklahoma City (Henry S. Griffing, pres., 50%), for Hot Springs, Ark., Ch. 9; Clovis, N. M., Ch. 12; Santa Fe, N. M., Ch. 2. Firm operates 140 theatres in 48 Okla. & Tex. towns, also owns 12½% of KWTW, Oklahoma City. Others filed: Minot, N. D., Ch. 10, by owners of KFYZ-TV, Bismarck; Youngstown, O., Ch. 73, by WFAR, Farrell, Pa.; Arecibo, Puerto Rico, Ch. 13, by WCMN.

U. S. Office of Education, Dept. of Health, Education & Welfare, has released its biennial *Directory of College Courses in Radio & Television 1954-55*, prepared again by Gertrude G. Broderick. Out of 1851 institutions surveyed, 857 responded, 334 reporting at least a radio and/or TV workshop and 2 courses, 81 reporting radio and/or TV majors leading to undergraduate and graduate degrees. Copies of the directory are available on request from Washington headquarters.

Opposition to studio boxing matches of WEWS, Cleveland by International Boxing Managers Guild is being explored for anti-trust angles by Justice Dept., which will place case before grand jury next week. Guild has been picketing station and reportedly warning studio boxers they'll be denied positions on other fight cards. Station has been staging Sat. 10-11 p.m. fights, sponsored by Pilsener Brewing Co., before audiences of 100 guests of sponsor.

TV film makers paid \$1,014,600 in royalties into Music Performance Trust Fund during 1954, while 852 recording companies contributed \$2,303,000, according to annual report just released. Since fund was established by American Federation of Musicians in 1948, it has allocated \$11,600,000 for local concerts designed to provide employment to members, \$9,000,000 from recordings.

SUMMARY - INDEX OF THE WEEK'S NEWS — September 10, 1955

PAY-TV BATTLE narrows to 9 major participants in comments filed with FCC; arguments remain unchanged, but barbs get sharper (p. 1).

ALLOCATIONS CHANGES to be discussed by FCC soon, Bartley urging 8 more vhf channels be sought, Doerfer doubting value of deintermixture (p. 3).

INDUSTRIAL TV BOOM anticipated by industry, seen as \$10-\$20,000,000 business in next 5-10 years; 2 dozen manufacturers planning to supply equipment (p. 3).

CBS RECOMMENDED FOR GRANT in St. Louis Ch. 11 case over 3 locally owned applicants in initial decision praising experience, programs, management (p. 5).

"MIX" OF TV PRODUCTION changed upward by some set makers as alternative to direct price hikes. Motorola and DuMont increase list prices (p. 10).

PULITZER PRIZE FOR TV writing proposed by producer Worthington Miner to help keep medium vigorous and free, resist pressures to ape "movie standards" (p. 6).

NEW STATIONS BEGIN in Shreveport, La. and Sacramento, Cal., as Worcester, Mass. uhf suspends after 21 months; reports on upcoming stations (p. 8).

CODE REVIEW BOARD hits back at Kefauver recommendations for outside control of programs, saying they smack of unnecessary regulation (p. 16).

SUBSCRIPTION-TV ADVERSARIES SHARPEN AIM: Another step in the long toll-TV battle, which is still probably years from an end, was reached this week when major participants in FCC's proceedings filed "reply comments" aimed at tearing apart each other's arguments first broached formally in briefs filed June 9 (Vol. 11:24).

Struggle has simmered down to a matter of attrition among those parties whose pocketbooks are most directly affected. Compared with 30-odd who filed June 9, there were only 9 this week -- but they're the big ones. The dropouts apparently feel that major contestants are doing good job of stating their cases for them -- or they've simply lost interest in the whole business.

Still slugging it out is hard core of contestants who will probably stick it out to the end: Proponents -- Skiatron, Paramount's Telemeter, Zenith. Opponents -- ABC, CBS, NARTB, exhibitors' Joint Committee on Toll TV. In a class by itself is Jerrold Electronics Corp., vigorous opponent of scrambled telecasting, but an ardent proponent of pay-as-you-look via wired systems. Single station filing was KGUL-TV, Galveston, Tex., also an opponent. Notably absent is NBC -- though it did file vigorous opposition June 9, in statement by chairman David Sarnoff.

Basic arguments made by all are substantially same ones they advanced in original June 9 comments -- but with aim sharpened. Particularly noticeable is the fact that pay-TV proponents are concentrating fire on networks, charging monopoly, playing up FCC's and Congress' concern with plight of marginal stations.

Next move is up to FCC, which doesn't seem to find the matter very urgent (Vol. 11:36). Staff will now collate material, await decision on whether case will require oral hearings, demonstrations, etc. And there's distinct possibility that Congress, which finds issue a wonderful political football (Vol. 11:26), will take over. This would prevent FCC from making any really final decision. Following is essence of briefs filed this week:

* * * *

ABC (30 pages) -- (1) Pay TV would take most current program fare away from those least able to pay for it. (2) Congress should decide. "It is clear that the question of the authorization of subscription TV involves a major policy decision about a highly controversial matter and must in the long run be determined by political processes. The orderly procedure to accomplish this end is for the Commission to seek the guidance of Congress." (3) A special board should conduct "full inquiry," transmit findings to Congress.

CBS (61 pp.) -- (1) Toll TV, "if successful, would spell destruction of the best values of free TV" by blacking out free channels, dividing audience, siphoning off best talent. (2) Program promises of toll TV proponents are "vague and meaningless," while "limitations and safeguards" offered are illusory and futile. (3) FCC should hold full hearing. (4) "All that [a test of subscription TV] would prove is that if someone got the right to charge admission to what had been a public picnic ground, enough hungry people might need a place to eat badly enough to make the enterprise of charging admission a highly profitable one. This would be true even though fewer people could use the picnic ground and even though the people excluded might be those who needed it most." (5) FCC should dismiss whole business -- now.

JERROLD (40 pp.) -- (1) Scrambled telecasting is economically and technically unsound; coded signals can be "bootlegged with ridiculous ease." (2) Wired systems are secure, can be installed more cheaply than decoders can be distributed. (3) The 3 proponents are challenged to FCC-supervised demonstration of the vulnerability of their systems to code-breaking, using facilities of WCAU-TV, Philadelphia. (4) Announced plans to start commercial tests of wired pay system over community antenna systems, starting in March-April, in Casper, Wyo.; Tyler, Tex.; Muscle Shoals, Ala.; Key West, Fla. -- with cooperation of movie exhibitors and unidentified producers.

JOINT COMMITTEE ON TOLL TV (86 pp.) -- (1) Authorization of pay-as-you-look TV "inevitably would lead to substitution of fee for free TV." (2) FCC doesn't have legal authority to approve toll TV without further legislation by Congress. (3) In any event, full FCC hearings are required. (4) Toll TV offers little in programming not offered by free TV. (5) Pay-TV systems are technically deficient.

KGUL-TV, Galveston (11 pp.) -- (1) Subscription TV has characteristics of a public utility, would require FCC rate regulation. (2) FCC proceedings should be halted, matter turned over to Congress. (3) Public would end up paying for what it now gets free. (4) Systems may not be able to handle color.

NARTB (16 pp.) -- (1) FCC should stop now, turn proceedings over to Congress. (2) Pay TV would doom free TV. "This Assn. has no hesitancy in asserting [that] the economic power inherent in a subscription TV system will, in short order, afford a monopolization of every area of worthwhile talent." Telecasters would be forced to join pay-TV ranks. (3) Industry is "not in dire straits," needs no help from pay TV.

* * * *

SKIATRON (29 pp.) -- (1) Networks confuse self-interest with public interest. "It is only natural that these networks, now in secure possession of enormous captive audiences utilizable by them for their advertising sponsors, should see any competition for audience time as a threat to themselves and seek to translate that threat into a threat to the public whom they claim to represent." (2) There's relatively little opposition to subscription TV from individual station operators.

TELEMETER (18 pp.) -- (1) Everyone stands to gain from pay TV -- public, advertisers, stations. (2) Toll TV revenues will support several hundred more stations. (3) Industry is "dominated by NBC & CBS" and toll TV offers "a new competitive force from which the public will benefit."

ZENITH (53 pp.) -- (1) "Is the Commission obligated to deny, or can it justify denial of, an opportunity for subscription TV to gain public acceptance on the speculative grounds that it may have an adverse economic effect upon the networks and motion picture theatres?" (2) Telecasters are in "urgent need" of more revenues, which pay TV can supply. (3) Toll TV offers new competitive source of programs, to dilute "power and control of NBC & CBS over the industry...It is shocking that this great medium -- and the power to mold public opinion and to dictate what the public can or cannot see -- should rest in the hands of 2 or 3 network officials in New York City." (4) Free TV won't suffer, because subscription TV can succeed "only if it offers unique and high quality programs which are beyond the economic reach of producers of advertising sponsored programs." (5) "In the final analysis, all subscription TV asks is that the public itself be permitted to use the air it owns for the purpose of carrying programs it desires but which are not now available."

(Full texts of comments are available from principals or their attorneys, whose addresses are included in Special Digest of June 9 comments in Vol. 11:24).

FCC MEMBERS PONDER UHF & ALLOCATIONS: Willingness to explore allocations changes is evident among all FCC commissioners. Like Comrs. Hyde & Lee, who have already indicated direction they believe Commission should go (Vol. 11:35-36), others are urging quick consideration of all proposals, but they differ in emphasis.

Comr. Bartley was probably first to claim that more vhf channels, in addition to present 12, are the long-range answer. He states that 8 channels more would turn the trick. "They won't make a fully competitive system," he says, "but they'll at least give the local advertiser some sort of break." Possibility of obtaining such channels from other services, notably military, is not remote, he believes. "If Congress were made as aware of the problem as we are," he states, "I believe we'd get the channels." Bartley is somewhat leery of getting more vhf assignments from present 12 channels by cutting mileages, powers, etc. "We'd better be careful not to mess up what we have," he warns. "Besides, you can't get much relief that way, not where you need it most -- in Zone I."

Comr. Doerfer is ready to plunge into full-scale discussions of matter, but he also cautions: "This time, let's be careful. Let's not make a decision that will find us meeting ourselves coming back in a year or 2. The Commission can't be blamed for its allocation plan. It didn't have much information to go on then. We've got a little something now -- but we'd better have a good idea where we're going."

Acquisition of more vhf from the military isn't quite as enticing to Doerfer as to some other commissioners. "You still have a conversion problem," he says. "It's not as great as with uhf but there's a natural inertia of public to convert."

Deintermixture is still no panacea, as far as Doerfer's concerned. "Making a little dent with a few markets is no substantial solution," he says. "I don't think you need to move every one to uhf to do some good, but you've got to do more than create a few little uhf islands."

Commission won't begin discussions of problem for several weeks, has given staff no instructions on how it intends to proceed. However, staff has been busy working up material, ready to move in any direction dictated by Commission.

INDUSTRIAL TV—IS THE GIANT AWAKENING? Closed-circuit industrial TV is still pretty small potatoes in the electronics field -- but the manufacturers of ITV equipment foresee a boom market beginning this year or next and mushrooming for 10 years.

ITV field is now 10 years old, and there are only some 800-1500 installations now in use -- mostly relatively simple single-camera setups, though there are some elaborate systems using color and even 3-D. Total cost of equipment now in use is estimated at somewhere between \$4-\$8,000,000, including accessories.

This is small when you consider the virtually infinite number of uses in every field of industry, commerce, government, education and even agriculture; when you consider ITV's low cost and reliability; when you consider the number of important companies anxious to manufacture and sell the equipment.

Industry-wide prediction that the boom is near at hand is based on proven experience with the cheap and sturdy vidicon camera tube, and on the fact that nearly every current ITV installation is saving money, increasing efficiency or eliminating danger for its owner. Equipment manufacturers believe industrial TV could become a \$10-\$20,000,000 business within 5-10 years. But today it's still a sleeping giant.

Biggest user is the utility industry, with railroads, banks and steel industry believed to be runners-up.

Some 2 dozen companies are now manufacturing ITV equipment or plan to do so (they're listed on p. 313 of the Fall-Winter TV Factbook). But most of the business to date has been done by a handful of firms: Diamond Power Specialty Corp., DuMont, RCA, Dage div. of Thompson Products, Kay Lab Inc.

* * * *

Pioneer in ITV and still largest producer is Diamond Power Specialty Corp. of Lancaster, Ohio, whose main products are industrial soot blowers, gauges and water columns for utility industry. Diamond brought out its rugged Utiliscope in 1946 -- when the established electronics manufacturers were thinking only of entertainment

TV--and sold it to power companies for distant observations of gauges, smokestacks, boiler furnace interiors, etc.

Utiliscope was built around Philo Farnsworth's image dissector tube, is still the durable "Model T" of the ITV industry, with only 300 lines resolution. Tube is guaranteed for one year's continuous service, but some have been on 24-hour duty for 7 years without a failure, according to electronic sales mgr. W.I. McCord. Diamond has added new vidicon cameras to its line, but still has demand for "old reliable."

Diamond has over 600 installations in use--"twice all the rest put together," claims McCord, who sees ITV really beginning to snowball, with 1956 due to be "the first real big year." Diamond's ITV production line is now working round-the-clock.

Particularly proud that it's expanding beyond the power industry, Diamond points out that just a few years ago 85% of its customers were utility companies, but now the percentage is 65. Company recently ran ad in Wall Street Journal inviting inquiries about ITV; tabulation of response showed greatest number of inquiries from banking institutions, then railroads, steel industries, food processing and material handling concerns, in that order.

ITV installations range in price from \$975 (for simplified single-unit outfit without monitor, offered by several companies) to about \$4000, the median being \$2000-\$3000 for camera & controls, power supply and monitor. Cost of accessories, installation and engineering often exceeds cost of camera chain itself. For example, Diamond was asked to install camera gear on remotely controlled car stationed on an overhead track, so camera could look down into any of a number of silos.

* * * *

How do other manufacturers size up the future of ITV? R.T. Silberman, gen. mgr. of Kay Lab Inc., San Diego, Cal., which claims to have supplied 180 ITV installations, says: "The ultimate potential is limited only to one's imagination. It's hard to estimate how the market will expand but I believe it will increase in some sort of a geometrical progression. New sales each year could equal the total sales of all previous years combined. Technical improvements will probably feed impetus to this pace until the first sales plateau is reached in approximately 5 years."

Philco, a newcomer to ITV, offers this size-up by its industrial sales mgr. G.A. Hagerty: "I estimate that 1955 sales of industrial TV systems will top the \$4,000,000 figure. Since the uses of ITV are so varied and its effect in raising the level of operational efficiency so significant I am of the opinion that the surface has barely been scratched in this field. I anticipate a most healthy annual incremental gain in sales with volume reaching \$20,000,000 in the early 1960's."

RCA's theatre & industrial equipment mgr. J.F. O'Brien was recently quoted as saying: "The industry is enjoying its best year. I wouldn't be surprised if sales for 1955 came close to equaling everything the industry sold from 1946 through 1954."

Adds another ITV producer: "It's reasonable to expect that within 3, 5 or 10 years this will be a multi-million dollar business with annual volume of \$10,000,000 per year." The sales mgr. of another company which claims to have installed 100 of ITV systems now in use expects the field to become much larger market than broadcast equipment "simply because there are practically no limitations on ITV."

In addition to companies mentioned above, these others have shown ITV equipment: GE & CBS-Columbia (field-sequential color TV for medical demonstrations) General Precision Laboratory, Farnsworth Electronics (IT&T), Kaye-Halbert.

Note: American Institute of Electrical Engineers will devote entire broadcast session of its 1955 fall meeting to papers on closed-circuit TV (see below).

AIEE's committee on TV & aural broadcasting this week announced these officers for 1955-56 term: J. B. Epperson, Scripps-Howard TV, chairman; C. M. Braum, JCET, vice chairman; Carl E. Smith, consulting engineer, secy. TV-radio session at AIEE's fall meeting will be held Oct. 4 at Chicago's Hotel Morrison and will be devoted to closed-circuit TV, covering industrial, medical, research, education, large-screen and color phases, with papers by Jerrold's Max Kraus, AT&T's C. A. Bartlett,

Kay Lab's John Day, U of Kansas' Dr. Michael Klein, National Institute of Health's Dr. Murray C. Brown, Iowa State U's Carl H. Menzer, GE's C. L. Ellis.

New network affiliation: WGTH-TV, Hartford (Ch. 18) becomes basic CBS affiliate Oct. 1, following switch of WKNB-TV (Ch. 30) to NBC (Vol. 11:27); both stations are being sold to their respective networks, pending FCC approval (Vol. 11:2, 22, 26, 28). Pre-freeze WNHC-TV (Ch. 8), area's 3rd outlet, signed as ABC primary.

Personal Notes: Sylvester L. Weaver, NBC pres., flies to London Sept. 21 for start of commercial TV Sept. 22 and to address Institute of Advertising Practitioners Sept. 27; he will stay at the Savoy Hotel, may go to Rome before returning for his appearance on "1976" telementary Oct. 9 . . . Glenn Jackson elected a Storer v.p., continuing as managing director of WAGA-TV but relinquishing same duties for radio WAGA to station mgr. Claude Frazier, in separation of TV-radio functions . . . Frank Elliott Jr., ex-WCAU-TV, Philadelphia, named director of CBS-TV spot sales development, succeeding Jack Mohler . . . M. Franklyn Warren, gen. sales mgr. of KULA-TV & KULA, Honolulu, elected sales v.p. . . . Edward Stockman promoted to asst. NBC-TV sales mgr., Chicago, specializing in *Today*, *Home & Tonight* . . . Richard A. Moore, pres. of KTTV, Los Angeles, returned Sept. 6 from month's European tour . . . Walter E. Christenson, v.p. & editor, elected pres. of *Omaha World-Herald*, holding initial decision for Ch. 7 there; he succeeds Henry Doorly, who moves up to chairman . . . Walter L. Dennis, ex-WJNO-TV, Palm Beach, named mgr. of KCSJ-TV & KCSJ, Pueblo, replacing Russ Truesdell, now operations mgr. of KNTV, San Jose, Cal. . . . Danny Kirk, ex-WCHS-TV, Charleston, W. Va., named operations mgr. of KTRF-TV, Lufkin, Tex. . . . A. Fred Gibson promoted to asst. sales mgr., WSJS-TV, Winston-Salem, reporting to gen. sales mgr. Harry B. Shaw . . . Richard W. Bowman, TV copy supervisor of Norman, Craig & Kummel, in charge of Revlon's commercials on \$64,000 *Question*, promoted to v.p. . . . Jerry Molfese, ex-TV-radio timebuyer, Warwick & Legler, joins H-R Television Inc. . . . Gunnar Rugheimer, ex-national TV news service mgr., named CBC-TV senior sales rep . . . Wm. B. Colvin, ex-Aveco electronics div. & WLWA, Atlanta, joins sales promotion dept. of Television Bureau of Advertising . . . Wm. B. Rodgers, ex-KKTV, Colorado Springs, named merchandising & marketing consultant, Bradley Lane Adv., Denver . . . Donald Tykeson promoted to sales mgr., KPTV, Portland, Ore., replacing Charles White, now gen. mgr. of upcoming KLEW-TV, Lewiston, Ida.

John K. Herbert, onetime NBC v.p. in charge of network TV sales, serving since Jan. 1954 as exec. publisher of Hearst's *N. Y. Journal-American*, promoted to publisher of *American Weekly* and *Puck*, replacing Robert D. Levitt, resigned.

Colorado Gov. Edwin C. Johnson, former Democratic chairman of Senate Commerce Committee and long-time Senate expert on TV-radio-communications, was reported in satisfactory condition Sept. 7 after heart attack.

Gene L. Cagle's sale of 1/3 of KTOK, Oklahoma City (1000 kc, 5-kw, ABC) for \$37,000 to KTOK Inc., leaving Wendell Mayes and C. C. Woodson as equal partners, was approved this week. Cagle sold to devote time to Texas State Network, of which he is pres. & 20% owner. TSN operates KFDA-TV & KFDA, Amarillo; KFJZ-TV & KFJZ, Ft. Worth; and radio WACO, Waco & KRIO, McAllen. Mrs. Cagle owns 1/4 of KRBC-TV & KRBC, Abilene.

Georgia's ex-Gov. E. D. Rivers Sr. is principal in Dalworth Bestg. Co., Miami, buying Ft. Worth's independent KCUL (1540 kc, 10-kw D, 1-kw N) for \$400,000 from J. G. Ulmer, payments to be made over approximately 15 years. Rivers also operates WMIE, Miami, recently acquired WWPG, Palm Beach. Earlier, he disposed of TV interests by selling 3 CPs (Vol. 10:51, 11:20, 27).

Transfer of WPFH, Wilmington, Del. (Ch.12) and Philadelphia radio WIBG & WIBG-FM to one parent corporation, WPFH Bestg. Co. was approved this week. Firm takes over some \$2,000,000 in TV obligations from Paul F. Harron, who retains control of corporation (Vol. 11:33).

CBS WON INITIAL DECISION over 3 locally owned applicants this week in bitter contest for St. Louis' Ch. 11. Despite fact that networks are generally regarded as having toughest job of winning competitive grants outside of key origination points, examiner Thomas H. Donahue held CBS's qualifications superior on all major points.

In background and experience in broadcasting, Donahue called CBS "a giant among pygmies." As to programming, he also gave nod to CBS because of its "vast experience in TV programming," and he indicated the network also had the edge in management and operation proposals. "Except for policy consideration that may favor local applicants," the examiner said, "there are no preferences established by CBS's adversaries that have any noticeable effect on the very substantial conclusions of superiority drawn in its favor."

Defending his choice of a network over local non-radio applicants, he praised CBS for seeking station via competitive proceeding "and laying its record on the line." At conclusion of hearing, he noted, "it is apparent that, ironically enough, its only significant weakness is its size." In previous decisions Examiner Donahue has shown strong preference for broadcasters with long history of good operations. In Sacramento case last year he decided in favor of McClatchy interests because of their excellent broadcasting record, was reversed by Commission on "diversification" grounds. McClatchy has appealed to court.

* * * *

FCC just isn't having much luck in court cases these days. It was slapped down again this week by Appeals Court, which in effect ordered it to reinstate application of Jefferson Amusement Co. in hearing for Ch. 4 in Port Arthur, Tex. Commission had dismissed Jefferson's application after finding interlocking ownership with Lufkin Amusement Co., a previous applicant for same channel which had been dismissed with prejudice for allegedly "defaulting" on its application. Court held that Lufkin did not actually default within meaning of Commission rules, since applicant had petitioned to withdraw its application, and because FCC held no hearing on proposal to dismiss application with prejudice.

Commission started rule-making this week on allocations proposal which would permit Buffalo's WGR-TV (Ch. 2) to apply for uhf satellites in Clymer, N. Y. and Shinglehouse, Pa. (Vol. 11:25). It asked comments by Oct. 14 on changes which would add channels to the 2 towns and substitute Ch. 62 for 37 in Meadville, Pa.

Eugene P. O'Fallon, former owner of Denver's KFEL-TV (Ch. 2), this week withdrew opposition to shift of Ch. 3 from Pueblo to Alamosa, Colo. (Vol. 11:36), saying that his plans to file for Pueblo had changed.

Eldon Morrison petitioned Commission to add Ch. 71 to Cle Elum, Wash., stating he plans to apply for channel. KACY, Festus, Mo. (Ch. 14), off air since April 1954, dropped its CP this week.

Preliminary report on "Videotown" (New Brunswick, N. J.) 1955 TV viewing habits by Cunningham & Walsh (full study due in Nov.) reveals: (1) Women have switched maximum viewing time from morning to afternoon. (2) Average set is on 5 1/4 hours per day, 4 of them evening. (3) Father rules set when home, having first choice of programs. (4) TV seems to have wiped out back fence gossip and evening neighborhood bridge parties. (5) Viewers have found more time for reading without reducing TV time.

Telecasting Notes: Why not a Pulitzer Prize for TV writing? We agree heartily with producer Worthington Miner, who this week urged Pulitzer Prize Committee to treat TV writing as seriously as newspaper and dramatic writing. Said Miner: "TV is young—scarcely 8 years old—yet in that time it has encouraged more original, more creative and more courageous thought than motion pictures have in a half-century. But it is in a critical position; strong forces are being mustered to dampen that creativity and courage to enforce conformity, not with the standards of a national press or a free and vigorous theatre, but with the emasculated standards of motion pictures. Nothing could more effectively oppose the pressures exerted on TV today than a recognition by the Pulitzer Prize Committee of the best that TV has to offer" . . . Release of oldies from Columbia Pictures' vaults may be implied in the reports of merger talks between Columbia's Screen Gems and TPA, Sept. 7 *Variety* believes. Despite denials by both parties of any consolidation plans (Vol. 11:36), *Variety* says the mere fact that TPA was approached by Screen Gems indicates something in the wind. "Columbia has been held back in the past by virtue of the fact that Screen Gems, with its small sales force, wasn't set up to handle a large feature block property," it says, "while TPA, with its 35-man force and its track record on Edward Small's Peerless package, a gross to date of \$95,000 per picture on the average, would be ideal for the purpose" . . . Mergers of TV film distributors definitely are in prospect, trade press predicts. Sept. 10 *Billboard* reports it queried heads of 6 distribution firms (unnamed), found that all conceded time was ripe for mergers; 4 of them "admitted their own doors were open to any sound proposition." Sept. 7 *Variety* says "something's going to pop," reports virtually all major independent distributors feeling each other out for possible get-togethers . . . Conflicting reports on Tom O'Neil's immediate TV plans for RKO backlog continue to come with every issue of the trade press. *Billboard*, which last week reported "spirited bidding" by TV film distributors for RKO's vault features (Vol. 11:36), this week speculates that RKO will keep out of TV entirely until it has won its way back into good graces of movie exhibitors by releasing some good films. Hollywood *Daily Variety* reports O'Neil raising another \$15-\$20,000,000 to get theatrical production and distribution rolling, with vaults now being screened for reissue material . . . More new-to-TV features to be shown this fall on General Teleradio's KHJ-TV, Los Angeles, and presumably chain's other outlets; of the 25-film package, some were foreclosures acquired from Bank of America, others are property of M. & A.

Story of *TV Guide* gets feature play in Sept. 12 Time's press section under heading, "The Successful Upstart." Although profits aren't disclosed, mail & newsstand circulation is estimated at 3,000,000 weekly (2,378,000 stand sales make it biggest weekly seller). With company collecting 9¢ per copy, total gross revenue is estimated at \$270,000 per issue and advertising is expected to hit \$1,750,000 this year. Owned by Walter Annenberg, 47 (WFIL-TV, *Philadelphia Inquirer*, et al.), *TV Guide* employs 367 to produce 35 "local" editions (standard national section with local program & news insert). *TV Guide* seems completely unworried about competition. Publisher James Quirk says of Curtis' short-lived *TV Program Week*: "They put out all this publicity about how every TV owner ought to buy a TV magazine. And the public went out and bought *TV Guide*."

Network interconnections: WDXI-TV, Jackson, Tenn., Sept. 1; WKRG-TV, Mobile, Ala., Sept. 5. AT&T lines now link 371 stations in 246 cities.

Alexander. Included are *Strangers* (Ingrid Bergman, George Sanders), not yet being shown in U. S. theatres, *Man on the Eiffel Tower* (Charles Laughton, Franchot Tone, Burgess Meredith), *Ramrod* (Joel McCrea, Veronica Lake), *Casanova Brown* (Gary Cooper, Teresa Wright), *Tomorrow Is Forever* (Claudette Colbert, Orson Welles), *Woman in the Window* (Joan Bennett, Edward G. Robinson, Raymond Massey) . . . Large-scale film production planned by NBC-TV for its full-hour daytime color series *NBC Matinee Theatre*. Current plans call for filming, in color, of at least 2 shows beginning next month, with 10 more to follow if first efforts prove successful. Most of the *Matinee* shows are slated to be telecast live, however . . . "Spectacular"—in its TV sense—has made the dictionary, according to *Variety*, which reports publishers of Webster's Collegiate Dictionary requested verification from NBC pres. Pat Weaver for definition of the noun form of the word as a big, lavish TV production; *Variety* says NBC officials credit it with originating usage . . . CBC has spectaculars, too; its weekly *First Folio* series beginning Sept. 25 Sun. 10-11:45 p.m. with new production of "Macbeth," will be followed in subsequent weeks by original comedies, musicals, documentaries and live performances of at least 2 operas . . . First prize in TV film category at Venice Film Festival has been won by London-produced "The Gallant Little Tailor," one of series of *Animated Fairy Tales*, distributed in U. S. by General Teleradio . . . When polio epidemic postponed opening of Milwaukee schools, WTMJ-TV offered time to public and parochial schools for TV classroom sessions. Public schools began with four 15-min. daily sessions, Lutheran schools with 2 periods, to continue until schools open . . . Britons will see these U. S. programs via their new commercial TV service, which begins Sept. 22: *I Love Lucy*, *Liberace*, *Ford Theatre*, *My Hero*, *Ray Milland Show*, *Eddie Cantor Theatre*, *I Led 3 Lives*, *Dragnet*, *Lassie*, *4 Star Playhouse*, *Roy Rogers*, *Person to Person*, *Ozzie and Harriet*, *Inner Sanctum*, *Amos 'n' Andy*, *Range Rider*, *Science Fiction Theatre*, *Mr. District Attorney*, *Hopalong Cassidy* . . . Running simultaneously in U. S. and England will be *Adventures of Robin Hood*, *Scarlet Pimpernel*, *Lilli Palmer Theatre* . . . NBC-TV spectaculars may go to England in film or kine versions in exchange for filmed *Wide Wide World* pickups from England, according to one industry report . . . DuMont's WABD, N. Y., unveils its "new look" next week with addition of "more than 30 new programs." Also coming up is Sept. 25 debut of Sun. noon-6 p.m. children's spectacular *Wonderama* and opening of "highbrow" show *The Lively Arts* early next month, Sun. 7-9 p.m., featuring opera films, live chamber music, discussions of painting and literature, etc.

New 35mm version of Electronicam, DuMont's live-film camera system, is now in use, having hit the big time as filming started for Jackie Gleason's new series, *The Honeymooners*, at New York's Adelphi Theatre. "Our results already are so good that I'm sure the Electronicam will revolutionize our whole approach to simultaneous telecasting and motion picture filming," said Gleason. His half-hour show is filmed before live audience of 1200 in just a little more time than it takes to view it, following 2-hour rehearsal period. Other current and upcoming Electronicam projects: Lambert Pharmacal's 105 *Les Paul-Mary Ford* 5-min. shows; first 2 of 13 one-hour TV films for Disabled American Veterans; second 90-min. film in Warren Wade's *Broadway TV Theatre* series; films in *Modern Romances* series.

Controlling interest in Green Mt. TV Corp., operator of community antenna system in Burlington, Vt., has been taken over by Butcher & Sherrerd, Philadelphia investment firm.

Network Accounts: Spiraling cost of network TV shows is pinpointed by Sept. 5 *Sponsor Magazine*, reporting at least 13 shows this fall will cost more than \$100,000 each for talent and production alone—whereas 2 years ago \$40,000-\$50,000 per show was considered very high. Highest-priced show is NBC-TV's *Color Spread*, estimated at \$265,000 for 6 sponsors; highest weekly show is NBC-TV's *Caesar's Hour* (\$112,900); lowest-priced weekly show is CBS-TV's *Uncle Johnny Coons* (\$3500) . . . **General Motors**, for its United Motors, AC Spark Plug & Guide Lamp divs., extends sponsorship of 90-min. bi-weekly *Wide Wide World* to one hour starting Oct. 16, Sun. 4-5:30 p.m., thru MacManus, John & Adams; first of 20 programs will cover 11 geographical areas, showing underwater swimming, attempt of Donald Campbell to break own speedboat record and other attractions . . . **Morton Salt** bought last remaining segment of *Mickey Mouse Club* on ABC-TV starting Oct. 3, Mon.-thru-Fri. 5-6 p.m., thru Needham, Louis & Brorby; show represents \$15,000,000 in gross billings . . . **Whitehall Pharmacal Co.** to sponsor *Midwestern Hayride* on NBC-TV starting Sept. 21, Wed. 10:30-11 p.m., thru Biow-Beirn-Toigo . . . **Herbert Tareyton** cigarettes to sponsor *Justice* on NBC-TV starting Oct. 2, Sun. 10:30-11 p.m., thru M. H. Hackett Co., N. Y. . . **Kellogg Co.** to be alt. sponsor (with Campbell Soup) of *Lassie* on CBS-TV starting Sept. 11, Sun. 7-7:30 p.m., thru BBDO . . . **Serta Mattress Co.** buys alt. Mon. 10-10:15 a.m. segment of *Garry Moore Show* on CBS-TV, Mon.-thru-Fri. 10-10:30, thru Bozell & Jacobs . . . **Maxwell House Coffee** buys 51 partic. in Sept. and Oct. on NBC-TV's *Today*, *Home & Tonight*, thru Benton & Bowles . . . **International Shoe Corp.** (Peters shoes) buys 13 weekly partic. on *Pinky Lee Show* on NBC-TV starting next Feb., Mon.-thru-Fri. 5-5:30 p.m., thru Henri, Hurst & McDonald

Station Accounts: More evidence of TV sales pull from June survey of 745 N. Y. TV homes by Advertest Research, as part of its continuing series, *The Television Audience of Today*: More than 40% purchased products in June as direct result of seeing them advertised on TV; **Lucky Strike** commercials were best-remembered and best-liked, with Westinghouse's second in both best-remembered and best-liked categories, **Chesterfield** third in best-remembered, **Kraft** third in best-liked . . . **Schlitz** is first sponsor to contract for ABC Film Syndication's entire "Anniversary Package" of 15 feature films, many J. Arthur Rank productions; it bought series on WTMJ-TV, Milwaukee, starting in fall, thru Lennen & Newell . . . **Latin American** sponsorship for Ziv syndications: **Sears Roebuck** buys *Science Fiction Theatre* in Mexico City & Monterey; **Philips of Eindhoven** sponsors *Favorite Story* in Monterey and upcoming Guadalajara; **Uppmann Tobacco** buys *Mr. District Attorney* on Havana stations . . . **Bowman Biscuit Co.** buys *Dr. Hudson's Secret Journal* in 16 southwestern markets, thru Ball & Davidson Inc., Denver . . . **Bethlehem Steel** buys Harry Wismer's sport roundup, *Bethlehem Sports Time*, on WRCA-TV starting Sept. 14, Wed. 6:30-6:45 p.m., thru Radio Reports Agency, N. Y. . . **WLWT**, Cincinnati, to carry 53 Redlegs' baseball games next year, sponsors **Hudepohl Beer** & local **Ford Dealers Assn.** switching from WCPO-TV, thru Stockton, West & Burkhardt, Cincinnati; **Berger Beer** continues on radio via WSAI . . . **Ideal Toy Corp.**, N. Y., allots \$375,000 to fall TV campaign, sponsoring programs in 20 markets and preparing "TV time table" promotion kit for dealers, thru Grey Adv. . . **Sealy Mattress Co.** plans New England saturation campaign with sponsorship of filmed 30-min. *Waterfront* on several stations, thru Tarler & Skinner Inc., Boston . . . Among advertisers currently reported using or preparing to use TV station time: **Twin City Shellac Co.**, Brooklyn (Dan Dee floor polish & wax),

. . . **Lionel Toys** buys 7 *Paul Winchell-Jerry Mahoney Shows* on NBC-TV in pre-Xmas campaign, Sat. 10:30-11 a.m., thru Grey Adv. . . **Trans World Airlines** to sponsor **Walter Winchell** commentary on MBS in all cities served by airline, starting Oct. 2, Sun. 6-6:15 p.m., thru BBDO . . . **NBC-TV** drops **Arlene Francis' World at Home**, Mon.-thru Fri. 10:45-11 a.m., following purchase of *Hollywood Backstage*, 10:30-11 a.m., by **Charles Antell**.

Rate increases for 9 CBS-TV affiliates in smaller markets under Extended Market Plan (Vol. 10:49) were announced this week by station relations director Edward P. Shurick. Under EMP, top network programs are extended to small markets at minimum cost as means of building circulation. Shurick said increased rates were justified by rising set circulation. He added that 35 national advertisers are currently buying some or all of the 22 EMP stations, which he declared have aggregate of 368,000 sets in use. Stations whose EMP rates will be increased Oct. 1: **WDXI**, Jackson, Tenn., increased from \$100 to \$125 an hour; **KVEC-TV**, San Luis Obispo, Cal., \$50 to \$60; **WBOC-TV**, Salisbury, Md., \$50 to \$70; **KGVO-TV**, Missoula, Mont., \$50 to \$60; **KVOS-TV**, Bellingham, Wash., \$70 to \$100. Increases effective Oct. 9: **WTVY-TV**, Dothan, Ala., \$50 to \$100; **KLAS-TV**, Las Vegas, \$75 to \$85; **WKNY-TV**, Kingston, N. Y., \$65 to \$100; **WJDM-TV**, Panama City, Fla., \$50 to \$70.

Old problem of agency men taking accounts with them cropped up again this week with resignation of Don Paul Nathanson as Weiss & Geller v.p. Effective Dec. 1, he sets up own Chicago agency, taking with him the big Toni account, estimated at \$5,000,000 a year. Nathanson was Toni adv. director for 5 years before joining Weiss & Geller in 1952.

thru Weiss & Geller, N. Y.; **Selchow & Righter Co.**, N. Y. (games & puzzles), thru Norman, Craig & Kummel, N. Y.; **American Pencil Co.**, N. Y., thru Doyle Dane Bernbach, N. Y.; **Pharma-Craft Corp.**, N. Y. (Fresh stick deodorant), thru J. Walter Thompson, N. Y.; **Custom Paint & Chemical Co.**, Pennsauken, N. J. (Yearlon floor finish), thru Fiore & Fiore, Jersey City, N. J.; **Kimco Mfg. Co.**, Portland, Ore. (auto accessories), thru Wilson-Markey, San Francisco; **West Disinfecting Co.**, Long Island City, N. Y. (Prompt disinfectant), thru Paris & Peart, N. Y.; **Golden State Co. Ltd.**, San Francisco (dairy products), thru Guild, Bascom & Bonfigli, S. F.; **Samuels Shoe Co.**, St. Louis (DeLiso Debs women's shoes), thru Marjorie Wilten Adv., Clayton, Mo.; **Food Specialties Inc.**, Worcester, Mass. (Appian Way pizza mix & sauce), thru John C. Dowd, Boston, and Dowd, Redfield & Johnstone, N. Y.; **Carac Co.**, Freeport, N. Y. (fertilizers & insecticides), thru Mann-Ellis, N. Y.; **Tony Downs Foods Inc.**, St. James, Minn. (Duncan Hines frozen poultry), thru Alfred Colle Co., Minneapolis; **Hesmer Foods Inc.**, Evansville, Ind. (Hesmer's potato chips), thru General Adv. Assoc., Evansville; **Brunswick-Balke-Collender Co.**, Chicago (bowling equipment), thru McCann-Erickson, Chicago; **Arnold, Schwinn & Co.**, Chicago (Schwinn bicycles), thru Ted Fenberg & Assoc., Chicago; **Avochem Inc.**, Minneapolis (Softize for laundry), thru Olmsted & Foley, Minneapolis; **Reading Plastics Co.**, Reading, Pa. (Kwik-Fix glue), thru Ted Black Adv., Reading; **Pressman Toy Corp.**, N. Y., thru Ehrlich, Neuwirth & Sobo, N. Y.; **Western Tool & Stamping Co.**, Des Moines (**Homko** power mowers), thru Rothbardt & Haas Adv., Chicago.

One-day spot drive will be used by *New York Times* Sept. 24 to publicize its serialization of Harry Truman memoirs starting following day, buying 7 spots on WCBSTV starting at 5 p.m. and running thru *Late Late Show*.

TWO NEW VHF OUTLETS have gone on the air—in Shreveport and Sacramento—and long-established uhf WWOR-TV, Worcester, Mass. suspended operation Labor Day to stop continuing losses.

KTBS-TV, Shreveport, La. (Ch. 3), city's second outlet, began NBC programming Sept. 3, wires pres.-gen. mgr. E. N. (Newt) Wray, whose family owns station. It has DuMont 25-kw transmitter, RCA antenna on 1051-ft. Truscon tower near Mooringsport, La. Charles Saltsgaver is production mgr., with remainder of staff transferred from radio KTBS: Patrick J. White, station mgr.; Mrs. Marie Gifford, commercial mgr.; C. H. Maddox, chief engineer. Base hour is \$400. Rep is Petry.

KCRA-TV, Sacramento, Cal. (Ch. 3) started test patterns Sept. 2, using temporary single-bay antenna sidemounted 200-ft. above ground on Ideco 450-ft. tower, authorized by STA to permit special Calif. State Fair telecasts. Station will beam NBC programs with full 100-kw ERP as soon as 6-bay RCA antenna can be erected. It's city's 3rd outlet, 2nd vhf. Pres.-gen. mgr. Ewing C. Kelley owns 50%, remainder held by v.p. C. Vernon Hansen and family. Frank M. Devaney is station mgr.; Robert E. Kelly, program mgr.; W. Herbert Hartman, chief engineer. Base hour rate is \$650. Rep is Petry.

WWOR-TV (Ch. 14) is 18th uhf station to leave air this year (though 3 have resumed operation), making total of 48 formerly operating uhf outlets now dark. Pres. John Z. Buckley indicates station will retain its license, which expires April 1957, and resume if climate becomes more favorable to uhf. Commercial mgr. Leonard V. Corwin says outlet had built up about 40% conversion (110,000 sets), in its 21 months of operation, is up-to-date on current obligations, having spent about \$750,000 to build and operate station. Principals are investment firm Fox, Wells & Co. (which also controls San Diego's KPFD-TV and several community antenna systems), with v.p.-gen. mgr. Ansel E. Gridley and woolen manufacturer Ralph K. Hubbard holding smaller interest. ABC-affiliated outlet was bucking competition of 2 Boston vhfs.

* * * *

In our continuing survey of upcoming stations, these are latest reports from principals:

WUTV, San Juan, Puerto Rico (Ch. 6, educational) is still surveying site but has not ordered equipment as yet and does not expect to get started before Jan. 1956, reports R. Delgado Marquez, TV-radio mgr. for Puerto Rico Dept. of Education, located at Hato Rey. A civil engineer and ex-mgr. of Puerto Rico Communications Authority, Senor Marquez was recently gen. mgr. of WKAQ-TV. He reports also that FCC has been asked for change in call to WIPR-TV.

WHTN-TV, Huntington, W. Va. (Ch. 13), with 5-kw RCA transmitter due shortly, now plans Sept. 25 test patterns, Oct. 2 start as ABC interconnected, writes v.p.-gen. mgr. Fred Weber, ex-WFPG and now-silent WFPG-TV, Atlantic City (Ch. 46). With custom-built RCA 18-gain antenna due Oct. 25 at Eighth St. Hill site, WHTN-TV will operate for first few weeks with temporary antenna. Control is held by A. B. Hyman, pres., and head of local theatre group. Base rate will be \$450. Rep will be Petry.

WOSU-TV, Columbus, O. (Ch. 34, educational), though it has its 12-kw RCA transmitter and completed Ideco 550-ft. tower and antenna over year ago, still has

no target date, reports WOSU director Robert C. Higgy. It was last reported preparing for "late fall" debut.

CFCY-TV, Charlottetown, P.E.I. (Ch. 13) does not expect to begin operation until spring of 1956, reports CFCY mgr. R. F. Large. Equipment has not yet been ordered, but 500-ft. site has been selected and construction of studio-transmitter building started. Reps will be All-Canada and Weed.

Equipment shipments: From RCA, 25-kw transmitter Aug. 31 to KTVO, Kirksville, Mo. (Ch. 3), due late this month, and 25-kw amplifier Sept. 2 to KFDX-TV, Wichita Falls, Tex. (Ch. 3); from GE, 3-bay antenna this week to KLEW-TV, Lewiston, Ida. (Ch. 3), with Nov. 1 on-air target. GE reports order from WSM-TV, Nashville (Ch. 4) for 2 studio camera chains, for Oct. 1 delivery.

WTSK-TV, Knoxville, Tenn., plans to change call to WTVK as it enters new 3-story studio-transmitter building on Sharps Ridge and boosts ERP to 314-kw in Nov.

"Whither UHF and the VHF-UHF Allocation Situation" will be major panel topic during IRE symposium in Washington's Hotel Hamilton, Sept. 23-24; participants will be FCC Comr. Webster, consulting engineer C. M. Jansky Jr. and an experienced vhf-uhf broadcaster to be selected. Other TV subjects: vhf & uhf propagation, by FCC engineers Edward W. Allen, Wm. C. Boese, Harry Fine & Edward W. Chapin; color studio switching, by H. W. Morse, GE; WFAA-TV & KRLD-TV candelabra antenna, by L. J. Wolf, RCA; 50-kw transmitter, by John Ruston, DuMont; color-monochrome integration, by Philip B. Laeser, WTMJ-TV, Milwaukee. Also included will be several papers on TV-radio automatic programming and remote control—by R. A. Isberg, Ampex; A. C. Goodnow, Westinghouse stations; Roger E. Peterson, WNBF-TV, Binghamton; Edgar F. Vandivere Jr., Vandivere, Cohen & Wearn. Chairman of steering committee is Oscar Reed Jr., 1735 DeSales St. NW, Washington.

Rate increases: WMAR-TV, Baltimore, Oct. 1 raises base hour from \$1100 to \$1250, min. \$200 to \$275; WSPD-TV, Toledo, has added new Class AA hour (7-9:30 p.m. daily) at \$1000, min. at \$225, Class A hour remaining \$850; KPTV, Portland, Ore., base hour from \$550 to \$700, min. \$110 to \$120, having added new Class AA min. only rate (7:29-10:31 p.m. daily) at \$180; WGTH-TV, Hartford, hour from \$350 to \$500, min. \$70 to \$100; WTVT, Tampa, Oct. 1 raises base hour from \$400 to \$500, min. \$80 to \$100; WATE, Knoxville, raises hour from \$400 to \$500, min. \$80 to \$100; KIMA-TV, Yakima, has raised hour from \$300 to \$400, min. \$60 to \$80; WIS-TV, Columbia, S. C., has new Class AA hour (7:30-10:30 p.m. daily) at \$400, min. \$100, Class A hour remaining \$350.

"Completely packaged closed-circuit TV broadcasting systems for small community TV stations" is being offered by Paramount's Telemeter Corp. through its Ampli-Vision community antenna equipment subsidiary. Equipment includes camera chains and low-powered transmitters for wired systems, distributed by Graybar. "Extensive plans for opening new avenues to profitable local TV stations on a wired rather than broadcast basis will shortly be announced," says Ampli-Vision.

New rep offices: McGillvra has opened Atlanta office at 267 East Pace's Ferry Rd. NE, with Edward T. Newton as mgr. (Exchange 1490); Burke Stuart Co. has new Chicago office at 75 E. Wacker Dr., with Edward Paro, v.p. (Dearborn 2-0826).

Hazeltine's Bernard D. Loughlin will be presented SMPTE's 1955 David Sarnoff Gold Medal Award for outstanding contributions to field of color TV at 78th semi-annual convention Oct. 4 at Lake Placid Club, N. Y.

NEARLY 55% of Iowa's farms have TV sets—the heaviest penetration of farm TV in any of the 16 states for which 1954 figures have been tabulated to date by U. S. Census Bureau (Vol. 11:28 et seq.). County-by-county figures are being compiled in govt.'s current Census of Agriculture, with TV statistics based on 20% sample in Oct.-Nov. 1954. Of Iowa's 192,933 farms, 105,809 are TV equipped. Some 16 stations are receivable in various parts of the state. The county-by-county farm TV census for Iowa:

IOWA			
County	Total Farms	Farms with TV	
Adair	1,932	990	
Adams	1,355	722	
Allamakee	1,898	383	
Appanoose	1,692	507	
Audubon	1,661	1,100	
Benton	2,434	1,596

Note: Previously published tabulations—Nev., N. H., Vt. (Vol. 11:28); Wyo. (Vol. 11:29); N. D. (Vol. 11:30); Ida., Utah (Vol. 11:31); Mont., S. D. (Vol. 11:32); Colo., Minn. (Vol. 11:33); Wis., Kan. (Vol. 11:34); Okla. (Vol. 11:35); Neb. (Vol. 11:36).

Jewish Theological Seminary of America is sponsoring formation of a national TV committee to "seek to utilize TV to its fullest to visually develop a greater awareness of religion as a vital part of everyone's daily lives." Chairman is George Friedland, vice chairman of Food Fair Stores.

Radio WBEN, Buffalo celebrated silver anniversary this week by playing host to all in listening area who were born Sept. 8, 1930, at special 45-min. audience show and luncheon. Owner *Buffalo News* began operating WBEN-TV May 14, 1948.

Jessel-Roberts Production Corp. is new TV film organization formed by toastmaster George Jessel and producer Robert L. Roberts. First series is *Guest of Honor*, featuring Jessel presiding at dinners honoring various people.

Television Bureau of Advertising schedules first annual convention Nov. 11 at Ambassador East, Chicago.

NBC radio affiliates this week heard network's 3-point plan to extend weekend *Monitor* format to all daytime programming—then returned home to consider plan in light of what affiliates chairman Robert D. Swezey, WDSU, New Orleans, called "individual operating situations." NBC offered this proposal: (1) Extend concept of commercially successful *Monitor* with its partic. sales patterns, to all daytime programming Mon.-thru-Fri. 10 a.m.-6 p.m. (2) Open top-rated evening programs such as *Dragnet*, *Great Gildersleeve*, *Radio Fan Club* & *One Man's Family* to partic. sponsorship (only *Fibber McGee and Molly* now has partic. sponsors). (3) Provide 25% "revenue adjustment" to affiliates to make compensation competitive with CBS. New daytime programming would be tailored to women listeners. NBC next week will forward necessary contracts to affiliates incorporating its ideas, with possibility that new plan will be launched Nov. 7. After NBC pres. Sylvester L. Weaver outlined programming plans of new service, exec. v.p. Robert W. Sarnoff gave sales pattern. He said there would be substantial increase in local availabilities for station sales, with 9 min. of commercial time daily between noon-3 p.m. for stations' local sales. Network will make available to stations 4 additional min. of commercial network time per hour. Swezey conducted own survey of affiliates' sentiment in advance of meeting, reported overwhelming support of plan.

TV nosed out newspapers in 1954, was very close second to magazines, as favorite medium of national advertisers who spent more than \$1,000,000 each, according to study in Sept. 9 *Printers' Ink*. Of \$1,137,477,388 spent by the "millionaires," 27.1% went to magazines, 25.9% to TV, 25.2% to newspapers. In 1953, respective percentages were 28.3%, 19.7% & 27.1%. TV was also most heavily dependent on biggest advertisers for its national revenues, getting 92% from that source, vs. 88.2% for radio, 54% for magazines, 48.3% for newspapers. Study covers 1950-54, shows number of millionaire advertisers increased from 222 to 259, their expenditures rising from \$839,471,253 in 1951 to \$1,137,477,338 last year. Stating that "Today's booming advertising business depends more than ever on its millionaires," magazine notes that group's share of all national advertising in 7 major media rose from 50.8% in 1951 to 54.3% last year.

Course for TV-radio timebuyers is planned by committee of Radio-TV Executives Society, co-chaired by Frank Pellegrin, H-R Television Inc., and Mary McKenna, radio WNEW. Weekly courses are scheduled to begin in Oct. U of So. Cal. also offers TV-radio timebuyer course this fall, instructed by Frank Crane, managing director of S. Cal. Bcstrs. Assn., aided by Wallace Hutchinson, Weed & Co.

Broadcast ratings are confused and "not worth a hoot," Lawrence Nolte, adv. mgr. of White King Soap Co., told Hollywood Ad Club last week. He presented chart comparing ARB, Pulse & Nielsen ratings, charging variations up to 300% between services. Nolte urged broadcasters, advertisers & agencies to "research the research" to get facts—then to set up one standard system.

Russia is still trying to jam Voice of America broadcasts with 1000 full-time transmitters despite apparent thaw in cold war, director Theodore C. Streibert reported last week. Voice plans no basic policy change and could use more money, he said after visit with the President.

Seagoing TV station, under consideration by South African technical experts & businessmen, would beam signals from ship 3 miles offshore to Durban, Capetown, East London & Port Elizabeth.

NARTB's TV transmission tariffs committee (Richard Salant, CBS, chairman) meets Sept. 13 at N. Y.'s Waldorf-Astoria.

HOW THE 'MIX MASTERS' INCREASE PRICES: There's more than one way to raise TV prices -- and set makers are determining that changing the "mix" of their production, to permit greater concentration on higher-priced models, is just as effective as increasing list prices. Several are using both methods.

Current production statistics bear out this trend. Output of 24-in. models in Sept. shows 3-fold increase over Sept. 1954, while 17-in. output is substantially below year ago. Perhaps even more significant, there has been a marked upward trend to production of higher priced 21-in. sets -- even though the 21-in. category has shown no increase in share of total output in last 12 months, still remaining far-&-away the most popular screen size. Net result is that bargain shoppers looking for low-end sets find them unavailable -- or with higher price tags.

RCA and Philco, both industry pace-setters, have thus far preferred to alter their production "mix" rather than increase lists -- though both continue to hold the door open to direct price increases this year. Several others who haven't hiked prices yet are hoping to get by with fewer low-end receivers.

Motorola and DuMont increased prices this week -- joining Admiral, Emerson, Stromberg-Carlson, Packard-Bell, Trav-Ler and a few smaller firms which had raised them previously. Motorola's increases, predicted 2 weeks ago (Vol. 11:35), were \$10-\$30 on 13 models. DuMont's hikes, affecting all but the 24-in. de luxe console and 21-in. color set, averaged \$20 across-the-board. Both companies attributed the increases to higher labor and materials costs (details on p. 12).

* * * *

This looks like a record TV production & sales year -- with considerable talk now of output around 7,700,000. The record is 1950's 7,463,800. Philco pres. James H. Carmine, back from Europe, this week forecast production of 7,500,000-8,000,000. Motorola v.p. Edward R. Taylor predicted output around 7,700,000 -- "the biggest year in TV's exciting history." Another major manufacturer, who preferred not to be identified, said "TV can't miss a record this year."

National TV-Radio Week starting Sept. 18, a concentrated merchandising drive by all levels of trade, is expected to give retail sales a big shot in the arm and help assure a record retail sales year. Not that sales are doing badly anyway. The normal seasonal slumps this year were not nearly as severe as in past -- and Aug. sales were described as "just excellent" by one of trade's leading statisticians. He said the figures were still incomplete.

Brief highlights of other major trade developments this week:

* * * *

Economic Boom: A 3-part report on nation's economic prosperity was issued this week by Commerce Dept., showing new records in employment, personal income and construction. Here are highlights: (1) Employment reached record total of 65,488,000 in Aug., increase of 493,000 in month and 3,211,000 in year. Unemployment dropped to 2,237,000, decline of 234,000 in month and 1,008,000 in year. (2) Personal income soared to annual rate of \$304.5 billion in July, increase of \$3 billion over June and \$14.5 billion over July 1954. Most of increase was attributed to pay hike of Federal employes, though private industry payrolls were also higher by \$1 billion over year ago. (3) Construction in Aug. was at annual rate of \$41.7 billion, exceeding the \$37.6 billion for all of 1954, with new records set in building of homes, commercial offices and stores, schools, utilities and highways. (4) Average factory pay rose to \$77.11 a week in Aug., up 75¢ over July, on average 40.8-hour work week.

Whirlpool Merger: Forewarning of tougher competition in white goods was sounded this week by GE in anticipation of approval of Whirlpool-Seeger-RCA merger by stockholders Sept. 12. Story in GE News house organ said: "Competition in the major ap-

pliance business -- which is keener now than ever before, and tougher than in many industries -- is to get even hotter. During the past 2 months, two large mergers have taken place in the appliance industry that are sure to have their effect on the torrid race to capture the public's buying habit. The first of these mergers -- and the one that really rocked the industry -- linked together the Whirlpool, Seeger and RCA corporations into a single company that will be one of the biggest in the industry. The second merger combined Easy Washing Machine Co. with the Union Chemical & Materials Corp. Both mergers were brought about by pretty much the same idea -- the growing trend toward offering the public a complete line of appliances from a single source. The mergers will exert tremendous new influences in the appliance market. Both will undoubtedly affect the realignment of customer preferences. Both will bring added economic pressure to bear on the present manufacturers whose quality, style or price is not in line with consumer expectations."

Fair Trade: Big slash in Westinghouse prices by several dept. stores followed company's action last week in abandoning fair trade pricing (Vol. 11:36). Big stores in Chicago advertised 25% reductions in Westinghouse small appliances -- and similar cuts were announced in other metropolitan centers. Discount houses were said to be meeting competition with even sharper price reductions. GE and Sunbeam are only big manufacturers still practicing fair trade -- and they insist they'll keep battling.

Production: TV output totaled 185,114 week ended Sept. 2, compared to 167,471 preceding week and 180,094 week ended Aug. 19. It was year's 35th week (8 months by RETMA calculations) and brought TV output for year to date to about 5,000,000 vs. 4,100,000 in same 1954 period. Radio production totaled 226,774 (71,147 auto) week ended Sept. 2, down from 239,401 preceding week and 255,855 week before. For 35 weeks, radio output totaled 8,950,000 vs. 7,000,000 in corresponding period of 1954. Another RETMA report, released this week, placed official TV production for 7 months at 4,173,088, of which 63,466 were uhf-equipped at factory. Radio output for same period was 7,777,378, including 718,489 in July.

Topics & Trends of TV Trade: Those TV-radio merchandising rules adopted recently by Federal Trade Commission (Vol. 11:27) are still causing some grumbling in trade--particularly among manufacturers--despite fact that they were based on 4 years of tortuous industry-wide hearings. Indicating set makers' agitation, RETMA is preparing full-dress review of rules at its fall meetings in New York's Plaza Hotel Sept. 13-15, with possibility that a new appeal will be made to FTC for revision of requirement that all used picture tubes must be designated as "seconds" or "rejects."

It's known that FTC staff was split on question of whether used tubes should be so designated. FTC attorney H. Paul Butz, who conducted lengthy public hearings and visited tube plants, reportedly recommended against such designation but was overruled by higher authorities. Feeling of some in RETMA hierarchy is that appeal might prove successful, considering the split. FTC has already rejected an earlier RETMA appeal to make all rules effective Feb. 1. The rules relating to picture tube designation, disclosure of cabinet finishes and measurement of tubes are effective Feb. 1; all others went into effect Aug. 1.

Dealers generally report they're living with rules, noting little inconvenience. NARDA managing director A. W. Bernsohn said "we have heard of no violations or complaints of violations. I don't believe anybody's been hurt by the rules--so far, at least."

* * * *

RCA Service Co. opens new facility at 419 W. 54th St., N. Y., Monday for repair, modification or overhaul of all RCA commercial & industrial electronic equipment, under management of J. J. Brown.

Hallcrafters Canada Ltd. introduces 9 TV models ranging from \$190 for 17-in. table to \$530 for 3-way combination.

TV set sales by Canadian factories in first 7 months totaled 273,512, production 362,852, reports RETMA of Canada. This compares with 207,724 & 225,869 in same 1954 period. Projected production estimate for Aug.-Nov. period is 263,371 more sets. July sales totaled 27,595 at average price of \$304, production 25,483. Inventory at end of July was 137,224 vs. 139,336 at start of month. Montreal led in 7-month sales with 49,915; Toronto, 43,735; British Columbia, 28,055; other Ontario, 23,355; Manitoba, 22,609; Nova Scotia, 18,140; Alberta, 17,028; Ottawa & eastern Ontario, 15,072; Quebec, 13,071; Hamilton-Niagara, 13,011; New Brunswick & Prince Edward Island, 10,144; Saskatchewan, 7804; Windsor, 7317; Newfoundland, 2688; other Quebec areas, 1568.

Six-point TV-radio ad code was adopted by group of leading Philadelphia distributors and dealers, acting as advisory committee of local Better Business Bureau. New code will be publicized by BBB in newspaper ads urging consumers to be cautious when TV set is advertised at "a ridiculously low price." Verner S. Gaggin, gen. mgr. of local BBB, which will enforce code, said 120,000 complaints and inquiries about appliances had been received from area consumers in last 12 months. Co-chairmen of committee are Jack Rosen, v.p. of Raymond Rosen & Co., RCA distributor, and W. G. Peirce, pres. of Peirce-Phelps, Admiral distributor.

Canadian TV-radio manufacturers exhibiting at Canadian National Exhibition last week in Toronto: Admiral, GE, Marconi, Westinghouse, Avco of Canada (Crosley), Dominion Electrohome, Emerson Radio, Hallcrafters, Motorola, Northern Electric, Philco, Philips Industries, RCA Victor, Sparton, Stewart-Warner, Sylvania.

RCA's TV div. holds quarterly meeting with field reps Sept. 12-15 at Philadelphia's Warwick Hotel to discuss 4th quarter merchandising and promotion plans.

Trade Personals: Brig. Gen. David Sarnoff will be given "Applause" award of N. Y. Sales Executives Club Sept. 13 at Hotel Roosevelt luncheon, to be highlighted by "The David Sarnoff Story," dramatic presentation prepared by editors of *Life Magazine*; he addresses Washington Ad Club Sept. 20 . . . Robert A. Seidel, RCA exec. v.p. for consumer products, left Sept. 9 for 6-week inspection of RCA facilities in Europe . . . James H. Carmine, Philco pres., who returned Sept. 8 from European tour, addresses seminar of Washington chapter of American Marketing Assn. Oct. 25 . . . Burton B. Stuart, New England district mgr., Raytheon equipment marketing div., promoted to product planning mgr. of industrial sales dept. . . . Paul A. Ryan, ex-Product Presentation Inc., named Capehart-Farnsworth sales planning mgr. . . . Eugene MacNaboe promoted to mgr. administrative services, DuMont receiver sales div., succeeding Joseph Mann, now asst. controller, Fedders-Quigan . . . Paul L. Harvey named Federal Radio export sales mgr. . . . Ben H. Irwin promoted to director of Arvin's new research & advanced engineering dept., succeeded as director of electronics engineering by Eugene C. Hittle; Weldon L. Payne, sales mgr. of radio div., promoted to western sales mgr. of electronics & appliances div., Craig C. Britton to eastern sales mgr.; Richard H. Williams, from electric housewares div., named sales director of electronics & appliances . . . R. C. Jenkins, ex-RCA, named gen. mgr. of Sylvania TV-radio cabinet div., High Point, N. C. . . . Edward Taylor, ex-Electric Sales & Service Co., Atlanta, named Bendix Radio southeastern regional mgr., succeeding Paul McLaughlin, now mgr. northeastern region . . . John F. Conger named Capehart-Farnsworth Denver district merchandising mgr. . . . Donald E. Vedder, sales training mgr., Sylvania TV-radio div., named Kansas City district sales mgr. . . . Robert W. Felber, ex-Stewart-Warner, named mgr. of new community TV div., American Phenolic . . . John S. Kane, mgr. of International Resistance Co. plant at Boone, N. C., transferred to mgr. of Asheville plant . . . Norman M. Howden, ex-Rochester Democrat & Chronicle, named asst. public relations director, Stromberg-Carlson.

Glen McDaniel, RETMA gen. counsel, reappointed chairman of legal committee; H. J. Hoffman, Machlett Labs, renamed head of membership & scope committee. Robert C. Sprague Jr., Sprague Electric, was reappointed chairman of RETMA industrial relations dept., with Harry Houston, DuMont, as chairman of its eastern committee; Jack M. Ferren, Zenith Radio, central; Paul G. Kaponya, Cannon Electric, western.

What makes a TV line attractive to a dealer? NARDA surveyed its membership on question, got these requirements: (1) public acceptance of brand; (2) freedom from excessive or unsavory competition; (3) quality merchandise requiring minimum service; (4) discount structure that allows a reasonable profit; (5) good factory service policies; (6) good distributor-dealer relations (with tight controls on "back-door selling"); (7) strong promotions and sales training.

DuMont raised prices on all models in its line except 24-in. de luxe console and 21-in. color set. Each set was raised by \$20, except one 21-in. table model (raised \$10 from \$200 to \$210) and one 24-in. open-face console (raised \$30 from \$300 to \$330). New prices range from \$190 for 21-in. ebony table to \$360 for 21-in. de luxe limed oak open-face console.

Motorola's price increases (see p. 10) were on 13 models: two 21-in. tables and four 21-in. consoles, up \$10; one 24-in. table and two 21-in. consoles, up \$20; one 24-in. console, up \$25; one 21-in. console and two 24-in. consoles, up \$30.

DISTRIBUTOR NOTES: Sylvania appoints Washington Wholesalers, 2052 W. Va. Ave. NE, Washington (Milo Chavez, gen. mgr.) . . . Emerson Radio of Texas, Dallas, opens branch at 605 S. Flores St., San Antonio . . . Bendix Radio appoints John W. Walter Inc., Long Island City, N. Y. . . . RCA Victor Distributing Corp., Detroit, appoints Reid Donaldson sales mgr. for home instruments, succeeding George Mansour, now with record div. of RCA Victor Co. Ltd., Montreal . . . G. W. Onthank Co., Des Moines (Admiral) appoints Frank A. Hutton sales promotion mgr. . . . Victor H. Meyer Distributing Corp., N. Y. (Sylvania) appoints Sol Feir, ex-DuMont N. Y., as key account sales rep . . . GE Supply Co., Cincinnati, reports resignation of sales mgr. Norbert Foster . . . Canadian Westinghouse Supply Co. appoints A. McGruther sales mgr. of Alberta district, J. A. Comeau for Calgary . . . Lehigh Valley Distributors, Hazleton (Capehart-Farnsworth) takes on 11 additional northeast Pa. counties to bring distribution to 35.

Picture tube sales in first 7 months totaled 5,429,817, valued at \$104,391,728, compared to 4,471,584 worth \$93,088,884 in corresponding period of 1954, reports RETMA. July sales were 515,793 worth \$9,498,169, compared to 706,890 at \$13,244,499 in 5-week June and 514,346 at \$10,102,903 in July 1954. Receiving tube sales in first 7 months totaled 254,842,000, valued at \$189,849,000, compared to 189,856,000 worth \$138,670,000 in first 7 months of 1954. July sales were 28,340,000 at \$21,167,000 vs. 40,821,000 at \$31,256,000 in June and 24,146,012 at \$17,949,210 in July 1954.

Westinghouse TV-radio output was halted by strike of 2100 IUE workers at Metuchen, N. J. plant, who walked off jobs Sept. 8 in sympathy with month-long strike of IUE members at company's E. Pittsburgh plant. Union officials said all Westinghouse plants would be shut down by next week. Meanwhile, strike at Bendix Radio plant in Baltimore, an outgrowth of walkout at parent Bendix Aviation, went into its 3rd week as we went to press, with no settlement in sight.

More than 1,000,000 old tubes have been smashed in the 3 weeks since Philco launched its drive to keep old tubes out of hands of racketeers by allowing 5¢ credit on each old tube turned in (Vol. 11:33-34), reports James J. Shallow, gen. mgr. of accessory div., saying cooperation of its distributors and dealers has been "unanimous."

Facts & figures on the \$9 billion electronics industry, together with charts, graphs and tables delineating TV, radio and component production, employment, etc., are featured in new 26-p. *Radio-TV-Electronics Industry Fact Book* just published by RETMA and available upon request at 777 14th St., NW, Washington.

Big increase in 24-in. sales next year is foreseen by Westinghouse's Dan Halpin, telling group of Memphis dealers and servicemen Sept. 10 that 24-in. "easily could represent 20% of the industry's total unit sales in 1956." He also predicted sale of 350,000 color sets next year, representing \$250,000,000.

Motorola v.p. Edward R. Taylor is profiled in Sept. 10 *Tide Magazine*, which credits him with revitalizing company's distributor-dealer structure as key to raising sales from \$205,000,000 last year to estimated \$225,000,000 in 1955.

Kay Labs' "Videophone," 2-way TV telephone, was demonstrated over one-mile link at recent WESCON show in San Francisco, with mayors of San Francisco and Palo Alto at each end of line.

Sparton's new "Royal Scot" line of 5 TVs, introduced last week at Jackson, Mich., plant, consists of 21-in. mahogany table at \$250, 21-in. consoles at \$340 & \$350, 24-in. consoles at \$360 & \$370.

Financial & Trade Notes: Among officers' & directors' stock transactions reported by SEC for July: Ernest L. Nye bought 225 ACF Industries, holds 825; Wm. F. Van Deventer bought 225 ACF, holds 425; E. Chester Gersten bought 500 American Broadcasting-Paramount Theatres, holds 500; Robert E. Kintner bought 500 AB-PT, holds 3500; George D. Macbeth sold 2000 Corning Glass, holds 18,000; Benjamin Abrams bought 500 Emerson Radio, holds 220,000 personally and 79,639 thru trusts; Louis G. Pacent Jr. bought 300 Emerson Radio, holds 300; Henry V. Erben sold 200 GE, holds 9605; Henry Ford II bought 100 GE, holds 100; C. J. Hendon bought 1125 GE, holds 2415; Wm. R. Herod bought 1638 GE, holds 6576; George L. Irvine sold 389 GE, holds 1048; Cramer W. LaPierre bought 1695 GE, holds 4093; Wm. C. Wichman sold 1000 GE, holds 997; Elliott V. Bell sold 200 General Precision Equipment, holds 100; Frederick D. Herbert Jr. bought 8249 General Precision Equipment, holds 19,602; John Slezak bought 100 Hazeltine, holds 110; Joseph S. McGee sold 250 Hoffman Electronics, holds 250; Charles A. Maynard bought 100 Indiana Steel Products, holds 1110; Frank M. Freimann bought 300 Magnavox, holds 49,685; Robert W. Galvin sold 300 Motorola, holds 156,257 personally and 186,696 thru trust; Edward R. Taylor bought 300 Motorola, holds 2460; Ely A. Landau bought 200 National Telefilm Assoc., holds 80,450 personally and 20,000 as voting trustee; Thomas A. Kennally bought 4987 Philco, holds 11,984; Emanuel Sacks bought 100 RCA, holds 545; George L. Langreth bought 200 Raytheon, holds 300; Kurt Widder sold 200 Skiatron, holds 11,750; George B. Storer bought 500 Storer Bcstg. Co. common, holds 14,640 common and 1,486,500 Class "B" common; Milton R. Schulte bought 500 Tung-Sol, holds 2945; Jean E. Witbeck bought 200 Tung-Sol, holds 3251.

Atomic Development Mutual Fund Inc., Washington, D. C., open-end diversified management investment company specializing in atomic securities, including a number of electronic stocks (Vol. 11:15), lists net assets of \$44,512,375, or \$14.37 a share, as of June 30, compared to net assets of \$19,854,643 (\$13.91) on March 1. In existence since Dec. 14, 1953, Fund's portfolio of June 30 shows that during preceding 5 months it added 29,400 shares of General Dynamics at market value of \$1,738,275 and 3300 Daystrom at \$99,000. It also added to holdings in Sylvania, GE, Westinghouse, Philips (of Holland), ACF Industries, General Precision Equipment, Blaw-Knox, Abbott Laboratories, Atomic Instrument Co., Beckman Instrument, Consolidated Engineering, Norden-Ketay, Nuclear Instrument & Chemical Corp., Tracerlab Inc. Dropped during 5-month period were Panellit Inc. and Victoreen Instrument Co.

RCA is appraised as "the leading unit in one of the fastest growing segments of our economy," in 6-p. analysis by Wm. Kurtz, of Paine, Webber, Jackson & Curtis, 25 Broad St., N. Y. For long term, RCA earning power is seen rising to \$7 per share by 1960. "Near-term developments," report says, "such as large scale promotion of color TV and possible introduction of commercial electronic computers should focus investor attention on this issue over the next few months." Note: Report on RCA last week (Vol. 11:36) should be corrected to indicate that RCA's capitalization is \$150,000,000, preferred dividend \$3.50 per share; net working capital, not assets, was \$234,865,104 at end of 1954.

Telecaster Edward Lamb's grants, totaling \$10,000 since 1950, have been parlayed into stocks worth \$12,260 by students of Gannon College, Erie, Pa., for whom Lamb had established fund to give "practical experience" in stock market.

"Stockholder census" in recent *Forbes Magazine* shows electronics-communications firms widely held, but with only GE and Raytheon showing any appreciable gains in number of share owners between 1953 & 1954 and even RCA, called "favorite of small investors," ending 1954 with fewer stockholders than at start of year. DuMont & CBS also declined numerically. Following are culled from categories headed communications and electrical equipment & electronics (figures in parentheses denoting total assets in millions of dollars):

	1954	1953	% Change
AT&T (12,849.6) -----	1,307,215	1,265,461	+ 3.3
General Electric (1,692) -----	295,945	246,467	+22.3
Westinghouse (1,329) ---	111,107	111,424	- 0.3
IT&T (637) -----	56,937	57,437	- 0.9
RCA (548.3) -----	172,551	177,199	- 2.6
Avco Mfg. (200.9) -----	61,462	65,994	- 6.9
Sylvania (191.4) -----	29,026	28,270	+ 2.7
CBS (169.3) -----	15,276	16,327	- 6.4
Philco (164.6) -----	17,909	17,478	+ 2.5
Admiral (109.1) -----	5,279	5,546	- 4.8
Motorola (94.5) -----	4,381	4,606	- 4.9
Raytheon Mfg. (93.6) ----	9,063	8,433	+ 7.5
DuMont Labs (63.3) ----	12,095	14,102	-14.2

Television-Electronics Fund has become first single industry "open-end" or mutual investment program to pass \$100 million mark, Sept. 7 *N. Y. Times* reported in article on mutual funds. Starting with assets of \$112,000 about 8 years ago, fund has ballooned past \$112,000,000. In allied field of nuclear energy, Atomic Development Mutual Fund Inc. has had even more spectacular growth—from \$2,226,997 to \$44,512,375 in 12 months, with shares increasing from 204,613 to 3,096,829.

Film exhibitors are doing well, generally, reports *Variety*, with first-run and the more important neighborhood houses showing marked upturn in boxoffice since about July 4. United Paramount's 650-theatre chain is having third quarter slightly better than year ago, and conviction prevails "people will stay at home for TV only if program is above routine." Movie business also is benefiting from lower excise taxes, exhibitors having absorbed recent Treasury decrease.

Philco is touted as investment by broker Talmage & Co., its Aug. 31 report saying "further recovery is looked for in this stock, reflecting the prospects for a return of its former rating as a growth stock, and in prospect of larger earnings soon." It adds: "Philco's research work on color TV may place it in a leading position when the public demand for color sets reaches large proportions."

Raytheon will offer stock to officers & other key employees as part of "Key Employee Incentive Plan," under terms of statement filed with SEC last week seeking registration of 189,165 shares of \$5 par common stock. Of total, 20,800 shares have been purchased by optionees, 117,965 are held under option, and 50,400 are reserved for option.

General Precision Equipment Co. reports consolidated net sales of \$70,238,745 for first half of 1955 vs. \$54,305,196 for same period 1954. Net profit went down to \$1.95 per share (1,022,882 shares) from \$3.37 (700,352), reports chairman-pres. H. G. Place. Unfilled orders as of June 30 totaled \$105,230,000.

American Phenolic Corp. earned \$442,984, or \$1.11 a share, on sales of \$11,821,191 in first 6 months of 1955, compared to \$252,277 (63¢) on \$12,465,721 in corresponding period year ago. Second-quarter earnings were \$238,533 (60¢) on sales of \$5,814,948 vs. \$204,451 (51¢) on \$6,006,243.

Electronics Reports: Search for new civilian markets by electronics manufacturers, now that military demand is not growing so rapidly, is subject of long discussion by Ben Weberman in New York *Journal of Commerce* which observes that "the instrumentation and servomechanisms branches of the industry are now breaking through the barrier which has confined most output to military devices" and states "growth of industrial lines is expected to be at a sensational pace."

Julian K. Sprague, pres. of Sprague Electric Co., is quoted as estimating that industrial control and instrumentation was a \$200,000,000 business in 1954, half of it for laboratory or special purpose use, half for true production control devices. Comparing electronic expenditures with estimated \$1 billion spent last year for other kinds of controls—mechanical, electrical, pneumatic, hydraulic—Sprague said: "It is apparent we have only just scratched the surface in this field."

J. G. Shennan, pres. of Elgin National Watch Co., which recently went into electronics, said automatic production instrument field alone has shown 21% annual rate of growth and pre-tax return of 40% on investment. United Shoe Machinery Co. and Admiral Corp. are mentioned for their automation developments; also discussed are Airborne Instruments Laboratory Inc.'s electronic analyzer, which checks gears emerging from a gear grinder; Belock Instrument Corp.'s electrically operated gear grinder; Giddings & Lewis Machine Tool Co.'s "Numericord" system whereby work cycles are controlled by magnetic tape.

* * * *

Special 24-p. report on mechanized production of electronic equipment, by assoc. editor John Markus, is featured in Sept. *Electronics Magazine*. Editor W. W. MacDonald states: "Now the electronics industry has made up its mind about mechanized production with sufficient unanimity to get going. It has finally concluded that regardless of product, or size of run, some sort of mechanization more closely approaching a pushbutton age is necessary." Report is in 5 parts, covering etched wiring, component preparation, machine assembly, dip soldering, automatic testing.

Automation will increase employment, H. L. Hoffman, pres. of Hoffman Electronics and RETMA pres., predicted at recent WESCON show in San Francisco, noting that "actually, the electronics industry has been manufacturing such components as TV picture tubes, capacitors and resistors by automation techniques for nearly a decade." During that time electronics employment increased 2½ times and TV-radio set prices have gone down.

GE's "Ham of the Year" nominations are open in annual search for amateur who rendered greatest public service in 1955. Letters of nomination will be accepted until end of year by Edison Award Committee Secretary, GE Tube Dept., Schenectady, N. Y.

Reo Holding Corp. has called special stockholders meeting Sept. 28 in New York to vote on proposed merger with Nuclear Consultants Inc., St. Louis, to form new corporation to be known as Nuclear Corp. of America, specializing in atomic energy and electronics fields. New company's board would include present 6 directors of Reo, plus pres. Sam Norris of Ampere Electronic Corp., accountant Herman P. Edelman and another to be named.

Clarostat Mfg. Co. profit was \$69,046 (17¢ a share) on sales of \$3,009,328 in first 6 months vs. \$68,182 (16¢) on \$2,819,151 in same 1954 period.

Aircraft Radio Corp. sales were \$3,860,377 in first half of 1955 vs. \$4,488,749 in same 1954 period; net income was \$214,469 (\$1.02 per share) vs. \$316,080 (\$1.13).

Panellit Inc., Chicago, is setting up English affiliate to be called Panellit Ltd., half owned by itself and half by Hall Telephone Accessories through subsidiary James Gordon & Co. Hall is leader in Britain's automatic vending field and, according to its chairman, Maj. Oscar Guest, wants to increase participation in the "rapidly growing field of automation, electronics and instrumentation." Hall manufactures machines for Coca-Cola, Gordon makes automatic controls for Esso, Vauxhall, et al.

Simplified closed-circuit TV system is claimed by Siegler Corp., Centralia, Ill. space heater manufacturer which recently acquired Hallamore Mfg. Co., Long Beach, Cal., maker of electronics and communications devices. Siegler did \$10,471,144 business in year ending June 30, earned \$774,571 (\$1.53 per share) and Hallamore div., hitherto heavily in defense, plans to expand commercial production, particularly scintillometers & geiger counters.

New ceramic receiving tube has been developed by Eitel-McCullough Inc., San Bruno, Cal., under Air Force sponsorship. Revolutionary in design, it is less than one-fourth the size of the glass 6SN7, which it replaces, is said to be 20 times as rugged and, due to high life expectancy, can be soldered directly into circuit. Company says it can be priced competitively with glass tubes when in mass production. First production is due early next year.

Upcoming IRE meetings: Professional Group on Vehicular Communications, Sept. 26-27, Multnomah Hotel, Portland, Ore.; East Coast Conference on Aeronautical & Navigational Electronics, Oct. 31-Nov. 1, Emerson & Lord Baltimore Hotels, Baltimore. In Portland, FCC Comr. Robert E. Lee will speak at banquet, while FCC chief engineer Edward W. Allen will deliver paper on propagation in 30-50 mc band.

Electronic aircraft detector to help spot low-flying enemy planes has been developed by Air Research & Development Command Center, Rome, N. Y. Mounted on hard plastic hats worn by ground spotters, device has small antenna, topped by horizontal cylinder. Short "rabbit ear" sticks out in back and volume control clips to wearer's lapel.

Electronic Associates Inc., Long Branch, N. J., which earned \$244,600 profit in 1954, or approximately \$1 on each of its 245,000 common stock capitalization, should earn \$400,000 this year on revenues of \$6,000,000, according to report by McDonnell & Co., N. Y. investment firm. Its specialty is analog computers.

Electronic typewriter capable of 36,000 characters a minute, employing magnetic core memory storage unit, has been developed by Potter Instrument Co., 115 Cutter Mill Rd., Great Neck, L. I.

IT&T plans first west coast manufacturing operation for its Federal Telephone & Radio Co., with 36,000-sq. ft. plant in San Fernando Valley projected as first part of \$2,500,000 building plan.

Emerson Radio earned \$1,584,812 (82¢ per share) after taxes for 9 months ended July 30 vs. \$1,146,676 (59¢) in same 1954 period. Profit before taxes was \$3,205,948 vs. \$2,066,820. Sales were not disclosed; 1954 sales for same period were \$54,701,441.

National Co. had net loss of \$88,405 on sales of \$2,332,746 in first half of 1955, compared to profit of \$267,379 (\$1 a share) on \$4,640,119 in first half of 1954. Pres. Joseph Quick attributed loss to sharp curtailing of defense billings, predicted improvement in second half.

20th Century-Fox had net income of \$2,790,800 (\$1.06 a share) in 26 weeks ended June 25 vs. \$3,096,545 (\$1.17) in like 1954 period. Second quarter earnings were \$1,366,989 (52¢) vs. \$1,048,515 (40¢).

Color Trends & Briefs: RCA captured one military prize in competition with CBS-GE over govt. contracts for color equipment (Vol. 11:4)—selling \$425,800 three-channel system and 30 sets to be installed in Washington at Walter Reed Hospital, Armed Forces Institute of Pathology and Army Medical Service Graduate School.

Maj. Gen. Leonard D. Heaton, commander of Walter Reed Medical Center, said installation will be made next year and eventually extended to other govt. hospitals and military medical installations—to be used for consultation, teaching and research.

* * * *

Further disclosing color plans, CBS-TV announced that all *Climax* and *Red Skelton* shows will be in color—making total of 73 major color programs scheduled to date, vs. 19 last year. Previously set for color were *Shower of Stars*, *Ford Star Jubilee*, most *Omnibus* programs, plus Orson Welles series. Still to be announced, among others, is series of daytime color shows.

Network color schedules for next 2 weeks: NBC-TV—Sept. 12-16 & 19-23, *Home* segments, 11:45-noon, and *Howdy Doody*, 5:30-6 p.m.; Sept. 17, NCAA football game, Miami vs. Ga. Tech, 3:30-6 p.m.; Sept. 19, *Producers' Showcase*, "Our Town," starring Frank Sinatra, Eva Marie Saint & Paul Newman, 8-9:30 p.m. CBS-TV—Sept. 24, *Ford Star Jubilee*, starring Judy Garland & David Wayne, 9:30-11 p.m.

Six major musical comedies will be colorcast in NBC-TV's *Max Liebman Presents* series starting Oct. 1, Sat. 9-10:30 p.m., with first production a musical version of "Heidi." "Great Waltz" is scheduled for Nov. 5; "Dearest Enemy," Nov. 26; "Babes in Toyland," Dec. 24; "The Cat and the Fiddle," Feb. 18; "Sweethearts," March 17. Two more will be announced later.

Contest promoting "Our Town," to be colorcast by NBC-TV on *Producers' Showcase* Sept. 19, 8-9:30 p.m., offers Mercury station wagon or Ford Thunderbird for best letter on "Why I Like to Live in Our Town." Newspaper readers are asked to send entries to designated TV editors, and RCA "Seville" color receiver will be given editor whose reader wins.

British have novel technique for showing viewers whether poor reception of signal from Norwich station is due to receiver or to quality of off-air pickup from London station. When signal is usable but below satisfactory quality, a white bar is telecast for 2 seconds every 3 min., superimposed on program.

Raytheon to build lab at White Sands Proving Grounds, Las Cruces, N. M., to test and evaluate electronic equipment for Army ordnance. Lab is being integrated with Raytheon's guided missile test facilities at Pt. Mugu, Cal., managed by J. H. Leiper.

Dr. David B. Parkinson, mgr. of design & production engineering, and John H. Harris, director of manufacturing production control, elected v.p.'s of Brush Electronics Co. (Clevite).

William H. Martin, who retired at end of 1953 as Bell Labs v.p. to become deputy Asst. Secretary of Defense, on Sept. 1 became Army's director of research & development.

S. B. Withington, Avco v.p. & pres. of its Lycoming div., named gen. mgr. of newly formed advance development div., with labs at Everett, Mass. and Stratford, Conn.

Rear Adm. Arthur S. Born, USN Ret., joins Collins Radio as asst. to v.p. for research & development.

John B. Gray, ex-Hughes Aircraft, named chief engineer, Berlant Instruments, Los Angeles.

Following lead of NBC's WRCA-TV, N. Y. and WNBQ, Chicago (Vol. 11:26), Milwaukee's WTMJ-TV has informed sponsors that all station breaks adjacent to or within regular color programs must convert to color by next July 1 or risk losing positions. Station has also started daily color 3-3:30 p.m. *Women's World*, which with *NBC Matinee Theatre* and *Howdy Doody* gives it 2 hours of color each afternoon.

DuMont Vitascan closed-circuit demonstrations at Gimbel's, N. Y. (Vol. 11:21, 33) were huge success, reports store, which says they stimulated "impulse buying"—particularly of high-priced goods not ordinarily bought on impulse. Other stores are said to be interested trying system.

Power consumption of typical color set, RCA 21-in., is 525 watts—compared with 280 watts for average black-&-white set (Vol. 11:35). That means annual power bill of about \$20 a year, assuming it's turned on average of 35 hours weekly for color and/or black-&-white.

For paper on "CBS Color TV Staging & Lighting Practices," Richard S. O'Brien, CBS senior project engineer, has won 1955 Journal Award of Society of Motion Picture & Television Engineers, to be presented at convention in Lake Placid Club Oct. 4.

Color mobile units, 72-ft. long, to be used by both NBC and CBS in New York, are expected to get special parking privileges. Network officials told city authorities units are needed to supplement color studio facilities.

Color manual for servicemen, a 36-p. supplement to its *Practical Color TV for the Service Industry*, has been issued by RCA Service Co., Camden. It's devoted primarily to details of new RCA models 21CT661 & 21CT662.

Seeking single color standard for all Europe, as well as single black-&-white standard in uhf, CCIR Study Group 11 of International Telecommunications Union is expected to visit U. S. next year.

Fully equipped for color now—network, local live, film and slide—KMTV, Omaha announces it's 15th in the nation so prepared.

Claiming a "first," School of Radio Technique, N. Y., is installing RCA's TK-41 color camera equipment for closed-circuit use.

American Electronics Inc. acquires R-C Scientific Instrument Co., Playa del Rey, Cal., by exchanging 13,500 shares of its common stock for all of R-C assets; it will be operated as subsidiary under name of Reed-Curtis Nuclear Industries.

Philco's Lansdale Tube & Transistor Co. has purchased 80,000-sq. ft. plant of Apex Hosiery Co., Spring City, Pa., to be used primarily for research and production of transistors.

"Transistor Specification Chart", 8-p. special section of Sept. *Tele-Tech Magazine*, shows technical characteristics of transistors, divides them into 5 categories according to use.

Roy J. Benecchi elected v.p. & gen. mgr. of Lear Inc. Grand Rapids div., succeeding Andrew F. Haiduck, now exec. v.p. in charge of manufacturing of Lear's 4 divisions.

Phaotron Co., Pasadena, Cal. plans to market new hermetically sealed transistor and vacuum-tube voltmeter as part of expansion in electronics fields.

Russell D. Gawne, ex-Crescent Industries, named sales mgr. of G-C Electronics Mfg. Co., new General Cement subsidiary.

Frank S. Schaumburg promoted to asst. sales mgr. of electronics div., Elgin National Watch Co.

Perry R. Roehm, engineering & sales v.p., named exec. v.p., Norden-Ketay Corp.

NARTB CODE REVIEW board hit back this week at Kefauver subcommittee's recent Interim Report recommending greater non-industry control over programming (Vol. 11:35). Following 2-day meeting in Washington, board chairman G. Richard Shafto, WIS-TV, Columbia, S. C., declared:

"Some of the conclusions in the Interim Report, we believe at first glance, are based upon the improper premise that a voluntary industry effort such as this should be—in a sense—'regulatory'. Such a thesis does not hold in other similar professional efforts—such as the American Bar Association, for example—and we do not believe it should apply in the broadcasting industry.

"Other Interim Report recommendations, however, are helpful in establishing guideposts for the board's activity and reflect the thoroughness with which the Committee studied the industry. At all events, we are grateful for such comment from the Congress, as we welcome it from citizen sources. Appraisal by the public and its representatives is, after all, the best index to continued program advances."

Shafto said board did not have sufficient time to make an intensive review of committee's recommendations and ordered Edward H. Bronson, director of code affairs, to prepare comprehensive report for code board's next meeting in Jan.

Board adopted new procedure for tightening code observance in film programming. In future, all code subscribers will be notified via advisories when films are found by NARTB staff to be "not consistent" with code and will be asked to review such films. Shafto said difficulty arises when suppliers distribute films produced before establishment of code and which were designed for theatres, not home viewing.

In another action, board directed staff to continue investigation of practice of promoting theatre attractions on commercially sponsored TV programs. Board noted "strong trend to insert promotional material, including actual filmed portions, of current Hollywood product in programs already utilizing the maximum allowable commercial time standards suggested within the TV code."

✓ "Lopsided concept of a licensee's responsibilities" was blasted by FCC Comr. Doerfer as he dissented from majority's grant of renewal to radio WTIW, New Orleans. Noting lack of religious, educational or discussion programs, Doerfer stated: "While the Commission is proscribed from exercising powers of censorship, it does have the duty to require a broadcast licensee to program in the public interest . . . The setting of minimum standards of program quality and overall program policies of a licensee is not censorship. On the contrary, it is a safeguard against the use of a broadcast frequency solely for personal considerations. In this case, the program format indicates the sole desire to use the station for the purpose of making every possible dollar that time on the air will permit." Doerfer backed up dissent by quoting Commission's famed "Blue Book"—its much-attacked *Public Service Responsibility of Broadcast Licensees*, issued in 1946.

✓ Children's TV shows are improving but still have long way to go, Philadelphia school board's 5-month survey of 3000 parents reveals. Many objected to casting of a parent, relative or teacher as "incredibly stupid" and majority were concerned over TV influence on behavior and attitudes of children. About 60% of parents said children were reading less but weren't able to pin it directly on TV.

High-tower compromise may be in the wind as joint TV-aviation-govt. study group (Vol. 11:3, 5) winds up 8-month study. Seven-member fact-finding subcommittee, named by CAA chairman Fred B. Lee and FCC Comr. Robert E. Lee, is due to report next week, with full group's final report considered likely following week. It's understood that military and aviation representatives on the committee have indicated they'll go along with proposals for towers as high as 2000 ft. if committee recommends regulations "with teeth" requiring antenna farms and multiple antenna towers be used wherever possible. Meanwhile, fact-finding group, together with 12 members of Air Coordinating Committee's ad hoc study group on tower marking and lighting, this week went to Louisville to observe WHAS-TV's experiments in new tower lighting systems.

Republican TV campaign will be repeat performance of 1952 tactics—scheduling speakers immediately following big-audience shows—party strategists disclosed this week after Washington conclave addressed by Carroll Newton, BBDO v.p. Earlier in week, Republican chairman Leonard Hall staged minor hassle with networks over "equal time" after ex-President Truman's Labor Day speech over NBC, CBS & ABC. Hall demanded party get chance to answer. ABC offered time, CBS refused and NBC said it "was considering it." By end of week, rhubarb apparently had reached cooling off stage.

Four applications for new TV stations were filed with FCC this week, bringing total pending to 155 (19 uhf). Week's applications: For Redding, Cal., Ch. 7, by KXOA, Sacramento; for Billings, Mont., Ch. 8, by KGHL; for Juneau, Alaska, Ch. 8, by Wm. J. Wagner, owner of KINY, Juneau, and 5 other Alaska AMs; for Lead, S. D., Ch. 8 (satellite), by KOTA-TV, Rapid City, S. D. [For details, see *TV Addenda 21-1* herewith; for complete listings of all grants, new stations, applications, etc., see *TV Factbook No. 21* with Addenda to date.]

San Francisco Seals baseball team has been purchased by S. H. Patterson, owner of KSAN-TV, San Francisco (Ch. 32), and son Norwood, subject to Pacific Coast League approval. Since start of broadcasting March 1, 1954, KSAN-TV has specialized in programming all Seals games and training activity and bills itself as the "Bay area's first & only sports station." Patterson will inherit bill of \$30,000 for back salaries, another \$30,000 owed league, \$19,000 tax bill, \$50,000 bank loan.

TV-radio's "Great Man" (Vol. 11:34), new book by Al Morgan (Dutton, 317 pp., \$3.50), is panned harshly in Sept. 9 column by Herald Tribune Syndicate's John Crosby, as a "dirty book" which misleads public in concept of industry. Crosby calls for honest story of TV-radio, saying: "The world of radio and television is a marvelously complex and intricate one, and God knows there is a good novel in it for the right guy. What is needed is an Arnold Bennett. Are there any around?"

FCC's detailed tables on network-station 1954 revenues and profits—filling out initial report (Vol. 11:25)—will be issued as they're prepared, starting in 2-3 weeks with table on metropolitan areas with 3 or more stations each.

All FCC commissioners will be guests of honor, along with Vice President Nixon, at Radio-TV Executives Society luncheon Sept. 14 in Roosevelt Hotel, N. Y. No Commission meetings will be held next week.

Annual outing of Federal Communications Bar Assn. is scheduled for Oct. 15. Locale is Lohnes farm in Vienna, Va., as usual—widow of attorney Horace Lohnes telling Assn. she'd be pleased to have outings continue there.

PUBLISHED WEEKLY BY RADIO NEWS BUREAU • WYATT BLDG. • WASHINGTON 5, D.C. • TELEPHONE STERLING 3-1755 • VOL. 11: No. 38

SUMMARY - INDEX OF THE WEEK'S NEWS — September 17, 1955

BIG 4 SELL 45% of TV sets: RCA, Philco, Admiral, Motorola. Runners-up are Zenith, GE, Emerson, Westinghouse. Outlook for the smaller manufacturers (p. 1).

TREND TO FREE BROADCASTING in Europe may be sparked by Britain's new independent TV, McConaughy says in summing up impressions of tour (p. 2).

REPUBLIC PICTURES agrees to formula for releasing 3-year-old features to TV, as 10 other movie firms prepare for trial in govt. films-to-TV suit (p. 3).

LONDON COMMERCIAL service starts Sept. 22, other ITA stations to be completed early next year; Warner Bros. has interest in new program contractor (p. 5).

OVER-ALL ALLOCATIONS review predicted by FCC chairman, beginning early next month, as Commission maps out tough schedule for fall-winter (p. 5).

CBS "SEGMENTATION" PLAN disclosed to radio affiliates, breaking up evening programs into 5-min. sales units at \$2100 each; 17 already sold (p. 6).

SATELLITE OPENS UP new So. Dakota market—KDLO-TV, Florence (Ch. 3). Mexico's 7th station, Monterrey's XHNL-TV (Ch. 10) begins operation (p. 8).

HIGH-TOWER CONTROVERSY seen near end as members of industry-govt. study groups reach informal agreements on tower marking and height problems (p. 9).

OUTPUT OF 8,200,000 TVs, retail sales of 8,000,000 forecast for record 1955 by RETMA pres. H. L. Hoffman. The "whys" of boom business (p. 10).

AUTO-PHONO AND RECORD package, called "Highway Hi-Fi," produced by CBS-Columbia for optional equipment in Chrysler's 1956 auto line (p. 12).

WAR ON TUBE RACKETEERS now industry-wide—Sylvania, RCA, GE and others joining Philco in fight to smash \$100,000,000 bilking of public (p. 13).

ELECTRONICS BOOM rescuing New England from industrial oblivion; area garners 15% of business, 50,000 displaced workers finding new jobs (p. 13).

APPRAISAL OF ADMIRAL bullish despite loss of defense business; Glore, Forgan & Co. compares sales growth and pre-tax profit margins of selected majors (p. 14).

3-V INDUSTRIAL COLOR TV demonstrated by RCA, which will market it next year; closed-circuit TV seen founding "University of the World" (p. 15).

REPORTS ON TV SPOT advertiser expenditures, by companies & brands, from TvB starting with last 1955 quarter; advance estimate \$275,000,000 (p. 16).

NETWORK BILLINGS dip to 12-month low in July—but PIB report shows TV aggregates \$227,172,548 for 7 months, radio \$69,976,389 (p. 16).

TOP 4 OF TOP 20 DOMINATE TV SET MAKING: As in the automotive field, a handful of companies dominates TV production and sales -- though the proportions are quite different. Whereas the Big 3 (General Motors, Ford, Chrysler) account for 95% of automobile output, the Big 4 of TV (RCA, Philco, Admiral, Motorola) combine to represent about 45%. Remainder is shared by 60-odd other companies (see TV Factbook No. 21).

The 4 top TV manufacturers rank in that order, too, with RCA accounting for about 18% of sales during most of last year and 1955, Philco about 11%, Admiral slightly more than 8%, Motorola just under 8%. Their percentages of sets-in-use, meaning their share of the 35,000,000 or more in the hands of the public, vary somewhat from those figures because Philco and Admiral at one time claimed to be making and selling about the same number of sets as RCA.

Foregoing figures are from a highly competent source, and they seem to jibe with findings of the "1955 Consolidated Consumer Analysis" covering 20 markets (Vol. 11:21). This source says runners-up are Zenith, GE, Emerson, Westinghouse -- without divulging percentages. Nobody else is credited with as much as 3% of the market.

And after the foregoing 8, next top dozen (not necessarily in this order) are said to be DuMont, Crosley, Silvertone (Sears Roebuck), Magnavox, Sylvania, Capehart-Farnsworth, Muntz, Hallicrafters, Hoffman, Packard-Bell, Stromberg-Carlson, Olympic.

* * * *

What's happening in the manufacturing industry, actually, is that the big are getting bigger -- competing like blazes with one another -- while the smaller fellows are finding it next to impossible to catch up. Their share of the market is at best fractional, and it has long been thought many would be squeezed out.

But fewer economic casualties have occurred than you might expect. Aside from Tele-tone, which rode high in TV's early days but went under, all of the top dozen or so set-making pioneers are still in business. Recently, Muntz, Majestic, Transvision, Regal, Shaw, Kaye-Halbert, Fada, Trad and a few others have been in and out of bankruptcy courts -- but several of these are still producing.

Two companies quit TV production in last 12 months, neither one due to economic difficulty. Arvin dropped TV output in favor of concentrating on radios, particularly auto radios (Vol. 11:13). Stewart-Warner quit TV-radio fields in U.S. but kept at them in Canada (Vol. 10:52). Neither was a major TV producer.

* * * *

We asked some of the middle and smaller producers recently how they appraised their present positions and future prospects. One of the most pertinent replies was that of Raymond W. Durst, pres. of Hallicrafters, now heavily in private label:

"We're riding on a hard circuit in TV in competing with the majors. The pressures and resources of the big boys are hard to cope with. But we can survive. We just need to adjust our sights and put heavier reliance on diversification. We go into high fidelity, govt. products, communications equipment, and just hold on to our small share of the TV market. I'll summarize by saying this: The situation gets harder all the time; it looks difficult but it is far from hopeless."

Raytheon has also gone in more heavily for private label business, and all who can are expanding their govt. business. Harold Shevers, pres. of Gotham Television Corp., which makes Hyde Park brand for Macy's, said "the outlook for the smaller manufacturer lies in specialties." Leslie W. Roberts, pres. of Philharmonic, which makes AMC, May Co., Allied, ISE brands, said "the smaller TV manufacturer can exist only through proper diversification, otherwise the outlook is dim."

"In private label," said another, who preferred anonymity, "we can produce higher-priced sets without fear of making them competitive. We don't have to be in the rat race." And Setchell-Carlson gen. mgr. H.E. Tyler, writing from the little town of New Brighton, Minn., where it's located, said that so far as his company is concerned the future looks good. "Being a small manufacturer," said Mr. Tyler, "has its distinct advantages in that we can reduce our production to a point where the market will absorb it completely...As of [now] our inventory is practically nil."

McCONNAUGHEY'S VIEWS ON EUROPEAN TV: Increasing awareness of superiority of free and independent broadcasting in European countries was cited by FCC Chairman Geo. C. McConnaughey as an outstanding impression of his recent communications inspection tour of England, France, Germany, Switzerland, Netherlands, Norway & Sweden.

He returned "more convinced than ever that we -- with all our problems, vexatious as they may be -- have the best system of broadcasting ever devised."

The introduction in Britain next week of a modified form of commercial TV, McConnaughey believes, will be watched very closely by other European countries which haven't yet decided how much freedom their new TV systems are to be allowed. When we asked him his impressions of European broadcasting, he held out great hope for Britain's new Independent TV Authority (ITA) as a force for creating more popular programming in England -- and "a very hopeful sign for all of Europe."

"Given time and a minimum of govt. interference, ITA is going to be a marked success," he predicted, despite such obstacles as receiver conversion. Out of some 5,000,000 sets-in-use, only 1,000,000 have been converted to receive second channel. Advent of commercial TV, he said, should put BBC on its toes, the competition forcing it to improve programs. "The BBC," he added, "hasn't given the people what we consider a good variety of programs."

In France, he found TV picture technically "excellent," but was disappointed with calibre of talent and programming, which he felt was "hampered by the strong tie-in with govt. operation." As an example, he cited a one-hour program he viewed during prime Saturday evening time -- entirely devoted to bridge lessons.

West Germany is "very alert to the broadcasting picture," he stated, "and we can expect to see pretty substantial improvements in the next year or so." German TV has started out on semi-commercial basis under complex state-private partnership

arrangement. German radio, now almost entirely converted to FM, he described as "perfectly delightful," keyed by good music and excellent reception.

In Sweden, where control of TV has not yet been decided, he perceived strong undercurrent of sentiment for independent operation as opposed to strict govt. control. In Norway and the Netherlands as well as Sweden, he was impressed by alertness to broadcasting and anxiety to begin TV on soundest possible basis.

He found many misconceptions about American broadcasting in general, and the role of the advertiser in particular, wherever he went. On one occasion when he was being interviewed on Oslo radio, he was asked: "Is it true that the advertisers run broadcasting in the United States?" He then proceeded to explain role of FCC, how broadcast licensing operates, etc.

In good-natured discussion over the teacups, he was asked this question by a BBC executive: "How can you justify a program like 'The \$64,000 Question'?" The FCC chairman replied that he couldn't see anything seriously wrong with such a program, and that, indeed, it may even have some educational value. Then, with a smile, he added: "We often wonder about your Irish Sweepstakes."

Note: British and French TV interests are now reported negotiating with producer Louis G. Cowan for foreign versions of the giveaway.

(For Chairman McConnaughey's approach to allocation controversy, and his plans for Commission consideration of the issue, and separate story on British commercial TV debut Sept. 22, see p. 5.)

WILL GOVT. SUIT INCREASE FILMS FOR TV? On eve of the trial of 12 movie companies for alleged conspiracy to keep films off TV in Govt.'s 3-year-old "16mm suit", Republic Pictures -- which has already offered some 300 of its features to TV -- agreed to make arrangements to continue releasing pictures 3 years old and over.

Real importance of consent decree -- in which Republic in effect agreed to do what it already has been doing -- is that (1) it indicates Govt. still intends to press the controversial suit originated by Truman Administration, and (2) similar agreements with other movie makers conceivably could be forthcoming, although both Republic and Govt. deny participating in a "pilot decree."

Sizing up significance of decree as regards other movie makers, authoritative Motion Picture Herald said Sept. 17: "The other defendants are under considerable pressure to agree to a consent decree along the lines to which Republic submitted. This is true because when a defendant agrees to a consent judgment prior to taking of testimony in any anti-trust case, that consent decree cannot be used by a plaintiff in a private suit."

Trial opens Sept. 20 in Los Angeles Federal Court for remaining 10 defendants: 20th Century-Fox, Warner Bros. & its Warner Bros. Distributing Corp., Columbia and its TV subsidiary Screen Gems, Universal and its United World Films, RKO, plus independents Film Inc. and Pictorial Films Inc. (Vol. 8:30). Neither Paramount nor MGM is involved in Dept. of Justice action.

Consent decree requires Republic (and subsidiary Republic Productions) to offer to TV within 90 days 80% of the feature films produced before Aug. 1, 1948 to which Republic holds TV rights. This portion of the decree is meaningless as far as more-films-to-TV is concerned, since Republic has already licensed at least 80% of such features for TV showing.

Company also is ordered to begin "necessary negotiations" (unions, etc.) toward clearing post-1948 pictures for TV. Within 2 years after negotiations are completed, Republic is required to make available to TV 25% of films that have been in release 3 years; thereafter it must release annually at least 50% of the films shown in theatres during preceding 3 years.

Formula for decree apparently was tailored to fit Republic's past practices and future plans with regard to TV -- but movie industry is wondering whether Govt. now plans to use same 3-year yardstick in suit against remaining defendants.

Note: If other defendants are awarded more favorable terms after trial, Republic is entitled to apply for modification of decree.

Personal Notes: Charles Singer, with WOR & WOR-TV for 28 years, recently its chief engineer, has joined Page Communications Engineers Inc., Washington, as director of operations; Ross Bateman, since 1946 chief of ionospheric research of Bureau of Standards' Central Radio Propagation Labs, has also joined Page as director of research . . . A. E. Towne resigns as chief engineer of KPIX, San Francisco, to form own San Francisco electronic development and consultant firm, A. E. Towne Assoc. Inc.; Thomas T. Ely, asst. chief engineer of Westinghouse's WBZ-TV, Boston, becomes KPIX chief engineer, Wm. Burgess promoted to asst. chief engineer, Ray Holtz succeeding him as transmitter supervisor . . . Mitchell Wolfson, co-owner of WTVJ, Miami and head of Wometco chain of theatres, will be keynote speaker at Theatre Owners of America convention in Los Angeles Biltmore Oct. 6; he's ex-TOA pres. & chairman . . . Mrs. Fanny Neyman Litvin, FCC examiner, retires Sept. 30 after 30 years of service; she will continue to make her home at 3850 Tunlaw Rd., Washington . . . Thomas B. McFadden, NBC Spot Sales v.p., flies to England Sept. 20 for opening of ITA commercial TV system Sept. 22; NBC pres. Pat Weaver will be there, too (Vol. 11:36), speaks Sept. 27 before Institute of Advertising Practitioners . . . Sol Taishoff, publisher of *Broadcasting-Television*, sailed Sept. 14 on the *Queen Elizabeth* for England to be present at start of commercial TV; he will also tour Europe . . . Jack R. Poppele, asst. director for broadcasting, U. S. Information Service, back Sept. 12 from 6-week flying trip to Voice of America European operations . . . Robert B. Hanna Jr., mgr. of GE broadcasting dept. (WRGB & WGY), also designated to serve as gen. mgr. of Maqua Co., GE-owned printing firm, one of largest in country, employing 800 . . . Leslie C. Johnson, WHBF-TV, Rock Island, named chairman of NARTB employer-employee relations committee, succeeding Robert D. Swezey, WDSU-TV, New Orleans . . . Fred W. Wagenvoord, v.p. & gen. mgr., WGTH-TV, Hartford, has resigned and General Teleradio has assigned Jack Downey as operations chief; station's sale to CBS pends FCC approval (Vol. 11:28) . . . George R. Snell, ex-WLEX-TV, Lexington, Ky., named program & operations mgr. of up-

coming WHTN-TV, Huntington, W. Va. (Ch. 13), due Sept. 25; George A. Miller Jr., ex-WSAZ-TV, Huntington, local & regional sales mgr.; Chester A. Siegrist, ex-WCNY-TV, Carthage, N. Y., studio-transmitting engineer . . . John Henry promoted to sales mgr., KCSJ-TV, Pueblo; Jack Wells, ex-WKY, Oklahoma City, named program coordinator . . . Morton Lowenstein named v.p. in charge of new Forjoe office in Philadelphia . . . Larry Lowenstein, ex-Benton & Bowles, joins CBS-TV as press information director . . . Clinton F. Wheeler, onetime TV-radio director of Ogilvy, Benson & Mather, promoted to Kenyon & Eckhardt v.p. . . . Rodney Albright, ex-Biow-Beirn-Toigo, joins Sullivan, Stauffer, Colwell & Bayles as TV production supervisor . . . Jacob A. Evans, ex-v.p. of *Sponsor*, now with McCann-Erickson, to direct TV-radio clinic of adv. & selling course to be conducted by N. Y. Ad Club . . . Gerald Green promoted to producer of NBC-TV's *Today*, Mon.-thru-Fri. 7-9 a.m., succeeding Robert Bendick, now working on *Wide Wide World*, twice-monthly Sun. 4-5:30 p.m. . . . Abe Greenberg promoted to adv. & sales promotion director, Howard Wormser to publicity director, KTLA, Los Angeles . . . Harry Beaudouin resigns from NBC publicity dept. to become asst. director of TV-radio publicity, Republican National Committee . . . John F. White, v.p. of Western Reserve U, Cleveland, named gen. mgr. of educational WQED, Pittsburgh, replacing Wm. A. Wood, now consultant to several educational stations . . . James Agostino, ex-KHQ, named sales mgr. of KXLY-TV & KXLY by v.p.-gen. mgr. Richard E. Jones . . . Robert A. Mortenson, ex-N. W. Ayer, named gen. mgr. of upcoming WIIC, Pittsburgh (Ch. 11), with Roger C. Rice, also from that agency, as sales mgr.; they will report to pres. O. M. (Pete) Schloss . . . Fred Gregg, recently detached to Avco, returns to Crosley Bestg. Co. as asst. gen. sales mgr. under sales v.p. Harry Mason Smith . . . Frank E. Mitchell, mgr. of KIMA, Yakima, Wash., adds duties as business mgr. of KIMA-TV; satellite KEPR, Pasco; upcoming KLEW-TV, Lewiston, Ida. . . . Joseph M. Allen, ex-TV-radio director of Assn. of National Advertisers, promoted to v.p. . . . Wm. F. Wetmore Jr. and Robert B. Yorty become junior partners of Pierson, Ball & Dowd, Washington attorneys.

Rev. Malcolm Boyd, once with Republic Pictures and Samuel Goldwyn Productions, formerly associated with Mary Pickford & Buddy Rogers in their TV-radio activities (which include one-third ownership of WSJS-TV, Winston-Salem, N. C.), elected to board of Cathedral Films, 140 No. Hollywood Way, Burbank, Cal. He's now taking graduate studies at Union Theological Seminary, N. Y., and writing a book on the relation of church to media of mass communications. He took his Episcopalian orders in 1951, was graduated last year from the Church Divinity School of the Pacific.

Marvin Miller, star of *The Millionaire*, on CBS-TV, has been designated by William J. Grede, national chairman, 1955 Bible Week, as an honorary chairman to represent TV industry. Edward Stanley, NBC public service programs mgr., heads special events phase of all-faiths National Bible Week, Oct. 17-23.

Mims Thomason, UP v.p. in charge of newspictures, promoted to gen. business mgr., succeeded by his asst. Frank Tremaine. Jack Bisco has resigned as v.p. & gen. mgr. of UP, and plans to acquire a newspaper or radio station.

Robert Butler, 58, ex-ambassador to Cuba and Australia, chief owner of WTCN-TV, Minneapolis, until its recent sale to Bitner interests, died in N. Y. Sept. 15 following a heart attack.

David Kingsley, managing director of National Film Finance Corp., set up by British Govt. to finance movie production and export, was in N. Y. recently to look into reasons why British films aren't more successful in the American market—including brief look-see at TV, which has used them profusely. He's also treas. of British Lion Films, following only Rank and Associated as biggest distributor in the UK, and wholly owned by the govt. corporation since it ran into financial trouble. NFFC backs about 40% of all British film production.

U. S. delegates to UNESCO conference in Tangier, Morocco, Sept. 19-30, to promote international cooperation between films and TV: James Nelson, asst. to NBC pres. Pat Weaver; Paul Wagner, exec. director of Film Council for America; Paul Talbot, pres. of Freemantle Overseas Radio & Television Inc.; Maurice Mitchell, pres. of Encyclopedia Britannica Films.

Dr. Filiberto Guala, director general of RIA, the Italian broadcasting system, and his delegation were guests of Voice of America's industry advisory committee at Washington luncheon Sept. 15; administrative-program-technical group includes Dr. Francesco S. Gilente, Dr. Franco Passigli, Dr. Aldo Passanti, who will tour U. S. TV-radio centers for about month.

Gerard Gingras, Montreal investment executive, appointed to CBC board of governors, now consisting of 10 members, with one vacancy left.

B RITAIN'S COMMERCIAL TV system gets under way Thu., Sept. 22, under aegis of Independent TV Authority with 2 of the 4 private program contractors combining to present 7:15-11 p.m. schedule, transmitted by newly completed 10-kw visual, 2½-kw aural transmitter at Croydon built by Marconi. At last reports, advertisers had purchased 18 minutes of commercials at time-&-half rates, all first-night profits (expected to run about \$28,000) to go to charities. Base rate is £1000 (\$2800) per minute.

On eve of opening of London area service—that from Birmingham being due to start next Feb. and from Manchester in May or June—ITA disclosed that its fourth contractor would be Associated British Picture Corp., in association with Hulton Press, which publishes 5 newspapers in the Midlands. It is taking over the franchise recently surrendered by the Kemsley-Winnick group, which quit because of costs involved, and will serve Midlands, Yorkshire and Lancaster areas from Birmingham & Manchester outlets.

Associated British is part-owned by Warner Bros., but ITA regulations require programs be predominantly British to protect against too much American programming. ABPC managing director C. J. Latta is due in N. Y. next week on visit to Warner home office. His company has already set up TV subsidiary called Associated British Cinemas (TV) Ltd.

Under the contract setup, Associated-Rediffusion Ltd. will utilize time on London station Mon. thru Fri.; Granada TV Ltd. on Manchester station Mon. thru Fri.; Associated Broadcasting Co. Ltd. on Birmingham station Mon. thru Fri. and London Sat. & Sun. New ABPC group presumably will take over the Kemsley-Winnick time allotment of Sat. & Sun. on the Birmingham & Manchester stations.

London reports interest running high in upcoming commercial service, with the highbrow element (spearheaded by *London Times*) eyeing the project askance but the man-in-the-pub generally favorable to the idea of competition, as we reported in our own on-the-spot roundup of last autumn (Vol.10:45). Lots of Americans are to be on hand for opening (see Personal Notes) and the interest of the Anglo-American advertising fraternity is particularly keen.

Here's comparison of BBC program schedules and the combined efforts of Associated-Rediffusion and of Associated Broadcasting for opening night Sept. 22, as listed in parallel columns in *Commercial Television News* of London:

BBC

- 7 p.m. News.
- 7.15 p.m. Weather and Programme parade.
- 7.20 p.m. Topical spot.
- 7.30 p.m. Outside broadcast.
- 8 p.m. "Disneyland" film.
- 8.30 p.m. "Animal, Vegetable or Mineral?"
- 9 p.m. Play.
- 10 p.m. Eurovision from Paris.
- 10.30 p.m. (approx.). Close down.

ABC/A-R

- 7.15 p.m. The Guildhall banquet.
- 7.30 p.m. Sir John Barbirolli and the Hallé Orchestra.
- 7.43 p.m. National Anthem.
- 7.45 p.m. Speeches by the Lord Mayor, the Postmaster-General, and Sir Kenneth Clark, ITA chairman.
- 8 p.m. Wood Green Empire all-star variety.
- 8.40 p.m. Half an hour of filmed drama.
- 9.10 p.m. Boxing.
- 10 p.m. News.
- 10.15 p.m. May Fair Hotel; interviews with famous stars.
- 10.30 p.m. All-star cabaret.
- 10.50 p.m. Trallars.
- 11 p.m. Close-down, with a 2-minute religious epilogue.

Note: For data on BBC & ITA, and for addresses and names of principals of ITA program contractors, see p. 246, *TV Factbook No. 21*.

A LLOCATIONS ECONOMICS—including the plight of uhf, the deintermixture issue, vhf drop-ins, etc.—loomed as biggest and toughest problem for coming season as FCC met informally for a good look at the substantial matters to be placed on its agenda. McConnaughey told us earlier that he hopes Commission will be able to get right to work on allocations problems, meeting on them "early in October."

"The Commission is going to have to take a pretty hard look at the over-all picture," the chairman said. "We're cognizant of the problems and they're bigger than just isolated cases." He said he has formed no personal conclusions on the answer. "We're going to have to ask the advice of a lot of people, and get some unbiased opinions."

McConnaughey's statement of his opinions on allocations problems, coupled with views of other Commissioners as reported in 3 preceding issues (Vol. 11:35-37), indicate FCC's look at allocations will not only be an "over-all" look but also a long look.

Due to get under way in earnest soon, too, is Commission's network investigation, for which Congress appropriated \$80,000. In a related step, chief Harold Cowgill of FCC's Common Carrier Bureau, has been collecting data on AT&T network rates. Study of rates has been recommended by Senate Commerce Committee Chairman Magnuson (D-Wash.) and Committee's Plotkin Report.

* * * *

Commission held no formal meeting this week, Comr. Webster being in Europe and other commissioners attending Radio-TV Executives Society luncheon in New York (see p. 6) on regular meeting day. Only FCC action dealing with TV was release this week of order (FCC 55-931) turning over Ch. 5 & 6 in Alaska and Hawaii to non-broadcast use. Commission noted there had been no opposition to this proposal. Neither channel is allocated in either of the territories.

Three more eastern Pennsylvania uhf stations joined Harrisburg's WHP-TV in opposing proposed purchase by Triangle Publications (WFIL-TV, Philadelphia, WNBFTV, Binghamton) of off-air WLBR-TV, Lebanon, on Ch. 15 (Vol. 11:31), asking that Commission hold hearing. Charging that station would essentially be satellite of WFIL-TV, hurting local community stations, were WCMB-TV & WTPA, Harrisburg & WHUM-TV, Reading. Lebanon County Chamber of Commerce petitioned for quick grant of transfer.

Maximum of 1000 TV stations "when the industry has reached its peak point of performance" is foreseen by NARTB pres. Harold Fellows—even though original allocation plan provided for 2000. Paying tribute to TV at testimonial luncheon in N. Y. honoring RCA Chairman Sarnoff, he said: "This medium has done so much to change the lives of so many people already that it indeed challenges the imagination to anticipate any further inroads it might make on the experience of living. Surely, we can anticipate in the near future live TV on an international scale." He also predicted that current 2748 radio stations will rise to "a final count of something in the neighborhood of 3000." He said radio has become more of a "community service" than a "national service."

Sam Gallu, producer of *Navy Log* on CBS-TV, which premieres Sept. 19 at Washington's Carter Barron Amphitheatre, to be presented with citation as honorary admiral in the Navy by Secy. of Navy Thomas; show starts Sept. 20, Tue. 8-8:30 p.m., with Maytag and Shaeffer Pen as alt. sponsors.

NETWORK RADIO keeps searching for a comeback formula. Following NBC's plan last week to extend *Monitor* concept of programming to weekdays 10 a.m.-6 p.m. (Vol. 11:37), CBS this week disclosed its "segmentation" plan to affiliates meeting in Detroit.

As outlined by sales v.p. John Karol, CBS plan would open to 5-min. sales such weekday programs as *Bing Crosby Show*, *Tennessee Ernie*, *Jack Carson Show* & *Amos 'n' Andy Music Hall*, and the weekend *Edgar Bergen*, *Galen Drake* & *Robert Q. Lewis* shows. A single 5-min. segment costs \$2100 in time & talent, with usual frequency discounts on multiple sales. Karol said 17 segments had already been sold, with Philip Morris and Hallmark Greeting Cards among first sponsors.

"Each of you remembers when the network buying formula was largely 15-minute strips and half-hour shows," he stated. "These, in radio, were like the one-page ads in magazines. But the patterns of listening have changed and we have modified our programming to capitalize on this change. The final step, obviously, had to be a shift in sales philosophy to allow the advertiser to buy in relation to the changing habits of listening. This shift means that now an advertiser can buy the equivalent of the half-page ad or the one-column ad."

He said CBS Radio was in strongest competitive position in its history, adding that "on the basis of business now on the books, our estimate for an average week in October 1955 shows that CBS Radio is running about 90% ahead of NBC in total hours sold." [For comparative PIB figures for first 7 months of 1955, see p. 16.]

Earlier, pres. Frank Stanton told record gathering of 230 network and station officials that CBS has budgeted 29% increase in network radio programming in 4th quarter over earlier estimates. Of radio's future, he said:

"Radio's future is not depressed but radio has problems which we deceive ourselves if we do not admit. I think we will work out our problems gradually. But we will work them out. We won't sit them out . . . Our comfortable patterns have been pulled apart. Our security has been shaken. But the elements of a new stability are at hand."

VICE PRESIDENT NIXON, following pattern of CBS pres. Frank Stanton's proposal last May (Vol. 11:22), this week advocated TV debates between opposing political candidates (15 min. each) for Senate, House, local offices—but he didn't go into "Lincoln-Douglas" type meetings on presidential level as suggested by Stanton. Addressing Radio & Television Executives Society at N. Y. luncheon Sept. 14, he said key to political success is informality—fireside chats, debates, audience participation. TV will end reign of old-time "stump speaker," he predicted, and will cut through artificiality, permitting sincerity to come through. "Whistle stop" tours will become passe, he said, "because they cannot compete with TV in reaching a mass audience."

Mr. Nixon flatly rejected use of written texts or prompters in TV campaigning, saying that while off-the-cuff speaking required twice as much preparatory work, it was much more effective. He suggested candidates buy frequent TV spots for 5-min. & 1-min. talks to make their names and faces familiar to audience. Stations themselves are best qualified to achieve "proper balance" among parties in non-election year free time, he said, but "there is no such thing as a non-political speech by a politician. Sell him the best time for drawing an audience, even if it costs twice as much. Candidates should be prepared to spend as much money on building up a program, through advertisements and organization work, as they do on air time."

Affiliates adopted resolution, at close of meeting, commending CBS for "its continuing efforts to maintain the high quality of the radio operation." These affiliates board officers were elected: chairman, Kenyon Brown, KWFT, Wichita Falls, succeeding John Patt, WJR, Detroit; vice-chairman, F. C. Sowell, WLAC, Nashville; secy-treas., Max Rider, WBRY, Waterbury, succeeding Arnold Schoen, WPRO, Providence. New board members elected were Frank Fogarty, WOW, Omaha, and Worth Kramer, WJR.

* * * *

NBC affiliates' reactions to *Monitor* extension followed no pattern—some pro, many con—but network went on with plans to extend to weekday service as of Nov. 7. NBC reported that 39 out of 200-odd affiliates had agreed informally to extension.

Epitomizing opposition was sharply critical letter from Westinghouse stations v.p. Donald H. McGannon to affiliates chairman Robert D. Swezey declaring: "Westinghouse stations cannot continue to carry *Monitor* on the weekends unless the entire compensation structure is substantially revised upward and certain program changes made so as to achieve a larger share of audience. WBC will not accept *Monitor* during weekday periods because it is essential to the future operation of these stations that they continue to receive national spot revenue in order to survive, and it is clear that broad extensions of *Monitor* can only result in the drying up of national spot revenue for the individual stations."

NBC Radio affiliates executive committee elected these officers: chairman, James Gaines, WOAI, San Antonio, succeeding Robert D. Swezey, WDSU, New Orleans; vice-chairman, Chris Witting, Westinghouse; secy-treas., George Harvey, WFLA, Tampa. Other members are George Wagner, KFI, Los Angeles; Harold Hough, WBAP, Ft. Worth; J. Leonard Reinsch, WSB, Atlanta; Ben Larson, KDYL, Salt Lake City; Lester Lindow, WFDF, Flint; David Baltimore, WBRE, Wilkes-Barre. It's noteworthy that all save Lindow also operate TV stations, and his parent company (Bitner) operates 3 TV outlets.

RCA-NBC Chairman Sarnoff, responding impromptu to presentation of N. Y. Sales Executives Club's "Applause Award" for "outstanding salesmanship and public service" Sept. 13, observed that 81% of his company's anticipated 1955 volume of \$1 billion represents goods and services that didn't exist 10 years ago. He referred specifically to TV, which wasn't even on the market in 1945 yet now accounts for about half of RCA's gross (counting NBC as well as receiver, tube, transmitter & component's businesses). He predicted that today's \$10 billion electronics industry, ranking 13th in volume in the nation, would not be recognizable a decade hence. Harold Fellows, NARTB pres., speaking at same luncheon, noted the many other honors that have been bestowed upon Gen. Sarnoff and observed: "I believe this is the first occasion he has been singled out for his selling ability—and I say that it is high time." Meeting also saw series of photographs on screen titled "The David Sarnoff Story," prepared by *Life Magazine*, with commentary on his 50 years in the industry.

Printers' Ink July index shows national advertising as a whole achieving new records, up 11% for first 7 months of this year over same 1954 period; July alone was 12% ahead of July 1954. Network TV was ahead 28% for the month, network radio off 8%.

BM's ever-popular clinics start next Feb. 26, end June 15, with 2 teams of speakers covering 42 meetings in 40 states.

Station Accounts: Color commercials are being used on WRCA-TV by 7 major advertisers for their 10 & 20-sec. spots adjacent to network color programs. Using color adjacencies are RCA, thru J. Walter Thompson; Oldsmobile, thru D. P. Brother Inc.; Ford Dealers Assn., thru J. Walter Thompson; L&M Cigarettes, thru Cunningham & Walsh; Benrus Watch Co., thru Biow-Beirn-Toigo; B. T. Babbitt Co., thru Dancer-Fitzgerald-Sample; Castro Convertibles, thru Newton Adv. . . . Clock watchers: Spurred by success of its *Count Sheep* sign-off program, Mon.-thru-Fri. 1-1:05 a.m., WRCA-TV Oct. 31 will launch sign-on program, *Eye Opener*, Mon.-thru-Fri. 6:55-7 a.m.—with humorist Martin Levin, dressed in pajamas, satirizing day's news developments . . . Big sponsor for a little station: Sears Roebuck, for its 6 mail order offices in east Texas, buys *Waterfront* on KTRE-TV, Lufkin, independently-operated satellite of Houston's KPRC-TV . . . Among advertisers currently reported using or preparing to use TV station time: Mildred's of California, L. A. (girls' apparel), thru Harvey Waldman & Assoc., L. A.; Summit Hall Turf Farm, Gaithersburg, Md. (Meyer Z-52 Zoysia grass plugs), thru Henry J. Kaufman & Assoc., Washington; Gini Products, San Gabriel, Cal. (Pinware pincurl permanent wave), thru Benet Hanau & Assoc., San Jose, Cal.; Chun King Sales Inc., Duluth (Oriental foods & canned frozen foods), thru J. Walter Thompson, Chicago; Malt-O-Meal Co., Minneapolis (cereal), thru Campbell-Mithun Adv., Minneapolis; Research for Better Living Inc., N. Y. (T-W-O reducing aid), thru Wexton Co., N. Y.; Dormeyer Corp., Chicago (appliances), thru John W. Shaw Adv., Chicago; Manitowoc Equipment Works, div. of Manitowoc Co., Manitowoc, Wis (freezers & cabinets), thru O'Grady-Anderson-Gray, Chicago; T. W. Burlison & Son, Waxahachie, Tex. (Burlison's honey), thru Rogers & Smith, Dallas; Englander Mattress Co., Chicago, thru Leo Burnett Co., Chicago; S. B. Thomas Inc., N. Y. (Thomas protein bread), thru David J. Mahoney Inc., N. Y.; National Shoe Stores Inc., N. Y., thru Emil Mogul; Hanover Canning Co., Hanover, Pa., thru Arndt, Preston, Chapin, Lamb & Keen, Philadelphia.

Merger of 2 major TV-radio sponsors: Gillette Co., which purchased Toni in 1947, this week agreed to purchase Paper-Mate Pen Div. of Frawley Corp., Culver City, Cal. for \$15,500,000 cash. Paper-Mate, budgeted for about \$5,200,000 in advertising, sold \$26,000,000 worth of its products last year, claims it has 80% of ball point market. It agency is Foote, Cone & Belding.

Rate increases: WSJS-TV, Winston-Salem, Oct. 1 raises base hour from \$450 to \$550, min. \$90 to \$110; WKNB-TV, New Britain-Hartford, raises hour from \$400 to \$500, 20 sec. \$80 to \$100; WILK-TV, Wilkes-Barre, has raised hour from \$250 to \$300, min. \$40 to \$50.

Gold Mail Box Award for 1955 for year's best direct mail advertising was bestowed on NBC this week by Direct Mail Advertising Assn., and accepted by Edwin Vane, national sales promotion mgr.

Crackdown on free airline plugs was ordered this week by CBS-TV program v.p. Hubbell Robinson Jr., who said policy henceforth will be to give brief aural credit only—no more pictures of airplanes.

"Oscar" movie awards of Academy of Motion Picture Arts & Sciences will be on NBC-TV March 21 (sponsored by Oldsmobile), with nominations tentatively scheduled Feb. 15.

Power increases: WSJS-TV, Winston-Salem (Ch. 12) Sept. 10 to 316-kw; KDUB-TV, Lubbock, Tex. (Ch. 13) Sept. 11 to 316-kw; KCOP, Los Angeles (Ch. 13) Sept. 12 to 170-kw ERP.

Network Accounts: CBS-TV is reported to have sold to unidentified sponsors 2 new Victor Borge shows and a new Jackie Gleason program, both to be on irregular schedules in mid-week. They're 3 of 12 mid-week 60 or 90-min. "specials" planned by CBS this season — remainder being 6 *See It Now* programs (2 sponsored by Pontiac), 2 Orson Welles films and an adaptation of *Nutcracker Suite* . . . Oldsmobile to introduce its 1956 line in gala 30-min. \$125,000 monochrome variety show on NBC-TV Nov. 2, Wed. 10:30-11 p.m., starring Perry Como and Patti Page, thru D. P. Brother Adv. . . . American Home Products to sponsor *Wanted* on CBS-TV starting Oct. 20, Thu. 10:30-11 p.m., thru Biow-Beirn-Toigo; it will also be co-sponsor of *Midwestern Hayride* on NBC-TV starting Sept. 28, Wed. 10:30-11 p.m. . . . Ralston Purina to sponsor *Ethel & Albert* as replacement for *Name's the Same* on ABC-TV starting Oct. 14, Fri. 10:30-11 p.m., thru Guild, Bascom & Bonfigli, San Francisco . . . Chunky Chocolate Corp. to be alt. sponsor of *Super Circus* on ABC-TV starting Sept. 25, Sun. 5-6 p.m., thru Hilton & Riggio . . . Telechron buys one-fourth sponsorship of *Ozzie & Harriet* on ABC-TV starting Sept. 30, Fri. 8-8:30 p.m., thru N. W. Ayer . . . Olin Mathieson Chemical Corp. (flashlights & batteries) buys several partic. on NBC-TV's *Tonight* for 13 weeks starting Sept. 16, Mon.-thru-Fri. 11:30 p.m.-1 a.m., thru D'Arcy . . . Carrier Corp. (air conditioners) buys 30 partic. on *Today & Home* on NBC-TV starting next April, thru N. W. Ayer . . . Dodge buys Cotton Bowl game from Dallas on NBC-TV Jan. 2, starting at 3 p.m., thru Grant Adv. . . . New title of repeats of *I Love Lucy* is *The Lucy Show*, switching to Sat. 6:30-7 p.m. on CBS-TV starting Oct. 8 . . . Ronson Corp. and Pall Mall cigarettes switch *Douglas Edwards and the News* to Mon.-thru-Fri. 7:15-7:30 p.m. on CBS-TV starting Sept. 26 . . . Toni and Paper-Mate switch Ark Linkletter's *People Are Funny* to Sat. 9-9:30 p.m. on NBC-TV starting Sept. 24.

Top 25 agencies in network TV billings last year, according to tabulation prepared by Leading National Advertisers Inc. for *Advertising Agency Magazine*, accounted for \$246,553,898 out of \$320,154,274 in total placements, or 77%. (For network breakdowns by months, see Vol. 11:6, p. 16.) The top 25: BBDO, \$24,699,614; Young & Rubicam, \$23,111,797; Wm. Esty Co., \$22,255,451; J. Walter Thompson, \$18,576,676; Leo Burnett, \$15,671,948; Biow-Beirn-Toigo, \$13,927,498; Benton & Bowles, \$13,100,349; McCann-Erickson, \$10,902,583; Dancer-Fitzgerald-Sample, \$10,537,829; Ted Bates & Co., \$9,682,478; Compton Adv., \$8,241,905; Sullivan, Stauffer, Colwell & Bayles, \$7,783,465; Lennen & Newell, \$7,229,719; Maxon, \$6,559,278; Cunningham & Walsh, \$6,513,444; Foote, Cone & Belding, \$6,255,860; Kenyon & Eckhardt, \$5,734,552; N. W. Ayer & Son, \$5,435,862; Kudner, \$5,392,296; Weiss & Geller, \$5,051,116; Edward Kletter Assoc., \$4,524,402; Cecil & Presbrey, \$4,217,546; Needham, Louis & Brorby, \$3,880,893; MacManus, John & Adams, \$3,665,643; D'Arcy Adv., \$3,601,694.

"Television has become the greatest of the advertising media and since the great industries of America have found it very beneficial, we have decided to enter it not only because it will be an important factor in our income, but simultaneously we will be able to advertise and promote our own pictures. If other great corporations can increase the sales of their products through TV, we can similarly appeal to a large portion of the family trade and recapture their lost patronage, thus restoring prosperity to the motion picture theatre box office."—Spyros P. Skouras, pres. of 20th Century-Fox in statement to stockholders, officially announcing new subsidiary TFC Television Productions Inc.

NEW TV MARKET—Florence, S. D.—opens up this week-end with start of KDLO-TV (Ch. 3), testing in preparation for regular programming that begins with World Series carried off-air from sister station KELO-TV, Sioux Falls, S. D. (Ch. 11), located about 100 miles southward. Semi-satellite station, under same ownership, will carry about 25% local programming, rebroadcasting KELO for most part.

KDLO-TV has KELO-TV's former 5-kw RCA plant with new 6-bay RCA antenna on 750-ft. Ideco tower at site near Garden City, about 20 mi. west of Watertown. This week, corporate name was changed to Triple City Broadcasting Co. to indicate coverage of triangle formed by Watertown, Huron & Aberdeen. Owners N. L. Bentson, Joseph L. Floyd & Edmund R. Ruben earlier this year acquired radio WLOL, St. Paul (Vol. 11:18) where Bentson formerly owned time-sharing WMIN-TV, now combined into WTCN-TV. Florence outlet has Les Froke as chief engineer, is sold in combination with KELO-TV, with H-R Television as rep.

* * * *

That makes 449 stations now on air, 107 of them uhf. This week came word of another starter worth recording—XHNL-TV, Monterrey, Mexico (Ch. 10), country's 7th station and 6th operated by O'Farrill-Azcarraga interests. It began Sept. 2 as film-only outlet, operating 6:30-10 p.m. daily without live or studio facilities and using mainly kinescopes from Mexico City. Monterrey (pop. 300,000) is about 140 mi. south of Laredo, Tex. Low-power transmitter supplied by Cia. General de TSF, of France, supplies 300 watts ERP from Topo Chico site. Only fulltime employe is mgr. Mario Quintanilla, also mgr. of local radio XEFB. Base rate quoted is 450 pesos per half hour.

Only equipment shipments and orders reported this week were 20-kw amplifier from GE to WITN, Washington, N. C. (Ch. 7), due on air later this month; 10-kw transmitter with 12-bay antenna and other equipment due to be delivered by GE within 90 days to upcoming KOSA-TV, Odessa, Tex. (Ch. 7); 50-kw amplifier from DuMont to on-air WTVD, Durham, N. C. (Ch. 11).

* * * *

In our continuing survey of upcoming stations, these are latest reports from principals:

KTVO, Kirksville, Mo. (Ch. 3) has 25-kw RCA transmitter and antenna on hand, expects to meet Sept. 28 test pattern and Oct. 1 CBS programming targets, writes station mgr. Berg Allison. As of Sept. 15, it had 100-ft. of 1101-ft. Stainless tower erected at site near Lancaster, Mo., about halfway between Kirksville and Ottumwa, Ia., latter being business address for TV and site of radio affiliate KBIZ. Principal owner with $\frac{2}{3}$ control is attorney James J. Conroy, who also controls Wisconsin radios WBIZ, Eau Claire & WLCX, LaCrosse. Base hour will be \$300. Rep not chosen.

WDBJ-TV, Roanoke, Va. (Ch. 7) has installed 5-kw DuMont transmitter and expects to meet Sept. 22 test pattern target, writes operations director Ray P. Jordan for owner *Roanoke Times* and *World-News*. It has 6-section RCA antenna 667-ft. above ground on former tower of WROV-TV, plans to start CBS programming early in Oct., with interim 25-kw visual ERP. Work has already begun on plant, which will enable station to boost power to 316-kw ERP early in 1956. Base rate will be \$450, with jump to \$600 scheduled in April, 1956. Rep will be Free & Peters.

WITN, Washington, N.C. (Ch. 7) expects to meet Sept. 20 test pattern target, reports pres.-gen. mgr. W. R.

Roberson Jr., whose family recently acquired control (Vol. 11:33). On Sept. 26, it begins as NBC basic, replacing WNCT, Greenville (Ch. 9), only outlet within 90 mi. of Washington. Alford 5-bay 102-ft. antenna was to have been installed on 818-ft. Stainless tower week of Sept. 12; now it's working on 20-kw GE transmitter at site near Grifton, some 25 mi. southwest of city. Robersons also operate local radio WRRF and Wm. S. Page, other principal stockholder, controls WELS, Kinston, N.C. Base hour will be \$325. Rep will be Headley-Reed.

KRBB, El Dorado, Ark. (Ch. 10) has Oct. 15 test pattern target, plans to start with NBC programming Nov. 1-15, reports $\frac{1}{3}$ owner-gen. mgr. Wm. M. Bigley. Near state's southern border, it has 6-bay RCA antenna installed on 600-ft. Skyline tower, with 5-kw RCA transmitter purchased from Terre Haute's WTHI-TV (Ch. 10) scheduled to be ready by Oct. 1. Base hour will be \$200. Rep will be Pearson.

KMVI-TV, Wailuku, Hawaii (Ch. 12), doesn't expect GE transmitter and 6-bay RCA superturnstile antenna to arrive until mid-Oct., now plans test patterns by "mid-Nov. or later," reports pres. J. Walter Cameron for owner, the semi-weekly *Maui News* (KMVI). It will have transmitter atop Haleakala Crater, will re-transmit Honolulu's KONA programs in much same way that KGMB-TV programs are picked up and rebroadcast by on-air satellite KMAU, also on Haleakala (Vol. 11:16). Rep will be NBC Spot Sales.

* * * *

CKNX-TV, Wingham, Ont. (Ch. 8), about 20 mi. east of Lake Huron, now plans test patterns Oct. 15, programming Oct. 30, reports gen. mgr. W. T. Cruickshank. It will use 2-kw RCA transmitter, 12-slot wavestack antenna on 600-ft. Stainless tower to beam 36-kw visual ERP. Base hour will be \$200. Reprs will be Adam Young and All-Canada.

— ■ —

Gerald A. Bartell family is buying KCBQ, San Diego (1170 kc, 5-kw D, 1-kw N, ABC) for \$250,000 from Tucson attorney Timothy D. Parkman & Stanley N. Schultz, subject to FCC approval. It's second radio station in major market to be purchased within month by Bartells, other being WBGE, Atlanta for \$100,000, also pending FCC approval (Vol. 11:35). They also operate WMTV, Madison (Ch. 33) and own Wisconsin radios WOKY, Milwaukee & WAPL, Appleton.

Community antenna microwave application to feed 3 channels of Nashville programs to system at Paducah, Ky. was filed with FCC this week by Blackhills Video Co., Rapid City, S. D., which estimated installation cost at \$71,445, maintenance & operation \$10,000 a year, first year's revenues \$12,000. Blackhills is currently involved in hearing with competitive applicant for microwave to serve Rapid City community system with Denver signals (Vol. 11:22).

With 28 TV stations on air and 8 more building, more than 75% of Canada's population now has service available and more than 40% of families have sets, CBC chairman A. Davidson Dunton told Canadian National Exhibition last week. In discussing operating costs, Dunton said advertising had been unable to support all programming and hinted possible increase in 15% excise tax on receivers.

Frank C. Carman has acquired full ownership of KUTA, Salt Lake City, by acquiring 62 $\frac{1}{2}$ % of stock for \$150,000 from Grant Wrathall and E. O. Powers in deal handled by Blackburn-Hamilton. Sale of his interest in KUTV (TV) to *Salt Lake Tribune* and *Ogden Standard-Examiner* interests has also been negotiated (Vol. 11:31).

Westinghouse tube div., having recently entered image orthicon and power tube fields, is preparing to market vidicons early next year.

Telecasting Notes: Movieland's invasion of TV showed some end results this week with premieres of Warner Bros. and MGM efforts on ABC-TV. Reaction of critics was mixed, but nearly every one remarked on amount of time given to plugs for the moviemakers. The more ambitious show, *Warner Bros. Presents*, featured new film made for TV based on characters and settings of "King's Row," with plot and performances a cut above soap opera calibre. Film ran about 45 min., with about 10 min. devoted to ballyhooing Warners' theatrical features . . . MGM Presents has been described as a "half-hour commercial" for MGM films (plus the program's paying sponsors)—but nevertheless the film clips from past movie successes provided some good entertainment . . . It's too early to generalize on the movie majors' programs; undoubtedly there'll be patching-up and revisions on basis of reaction to efforts to date . . . Next moviemaker-produced show to debut will be Disney's *Mickey Mouse Club* on ABC-TV beginning Oct. 3, Mon.-thru-Fri. 5-6 p.m., then *20th Century-Fox Hour* on CBS-TV beginning Oct. 5, alt. Wed. 10-11 p.m.—originally slated to begin Sept. 21 but postponed 2 weeks because of production problems . . . "That program" continues to monopolize ratings—this week's \$64,000 *Question* rolled up 49.6 Trendex to 3.3 for NBC-TV's *Truth or Consequences* and 1.9 for ABC-TV's *Name's the Same* . . . Giving away money, even if it sometimes goes as high as \$64,000, makes for inexpensive programming. In \$64,000 *Question's* first 13 weeks, it gave away \$183,000 plus 2 Cadillacs (retail value \$4000 each), making cost of prizes awarded to date average out to only about \$14,700 a week . . . Smash-hit scored with community by WRC-TV, Washington, with its series on the polluted Potomac (Vol. 11:35) is being followed up with another splendid public service feature, announced by v.p.-gen. mgr. Carleton D. Smith: Series titled *Y.O.U.—Years of Usefulness*, produced in collaboration with D. C. Dept. of Public Health, deals with medical, social & economic problems of the aging . . . Another Peabody Award candidate: KNXT's *Crisis Over Los Angeles*, aired in Class AA time 7:30-8 p.m. Sept. 13 to tell people about dangers of smog . . . Unusual journey: 3 WBNS-TV newsmen covered "local" story in Genoa, Italy, returning Sept. 15 with 30-in. statue of Christopher Columbus, miniature of 20-ft. statue which will be presented as gift next Columbus Day from people of Genoa to people of Columbus, O. . . . All-night TV for New York: WOR-TV next week inaugurates daily 1-7 a.m. *Night Time New York*, live show packaged by Hank Leeb Productions . . . How to cheat at cards and other gambling games is subject of new weekly 10-min. *Honestly Dishonest* series on San Francisco's non-commercial KQED, featuring Bob Haskell, San Francisco expert on detection of crooked gambling . . . Jewish Theological Seminary of America plans 13 film shows for TV, telling story of Judaism; Milton Krents, producer of NBC's *Eternal Light*, will produce . . . Harriet Van Horne, TV-radio writer for *N. Y. World-Telegram*, has own show now on WABC-TV, Sat. 6:30-6:45 p.m., taking viewers behind scenes in TV.

ABC-TV to "project" all its film shows from Hollywood, New York & Chicago via microwave-coaxial this season, becoming first network to go "live-film" for all recorded shows. Using 35mm prints for all 32 of its weekly film programs, ABC figures on savings in 16mm print costs and transportation as well as better control over quality of projection. Same films will be microwaved regionally to interconnected points from each of the 3 origination points.

Screen Actors Guild voted 4357-573 to ratify new contract with TV film producers which ended 12-day nationwide actors' strike (Vol. 11:32-34).

END OF HIGH-TOWER controversy between military-civilian aviation and the telecasting industry seemed closer than ever this week as result of agreements within 2 separate industry-govt. study groups—on tall towers and on lighting & marking.

A 7-man subcommittee of Joint Industry-Govt. Tall Structure Committee reported this week on a "flexible agreement" which could end the stalemate between Pentagon and telecasters over towers higher than 1000 ft. Still-secret report will be submitted Oct. 3 to full committee, is understood to require FCC rule-making, therefore would be subject to industry comments before final adoption.

As predicted last week (Vol. 11:37) it's understood to involve use of antenna farms wherever possible, but set no limits on permissible height of towers.

Long-standing ad hoc proposals of new tower lighting and marking standards have been submitted to technical div. of Air Coordinating Committee, with recommendation that no new standards be finalized until they are subjected to exhaustive tests on actual TV towers of various heights. Proposals are complex, involve new principle of daytime high-intensity lighting (20,000-180,000 effective candle power) on days when visibility drops to 1-3 mi.

Other daytime marking proposals involve solid white circle 150-200 ft. in radius at base of towers, rotating ground markers at guy anchor points, black bands on towers between the conventional white and orange bands. New night lighting rules are also proposed.

Adding emphasis to new "era of good feeling" between military aviation and telecasting industry, military and civilian members of Washington Airspace Subcommittee joined this week to approve proposals by Boston's WBZ-TV for new 1199-ft. tower—the second over-1000-ft. tower okayed by Pentagon since it imposed its unofficial "ban" on such towers last Jan. (Vol. 11:4). First was 1110-ft. for KWVL-TV, Waterloo, Ia. (Vol. 11:22).

Meredith Publishing Co. discloses, in report for fiscal year ended June 30, that 17.1% of its \$42,753,555 gross (\$7,309,857) was derived from its broadcasting operations, which consist of 4 TV and 4 AM stations (see *TV Factbook No. 21*, p. 53). Gross compared with \$41,298,782 in preceding year, of which 12.7% (\$5,244,945) came from TV-radio. Big Des Moines publishing house (*Better Homes & Gardens, Successful Farming*) earned net of \$3,623,865 (\$2.81 per share) vs. \$3,682,470 (\$2.85) in fiscal year ended June 30, 1954.

Guild Films sales for 9 months ended Aug. 31 exceeded 1954 total by \$500,000, and unbilled gross contracts now total \$3,785,000 vs. \$2,164,960 a year ago. Surplus has increased to \$1,403,000 vs. \$1,124,000 at end of last fiscal year. Pres. R. R. Kaufman also announced appointment of Joseph M. McDaniel Jr., secy., Ford Foundation, as chairman of Guild Films advisory committee on new business development and corporate expansion.

First \$1,000,000 gate for closed-circuit TV was predicted this week for Sept. 20 Marciano-Moore heavyweight championship bout, based on reports of heavy advance ticket sales by 127 theatres scheduled to carry telecast in 92 cities—greatest number ever booked for a theatre-TV event. About half the theatres carrying bout reportedly will use mobile projection equipment rented from Theatre Network TV Inc., which is presenting the theatre-telecast.

Signing up Los Angeles' KTTV for *Suzy and Halls of Ivy* series, TPA reports that it has done \$858,000 worth of business with that single station in last 2 years; KTTV specializes in film programming.

SCARCELY A CLOUD ON THE TRADE HORIZON: From RETMA pres. H. Leslie Hoffman come some amazing statistical projections which attest to the vitality of TV-radio business this year. In interview at RETMA quarterly meeting in N.Y. this week, he predicted:

TV production of 8,200,000, retail sales of 8,000,000 this year; radio output of 12,300,000, retail sales of 12,500,000. The TV figures, of course, represent new records -- exceeding the 7,463,800 produced in 1950 and 7,300,000 sold last year. Radio figures fall short of record but surpass the 10,400,000 made and sold in 1954.

Predictions presuppose normal seasonal uptrend in last 4 months of year, he said, noting that "from now until Christmas is usually our best season and there is no reason why it will not live up to this reputation in 1955". Hoffman then gave us these reasons why retail TV sales are so high:

(1) Robust economy: "People have money or credit and they're using it to buy the things they want most -- and TV is very close to the top of their preferences."

(2) Desire for entertainment: "A TV set is a seat to a show and everybody wants to see a show. And, I might add, the shows have never been better."

(3) Increased wear-out rate: "Replacement sales are booming because many, many sets are deteriorating to the point where it's impractical to repair them. It proves far more expedient and cheaper in the long run to buy a new set."

(4) Program competition: "The practice of networks in programming high-rated shows in competition with each other in same time position is stimulating second-set sales. The father may want to watch a ball game, the mother a dramatic show, and the kids a children's program -- all at the same time. So they buy second sets."

Hoffman's optimism was generally shared by virtually all manufacturers, big and small, attending RETMA sessions. So high was their exuberance, in fact, that only scant attention was paid to record-high inventories of 2,500,000 TVs.

There are few kicks these days from distributors and dealers, either. Thus there doesn't seem to be a cloud on the trade horizon as industry celebrates National TV & Radio Week starting Sept. 18 -- and it looks like smooth sailing in the near future at least.

* * * *

Revising production "mix" upward, to permit concentration on higher-priced sets where profit margins are greatest (Vol.11:37), is common practice in industry now -- but Emerson pres. Benjamin Abrams warns that it can be overdone. He told us that the practice, if abused, could result in artificial attempt to force production of higher-priced sets faster than public buys them. Next step, he said, would be to dump the excess on the market at cut-rate prices.

"The only way to raise prices is to raise them," he insists. Emerson is one of several companies which have recently increased lists -- others being Admiral, Motorola, DuMont, Stromberg-Carlson, Trav-Ler.

Abrams believes the 24-in. is a real comer, though -- and says Westinghouse's Dan Halpin "wasn't far off base" in last week's prediction that 24-in. would account for 20% of TV sales next year. Several other set makers, while agreeing that 24-in. is making headway, opined next year's figure would be 10-15%.

There's disagreement on whether 24-in. will gain at expense of 17 or 21-in. So far, the 24 gains have been the 17 loss -- but there are some who contend 17-in. market will stabilize itself and low-end 21-in. tables will lose ground.

Brief highlights of other major trade developments this week:

* * * *

DuMont Subsidiary: National distribution subsidiary, called DuMont National Distributors Inc., was established this week as means of shoring up distribution in "markets where we are unable to get strong independent distributors." DuMont system

is patterned on RCA Victor Distributing Corp., and its new pres. is Wm. H. Kelley, DuMont v.p.-gen. mgr. Fritz P. Rice, operations director of consumer products, is v.p. of new subsidiary. Explained Kelley: "We can't afford to ignore those markets [where independent distribution is not available] in the light of our long-range program for increased volume and product diversification." He said DuMont prefers independent distributors where available, plans to surrender factory distribution to a strong independent outlet subsequently in any market served by new subsidiary.

Tinkertoy: Emerson is still aiming to be first on market with "Tinkertoy" or modular, TV set (Vol.11:23-24). Pres. Benjamin Abrams told us he's still shooting for Jan. 1 as introductory date of Tinkertoy set, reported progress thus far as "very satisfactory." From several other manufacturers, however, come objections to Tinkertoy set in its present form. H. Leslie Hoffman, pres. of Hoffman Electronics, and Robert S. Bell, exec. v.p. of Packard-Bell, said they had found modular sets to be too inflexible in that they did not permit use of common components and would thus prove hardship in servicing. Hoffman stressed, however, that no engineering development should be ruled out forever. "The important thing," he said, "is to evaluate it in its present stage of development. Perhaps someone will come along with a refinement to make it entirely practical for our industry."

Whirlpool Merger: Distribution wheels began to churn in white goods industry this week, following overwhelming approval by stockholders of new Whirlpool-Seeger Corp. in which RCA and Sears Roebuck each owns about 20% (Vol.11:29-30). Rumors of impending distribution shift in Minneapolis flew thick and fast within hours after merger approval by 99% of stockholders of Whirlpool and Seeger. Minneapolis reports were that RCA distributor F. C. Hayer Co. would take Whirlpool line from Reinhard Bros., which would in turn take Norge line from W.R. Beamish Co. Though principals declined comment, reports were regarded as highly authoritative. You can look for similar shifts to pop up -- though RCA corporate exec. v.p. Charles M. Odorizzi, a director of Whirlpool-Seeger (along with RCA pres. Frank M. Folsom), has cautioned that distributor changes won't be abrupt (Vol.11:30).

Labor: Westinghouse strike ended Sept. 15 after month-long dispute idling 44,000 workers and halting production in 28 plants organized by IUE, including TV factory at Metuchen, N.J. Thirty factories with AFL or independent unions were not affected, including tube plant at Elmira. Strike started in big E. Pittsburgh plant and spread later to other IUE facilities in the sprawling Westinghouse organization. Rep. Kearns (R-Pa.) said he will sponsor amendment to Taft-Hartley Act to prevent such sympathy strikes in future. Meanwhile, strike at Bendix Radio in Baltimore entered 4th week as we went to press, with little sign of settlement. Negotiations between International Assn. of Machinists and company appeared deadlocked, despite efforts of Federal Conciliation and Mediation Service to get parties together. On another labor front, Raytheon this week signed new contract with IBEW in all Mass. plants calling for 3% wage increase this year and next.

Fair Trade: GE keeps fair trade fires burning almost single-handedly these days, following Westinghouse's decision to leave field (Vol.11:36). In Milwaukee, company asked Federal Judge Tehan to reconsider his earlier refusal to grant an injunction against Milwaukee Boston Store to prevent big retail outlet from cutting prices on GE small appliances. And in Portland, Ore., GE filed notice of appeal to State Supreme Court in effort to reverse Circuit Court decree dismissing its complaint against R.H. Whale Co. on price-cutting charges. Sept. 12 Advertising Age editorialized: "It is our personal impression that fair trade will become progressively weaker as long as the economy is as vigorous and as healthy as it seems to be at present. That is because the fair trade concept is relatively less important in good times than in times of stress. Fair trade was invented as a tool to equalize competition between the 'giant chains' and the 'small independent' in the days when the struggle for business survival was earnest and intense to [a] painful degree."

Production: TV output totaled 183,912 week ended Sept. 9, compared to 185,114 preceding week and 167,471 week ended Aug. 26. It was year's 36th week and brought TV production to date to about 5,175,000 vs. 4,300,000 in same 1954 period. Radio

production totaled 234,812 (96,394 auto units) week ended Sept. 9, slightly up from 226,774 in preceding week but under the 239,401 in week before. For 36 weeks, radio production totaled 9,100,000 vs. 7,200,000 in corresponding period year ago.

Retail Sales: More new records were piled up in first 7 months, RETMA report showing 3,584,562 TVs sold at retail in Jan.-July period, 13% higher than in record 1954 when 3,174,394 sets were sold. July sales set record of 381,567, only little under the 430,347 sold in 5-week June and above the 368,634 of July 1954. Radios sold in first 7 months, excluding auto sets, totaled 2,732,983 vs. 2,822,090 in corresponding 1954 period. July sales were 303,965, compared to 421,387 in June and 411,197 in July 1954.

Trade Personals: R. Lee Waterman, ex-Montgomery Ward, named gen. mgr. of Corning Glass consumer products div., succeeding John Carter, now v.p.-gen. mgr. of new products div.; Stannard H. McKibben promoted to supervisor of TV bulb applications engineering and packaging, Corning electrical products div. . . Bruce W. Bragg, ex-RCA, named asst. sales mgr., Westinghouse TV-radio div.; Russell W. Johnson, ex-DuMont, named asst. adv. mgr. . . John D. Thuet, Sylvania regional mgr. for Philadelphia & Pittsburgh, named radio sales mgr. of TV-radio div., replacing Aaron Bowser, resigned . . Alfred C. Werner promoted to mgr. of Raytheon's new Pittsburgh sales & service office, reporting to Harold N. Herndon, Cleveland district mgr. of equipment marketing div. . . John H. Riddel, ex-Capehart-Farnsworth, named merchandise planning mgr., Sylvania TV-radio div. . . Robert M. Van Brundt, Motorola adv. mgr., moderated panel discussion on manufacturer-to-dealer direct mail ad techniques Sept. 14 at Chicago convention of Direct Mail Adv. Assn. . . James E. McGarr promoted to gen. mgr., Sylvania tungsten & chemical div., reporting to operations v.p. John B. Merrill . . John E. Riesenfeld, home merchandising mgr., *Good Housekeeping Magazine*, becomes pres. & publisher, *Radio and Television Weekly*, succeeding Edward H. Davis, who remains as consultant . . Robert G. Hess appointed Sparton eastern Mich. zone mgr., Port Huron . . J. A. (Shine) Milling, Howard W. Sams Co., and Norman A. Triplett, Triplett Electrical Instrument Co., named co-chairmen of RETMA jobber relations committee . . Wm. Griffith resigns as Bendix Radio New England regional mgr., his duties assumed by eastern mgr. Paul McLaughlin . . Edward Kedziora promoted to v.p. in charge of Sonora contract sales . . Thomas M. Schubert named staff attorney, International Resistance Co.

* * * *

Packard-Bell exec. v.p. Robert S. Bell says recent decisions of some TV manufacturers to design "California-style" receivers for exclusive marketing on west coast (Vol. 11:33) justify his oft-stated position that "there's no need for a western manufacturer to go east; they're coming out to us." He told us Packard-Bell has no plans to extend its distribution beyond its present 11 western states and Hawaii. "To sell in the east you need an eastern facility," he said. "Coming in as a newcomer would be highly unprofitable—at least at the start." Packard-Bell this week added one 21-in. table model at \$180 and four 21-in. consoles at \$200, \$250, \$300 & \$330.

James Emanuel Hahn, 63, founder of old DeForest Radio Corp. of Canada, later known as DeForest-Crosley, died last week at his summer home in Cambellton, N.B. He was pres. of John Inglis Co. Ltd. and English Electric Co. of Canada when he retired in 1951. Surviving are wife, 2 sons and a daughter.

Wallace L. Gifford, a v.p. & director of Raytheon, recently serving as its general consultant, died Sept. 9 at home near Waltham, Mass.

HIGHWAY HI-FI is what CBS-Columbia and Columbia Records call their special new 16 $\frac{2}{3}$ rpm auto-phono-record package, which will be offered as optional equipment in Chrysler's 1956 line. Invented by Dr. Peter Goldmark, pres. of CBS Labs, phonograph is mounted under dashboard, plugs into car radio by jack, plays through radio speaker, draws power from car battery. It's manually operated, attached by rubber shock mounting to offset vibration, with special "damping" process to keep needle in grooves while car turns corners.

Special package of six 7-in. Columbia records, with up to 35 min. of playing time on each side, will be offered Chrysler purchasers for still-undetermined price. Phono and records are being made exclusively for Chrysler, whose transistorized radios are made by Philco.

Auto companies are also experimenting with transistorized radios that can be removed from dashboards and used as portables, according to R. W. Snyder, sales mgr., electrical div., Olin Mathieson Chemical Corp. (batteries). Predicting battery industry boom, with a \$100,000,000 market in cells for transistor radios within 3 years, he said these sets eventually may replace conventional home receivers. New *Jobber News* market guide reports 31,300,000 auto sets in use in 1954, and 42,400,000 radio homes out of total of 45,300,000 homes.

Note: Transistorized electric clocks will be in every auto in 5-10 years, predicts GE exec. v.p. Roy W. Johnson. He said the new clocks, requiring no plug-in-cord, will be marketed within 6 months. By 2 years they will have no moving parts, he predicted.

DISTRIBUTOR NOTES: CBS-Columbia appoints Tom P. McDermott Inc., 1400 S. Boston, Tulsa (Tom P. McDermott, pres.) . . R. P. McDavid & Co., Birmingham (RCA) opens branch at 418 N. Royal St., Mobile . . Olympic Radio creates factory branch, Olympic Television of Northern Ohio Inc., 4019 Prospect Ave., Cleveland (Robert S. Boak, gen. mgr.) . . Trav-Ler Radio opens new factory branches in Cleveland & Milwaukee . . Emerson Radio of Texas appoints H. L. Horton, ex-W. T. Grant Co., as San Antonio branch mgr. . . Canadian Westinghouse Supply Co. Ltd. promotes M. M. Elliott, TV-radio sales mgr. & onetime gen. mgr. of Motorola of Canada, to gen. sales mgr. of consumer products div.; P. W. Heron named asst. sales mgr. . . Admiral Distributors Inc., San Francisco, appoints Winifred Kenny, ex-McCormack Co., as adv. & sales promotion mgr. . . G. W. Onthank Co., Des Moines (Admiral) promotes Frank A. Hutton to sales promotion mgr. . . Philco Distributors Inc., Chicago, appoints Mort Siegel, ex-Main-Line Distributors, as sales mgr. for washers & freezers . . John W. Walter Inc., Long Island City (Bendix Radio) appoints Sidney Gutman, ex-O'King & Co. Adv., as gen. mgr. . . American Elite Inc., N. Y., exclusive U.S. agent for Telefunken radios, reports resignation of John Buckley as field sales mgr.

Topics & Trends of TV Trade: War against used-tube racketeers intensified this week when Sylvania offered \$1000 reward for information leading to arrest and conviction of any individual or company fraudulently branding Sylvania name on tubes. RCA, GE and several other leading tube makers are offering full cooperation to legal authorities in industry-wide drive to stamp out a racket which Philco estimates is costing TV-radio users \$100,000,000 a year. Philco itself has launched campaign to smash racket by offering 5¢ credit for each old tube turned in by servicemen, then destroying it (Vol. 11:33).

"We're taking off the gloves," wrote Sylvania electronic sales mgr. D. W. Gunn to service dealers, "to fight the criminal practices that are robbing service dealers, customers and manufacturers alike." He urged them to take full advantage of the reward offer. "Counterfeiting is injuring your reputation and your business now," he wrote. He said the racket works this way:

The racketeer buys used tubes for 1¢-3¢ each from handful of unscrupulous service dealers. They are cleaned and polished, and the original manufacturer's name buffed off. Then they're rebranded with a top company identification and sold as new to local distributors for as much as 80% of market price. Cathode-ray tubes are subjected to heating process called "toasting" to restore them to temporary usefulness, and the "burn mark" removed by blow torch before washing, polishing and rebranding.

Note: *New York Times* business writer Alfred R. Zipsper Jr. devoted Sept. 11 column to racket, quoted technical official of unidentified company: "The tube crooks foul up the vast market for replacement tubes and don't do anything good for sales of complete TV and radio receivers either."

* * * *

New appeal to Federal Trade Commission to obtain modification of its rules on designation of used tubes and screen measurements was authorized this week by RETMA board, as predicted (Vol. 11:37). On recommendation of set and tube divs., board directed counsel Glen McDaniel to gather all necessary facts for new petition. At 3-day N. Y. meeting, board also authorized NTSC to stage color TV demonstration for foreign delegates of International Radio Consultative Committee (CCIR), in cooperation with State Dept., next March in N. Y. Other board actions: (1) Elected E. C. Anderson, exec. v.p. of RCA commercial dept., as RCA's representative on board and on set div. exec. committee, succeeding L. W. Teegarden, resigned. (2) Chose Hot Springs, Va., for annual joint conference with RETMA of Canada, Sept. 27-29, 1956. (3) Approved formation of new guided missiles committee in expansion of military products activities.

Radio Craftsmen Inc., Chicago hi-fi manufacturer, has been purchased by Precision Radiation Instruments Inc., Los Angeles, to be operated as wholly-owned subsidiary. John H. Cashman, pres. of Radio Craftsmen, will serve as adviser until end of year.

Novel promotion: A new RCA Victor 5-in. plastic 78rpm record will be inserted in each copy of Nov. *Pageant Magazine*, carrying article on singer Jaye P. Morgan. It will be miniature version of her latest RCA recording.

DuMont adds 21-in. console, called "Carter," priced at \$240 in ebony, \$250 in limed oak—with aluminized picture tube, tinted safety glass and removable front.

Emerson to spend \$8,000,000 in 1956 ad campaign, biggest in its history, pegged to theme: "Wherever You Look . . . There's Emerson." Agency is Grey Adv.

Zenith adds 24-in. table model at \$260 and 24-in. console at \$340, plus 2 new table phonos at \$300.

GE cut \$2 off price of 4 of its 14 clock radios—bringing price leader down to \$23, with 3 others reduced to \$28.

Electronics Reports: Southern California, notably the Los Angeles area, has been boasting in recent years that it's the center of the burgeoning electronics industry—due to big contracts going to aircraft firms. But the cradle of U. S. industry, New England, is doing all right in that field, too; indeed, it's being rescued from possible oblivion by the electronics boom, says editor Malcolm S. Forbes in Sept. 15 *Forbes Magazine*.

Despite loss of textile industry to south and despite disastrous floods, Mr. Forbes points out, New England's industrial survival is succeeding, thanks in great measure to electronics. During gloomy 5 years when fading textile industry put 100,000 workers on streets, electronics plants alone added jobs for 50,000. Article states:

"It is a real tribute to the workers and entrepreneurs of the area that New England has garnered more than its share of this fast-growing industry. With just 6% of the U. S. population and 8% of its industrial workers, New England has nabbed 15% of the electrical machinery business. Raytheon, for example, is a New England firm . . . GE has no less than 17 plants in the area, is spending \$40,000,000 to modernize its Lynn, Mass. works. General Dynamics Corp. is a big . . . employer. So is Sylvania . . ." Before recent flood, New England economists had predicted 17% share of electronics industry in 1955.

Yankee refusal to accept defeat is emphasized, and cities' determination to avoid "ghost town" status by attracting new industry is pointed up by Lowell, Mass. which built plant for CBS-Hytron to offset loss of textile mills while Lawrence, Mass. is getting 3400-employee Western Electric factory.

* * * *

Radio engineering's highest award, the IRE Medal of Honor, will be presented next spring to John V. L. Hogan, president of Hogan Laboratories Inc., founder of New York's WQXR, and a founder and ex-president of IRE. Hogan was cited by IRE "for his contributions to the electronic field as a founder and builder of the Institute of Radio Engineers, for the long sequence of his inventions, and for his continuing activity in the development of devices and systems useful in the communications art."

Morris Liebmann Memorial Prize, IRE's award to the member who has made a recent important contribution to radio engineering, goes to Bell Labs' Kenneth Bullington for studies and application of "scatter" principle of long-distance radio transmission (Vol. 11:32).

Wilbur S. Hinman Jr., director of Diamond Ordnance Fuse Laboratories, Washington, was named to receive Harry Diamond Memorial Award, for govt. employes for outstanding radio-electronics work. Award was for his work in fields of meteorology and proximity fuses.

Note: For nominees for 1956 IRE officers and directors, see Vol. 11:35, p. 11.

■

Kaye-Halbert's amended Chapter XI plan has been upset by govt.'s revision of its earlier offer to accept only part of its \$105,000 claim. New petition by Govt. contends that general unsecured creditors must subordinate their claims until all demands of Govt. have been satisfied. Hearing on confirmation of new plan has been postponed to Sept. 22 in Los Angeles Federal Court.

Sylvania opened new \$2,500,000 avionics & missiles system lab at Waltham, Mass. Sept. 15, designed as combination military-commercial electronics research center. In dedication speech, chairman-pres. Don G. Mitchell revealed Sylvania electronics div. held \$50,000,000 in defense contracts, mostly research & development.

Admiral broke ground for new Palo Alto, Cal. electronic research lab this week. Staff headed by Robert M. Jones will handle military projects (guided missiles, radar, etc.) and civilian products research & development.

Financial & Trade Notes: Admiral's position in the industry, despite reduced first-half revenues and earnings (Vol. 11:33) and despite fluctuations of stock so far this year between 30¼ and 21¼, is strongly boosted in 21-p. printed report released by Glore, Forgan & Co., Chicago & New York, which traces its fiscal history and appraises its prospects and market position thus:

"Unless there is an unexpected slump in sales of civilian goods, the outlook is favorable for higher sales and earnings in the last half than the excellent levels in the corresponding period of 1954. Sales are reported to have moved ahead of last year in June and should show increasing gains during the balance of the year in comparison to 1954 when defense sales were declining. As a result of two recent price advances covering different models, a substantial part of the TV line has been increased \$10-\$20 per unit, which should improve dollar sales and profit margins. For the full year, it is estimated that sales will run slightly ahead of the 1954 level of \$219,600,000 with per share earnings a little above the \$2.78 reported in 1954. [For profit-&-loss and other fiscal data for each year from 1950 through first quarter 1955, see *TV Factbook No. 21*, p. 380.]

"At the current market price of 21½ [now 22½], Admiral Corp. common stock is selling approximately 7.7 times tentative earnings projections for 1955. Considering the company's record of growth, the stock appears reasonably priced in the current market in relation to other leading companies in the same fields of endeavor. The dividend yield of 4.7% also compares favorably with the yield provided by stocks of other companies in the TV-appliance fields."

Report shows approximately 65% of Admiral's 1954 sales were TV, radio & govt. equipment, remaining 35% being refrigerators (7% of industry output), freezers, electric ranges, air conditioners. It's one of top 3 among 68 TV producers which are said to be "approximately equal in size and estimated to account for a little less than one-third of total sales." Its competitive position was said to be strengthened last year by development of high speed automatic machines which assemble about ¼ of the 231 electrical components in a TV chassis. Admiral is also building the equipment and up to end of Aug. had delivered the first third (14 out of 44 heads) to the RCA

Paine, Webber, Jackson & Curtis, in Sept. 1 investor report, reveals RCA is "actively developing automatic electronic business control equipment, but as yet has not made any public announcement regarding commercial developments." However, it's stated, trade sources believe commercial units will be introduced soon, launching company into a rapidly growing field which "may reach an annual volume of \$1 billion within 10 years." Report adds: "Assuming RCA obtains 20% of the industrial volume, one can visualize additional sales volume of \$20,000,000 annually for RCA eventually." Also predicted is transistor boom, with present factory sales of \$6,000,000 reaching \$300,000,000 in 5-8 years. Report is highly bullish on RCA, as was Carl M. Loeb, Rhoades & Co.'s 42-p. report of week earlier (Vol. 11:34) which predicted \$1.7 billion revenues for RCA by 1959-60. Note: RCA is expected to realize \$1 billion or more billings this year (Vol. 11:31); its capitalization now is \$384,199,189, of which stockholders' equity is \$234,199,189.

Olympic Radio & Television Co. earned \$158,722 (35¢ per share) on sales of \$8,352,742 in 6 months ended June 30, vs. \$76,993 (17¢) on \$9,342,768 in same period last year. Working capital increased to \$3,184,282 from \$2,915,003; outstanding shares now are 453,522 vs. 431,925 as result of 5% dividend last April.

TV plant in Indianapolis, having signed RCA to 5-year license.

Outlook for Admiral appears favorable for coming year, says report, though defense deliveries (radar, radio-activity detection, walkie-talkies, air-to-ground TV, IFF aircraft identification, all-channel transmitter-receiver for aircraft) have gone down from Korean War peak of \$5-\$6,000,000 per month to about \$2,000,000 monthly in final quarter of 1954 and first half of 1955. Latter rate "is expected to continue for balance of 1955." It was this decline which largely caused 1954 and first-half 1955 gross & net to decline under preceding periods.

* * * *

Noteworthy in report on Admiral by Glore, Forgan & Co. are several tables that compare (1) sales growths of that company with other companies during the postwar period and (2) their pre-tax profit margins. Using 1947 index of 100, this is sales index table:

Index of Sales (1947 = 100)

	Admiral	Motorola	Philco	RCA *	Sylvania	Zenith
1947	100	100	100	100	100	100
1948	139	143	122	114	104	97
1949	234	174	95	127	107	125
1950	481	376	148	187	170	169
1951	388	287	135	191	212	139
1952	399	358	162	221	246	173
1953	524	462	190	271	306	210
1954	458	435	154	301	294	175

* Gross revenues.

Second table shows profit margins in the industry have not been high, with exception of 1950 when the sellers' market in consumer durable goods, especially TV sets, resulted in unusual profits for all producers. Here's the second table:

Pre-Tax Profit Margins

	Admiral	Motorola	Philco	RCA	Sylvania	Zenith
1947	7.9%	9.5%	9.6%	9.4%	3.0%	7.6%
1948	9.0	8.8	7.2	11.5	6.3	6.8
1949	12.1	10.5	3.3	10.6	5.0	11.4
1950	16.6	15.5	10.1	16.6	12.0	13.1
1951	10.1	10.4	7.2	10.4	13.1	10.7
1952	10.2	9.2	7.0	9.8	7.5	9.6
1953	8.5	7.1	7.0	8.5	8.3	8.2
1954	7.1	8.1	3.0	8.9	6.5	8.5

Raytheon earned net profit of \$764,000 (27¢ per share) on sales of \$39,184,000 in third quarter vs. \$1,102,000 (40¢) on \$44,698,000 in same 1954 period, reflecting reduced govt. volume and lower profit margins, according to report by pres. Charles Francis Adams Jr. at Sept. 17 annual meeting. Unfilled defense orders as of Aug. 31 totaled \$95,000,000. Adams said that in next 6 months Raytheon will triple production of transistors and that his company is doing more business in transistors than all of its competitors combined.

Among officers' & directors' stock transactions reported by N. Y. Stock Exchange & American Stock Exchange for August: Donald L. Millham bought 2100 GE, holds 4709; E. V. Huggins bought 1000 Westinghouse, holds 2124; C. Russell Feldman acquired 371,520 National Union Electric on conversion of preferred, holds 393,020 indirectly; Gerhard G. Schneider and Mrs. Elise C. Schneider bought 2000 National Union Electric, hold 4000.

ABC-Paramount will redeem 150,000 shares of 5% preferred stock (\$20 par), effective Oct. 20, at \$21.05 per share, including 25¢ accrued dividend. Specific shares will be selected by lot at close of business Sept. 20 when books will be closed to further transfer of selected shares. Retirement, plus 84,790 shares previously purchased on open market, will leave 373,257 outstanding.

Color Trends & Briefs: New 3-vidicon live color camera, keystone of RCA's industrial color TV plans, was demonstrated to mass audience for first time Sept. 12 at Congress of International College of Surgeons in Philadelphia (see below). RCA will go into commercial production of 3-V industrial color systems for industrial and medical purposes next year, developing "specialized gear for all fields," according to engineering products v.p. Theodore A. Smith.

Advantages of 3-V camera over image orthicon for closed-circuit industrial use: lower price (unannounced) and compactness (weight & size about same as black-& white studio camera). As opposed to field sequential industrial color systems being pushed by GE and CBS, RCA lists as an advantage the fact that it is compatible with commercial standards and can use commercial relay facilities and commercially available receivers.

At medical demonstration, more than 1000 surgeons in Philadelphia's Convention Hall witnessed removal of internal growth from a patient in Veterans Administration Hospital, the signal relayed by microwave for viewing on 15x20-ft. projection screen and on standard 21-in. color sets. New 3-V camera picked up close details of the operation, while standard studio-type color cameras provided wide-range views of operating room activity and microscope views of tissue specimen.

Smith emphasizes that the 3-V color camera—at least at present—is not suited to live broadcast studio work, because of its low sensitivity as compared to image orthicon camera. The 3-V system is included in \$425,800 closed-circuit color installation at Washington military medical centers, for which RCA was awarded contract last week (Vol. 11:37).

* * * *

Network color telecasting problems will be subject of roundtable at SMPTE's Lake Placid, N. Y. convention Oct. 6. NBC color TV development director Robert E. Shelby, CBS engineering v.p. Wm. B. Lodge, ABC engineering v.p. Frank L. Marx will discuss large scale color operation effect on studio equipment, lighting & techniques. AT&T asst. engineering operations director Frank A. Cowan will cover technological changes required in network color transmission; WTMJ-TV engineering mgr. Philip B. Laeser will explain problems of outlying stations in delivering adequate signals to receivers. H. N. Kozanowski & S. L. Bendell, RCA, will deliver paper on color-metric problems in using film; R. G. Williams, Century Lighting Inc., will discuss control of studio lighting spectral quality.

WDBJ-TV, Roanoke (Ch. 7), due on air this month, has ordered DuMont color multiscanner & 2 camera chains.

"Progress report" on GE color tube development will be given to 20 TV set manufacturers during next 3 weeks at series of half-day demonstrations and discussions at Syracuse plant—but company emphasizes that its color tube is still in developmental stage "and may not be ready for production lines until 1957." Demonstrations will feature GE's "post-acceleration" tube, said to be 3-gun 21-in. rectangular, but tube dept. gen. mgr. J. M. Lang stresses that the meetings will "in no sense be announcement of a new product." Rather, he said, they're intended to show "precisely how we have spent several million dollars in color picture tube development during the past 2 years." GE's color tube is said to use grid behind screen to increase velocity of electrons, which strike color phosphors placed on screen in vertical rows.

Network color schedules for next 2 weeks: NBC-TV—Sept. 19-23 & 26-30, *Home* segments, 11:45-noon, and *Howdy Doody*, 5:30-6 p.m.; Sept. 19, *Producers' Showcase*, "Our Town," starring Frank Sinatra, Eva Marie Saint & Paul Newman, 8-9:30 p.m.; Sept. 27, new *Milton Berle Show* featuring Esther Williams' TV debut, 8-9 p.m.; Oct. 1, *Max Liebman Presents "Heidi,"* starring Jeannie Carson & Trio Shmeed, 9-10:30 p.m. CBS-TV—Sept. 24, *Ford Star Jubilee*, starring Judy Garland & David Wayne, 9:30-11 p.m.; Sept. 27, *Red Skelton Show*, 9:30-10 p.m.

Lineup of talent for second of NBC-TV's *Color Spread* series, based on the book *Show Biz* authored by *Variety's* Abel Green and the late Joe Laurie Jr. and scheduled for Sun. Oct. 9, 7:30-9 p.m.: Groucho Marx as "grand marshal" with Rosemary Clooney, Dennis Day, Paul Gilbert, Phil Harris, Beatrice Kay, Buster Keaton, Eartha Kitt, Bert Lahr, Shirley MacLain.

Big RCA tube plant at Lancaster, Pa., recently converted to color tube production, will add 285,000 sq. ft. of building space to bring total to more than 1,000,000 sq. ft. in what tube div. v.p. D. Y. Smith describes as "another major step in RCA's stepped-up production of color picture tubes." Nearby 14-acre tract was purchased from Stehli & Co.

Canadian coast-to-coast color TV networking will be possible by 1958, said Canadian Bell pres. Thomas W. Eadie at Sept. 12 directors luncheon, Canadian National Exhibition. In 3 years, he said, the world's longest microwave relay route—from Halifax to Vancouver, 4000 mi. via 160 hops—will be completed and fully equipped to carry color programs.

Filmed color TV series, in 39 episodes, 5-min. *Sam Sneed Show* (golfing tips), now being offered to stations and sponsors by RCA Recorded Program Services.

RCA delivered live color camera Sept. 15 to School of Radio Techniques Inc., N. Y.

"University of the World" with lecture rooms and speakers' platforms all over the earth through medium of TV was envisioned by Dr. Alfred N. Goldsmith, editor emeritus of the *Journal of the IRE*, original chief engineer of RCA, now a consultant, in address to Congress of International College of Surgeons in Philadelphia Convention Hall as prelude to closed-circuit color TV medical demonstration (see above). "TV symposia or conventions," said Dr. Goldsmith, "provide new means for tying together, by interconnection, widely separated hospitals and thus combining them into the super-clinic of the future. Cable or radio-relay circuits already carry TV thousands of miles and could be engineered to carry TV sessions over any terrestrial distance . . . It may well lead to a basically expanded type of educational institution [which] could tie together scientists, doctors, teachers, demonstrators and students into one vast and integrated audience. Clearly, TV can add to the 'University of the World' its

necessary adjunct, the 'Library of the World.' Thus electronics will in the future make available to the surgeon or physician anywhere at least as much information as he may desire and can assimilate from any central or regional source anywhere on this planet!"

Dividends: Motorola, 37½¢ Oct. 14 to stockholders of record Sept. 30; ABC-Paramount, 25¢ Oct. 20 to holders Sept. 23; IT&T, 35¢ Oct. 15 to holders Sept. 23 (increased); Dynamics Corp., 10¢ Sept. 30 to holders Sept. 22; GE, 40¢ Oct. 25 to holders Sept. 23; Standard Radio Ltd. "B," 15¢ Oct. 11 to holders Sept. 2; Packard-Bell, 12½¢ Oct. 25 to holders Oct. 10 (increased); Collins Radio, 50¢ Oct. 1 to holders Sept. 20.

IT&T consolidated net income was \$11,411,701 (\$1.59 per share) on revenues of \$227,975,928 for 6 months ended June 30 vs. \$10,112,810 (\$1.14) on \$198,926,281 for same 1954 period.

Network TV-Radio Billings

July 1955 and January-July 1955

(For June report see *Television Digest*, Vol. 11:31)

NETWORK TV BILLINGS dipped in July to lowest since Sept. 1954, aggregating \$29,996,679, but ran well ahead of the \$22,944,803 of July 1954, according to Publishers Information Bureau, reporting Sept. 14 (more belatedly than usual). Network radio also went to new monthly low of \$8,273,365 vs. \$9,529,016 in July 1954. Each of the TV networks was down, with DuMont trickling to mere \$131,105.

TV's 7-month cumulative was \$227,172,548 vs. \$172,957,857 for same 1954 period; radio was \$69,976,389 vs. \$84,058,330. The PIB report:

NETWORK TELEVISION

	July 1955	July 1954	Jan.-July 1955	Jan.-July 1954

* In order to maintain continuity and comparability with previously published data, an adjustment factor of 1.817 has been used by PIB in calculating gross network radio time charges for those nighttime network radio programs where ABC Rate Card No. 6 was in effect.

† Revised as of Aug. 14, 1955.

Note: These figures do not represent actual revenues to the networks, which do not divulge their actual net dollar incomes. They're compiled by Publishers' Information Bureau on basis of one-time network rates, or before frequency or cash discounts, so in terms of dollars actually paid may be inflated by as much as 25%. However, they're generally accepted in the trade as an index.

Three applications for new TV stations were filed this week with FCC, bringing total pending to 157 (20 uhf). Week's applications: For Boston, Ch. 38, by Herbert Mayer, former owner of WXEL, Cleveland and KPTV, Portland, Ore. (Ch. 27), who recently applied for Philadelphia's Ch. 23 (Vol. 11:20); for Laurel, Miss., Ch. 7, by group of Laurel & Meridian businessmen headed by Meridian Mayor Wm. S. Smylie; for Clovis, N. M., Ch. 12, by farmers S. S. & S. W. Pipkin. [For details, see *TV Addenda 21-J* herewith; for complete listings of all grants, new stations, applications, etc., see *TV Factbook No. 21* with Addenda to date.]

FCC Comr. Robert E. Lee, serving only his second year of 7-year appointment, branded as "just plain nonsense" rumor rampant throughout Washington this week that he's quitting to become an executive of General Tele-radio Inc.

ADVERTISER expenditures on national spot TV will be reported on scientific basis, by companies and by brands, under plans evolved this week by Oliver Treyz, pres. of Television Bureau of Advertising, which now boasts 153 stations, 8 rep firms, 2 networks as members and which, with income now running \$526,000 a year, is rapidly gaining same stature in its field that ANPA Bureau of Advertising enjoys in newspaper field.

First report will cover fourth 1955 quarter, probably will be made available in Feb. 1956, but meanwhile Treyz estimates year's total for national spot TV will approximate \$275,000,000, up from the \$205,200,000 estimated by McCann-Erickson researchers for *Printers' Ink* (Vol. 11:34). That estimate includes talent & production as well as time costs—what the advertiser actually spends; McCann-Erickson figures that the talent & production factor for TV spot is 1.17 times net time cost.

TvB is working with N. C. Rorabaugh Co., publisher of *Rorabaugh Reports* on spot advertising, in development of its quarterly reports, having tested accuracy of Rorabaugh's listings and found them good basis for over-all projections. Rorabaugh will continue to issue *Rorabaugh Reports*, which are based on cooperation of individual stations and enjoy high industry acceptance.

According to Treyz, the new TvB grand totals and individual company & product breakdowns will "eliminate a situation whereby various trade journals and competing media have measured TV as defined strictly by its network facilities dimensions, as regularly reported by PIB." Spot TV, he said, is "one of the last major elements of advertising whose expenditures will be lifted out of mystery and haze into light and focus."

Monthly PIB reports (see adjacent column) cover network time sales only, do not purport to embrace total advertising expenditures on networks. Moreover, they're gross figures, based on one-time rates, so that they must be discounted by as much as 25% to get an approximation of actual network take. *Printers' Ink* report for 1954 estimated advertiser expenditures on networks at \$417,900,000, including talent & production, this total being reckoned by McCann-Erickson as running 1.75 times net time cost.

Subscription TV front was relatively quiet this week, partisans on both sides assuming policy of watchful waiting, following last week's filing of replies to arguments of opponents (Vol. 11:37). Battleground shifted from Washington to Cincinnati this week as WCPO-TV televised 3-day series of debates featuring principals of pro- and anti-fee-TV factions—including Zenith's Ted Leitzell, Skiatron's Robert Hall, Telemeter's Paul McNamara, Jerrold's Milton Shapp, and Trueman Rembusch of movie exhibitors' Organizations for Free TV. In addition to 3 televised debates, station planned hour-long demonstration of all fee-TV systems. Meanwhile, Allentown's off-air WMFZ-TV (Ch. 67), which has offered to serve as guinea pig for 3-year pay-TV tests (Vol. 11:31), told Commission it was "surprised" and "aggrieved" over opposition by subscription-TV opponents to its proposal. It assured FCC it has "no axe to grind, pro or con," just wants to be of assistance in getting at the facts.

NARTB station insurance chart and checklist, prepared by research mgr. Richard Allerton, was mailed to all members this week as guide to types of insurance policies needed in station operations. Duplicate checklist should be returned to NARTB for analysis of industry's position in insurance protection.

SUMMARY - INDEX OF THE WEEK'S NEWS — September 24, 1955

TV ADVERTISERS SPENDING \$1 billion-plus this year for time, talent, etc.; networks account for half, spot for \$275,000,000, local \$250,000,000 (p. 1).

TV SET SATURATION mostly in metropolitan areas, north-east region leading (79.9%), reports Census Bureau; only 45.9% TV homes in rural areas (pp. 2 & 4).

NEW ALLOCATIONS STUDY launched by RETMA with FCC blessing, as Commission begins its network investigation. Lee & Hyde amplify views on allocations (p. 2).

BIG LEAGUE BASEBALL attendance declines blamed on TV; situation to be taken up by club owners at meetings following World Series (p. 3).

FEE-TV AS ELECTION issue, proposed by Sarnoff, gets cool reception from politicians and evokes sharp retort from McDonald; other subscription TV news (p. 5).

FCC GRANTS 2—uhf in Orlando, Fla., vhf satellite in Neb.; new Zone I ceilings postponed again. Initial decision favors Spartanburg site move (p. 8).

COLOR SET SALES RISE under influence of big promotions, expansion of programming, TV & Radio Week merchandising push; no price cuts due soon (p. 11).

SET OWNER PAYS only 3¢ an hour for TV, says RETMA pres. Hoffman: average price \$200, trade-in \$30-\$40, servicing \$14. Set's life-span put at 7 years (p. 13).

FINANCIAL DETAILS of new DuMont structure in proxy statement for Oct. 10 meeting. Pro forma statements show network earned money, stations lost (p. 9).

AIR FORCE \$2.4 billion contract with AT&T for vast communications network becomes political football; Democrats order full-scale investigation (p. 15).

LONDON LIKES commercial TV, especially idea of competition to BBC, after seeing debut Sept. 22. Expanding program interchanges with U. S. seen (p. 8).

ADDED STARTERS: Roanoke's WDBJ-TV, Ohio State's WOSU-TV, 29th in Canada. Sioux Falls TV tower collapses, hurricane delays N. C. upcomer (p. 10).

HOW MUCH THE ADVERTISER IS SPENDING ON TV: We've been predicting for some time that 1955 advertising expenditures on the TV medium would exceed \$1 billion, up from the \$803,600,000 of 1954 as calculated by McCann-Erickson for Printers' Ink (Vol. 11:34). We can now document that prediction on the basis of trade figures at hand -- figures that are astonishing, to say the least. And all the more astonishing when you consider that this year will mark the end of TV's first decade of commercial existence; that the 1955 figure compares with a mere \$500,000 of gross revenues reported by 10 stations in pre-network 1946 (see TV Factbook No. 21, p. 20). Here's our reckoning:

As in the early days of radio, when network time sales dominated, the biggest factor in TV sales are the networks. Last year, they accounted for \$417,900,000 of time, talent & production combined, a little more than half. This year, they will account for \$525,000,000, or exactly half.

Spot is next biggest item. Last year, spot aggregated \$205,200,000 in time, talent & production, according to the McCann-Erickson estimate. This year, according to TvB's Oliver Treyz, who is in a good position to predict, the figure will go to \$275,000,000 (Vol. 11:38.) Sponsor Magazine, incidentally, predicts \$266,760,000.

Local TV advertising aggregated \$180,500,000 last year. It should rise to at least \$250,000,000 this year, according to the best available advices.

The 3 categories thus total \$1,050,000,000, up nearly 25% over 1954. That's for everything -- time, talent, production. And, as best we can figure it, their expenditures for time alone will break down about \$300,000,000 network, \$235,000,000 spot, \$165,000,000 local. That's figured on the basis of network running 1.75, spot 1.17, local 1.5 times the cost of time -- McCann-Erickson equations.

The figures, though startling at first blush, look reasonably right to us, though we assume direct responsibility only for doping out the network expenditures. Here's how: PIB aggregate of network time sales for first 7 months of this year is slightly over \$227,000,000 (Vol. 11:38). For the 12 months, it should easily go to \$400,000,000 -- on basis of more shows sold, bigger networks, higher station rates.

PIB derives its figures from adding up one-time rates, so does not take into account frequency or cash discounts. A fair estimate is 25% off, so we arrive at \$300,000,000 as a more realistic estimate of what networks actually get. Multiply by McCann's 1.75 factor to cover talent & production -- and we get \$525,000,000.

That's half of the entire business of telecasting. It also indicates that on network TV alone advertisers are spending as much as on radio as a whole -- taking into account declining network, rising spot, rising local revenues. On radio as a whole, 1954 advertisers spent \$564,900,000; and according to the 1955 Broadcasting-Telecasting Yearbook, time sales in 1954 reached an all-time record of \$453,385,000.

WHERE THE TV SETS ARE--AND WHO OWNS THEM: Four out of 5 homes in the metropolitan areas had TV sets as of last June, only 45.9% in rural areas -- with top saturation 79.7% in northeastern region (New England & Middle Atlantic states) and with ownership predominating among larger families. In country as whole, saturation is 67.2%.

Those are significant highlights of Census Bureau report (Series H-121) released this week as supplement to its original report of 4 weeks ago stating that 32,000,000 households, or 67% of all U.S. homes, owned a TV set in June (Vol. 11:34). The data came from questioning 25,000-family sample as part of the Census Bureau's continuing "Current Population Survey." It was underwritten by ABC, CBS, NBC, NARTB and Television Bureau of Advertising.

Census report was documented by 4 tables providing data on ownership of TV sets by urban vs. rural homes, by geographic regions and by size of households (for details, see p. 4). Advertising Research Foundation, which contracted for survey, will mail to its members next week 15 tables containing additional information which it projected from Census data. In advance of mailing, ARF revealed that one of most significant projections is that 1,000,000 -- or 3.5% of all TV households -- owned a second set. This is somewhat under the 4.3% second-set ownership reported recently by American Research Bureau in its July survey (Vol. 11:35).

Another dimension was thus added to TV sets-in-use picture -- and prospect is that a county-by-county tabulation, at least as a one-shot, is drawing closer. The industry powers behind the Census study, now considering feasibility of projecting accurate figures of sets-in-use in each of the nation's 3000 counties on basis of data now available, should come up with answer in about 3 weeks. In addition, ARB has proposed to networks and stations a county-by-county study based on 500,000-home sample. And finally, there's long-awaited NARTB-backed proposal for a continuing sets-in-use census (Vol. 11:21), on which further progress report is due next month.

ALLOCATIONS, NETWORK STUDIES UNDER WAY: Vhf and allocations problems, simmering uneasily through the summer, started coming to a boil this week as action began in earnest on several fronts. The week's developments:

(1) FCC launched its network study, to delve into the entire field of network operation -- particularly affiliation practices -- with Dean Roscoe L. Barrow of U of Cincinnati Law School named to direct the inquiry.

(2) RETMA set up high-powered committee under GE v.p. Dr. W.R.G. Baker -- who headed the NTSC groups which set up standards for both black-&-white and color TV -- to study allocation problems and report to Commission. Group was set up as result of meetings with Commissioners and FCC staff members last July (Vol. 11:32).

(3) Commission made plans to plunge into allocations problems early in Oct., beginning with meetings with staff -- now working on reallocations proposals based on vhf drop-ins, the method which currently appears to be favored by greatest number of Commissioners. Comr. Lee, meanwhile, went into more detail this week on his plans to seek more vhf channels, and proposed sharply reduced scale of mileage separation between stations so that more vhf assignments can be dropped in where needed. But Comr. Hyde warned that "engineering compromises" are not the solution.

* * * *

Heading network study, Dean Barrow will direct "special staff" -- mostly due to be drawn from present FCC employes -- under the direction of committee comprising Comrs. McConnaughey, Hyde, Bartley & Doerfer. Congress appropriated \$80,000 for the

study, which was keyed by legislators' concern over uhf stations' complaints about network affiliation practices.

Regarded as middle-of-roader in politics, Barrow is 42, veteran of govt. service from 1938-51, served as attorney for NLRB, Agriculture Dept., OPA and Justice Dept. In 1951, he was special asst. to Attorney General.

RETMA's allocations study, announced this week by pres. H. Leslie Hoffman, is charged with making "immediate examination of TV frequency allocations problems," with particular emphasis on "the place of uhf in the TV system."

"We feel that the adoption of a hastily conceived remedy today under political and economic pressure might obstruct the further development of a truly nationwide TV system," he said, stressing that study would "supplement" FCC's inquiries.

Serving under Dr. Baker are Mr. Hoffman, pres. of Hoffman Electronics; Sylvia director & ex-pres. Max F. Balcom; Motorola pres. Paul V. Galvin; RCA exec. v.p. E.C. Anderson; CBS-Columbia pres. H.C. Bonfig; Philco v.p. James D. McLean. Balcom & Galvin are past presidents of RETMA; Dr. Baker is chairman of its TV committee.

Comr. Lee got more specific on his proposals to solve the uhf dilemma (Vol. 11:35-36) in Sept. 20 address to NARTB Chicago regional conference. Explaining that his studies this summer have convinced him that vhf is "a superior service," he said he would urge Commission to begin negotiations for more vhf channels through a general reallocation of spectrum between 108 & 890 mc, on piecemeal basis if necessary.

As short-term remedy, he proposed relaxing vhf co-channel separation rules to 100-120 mi. in Zone I, 120-135 mi. in Zone II, 135-150 mi. in Zone III, with directional antennas, low power and vertical polarization to prevent interference by the stations which would be dropped in where required.

He'd give uhf operators preference in assignment of the new vhf channels, but leave uhf stations alone where they're doing all right. He wouldn't change any currently operating vhf outlets--but vhf drop-ins would set up new class of vhf service, "something less desirable than the existing vhf service but more desirable than the existing U service," a low-powered community service geared to local coverage.

Comr. Hyde took sharp issue with plans to restrict TV's growth to 12 channels. Addressing Sept. 23 IRE symposium in Washington, he said even if means are devised to double the number of stations on today's 12 vhf channels the problems would not be solved. "That's a pitiful number of channels on which to expect development of a competitive TV system," he added.

Dashing cold water on Lee's proposal to seek new vhf channels, engineer Stuart L. Bailey, member of Senate's ad hoc allocations committee, told symposium military won't let go of vhf channels, needed for new "scatter" communication (Vol. 11:32).

BASEBALL'S 'AGONIZING REAPPRAISAL' OF TV: New look into effect of TV on declining major league baseball attendance will be taken at upcoming meetings of club owners. Despite other factors involved in declining gate receipts, as revealed in a recent survey authorized by baseball commissioner Ford Frick (Vol. 11:34), TV remains the favorite whipping boy -- its foes now citing high attendance at Milwaukee and Kansas City games, from which TV is excluded. This is the picture on eve of World Series:

(1) Overall attendance this year was approximately 4,375,000 under 1948 peak of 19,000,000, representing decline of about \$6,500,000 in revenue. But income of 14 teams granting TV rights is estimated at \$6,300,000, or average of \$450,000 per team.

(2) Number of minor leagues is down to 33 from 1949 peak of 59. TV foes blame televised big league games -- but others say it's normal leveling off.

(3) TV's appeal in general, not simply televised baseball, is major problem, in opinion of some authorities. Many former baseball fans prefer ease and comfort of watching a good show from an easy chair to effort and cost of attending a game. It's argued that baseball is no longer the "national pastime" but merely entertainment like other sports and movies. On this theory, some teams have staged extra attractions at games in effort to draw crowds, but without too much success.

"If the time has come when we have to put on a strip tease before each inning to get customers," said one baseball expert, "we may as well give up."

Personal Notes: Robert L. Stone, director of ABC-TV production services dept., promoted to gen. mgr. of WABC-TV, replacing Ted Oberfelder, resigned; Bernard I. Paulson, ABC plant supt. in N. Y., promoted to succeed Stone . . . Merle S. Jones, CBS-TV v.p., represented his company at ITA ceremonies in London Sept. 22 on occasion of debut of commercial TV . . . Walter H. Lurie, ex-MBS director of west coast operations, elected v.p. of Birmingham, Castleton & Pierce, serving on plans board as TV-radio head . . . Arthur Hull Hayes, CBS Radio pres., received Fordham U medal for achievement in communications at Catholic Press Institute meeting Sept. 22 in N. Y. . . . Roy Ashmun, NBC, to direct marketing management & research clinic of N. Y. Adv. Club's advertising & selling course . . . Robert Blase named program mgr. of WFAA-TV, Dallas, Tom S. Palmer promoted to succeed him as production mgr. . . . Jerome Sill, ex-CBS Radio, recently with WMIL, Milwaukee, who recently disposed of holdings in upcoming WAGE-TV, Marquette, Mich. (Ch. 6) named exec. v.p. of WHUM-TV, Reading, Pa. under pres. Humboldt J. Greig . . . James A. Wethington, ex-sales mgr. of Honolulu's KONA, has joined KGMB-TV there . . . Sidney V. Stadig promoted to chief engineer of Westinghouse's WPTZ, Philadelphia, succeeding George D. Borden, transferred to WBZ-TV & WBZ, Boston, to succeed Thomas T. Ely, named chief engineer of KPIX, San Francisco; Borden will be asst. chief engineer under Willard H. Hauser . . . John B. Burns named national sales director, ABC Film Syndication, succeeded as midwest mgr. by Patric Rastall; Fred J. Stratmann transferred from Hollywood to head new San Francisco office, 277 Golden Gate ave. (phone Graystone 4-6565) . . . John Silva named chief engineer, KTLA, Los Angeles, succeeding late Raymond Moore; Roy White promoted to succeed him as engineering operations supervisor . . . Ted Yates Jr., former exec. producer of *Tex and Jinx Show* on NBC-TV, named director of news & special events, WABD, N. Y. . . . Andrew N. McLellan has withdrawn from Reg. Willson Publications, Toronto, where he co-founded and edited *Canadian Television & Motion Picture Review* . . . Barnett F. Goldberg promoted to chief engineer, WIS-TV, Columbia, S. C., succeeding Herbert Eidson, resigned to join Western Electric.

Associated Press Radio & Television Assn.'s recently named board of directors (Vol. 11:36) this week elected Jack Shelley, WHO-TV, Des Moines, as pres. Vice presidents elected: Joe H. Bryant, KCBD-TV, Lubbock, Tex.; Daniel Kops, WAVZ, New Haven; Jack Krueger, WTMJ-TV, Milwaukee; H. J. Chandler, KFLW, Klamath Falls, Ore. Named secy. & treas., respectively, were Oliver Gramling & Robert R. Booth, AP.

Named by President Eisenhower to participate in White House conference on physical fitness Sept. 27-28 at Lowry, Colo. Air Force Base: David Sarnoff, Sylvester L. Weaver Jr., NBC; Wm. S. Paley, Frank Stanton, CBS; Robert Kintner, ABC; Tom O'Neil, MBS; Allen B. Dumont.

Harold Harris, sales-engineering v.p. of Channel Master Corp., is author of *Treasure Tales of the Shawanwunks and Catskills*, legends and folklore, published in connection with sesquicentennial of Ellenville, N. Y., where Channel Master is located.

Ira Avery, BBDO account executive who also writes TV-radio scripts, is author of first novel *The 5 Fathers of Pepi*, published Sept. 26 by Bobbs-Merrill, and suggested by *Phileo TV Playhouse* show he wrote 3 years ago.

Veteran broadcaster Seymour N. Siegel, director of N.Y. municipal station WNYC, elected pres. of general assembly of Prix Italia in Perugia, Italy; he's attending current session as NARTB delegate.

CENSUS BUREAU report on TV households released this week (p. 2) breaks them down into 3 categories: (1) "Standard metropolitan areas," where 78.3% of homes have one or more TVs. (2) "Urban places" of 2500-50,000 pop. outside metropolitan areas, where 55.9% have sets. (3) "Rural territories," where 45.9% have sets. It also breaks down percentages of ownership by 4 geographic regions.

For U. S. as a whole, Census Bureau reports 64.9% of all 47,500,000 households had one or more sets, 2.3% had 2 or more, 32.8% had none. In metropolitan areas as whole, 74.9% had one set, 3.4% had 2 or more, 21.7% had none. In urban places outside metropolitan areas, 55.1% had one, .8% had 2 or more, 44.1% had none. In rural territories, 45.3% had one, .6% had 2 or more, 54.1% had none. Says Census:

"Except in New England, a standard metropolitan area is a county or group of contiguous counties which contained at least one city of 50,000 inhabitants or more in 1950. The contiguous counties are included if they are essentially metropolitan in character and are socially and economically integrated with the central city. In New England, standard metropolitan areas are defined in terms of towns and cities rather than counties . . .

"Urbanized areas of 1,000,000 inhabitants or more had slightly higher proportions of households with TV sets than the urbanized areas with less than 1,000,000. Outside the urbanized areas proportionately more of the households in urban places of 10,000 inhabitants or more had sets than in the smaller urban places.

"A considerable portion of rural non-farm households may be located near the urbanized areas or near urban places where TV broadcasting facilities are available. The proportion of these households having sets was about the same (61%) as in urban places of 10,000 inhabitants or more that were outside urbanized areas (62%). On the other hand, less than half (42%) of the rural-farm households had a TV set."

This is how Census reported set saturation by regions: Northeast, 79.7% of all households (Maine, N. H., Vt., Mass., R. I., Conn., N. Y., N. J., Pa.). North Central, 71.8% (Ohio, Ind., Ill., Mich., Wis., Minn., Ia., Mo., N. D., S. D., Neb., Kan.). West, 62.1% (Mont., Ida., Wyo., Colo., N. M., Ariz., Utah, Nev., Wash., Ore., Cal.). South, 53.2% (Del., Md., D. C., Va., W. Va., N. C., S. C., Ga., Fla., Ky., Tenn., Ala., Miss., Ark., La., Okla., Tex.).

"The number of persons in a household appeared to have some influence on the presence of a TV set in the household," report notes. "The households with 4 or 5 persons were more likely to have sets (79.1% & 77.8%, respectively) than the . . . smaller households." Only 35.7% of one-person households had TV, 63.9% of 2-person households.

Highlights of first NARTB district meeting Sept. 21 at Chicago were important speech by FCC Comr. Lee on allocations (see p. 2) and address by NARTB TV chairman Clair R. McCollough in which he attacked any form of censorship over TV, warned broadcasters against seeking too much legislation in solving problems, called for courts to open doors to televised trials. As meeting adjourned, members adopted resolution to endorse any effort to achieve uniform time zone changes to avoid network program confusion. It also sent "get-well" resolution to John Patt, WJR, Detroit, who was stricken by heart attack at NARTB convention in Washington May 28. NARTB's traveling cadre moved on to Saranac Lake, N. Y. for second district session Sept. 23-24, which featured speech by Comr. Bartley on equal time (see p. 16).

GEN. SARNOFF'S proposal to make subscription TV an issue in 1956 Presidential campaign was greeted unenthusiastically by representatives of both political parties. A Republican spokesman summed it up thus: "I don't see how it can become a political issue because there's no controversy—no policy difference between the 2 parties on subscription TV. It's not an issue on which there can be a Democratic philosophy and a distinctly different Republican philosophy." A Democratic Party official merely stated: "Our platform committee will be happy to listen to Gen. Sarnoff or Cmdr. McDonald or anyone else who wants to appear."

The RCA-NBC chairman made his widely publicized proposal Sept. 20 in address to Washington Ad Club. Issue of pay vs. free TV, he said, "is as important to our entire citizenry as was, for example, prohibition in its time." Entire issue should be "submitted to the ultimate suffrage of public opinion—a suffrage based not on guesswork, slogans or prejudices, but on wider knowledge and understanding of all the facts.

"I recommend, in all seriousness, that the issue between free and paid TV be considered by those who draft the programs of the major political parties; and that candidates for public office be encouraged to study the problem and declare themselves to the electorate . . . If this issue receives the forthright attention it deserves, the voters in our land will have the opportunity to decide the question for themselves."

Zenith's Cmdr. E. M. McDonald Jr., chief subscription TV protagonist, issued statement saying question can't be decided politically but must be settled by "giving the public a chance to see subscription TV and to decide for itself." He added: "If there is to be an issue in the Presidential campaign, it should be whether 2 or 3 network officials are to have absolute control of our TV system and the sole right to dictate what the public can or cannot see on its TV screens." He said he agreed with Sarnoff that the issue was as important as prohibition and declared that "prohibiting subscription TV before the public has a chance to try it is prohibition in its worst form."

Theatre TV accounted for second largest boxing gate in history, topped actual stadium take for Marciano-Moore championship bout night of Sept. 21, drawing 325,000 fans to 129 movie houses at total admission charge of \$1,240,000. Combined receipts from TV, radio & box-office were \$2,221,367, radio accounting for \$33,250, stadium \$948,117. Of theatre take, International Boxing Club received \$325,000, split 40-40-20 between IBC, Marciano & Moore. Thanks to TV, Marciano picked up additional \$130,000, Moore \$65,000. Nathan L. Halpern's Theatre Network TV reportedly grossed over \$400,000, as did theatres. More than 50,000,000 heard fight on ABC Radio; Trendex gave it 32.6 rating. Though home TV was blacked out, in radio interview before fight IBC pres. James D. Norris paid tribute to boxing's bread and butter: "If it weren't for television, instead of running a hundred shows a year, sometimes more, we'd only run probably 8 shows in N. Y., 4 shows in Chicago and maybe 2 others around the country."

First closed-circuit evangelist meeting in Canada will be conducted by Billy Graham Sept. 27-Oct. 15 at Toronto's Coliseum, with DuMont TV equipment carrying sermons to overflow audience on 6 theatre-size screens.

TV may span Atlantic within 5 years via submarine cable or relay links, Henry Cassirer, head of UNESCO, predicted in Paris.

Most interesting comment on Sarnoff's proposal came from *Washington Daily News* TV columnist Dave Reque: "I think Sarnoff was kicking a sleeping dog. I found no sentiment in favor of pay TV when the arguments were raging last year and the public has pretty much forgotten the idea."

* * * *

Other developments on the fee-TV front, now relatively quiescent and not likely to be resolved for years (Vol. 11:37):

(1) All subscription-TV proponents were revealed to have turned down offer for use of Armed Forces TV Service's 7 TV stations for any tests they wanted to make. Armed Forces are interested in scrambled TV as possible solution to problem of keeping TV signal confined to military personnel only. Offer was rejected for variety of reasons: all necessary tests had been made, no equipment was available, Armed Forces should pay for any tests it wants, etc.

(2) First series of public debates featuring all pay-TV proponents and representatives of anti-toll groups (Vol. 11:38) generated more heat than light, often had to be called to order by moderator for "delving into personalities." Series was conducted last week end by Cincinnati's WCPO-TV, featuring representatives of Zenith, Skiatron, Telemeter, Jerrold and Committee against Pay TV. Station said its switchboard was "jammed with calls" from viewers who wanted their questions answered on the air, added that most frequently asked question was: "I am happy with TV as it is now; why should it be changed?"

(3) Authoritative *Advertising Age* defended Zenith's right to espouse pay TV and urged "open-minded hearing even from the advertising and broadcasting business"—but slapped hard at Zenith's current TV set advertising as being reminiscent of "the orphan who grows to manhood and clobbers his foster parents so he can steal the family bankroll." Said Sept. 19 editorial: "We're a little fed up with indications that Zenith and others are out to really chew up the hand that fed them. We are referring to current Zenith-prepared co-op advertising, which features Flash-Matic tuning and particularly the fact that this permits the listener to 'eliminate long, annoying commercials' without having to get out of his chair . . ."

Community antennas vs. illegal boosters will be theme of Sept. 28 meeting at Walla Walla, Wash., attended by 2 champions of the unlicensed northwestern stations—Senators Magnuson (D-Wash.) and Morse (D-Ore.). Occasion is meeting of Pacific Northwest Assn. at which Pacific Northwest Community TV Assn. & National Community TV Assn. propose to demonstrate superiority of wired systems over boosters, and to urge Senators to use their influence to help change FCC rules to permit direct ownership of microwave facilities by community antenna system operators. Commission now requires purchase of service from a common carrier.

Another community antenna microwave application was filed this week with FCC—by Television Microwave, Martinez, Cal. (accountant John E. Griffin & dentist Wilbur J. Fahden). It proposes to pick up signals from Salt Lake City's KSL-TV with Spruce Mt., Nev., relay point, send them 47 mi. to Television Transmission Inc., Elko, Nev. System's cost was estimated at \$18,643.

Changes in eligibility rules for industrial radio service were finalized last week by FCC, terminating controversial proceedings lasting 5 years. Commission order is file No. 55-923, mimeo 22654, available from FCC.

Broadcasting Executives Club is new name of Radio-TV Executives Club of New England, Boston, which elected Hoag & Provandie's Paul H. Provandie as pres.

Network Accounts: Daylight Time snafu means that baseball fans on Pacific Coast will get Gillette-sponsored colorcasts of World Series starting Sept. 28 on NBC-TV at very "un-baseball hour" of 9:30 a.m. It's all because many large cities, including several on west coast, returned to Standard Time Sept. 25 while others, including N. Y., remain on Daylight Time until Oct. 29. Biggest headache for networks is clearing station time for early evening programs in cities returning to Standard Time, creating overlap between network and local for station time. Result is that some network programs won't be seen for month in certain markets where time has been sold locally . . . NBC-TV is pitching for CBS-TV's highly-coveted \$64,000 *Question* when its contract with Revlon expires Jan. 1—offering Tue. 9:30-10 p.m. for that show and Thu. 8:30-9 p.m. for Revlon's proposed new program which would pit \$64,000 *Question* contestants against each other on a panel; latter is also packaged by Louis G. Cowan Inc., whose head is a CBS-TV producer . . . Philco reportedly has decided not to renew its option for 1956 NBC-TV coverage of political conventions, which it sponsored in 1952; neither Philco nor network would comment . . . Toni buys 2 partic., Philip Morris & Hoover Co. (vacuum cleaners) one each, on J. Arthur Rank *Famous Film Festival* series on ABC-TV starting Sept. 25, Sun. 7:30-9 p.m.; show is "double-teamed," with affiliates permitted to sell locally all unsold network time—and already WABC-TV & WBKB report several national sponsors signed. ABC-TV is also turning over to local stations unsold Mon. 9-9:30 p.m. period (opposite CBS's *I Love Lucy* and NBC's *Medic*), probably will turn over Tue. 10-10:30 p.m. (opposite CBS's top-rated \$64,000 *Question*) . . . American Petroleum Institute, in observance of Oil Progress Week Oct. 9-15, to sponsor one-shot "telementary" 1976 on NBC-TV Oct. 9, Sun. 4:30-5:30 p.m., thru Sullivan, Stauffer, Colwell & Bayles; show is based on book, *Tomorrow*, be-

ing written by NBC pres. Pat Weaver, about how he believes world will look in that year . . . Borden Co. to sponsor Jackie Cooper's *The People's Choice* on NBC-TV starting Oct. 6, Thu. 8:30-9 p.m., thru Young & Rubicam . . . Colgate-Palmolive to sponsor *The Millionaire* on CBS-TV starting Sept. 28, Wed. 9-9:30 p.m., thru Ted Bates . . . Kellogg & National Carbon Co. to be alt. sponsors of 8:30-9 p.m. portion of *Arthur Godfrey and His Friends* on CBS-TV starting Sept. 28, Wed. 8-9 p.m., thru Leo Burnett & Wm. Esty Co. . . Minute Maid (orange juice) buys alt. Wed. 12:15-12:30 p.m. segment of *Tennessee Ernie Show* on NBC-TV starting Nov. 2, Mon.-thru-Fri. 12-12:30, thru Ted Bates . . . Upjohn Co. (drugs), in first network sponsorship, buys 52-week partic. schedule on NBC-TV's *Home* starting Oct. 5, Mon.-thru-Fri. 11 a.m.-noon, thru Medical Radio & TV Institute of N. Y. . . Un-sponsored *My Friend Flicka*, produced by 20th Century-Fox for CBS-TV Fri. 7:30-8 p.m., has been shelved temporarily and replaced by *Adventures of Champion*, filmed western produced by Gene Autry's Flying A Productions; plan doesn't affect GE-sponsored *20th Century-Fox Hour* on CBS-TV Wed. 10-11 p.m. . . General Cigar to sponsor one-fourth of NCAA football schedule on NBC-TV this fall, thru Young & Rubicam; announcement of sponsorship was made on closed-circuit colorcast Sept. 10 to its distributors and dealers in key cities, using NBC facilities . . . Football one-shots, all on NBC-TV: Buick & Miller Brewing Co. to be alt. sponsors of National Football League title game Dec. 26; Gillette sponsors Rose Bowl Jan. 2 and Blue-Gray game from Montgomery, Ala. Dec. 31; Dodge buys Cotton Bowl from Dallas Jan. 2 . . . CBS-TV switches *Schlitz Playhouse of Stars* to Fri. 9:30-10 p.m., effective Oct. 7.

World Series will be on nearly 200 stations, originating from N. Y. on NBC-TV in color (sponsored by Gillette) starting Sept. 28. MBS is carrying it on radio.

PROGRAMMING OVERHAUL of virtually its entire night schedule was disclosed to affiliates this week by ABC Radio as its pattern for comeback. It's in keeping with the "quick listening" format of NBC Radio's week-end *Monitor*, which will be extended to weekdays 10 a.m.-6 p.m. starting Nov. 7, and similar in sales format to CBS' "segmentation" plan (Vol. 11:37-38).

ABC plan, effective Oct. 24, divides Mon.-thru-Fri. 7:30-10 p.m. programming into 5 separate 30-min. "units," each with a separate theme. Within those units, there will be 5 & 10-min. segments bearing on those themes. One of those 5-min. segments will be a world news summary. Entire schedule will be sold in 5-min. partic., at \$800 per partic., with usual discounts.

Charles T. Ayres, radio network v.p., said themes will range from practical advice on marriage, family & career problems to special inspirational messages from spiritual leaders, will include on-the-spot visits to world-wide tourist attractions. The 5 themes are titled "Events of the Day," "The World Around Us," "A Better Tomorrow," "Sound-mirror," "Offbeat."

ABC pres. Robert Kintner, in letter to affiliates, commented: "Now that 75% of all radio homes have TV, we believe people expect from their radio sets a type of broadcast service different from that available from the TV set in the living room. If there is merit and value in our new concept for radio, I believe it is because instead of starting from the premise that radio is merely TV minus the sight or somehow irrevocably linked to standard programming patterns of the past, our research and creative people have evolved a new method of using radio to inform, advise, educate and entertain listeners in a lively and intimate manner new to the medium."

CBS is also reshuffling its radio programming, emphasizing music in lieu of mystery dramas. Dropped were old favorites *Mr. Keen*, *Tracer of Lost Persons* and *The Whistler*. Substituted are *Disk Derby*, *Young Ideas & My Son Jeep*. CBS also signed Buick for "segmentation" sponsorship of *Bing Crosby Show*, *Tennessee Ernie & Amos 'n' Andy Music Hall*. Also signed for Crosby show are Hallmark Cards (returning to network radio after 6-month absence) and Anahist.

* * * *

NBC meanwhile reported \$550,000 in gross billings signed so far for *Monitor* in 4th quarter. New sponsors are Lincoln-Mercury, Bristol-Myers & McGregor Co. (sportswear); renewals came from RCA, Philip Morris, Crowell-Collier, Charles Antell, Gruen Watch Co., Pond's (face cream).

Indicative of fierce competition among networks, NBC station relations v.p. Harry Bannister took sharp swipe at CBS Radio's claims last week that it was running 90% ahead of NBC in total hours sold for average week in Oct. 1955 (Vol. 11:38). In letter to affiliates, he stated: "CBS, while sounding onward and upward note, has led the way in all negative steps—the general rate reduction in July 1951, the reduction in evening rates in Aug. 1952 and further reductions in Aug. 1954."

He said that in first week of Sept. NBC Radio's sponsored hours were up 31% over same 1954 week, while CBS declined 14.9%. "The net result is clear," he wrote. "NBC is moving up; CBS is moving down." Latest Nielsen evening program ratings, he said, show NBC ahead of CBS. Finally, he pointed out that PIB figures for July show NBC as only radio network with increase over July 1954 billings (Vol. 11:38).

Telecasting Notes: Live re-runs of top TV dramas, which we have vigorously espoused (Vol. 11:17-21, 23, 31), are catching on in big way—and it appears that good dramatic material no longer must go down the drain after one TV performance. Biggest assist to the preservation of TV plays will be administered by new *NBC Matinee Theatre* in color, Mon.-thru-Fri. 3-4 p.m. starting Oct. 31. Announced this week was list of 56 script properties purchased for new series, including 17 which originally were used on top evening drama shows and will be re-produced with new casts. Also included were 23 original stories and 16 adaptations of plays, short stories, novels . . . These TV plays were purchased for re-runs: Originally on *Kraft TV Theatre* (NBC)—“Gallin—All American,” “The Gate,” “House on Wildwood Lane,” “One Left Over,” “Arrowsmith.” From *Studio One* (CBS)—“Dark Possession,” “Wuthering Heights,” “Beyond a Reasonable Doubt.” From *Philco Playhouse* (NBC)—“A Cowboy for Chris,” “The Happy Rest,” “Dinner at Antoine’s,” “Statute of Limitations.” From *Motorola TV Theatre* (ABC)—“Sins of the Fathers,” “Side by Side.” From *U. S. Steel Hour* (formerly ABC, now CBS)—“One for the Road.” From *Ford Theatre* (NBC)—“The Touchstone.” From *Robert Montgomery Presents* (NBC)—“For These Services” . . . Rapid repeat: Ballantine Beer sponsoring Ziv’s *Highway Patrol* beginning late Oct. on New York’s WRCA-TV, Mon. 7-7:30 p.m., and WPIX Wed. 9:30-10 p.m., same episodes each week on both stations . . . First returns are in from the critics on major fall programming debuts: Of the 3 movie studio entries on ABC-TV, new *Disneyland* series got the usual raves, *Warner Bros. Presents*’ first effort got a ho-hum, *MGM Parade* got fair-to-good nod with almost all critics pointing out it’s a “program-long commercial.” New “adult westerns”—CBS-TV’s *Gunsmoke* and ABC-TV’s *Wyatt Earp*—were well received, particularly the former. Critics loved Phil Silvers’ *You’ll Never Get Rich* on CBS-TV, had mild praise for *Navy Log* documentary on same network. NBC-TV’s first 2 spectaculars of the fall season—*Skin of Our Teeth* and *Our Town*, both by Thornton Wilder—got excellent notices, though latter was far greater popular success. ABC-TV’s *Medical Horizons*, a sort of non-fiction *Medic*, also received good notices . . . TV film series adapted from hit spectacular adapted from hit play: Inspired by critical acclaim of NBC-TV’s first *Producers’ Showcase* spectacular of fall season, “Our Town,” Sol Lesser-Jack Denove TV Films is planning weekly filmed program based on the story for 1956 season. Lesser made movie version of “Our Town” in 1939 . . . Two more Broadway hits become spectaculars: NBC-TV plans to colorcast “Wonderful Town” with Rosalind Russell on *Producers’ Showcase*, possibly Nov. 19. CBS-TV will present Paul Gregory’s production of “Caine Mutiny Court Martial” Nov. 19 on *Ford Star Jubilee*, featuring Broadway cast—Lloyd Nolan, Barry Sullivan, John Hodiak, Russell Hicks . . . Drive-in TV: WLWD, Dayton, originated Sept. 23 *Studio Party* show from its parking lot, inviting public to attend.

Gian-Carlo Menotti, whose *Amahl & the Night Visitors* has become an annually-produced Xmas classic since first presented on NBC-TV in 1951, has been commissioned to compose a 1½-hour opera for production by Samuel Chotzinoff’s *NBC Opera Theatre* during 1956-57 season. Note: In Oct. 4 *Look Magazine*, Menotti is listed in article titled “VIP” among the “world’s 100 most important people.” List also includes RCA-NBC chairman David Sarnoff, who next month will receive his 16th honorary degree—from Notre Dame.

Digests of outstanding program texts will be published in *Radio-TV Scripts*, new monthly to be issued by Facts on File Inc., 119 W. 57th St., N. Y.; Fred McGhee, editor.

NBC-TV’s first uhf operation on its own, stemming from purchase of WBUF-TV, Buffalo (Ch. 17) for \$312,500 cash (Vol. 11:11, 15), was approved by FCC this week as it deferred action, presumably until next week, on proposed Westinghouse swap of its WPTZ, Philadelphia (Ch. 3) with radio KYW (50 kw, 1100 kc) for NBC’s WNBK, Cleveland (Ch. 3) with radio WTAM (50 kw, 1100 kc) plus \$3,000,000 cash (Vol. 11:21). Because its affiliation contract with WGR-TV, Buffalo (Ch. 2) has until Aug. 1956 to go, NBC will be in position of operating an independent in that city—though WBUF-TV is now getting some ABC and a few NBC shows as they’re released by WGR-TV. NBC takeover, with big push to be put behind uhf, is expected to occur before end of year; station is presently under management of Sherwin Grossman, signing on nightly at 6:45 p.m. Plans are to erect new studio building with 549-ft. tower and transmitter at 2101 Elmwood Ave. Meanwhile, WBUF-TV having leased its present studios to WGR-TV before NBC deal, the network has no adequate Buffalo location for full-time owned-&-managed operations. However, it has committed itself to “prove economic feasibility” of uhf and has indicated work will go forward immediately on new plant and possibly will ask for increased power to 1,000,000 watts. Note: CBS, also committed to promote uhf, began operation of its WXIX, Milwaukee (Ch. 19) exactly year ago and is reported to be making steady progress and operating at profit.

Two more movie distributors followed lead of Republic Pictures (Vol. 11:38) this week and signed consent decrees agreeing to release films to TV and other non-theatrical outlets, as trial began in Govt.’s anti-trust suit against group of film companies. Signing decree were independent 16mm distributors Films Inc. and Pictorial Films Inc., neither a significant factor in feature film business. As hearing opened in Los Angeles, Govt. announced it would introduce 1000 documents and film companies indicated they may call about 125 witnesses—indicating trial could run for as long as 2-3 months.

Network color schedules for next 2 weeks: NBC-TV—Sept. 26-30, *Home* segments, 11:45-noon; *Howdy Doody*, Sept. 26-30 and Oct. 3-7, 5:30-6 p.m.; Sept. 27, new *Milton Berle Show* featuring Esther Williams’ TV debut, 8-9 p.m.; Sept. 28, start of complete World Series coverage, 12:45-4 p.m.; Oct. 1, *Max Liebman Presents* “Heidi,” starring Jeannie Carson, Wally Cox, Elsa Lanchester, 9-10:30 p.m. CBS-TV—Sept. 27, *Red Skelton Show*, 9:30-10 p.m.; Oct. 1 & 8, *Gene Autry Show*, 7-7:30 p.m.; Oct. 6, *Shower of Stars*, “Time Out for Ginger,” starring Jack Benny and Claudette Colbert, 8:30-9:30 p.m.

Broadway trade press, even current *Sponsor Magazine*, persists in reporting that merger of Screen Gems and TPA (Vol. 11:36-37) is a fait accompli—but TPA pres. Milton A. Gordon tells us it simply isn’t so. “There is no contract,” he said, “there has been no deal, and I don’t know frankly where this thing is going.” He admitted only that talks looking to a merger, which would set up possibly the biggest single entity in the TV film field, have recently been resumed.

Zoo Parade’s Marlin Perkins, who gets \$10,000 a year as director of Chicago’s Lincoln Park Zoo, offered his resignation this week when informed his superiors took dim view of plan to take his NBC-TV show to different zoos around the country. They want him to cut down on his TV activity. He’s now in Africa shooting films which are already being shown on his Quaker Oats (Ken-L Ration dog food) Show.

DuMont Electronicam TV-film production will gross \$500,000 in next 3 months, according to Werner Michel, DuMont Broadcasting’s Electronicam production director.

FIRST TV GRANTS in 2 months were issued this week by FCC as it returned to work and began to whittle at backlog of long pending matters. CP for Ch. 18 in Orlando, Fla. went to Orange County Bcstrs. (WABR, Winter Park), and Ch. 6 satellite at Hayes Center, Neb. was granted to KHOL-TV, Kearney, (Ch. 13). Both applications were unopposed.

For the second time, Commission postponed for 30 days the effective date of its decision lifting Zone I vhf stations' ceiling to 1250 ft. (Vol. 11:35-36). It wants more time to sift through complaints from stations, aviation interests, etc., pushed effective date of decision from Oct. 1 to Nov. 1.

Most celebrated of all "protest" cases—Spartanburg site-change case—moved another notch this week in initial decision by examiner James D. Cunningham, who recommended approval of Paris Mt. site for upcoming WSPA-TV (Ch. 7) despite protests of economic injury from WGVL, Greenville, S. C. (Ch. 23) and WAIM-TV, Anderson. Last year, Commission approved WSPA-TV's proposed move from Hogback Mt. (as temporary measure) without hearing, but Appeals Court reversed action and FCC held hearing on WSPA-TV's application for permanent Paris Mt. site (Vol. 10:6, 8, 10, 28). Cunningham held this week that protestants hadn't proved that the move violated Communications Act or Commission's rules or that they will necessarily suffer economic loss by move to new site.

* * * *

Among batch of other actions this week, the Commission:

(1) Refused to institute revocation proceedings or issue cease-&-desist order against WXEX-TV, Petersburg (Ch. 8) to prevent it from identifying itself with Richmond, Va. area, as requested by WTVR, Richmond (Ch. 6).

(2) Turned down "economic injury" protest by Pittsburgh's WENS (Ch. 16) against grant of Ch. 11 there to WIIC (owned by joint WWSW-WJAS interests) but promised to take up later WENS requests for reconsideration and rehearing of Pittsburgh case on grounds merger agreement which preceded grant was violation of FCC rules (Vol. 11:36).

(3) Proposed to move Ch. 7 from Ponce to Mayaguez,

Puerto Rico, as requested by El Mundo Inc. & Ponce de Leon Bestg. Co., both currently applicants for Ch. 3 in Mayaguez. Comments are due by Oct. 21.

(4) Granted No. Dakota broadcaster John Boler permission to extend his private microwave system—which now connects his KXJB-TV, Valley City (Ch. 4) and KCJB-TV, Minot (Ch. 13)—to his upcoming KBMB-TV, Bismarck (Ch. 12). Comr. Bartley dissented, calling grant premature and raising possibility that "duplication of facilities" could result in raising common carrier costs and that case-by-case authorization of private microwave facilities "may delay the further expansion of common carrier facilities to points beyond the area of the stations granted such private facilities."

* * * *

Petitions filed with Commission this week included 2 requests for allocations changes by prospective applicants: Mohawk Valley Television Inc. wants Ch. 2 allocated to Fairfield, N. Y., which it says can be done without upsetting any other allocations. Westcoast Bestg. Co., Wenatchee, Wash. requests that Ch. 18 be moved from Bellingham to Wenatchee. Other items filed with FCC this week:

(1) Hearing on alleged "concentration of control of mass media" by Triangle Publications Inc. (Walter Annenberg) was sought by WHP-TV, Harrisburg (Ch. 55), one of eastern Pa. stations opposing Triangle's proposed purchase of off-air uhf WLBR-TV, Lebanon, Pa. (Vol. 11:31, 38). Included in hearing would be Triangle's application for power increase of its WBNF-TV, Binghamton (Ch. 12), as well as its proposed purchase of WFBG-TV, Altoona (Ch. 10) and its application for Ch. 18 satellite in Elmira, N. Y.

(2) Objections to proposed move of WCHS-TV, Charleston, W. Va. (Ch. 8) to new site west of Charleston were filed by upcoming WHTN-TV, Huntington (Ch. 13) and WTAP, Parkersburg, W. Va. (Ch. 15).

(3) WICS, Springfield, Ill. (Ch. 20) asked Commission to hold up grant of Ch. 2 in Springfield until it acts upon deintermixture proposal for the area.

(4) FCC's Broadcast Bureau favored proposal by WJRT, Flint, Mich. (Ch. 12) to locate transmitter 23 mi. northwest of Flint in proposed findings filed after hearing on protests by WKNX-TV, Saginaw (Ch. 57), WTOM-TV, Lansing (Ch. 54) & WWTW, Cadillac (Ch. 13).

LONDON'S first taste of commercial TV, which started Sept. 22 with juxtaposed spots for a toothpaste, chocolate drink & margarine and has on tap such big-name sponsors as Esso, Kellogg, Heinz & Johnson Wax in addition to a native variety, appears to have been a satisfactory one despite the jaundiced attitude of some elements.

United Press reported "critics praised Britain's first TV with toned-down American-style commercials and generally agreed that the state-owned BBC is in for some competition." AP also found critics rating commercial TV "a formidable threat to the state-sponsored BBC variety."

General verdict was that commercial TV had come to stay, UP reporting all 11 London morning newspapers save Communist *Daily Worker* giving it "high praise for production techniques and commercials alike." *New York Times'* Jack Gould described press reaction as "cautiously cordial" and some London papers, as AP put it, warned that "the effects of the advertisements may be cumulative, like Rocky Marciano's punching." Film Daily's London correspondent cabled that, far from being a take-off on the American commercial, initial showing "typified the well-known staid British manner."

It's estimated some 2,500,000 people within 50-mi. radius of Croydon transmitter witnessed first night of Independent TV Authority's service via its first outlet (Vol. 11:38) on the perhaps 20% of London area's 1,300,000 sets thus far converted to get a second channel. But they liked what they saw, apparently—and, judging from the reports, they particularly liked the idea of competition for BBC, just as we predicted they would (Vol. 10:45).

Americans were very much in evidence at the 4-hour opening ceremonies and shows, including NBC pres. Sylvester Weaver, and warm greetings were cabled by NARTB pres. Harold Fellows. Many of the top British ad agencies are branches of or associated with major U. S. agencies, and the admen appeared pleased with their initial efforts albeit they have no control over programs; 1-min. ad spots (at \$2800 per) are limited to 6 per hour, and use of American shows must perforce be limited.

American productions and American talent will be prominent on British TV henceforth, both on ITA & BBC, just as British programs and artists are prominent here. ITA has already taken on *I Love Lucy*, *Hopalong Cassidy*, *Dragnet*, *Inner Sanctum*, *Liberace*, *4 Star Playhouse*, among other films, and has versions of *People Are Funny* and *Beat the Clock* on tap. It will have Bob Hope,

Johnny Ray, Xavier Cugat, Lena Horne among others in variety show *Sunday Night at the Palladium* patterned after *Toast of the Town*.

BBC has *Burns & Allen*, *Amon 'n' Andy*, *The Cisco Kid*, *I Married Joan*, among other U. S. shows. More British shows exported to U. S. are foreseen, *New York Times* writer Jack Gould noting that "as in other phases of British life, London TV must export if it is not to have a relatively austere screen at home."

Gould saw the "zip and zaniness" of *Burns & Allen* providing "successful ambassadors" for U. S. good will. Witnessing ITA's first output, he cabled from London that "the British have something in their form of commercialism" which he said differed from the American version in its "restraint and brevity." In quality, he observed, "some plugs were inept and reflected a lack of experience. But others, especially those of the beer and gasoline concerns, were amusing or interesting in themselves. In virtually all cases, however, the voices were soft and subdued. The peace was wonderful."

Gould called the variety program "corny stuff" but liked the big-name dramatic episodes and said camera work on the prizefight was exceptionally good. *N. Y. Herald Tribune* correspondent described the first night program as "decorous as a court ball" and said that, though many London homes had "commercial TV parties," the opening was "something less than epoch-making."

Extraordinary amount of space is being devoted in U. S. newspapers and magazines to Britain's effort to parallel govt. operation with private enterprise, and clips from the British TV commercials will undoubtedly be seen soon on U. S. screens. Despite cynicism and outright opposition toward the system on the part of some, fact that it's an honest and serious effort, conducted by Britons of highest repute, and particularly fact that it brings longed-for competition, seems to weigh most opinion on both sides of the ocean in its favor.

Parts jobbers did \$500,000,000 business in 1954, gain of 100% in 5 years, reports National Credit Office. Trend is seen continuing upward this year, though at a slower pace. During first 6 months this year, 28 new parts distributorships were formed, compared to 42 in first half of 1954. Of the 22 companies which failed last year, 12 were liquidated, one was sold, 2 were reorganized under Bankruptcy Act, 3 are operating under Chapter X & XI arrangements, 4 are still awaiting bankruptcy court decisions.

General Teleradio's \$25,000,000 purchase of RKO Radio Pictures Corp. (Vol. 11:30) is disclosed as financed by Chase National Bank loans covered by notes for \$10,000,000 (at 3¼%) and \$15,000,000 (at 3½%, reducible to 3¼%), secured by agreement with General Tire and payable at semi-annual rate of \$1,000,000 & \$750,000 respectively—General Teleradio agreeing to pay no dividends until both notes are paid up.

Consolidated Electronic Industries Corp. (formerly Reynolds Spring Co.) reports loss of \$395,889 for 9 months ended June 30, though there was operating net profit of \$335,167. Sales for the 9 months totaled \$4,872,157.

Oak Mfg. Co. has increased its common shares from 524,950 to 656,129 as result of distribution Sept. 15 of one new share for each 4 held as of Sept. 1.

General Instrument Corp. stockholders this week approved increases in authorized common shares from 1,500,000 to 3,000,000; there are presently 1,373,273 outstanding.

Dividends: Emerson Radio, 10¢ regular and 5¢ extra payable Oct. 15 to stockholders of record Oct. 1; Howard W. Sams & Co., 10¢ Oct. 25 to holders Oct. 18; American Phenolic, 20¢ Oct. 28 to holders Oct. 18; Monumental Radio, Baltimore, 25¢ Sept. 30 to holders Sept. 22.

Financial & Trade Notes: Spinoff of newly-formed DuMont Broadcasting Corp. from Allen B. DuMont Laboratories Inc. (Vol. 11:33-34) is designed "to separate the element of showmanship and entertainment from research and manufacture," according to 60-p. proxy statement to stockholders this week accompanying notice of special meeting Oct. 10 at Clifton, N. J. plant. Statement discloses that new DBC, which will have 2,500,000 common shares of \$1 par (944,422 outstanding at the outset as result of distribution of one share for each 2½ shares of DuMont now held), will seek additional capital of \$1,500,000 through offering pro rata rights to DBC stockholders to subscribe to additional shares.

Such offering, it's stated, will be underwritten by Carl M. Loeb, Rhoades & Co., whose partner Armand Erpf has been prime mover in DuMont reorganization and now sits on board; by Kuhn, Loeb & Co., which also has a board member (Percy M. Stewart) and by Paramount Pictures Corp., which presently owns 26.6% of DuMont stock and has 3 board members (Barney Balaban, Paul Raibourn, Edwin Weisl).

New DBC will embrace DuMont stations WABD, N. Y. & WTTG, Washington, along with Telecentre and other properties and obligations—all inventoried in detail in the proxy statement. FCC this week approved transfer of WABD & WTTG licenses to DBC.

Besides voting on the spinoff, DuMont stockholders are asked to approve elimination of Class A & B stock distinctions and increase authorized shares of parent company to 5,000,000 in order "to have shares available for financing or acquisitions should favorable opportunities occur." At present, 1,801,054 A shares are outstanding, with entire 560,000 B issue owned by Paramount.

Stockholders are also asked to approve contract with Dr. DuMont, now chairman, whereby he gets annual salary of \$50,000 until 1966, or \$36,000 a year should he elect to go on consultative basis after end of 1961, plus \$20,000 a year for 10 years after 1966; also, to give him option on 35,000 shares of common stock at 17 and to set aside 90,000 shares for granting of long-term options to a new president (now being sought) and other key executives.

* * * *

DuMont Network was virtually discontinued as of mid-July (Vol. 11:34), and pro forma financial summaries indicate how it has fared. Proxy report shows that broadcasting income (other than WABD & WTTG but including then owned WDTV, Pittsburgh, later sold to Westinghouse) amounted to \$11,402,393 out of company's gross income of \$73,997,620 in fiscal year ended Dec. 28, 1952, thus representing pro forma profit of \$1,697,610 (72¢ per share); that for fiscal year ended Jan. 3, 1954 the broadcasting gross was \$14,550,396 out of \$87,569,588, giving profit of \$1,458,564 (62¢); for fiscal year ended Jan. 2, 1955, it was \$15,440,550 out of \$87,803,659, giving profit of \$823,445 (35¢) exclusive of net profit of \$6,726,939 from sale of WDTV. For period from Jan. 3 to July 17, 1955, the broadcasting gross fell to \$2,553,335 out of \$31,410,417, representing loss of \$1,492,292 (63¢).

Losses are attributed in pro forma summaries to the operation of the 2 DBC stations and other facilities now transferred to DBC. Thus combined net operating incomes of WABD & WTTG, plus these other facilities, are given as \$2,830,742, loss \$834,524 for fiscal year ended Dec. 28, 1952; income \$4,534,401, loss \$84,433 for year ended Jan. 3, 1954; income \$5,384,053, loss \$161,386 for year ended Jan. 2, 1955; income \$2,697,185, loss \$222,359 for period Jan. 3-July 17, 1955.

Network-station fiscal operations were interlocked, so pro forma summaries of earnings were prepared on basis of expense allocations for operating Telecentre, salaries paid executives and staff, depreciation, etc.

ROANOKE'S NEW WDBJ-TV (Ch. 7) and Ohio State University's educational uhf, WOSU-TV, Columbus (Ch. 34), began testing this week, bringing on-air total to 451 (108 uhf) as Canada's 29th outlet began operating in Barrie, Ont. Week also saw one station knocked off air temporarily when its antenna tower collapsed, apparently without cause — KELO-TV, Sioux Falls, S. D. (Ch. 11). Another about to start, WITN, Washington, N. C. (Ch. 7) was hit by third hurricane within 30 days and had to postpone tests.

Roanoke's WDBJ-TV aired first test patterns Sept. 19, plans commercial debut as CBS outlet first week in Oct. It starts with 25-kw ERP from 5-kw DuMont transmitter, 6-section RCA antenna on 667-ft. modified former tower of defunct uhf WROV-TV, will boost to 316-kw ERP early in 1956. Owner is *Roanoke Times & World News*, director is Ray P. Jordan, with John W. Harkrader, from radio station, as commercial mgr.; Blake H. Brown, sales mgr.; Paul E. Reynolds, program director; Charles A. Ballou, program mgr.; Harry D. Wiseman, production mgr.; J. Edward Newman, technical director. Base rate will be \$450, going to \$600 next April 1. Rep is Free & Peters.

Columbus' WOSU-TV becomes 18th non-commercial educational TV, 5th uhf educational. Starting test patterns Sept. 19, it plans program start in Nov. It uses 12½-kw RCA transmitter with RCA pylon on 550-ft. Ideco tower. Robert C. Higgy is director.

CKVR-TV, Barrie, Ont. (Ch. 3) started testing last weekend, plans Sept. 28 programming via microwave from Toronto, 55 mi. south. It has 5-kw GE transmitter with 3-bay antenna on 393-ft. Stainless tower. Ralph T. Snelgrove, operator of radio CKBB, is pres.-gen. mgr.; board includes former Mayor Peter Sinclair of Barrie and R. Stanley Dilworth, Toronto. Claude Baikie, ex-CHCH-TV, Hamilton, is production mgr.; Jack Mattenley, chief engineer. Base rate is \$240. Reps are Weed and Paul Mulvihill.

* * * *

The KELO-TV tower & antenna collapsed at 7:50 p.m. Sept. 20, but station got STA for interim operation with 200-ft. tower and single-section antenna. Its newly-installed satellite KDLO-TV, Florence, S. D. (Ch. 3), reported ready to start test patterns (Vol. 11:38), may delay its program debut accordingly.

The Washington, N. C. station's mgr. W. R. Roberson Jr. had planned Sept. 20 test patterns, Sept. 26 NBC hookup, when equipment was struck by hurricane Ione. Its 102-ft., 5-bay Alford antenna on 818-ft. Stainless tower withstood Ione's blasts, reported Roberson, and studios are ready. But transmitter house had to be cleaned out and other damage appraised in order to complete installation of 20-kw GE transmitter, and men are working around clock to get things going.

* * * *

In our continuing survey of upcoming stations, these are latest reports from principals:

KHOL-TV's satellite in Hayes Center, Neb. (Ch. 6), which got CP this week (see p. 8), begins construction immediately and will be in operation by late Nov., wires mgr. Jack Gilbert. Hayes Center is over 100 mi. from parent KHOL-TV, Kearney (Ch. 13). Unique feature of new outlet is that it will be built with help of residents in area to be served who are contributing \$140,000 toward estimated \$188,166 it will cost, having entered into agreement with KHOL-TV to turn over funds collected by county committees as soon as CP was granted. Satellite will have

FARM TV CENSUS tabulations completed this week by U. S. Census Bureau show that 82.8% of New Jersey's 22,686 farms—or 18,798—were equipped with TV in Oct.-Nov. 1954 when the count was made on basis of 20% sample. In Tennessee, 50,123 or 24.6% of 203,149 farm homes had TV. The county-by-county farm TV count, from 1954 Census of Agriculture:

GE transmitter, antenna on 581-ft. Stainless tower. Rep is Meeker.

KBMB-TV, Bismarck, N. D. (Ch. 12), has installed 10-kw Federal transmitter, but bad weather has delayed installation of 4-bay Federal antenna atop State Capitol. City's 2nd TV expects to meet Oct. 1 test pattern and Nov. 1 programming targets, reports pres. & principal owner John W. Boler, also operator of North Dakota's KCJB-TV, Minot (Ch. 13) & KXJB-TV, Valley City (Ch. 4). KBMB-TV plans 10-12 hours of local programming weekly, will rebroadcast CBS programs of Valley City outlet for most part. Its base hour will be \$150, with all three stations offered at combination \$637.50 rate. Weed is rep for the 3 stations.

'BEGINNING OF BREAK-THROUGH' ON COLOR: The whiplash of big promotions, expansion of programming (including World Series starting Sept. 28), coordinated merchandising effort of National TV & Radio Week -- all these factors are combining to speed tempo of color sales this month. RCA chairman David Sarnoff, in Sept. 20 address to Ad Club of Washington, called it "the beginning of the break-through," said color will be a "major factor" in the industry by end of 1956.

Officials of RCA, which appears to be carrying color ball almost alone among manufacturers (in combination with NBC programming), express themselves as "quite pleased" with movement of color sets at all levels -- though obviously the numerical total is not impressive when stacked up against black-&-white. Still, they hope that the "Cadillac trade" -- perhaps as many as 35,000 -- will have purchased color sets by year's end, and are banking on accelerating sales from 1956 forth.

They're also pleased with perking interest by hotels, bars and other public users who were among first with black-&-white. This week, the big Governor Clinton Hotel in N.Y. bought 50 RCA 21-in. color sets to be placed in suites at no extra charge to patrons, and announced plans to have color sets in all 1200 rooms eventually. RCA pres. Frank M. Folsom commented: "We feel certain that countless other hotels will follow the lead of the Governor Clinton."

* * * *

Two big deterrents to all-out color splurge thus far have been lack of enough color programs and high prices. NBC and CBS are taking big steps this year to lick first problem. But from a high RCA source this week came word that there are "no plans for the moment" to reduce prices of RCA's color sets (\$795 & \$895). He said there's no prospect of lower prices, short of mass production. However: "If any set maker can make and sell 25,000 a month, it's conceivable they could come down."

Some big RCA distributors are reporting success in efforts to push color among dealers, recognizing that many retailers are hesitant to take on \$700-plus merchandise, especially in view of color's "false starts" in past. Biggest RCA distributor Bruno-N.Y. reported 150 of its dealers now have color sets in stock, indicated average sales to consumers had been running about 15 per week until this week, when dealers reported total of about 100 sales. Said Bruno's Irving Sarnoff:

"We sold 32 sets to dealers Sept. 19, the day after "Our Town" was on NBC. We're selling some every day. I think we'll run short of them before the end of the year, based on present production schedules."

Thomas F. Joyce, pres. of Raymond Rosen & Co., Philadelphia, has announced immediate goal of 150 color set sales a week, and has assigned promotion specialist exclusively to color, with \$45,000 earmarked for advertising. Washington RCA outlet Southern Wholesalers Inc., in area with 350-500 color sets already in use, reported 40 dealers are demonstrating them, said sales to date are "satisfactory."

NARDA chairman Mort Farr, a color enthusiast, is currently on cross-country speaking tour exhorting dealers to push color. "Women love color and you have to demonstrate it properly," he told Phoenix audience. "The profit realized from sale of 30,000 color sets is equal to 180,000 black-&-white table models." NARDA pres. Harry B. Price Jr., Norfolk chain retailer, personifies bearish attitudes of some dealers. He said no color sets have been sold to consumers in his market, so far as he knew. He said he could not see any enthusiasm for it because of (1) high prices and (2) poor local transmission, which made it difficult to demonstrate sets.

RCA meanwhile is promoting color to beat the band in its ads. Campaign began with full pages Sept. 18 in 141 newspapers in 126 markets, then with heavy plugs on "Our Town"; it will continue with local space in color areas and with regular spots on Milton Berle Show, Fibber McGee & Molly, Monitor and other TV-radio programs.

"Every market in the U.S. where a color TV signal can be received will be heavily covered," said RCA Victor TV adv. mgr. J.M. Williams.

Other manufacturers are virtually mute by comparison. Admiral & Motorola say they're shipping "to demand" only, report only trickle thus far. Latter says it will promote color sets in its partic. sponsorship on NBC's color Matinee Theatre.

* * * *

TV prices keep inching up, Philco boosting 36 receivers out of 48-model line by \$10-\$30 this week. RCA spokesman says company is still hoping to avoid price hike -- but there's known to be talk of raising one or 2 leader models by \$10. It depends on market conditions in next month. Admiral, Motorola, Emerson, DuMont, Stromberg-Carlson, Trav-Ler and a few others had raised prices previously. Zenith, Westinghouse and Sylvania, in addition to RCA, haven't raised them yet.

Brief highlights of other major trade developments this week:

* * * *

Philco Objects: Philco takes vigorous exception to "guesstimate" we published last week (Vol. 11:38), quoting report showing that Philco sales of TV receivers ran 11% of the market -- after RCA, first with 18%. While neither Philco nor any other set maker has released exact percentages, and our figures came from a highly regarded research source, Philco spokesman said "our percentage is much higher . . . Philco's new 1956 line of TV receivers, now going to distributors and dealers, is in even greater demand than any TV line in the industry. Philco factories are operating on an overtime and Saturday basis to meet the foreseeable demand for the fall market. Note: What wasn't made abundantly clear in our story, which referred to "sales during most of last year and 1955," was that the research period covered the 15 months preceding July 1955, hence meant 9 months of 1954. Those 9 months embraced the 45-day strike at Philco plants which began May 3 and ended June 17, 1954 (Vol. 10:18,15).

Economic Boom: U.S. Chamber of Commerce quarterly report, released this week, predicts best Xmas business in history at all levels of industry. It notes almost all businesses except agriculture currently hitting new highs in sales volume, says economy is operating close to capacity. Construction, it declares, is expected to continue upward climb through 1956. Other indices of prosperity noted in report: (1) Gross national product is currently at annual rate of \$390 billion, having hit peak of \$385 billion in second quarter. (2) Employment reached all-time record of 65,500,000 in Aug. (3) Federal Reserve Board index soared to high of 140 in July, 3 points above previous peak of 1953. On negative side, it called attention to some "doubtful spots" in economy, particularly increase in consumer installment credit.

Whirlpool Merger: Shifts of manufacturing personnel and distributors are under way in earnest, in wake of recent formation of Whirlpool-Seeger Corp. in which RCA owns 20%. John W. Craig, v.p. of RCA Estate, was elected one of 7 v.p.'s of new company; Austin Rising, gen. mgr. of RCA room air conditioners, also moved over to Whirlpool-Seeger as gen. mgr. of air conditioners & ranges; Joseph B. Ogden, an RCA regional sales mgr., will become air conditioner sales mgr.; T.H. Ford, engineering mgr. of RCA air conditioners, becomes product mgr. of air conditioners; E.W. Simms becomes gen. mgr. of Estate div. at Hamilton, O. They are among twoscore changes to be announced next week by new company, many involving RCA stove and air conditioner personnel. Distribution pattern was equally fluid. Four RCA distributors reportedly were lopped off by Norge, in anticipation that they soon would handle Whirlpool. They were Leo J. Meyberg Co., San Francisco; Morris Distributing Co., Syracuse; R.T.A. Distributors, Albany; D & H Distributing Co., Harrisburg. And in Minneapolis, the rumored distribution shift materialized, in which F.C. Hayer Co., RCA distributor, took over Whirlpool from Reinhard Bros.

Production: TV output totaled 198,874 week ended Sept. 16, highest this year, compared to 183,912 preceding week and 185,114 week ended Sept. 2. It was 37th week of year and brought TV production to date to about 5,375,000 vs. 4,500,000 in same 1954 period. Radio production totaled 270,207 (127,129 auto) week ended Sept. 16, highest in 4 months, compared to 234,812 week ended Sept. 9 and 239,401 week before. For 37 weeks, radio production was 9,380,000 vs. 7,450,000 in same 1954 period.

Topics & Trends of TV Trade: "Today's TV sets are the greatest retail value of any consumer commodity," said RETMA pres. H. Leslie Hoffman Sept. 21 in address marking Los Angeles celebration of National TV & Radio Week. He explained:

"While I was in the East, I asked the RETMA statistician to take the average price that the consumer paid for a TV set [\$200 currently], the average trade-in value [\$30-\$40] and the average cost of servicing [about \$14 a year], together with the life of the TV set [7 years] and figure out how much the average consumer was paying per hour for the great entertainment that he was receiving in his home. He came up with the almost unbelievable figure of 3 cents an hour!

"I have argued with statisticians before, but never successfully, so I will take this as an established fact. It still seems too low to me, however. But let us say that it is a nickel an hour—even here we could give any major industry a very substantial argument that we have the greatest bargain in the consumer field."

Note: RETMA emphasizes that its estimates are only "educated guesses," admits that some marketing experts in industry would quarrel with them. For example, some manufacturers contend that industry is still too young to estimate the life of a set, that some of earliest receivers are still in use.

* * * *

Sylvania's 10,000,000th TV picture tube came off the Seneca Falls (N.Y.) plant line this week, a 24-in. unit; chairman-pres. Don G. Mitchell, present at ceremony, remarked that if the 10,000,000 were laid end-to-end they would reach from N. Y. to London and said: "It is symbolic that I have just returned from London and I can say that Sylvania is going to bring its tube production know-how to England via the formation of a picture tube company there in conjunction with Thorn Electrical Industries Ltd. [whose] initial output will be more than 500,000 a year."

New 16 $\frac{2}{3}$ rpm phono-record package being produced exclusively for 1956 Chrysler line by CBS-Columbia and Columbia Records under "Highway Hi-Fi" title (Vol. 11:38) will sell for \$80 as optional equipment. The 6-record package to be supplied with first sale includes selections from *Pajama Game*, symphonic record by Philadelphia and N. Y. Philharmonic orchestras, original-cast recitals of *Don Juan in Hell*, selections by Andre Kostelanetz, Percy Faith, Paul Weston, Fess Parker, Gene Autry. Columbia later will make available 25 more records.

TV shipments to dealers totaled record 3,549,877 in first 7 months, when production was 4,173,088, according to RETMA state-by-state report released this week (county-by-county tables available to members from RETMA on request). They compared with shipments of 2,977,177, production of 3,152,132, in first 7 months of 1954. New York led with 347,900; California second, 302,613; Pennsylvania third, 217,660. July shipments totaled 465,160, compared to 407,087 in 5-week June, 329,574 in July 1954.

Ed Sullivan, TV impresario and newspaper columnist, lost suit for injunction to restrain Ed Sullivan Radio & TV Inc., Buffalo, N. Y., from using that name—Supreme Court Justice Walter A. Lynch ruling this week that there's no conflict of interest and remarking that there were Ed Sullivans long before plaintiff was born and will doubtless be many more Ed Sullivans in future.

NARDA's successful Institute of Management for TV-radio dealers (Vol. 11:34) will be repeated next year at American U, Washington, with enrollment expanded to 100 and fee of \$125 covering week's tuition, text material, housing in campus dormitory, ticket for "graduation" banquet. Inquiries should be sent to Dean N. A. Baily.

Trade Personals: Frederick D. Ogilby, v.p.-gen. mgr. of Philco TV div., returned to his desk this week after long illness . . . Percy L. Spencer, Raytheon v.p. & gen. mgr. of its microwave & power tube operations, elected to board . . . J. A. (Shine) Milling, for last 3 years exec. v.p. & gen. mgr. of Howard W. Sams & Co. and ex-v.p., RCA Service Co., elected pres. of the firm; Mr. Sams, who founded big technical publishing firm in 1946, becomes chairman of board . . . Robert F. Herr, Philco v.p. in charge of tech-rep div., returned Sept. 20 from 6-week European business trip . . . Mannie Sacks, RCA staff v.p. and Albert F. Watters, RCA international div. v.p., due back from European business tour first week in Oct. . . . Harold J. McCormick, GE district sales mgr. in N. Y., named TV-radio adv. & sales promotion mgr., replacing G. A. (Tony) Bradford, resigned . . . Leonard A. Freeman, ex-mgr. of CBS-Hytron's new Kalamazoo plant, named asst. to Joe Benaron, pres. of Pacific Mercury TV Mfg. Co., partly owned by Sears Roebuck . . . G. W. Wallin, ex-Webster-Chicago engineering v.p. & onetime chief engineer of Motorola home products div., joins Bell & Howell as exec. v.p. of its TDC (high-fidelity) div. . . . Bryan Hardwick promoted to Hoffman Electronics northwest district mgr. . . . Robert F. Kaufman, ex-CBS & Paramount Pictures, named adv. & public relations v.p., Precision Radiation Instruments Inc., parent of high-fidelity equipment manufacturer Radio Craftsmen Inc. . . . Robert L. Wolf elected engineering v.p. of Globe-Union's Centralab div. (parts) . . . Eugene Duffner, ex-chief TV-radio purchasing agent for Sears Roebuck, and Earl Pruitt named Fla. and Ill.-Ind. sales mgrs., respectively, for Channel Master Corp. . . . Gene Gold, ex-Audio & Video Products Corp., named merchandising mgr., Granco Products Inc.

* * * *

DISTRIBUTOR NOTES: CBS-Columbia appoints Radio Electric Service Co., 3rd & Tatnall Sts., Wilmington, Del.; Arthur Fulmer of Kentucky, 118 W. Chestnut St., Louisville (Robert Goodlin, gen. mgr.); Major Appliance Distributors Inc., 1213 W. Morehead St., Charlotte (Charles M. Lowe, pres.); Buchanan-Williamson Supply Co., Grundy, W. Va. (George Bishop Jr., pres.) . . . Raytheon appoints Standard Electric Supply Co., 1045 N. 5th St., Milwaukee, ex-CBS-Columbia outlet . . . RCA Victor Distributing Co., Detroit, appoints Reid Donaldson home instrument sales mgr., succeeding George Mansour, now in record div. of RCA Victor Co. Ltd., Montreal . . . Allied Appliance Co., Boston (Motorola) appoints Robert Cheyne gen. merchandising mgr., Paul L. Bishop major appliances sales mgr. . . . Sues, Young & Brown Inc., Los Angeles (Zenith) appoints Ford C. McElligott merchandising mgr. . . . J. A. Williams Co., Pittsburgh (Zenith) appoints C. E. Stauffer gen. sales mgr., Morris B. Epstein asst. to pres., Charles H. Weaver adv. & sales promotion mgr. . . . Epting Appliance Co., Charlotte (Hallicrafters) appoints Furman Ferguson, ex-Fred A. Barnette Distributors, as a v.p. . . . CBS-Columbia of N. Y. appoints Robert Segal as controller . . . Thurow Distributors Inc., Miami (Sylvania) moves headquarters to 1800 NW 23rd St. . . . Sylvania appoints Appliance Merchandisers, 802 Hayden St., Ft. Wayne (M. E. Kumle, pres.).

Willard H. Sahloff, v.p.-gen. mgr. of GE small appliance div., to receive first annual housewares & appliance industries' distinguished service award from Joint Defense Appeal at testimonial dinner Oct. 11 at Hotel Plaza, N. Y.

GE advertising of TV broadcast equipment won Direct Mail Advertising Assn. award at Chicago convention last week; adv. mgr. Roy Jordan accepted citation.

Dr. Allen B. DuMont's 54-ft. yacht *Hurricane II* was declared season's point winner last week of predicted-log cruiser racing, receiving national championship trophy.

Electronics Reports: A \$30-\$40 billion electronics industry, with 92,000,000 TV sets in use, many of wall-screen type and nearly all in color—that's what 3 leaders foresee 20 years from now in written predictions they were asked to supply for inclusion in sealed cornerstone of new financial office building in Elizabeth, N. J. Highlights of their forecasts:

RCA pres. Frank Folsom—Industry's annual dollar volume will rise from \$11 billion today to \$30 billion because "a constantly growing America will buy more such items as color and 'wall screen' TV sets; electronic home controls and appliances, such as electronic refrigerators, electronic air conditioners, and possibly even washers; electronic heating; TV tape recorders . . ." By 1975, "there will be at least 92,000,000 TV sets in the United States, 90% of which will feature color," receiving live programs from all over globe.

CBS pres. Frank Stanton—Electronics industry today accounts for more than \$8 billion annually, or 2-2.5% of gross national product. By 1975 "it may account for 4-5% or something in the neighborhood of \$35 billion." Also: "General acceptance of color."

Admiral pres. Ross Siragusa—"Color TV will be standard in American homes with pictures projected from a central receiving instrument on flat tubes in picture frames that can be switched on like extension loudspeakers in each room." Solar-powered transistor radios will last a lifetime. Guided missiles may land on planets and transmit TV pictures back to earth.

* * * *

Nickel shortage is pinching tube industry again, representatives of 7 receiving tube manufacturers told Commerce Dept. Sept. 20 in second of series of electronics industry meetings with Commerce's Business & Defense Services Administration (BSDA) and officials of other agencies. Industry spokesmen said production cutbacks may be necessary unless more high grade nickel is made available. BSDA representatives replied that demand exceeds supply and that Govt. no longer controls distribution of metals for non-defense uses. Meeting of Receiving Tube Industry Advisory Committee was called in connection with upcoming study of industry's mobilization capacity. Committee approved list of proposed categories of tubes to be used in collecting data on requirements and production capacity. Represented at meeting were RETMA, RCA, Philco, CBS-Hytron, Raytheon, Sonotone, Sylvania, Tung-Sol. Other industry advisory meetings scheduled by BSDA Electronics Div. under Donald S. Parris: transmitting & special purpose tubes, Sept. 27; relays, Oct. 5; resistors, Oct. 6; capacitors, Oct. 11. Meeting with quartz crystal industry was held Sept. 12.

Portable transistorized receivers and transmitters which require no battery but operate from power radiated by standard broadcast stations are being developed experimentally by Hydro-Aire Inc., Burbank, Cal. As described by Dr. Hans Hollman at recent Western Electronics Convention, radiation from local broadcast station is picked up and rectified to provide sufficient power for transistor circuits.

First solar-powered telephone exchange will go into service Oct. 4, Bell Labs announces. Bell System will hook up 8 phones to solar battery atop utility pole at its all-transistorized experimental telephone exchange in Americus, Ga. (Vol. 10:18).

RCA tube div. will construct new \$3,000,000 plant near Somerville, N. J. to handle semi-conductor activities (transistors, diodes). It will have 126,000 sq. ft., be ready by fall of 1956, according to div. v.p.-gen. mgr. D. Y. Smith.

TV and RADIO SETS withstood atom blast last April, were found to be still operating after 35-kiloton explosion within 2 miles away at Yucca Flat. Results of experiment on atomic bomb's effect on electronic equipment were disclosed this week by Raymond H. Williamson, GE, who was in charge of RETMA-Civil Defense project. He said a TV set placed in a brick house 4700 feet from blast worked immediately thereafter, with no servicing needed, even though the house crumbled. The set was overturned and cabinet damaged. A portable radio, placed in frame house 10,000 feet from blast site, also was operable without servicing.

A standard mobile broadcast station located in a concrete slab house 4700 feet from the blast went off air because a gas power generator failed and a service wire broke when a telephone pole fell down during explosion, but service was restored in 15 minutes. Most mobile radios in cars less than mile from blast site also worked later.

Williamson said experiment proved that communications can be restored in reasonable time for use in evacuations, and that salvage is worthwhile in any but the "A" zone—area of complete destruction.

Companies participating were Admiral, American Phenolic, Andrew Corp., Antenna Specialists Co., Belden Mfg. Co., Bendix Aviation, Cook Electric, Corning Glass, Dale Products Inc., DuKane Corp, Erie Resistor, GE, Hallcrafters, Hughes Aircraft, Hydro-Aire Inc., I.D.E.A. Inc., J-B-T Instruments, Jefferson Electric, JFD Mfg. Co., Lenz Electric, P. R. Mallory, Motorola, North Electric Co., Permoflux Corp., RCA, Remler Co. Ltd., Simpson Electric, Speer Carbon, Sprague Electric, Stainless Inc.

Daystrom Inc. sold American Type Founders, its printing equipment subsidiary—as we predicted in Aug. (Vol. 11:32)—for \$9,000,000 this week to investor group headed by David Berdon and Jay Levine of N. Y., thus concentrating 85% of operations in electronic field (one subsidiary builds furniture). During past year, Weston Electrical Instrument Corp., American Gyro Corp. and Heath Co. were added to its Daystrom Instrument Div. & Daystrom Electric Corp. Firm will maintain executive offices in ATF plant, Elizabeth, N. J., until it builds new quarters.

IRE's Professional Group on Electron Devices (G. D. O'Neill, Sylvania, chairman) holds annual technical meeting at Shoreham Hotel, Washington, Oct. 24-25. Atlanta section, IRE (B. J. Dasher, Ga. Tech., gen. mgr.), and Professional Group on Instrumentation plans Southeast electronics conference & exhibit at Atlanta Biltmore Hotel, Nov. 28-30.

Russian electronics papers and articles, translated into English, now a regular feature of *Electronic Design Magazine*, which editorially urges Govt. "to start such a program of translating and disseminating foreign technical information on an official basis." First translation to appear in the publication was description of transistorized radio receiver from Soviet magazine *Radio*.

I.D.E.A. Inc., Indianapolis (transistor radios, uhf converters, etc.) has acquired Radio Apparatus Co., same city, makers of radios & communications equipment (R. G. True, pres.) via exchange of common stock. Radio Apparatus will operate as Monitor-radio div.

Walter E. Ditmars, pres. of Gray Mfg. Co., Hartford, received "patriotic advertising award" of Sons of the American Revolution for his firm's anti-Communist ad campaign. Charles Donahue Jr. appointed asst. to Gray gen. sales mgr. to direct adv. & sales promotion.

Yale & Towne Mfg. Co. has purchased new 12,300-sq. ft. plant at Addison, Ill. for production of ferrite components for TV-radio-electronics.

POLITICAL FOOTBALL is being made of \$2.4 billion Air Force contract with AT&T for vast communications network, biggest such contract in history, following this week's disclosure by the Comptroller General that lease was signed without Congressional authority. Costing \$240,000,000 a year for 10 years, vast semi-automatic radar air defense network goes by name SAGE (Semi-Automatic Ground Environment), links 8 combat and 32 direction centers through 25,000 new telephone circuits. Air Force now leases 1500 circuits for all purposes at \$48,400,000 annually.

Adding to political uproar, which commanded considerable newspaper attention this week after story was first broken by a columnist, is fact that Air Force Secy. Donald Quarles is an ex-Western Electric v.p. and ex-pres. of its guided missiles subsidiary, Sandia Corp. WE's Fred R. Lack was absent in Europe when story broke.

As week ended, Democrats were hurling fresh "big business" charges at Republican Administration; Rep. Cannon (D-Mo.) ordered full-scale investigation by House Appropriations Committee, but hearings aren't expected before Jan.; many subcontractors were in confusion about what may come next; General Accounting Office said Air Force lacked authority to sign contracts but agreed to reconsider case if AF asked and stated that if work continues without authority it would be at AT&T's "risk".

AT&T appeared undisturbed, observed contract represented very little profit to it, if any, stated:

"The telephone company's sole interest in the SAGE project is to help meet the defense needs of the country. The work undertaken by us has been at the specific request of the Dept. of Defense in every instance and the rates for facilities are identical with those charged other customers and are in accordance with the rate schedules supervised by State and Federal regulatory bodies . . . There has been no attempt on our part—nor will there be—to extend the scope of the facilities needed for SAGE. We stand ready, as we always have, to provide the Defense Dept. with whatever communication facilities it feels it needs for the safety of the country, and that is the extent of our interest in this whole matter."

In early editorial comment, there was no inclination to suggest skullduggery; for example, Sept. 22 *Washington Star* editorialized: "One can only deplore the readiness—eagerness might be a better word—of House Majority Leader McCormack to play partisan politics with the legal dispute over the plan for constructing a far-reaching air defense communications system . . . Perhaps the Air Force should have obtained specific authorization for the additional circuits, which will cost a large sum of money. But it thought it already had authority to go ahead. And it seems clear that appropriate Congressional committees were kept informed of the Air Force plans. This hardly adds up to a conspiracy or scandal . . ."

Registering with Congress under Federal Lobbying Act for first 6 months of 1955 were these firms and their Washington representatives. AT&T, Edward B. Crosland, Ronald J. Foulis, Blake T. Newton Jr.; CBS, Earl H. Gammons; Clear Channel Bestg. Service, Hollis M. Seavey; GE, Robert T. Borth; Hughes Tool Co., Seymour Mintz, Wm. T. Plumb Jr., Robert K. Eifler, R. A. Mullens; Motorola, F. Cleveland Hedrick, Maurice J. Paul; NARTB, Thad H. Brown Jr., Oscar Elder, Harold E. Fellows, Ralph W. Hardy, Vincent Wasilewski; NBC, Francis M. Russell; Philco, Henry H. Glassie, Henry B. Weaver Jr.; RCA, George Y. Wheeler II.

Technograph Printed Electronics Inc., Tarrytown, N. Y. reports licensing RCA under its printed circuit patents.

Maj. Gen. Jerry V. Matejka, due to retire Aug. 31 as asst. to Army Deputy Chief of Staff for Logistics, appears likely choice to succeed Harold M. Botkin as Office of Defense Mobilization's asst. director for telecommunications, important policy job of charting nation's communications mobilization. Botkin returned Sept. 19 to AT&T long lines dept. as asst. to v.p. H. T. Killingsworth, after completing year's service in the mobilization post. Gen. Matejka, 61, has been detailed on "temporary assignment" to ODM's telecommunications office. ODM officials were wary, however, of commenting on the possibility that he would succeed Botkin as asst. administrator, though it's believed he'll be offered the post after his retirement from army. Well known to communications-electronics industry, Gen. Matejka has served in Office of Chief Signal Officer, Munitions Board, as Chief Signal Officer of European Command and as commanding general of Ft. Monmouth.

Dr. Vladimir K. Zworykin, pioneer TV inventor and honorary RCA v.p., accompanied by Mrs. Zworykin, sailed Sept. 23 on the *Conte Biancamano* to address 3rd annual International Meeting on Communications in Genoa, Italy, Oct. 9-11, sponsored by Instituto Superiore della Telecomunzioni. He'll speak on "Contributions of TV and Electronic Optics to Spreading of Knowledge Among Men," will return to U. S. by air Oct. 20.

George Stevenson, ex-Radiation Inc., named sales coordinator of International Resistance Co. subsidiary Circuit Instruments Inc., St. Petersburg, Fla.; Ernest W. Yonick, ex-Sperry Rand, named eastern sales mgr. IRC last week broke ground in Sylmar, Los Angeles County, for 26,000-sq. ft. building to house its subsidiaries Hycor Co., IRCal Industries, Emec Inc.

Dr. James B. Fisk, exec. v.p. of Bell Labs, and Robert C. Sprague, chairman of Sprague Electric Co., were among signers of top-level report submitted to National Security Council by Killian committee, headed by MIT pres. Dr. James J. Killian Jr., which probed this country's position in air-atomic weapons.

Dr. Harry F. Olson, director of RCA's acoustical-electro mechanical research lab, will receive SMPTE Warner Memorial award Oct. 4 at convention at Lake Placid Hotel, N. Y.

George T. Scharffenberger, Federal Telephone & Radio Co. v.p., named v.p. in charge of operations of Kellogg Switchboard & Supply Co., also an IT&T subsidiary.

Brig. Gen. Albert F. Cassevant, ex-Army signal officer in Far East, named chief, Signal Corps procurement & distribution div.

J. E. Sullivan, civilian chief of Navy Bureau of Aeronautics' airborne div., resigns to become mgr. of Washington office of Lear Inc.

Clevite Corp. opens new Washington branch office with Henry W. Gottfried Jr. in charge; he's ex-v.p., North American Aviation Co.

Brig. Gen. W. Preston Corderman, deputy Chief Signal Officer, promoted to major general.

Philip A. Portnoy, exec. asst. to Harry R. Ashley, pres. of Electronic Instrument Co. (Eico), promoted to v.p.

Steven Galagan appointed engineering director, Gabriel electronics div.

Edward L. Nelson, 64, chief scientist, Army Signal Corps research & development, died Sept. 21 at Arlington, Va. He retired from Bell Labs in 1951 after 34 years on radio development, held 11 patents and supervised aircraft & ship radar projects in World War II. He is survived by his wife, 3 sons, 2 daughters.

FCC COMR. Robert T. Bartley, taking exception to proposals by CBS pres. Frank Stanton and others that equal time rule on political broadcasts (Sec.315) be amended (Vol.11:22), told NARTB regional meeting at Saranac Lake, N. Y. Sept. 23 that "tampering with the statute would go a long way toward undermining one of the basic principles which guarantees the freedom of radio in this country." Law's requirement for equality and fairness to all shades of political opinion, he said, also protects broadcaster since it insulates him from unreasonable pressures by parties.

"The proposal to put in the hands of a network or an individual licensee the power to determine which candidate should appear on his network or station," Bartley said, "would not be a cure for the problems that exist in the handling of political broadcasts. Such a proposal might be a solution for the problems that national networks face during a presidential campaign. But is the suggested change in the law a solution for the local broadcaster and his local audience? . . . I think that such a proposed 'cure' would kill the patient instead, by removing one of the basic safeguards of fair play in our system of broadcasting today."

Free TV time issue erupted again earlier this week when N. Y. Gov. Harriman and NBC completed arrangements for monthly simulcast "Report to the People"—evoking quick Republican demand for equal time. Hamilton Shea, NBC v.p. in charge of WRCA-TV, replied that program—starting Sept. 25—is in "public interest," referred to similar broadcast by Gov. Devey in 1949, refused G.O.P. request for present, but promised equal time if Gov. Harriman injects partisanship into discussions. Gov. Harriman's reports are to be carried on NBC 9-station N. Y. State TV network and an NBC State radio network, originating live at WRCA-TV, and will be broadcast semi-monthly during legislature sessions next year.

Denver's KFEL-TV, whose purchase by J. Elroy McCaw has been approved by FCC (Vol. 11:31), this week got new gen. mgr., Jon R. McKinley, ex-WTAC-TV, Flint. At same time, McCaw announced that Founders Corp., subsidiary of Tele-Trip Inc., New York aviation insurance firm, has exercised option on 50% of KFEL-TV, taking over half of \$400,000 sale price and half of \$350,000 liabilities. John M. Shaheen heads Founders board, other members being Eugene duPont III, Wilmington; H. J. Rand, Cleveland; and H. B. Lamy Jr., Philip Gandert & Joseph P. Kane, New York. Founders Corp. operates radio KPOA, Honolulu, last year bought WTAC, Flint, from Campbell-Trendle interests, after latter turned in CP for off-air Ch. 16 WTAC-TV (Vol. 10:32, 40). Note: Seller Gene O'Fallon, who is retained as KFEL-TV management consultant, with offices at 550 Lincoln St., Denver, announces formation of Gene O'Fallon & Sons, representing Boothe Leasing Corp., national leasing service for industrial equipment & machinery; his new company also will operate a rental & leasing service that includes closed-circuit TV, lines including Fleetwood and Singer large-screen TV projectors.

Approval of \$150,000 sale of KAVE, Carlsbad, N. M. with CP for KAVE-TV (Ch. 5) to John Battison group (Vol. 11:32) is sought in application filed this week. New owners will be Nancy H. Battison, pres., holding 76% (with husband John becoming mgr.); Charles D. Cole, engineer of Austin Co., Cleveland, v.p., 3%; Philip M. Baker, Washington attorney, 5%. Edward P. Talbott, chief engineer of KROD-TV, El Paso retains 16% of present holdings. Principals selling out are KROD-TV gen. mgr. Val Lawrence and Norman R. Loose.

CBS-TV's *Gene Autry Show*, on film, will be colorcast for its 5 episodes during Oct., Sat. 7-7:30 p.m.

Signs of the TV times: NBC's KRCA, Los Angeles, reports local time sales in Aug. up 73% from year ago, all NBC o-&-m stations rising 29%; radio WMAQ, Chicago, was up 85% in month, all NBC radio stations up 29% . . . WOR-TV, N. Y. not only goes on all-night schedule (Vol. 11:38) but reports billings for first 9 months 82% ahead of same 1954 period, attributable chiefly to *Million Dollar Movie* and other feature films . . . Philip Morris, readying for color TV and launching "retina retention" ad campaign on TV-radio Oct. 1, is coming out with red, white & gold package; appliance people going in stronger for colored items, GE disclosing 17% of its major appliances are now in color . . . Siegler Oil Heaters advertised in big headlines: "As different from ordinary heaters as TV is from radio!"

Next Armed Forces TV stations will be at Army's Kagnev Station, Asmara, Eritrea, and at Clark Air Force Base, Philippines, with both scheduled to begin low-powered telecasts about Nov. 1. Guantanamo Bay Navy Base in Cuba is due to get outlet by year's end. Greenland's second installation is also due by same time. Navy has requested station in Kodiak, Alaska, and 2 closed-circuit TV installations will be built at Whittier and Big Delta Army bases in Alaska. Armed Forces TV Service, under Lt. Col. M. E. Williamson, now has 7 TV stations. Its only outlet in continental U. S., at Loring Air Force Base, Maine, will go off air if either of 2 proposed stations is built at nearby Presque Isle, according to Col. Williamson.

Sale of radio WUSN, Charleston, S. C. for \$110,000 by J. Drayton Hastie family and *Evening Post*, who retain WUSN-TV (Ch. 2), was approved by FCC this week. New owners, with 50% each, are TPA's Barry Winton and Sol Panitz, TV-radio director of Alvin Epstein Adv., Washington agency (Vol. 11:34). Also approved was sale of WTRX, Bellaire, O. for \$85,500 by John Kluge, Washington, also owner of several other AMs, who bought it last year (Vol. 10:41) from owners of WTRF-TV, Wheeling, W. Va. (Ch. 7). New owners are Washingtonians—ex-NARTB admin. v.p. Robert K. Richards, now a public relations counsel, and Walter Patterson, who also own 2 W. Va. radio stations.

RCA Color TV Caravan, with crew of 18 headed by James P. McCarvill, will show at Texas State Fair for its duration Oct. 7-23 and is expected to show color TV to some 2,500,000 people. Studio will be set up in Agriculture Bldg., from which KRLD-TV & WFAA-TV will both colorcast. Featured will be special color TV projector using 15x20-ft. screen in addition to the twenty 21-in. color sets that will be set up throughout the fair grounds. Some of the technicians manning 32-ft. caravan trailer recently returned from black-&-white demonstrations for RCA at international trade fairs in Karachi, Pakistan & Djakarta, Indonesia.

Agreement has been reached for sale of WFBG-TV, Altoona, Pa. (Ch. 10) with WFBG (250 watts, 1350 kc, NBC) for \$3,500,000 cash instead of the \$2,900,000 cash and \$750,000 advertising credit previously agreed upon (Vol. 11:32-33). Triangle Publications Inc. (WFIL-TV, WBNF-TV, *Philadelphia Inquirer*) is purchaser; Gable dept. store interests the seller. Formal application for transfer will be filed with FCC shortly.

ABC-Paramount is new name of AB-PT's record label, changed from Am-Par. Under pres. Sam Clark, it's compiling big-name catalog, plans big promotional campaign this fall featuring \$100,000 time purchase on ABC-TV's upcoming *Mickey Mouse Club*.

New application for Presque Isle, Me., Ch. 8, was filed this week by WAGM, bringing total on file with FCC to 156 (19 uhf). [For details see *TV Addenda 21-K* herewith.]

PUBLISHED WEEKLY BY RADIO NEWS BUREAU • WYATT BLDG. • WASHINGTON 5, D.C. • TELEPHONE STERLING 3-1755 • VOL. 11: No. 40

SUMMARY - INDEX OF THE WEEK'S NEWS — October 1, 1955

TV'S MARKET GAPS pinpointed in Advertising Research Foundation report showing highest percentage of non-TV homes in rural areas and in South (p. 1).

COLOR TUBE COMPETITION promised as GE shows developmental model due for 1957 production and Westinghouse announces upcoming 22-in. (pp. 2 & 15).

SUPERIOR PICTURE QUALITY of British TV attributed to better camera equipment in England and "engineering shortcuts" of American stations (p. 3).

16 MORE STATIONS scheduled for final 1955 quarter. Starters so far this year total 48 while 18 uhf quit. Total now on air: 453 (p. 3).

PHILADELPHIA UHF grant to Herbert Mayer, who also seeks uhf in Boston. Ch. 13 granted for 24-hour station in Las Vegas. Dropout paves way in Twin Falls (p. 4).

ALLOCATIONS DISCUSSIONS beginning at FCC level with special 2-day meeting, as RETMA's allocations committee is requested to report to Commission Nov. 1 (p. 5).

IT'S TV vs. HOLLYWOOD in scramble for rights to Broadway stage successes, with network financing of legitimate productions increasing (p. 5).

TV INVENTORIES OF 2,350,000 as of Oct. 1 don't alarm trade, in view of higher production and sales. Distributors report on color (p. 10).

110,200 DEALERS HANDLE TV-Radio, up 3100 from July 1954, reports RETMA; Midwest leads with 35,000; average of 70 sets sold per dealer in year (p. 12).

COLOR SETS IN PUBS, hotels and meeting places indicate TV history may be repeating itself. What they said about color at first World Series games (p. 7).

87 OF TOP 100 ADVERTISERS in U. S. used network TV during last 6 months, reports PIB; they represented 84% of TV billings, which were up 35% (p. 6).

FARM TV CENSUS reports on 6 states—Ark., Conn., Mass., R. I., Tex., Wash.—released by Census Bureau. Counts for half of states now in (p. 8).

2 NEW VHF STARTERS this week—WITN, Washington, N. C. (Ch. 7) and WHTN-TV, Huntington, W. Va. (Ch. 13). Reports on upcoming stations (p. 9).

UNIQUE MEXICAN STATION at Nuevo Laredo cost only \$10,000 to build, under \$500 per month to operate; composite transmitter puts out 100 watts power (p. 16).

WHERE THE SETS AREN'T—TV'S MARKET GAPS: There's a new study out this week which graphically pinpoints the gaps in TV ownership-- indispensable information for market men striving to penetrate the 15,682,000 homes which don't have a TV set. Accepting CBS Research's recent calculation that 97% of all U.S. homes are within signal range of TV, that means an enormous untapped market for initial sales.

Prepared by Advertising Research Foundation, 11 W. 42nd St., N.Y., with title of "National Survey of Television Sets in U.S. Households -- June 1955," 27-p. report presents 15 tables projected from Census Bureau's recent report (Series H-121, No. 1) on its 25,000-family sample (Vol. 11:34, 39). Highlights of ARF projections:

(1) Highest percentage of non-TV homes is on "rural farms" (57.7%). But the greatest number of non-TV homes is on "rural non-farms" (3,917,000). A "rural farm" is defined by ARF as "including all the households in small towns, villages and hamlets and in open-country whose houses are on farms." "Rural non-farm" takes in all non-farm homes in areas of less than 2500 population. We're currently publishing state-by-state counts of TV farms as they're released by Census (Vol. 11:28 et seq). Twenty-four states have thus far been reported on, of which the latest -- covering Ark., Conn., Mass., R.I., Tex., Wash. -- will be found on pp. 8-9.

(2) Areas outside "standard metropolitan" in the South have highest percentage and greatest number of non-TV homes (61.8% and 4,128,000). All told, South has 5,400,000 non-TV homes (49.8% of its total). ARF uses 5 Nielsen TV index territories for regional breakdowns (Northeast, East Central, West Central, South Pacific) while the Census Bureau uses 4 regions (Northeast, North Central, South, West). By Nielsen standards, South comprises Va. (except Arlington & Fairfax counties), N.C., S.C., Ga., Fla., Tenn., Miss., Ala., Ark., La., Okla., Tex. & N.M.

(3) There are 4,935,000 two-person households and 3,527,000 one-person homes

without TVs, according to report. Taken together, they represent more than 50% of the 15,682,000 non-TV homes in nation. Report doesn't say where they are, however.

Census Bureau had previously reported 32,106,000, or 67.2%, of the 47,788,000 households in nation, had a TV set as of June; 1,000,000, or 3.5%, owned second set; 4 out of 5 homes in metropolitan areas had a set, with top saturation 79.7% in the Northeastern region (New England and Middle Atlantic states) and with ownership predominating among larger families.

Note: Still no word on when NARTB's long-promised county-by-county census of sets-in-use, even as a one-shot, will get under way. Meanwhile, Television Magazine is out this week with its own county-by-county tabulations.

COMPETITION AHEAD FOR SHADOW-MASK TUBE: Both GE and Westinghouse reported on new and improved color tubes this week--but neither can offer them for market yet. The Westinghouse announcement of an upcoming all-glass 22-in. rectangular color tube was released same day GE was briefing newsmen on a new tube concept which it calls "post acceleration"--also 22-in. rectangular, non-metallic, using "electron optical masking" as against RCA's already-introduced and mass-produced "shadow masking."

Timing of the GE & Westinghouse disclosures, which in the case of GE came in wake of similar showings to 20 of its CR tube customers, led to inevitable speculation that they were intended not only to convey competitive promises but to emphasize unacceptance by those companies of the RCA shadow-mask tube now offered RCA customers at \$100 each and contained in all color sets now going on the market.

But the official explanation of the newsmen's invitations to GE's Electronics Park in Syracuse was that it was merely to render "progress report" on a tube still under development that provides many times more brightness than the shadow-mask type but that "probably will miss the 1956 market." Or, as GE tube dept. gen. mgr. J.M. Lang put it, a tube that won't be in production before 1957.

Besides demonstrated superiority in brightness -- though not yet in quality -- it was claimed for the GE tube that it will save 25-30% in cost of components.

GE has no plans to produce the aperture mask tube, Mr. Lang told us, which means that it's "willing to sacrifice the commercial advantage of being first on the market in order to produce a sound and proven product." GE's contention is that the post-acceleration tube permits a type of operation and circuitry which "seems to point the way eventually toward the least expensive acceptable color TV set."

Mr. Lang and other spokesmen conceded that GE might be proved wrong in its bearish estimate of a color market now, for which RCA is producing sets and beating the drums (see p. 10) -- and in response to a question intimated that GE might find itself forced to make sets with the shadow-mask tube if color "catches fire."

"Let's wait until about Feb. 1 and see," said one GE executive. Meanwhile, in stating that it has no intention of making color sets immediately and indicating its intention of waiting for its own tube, GE is falling in line with Philco, Zenith and others refusing to go along with RCA's zeal for color-now. Like the others, GE thinking is that color sets have to be priced \$500 or less to be marketable.

Westinghouse tube div. v.p. R.T. Orth merely announced from nearby Elmira plant same day (Sept. 27) that his company's all-glass 22-in. rectangular color tube has advantages over RCA's metal-coned tube by way of cost reduction; that it will require only the standard voltage and insulation of black-&-white; that it can be mass-produced alongside black-&-white tubes on a cheaper basis. But he didn't offer to demonstrate it and said it won't be ready for production for another 8-12 months.

Corning Glass Works was represented at the Syracuse demonstration, for it's intensely interested in glass as against metal-coned bulbs. In mass production, the glass bulbs are said to be much cheaper, hence conducive to lower tube & set prices.

GE spokesmen insisted they're not selling color short per se. They conceded they might go into field earlier if demand is proved, marketing mgr. R.A. Norman stating company has "tremendous confidence in the future of color as the basic TV medium." GE market researchers were quoted as forecasting possible sale of 6,000,000 color sets in 1960, going up to 8,750,000 in 1964.

Note: For technical description of the GE tube, see p. 15.

BETTER BRITISH PICTURES—ANOTHER VERSION: Superiority of the British TV image, which Americans almost invariably notice right off and which has been attributed mainly to more careful engineering at the transmitting end (Vol. 11:36), drew some pertinently fresh comment this week from one of the keenest and most respected journalistic observers of the American TV-radio industry -- N.Y. Times' Jack Gould, just back from London. His observations tallied with ours, as we reported them from England last year (Vol. 10:45), though he has another version of the whys & wherefores.

This matter of comparative TV images may or may not indicate a remissness on the part of our telecasters when it comes to "quality control". We don't know yet -- but we propose to find out and we're trying to get more opinion from top technical authorities. Meanwhile, here's Gould's London report on "lessons for American TV":

"There is a technical lesson to be learned from British TV, one that has a special and fresh pertinency with this fall's many color 'spectaculars' in the U.S. The quality of the British image [black-&-white] is infinitely superior to the American picture. This was noticeable here 2 years ago but it is apparent that American TV hasn't improved in the interval.

"Theoretically, our picture should be better. The American standard calls for a picture of 525 lines, whereas the British image is 405 lines. According to a New York engineer who has been helping the British commercial station get on the air, the answer lies not in the sets but in the British camera pickup equipment. He explained that the British equipment was less operational than the American but much more meticulously constructed and operated.

"Whatever the reason, the American stations should stop taking engineering shortcuts and see what they can do. From the viewer's standpoint it would be worth every penny. And if greater engineering care in the studios and at the transmitters would help eliminate some of the fuzziness on black-&-white receivers during color transmissions, it certainly should be done.

"The clean British picture, even on the larger sets, is certainly a pleasure to watch." To which last observation we add our own hearty assent, albeit we didn't find they had much to teach us in the way of programs or production techniques.

STATION BOXSCORE—NOT MANY MORE THIS YEAR: Three more months to go -- and definite prospect is that only 16 more stations will take to the air before the year is out. With 2 more vhf starters this week -- in Washington, N.C. & Huntington, W.Va. (for details see p. 9) -- total on air is now 453, of which 108 are uhf. Included are 18 educational non-commercials, 5 of them uhf.

Up to now the 1955 starters have totaled 48, while 18 quit the air -- all of latter uhf if you don't count merger of vhf time-sharers in Monterey-Salinas, Cal. Of the 18, two have returned -- KTVU, Stockton, Cal. (Ch. 36) and WJPB-TV, Fairmont, W.Va. (Ch. 35). Also returning was a 1954 "mortality" -- WTOV-TV, Norfolk (Ch. 27).

Since TV began, 56 stations have left the air apparently for good, all but 8 of them uhf; however, 31 retain license or CP. Voluntarily relinquished since lift-off freeze were 130 CPs, 107 of them uhf, while applications pending for new stations now stand at 156 -- indicating no "gold rush" nowadays.

A few more may manage to get on the air during next 3 months, but our records as verified by known equipment orders and/or shipments show only 16 definitely due to start before year's end -- plus bare possibility of 3 others delayed by litigation. This is the list, with prospective starting times as reported:

KTVO, Kirksville, Mo. (Ch. 3). Oct.
WORA-TV, Mayaguez, P.R. (Ch. 5). Oct.
KBMB-TV, Bismarck, N.D. (Ch. 12). Oct.
KRBB, El Dorado, Ark. (Ch. 10). Oct.
WTWV, Tupelo, Miss. (Ch. 9). Oct.
KBST-TV, Big Spring, Tex. (Ch. 4). Nov.
KLEW-TV, Lewiston, Ida. (Ch. 3). Nov.
KTHV, Little Rock, Ark. (Ch. 11). Nov.
WHTC, Pittsburgh, Pa. (Ch. 11). Nov.

KHOK-TV, Hayes Center, Neb. (Ch. 6). Nov.
KMVI-TV, Walluku, Hawaii (Ch. 12). Nov.
KHAS-TV, Hastings, Neb. (Ch. 5). Dec.
KOKE, El Paso, Tex. (Ch. 13). Dec.
WDMJ-TV, Marquette, Mich. (Ch. 6). Dec.
KOSA-TV, Odessa, Tex. (Ch. 7). Dec.
WREC-TV, Memphis, Tenn. (Ch. 3). Dec.
*WJRT, Flint, Mich. (Ch. 12).
*WSPA-TV, Spartanburg, S.C. (Ch. 7).

*WBLK-TV, Clarksburg, W. Va. (Ch. 12).
Canadian
CKRS-TV, Jonquiere, Que. (Ch. 12). Oct.
CJLH-TV, Lethbridge, Alta. (Ch. 7). Oct.
CKNX-TV, Wingham, Ont. (Ch. 8). Oct.
CKGN-TV, North Bay, Ont. (Ch. 10). Dec.

* Delayed by protest.

Three TV applications filed with FCC this week bring total pending to 156 (19 uhf). They were: For Yuma, Ariz., Ch. 13, by Wrather-Alvarez Bcstg. Co., owners of KFMB-TV (Ch. 8) San Diego; for Buffalo, N. Y., Ch. 59, by attorney Bernard I. Obletz, Philco distributor Richard

S. Levy, building supply dealer Daniel A. Roblin; for Ironwood, Mich., Ch. 12, by WJMS. [For details, see *TV Addenda 21-L* herewith; for complete listings of all grants, new stations, applications, etc., see *TV Factbook No. 21* with Addenda to date.]

Personal Notes: Wm. V. Sargent promoted to new post of NBC-TV director of administration, reporting to Thomas A. McAvity, v.p. in charge of TV network . . . Franklin C. Snyder, gen. mgr. of WXEL, Cleveland since its inception in 1949, resigned as of Sept. 30, succeeded temporarily by Wm. Rine, Storer northern district v.p. . . . Wm. D. Shaw, gen. mgr. of KNX, Hollywood, named CBS Radio network sales mgr., succeeding Dudley Faust, being transferred; Shaw reports to sales v.p. John Karol. Bert West, sales mgr. of KNX, is promoted to succeed Shaw . . . Edward Codel, Katz v.p. & director, elected to board of Station Representatives Assn., filling unexpired term of Katz's George Brett, now retired . . . Robert H. Teter, sales mgr. of Westinghouse's radio KYW, Philadelphia, promoted to gen. mgr., succeeding Franklin A. Tooke, transferred to N. Y. exec. offices of parent company on special assignment; Rolland V. Tooke (no kin) remains gen. mgr. of WPTZ, Philadelphia . . . Douglas D. Kahle, ex-gen. mgr. of Pueblo's KCSJ-TV, named gen. mgr. of new KNTV, San Jose, Cal. (Ch. 11) succeeding Harry T. Maynard . . . Hal Wilson, ex-KOOL-TV, Phoenix & KOPO-TV, Tucson, serving recently as consultant on construction of WIRI, Plattsburgh, N. Y., named operations director of WITN, Washington, N. C. (Ch. 7) . . . James A. Gunn, ex-KTVW, Tacoma, named sales mgr. of KONA, Honolulu, succeeding James A. Wethington, now KGMB-TV, Honolulu . . . Richard H. deMontmollin, ex-WCRA, Greenwood, S. C., named sales mgr. of WIS-TV, Columbia, S. C. . . . George Jacobs, returning from San Diego's KFMB-TV, where he was detailed as technical director for boost to 316-kw ERP, named engineering & development director of KOTV, Tulsa, with Lavoy Hooker promoted to succeed him as chief engineer . . . Edward Edison, ex-RCA Service Co. branch mgr. in Hollywood & San Francisco, ex-NBC engineer, ex-asst. chief engineer of KLAC-TV, joins Robert L. Hammett, consulting radio engineer, San Francisco . . . Tom Burham promoted from radio CKRS to mgr. of upcoming CKRS-TV, Jonquiere, Que. (Ch. 12), due in Oct. with Gerard Lemieux as technical director, Jean-Marie Dugas program director . . . Dale Sheets promoted to MCA-TV western sales director, Beverly Hills; Noel K. Rubaloff elevated to administrative asst. to sales v.p. Wynn Nathan; Robert P. Riley heads new producer relations dept.; Robert Montgomery, ex-World Bestg. System, placed in charge of new Tampa office . . . Stan Smith, ex-ABC eastern sales mgr., joins Official Films as N. Y. sales mgr. . . Otto Paoloni promoted to service mgr., Pathe Laboratories Inc., succeeding Joseph Tames, assuming new duties with Pathecolor Inc., also a Chesapeake Industries Inc. subsidiary . . . Gerard Pick, ex-NBC, named industrial film mgr., Animated Productions Inc., N. Y. . . . Wm. A. Wood, ex-educational WQED, Pittsburgh & CBS Washington, named gen. mgr. of educational WTVS, Detroit . . . Sherman M. Egan, transmitter supervisor, named acting chief engineer of WNBC-TV, Binghamton, N. Y., succeeding L. H. Stantz.

* * * *

AGENCIES: George E. Simons, ex-Crosley-Bendix director of adv. & promotion who joined Kenyon & Eckhardt, last Feb., elected v.p. of agency . . . Gerry Martin, ex-director of DuMont Network sales, joins Kenyon & Eckhardt, N. Y. . . . Charles Sinclair, ex-senior editor of *Sponsor*, ex-WPIX, joins Rogers & Cowan, N. Y. . . . Frank Dennis resigns as v.p. in charge of TV-radio copy, Doherty, Clifford, Steers & Shenfield . . . Alfred DeAngelus named TV-radio director, Robinson, Adelman & Montgomery Inc., Philadelphia.

CBS wins 1955 Howard W. Blakeslee Award from American Heart Assn. for film "Gate 27" in *The Search* series, depicting heart disease research.

TWO GRANTS awarded by FCC this week to untested applicants: (1) Ch. 23 in Philadelphia to Herbert Mayer, founder and ex-owner of pioneer uhf KPTV, Portland, Ore. and of WXEL, Cleveland, who also is applicant for Ch. 38 in Boston. (2) Ch. 13 in Las Vegas, Nev. to Moritz Zenoff, owner of radio KBMI, Henderson, Nev.; he proposes round-the-clock film operation in what would be third vhf in famed gambling resort.

Dropout of Twin Falls TV Co. (August H. Vogeler) this week left owners of KIDO-TV, Boise, in line for early grant of Ch. 13 in Twin Falls, Ida.

In other actions this week, the Commission: (1) Dismissed protest and petition for reconsideration by WIRK-TV, West Palm Beach, Fla. (Ch. 21) seeking to reverse FCC's approval of sale of WEAT-TV, West Palm Beach (Ch. 12) to General Teleradio (Vol. 9:31). (2) Approved move of transmitter by KBES-TV, Medford, Ore. (Ch. 5) to point 26 mi. SE of city, despite pendency of "5-mile rule" which would require transmitters be located within 5 mi. of city. (3) Set Nov. 28 date for start of 2-way hearing for Ch. 4 in Cheboygan, Mich.

WMUR-TV, Manchester, N. H. (Ch. 9) petitioned FCC to redraw zone boundary so that all of Vermont & New Hampshire, or all portions of the 2 states above 42°55' parallel, fall within Zone II. Station cited rugged terrain, added it wants to go to 316-kw at 2000 ft. in order to compete more effectively with stations in Boston and Mt. Washington.

Coahoma County Chamber of Commerce, Clarksdale, Miss., objected to Commission's proposal to shift Ch. 6 from Clarksdale to Indianola, Miss. (Vol. 11:36).

NBC-TV acquires 2 of top men in entertainment field—Leo Durocher, ex-mgr. of N. Y. Giants & Brooklyn Dodgers, and Jess Oppenheimer, creator, writer & producer of *I Love Lucy*—in networks' mounting talent donnybrook. Durocher, known for his close ties with many outstanding entertainment figures as well as his "lip" in baiting umpires, and who is married to actress Laraine Day, quit Giants Sept. 24, joined NBC Sept. 27 in "executive capacity" without formal title at reported salary of \$52,000 per year. He will serve as "talent scout," occasional sports commentator, network representative in Hollywood. Oppenheimer, who broke into network radio in 1938 as writer for Fred Astaire program, once was head writer-director for Fanny Brice. He also wrote for Jack Benny, Edgar Bergen, Rudy Vallee and was under exclusive contract with CBS from 1948. He joins NBC Hollywood staff next spring to serve on program planning group creating new shows; will produce own shows and have percentage stake in them. Across the Atlantic, race for big names is keeping pace with American efforts. BBC has signed Dr. Roger Bannister, first man to run 4-min. mile, as sports commentator. New commercial ITA broke tape first, however, by hiring Chris Chataway, who also ran 4-min. mile after Bannister, in similar capacity.

New FCC Comr. Richard A. Mack's assistants, named this week: engineering, John E. Doane, 43, ex-supervising engineer of FCC's broadcast hearing div. and onetime chief of FM branch; legal, H. Earl Barber, 32, who resigns from private practice in Miami, was once UP correspondent.

Father Placid Jordan, O.S.B., who as an early NBC foreign correspondent was known as Dr. Max Jordan before he took the cloth, will return to the U. S. from the Benedictine Monastery at Bueron, Germany, for a lecture tour next spring.

FCC Comr. Webster returns Oct. 2 after 3 weeks in Gothenburg, Sweden, where he headed group of U. S. observers at Baltic & North Sea Radiotelephone Conference on maritime safety.

SERIOUS STUDY of allocations—deintermix-
ture, uhf problems, vhf drop-ins, etc.—will
begin at the Commission level next week, with
special FCC meetings Oct. 3-4 to look at “the en-
tire problem.” Meetings will be devoted to review
of studies already made and in progress at staff
level. Chairman McConnaughey said Commission
will continue to have special meetings “as often as
possible” to work on allocations problems.

Another allocations study, the TV transmitter-
receiver manufacturers' Frequency Allocation
Study Committee set up under RETMA aegis
(Vol. 11:39), is getting down to work in a hurry,
having been requested by Chairman McConnaughey to
submit its final report by Nov. 1—same date when com-
mittee's chairman, GE's Dr. W. R. G. Baker, is due to
leave on 3-week European trip. Study will be geared to
“the place of uhf,” is expected to reject proposals to add
more vhf outlets via drop-in route.

The growing conviction that the Commission, Con-
gress and others are finally going to tackle uhf-allocations
problems in earnest, apparently has set off a tiny boom
in the market for uhf channels. After long drought, 7
applications for uhf stations have been filed with FCC
in last 9 weeks. One uhf grant was made this week to
veteran telecaster Herbert Mayer for Philadelphia (see
p. 4), another last week to Orange County Bestrs. for
Orlando, Fla. (Vol. 11:39).

Encouraged by NBC's purchase of uhf WBUF-TV,
Buffalo (Vol. 11:11, 15, 39), local group there this week
applied for independent outlet on Ch. 59—despite fact that
2 uhf outlets have left air in Buffalo for economic reasons.
A 40% owner of new applicant is Richard S. Levy, v.p. of
Philco distributor W. Bergman Co. He told us this week
that since news of NBC's purchase, sales of uhf tuners
have picked up. “NBC's shows single-handedly built TV
here in 1949-51,” he added, “and we're confident that they
could do the same for uhf.”

Meanwhile, NARTB was lambasted this week by Roger
L. Putnam, onetime govt. price stabilizer who is pres. of
uhf WWLP, Springfield, Mass. Threatening to resign, he
accused the association of “ignoring the present and grow-
ing problems within the broadcast industry,” and added:

“The NARTB and certain of its principal spokesmen
have persistently filled the eyes and ears of the FCC com-
missioners with false propaganda to the effect that uhf
is an unfit medium and incapable of providing a real
service to any community.” He assailed NARTB's “im-
portant members” for backing vhf drop-in proposals and
increases in tower height, which “will ultimately ruin
reception in far more areas than they will improve it.”

FCC's confidential financial data on TV stations and
networks is due to be turned over to Senate Interstate &
Foreign Commerce Committee's TV investigators as re-
sult of ruling by Attorney General's office. Justice Dept.
has overruled Commission's contention of last year that
U. S. Criminal Code barred it from turning over to Con-
gress the documents on which its financial studies are
based (Vol. 10:52). The information had been requested
by ex-FCC Comr. Robert F. Jones, who at that time was
majority counsel to the Senate investigation. Attorney
General's office ruled that the Commission may release
the documents on individual station and network finances
to Congressional probers at its own discretion. The Com-
mission now has volunteered to make the material avail-
able if it's kept confidential.

National Assn. of Educational Broadcasters holds an-
nual convention at Chicago's Del Prado Hotel Oct. 26-29;
Frank Schooley, U of Illinois (WILL-TV), will preside.

Telecasting Notes: Is TV ready to outbid Hollywood for
rights to Broadway stage successes? *Variety* thinks it is,
noting in Sept. 28 issue that NBC-TV is putting up \$100,-
000 to finance forthcoming Lindsay-Crouse production of
The Great Sebastians, starring Alfred Lunt & Lynn Fon-
tanne—first time a network has backed straight non-musi-
cal drama, though both CBS & NBC have previously served
as “angels” for Broadway musicals as investments and for
sake of their recording companies. (By RCA-NBC: *Call
Me Madam, Wish You Were Here, Me & Juliet*. By CBS:
Tree Grows in Brooklyn and upcoming *Pygmalion & Big
Banjo*) . . . NBC's deal for Lunt-Fontanne play gives it
rights to TV version 6 months after close of N. Y. run, as
well as title to all costumes, props, etc., with network in
line to make profit on Broadway receipts if play is hit.
Says article: “Since video networks had already stepped
into the legit financing setup with pre-production deals
for various Broadway musicals, this means that TV, rep-
resenting the huge assets of major commercial sponsors, is
ready to outbid Hollywood for stage material. It's ob-
viously only a matter of a short time before the networks
get into full competition for literary material as well” . . .
Columbia Pictures, long active in TV through its Screen
Gems subsidiary, understood to be dickering with networks
for hour-long show under its own name, a la *Disneyland*,
Warner Bros. Presents, 20th Century-Fox Hour, et al.
Columbia also is seeking bids on block of old feature films
(quantity and age unrevealed) from networks and syndi-
cators . . . Spectacular ratings going up: CBS-TV's *Ford
Star Jubilee* Sept. 24 featuring Judy Garland got Trendex
of 34.8; NBC-TV's first spectaculars of season, “Skin of
Our Teeth” and “Our Town” drew 14.4 & 26.5 respectively
. . . New British movies on TV, in form of ABC-TV's
Famous Film Festival, drew No. 2 rating on highly com-
petitive Sun. 8-9 p.m. spot. Sept. 25 Trendex showed *Ed
Sullivan Show* (CBS) with 35.8, *Famous Film Festival*
8.4, *Colgate Variety Hour* (NBC) 6.3 . . . Upcoming spe-
cials: Fred Astaire reportedly has signed for his first 2
TV appearances on CBS-TV's *Electric Theatre* Sun. 9-9:30
p.m.; another version of Dickens' “A Christmas Carol” due
for the holiday season, on ABC-TV's *MGM Parade*, filmed;
CBS-TV schedules *Report Card*, series of 5 weekly shows
tied in with upcoming White House Conference on Educa-
tion, beginning Oct. 30 Sun. 2:30-3 p.m. . . . Significant
observation by *Variety*, which runs company-by-company
film syndication tabulation in Sept. 28 issue: “Virtually
every major firm in the business is doing anywhere from
25-75% of its business from re-run sales” . . . Historic
pipe organ which provided theme music for scores of
NBC's Chicago-originated radio programs, was donated
by network to new U. S. Air Force Academy at Colorado
Springs; built 20 years ago for more than \$50,000, it was
removed from NBC's Merchandise Mart studios last Feb.
in preparation for studio remodeling . . . NBC's new “mgr.
of comedy development”: Les Colodny, ex-Wm. Morris
Agency.

United World, subsidiary of Universal Pictures, will
expand its TV and industrial film production, its TV v.p.
Norman Gluck this week announcing appointment of
George Bole as production v.p. UW has produced TV com-
mercials for GE, Coca Cola, Marlboro, Philip Morris, Lux,
DeSoto, Colgate, among others.

Power increases: WGBS-TV, Miami (Ch. 23) Sept. 27
to 186-kw ERP from new 937-ft. tower; WMAL-TV,
Washington (Ch. 7) Sept. 20 to 225-kw; WFAM-TV,
Lafayette, Ind., (Ch. 59) Sept. 22 to 204-kw.

Annual McCall's “Mike” Awards for public services
by women in TV & radio will henceforth be announced in
May instead of Jan.; entries are due by Oct. 5.

TOP 100 NATIONAL advertisers, of which 87 are using TV, accounted for \$166,672,111 (84%) of \$197,309,819 total network TV billings during first 6 months of 1955 (Vol. 11:32). As tabulated by Publishers Information Bureau, network TV shows 35% increase over same period, 1954; combined TV, radio, magazine & newspaper gain is 13%. With increased advertising budgets the rule, everything points to record volume this year; TV holds strong lead over magazines (in top 100 outlays) for 6 months—\$166,672,111 vs. \$129,263,801; total for 4 media in period is \$365,444,667 vs. \$323,547,166 for same 1954 period.

PIB lists 20 newcomers among "top 100" in period. Last year, outlays of under \$1,000,000 were sufficient to gain listing for 5 in the tabulation; in 1955, all have passed that mark. For first-half 1954 rankings, see *TV Factbook No. 20*, p. 36; for entire 1954 rankings, see *TV Factbook No. 21*, p. 24.)

Note: PIB figures are based on one-time gross rates, hence are discountable by at least 25% to arrive at more realistic estimate of outlays for TV time; also, figures do not embrace talent, production & other costs, usually equated at 1.75 times net cost of time (Vol. 11:39, p. 1). Here are rankings of top 100 with their total network TV and total radio expenditures during first 6 months of 1955:

Company	Total Expenditures	Network Television	Network Radio
1. General Motors	\$26,948,227	\$ 6,636,750	\$3,347,611

Recommended reading: Sept. 19 edition of *Broadcasting-Telecasting*, with its 144-p. Report on Radio in 1955, particularly articles titled "Curve Starts Up" with graph and table showing upturn in AM and "Radio Joins the Business Cycle," by Richard P. Doherty, detailing how the medium is growing apace with the economy. Also, Sept. 19 *Sponsor Magazine's* roundup on the Negro radio market and tabulation of more than 600 AM stations specializing in reaching it.

Network Accounts: NBC-TV will shortly raise the minimum number of stations advertisers will be required to take for so-called "basic network." It will reveal plan at press luncheon Oct. 6 at 21 Club in N. Y. Meanwhile, there's speculation that required minimum may be hiked to 100 stations (out of 188 affiliates) from present basic minimum of 55 stations (costing \$66,450 per hour) . . . Steve Allen signs new 3-year contract with NBC-TV, which disclosed that his *Tonight* (Mon.-thru-Fri. 11:30 p.m.-1 a.m.) is near break-even point on revenue; show is about 30% sold out, and profit is anticipated when it reaches 33½% . . . ABC-TV reports 53 network partic. sold for 8-week period starting Oct. 2 for J. Arthur Rank's *Famous Film Festival* series, Sun. 7:30-9 p.m.; additional local partic. have been sold by stations . . . Revlon to keep \$64,000 *Question* on CBS-TV, Tue. 10:30-11 p.m., and will share sponsorship with P. Lorillard Co. of new tie-in program featuring \$64,000 *Question* contestants on CBS-TV Sun. 10-10:30 p.m. . . NBC-TV's answer to \$64,000 *Question* is *The Big Surprise* (sponsored by Speidel & Purex, offering contestant \$100,000, starting Oct. 8, Sat. 7:30-8 p.m.; like \$64,000 *Question*, it's packaged by Louis G. Cowan Inc. . . Walt Disney's *Mickey Mouse Club*, which debuts on ABC-TV Oct. 3, Mon.-thru-Fri. 5-6 p.m., has been sold to 18 national sponsors for gross of \$15,000,000 in time & talent . . . Ralston Purina to sponsor *Ethel & Albert* on ABC-TV starting Oct. 14, Fri. 10-10:30 p.m., thru Guild, Bascom & Bonfigli, San Francisco . . . Pharmaceuticals Inc. to sponsor Ted Mack's *Amateur Hour* on ABC-TV starting Oct. 6, Thu. 10-10:30 p.m., thru Edward Kletter Assoc. . . Standard Brands to sponsor *Topper* on ABC-TV starting Oct. 3, Mon. 7:30-8 p.m., thru Compton Adv. . . GE clock & timer dept. to sponsor *Adventures of Ozzie & Harriet* every 4th week on ABC-TV starting Oct. 14, Fri. 8-8:30 p.m., thru N. W. Ayer; other sponsors are GE's Hotpoint Co. and Quaker Oats' Aunt Jemima div. . . Longines-Wittnauer Watch Co. to sponsor annual *Thanksgiving Day Festival* on CBS-TV Thanksgiving Day, Nov. 24, 5-6 p.m., thru Victor A. Bennett Adv. . . Mutual of Omaha takes option on alt. sponsorship (with Quaker Oats) of *Zoo Parade* on NBC-TV Sun. 3:30-4 p.m., thru Bozell & Jacobs.

With 10 Toni brands as first accounts, North Advertising Inc. starts as a new agency Dec. 1 with offices at 430 N. Michigan Ave., Chicago; 6 E. 45th St., N. Y.; 9533 Brighton Way, Beverly Hills, Cal. Founders are Don Paul Nathanson & Cyrus H. Nathan. Nathanson is ex-adv. director of Toni; he will serve as pres., recently was v.p. of Weiss & Geller, Chicago. Nathan, ex-v.p. of Biow and Foote, Cone & Belding, will be exec. v.p. In Chicago, Roger Moran will be creative director; Bernard Lee, merchandising director; Jack McCord, in charge of TV-radio; Harold Rosenzweig, treas.; George Gruenwald, James Mackin, Bennett Cooper, Richard Sachse, account executives. Bruce Dodge, ex-director of TV-radio at Weiss & Geller, Kenyon & Eckhardt and Biow, will supervise N. Y. & L. A. offices—with Frank Higgins heading production in N. Y. and Walter N. Hiller Jr. in charge at L. A. and Maxine Anderson as production chief.

International Advertising Assn., Roosevelt Hotel, N. Y. has released Section 1 of new *Code of Ethics & Standards of Practice* dealing with all world-wide advertising media. First section promulgates general policies for agencies, including standard forms for agreements. Part 2, to be released later, will deal exclusively with TV-radio practices; third section will cover all other media.

TV Cartoon Productions, 222 Kearny St., San Francisco, has issued booklet for ad agencies covering planning, budgeting, production & techniques for TV animations.

HISTORY is repeating itself, apparently, in the matter of color TV set sales—for it's to the bars, restaurants, hotels and public meeting places that a good many of the color sets are going, according to distributors. Wealthy people, for the most part, are the other buyers—at \$795 & \$895 per set—but some installment-buying by those in comparatively moderate circumstances is reported.

World Series colorcasts gave impetus to the "pub trade"—and these varied in quality from very poor (first game) to good (second game) to superb at times (third game). FCC Chairman McConaughy and Comr. Hyde reported they didn't see the games but their families did and found the color pictures extremely good.

RCA intimated that the bar and hotel people are now so interested that more multiple installations are on tap; last week, it disclosed that the Gov. Clinton Hotel in N. Y. had ordered 50 color sets (Vol. 11:39). One RCA distributor, Eastern Co.'s Alan Steinert, reported from Boston that "hotels and bars are grabbing them."

Divergent viewpoints on quality of the color at the games, reflecting fact that different sets have different "personalities," to say nothing of different handling, is evident in comments on the first World Series games.

After first game, N. Y. *Herald Tribune* columnist Marie Torre reported that consensus among those who watched at RCA Exhibition Hall was that baseball heroes in color are "perfectly wonderful, especially in the closeups." After same game, N. Y. *Times*' Jack Gould found "the tinted version was far from impressive because outdoor pickups are not yet electronic color's strong features." He wrote:

"The mighty Joe Collins appeared to be skipping around an artist's palette . . . Color TV's chief problem was Nature's peculiar reluctance to acknowledge the coming of the TV age. During the course of the afternoon, the sun and clouds kept moving and the shadows lengthened. This led to constantly changing lighting conditions with which the color cameras could not fully cope . . ." Gould continued to complain of "degraded" pictures on black-&-white, and said the Series game was further proof.

Radio-TV Daily saw everything good about color at the first World Series game: "Viewed from one of 3 RCA receivers set up for the press by the School of Radio Technique," it reported, "the picture was vibrantly alive with a 3-dimensional quality uncommon to black-&-white video."

Rate increases: WAAM, Baltimore, raises base hour from \$975 to \$1100, min. \$175 to \$200; WRGB, Schenectady, hour from \$850 to \$950, min. \$165 to \$190; KFMB-TV, San Diego, raises Class A min. rate from \$160 to \$180; WMCT, Memphis, adds new Class AA hour (7-9:30 p.m. daily) at \$800, min. at \$160, Class A hour remaining \$700; WFLA-TV, Tampa, raises base hour from \$400 to \$500, min. \$80 to \$100, and adds new Class AA min. only rate (8-10:30 p.m. daily) at \$125; WHUM-TV, Reading, Dec. 1 raises hour \$300 to \$450, min. \$60 to \$90; KARK-TV, Little Rock, raises hour from \$350 to \$400, min. \$70 to \$80; WMUR-TV, Manchester, N. H. from \$250 to \$350 & \$50 to \$70; WWTW, Cadillac, Mich. from \$250 to \$300 & \$50 to \$60; WROW-TV, Albany, N. Y. from \$250 to \$300 & \$50 to \$60; WSFA-TV, Montgomery, Ala. from \$250 to \$350 & \$50 to \$70; WNCT, Greenville, N. C., from \$300 to \$350 & \$60 to \$70. Rate decrease: WBLN, Bloomington, Ill. cuts hour from \$200 to \$120, min. \$40 to \$24.

FARM TV COUNTS for 6 states were derived this week from Census Bureau agriculture tabulations. These figures, excised by *Television Digest* from Census of Agriculture's individual county statistics and published as soon as each state tabulation is complete, are based on 20% sample in farm census of Oct.-Nov. 1954. This week's figures show heavy TV penetration of farms in New England—68.9% in Mass., 68.7% in Conn., 76.2% in R. I.—as compared to Texas (30.8%), Arkansas (21%) and Washington (44.7%). Latest county-by-county farm TV circulation statistics:

Note: Previously published tabulations—Nev., N. H., Vt. (Vol. 11:28); Wyo. (Vol. 11:29); N. D. (Vol. 11:30); Ida., Utah (Vol. 11:31); Mont., S. D. (Vol. 11:32); Colo., Minn. (Vol. 11:33); Wis., Kan. (Vol. 11:34); Okla. (Vol. 11:35); Neb. (Vol. 11:36); Iowa (Vol. 11:37); N. J., Tenn. (Vol. 11:39).

WORLD SERIES heralded debut of WITN, Washington, N. C. (Ch. 7) which began programming Sept. 28 after test patterns the preceding day and became area's NBC affiliate. It's second outlet in area, being only 18 mi. from WNCT, Greenville (Ch. 9), uses 20-kw GE transmitter, 102-ft. 5-bay Alford antenna on 818-ft. Stainless tower. It's controlled by Roberson family, operating local radio WRRF, FCC having this week approved transfer of 25.38% of stock which W. H. Anderson & R. M. Fountain each held and which they sold for \$65,920 each. Wm. S. Page, owner of radio WELS, Kinston, N. C. is other principal. Station is headed by W. R. Roberson Jr., pres.-gen. mgr., with Hal Wilson as production mgr.; T. H. Patterson, commercial mgr.; L. E. Hiland, chief engineer. Base hour is \$325. Rep is Headley-Reed.

WHTN-TV, Huntington, W. Va. (Ch. 13) was all set to start ABC service Oct. 2, competing with WSAZ-TV (Ch. 3) and nearby WCHS-TV, Charleston (Ch. 8). Backed by theatreman S. J. Hyman, new station has Fred Weber, onetime gen. mgr. of MBS recently heading WFPG and the defunct WFPG-TV, Atlantic City (Ch. 46), as pres.-gen. mgr.; George A. Miller Jr., ex-WSAZ-TV, sales mgr.; George R. Snell, ex-WLEX-TV, Lexington, Ky., program mgr.; Harold Sturm, from WHTN, chief engineer. It's starting with 5-kw RCA driver, and 20-kw GE amplifier, using temporary one-section antenna on 40-ft. pole; it goes to 316-kw ERP within month, or as soon as 18-gain 240-ft. RCA antenna, first of its kind, can be installed on modified former tower of WSAZ-TV. Base hour is \$450. Rep is Petry.

* * * *

In our continuing survey of upcoming stations, these are latest reports from principals:

KLEW-TV, Lewiston, Ida. (Ch. 3) has signed with CBS and hopes to start in early Nov., reports gen. mgr. Charles R. White, ex-commercial mgr. of KPTV, Portland, Ore. Tower construction begins week of Oct. 3; 5-kw GE transmitter, 3-bay antenna, cameras and other gear are on hand. Carrying own program schedule, it will

be operated as non-satellite by Tom Bostic's KIMA-TV, Yakima, Wash. (Ch. 29), which also operates satellite KEPR-TV, Pasco, Wash. (Ch. 19), holds CP for satellite KBAS-TV, Ephrata, Wash. (Ch. 43) and is applicant for Ch. 8 satellite in Walla Walla. KLEW-TV rep not chosen.

WCBI-TV, Columbus, Miss. (Ch. 4), now doesn't plan to start until spring or summer of 1956, writes gen. mgr. Bob McRaney. It recently got approval to change TV site to plant of radio WCBI, and is installing 5-kw RCA transmitter purchased from KOTV, Tulsa (Ch. 6); it also has 5-bay RCA antenna on hand. Construction contract for 500-ft. Andrews tower will be let in 2 weeks. Owner Birney Imes Jr. also owns Mississippi AMs WELO, Tupelo; WNAG, Grenada; WMOX, Meridian. TV station mgr. will be Chris Everson, WCBI, production mgr., replacing Joseph Carson, who remains mgr. of WMOX, Meridian. Tom McFerrin, WCBI chief engineer, will also be TV chief engineer. WCBI-TV will affiliate with CBS & NBC. Base rate will be \$140. Rep will be McGillvra.

KHAS-TV, Hastings, Neb. (Ch. 5) now plans start about Dec. 1 with NBC, writes gen. mgr. Duane L. Watts, ex-KHOL-TV, Kearney, Neb. RCA 10-kw transmitter is due about Nov. 1 and work has begun on studio-transmitter building and 650-ft. Ideco tower, which will have 12-bay RCA antenna. Seaton Publishing Co., publisher of *Hastings Tribune*, headed by Fred A. Seaton, asst. to President Eisenhower, has transferred CP to new Nebraska Television Corp., retaining 56% control (Vol. 11:36). Robert Schnuelle, ex-KHOL-TV, will be production mgr. Base rate will be \$200. Rep will be Weed.

KOSA-TV, Odessa, Tex. (Ch. 7), less than 20 mi. from Midland's KMID-TV (Ch. 2), plans mid-Dec. test patterns, commercial start Jan. 1, writes John Vacca, ex-WMAQ, Chicago, being promoted from KOSA radio program mgr. to TV station mgr. It has 10-kw GE transmitter and 12-bay antenna ordered for delivery in 90 days, already has begun construction of building with 45x45-ft. studio. Cecil Trigg is pres.-gen. mgr., with 50% interest held by his radio KOSA; city councilman Ed Costello, also ex-KOSA, is sales mgr.; Wm. R. Schock, ex-KPLC-TV, Lake Charles, chief engineer. Rep will be Branham.

KTHV, Little Rock, Ark. (Ch. 11), installing 50-kw RCA transmitter, now plans Nov. 1 test patterns, programming later in month, reports gen. mgr. B. G. Robertson, for exec. v.p. Henry B. Clay, who owns 11% of KTRE-TV, Lufkin, Tex. RCA 12-bay antenna was due Oct. 1, work having begun on 1175-ft. Ideco tower it will share with KARK-TV, Little Rock (Ch. 4). KTHV is 42% owned by local radio KTHS, a subsidiary of *Shreveport Times* (KWKH); 32% by *Little Rock Arkansas Democrat*, with pres. A. K. Engel holding another 10% personally; remainder by National Equity Life Insurance Co. Ernie Burns, ex-KARK-TV, will be production mgr., with following coming from KTHS: Cecil Bland, program mgr.; W. V. Hutt, commercial mgr.; Cecil Suitt, chief engineer. KTHV joins CBS April 1, meanwhile will carry CBS & ABC shows not cleared by present affiliate KATV, Pine Bluff-Little Rock (Ch. 7). Base hour will be \$200. Rep will be Branham.

KMVI-TV, Wailuku, Hawaii (Ch. 12) now plans Nov. 1 test patterns, Nov. 15 programming, reports KMVI mgr. Richard E. Mawson. GE transmitter and 6-bay RCA superturnstile antenna were due to arrive from Honolulu Oct. 1. Semi-weekly *Maui News*, owner, plans to operate it as Maui Island's 2nd satellite, re-transmitting programs of Honolulu's KONA in much same way that satellite KMAU picks up programs of parent KGMB-TV, Honolulu (Vol. 11:16), both having transmitters on Haleakala Crater. KMVI-TV will originate only slide commercials with audio. Minute spot rate will be \$12.50 plus art work.

TVs IN INVENTORY—THE 'NEW CONCEPT': Trade has about 2,350,000 TV sets in pipelines at all levels as of Oct. 1, as it squares away for what promises to be biggest 4th quarter in its 10-year history. Though the inventory total would have been deemed alarmingly high a year ago on that date -- when it was 2,000,000 -- a new attitude has taken hold this year, shaped by high production and sales. Said one marketing man:

"We've changed our concept of what constitutes high inventories. When sales were running under 7,000,000 a year, inventories of 1,700,000 or so were regarded as excessive. This year, when we're selling more than 7,500,000, maybe 8,000,000, we have to get used to higher inventories. If we had less than 2,200,000 now, I'd say inventories were dangerously low."

Some favorable factors for trade are evidenced in analysis of inventories. For instance, inventories declined by about 60,000 in Sept., a month which usually sees stocks go up. Secondly, and perhaps more important as illustrating the recent trend to higher-priced sets, table models outnumber consoles in inventory, with many of them 17-in. leader variety. From every set maker comes report that consoles are up nicely over year ago, that "selling up" is catching on everywhere.

Upward revision of production mix and/or increases in retail prices are spur-ring sell-up trend, of course (Vol. 11:37-38). Then there's getting-bigger market for replacements, which normally finds folks turning in smaller-screen receivers for 21-in. consoles or 24-in. RCA, one of few which hasn't raised prices yet, is being watched closely for its decision. Several companies are known to be preparing to do whatever RCA does in regard to pricing.

Brief highlights of other major trade developments this week:

* * * *

Whirlpool Activity: Value of Whirlpool-Seeger distributorship took another jump this week, following its purchase of International Harvester's refrigerator plant & property at Evansville for \$19,000,000. John S. Holl, v.p. of Seeger div. (which makes Coldspot refrigerators), said the purchase would enable his company to meet expanding needs for refrigerator output, but doubted that production in new plant could begin much before fall of 1956. Harvester, which is now leaving appliance business to concentrate on farm equipment, has until March 31 to turn over property, for which it paid \$5,000,000 in 1946. Sale includes 70-acre plant site, 962,000-sq. ft. factory and equipment. It does not include good will. Meanwhile, Whirlpool announced realignment of sales personnel, including transfer of several RCA Estate officials (RCA owns 20% of Whirlpool-Seeger). In addition to those reported last week (Vol.11:39), v.p. John W. Craig becomes director of merchandise development; Thomas Barley, ex-RCA range sales promotion mgr., named sales mgr. of range div.; H.D. Baker, ex-Admiral v.p., named gen. mgr. of refrigerator div.; Evans T. Morton, also ex-Admiral, named product mgr. of refrigerator div.

Is Color Catching On? RCA insists it is, though its distributors are as yet counting their own and their dealers' sales by the dozens rather than in thousands. After the recent network color successes, notably the sometimes superb pickups of World Series games, it's interesting to note that the detractors of color-now -- and there are plenty of them in the industry -- aren't as positive in their bearishness as they once were, and that the trade seems to be taking a closer look.

RCA is pushing color hardest, of course, but as yet offers no production or sales figures. Our own at-deadline telephone survey of some of its distributors dis-counting their own and their dealer sales by the dozens rather than in thousands. (Irving Sarnoff); that Raymond Rosen & Co., Philadelphia, is asking for more sets -- though it hasn't said it's exceeding the 150-per-week goal pres. Tom Joyce set for himself; that Eastern Co., Boston, has moved all 200 sets thus far delivered to it,

selling 50 this week alone and ordering more (Alan Steinert); that Southern Wholesalers, Washington, finds interest at high pitch, sold 90 sets in last 3 weeks, its dealers selling 26 in last 10 days, one dealer selling 5 (Wm. O'Connor).

Irving Sarnoff is convinced, he told us, that "we've seen the first beginning of color lifting its feet off the ground" and he makes point of the fact that one color set sale is equivalent of 4 at \$199. Steinert said flatly, "This thing is off the ground." RCA people generally exude a confidence that doesn't seem synthetic, and it's intimated that production of both tubes and sets may soon be stepped up. Said RCA pres. Frank Folsom: "I can say with all seriousness and sincerity that I feel better about it than at any other time. We're selling all we're making, and the reports from our distributors and dealers are very satisfactory."

(For further reports on color, see pp. 7, 14 & 15.)

* * * *

Economic Outlook: American Statistical Assn. meeting in N.Y. this week heard prediction of a 3% increase in gross national product next year, to hit annual rate of \$405 billion by mid-1956. Prediction came from Wm. F. Butler, consulting economist of Chase Manhattan Bank, who forecast increases in total consumer expenditures, business investment and public works more than offsetting 10% decline in auto sales and 15% in housing purchases. Similar prediction was given to annual convention of American Bankers Assn. in Chicago this week by Allyn P. Evans, pres. of economic consultants Lionel D. Edie & Co., N.Y., who warned, however, that rising business inventories might be one of big economic worries next year.

Consumer Spending: Americans had \$107 billion left to spend as they chose last year after paying \$148 billion for necessities and \$33 billion for taxes, according to Institute of Life Insurance. That means \$600 for each man, woman and child. Of the total, more than \$23 billion went for autos, \$18 billion for savings. Consumers are currently spending 36¢ for services out of every dollar spent for goods and services, according to National Industrial Conference Board -- increase of 5¢ over 1947 when 31¢ was spent for services. NICB reported about 20% of increase in spending for services was due to greater use of electricity for home appliances.

Consumer Credit: First National Bank of Boston has spelled out extent of consumer indebtedness -- and the figures are truly startling. For example, combined public and private debt now averages \$14,696 per family, with consumer and home mortgage debt totaling \$112 billion. Commented bank: "By lowering down payments and extending maturities for short as well as for long-term personal debts, certain groups of consumers are being placed in a vulnerable position...While it is true that debt financing permits present enjoyment of products that could be purchased only after years of saving, there is a limit to the extent to which this may be done without jeopardizing the interest of the borrower and lender, and endangering the economy." Opposite view was taken by Philip Woollcott, chairman of American Bankers Assn.'s installment credit commission. He said: "There is no need to tighten credit to good risks, as long as reasonable self-restraint is exercised. It is almost impossible to hold the extension of installment credit to a rigid set of terms. Thus, controlled flexibility appears to be the sound policy to follow and relaxation of terms to meet unsound competition should be guarded against."

Production: TV output totaled 189,899 week ended Sept. 23, compared to 198,874 preceding week and 183,912 week ended Sept. 9. It was year's 38th week and brought production for year to date to about 5,575,000 vs. 4,700,000 in same period of 1954. Radio production totaled 267,994 (109,420 auto) week ended Sept. 23, comparing to 270,207 week ended Sept. 16 and 234,812 week before. For 38 weeks, radio output totaled 9,650,000 vs. 7,700,000 in corresponding period of 1954.

Dr. W. R. G. Baker, GE, reappointed chairman of RETMA TV committee, which assumes responsibilities of old subscription TV, educational TV and uhf policy committees. Other members: Benjamin Abrams, Emerson; Robert S. Alexander, Wells-Gardner; E. C. Anderson,

RCA; Max F. Balcom, Sylvania; H. C. Bonfig, CBS-Columbia; Allen B. DuMont; Paul V. Galvin, Motorola; Larry F. Hardy, Philco; Gilbert W. King, International Telemeter; J. H. Laub, Skiatron; Milton J. Shapp, Jerrold; Robert Tait, Stromberg-Carlson; L. C. Truesdell, Zenith.

Trade Personals: Raymond W. Saxon, gen. sales mgr. of RCA Victor TV div., named northeast regional mgr., Boston, succeeding R. M. Macrae, who becomes distribution v.p. of RCA Victor Co. Ltd., Montreal; Joseph P. Bannon, field sales mgr., is promoted to succeed Saxon . . . Ned S. Underhill promoted to Capehart-Farnsworth operations director, succeeding Robert E. Kohler, now works mgr. of Federal Radio's Clifton, N. J. plant; Jack Hall promoted to succeed Underhill as purchasing agent . . . R. J. Sargent, Westinghouse mgr. of major appliances, elected chairman of major appliance div., National Electrical Mfrs. Assn. . . Paul V. Lovegren, Magnavox purchasing agent, will handle all govt. & industrial div. purchasing, reporting to Robert B. Brown, ex-Capehart-Farnsworth & RCA, newly appointed director of materials of the div. who in turn reports to Howard B. Allen Jr., its director of operations; duties of late Joseph M. Hayes, director of purchasing, have thus been delegated and no successor named . . . Franklin L. White, ex-York Corp., named mgr. of Philco air conditioning div., reporting to v.p.-gen. mgr. Raymond A. Rich . . . David Room promoted to manufacturing mgr., Canadian Westinghouse TV-radio div., reporting to div. mgr. Ricardo Muniz . . . Russell W. Johnson, ex-DuMont, named asst. adv. mgr., Westinghouse TV-radio div. . . Ernest A. Marx, Chief of DuMont international div., now in Europe on business, returns Oct. 25 . . . Philip H. Weil, GE Dallas district mgr., transferred to N. Y. as district mgr., succeeding Harold McCormick, now adv. mgr. of TV-radio div. . . I. J. Ross-Evanson, ex-Management Systems Inc., Chicago, named asst. managing director of NARDA . . . John Liss, ex-Hallicrafters, Kansas City, named Scott Radio midwestern sales mgr. . . Wm. W. Posey, ex-National Union Electric, named CBS-Hytron east central district sales mgr., Detroit . . . Morris Harris, DuMont production control mgr., technical products div., promoted to resident counsel.

Dr. Elmer W. Engstrom, exec. v.p., RCA research & engineering, to receive SMPTE Progress Medal at society's Lake Placid, N. Y. convention Oct. 4 for contributions to advancement of motion picture technology. Medal was last awarded in 1953 to Fred Waller, inventor of Cinerama.

Topics & Trends of TV Trade: There were 110,200 dealers in nation handling TV-radio as of July 1, compared to 107,100 on July 1, 1954, according to RETMA's annual survey released this week. Significance of report lies in fact that while TV-radio dealers have consistently led all other categories of retailers in Dun & Bradstreet's monthly summary of bankruptcies, even more dealerships have risen to take their place.

Geographically, it was reported that 35,000 dealers were located in Midwest, 22,850 in Southwest, 21,700 in North Atlantic states, 16,650 in Far West, 14,000 in South Atlantic region. Majority of stores, 85,900, handle both TV & radio, 19,900 sell radios only, 4400 TVs only. Reflecting increased retail TV sales for that period, each dealer sold average of 70 sets in 12 months ended June 30, compared to 60 in preceding 12 months.

RETMA reported that 42,800 were classified as TV-radio-appliance stores, 19,050 were furniture stores, 12,200 were essentially hardware stores, 12,200 dept. & general merchandise stores, 23,950 miscellaneous retail outlets.

* * * *

NARDA annual convention will be at Chicago's Conrad Hilton Jan. 15-17, coinciding with second week of winter furniture markets. Registration fee of \$30 should be sent to A. W. Bernsohn, NARDA managing director, Merchandise Mart, Chicago.

DISTRIBUTOR NOTES: In unusual case of distributor handling competing TV lines, Major Appliance Distributors Inc., Charlotte, took on CBS-Columbia this week, will also retain DuMont by splitting its staff. Jack Trexler is sales mgr. for CBS-Columbia, Bert Crabtree for DuMont . . . DuMont appoints Gilbert Distributing Co., Rochester, N. Y., replacing E. T. Donohue Distributing Co. . . . Bendix Radio appoints Hayes & Hopson Inc., 20 S. Spruce St., Asheville (M. A. Hayes, pres.) and Silkworth Distributing Co., 1659 N. Saginaw St., Flint . . . Household Appliance Distributors Miami (Philco) appoints Earl Crawford pres., succeeding Ted Pritikin, now chairman; Richard Pritikin succeeds Crawford as gen. sales mgr.; Robert Pritikin named operations mgr. . . Independent Distributors Inc., Grand Rapids (Crosley-Bendix) appoints Sherard S. Johnston gen. mgr.; W. F. Prentice succeeds Johnston as sales mgr. . . Main Line Cleveland Inc., Cleveland (RCA) appoints Donald Cole merchandise mgr., replacing Herbert Williams, resigned . . . Westinghouse Electric Supply Co., San Francisco, appoints Frank Potter consumer products sales mgr., succeeding J. F. Ogden, transferred to Portland, Ore. branch; Lester O. Braun named consumer sales mgr. in Cincinnati, succeeding Charles Nickols, transferred to Evansville . . . Admiral Distributors, Boston, appoints John R. Hodgins gen. sales mgr. . . Southern Bearings & Parts Co., Charlotte (Admiral) appoints Fred N. Hall Jr. appliance sales mgr. . . Hoffman Sales Corp., San Francisco appoints Lawrence Baldocchi area TV sales rep . . . George Resen & Co., Baltimore (Olympic) appoints Howard Reynolds, ex-Maryland Wholesalers (Admiral), as sales rep; new address is 1504 Ridgeley St. . . Raytheon appoints Birch Distributing Co., 134 E. Spring St., Columbus, O. (H. A. Birch, pres.); Hub Distributors Inc., 594 Commonwealth Ave., Boston (M. Beckwith, pres.); Television Accessory House, 41 Broadway, Providence (Sol Kamin, pres.); Furste Auto Supply Inc., 1620 Planter St., Mattoon, Ill. (Arlen Furste, pres.); Don E. Martin Distributing Co., Harlingen, Tex.

Electronic Distributors' Research Institute has been formed by group of 14 distributors as a management research consulting service. J. Howard Reed, 1107 Church St., Evanston, Ill., is exec. secy.

TV-Here-to-Stay Dept.: A 4-year-old 17-in. Sylvania set which stubbornly survived collapse of house in Aug. 19 N. Y. floods, sailed mile downstream, spent 2 days in mud under 15 ft. of swirling waters, was recovered by owners, dried out for day and worked again; only damage was slight warping of cabinet. And, to substantiate upcoming advertising claims, Emerson recently heaved one of its "Never Break" radio cabinets from car doing 105 mph—and it never broke.

New TV picture tube line, RCA "Silverama" series, was introduced last week in 25 types—including 10, 12, 16, 17, 20, 21, 24 & 27-in.—said to fit virtually every receiver on market. Year's warranty covers all tubes in line.

Among 7 receiving awards from Society of Industrial Packaging and Materials Handling Engineers, at annual exposition in N. Y. last week, were Joseph Lee Krager Jr., RCA, Camden, and Ernest R. Highlander, Entron Inc.

Excise tax collections on TV-radio-phonos totaled \$136,849,000 in fiscal year ended June 30, compared to \$135,535,000 in preceding fiscal year, reports Internal Revenue Service.

Admiral has sold 225 table models (17-in.), mounted on wrought iron stands, to Park Lane Hotel, Toledo, for installation in each room.

Capehart-Farnsworth increased prices of two 21-in. open-face consoles from \$300 to \$320 and \$350 to \$360.

Electronics Reports: Automation in radio production, utilizing printed circuits, has saved Sylvania 70% in total labor on one model, resulted in higher quality product and permitted plants to locate in unskilled labor areas, cutting costs further. More than 1000 engineers and management representatives at RETMA Automation Symposium at U of Pa., Sept. 26-27, heard Sylvania automation engineering mgr. Carl F. Carlzen report that technique can alleviate TV manufacturer set stockpiling, meet changing market demands after introduction of new lines, turn out better goods with "reliability of 98-99%" in quality control.

GE's Dr. W. R. G. Baker, moderator of panel discussion, urged engineers to approach automation with optimism, his company's TV-radio plants in Syracuse having been on automation for some time. Use of automation, he said, has not caused unemployment but has generally increased labor force. Harvard Prof. James Bright, panel member, charged industry is guilty of "sloppy thinking" on automatic production. He said many firms install equipment with prime motive of cutting labor cost. "Once the system is installed, it is apparent that its value is determined first by quality instead of labor saving." Increased use of automation, he pointed out, probably will create new jobs such as electronic technicians and engineers, already in short supply.

Panel was unanimous in urging component suppliers in TV-radio industry to standardize equipment which would further reduce factory operating costs and increase efficiency of automatic equipment.

* * * *

Sylvania Electric Products, deeply involved in atomic energy field, now plans complete reactor fuel fabricating and reprocessing service for nuclear reactor owners and has begun studies on problem, Washington Atomic Industrial Forum—with more than 1000 attending—was told this week. Stanley B. Roboff, Sylvania atomic energy div., said, "We will have no business in fuels, or anything else, until there is a real reactor industry in this country. We are, therefore, leaning over backwards to remove the doubts and questions concerning fuels and reprocessing of fuels as rapidly as we know how."

"Ten golden years" for electronics are forecast by GE's electronics v.p. Dr. W. R. G. Baker in Sept. 26 *N. Y. Journal of Commerce*. But, he adds, it's "difficult right now for anyone to predict just where we will stand volume-wise 10 years from now." TV will account for 80% of its entertainment phase in 10 years, he said; it now represents some 70%.

Electronics components symposium, 6th in govt.-industry series, will be held at Washington May 1-3, sponsored by IRE, AIEE, RETMA & West Coast Electronics Manufacturers Assn., supported by Defense Dept., Bureau of Standards. Technical program is under chairmanship of Paul Darnell, Bell Labs; symposium chairman is A. W. Rogers, Signal Corps, Ft. Monmouth, N. J.

DuMont introduces 4 new precision electronic instruments—cathode-ray oscillograph, sine-wave generator, extended-range oscillator, amplifier voltmeter—at sales engineering symposium in Chicago's Sherman Hotel, Oct. 2. Company will exhibit full line at Chicago National Electronics Conference Oct. 3-6.

Govt. is stepping up effort to develop substitutes for mica in electronic tubes, capacitors & other critical applications. ODM will concentrate on synthetic research and development of other materials to offset short supply of imported dielectric.

National symposium on microwave techniques will be held Feb. 2-3 by Philadelphia IRE section and IRE's Professional Groups on Antennas & Propagation and Microwave Theory & Techniques.

Defense Secy. Wilson personally stepped into Air Force-Comptroller General controversy over \$2.4 billion contract with AT&T for defense communications setup (Vol. 11:39), with request this week that Comptroller reconsider ruling that agreement was invalid until approved by Congress. Wilson said "SAGE" project is vital to nation's defense and had been approved in effect when Congress voted money for equipment earlier in year. He plans to confer on it with Comptroller General Campbell next week. Democrats' determination to make political football of dispute remained unabated as Congressional investigators began gathering material for hearings early next year.

G. M. Giannini Co., Pasadena, Cal. electronics firm, has called remaining 1790 shares of convertible preferred for redemption at \$111 per share Nov. 30; preferred convertible to 12 shares of common up to that date. If all preferred is converted, there will be 100,000 common shares outstanding. Firm reports net income equal to about \$1.25 per share for period Jan. 1-July 17; backlog unchanged at about \$3,000,000.

Orville M. Dunning, engineering v.p., Hazeltine Electronics Corp., has resigned effective March 16, 1956 and pres. Philip F. LaFollette announces election of asst. v.p. Richard L. Beam as successor. Webster H. Wilson, an asst. v.p., was elected v.p. in charge of govt. & commercial dept., and Victor J. Young, chief design engineer, was elected asst. v.p.

USA national committee of International Scientific Radio Union (URSI) will meet at U of Fla., Gainesville, Dec. 15-17 for sessions on radio & troposphere, ionospheric radio, radio noise of terrestrial origin and radio astronomy. John P. Hagen, Naval Research Lab, Washington, is secy.

M. E. Paradise, v.p. in charge of Hoffman Electronics Corp.'s National Fabricated Products and National Semiconductor divs. in Chicago, and their pres. before they were acquired by Hoffman in July, elected to Hoffman board of directors.

P. R. Mallory & Co. elects to its board C. Harvey Bradley, chairman of warehouse div. Jones & Laughlin Steel Corp., and James A. Roemer, pres. of Mallory-Sharon Titanium Corp., which is associated with Sharon Steel Corp. in production of titanium for alloys.

Percy C. Smith, ex-gen. mgr., Burroughs Corp. electronics instrument div., and onetime mgr. RCA scientific instruments engineering, named mgr. Brush Electronics equipment dept.

G. R. Morrow elevated from v.p.-mgr. to pres. of Midwestern Instruments, Tulsa automation and instrumentation firm, succeeding M. C. Morrow, who becomes chairman; E. J. Handley elected finance v.p.

Frederick C. Bash, ex-Magnavox, RCA & Westinghouse, joins National Co. as product mgr. of atomic frequency standards dept.

Harry Oedeckerk, chairman of Hycon Mfg. Co., into which Avco recently bought (Vol. 11:34), elected an Avco director.

Frank P. Pennucci, purchasing director, and Bernard B. Cohen, engineering director, elected v.p.'s of General Transistor Corp.

Adm. Robert B. Carney, retired chief of naval operations, joins Westinghouse Oct. 1 as consultant on development of military equipment.

Dr. Claude E. Shannon, Bell Labs, wins Franklin Institute's Stuart Ballantine Medal for "outstanding achievement in the field of communication."

Wilbert H. Steinkamp, ex-Beckman Instruments v.p., joins Weston Electrical Instrument Corp. as sales v.p.

Color Trends & Briefs: RCA's total "dedication" to color is manifested in a folder headed *Color TV Is Here for You! Pioneered and Developed by RCA*, mailed this week to all its 170,000 stockholders. It carries schedules of NBC colorcasts and reiterates Chairman Sarnoff's statement that "color TV will 'break through' and be well under way before Christmas of the present year." The folder points to an estimated 15 color hours weekly this season, states "RCA color TV will be in short supply for the Xmas trade" and notes, as if in response to the skeptics:

"To those who say that Color TV receivers, at present prices, cannot be sold in quantity, we point to the tremendous production of more than 6,000,000 passenger vehicles a year by the automobile industry—with the average car sale around \$3000—or to the tens of thousands of radio-phonograph combinations sold in the \$600-\$900 price range. After the 15% down payment, the carrying charges on the \$795 RCA Victor Color TV receiver, for a 24-month period, are only \$33.12—well within the range of the mass market.

"Color TV is here for you—now! Thousands of dealers across the nation are featuring RCA Victor Color TV receivers in operation in their stores, where you can see color 'Spectacular' programs and other exciting shows and events in full color. Keep posted on color television's new programs and other advances through RCA's advertising in newspapers, on radio & TV, and through other media.

"Join the 'swing to color' and enjoy the finest in home entertainment, and the pleasure of introducing Color TV to your friends."

* * * *

Color interest: *Newsweek* devotes Oct. 3 cover story to "Color TV in '56," subheading it "More Sets and More Shows but Not the Big Splash"—which just about tells its version. Article is largely rehash of trade reports of last few months, features imposing schedule of big colorcasts to next Jan. 15. "Will '56 be the big year?" it asks, and replies: "In terms of volume, no. Color will be merely a trickle when measured against black-&-white sales. But the 200,000 to 400,000 sets [variously estimated 1956 production] could mean an important breakthrough. Color could gain momentum." And RETMA pres. H. Leslie Hoffman is quoted as stating: "Every color set will sell 4 during the 12 months after people are exposed to the kind of programming scheduled." Note: *Fortune Magazine* also is due out shortly with an appraisal of color TV.

Mass color TV market still 4-5 years away, Advertest Research concludes this week after N. Y. survey. Poll showed: Only 1% plan to buy set within year; 6% within 2-3 years; 22% in 4-5 years; 32% didn't know when. Also, 1% were willing to pay \$1000 for color set; 6% would pay \$750; 14% liked \$500 tag; 47% held out for \$250 price; 33% won't buy at any price. Only 70% of black-&-white TV owners were aware that color is on market; 50% couldn't name producer of sets; 80% hadn't seen color program.

Remote colorcasting by an individual station is still a rarity—but Klaus Landsberg's KTLA, Los Angeles, undertakes it again Oct. 2 from annual Fishermen's Fiesta at San Pedro. California Fish Cannery Assn. is sponsor. KTLA also colorcast the Pasadena Rose Parade last New Year's Day and the Headdress Ball from the Los Angeles Ambassador in April.

Britain will have color TV by 1958. That's prediction of NBC studio & plant planning director Sol Cornberg on return from London, where he was consultant on construction of studios for Granada Theatres Inc., ITA commercial contractor. "The British are experimenting in color, and are as advanced as we are in black-&-white," he said.

Observations on color by P. A. (Bud) Sugg, mgr. of *Oklahoma City Oklahoman's* WKY-TV, one of first to be equipped for local colorcasting and a leader in its promotion: "I think the programming plans of NBC and CBS will provide considerable impetus in creating a desire on the part of the viewers for color receivers. Only this week I attended a luncheon [where] prominent businessmen asked me about color and stated their desire to purchase a receiver, although some of them still had a bad taste occasioned by the extremely small tubes in the receivers they saw a couple of years ago. Certainly NBC's production this week of 'Our Town' was one of the best I have yet seen and, coupled with the football game and the World Series, I don't see how it can miss."

More color films for TV are in works, with 2 new 30-min. series—*Long John Silver* and *Judge Roy Bean*—out for fall market, distributed by CBS-TV Film Sales & Screencraft Pictures, respectively. Current shows color-filmed include Ziv's *Mr. District Attorney*, *Meet Corliss Archer*, *Favorite Story*, *Cisco Kid*, *I Led 3 Lives*, *Boston Blackie*; Guild's *Life with Elizabeth*, *Floridan Zabach Show*, *Liberace*; Award TV's *Jimmy Demaret Show*; *Flamingo's Superman*; RCA's *Sam Snead Show*; Transfilm's *Man to Man*, produced for National Council of Churches of Christ and distributed free.

Network color schedules for next 2 weeks: NBC-TV—Oct. 3-7 & 10-14, *Howdy Doody*, 5:30-6 p.m.; Oct. 9, *Color Spread*, "Show Biz," featuring Art Linkletter, Groucho Marx, Beatrice Kay, Buster Keaton, Dennis Day, Phil Harris, Bert Lahr, Rosemary Clooney, Eartha Kitt, 7:30-9 p.m.; Oct. 15, NCAA football, Notre Dame vs. Mich. State, 2:45-5:30 p.m. CBS-TV—Oct. 4 & 11, *Red Skelton Show*, 9:30-10 p.m.; Oct. 6, *Shower of Stars*, "Time Out for Ginger," starring Jack Benny, Ruth Hussey, Gary Crosby, Edward Everett Horton, 8:30-9:30 p.m.; Oct. 8 & 15, *Gene Autry Show*, 7-7:30 p.m.

Clever color promotion: Ohio Valley Bus Co., Huntington, W. Va., equipped several of its buses with color sets provided by local distributors, parked them at 3 downtown locations so World Series could be watched. Signs on buses, from which upright poles were removed, directed viewers to retail TV stores, where color sets were being demonstrated and sold, and to WSAZ-TV studios.

How Donn Bennett Productions Inc., named for the veteran producer of *The Big Idea* sponsored by Philadelphia Saving Fund Society on WCAU-TV, Philadelphia since 1951, incorporated itself, raised \$300,000 in capital (net of \$270,000 after underwriter's profit) through public sale of \$1 par shares at \$3 per share, is disclosed in prospectus published under date of June 13, 1955 by Boenning & Co., 1529 Walnut St., Philadelphia. The 100,000 shares offered out of authorized 500,000 (104,000 more going to Donn Bennett) were oversubscribed on day of offering; stock now is quoted at 3 bid, 3¼ asked. Syndicated program deals with new inventions, started on WCAU-TV in 1949, conceived by Bennett, who also created and produced *Stop the Clock*, *What in the World*, *Wits End*, *Dance Party*, *Stars in Your Eyes*. Assets of corporation were \$311,969 as of last June 1, net profit potential for first year ending Sept. 1, 1956 estimated at \$54,191 (26½¢ per share) and \$515,210 second year (\$2.52), based on sales of *The Big Idea* only, no other revenues. Prospectus shows as additional earnings potential a monthly bulletin *The Big Idea Invent-ory*, for which it estimated 1000 subscribers by Sept. 1, 1957, mainly companies interested in new inventions; tells how Cy Millikan & Lloyd Rudd appeared on *The Big Idea* in 1949, resulting in formation of Rudd-Milikan Co., manufacturer of Kwik-Kafe automatic vending machine, which grossed \$6,000,000 last year and broke ground for \$500,000 plant in Hatboro, Pa.

GENERAL ELECTRIC's "post acceleration" color tube (p. 2) was described by Dr. Chester G. Lob, mgr. of its thermionics subsection, as basically a 3-gun type which uses direction selection in the front end to cause each of the 3 beams to strike the proper array of phosphors with which it is associated. The direction selection mechanism, he said, is of the masking type except that the term "electron optical" masking should be used rather than "shadow masking." He explained:

"The front end of our tube consists first of an array of parallel wires which in unison form the color selection electrode. In close proximity to this array is the phosphor screen containing an array of phosphor lines for each of the primary colors to be excited. Because electron optical masking is used instead of the conventional shadow-masking, the color selecting electrode, which we shall call grille, has an extremely high transparency . . . greater than 90%, meaning that more than 90% of the electrons ejected from the gun strike the phosphor screen and contribute to picture brightness.

"This [brightness] compares quite favorably with the shadow mask tube and its transparency of only 12-14%. In that case more than 85% of the expensive high voltage power does nothing but heat up the shadow mask and does not contribute to brightness. For equal high voltage power input, our tube then is theoretically more than 6 times as bright as the shadow mask type tube."

Dr. Lob then stated that the development program is in 2 stages, first being the so-called "sandwich tube" which contains the grille mounted on a frame and an internal flat phosphor plate inserted in the front end of the tube. This was the tube demonstrated. Second phase, he said, is so-called P.O.F. or "phosphor on the envelope face" which was shown only as an artist's sketch.

Financial & Trade Notes: Magnavox earned record net of \$2,426,087 (\$3.05 per share) on sales of \$55,071,765 for year ended June 30 vs. \$2,102,530 (\$2.64) on \$62,974,430 in 1953-54 period. Substantial increase in consumer shipments and Federal tax reduction accounted for 15% earnings boost despite sales decline. First quarter 1955-56 sales are reported at \$10,348,000, record 50% above same period last year; net income, \$332,000 (42¢). Proxy statement to stockholders announcing annual meeting Oct. 26 revealed chairman R. A. O'Connor, holding 55,293 shares out of 796,614 outstanding, received salary of \$65,000; pres. Frank Freimann (75,169, including 25,484 in trust), \$75,000; Gerard M. Ungaro, v.p., secy. & gen. counsel (5903), \$40,000.

* * * *

Among officers' & directors' stock transactions reported to N. Y. Stock Exchange during Aug.: Ross D. Siragusa made gifts of 3357 Admiral, holds 244,099; Benjamin Abrams bought 5000 Emerson, holds 225,000; J. Geoffrey Notman sold 5000 General Dynamics, holds 2410; F. D. Beamer sold 500 Lear, holds 6; Kurt Widder sold 1800 Skiatron, holds 9950. John W. Belanger bought 2625 GE in Sept., transferred 100 to Mrs. Anna N. Belanger, holds 7557. RCA also increased holdings of own common from 71,782 to 78,682 shares.

Sparks-Withington earned \$168,244 (16¢ per share) on sales of \$26,801,332 in year ended June 30 vs. net loss of \$304,975 (after \$219,877 tax credit) on sales of \$30,440,062 in 1953-54 period.

Scott Radio reports net loss of \$191,110 on sales of \$892,958 for year ended May 31 vs. loss of \$263,370 on \$2,143,235 sales in previous year.

As demonstrated alongside an RCA shadow-mask tube with both motion and still pictures, brightness of both tubes appeared about same at average evening viewing light of 7 ft. lamberts. GE's remained bright at 25-100 ft. lamberts (daylight) while RCA's tended to wash out. GE's was quite luminous at 250 ft. lamberts, which was said to be about usual light on dealer's floor, while the RCA picture washed out almost entirely.

But the first RCA pictures were clearer, crisper and cleaner—entirely acceptable, all the newsmen agreed—while the GE picture at all lighting stages had palpable defects. Notably, there were annoying moire effects, which were explained as being due to "chill wrinkles" in the glass. When phosphors-on-face is perfected, we were told, these defects would be removed. But there was expressed puzzlement that GE should even show a test picture that was admittedly inferior to that of its competitor.

Fact that the RCA color tube shows up best with little or no room lighting, whereas the prospective GE tube is luminous at high lighting, plus fact that GE tube is all-glass rectangular and can eventually be made more economically, were put forth as the prime advantages. GE tube is not interchangeable in RCA chassis, but will require no more circuit tubes and no more complicated circuitry, we were told. Summed up, the advantages to trade and public of the GE tube were put thus by C. M. Donnelly, specialist, electronics components dept.:

"The advanced concept of the post acceleration tube has yielded advantages in brightness and effective contrast in ordinary and high illumination, and extra manufacturing and operating tolerance margins. With these also have come smaller, less complex deflection components, easier requirements for driving power, fewer convergence adjustments, and smaller power supply needs, all leading to cost saving benefits."

Barnes Engineering Co., Stamford, Conn., electronics research firm headed by Dr. R. Bowling Barnes, recently gen. mgr. of Olympic Radio development div. and ontime v.p. of American Optical Co., reports net sales of \$302,602 for period from Dec. 10, 1954 to June 30, 1955—with net loss and earned surplus deficit of \$494,310 at end of period. Recently spun off by Olympic and acquiring some of its research assets and those of Olympic's Electrona Corp. and Multra Corp. at total cost of \$784,278, Barnes Engineering Co. held stockholders meeting Sept. 26 to ratify purchase of Clarksburg Television Cable Corp., operating community antenna systems serving 4245 subscribers in Clarksburg, Bridgeport & Nutter Fort, W. Va., for which it paid 170,000 shares of its outstanding 299,570 shares of common stock. Stockholders meeting also elected 5 directors: Dr. Barnes, Dr. Charles J. Burton, Glen McDaniel, Heywood Fox, James G. Rogers. McDaniel is RETMA gen. counsel and its former pres.; Rogers is pres. of KFSD-TV & KFSD, San Diego; Fox is partner of Fox, Wells & Co., N. Y. investors.

Strike of 750 Sylvania employes shut down Buffalo TV-radio plant this week after Local 511 (IUE-CIO) rejected company's offer of new 3-year contract providing for average 7% wage increase, cost-of-living "escalator" clause and fringe benefits. It was first strike in Sylvania's 21 years at Buffalo. TV-radio production continued at new Batavia, N. Y. plant, where contract is with another local. Meanwhile, strike at Bendix Radio plant in Towson, Md. entered 5th week as we went to press, with no sign of settlement between company and International Assn. of Machinists.

MEXICO'S THIRD U. S. border outlet—XEFE-TV, Nuevo Laredo (Ch. 11), opposite TV-less Laredo, Tex.—began operating early in Sept., described by John H. Mayberry, chief engineer of radio KUNO, Corpus Christi, as “one of the most unusual TV stations on the air.” It cost less than \$10,000 to build and is said to have an operating overhead of less than \$500 per month.

Owned by R. T. Carranza, operator of radio XEFE, the station programs primarily in Spanish, carrying about 50% live talent, 25% film, 25% rebroadcasts from whatever other stations it can pick up. It has a composite transmitter which consists of 4 RF stages and puts out about 100 watts power. It has 2 aluminum Channel Master towers, one each for video and audio, with stacked receiving type yagi antennas directed northeast. Transmitter building, between towers, connects to antennas with open 300-ohm lines.

Transmitter is unattended and is fed by coaxial from studio, where 2 oscilloscopes are used for monitors and one TV receiver for pickups for rebroadcasts. Studio has 2 cameras mounted on home-made dollies, each with Zoomar lens. Rates are not reported but are said to be comparable to small AM stations in U. S. Rep is National Times Sales (see *TV Factbook No. 21*, p. 259).

Note: Holding CP for Ch. 8 in Laredo, Tex. is Vidicon Industries of America, Midland, Tex., assigned call letters KHAD-TV but reporting no starting plans since grant last July 20. Partners are H. C. Avery Jr., architect, and David H. Cole, contractor. Only other Mexican-licensed border stations are XETV, Tijuana (Ch. 6), near San Diego, and XEJ-TV, Juarez (Ch. 5), opposite El Paso.

Change of NARTB name back to old NAB was advocated as “less cumbersome” in resolution passed by this week’s Region 3 meeting in New Orleans. Session was highlighted by off-the-cuff maiden speech by FCC Comr. Richard Mack, speaking on function of regulatory commissions; criticism of multiplicity of audience measurement services, a subject due to come before TV circulation committee at Oct. 4 meeting in N. Y.; panel discussion of TV Code by Glenn C. Jackson, mgr. of WAGA-TV, Atlanta, and Herbert A. Carlborg, CBS-TV director of editing; suggestion by William Fay, pres. of WHAM-TV, Rochester, that Citizens Advisory Council of distinguished citizens be set up to advise industry how to serve public better; criticism by Grover C. Cobb, KVGB, Great Bend, Kan., chairman of NARTB AM committee, of “owners and operators who have such an investment in TV [that they] let their radio stations run themselves while they devote their time to the allegedly more glamorous and certainly more costly [TV] medium”; talk by NARTB pres. Harold Fellows in which he urged radio stations to increase rates.

“I Love Lucre” captions item in *World’s Press News*, Britain’s Fleet Street mouthpiece, referring to BBC program controller Cecil McGivern’s retort to ITA’s commercial program threat: “We do not intend to lose anything because of money. After all, it is our viewers’ [set tax] money and our viewers expect us to pay for what they want . . .” ITA, incidentally, has acquired CBS-TV’s *I Love Lucy* for its schedule. The British newspaper trade journal, which in striking contrast to its U. S. counterpart has been taking an extremely friendly attitude toward commercial TV and giving TV-radio rather good coverage, also reports that in the next 3 years or so some private TV stations may start operating in towns not covered by ITA, which so far has a station only in London and others projected only for Birmingham & Manchester. It quotes the pres. of British Televiewers’ Society, adman Richard Newcombe, as being “much concerned that half the country should have commercial TV and the other half should be left out.”

Interest in closed-circuit TV reached new peak this week following last week’s triumphant telecast of Marciano-Moore heavyweight championship bout to some 400,000 spectators in 133 theatres (Vol. 11:39). Nathan L. Halpern’s Theatre Network TV Inc. is now reported to have achieved sales of \$1,500,000 last year as against \$150,000 in 1951 when it started. Closed-circuit business and sales meetings, though less glamorous than prizefights, are TNT’s bread-&-butter. More closed-circuit TV history was made Sept. 27 when 1200 members of American Management Assn. watched actual labor-management arbitration session between SKF Industries and United Steelworkers (CIO) on theatre-size screen in New York hotel ballroom. NBC-TV is enthusiastic about another use of closed-circuit TV—private color telecasts for sponsors and their dealers and distributors. NBC’s telesales dept. recently presented closed-circuit color show for 2700 Johnson outboard motor dealers in 18 cities after Johnson bought series of participations in *Today & Tonight*. After the 45-min. show, Johnson Motors reported \$7,000,000 in new orders from dealers. Other recent NBC closed-circuit color shows for sponsors included special promotions for General Cigar, Alcoa and Cluett-Peabody Co. Scheduled this month are shows for Beech-Nut Packing Co., Hallmark Greeting Card Co., and a special hookup for Packaging Institute of America to demonstrate impact of color TV on product packaging.

More liberal FCC attitude toward community antenna ownership of private microwave systems was hinted this week as FCC for first time approved applications for relay whose ownership interlocks with a community antenna system. The experimental authorization was granted to Hualapai Peak Carrier Co., owned by O. Ellis Everett, who will also be 60% owner of Kingman TV Co., new Kingman, Ariz., community system. Microwave will relay signals of Phoenix’ 4 stations and Las Vegas’ 2 from mountain peak to community system in Needles, Cal., as well as Kingman system. Also approved by Commission this week was microwave authorization for Pioneer Transmission Corp., to relay signals of KOOK-TV, Billings, Mont. to community system in Riverton, Wyo.

Who jammed World Series, or where’s the varmint that had KID-TV up a tree? That’s burning question around Idaho Falls station this week after it was struck out by secret jamming of channel despite carefully-laid plan to broadcast Series via microwave relay from KTVT, Salt Lake City. After rigging extensive installation involving links with KLIX-TV, Twin Falls and KIDO-TV & KBOI-TV, Boise, attempt to handle first game flopped when “outside” radio signals gummed up KTVT’s Ch. 4. Carroll Seacrist, KID-TV chief engineer, led posse through Idaho hills at night, found camouflaged battery-powered transmitter in tree near relay point. After appropriate removal ceremony, remaining games went on as scheduled.

Britons may not like to be told by Americans—but, according to press association reports, NBC pres. Pat Weaver, plumping heartily for commercial TV, suggested in London speech Sept. 27 that they might take a tip from American practices and let TV put more drive into their economy. He told Institute of Practitioners of Advertising that they should consider fact that sponsored TV in this country has tempted people to work harder and earn more by holding up to them a picture of better products and better living. TV moves goods, he said, and he expressed scant patience with those who opposed TV advertising.

Ralph Lowell, chairman of Lowell Institute Cooperative Bestg. Council of Greater Boston, one of several groups identified with educational WGBH-TV, elected chairman of Educational TV & Radio Center, Ann Arbor, Mich. (film network headquarters), succeeding Dr. George D. Stoddard.

Television Digest

with **ELECTRONICS REPORTS**

PUBLISHED WEEKLY BY RADIO NEWS BUREAU • WYATT BLDG. • WASHINGTON 5, D.C. • TELEPHONE STERLING 3-1755 • VOL. 11: No. 41

SUMMARY - INDEX OF THE WEEK'S NEWS — October 8, 1955

ALLOCATIONS DISCUSSIONS begin at FCC, which asks ODM about chances of getting more vhf. ABC & CBS propose vhf mileage-power cuts (pp. 1 & 8).

THEATRE TV WORLD SERIES unlikely in 1957; despite ability to offer big money, pay-TV proposals seen getting thumbs down as result of fans' clamor (p. 2).

NETWORK RADIO REORIENTS to "block" programming and participating sales in effort to stave off further losses of audience and billings (p. 3).

REASONS WHY BRITISH pictures appear better on home screens explained by Hazeltine's Arthur Loughren and British expert Col. Henn-Collins (pp. 3 & 4).

PAT WEAVER TELLS OFF British antagonists of commercial TV, notably the newspapers and the snobs; "an all-people elite" called "grand design" of TV (p. 5).

SMALL MARKET HELP offered by NBC-TV in "Program Extension Plan" giving "dividends" to advertisers who order any of 44 smaller-area stations (p. 7).

MORE GOING INTO COLOR set production and merchandising as RCA reports satisfactory set sales so far; momentum of World Series maintained (p. 11).

NEW SOURCES OF POWER—human voice and sunlight—tested successfully in "wrist-watch" radio transmitter and rural telephone system (p. 15).

MINOT, N. D. VHF granted to owners of Bismarck's KFYZ-TV; FCC proposes to open up 2 vhf educational channels to commercial applicants (p. 8).

NEW BISMARCK, N. D. and Mayaguez, Puerto Rico stations get under way, bringing on-air total to 455—with possibility of 14 more remainder of year (p. 10).

1000-ft. TOWER CEILING fight abandoned by military as industry-govt. committee ratifies plan asking new airspace criteria, more "antenna farms" (p. 16).

NETWORK RADIO billings figures discontinued by PIB. But monthly TV reports continue, show \$30,344,948 in Aug., indicating \$400,000,000 year (p. 16).

FCC SEEKS ANSWERS TO ALLOCATIONS DILEMMA: FCC's long-awaited major reappraisal of vhf-uhf allocations began this week -- but no major decisions have been made yet. All 7 members participated in discussions Oct. 3-4, listened to staff analyze possible courses of action without giving any recommendations.

Most concrete action taken by FCC was to write Arthur Flemming, director of Office of Defense Mobilization, asking him to explore possibility of obtaining some more vhf channels from Govt. users. No number was specified, because the Commission doesn't know how many it wants -- or whether it's sure it wants them. Meanwhile, FCC staff is working up plans to see what could be done with 3-4 extra channels. There's some optimism that such channels can be obtained, despite warnings that the military needs every vhf channel it has for "scatter" transmissions (Vol. 11:32, 39).

Next FCC session on subject is on or about Oct. 17. In absence of specific decisions this week, Commission and industry are boiling with speculation as to the direction discussions will lead. A persistent prediction is that all deintermixture petitions will be turned down, followed by several big vhf final decisions on hearings which have been held up by FCC consideration of the petitions.

* * * *

Commission received substantial response, meanwhile, to its plea that industry submit its ideas -- ABC and CBS contributing specific suggestions Oct. 7.

ABC proposes extensive deintermixture, stating that this will nurture growth of uhf, and at same time advocated careful vhf mileage-power cuts to permit addition of vhf stations in major markets.

CBS submitted 2 alternatives: "Plan A" proposes vhf drop-ins via mileage-power cuts, gives uhf very minor role. "Plan B" is predicated on obtaining 3 more vhf channels -- one from FM, 2 from Govt. -- and abandoning uhf completely.

CBS submitted proposed city-by-city allocation plan; ABC didn't. Consulting engineer John Mullaney, who recently tendered plan for adding vhf assignments via mileage and power cuts, directionals, etc. (Vol. 11:32), this week supplemented his

study by sending in table showing where 234 vhf stations could be added, along with proposed powers, distances from other stations, offset-carrier positions.

(For the details of foregoing proposals, see p. 8.)

* * * *

Hungering for advice, Commission is now getting plenty of it, will get more. CBS top brass conferred with FCC Chairman McConnaughey Oct. 6, delegation including pres. Frank Stanton, William Lodge, Richard Salant, Ralph Hardy, Sidney Alexander. Next day, ABC pres. Robert Kintner lunched with McConnaughey, accompanied by Ernest Lee Jahncke, Frank Marx, Robert Hinckley. On Oct. 11, Dr. Allen B. DuMont and top staff are due in Washington. Previously, McConnaughey and RCA-NBC chairman Gen. Sarnoff held long conference -- with Gen. Sarnoff's recommendations, if any, remaining undisclosed. To date, NBC has submitted no proposal.

RETMA's new allocations committee, under GE's Dr. W.R.G. Baker (Vol. 11:40), meets Oct. 19, hopes to come up with something for FCC before Dr. Baker leaves for Europe Nov. 1. Senate Commerce Committee's ad hoc committee of engineers, under MIT Prof. Edward Bowles, is still exchanging memos, has done nothing final yet.

Senate Committee's own study is still alive, theoretically, and hearings are still due to start Jan. 17 despite fact that TV probe staff has no majority counsel. At that time, FCC will be expected to report what it has done about allocations as well as progress on network investigation under Roscoe L. Barrow (Vol. 11:39).

Things have finally come to a head, with FCC expected to "do something," but no one at Commission says he can predict when decisions will be made. Though there are cynical predictions Commission might conclude status quo is best, it's regarded as politically expedient for FCC to come up with some plausible solution -- lest it risk becoming exposed sore spot for Republican Administration when Democrats seek issues for next year's election campaigns.

WORLD SERIES ON THE POPCORN CIRCUIT? Is theatre TV ready to make a grab for TV's most popular and thrilling program -- the World Series?

The widely bruited success of recent pay-to-see theatre telecast of Marciano-Moore heavyweight championship bout to some 400,000 paying customers (Vol. 11:39-40), just one week before the free telecast of a hot 7-game Series to perhaps 90,000,000 viewers in U.S., Canada and Latin America, quite naturally has aroused some conjecture in the trade press and elsewhere about the future of World Series TV.

The facts are these: Gillette's 6-year-pact for sponsorship of the Series on NBC-TV and Mutual Radio still has one year to run, but baseball commissioner Ford Frick already is involved in preliminary negotiations for rights to 1957 Series -- though contract probably won't be signed until next summer.

TV rights to 1955 Series cost Gillette something over \$1,000,000 -- and there is no question that rights for 1957 will go for considerably more.

How much can theatre TV offer? The answer, on paper, is -- plenty. With a theatre audience of a mere half-million spectators (200 theatres) paying \$4 a head, the gross for 4 games could be \$8,000,000, and the theatre syndicators could offer at least \$2,500,000 for rights to the 1957 classic. But --

Granted that theatres theoretically could outbid home TV, our inquiries this week indicate that theatre-TV proposals aren't likely to get very far -- even if they could be backed up with a certified check, which, as of now, they cannot.

"There are some things more important than money," Frick told us this week in telephone interview. Though he didn't elaborate, he obviously had in mind the public relations value of free televised series -- and conversely, outraged reactions of fans everywhere if free TV should suddenly be taken away.

"We have no preconceived ideas, though," he added. "We'll listen to anybody." Despite reports that Theatre Network TV will make strong pitch for the 1957 Series, Frick said there had been no overtures yet from closed-circuit groups.

Mere whisper of extension of pay-TV idea to a cherished and traditionally free TV attraction already has fans worked up. Front page editorial in influential Sporting News Oct. 5 warned: "Never televise the World Series on a prepaid basis..."

If commercial sponsors can be persuaded to offer more for their rights to the air waves, well and good. But if the time comes when the average fan has to pay to watch a telecast of a World Series game, then the time also will have come to wonder when grass will start to grow around home plate."

Note: Aroused by theatre-TV boxing bouts, 2 Penna. state legislators have introduced bill to require \$2000 yearly license fee for any establishment charging admissions to telecasts.

THE CHANGING FACE OF NETWORK RADIO: You won't recognize network radio this winter. Beset by loss of billings and audience to TV, it's undergoing a radical face-lifting in programming and sales patterns. The old 15 & 30-min. shows for single sponsors have all but disappeared -- and in their stead have come the concepts of "block" programming and participation sales, the latter pioneered and made profitable by TV.

ABC, CBS & NBC have announced fundamental changes in their radio networking in last few weeks (Vol. 11:37-39). MBS is due to come out next week with own version of how stations, in words of v.p. Robert Monroe, "can make affiliation with Mutual a profitable investment." Taken together, the changes add up to a revolutionary shift in direction of network radio -- and, incidentally, point up how radio has reversed TV's growth pattern, in which networks started comparatively small, then grew stronger as medium developed. Network by network, this is the radio picture:

NBC: Consistently a second runner to CBS Radio over last few years -- some of its affiliates complaining of stepchild treatment because of RCA-NBC dedication to TV -- NBC was nevertheless only network to show gain in July radio billings over July 1954 (see PIB table, Vol. 11:38), doubtless due to success of weekend Monitor.

NBC will extend the "quick listening" format of Monitor to weekdays starting Nov. 7 (Vol. 11:37). This has admittedly antagonized some long-loyal affiliates, who complain revenue from the program is insufficient to compensate them adequately -- to say nothing of the unanimous opposition of the spot reps. NBC has reported about \$600,000 already on books for Monitor in 4th quarter.

CBS: Its "segmentation plan" opens several top-rated evening shows to 5-min. partic. sales, at \$2100 per 5-min. segment (Vol. 11:38). Sales v.p. John Karol said plan represents "a shift in sales philosophy to allow the advertiser to buy in relation to the changing habits of listening."

ABC: It has overhauled virtually its entire evening schedule, effective Oct. 24, dividing programming into 5 separate 30-min. "units," each with a separate theme (Vol. 11:38). Entire schedule will be sold in 5-min. partic., at \$800 per.

MBS: New plan, due to be announced next week, will be based on concept of radio as a "companion" to listeners, as first outlined at NARTB convention in May (Vol. 11:22). Without revealing details, Monroe said plan involves "block" programs which will be unlike either NBC's Monitor or ABC's "thematic" plan. It's understood also to include more 5-min. programs and greater use of local-sale 6-sec. IDs.

Note: PIB has discontinued monthly reports on radio network billings due to recent changes in rate and discount structures that render it difficult and ineffectual to compare networks' gross billings figures (see p. 16).

BETTER BRITISH IMAGES—EXPERTS TELL WHY: We stirred up the cats, apparently, with our reports on the superior quality of British TV images (Vol. 10:45 & 11:36, 40) -- and this week, from both sides of the ocean, came some more explanations. Curiously not a single observer has yet retorted 'tain't so, though perhaps somebody will yet. We've asked the network engineering chiefs and some of the leading station engineers and consultants to comment, too.

If these reports contribute a mite toward eventual improvement of American TV engineering -- which from testimony to date is apparently susceptible of improvement -- the job of pointing up the problem will have proved well worth while.

This week's contributors of expert comment are Hazeltine's research v.p., an acknowledged authority, Arthur V. Loughren, and the British consulting engineer Lt. Col. C.A. Henn-Collins. The British authority is one of the best, as we ourselves can attest from contacts with him during the North African campaign when as a major

he was opposite number to the then Maj. Esterley C. (PX) Page handling Allied radio communications. Consulting engineer Page, whose firm has won renown for its work on "forward scatter" (Vol. 11:32) and who is presently engaged largely in installing stations in the Far East for Uncle Sam, forwarded our query to Col. Henn-Collins.

"It's trite," writes Col. Henn-Collins from London, "to point out that we are not a people for the 'mostest' and 'bestest' and 'grandest', but in the matter of TV pictures, as viewed in the home, it is factual that we usually provide a superior picture. When I have been in the U.S., I have often thought as much. However, I have also seen in the U.S. TV images superior to that provided here by either [BBC or ITA] service, but those have been in TV control rooms..."

Writes Art Loughren: "The question you raise with respect to the British TV image being better than ours and why has been noted by too many observers to permit one to dismiss it as some kind of hallucination..."

For their detailed comment, see below.

WHY THE BRITISH TV images, as viewed in the home, are so obviously superior to the American is diagnosed in technical and economic terms by 2 highly qualified engineering authorities with experience both here and abroad. Here are the replies received in response to our inquiries from Hazeltine's research v.p. Arthur V. Loughren and from Lt. Col. C. A. Henn-Collins, British consulting engineer with offices at 16 Berkeley St., London W-1:

"If we try to explain the observed difference in terms of the resolving power of one system versus the other," states Loughren, "we get nowhere. The real measure of this is obtained by dividing the available bandwidth in kilocycles per second by the number of complete pictures per second. Taking the separation between picture and sound carriers as an indication of the available bandwidth, this gives 140 kilocycles per picture for the U.K. system [405 lines] as compared to 150 kilocycles per picture for the U. S. system [525 lines]. This shows that the system resolving powers favor the U.S. system by a very small margin.
